HOME

Bowdoin College has produced a general *Catalogue* since 1807, when a single broadsheet listed the president, two professors and two tutors; the 1806 graduates (six students), the 1807 graduates (three students); and the College's total student body for that year (forty-two). As the College has grown and evolved, so too has the *Catalogue*.

The *Bowdoin College Catalogue and Academic Handbook* of today serves as the authoritative source of information about Bowdoin—a comprehensive snapshot in time of the College. It contains primarily academic information, including department and program descriptions, major/minor requirements, and course descriptions, in addition to the College's calendar, mission statements, and information about expenses and governance.

The *Bowdoin College Catalogue and Academic Handbook* is overseen by the Office of the Dean for Academic Affairs and the Office of the Registrar. The information it contains is updated annually and is accurate as of August 1, 2022.

Recent editions of the Bowdoin College Catalogue and Academic Handbook can be found in the Archive (<https://bowdoin-public.courseleaf.com/archive/>). For a full archive, visit the Bowdoin Digital Commons (<https://digitalcommons.bowdoin.edu/course-catalogues/>).

GENERAL INFORMATION

Bowdoin is an independent, nonsectarian, coeducational, residential, undergraduate, liberal arts college located in Brunswick, Maine, a town of approximately 20,000 situated close to the Maine coast, twenty-five miles from Portland and about 120 miles from Boston.

Terms and Vacations: The College holds two sessions each year. The dates of the semesters and the vacation periods are indicated in the College Calendar (p. 5).

Accreditation: Bowdoin College is accredited by the New England Commission of Higher Education (NECHE).

Enrollment: The student body numbers 1,951 students (49 percent men, 51 percent women; last two classes: 49/51 and 49/51 percent); nearly 300 students study away one or both semesters annually; 93 percent complete the degree within five years.

Faculty: Student/faculty ratio 9:1; the equivalent of 204 full-time faculty in residence, 100 percent with PhD or equivalent; twenty-two full-time head athletic coaches.

Geographic Distribution of Students: New England, 34 percent; Middle Atlantic states, 21 percent; Midwest, 8 percent; West, 16 percent; Southwest, 4 percent; South, 9 percent; international, 8 percent. Forty-nine states, the District of Columbia, Guam, Northern Mariana Islands, and fifty-four foreign countries are represented. Student of color and international enrollment are 42 percent.

Statistics: As of June 2022, 42,434 students have matriculated at Bowdoin College, and 33,918 degrees in academic programs have been awarded. In addition, earned master's degrees have been awarded to 274 postgraduate students. Living alumni include 22,108 graduates, 2,199 non-graduates, and 123 honorary degree holders (32 alumni, 91 non-alumni).

Offices and Office Hours: The Admissions Office is located in Burton-Little House. The Offices of the President and Dean for Academic Affairs are located in the west side of Hawthorne-Longfellow Library. The Treasurer's Office is located at 82 Federal Street. The Controller's Office is located at 216 Maine Street, 2nd Floor, and the Human Resources Office is located at 216 Maine Street. The Development and Alumni Relations offices are located at 83 and 85 Federal Street and in Copeland House. The Office of the Registrar is located in Jewett Hall. The Division of Student Affairs and the Office of Career Exploration and Development are in the Moulton Union. The Counseling Service is located at 32 College Street. The Department of Facilities Management and the Office of Safety and Security are in Rhodes Hall.

In general, the administrative offices of the College are open from 8:30 a.m. to 5:00 p.m., Monday through Friday.

Telephone Switchboard: Bowdoin College uses an automated call processing system on its main number, 207-725-3000. A live operator can be reached twenty-four hours a day, seven days a week, by pressing "0." Further information about telephone numbers can be found at [bowdoin.edu/directory](https://www.bowdoin.edu/directory/) (<https://www.bowdoin.edu/directory/>).

Bowdoin College Website: [bowdoin.edu](https://www.bowdoin.edu/) (<https://www.bowdoin.edu/>).

COLLEGE CALENDAR

**Religious holidays and Bowdoin's policy on observance of these can be found at the bottom of this page. Federally recognized holidays are also found at the bottom of this page.*

Date	Event
221st Academic Year	
Fall 2022	
Aug. 21-22, Sun. – Mon.	First-Year International Student Orientation
Aug. 23, Tues.	First-Year arrival day
Aug. 24-27, Wed. – Sat.	Orientation Trips
Aug. 27-30, Sat. – Tues.	Orientation
Aug. 28, Sun.	College housing ready for occupancy for upperclass students, noon
Aug. 30, Tues.	Opening of the College—Convocation, 3:30 p.m.
Aug. 31, Wed.	Fall semester classes begin, 8:00 a.m.
Sept. 15-18, Thurs. – Sun.	Explore Bowdoin I
Sept. 22-24, Thurs. – Sat.	Alumni Council, Alumni Fund Directors, and BRAVO National Advisory Board meetings
Sept. 30-Oct. 2, Fri. – Sun.	Homecoming Weekend
Oct. 7, Fri.	Fall vacation begins after last class
Oct. 12, Wed.	Fall vacation ends, 8:00 a.m.
Oct. 13-15, Thurs. – Sat.	Meetings of the Board of Trustees
Oct. 13-16, Thurs. – Sun.	Explore Bowdoin II
Oct. 21, Fri.	Sarah and James Bowdoin Day
Oct. 21-23, Fri. – Sun.	Family Weekend
Nov. 8, Tues.	Election Day
Nov. 23, Wed.	Thanksgiving vacation begins, 8:00 a.m.
Nov. 28, Mon.	Thanksgiving vacation ends, 8:00 a.m.
Dec. 9, Fri.	Last day of classes
Dec. 10-13, Sat. – Tues.	Reading period
Dec. 14-19, Wed. – Mon.	Fall semester examinations
Dec. 20, Tues.	College housing closes for winter break, noon
Dec. 23-Jan. 8, Fri. – Sun.	College holidays, most offices closed
Spring 2023	
Jan. 17, Tues.	College housing available for students participating in CXD's Sophomore Bootcamp, 8:00 am
Jan. 18-20, Wed. – Fri.	Sophomore Bootcamp, Career Exploration and Development
Jan. 21, Sat.	College housing available for occupancy, 8:30 a.m.
Jan. 23, Mon.	Spring semester classes begin, 8:00 a.m.

Feb. 9-11, Thurs. – Sat.	Meetings of the Board of Trustees
March 10, Fri.	Spring vacation begins after last class
March 11, Sat.	College housing closes for spring vacation, noon
March 25, Sat.	College housing available for occupancy, 8:30 a.m.
March 27, Mon.	Spring vacation ends, 8:00 a.m.
March 30–April 1, Thurs. – Sat.	Alumni Council, Alumni Fund Directors, and BRAVO National Advisory Board Meetings
April 13-15, Thurs. – Sat.	Admitted Student Open House
May 5, Fri.	Honors Day
May 10, Wed.	Last day of classes
May 11-13, Thurs. – Sat.	Meetings of the Board of Trustees
May 11-14, Thurs. – Sun.	Reading Period
May 15-20, Mon. – Sat.	Spring semester examinations
May 21, Sun.	College housing closes for non-graduating students, noon
May 26, Fri.	Baccalaureate
May 27, Sat.	The 218th Commencement Exercises
May 27, Sat.	College housing closes for graduating students, 6:00 p.m.
June 1-4, Thurs. – Sun.	Reunion Weekend

* *Regular class schedules in effect on holidays listed meet unless otherwise noted. Staff, check with supervisor to determine if office is closed.*

In recognition of Bowdoin's commitment to a diverse and inclusive student body and the variety of religions observed and practiced by our students, faculty are encouraged to avoid conflicts between in-class examinations and other significant academic work and major religious holidays. The calendar below was developed in collaboration with the director of religious and spiritual life, and includes major observances of the officially recognized religious groups at Bowdoin. In addition, the multi-faith calendar (<https://hds.harvard.edu/community-life/religious-and-spiritual-life/multifaith-calendar/>) from the Harvard Divinity School is a valuable resource regarding many other religious observances that do not appear in the list below, but that may be of significance to members of our community.

Students are expected to declare their intention to observe religious holidays at the beginning of the semester. Students should work with instructors when there are conflicts with scheduled examinations, papers, or project due dates and significant religious holidays observed by the students so that, when warranted, alternative arrangements for completing the work may be made.

Students or faculty who have any questions regarding how best to balance the academic calendar alongside religious observances are encouraged to consult with the director of religious and spiritual life.

Date	Event
Religious Holidays	

Not within 2022–
2023 academic
year

Sept. 25-27, Sun.-
Tues. Rosh Hashanah, begins at sundown on Sept. 25 and
concludes at sundown on Sept. 27

Oct. 4-5, Tues.-
Wed. Yom Kippur, begins at sundown on Oct. 4 and
concludes at sundown on Oct. 5

Oct. 24, Mon. Diwali

Nov. 24, Thurs. Thanksgiving (Nov. 23-25 are College holidays, most
offices closed)

Dec. 23, Fri. Christmas holiday observed (College holiday, most
offices closed)

Jan. 2, Mon. New Year's Day holiday observed (College holiday,
most offices closed)

Jan. 16, Mon. Martin Luther King Jr. Day (College holiday, some
offices closed)

Feb. 20, Mon. President's Day (classes in session, College holiday,
some offices closed)

May 29, Mon. Memorial Day (College holiday, many offices closed)

June 19, Mon. Juneteenth (College holiday, most offices closed)

July 4, Tues. Fourth of July (College holiday, most offices closed)

* Recognized in Maine as Indigenous Peoples' Day

THE OFFER OF THE COLLEGE

To be at home in all lands and all ages;
To count Nature a familiar acquaintance,
And Art an intimate friend;
To gain a standard for the appreciation of others' work
And the criticism of your own;
To carry the keys of the world's library in your pocket,
And feel its resources behind you in whatever task you undertake;
To make hosts of friends . . .
Who are to be leaders in all walks of life;
To lose yourself in generous enthusiasms
And cooperate with others for common ends—
This is the offer of the college for the best four years of your life.

Adapted from the original "Offer of the College," published in 1906 as the foreword to *The College Man and the College Woman* by William DeWitt Hyde, seventh president of Bowdoin College (1885–1917).

ADMISSION AND FINANCIAL AID

Admission to the College

Each year the Admissions Committee at Bowdoin College evaluates applications for admission through its three application programs: Early Decision I, Early Decision II, and Regular Decision. The College strives to attract a diverse, multitalented, intellectually adventurous student body. In selecting the first-year class, the Committee pays close attention to a variety of factors; these include a student's academic achievements, extracurricular involvements, and potential to contribute to the Bowdoin community.

Bowdoin requires all applicants to submit the Common Application, or the Coalition Application, or the QuestBridge Application and complete the Bowdoin Supplement. These applications provide students with a uniform framework to present their credentials. No preference is given among the applications.

While no single factor determines a candidate's eligibility for admission, Bowdoin College is, first and foremost, an academic institution. Therefore, an applicant's high school performance and the level of challenge represented by the coursework are of particular interest to the members of the Admissions Committee. Each applicant must make arrangements with the appropriate high school administrator to submit all official high school transcripts. The Admissions Committee strives to understand each student's performance in the proper context and therefore requires high school administrators to submit a Secondary School Report (SSR) and a High School Profile. Doing so enables the Committee to properly interpret the information presented on the transcript(s). Ideally, the profile illuminates individual high school policies regarding issues such as weighting of grades, rank in class, Honors/AP/IB course offerings, etc. Comments from school officials on the SSR as well as a letter of recommendation from one teacher who has taught the student in an academic core subject (core subjects include English, math, lab sciences, social sciences, and foreign languages) and one additional teacher or other recommendation can also help the Admissions Office better understand a prospective student's preparation for Bowdoin. Since 1969, the College has made the submission of standardized testing an optional part of the application. Prospective students may decide whether or not their individual test results will enhance their academic profile and application. Home-schooled students and students attending high schools with narrative evaluations only must submit either a graded paper or lab assignment between three and five pages in length that includes written feedback and grading metrics—or results from either the SAT or ACT, in addition to their other application materials.

Because of the residential nature of the College, the strong emphasis on community values, and a core belief in collaboration and the open exchange of ideas both in and beyond the classroom, the Admissions Committee does not limit its assessment to a student's transcript and testing. Students have the opportunity, through the personal statement and the optional supplemental essay and video response, to reveal the quality and depth of their thinking, their ability to communicate ideas in writing, and how they approach learning and the opportunity to interact with others. Students also detail the activities that have captured their interest, areas of accomplishment and recognition, and how they have focused their energies outside the classroom. When possible, applicants are encouraged to visit the campus, interview, and/or attend a virtual event or offering. Interviews are available from early June until early

December. Students who choose to interview with a Bowdoin alumnus or alumna must submit their requests before December 1 of each year.

All Early Decision and Regular Decision admissions decisions for US citizens, permanent residents, and international students are made under a "need-blind" policy. Under this policy, an applicant's financial resources are not a factor in determining whether or not the student will be admitted. All students who anticipate needing financial aid are required to complete an aid application. See Financial Aid, below, for more details. Since the fall of 2016, Bowdoin waives the application fee for any student applying for financial aid from the College, and/or for first-generation students (neither parent has a degree from a four-year institution).

More information is available at bowdoin.edu/admissions (<http://bowdoin.edu/admissions/>).

Admission: Policies and Procedures

In May 1989, the Governing Boards of Bowdoin College approved the following statement on admissions:

Bowdoin College is, first and foremost, an academic institution. Hence academic accomplishments and talents are given the greatest weight in the admissions process. While accomplishments beyond academic achievements are considered in admissions decisions, these are not emphasized to the exclusion of those applicants who will make a contribution to Bowdoin primarily in the academic life of the College. In particular, applicants with superior academic records or achievements are admitted regardless of their other accomplishments. All Bowdoin students must be genuinely committed to the pursuit of a liberal arts education, and therefore all successful applicants must demonstrate that they can and will engage the curriculum seriously and successfully.

At the same time that it is an academic institution, Bowdoin is also a residential community. To enhance the educational scope and stimulation of that community, special consideration in the admissions process is given to applicants who represent a culture, region, or background that will contribute to the diversity of the College. To ensure that the College community thrives, special consideration in the admissions process is also given to applicants who have demonstrated talents in leadership, in communication, in social service, and in other fields of endeavor that will contribute to campus life and to the common good thereafter. And to support the extracurricular activities that constitute an important component of the overall program at Bowdoin, and that enrich the life of the campus community, special consideration in the admissions process is also given to applicants with talents in the arts, in athletics, and in other areas in which the College has programs. The goal is a student body that shares the common characteristic of intellectual commitment but within which there is a considerable range of backgrounds, interests, and talents.

Although Bowdoin does not require that a student seeking admission take a prescribed number of courses, the typical entering first-year student will have had four years each of English, foreign language, mathematics, and social science, and three to four years of laboratory sciences. Further, most will have taken courses in the arts, music, and computer science.

Candidates applying to Bowdoin College are evaluated by members of the admissions staff in terms of the following factors: academic record, the level of challenge represented in the candidate's coursework, counselor/teacher/other recommendations, application and essays, overall

academic potential, school and community involvement, leadership, and personal qualities.

Application and Admission Procedures

Students may apply to Bowdoin through the regular admissions program or through either of two early decision programs. The application deadline for Early Decision I is November 15. The deadline for Early Decision II and Regular Decision is January 5. Application materials for all programs are the same, except that early decision applicants must also complete the Early Decision Agreement that is included with the application materials.

The Application includes the Personal Application, the Secondary School Report, a Mid-Year School Report, one Teacher Evaluation form, one other Teacher or Other Evaluation form, an optional arts supplement and optional video response, and the Early Decision form, if applicable. Students may apply using the Common Application or the Coalition Application; the requirements are the same, with no preference on which application is submitted. The College is also a QuestBridge partner and accepts match and non-match applications (with the required Bowdoin Supplement). Those who wish to be considered for financial aid must file the College Scholarship Service Profile online or the appropriate international aid forms. US citizens and permanent residents seeking financial aid are required to complete the FAFSA. Applicants for admission must also submit the \$65 application fee or an application fee waiver. Application fees are automatically waived for first-generation-to-college students and/or for any student applying for financial aid from the College.

Regular First-Year Admission

The following items constitute a completed admissions folder:

1. The Common Application, or the Coalition Application, or the QuestBridge Application, and Bowdoin Supplement submitted with the application fee (\$65). The deadline for regular applications is January 5.
2. *School Report*: The college advisor's assessment of the candidate's character and accomplishments and a copy of the secondary school transcript should be submitted to Bowdoin no later than January 5. A transcript of grades through the midyear marking period (Mid-Year School Report) should be returned to Bowdoin by February 15.
3. *Recommendations*: Each candidate is required to submit one teacher recommendation, which should be completed by a core academic subject teacher. Core academic subjects are English, foreign language, mathematics, science, and social studies. An additional teacher or other recommendation must also be completed. Recommendations should be submitted as soon as possible and no later than January 5.
4. *College Board or ACT Scores*: Bowdoin is test-optional and allows each applicant to decide if their standardized test results should be considered as part of the application. In recent years, up to 46 percent of Bowdoin's matriculating applicants chose not to submit standardized test results. The candidate is responsible for making arrangements to take the examinations and for ensuring that Bowdoin receives the scores if they want them to be considered as part of the application. Students should arrange for an official report of the scores to be sent by the testing agency. Scores may also be submitted by a school counselor or the student may submit them through their Application Portal. Students choosing to submit

their SAT I (Reasoning Test) or ACT scores should complete all examinations no later than January of the senior year if applying under the Regular Decision program. Students will indicate their choice regarding use of tests on the application.

5. *Visit and Interview*: A personal interview is strongly encouraged. Interviews are available with a member of the admissions staff or a senior interviewer. A number of carefully selected and trained Bowdoin senior students conduct interviews to supplement regular staff appointments during the summer months and from September into December. In-person and virtual interviews are available from early June through early December. In addition, members of the Bowdoin Regional Admissions Volunteer Organization (BRAVO) are available worldwide to provide interviews locally or virtually.

6. *Notification*: All candidates will receive a final decision on their application for admission by the end of March. A commitment to enroll is not required of any first-year candidate (except those applying for Early Decision) until May 1. To accept an offer of admission from Bowdoin, a student must submit a \$300 admissions deposit or a deposit waiver/statement of matriculation confirmation, which is credited to the first semester's bill.

7. Bowdoin will waive the application fee for any first-generation-to-college student and/or for any student applying for financial aid from the College.

8. All acceptances are contingent upon completion of the senior year in good academic and social standing.

Early Decision

Bowdoin offers admission through two Early Decision programs in addition to the Regular Decision round. Candidates who are certain that Bowdoin is their first choice may wish to consider this option. The guidelines for Early Decision are as follows:

1. Candidates' application files must include the Early Decision agreement form, indicating that they wish to be considered for Early Decision and that they will enroll if admitted. Early Decision candidates may file regular or non-binding early applications at other colleges, but only with the understanding that these will be withdrawn and no new applications will be initiated if they are accepted under an Early Decision plan.
2. The Common Application, or the Coalition Application, or the QuestBridge Application, essays, accompanied by the Early Decision agreement, a School Report Form, a secondary school transcript of grades, one teacher recommendation, one other recommendation, and the application fee of \$65 (or fee-waiver) must be submitted to Bowdoin by November 15 for Early Decision I (notification by mid-December), or by January 5 for Early Decision II (notification by mid-February).
3. Candidates admitted via Early Decision who have financial need as established through review of required financial aid documents by the College will be notified of the amount of their award along with their Early Decision acceptance, provided their financial aid forms are on file at Bowdoin by the application deadlines.
4. Submit SAT or ACT scores if the candidate so desires.
5. An Early Decision acceptance is contingent upon completion of the senior year in good academic and social standing.

6. There are three possible admission decisions for Early Decision I candidates: admission to Bowdoin, deferral for consideration in March, and denial of admission. Each year a number of applicants who are deferred under Early Decision are accepted in March, when decisions on all regular admissions are released. Early Decision candidates may be denied admission if the Admissions Committee concludes that their credentials will not be competitive for further consideration in the Regular admission round.

7. Responsibility for understanding and complying with the rules for Early Decision rests with the candidate. Should an Early Decision candidate violate the provisions of the program, the College may rescind any offer of admission and financial aid.

Deferred Admission

Admitted students who wish to delay their matriculation to the College for one year must request a deferred enrollment from the dean of admissions by June 1, explaining the reasons for delaying matriculation. Bowdoin will hold a place in the next entering class for any student who is granted a deferment. The student, in return, must agree to withdraw all applications at other colleges or universities and may not apply for admission to other institutions during the deferral year. Financial aid candidates must reapply for aid during the year following the deferral. The \$300 nonrefundable admissions deposit (or deposit waiver) is still due by the May 1 reply date.

Admission with Advanced Standing

Bowdoin recognizes College Entrance Examination Board Advanced Placement (AP) and International Baccalaureate (IB) results and may grant advanced placement and credit toward graduation for superior performance in those programs. Applicants to Bowdoin are encouraged to have AP and IB test results sent to the Admissions Office.

Decisions on both placement and credit are made by the appropriate academic department in each subject area. Some departments offer placement examinations during the orientation period to assist them in making appropriate determinations. Every effort is made to place students in the most advanced courses for which they are qualified, regardless of whether they have taken AP or IB examinations before matriculation. Determinations of advanced placement and credit are made during the student's first year at Bowdoin. Credit and placement policies for AP and IB examinations may be found on the Office of the Registrar website.

Some students have the opportunity to enroll in college-level coursework prior to high school graduation. Bowdoin College will consider granting credit for pre-college coursework, providing the following criteria have been met: the coursework must have been completed on a college campus, must have been completed in a class with matriculated college students, may not have been used to satisfy any high school graduation requirements, and must represent a standard of achievement comparable to what is expected at Bowdoin in a field of study characteristic of the liberal arts. Questions about applying for transfer credit can be directed to the Office of the Registrar or viewed on their website at [bowdoin.edu/registrar/](https://www.bowdoin.edu/registrar/).

First-year students who matriculated prior to fall 2013 may apply a maximum of eight course credits toward the degree from the Advanced Placement program, the International Baccalaureate program, or pre-college coursework. Students who matriculate beginning in the fall of 2013 may apply a maximum of four pre-matriculation credits toward

the Bowdoin degree from approved exams or other approved college/university courses.

Home-Schooled Applicants

Home-schooled applicants and candidates applying from secondary schools that provide written evaluations rather than grades are required to submit either a graded paper or lab assignment between three and five pages in length that includes written feedback and grading metrics—or results from either the SAT or ACT, in addition to their other application materials. A personal interview is also strongly recommended.

International Students

The Admissions Committee welcomes the perspective that international students bring to the Bowdoin community. Admissions policies and procedures for international students are the same as for regular first-year applicants, with one exception: All international students who submit the College Scholarship Service Foreign Student Financial Aid Form or the Bowdoin International Financial Aid Form or Canadian students who submit the Canadian Financial Aid Form (both available on the Bowdoin student aid website) when they file the application for admission will be considered for Bowdoin funds to defray part of their college costs.

Transfer Students

Each year, a limited number of students from other colleges and universities will be admitted to sophomore or junior standing at Bowdoin. The following information pertains to transfer candidates:

1. Students should file the Transfer Common Application and essay (a brief statement indicating the reasons for transferring to Bowdoin), and the Bowdoin Supplement (available from the Common Application) with the \$65 application fee by March 1 for fall admission. Applicants must arrange to have submitted by the same deadlines transcripts of their college and secondary school records, a statement from a dean or advisor at their university or college, and at least two recommendations from current or recent professors. As soon as it becomes available, an updated transcript including spring semester grades should also be sent. Candidates whose applications are complete will normally be notified of Bowdoin's decision in late April. (While space is rarely available for spring transfer admission, details about spring admission can be found at [bowdoin.edu/admissions](https://www.bowdoin.edu/admissions/) (<https://www.bowdoin.edu/admissions/>).)
2. Transfer candidates usually present academic records of "B+" work or better in a course of study that approximates the work that would have been done at Bowdoin had they entered as first-year students. Bowdoin accepts transfer credit for liberal arts courses in which a grade of C– or higher has been received. Transfer students should understand that although they may expect an estimate regarding class standing upon transferring, official placement is possible only after updated transcripts have arrived at the registrar's office and have been appraised by the appropriate dean and academic departments. To qualify for the bachelor of arts degree, students must complete Distribution Requirements and Division Requirements, and these requirements normally must be satisfied by courses taken at Bowdoin.
3. Although two years of residence are required for a Bowdoin degree, students who have completed more than four semesters of college work are welcome to apply for admission, with this

understanding. Students who have already received their bachelor's degree are ineligible for first-year or transfer admission.

4. The financial aid funds available for transfer students may be limited by commitments the College has already made to enrolled students and incoming first-year students. US applicants for aid must submit a Free Application for Federal Student Aid (FAFSA) and the College Scholarship Service's Profile by March 1. International applicants for aid must file either the College Scholarship Service Foreign Student Financial Aid Form or the Bowdoin International Financial Aid Form (available on the Bowdoin student aid website (<https://www.bowdoin.edu/student-aid/>)) by March 1. Canadian applicants must submit the Canadian Financial Aid Form (available on the Bowdoin student aid website (<https://www.bowdoin.edu/student-aid/>)).

Special Students

Each semester, as space within the College and openings within courses permit, Bowdoin allows a few special or visiting students who are not seeking a degree from Bowdoin to enroll. In general, this program is intended to serve the special educational needs of residents in the Brunswick area who have not yet completed a bachelor's degree, as well as students who are pursuing a degree elsewhere and who, for truly exceptional reasons, wish to take a course at Bowdoin. Teachers wishing to upgrade their skills or Bowdoin graduates who need particular courses to qualify for graduate programs are also considered for this program. Special students are billed at a per course rate for up to two courses per term. No more than two credits may be taken each semester. No financial aid is available for special students. Interested applicants should submit the completed special student form and enclose the \$65 application fee at least one month prior to the beginning of the semester. A personal interview is required. Inquiries should be addressed to the special student coordinator in the Admissions Office.

Summary of Application Deadlines

Application materials for admission include the completed Common Application, Coalition Application, or QuestBridge application and the Bowdoin Supplement. New applicants should submit these materials in accordance with the following deadlines:

Early Decision I — *November 15*

Early Decision II — *January 5*

Regular Admission — *January 5*

Transfer Applicants — *March 1: Common Application and Bowdoin Supplement*

All correspondence concerning first-year and transfer admission to the College should be addressed to the Office of Admissions, Bowdoin College, 5000 College Station, Brunswick, ME 04011; telephone: 207-725-3100; fax: 207-725-3101

Financial Aid

Bowdoin College's financial aid policy is designed to supplement family resources so that as many students as possible can attend the College. Scholarships, grants, and student employment are the principal sources of aid for Bowdoin students who need help in meeting educational expenses.

Due to Bowdoin's belief that students who receive financial aid as grants should also be responsible for a portion of their expenses, student

employment will generally be part of the financial aid notice. While loans may be available to supplement other resources, they will not be included in a typical financial aid notice. Annual submission of the required application forms guarantees consideration for all forms of financial aid available to Bowdoin students, including grants, jobs, and loans.

Need-Based Aid

Bowdoin's policy is to meet a student's full financial need, as calculated by the College using institutional need-based financial aid policies, for each year in which they qualify for aid. Financial need is the difference between Bowdoin's costs and the family's share. The College derives the family share from parental income and assets, household size, student assets, student earnings, and may include other resources such as gifts or non-College scholarships, available to supplement educational costs.

Need-Blind Admission

Bowdoin practices need-blind admission. Need-blind means that the ability to pay the College's tuition and fees is not part of the decision to admit a student. The College seeks highly motivated students who are interested in an undergraduate experience that will allow them to explore their academic interests and contribute to a vibrant residential community. Those students come from a wide variety of family backgrounds and economic circumstances, and Bowdoin believes in creating opportunity for all students regardless of family income.

Available resources limit our ability to be need-blind for all admission categories. For wait-listed and transfer students, Bowdoin may be "need aware" during the admission process, and a family's finances may be a factor in the final admission decision. If admitted, students from these groups will have their full need met based on standard policies assuming the student's financial aid file is complete by published deadlines.

Bowdoin's Financial Aid Resources

Over 70 percent of Bowdoin's scholarship budget comes from endowed funds given by alumni and friends of the College. In 2021–2022, from funds it administers, Bowdoin distributed \$55.7 million in need-based scholarships, loans, and earnings. Grants from all sources exceeded \$52 million in 2021–2022, with just under 50 percent of the student body receiving need-based assistance. In the Class of 2026, just under 50 percent of the entering class received need-based grants. The average Bowdoin College offer for incoming students was \$62,350 (including Bowdoin grant, SEOG, Pell, and campus job).

Information on the availability of financial aid is accessible through the College's Student Aid Office. The Office of Development can answer any questions regarding endowed funds and the establishment of such funds.

Eligibility for Aid

To be eligible for grant aid at Bowdoin College, a student must:

1. Be a degree candidate who is enrolled or is accepted for enrollment on at least a half-time basis; and
2. Demonstrate financial need, as determined by the College through our institutional policies and procedures.

In addition, to qualify for any of the programs subsidized by the federal government, a student must be a citizen or an eligible non-citizen and apply for federal aid using the FAFSA.

Transfer students who did not apply for aid or were not eligible for aid at the time of admission are not considered for aid at any time during their enrollment.

A student is normally eligible for Bowdoin aid for a maximum of eight semesters of study. The College's Financial Aid Committee may offer a ninth semester of aid if circumstances warrant it and approved by the dean's office in cooperation with the Financial Aid Committee. Upon completion of their degree requirements, students must graduate and cannot enroll for additional semesters, even if they have been enrolled for fewer than eight semesters and regardless of if they are recipients of federal, state, or institutional financial aid. In addition, students should not avoid registering for necessary courses to prolong their enrollment.

Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) for Student Aid is a requirement for all Bowdoin students who are recipients of federal, state, and institutional aid programs (including Title IV federal aid programs). Federal regulations require all schools participating in state and federal aid programs to monitor SAP. To be eligible for federal, state, and institutional aid, Bowdoin students are required to maintain satisfactory academic progress toward their bachelor's degree.

Bowdoin expects all students to maintain an acceptable level of academic progress, therefore this policy applies to all matriculated students. At the close of each semester, once grades post, all students' records will be concurrently assessed for academic and student aid SAP. All students earning a cumulative or semester GPA of less than 2.000 will be reviewed, as well as those who have not met the quantitative measure outlined below. These standards have been developed in accordance with federal, state, and institutional regulations that govern financial aid programs.

There are three distinct dimensions to the satisfactory academic progress standards:

- completing the degree requirements within an established timeframe;
- maintaining the minimum required grade point average (GPA); and
- achieving a minimum rate of academic progression each year.

These standards include an opportunity to appeal the denial of financial aid if the student has faced unusual circumstances which prevented the student from attaining the minimum standards.

View the full Satisfactory Academic Progress (SAP) for Student Aid on the Office of Student Aid website (<https://www.bowdoin.edu/student-aid/consumer-information/satisfactory-academic-progress.html>).

Satisfactory Academic Progress (SAP) for Academics

It is important to note that the College's overall Satisfactory Academic Progress policy and the College's financial aid SAP policy necessarily share regulations. While these policies share details, they are implemented separately from one another to maintain the integrity of each process. The Office of Student Aid, the Office of the Registrar, and the Office of the Dean of Students work jointly to ensure that student communication is coordinated through any warning and appeal processes. View the complete Satisfactory Academic Progress for Academics policies in the Academic Standards and Regulations section of the Catalogue (<https://bowdoin-public.courseleaf.com/academic-standards-regulations/>) and on the Office of the Registrar's website (<https://www.bowdoin.edu/registrar/students/completing-degree/satisfactory-academic-progress.html>).

Determination of Need

Bowdoin determines a student's financial aid eligibility from information submitted on the CSS Profile, FAFSA, and federal income tax returns and/or other requested documents (see Financial Aid Instructions).

Parents are responsible for the student's educational expenses, according to their financial ability to contribute. Divorce or separation of a student's parents does not absolve either parent from this obligation.

Bowdoin's need-based financial aid formula considers a student's assets when evaluating need for institutional grant resources. The formula also takes into consideration the number of dependents in the family household, as well as the number of dependents enrolled on a full-time basis for a maximum of eight semesters in undergraduate degree programs.

Students are also expected to contribute to the cost of education by earning income during the summer and over the course of the academic year. This expected student contribution will vary depending upon current policies.

The sum of these resources when subtracted from Bowdoin's cost determines the student's need and eligibility for Bowdoin's financial aid funding.

Types of Aid Notices

First-Year Student Notices

Approximately 250 entering students receive financial aid each year to help meet their expenses. Recently these offers have ranged from \$1,600 to over \$80,000. Normally, financial aid recipients receive an aid decision with their letter of admission to the College. Financial aid offers become final after trustees approve the academic year costs and students complete all required documents.

Upperclass Notices

All continuing students applying for aid must submit all required application material by the published deadlines each year. Need-based scholarship amounts change each year as a function of changes in costs, family income, and net worth including home and business equity, family size, and number of children attending undergraduate college on a full-time basis. For a more complete description of Bowdoin's financial aid program, visit the Office of Student Aid website (<https://www.bowdoin.edu/student-aid/>).

Bowdoin National Merit Scholars

Current Bowdoin National Merit Scholars with continued demonstrated financial need each year at Bowdoin receive a renewable \$2,000 scholarship. Remaining financial need is met with grant and a modest level of employment. Recipients of these scholarships who do not demonstrate financial need at Bowdoin receive a \$1,000 instead, renewable each year. Beginning in fall 2020, all new recipients receive \$1,000 annually regardless of need level.

Student Loans

While loans are no longer part of a standard financial aid offer, most students may borrow to supplement other resources and defray the family's share of educational costs. Federal Direct Loan monies are typically available for those eligible for Federal student aid programs.

Student Employment

Bowdoin's standard financial aid decisions include an expectation that the student will work during the summer and academic year. The student may choose to work or not; this decision has no effect on the grant offer.

Beginning in the 2021–2022 academic year, for students whose combined calculated parental income is less than \$75,000 (with typical assets), Bowdoin will eliminate the summer work expectation and replace the amount with equivalent grant support.

Bowdoin's student employment program offers a wide variety of opportunities to undergraduates, including direct employment at Bowdoin and at outside agencies represented on the campus or located in the community. Employment opportunities are open to all students who are interested and able to work. For students choosing to have the Student Employment Office assign them a campus job, the First-Year Job Placement Program (FYJPP) assigns students to positions prior to their arrival in the fall. There are over 2,500 campus jobs available in College departments and offices. The annual student payroll currently stands at more than \$1,900,000.

To learn more about student employment, visit the Bowdoin Student Employment Office (<https://www.bowdoin.edu/student-employment/>) website.

International Students

Bowdoin offers need-based financial aid as part of its need-blind admission policy for international students. The student must file the CSS Profile application for aid consideration; the link is available on the Student Aid website. International students must also submit original documentation of income and taxes paid/withheld annually for their parents, **and** employer provided documentation of income and benefits. International student aid must be renewed annually and students who did not apply for aid at the time of admission may apply in future upperclass years.

Federal Financial Aid Programs Available at Bowdoin

The College participates in the Federal Work-Study Program, the Federal Supplemental Educational Opportunity Grants Program, the Federal Pell Grant Program, and the Federal Direct Loan Program previously mentioned. The College also works closely with states that may provide aid resources to students to help meet educational expenses.

Veterans Benefits

The degree programs of Bowdoin College meet the standards set by the Maine State Approving Agency for Veterans Education Programs for persons eligible for benefits (G.I. Bill®) from the US Department of Veterans Affairs. Bowdoin participates in the Yellow Ribbon program. Students who request veterans' educational assistance are required to have all previous postsecondary experience evaluated for possible transfer credit in order to be eligible for benefits. For more information, contact the Student Aid Office (<https://www.bowdoin.edu/student-aid/>).

Graduate Scholarships

Bowdoin is able to offer a number of scholarships for postgraduate study at other institutions. Grants of various amounts are available to Bowdoin graduates who continue their studies in the liberal arts and sciences and in certain professional schools. Bowdoin provides more than \$400,000 in graduate scholarship assistance to over eighty students annually. Further information about these scholarships is available online

or by contacting the Student Aid Office at sao@bowdoin.edu (<https://catalogue.bowdoin.edu/admission-financial-aid/sao@bowdoin.edu>).

Aid Application and Deadlines

Consideration for financial aid is contingent upon receipt of an on-time application each year. All candidates for aid must submit the CSS Profile form by the date specified. US citizens and eligible non-citizens must also file the FAFSA (Free Application for Federal Student Aid).

Whether or not a student receives financial aid from Bowdoin, long-term, low-interest loans under the Federal Direct Loan program are available to US citizens and eligible non-citizens.

When students apply for financial aid at Bowdoin, they agree to provide a complete federal tax return information for both student and parent(s), plus any other documentation that may be required. Once the financial aid application is complete, the Student Aid Office will review a candidate's request for assistance.

Application Deadlines

For financial aid consideration, applicants must submit their complete application for admission and all required aid application forms and documents by the appropriate deadlines. Additional information about the admission and financial aid process at Bowdoin is available on the admissions (<https://www.bowdoin.edu/admissions/>) and student aid (<https://www.bowdoin.edu/student-aid/>) websites. Deadlines for a complete financial aid application are as follows:

Domestic Applicants:

Early Decision I:

November 15: CSS Profile, FAFSA, and most recent federal tax returns, including business tax returns (i.e., Schedule C, E, F, Form 1065, Form 1120, and Form 1120S), submitted directly to the College Board's IDOC service.

Early Decision II:

January 5: CSS Profile, FAFSA, and most recent federal tax returns, including business tax returns (i.e., Schedules C, E, F, Form 1065, Form 1120, and Form 1120S), submitted directly to the College Board's IDOC service.

Regular Admission:

February 1: CSS Profile, FAFSA, and most recent federal tax returns, including business tax returns (i.e. Schedules C, E, F, Form 1065, Form 1120, and Form 1120S), submitted through the College Board's IDOC service.

International Applicants:

International applicants must submit the CSS Profile Form and required income documentation by November 15 for Early Decision I applicants, January 5 for Early Decision II applicants, and February 1 for all other applicants.

Transfer Students:

March 1: CSS Profile, FAFSA, and most recent federal tax returns, submitted through the College Board's IDOC service.

Returning Students:

February 15: CSS Profile, FAFSA, and most recent federal tax returns, submitted through the College Scholarship Service's IDOC service.

Further information about application procedures, eligibility, need calculation, and aid decisions—plus descriptions of individual federal, state, and College programs—is available by visiting the Student Aid website (<https://www.bowdoin.edu/student-aid/>). Inquiries regarding Bowdoin's student aid programs may be addressed to Office of Student Aid, Bowdoin College, 5300 College Station, Brunswick, ME 04011-8444; telephone: 207-725-3144; fax: 207-725-3864.

bowdoin.edu/studentaid (<http://bowdoin.edu/studentaid/>)

EXPENSES

College Charges

Fees for the 2022–2023 academic year are listed below. Travel, books, and personal expenses are not included; students must budget for such items on their own. For planning purposes, students and parents should anticipate that tuition and other charges will increase each year to reflect program changes and other cost increases experienced by the College.

Expense	By Semester	Full Year
Tuition ^a	\$30,476	\$60,952
Housing	\$4,025	\$8,050
Board (19-meal plan)	\$4,361	\$8,722
Student Activities Fee ^a	\$288	\$576
Class Dues ^a :	\$20	\$40
Health Insurance (See Health Care section below)		\$2,803

^a Required fees for all students on campus.

Off-Campus Study Fee

The College assesses a fee for participation in off-campus study programs. The fee for 2022–2023 is \$1,500 per program.

Registration and Enrollment

All continuing students are required to register for courses during registration “rounds” held during the prior semester in accordance with the schedules posted at the College. Any student who initially registers after the first week of classes must pay a \$50 late fee. All students are further required to submit an Enrollment Form by the end of the first week of classes. While registration places students in courses, the Enrollment Form serves to notify the College that the student is on campus and attending classes. A fee of \$50 is assessed for late submission of the Enrollment Form.

Payment of College Bills

By registering for courses, a student incurs a legal obligation to pay tuition and fees. This debt may be canceled only if a student officially withdraws from the College before the start of classes. Students’ accounts must be current (namely, payment of all outstanding balances, including any past due balances) for semester enrollment and course registration to occur. A student with a past due account will not be permitted to register for courses or to enroll without the written consent of the College. After the first week of classes, students who have not enrolled for any reason are dropped from courses. A student’s access to their residence hall, meal plan, and the library is deactivated at that time. The student is placed on an involuntary leave of absence for the semester (see Academic Standards and Regulations (p. 24)).

Bills for tuition, board, room rent, and fees for the fall and spring semesters are generated and posted online in July and December, respectively. Bills are delivered electronically to students who are enrolled or participating in off-campus study programs. Email notifications are directed to the students’ Bowdoin email accounts.

Payment for each semester is due thirty days from the billing date. Payment may be made by the semester due date, by installment payment plan over the course of the semester, or by combining the two

options. Payment plans may be arranged with Nelnet Campus Commerce; Bowdoin does not operate its own in-house payment plan. Credit cards are not accepted in payment of college charges.

Veteran Benefit Disbursements

Students using Chapter 33 Post 9/11 GI Bill[®] Benefits^b or Chapter 31 Vocational Rehabilitation and Employment Benefits are not prevented from registering and/or enrolling in courses due to a delay in VA disbursement if the student has provided the College with a certificate of eligibility no later than the first day of classes. The College does not impose late fees while waiting for the disbursement. Additionally, students are not denied access to residence halls, dining halls, or the library. Students are not required to borrow additional funds to cover the anticipated benefit.

Students are required to pay the difference of their financial obligation to the College and the anticipated VA education benefit disbursement to participate in registration and/or enrollment.

Students receiving VA benefits must maintain a 2.000 GPA to be eligible to continue to receive these benefits.

^b GI Bill[®] is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill (<https://nam02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.benefits.va.gov%2Fgibill&data=02%7C01%7Cjbedard%40bowdoin.edu%7Cc11fa7a1f074f3410ad08d74b3f62a3%7C984e32e5f98a4600aa3227c3f948%2BpDU2X7Edf1uaYxbJuKE%3D&reserved=0>).

Withdrawals and Refunds

Students leaving the College during the course of a semester are refunded tuition and fees based on the following schedule:

Withdrawal	Refund
During the first two weeks	80 percent
During the third week	60 percent
During the fourth week	40 percent
During the fifth week	20 percent
Over five weeks	No refund

After adjustments for fixed commitments and applicable overhead expense, refunds for room and board are prorated on a daily basis in accordance with the student’s attendance based on the College’s calendar. Students who are dismissed from the College within the first five weeks for other than academic or medical reasons are not entitled to refunds.

College scholarships, in coordination with other funds received, will be credited in proportion to educational expenses, but in no case will they exceed total charges to be collected. Title IV funds (Federal Pell Grant, Federal Supplemental Grant, and Federal Direct Loans) will be refunded to the source in accordance with federal regulations and in the proscribed order. Federal funds are earned based on the number of days the student is in attendance for the semester. There is no federal refund after the student has attended 60 percent of the semester. Unearned Department of Defense Tuition Assistance funds are returned to the source on a proportional basis through at least the 60 percent portion of the period for which the funds apply. Refunds will be made within thirty days of the

student's departure or date of determination of the student's departure, whichever is later.

In the case of a student who must withdraw because of activation for military service, the College will work to identify solutions that will not result in additional student debt for the required return of funds providing the student's bill was paid in full prior to the withdrawal.

Financial Aid

There are opportunities at Bowdoin to receive financial aid in meeting the charge for tuition. Information about scholarships and other financial aid may be found here (p. 8).

Room and Board

First-year students and sophomores are guaranteed housing and are required to live on campus. Entering first-year students may indicate their residence preferences online the summer preceding their arrival at Bowdoin. The Office of Residential Life coordinates housing accommodations for the remaining classes through a lottery system.

Residence hall suites consist of bedroom(s) and a common room and are furnished with essential furniture. College property is not to be removed from the building or from the room in which it belongs; occupants are held responsible for any damage to their rooms or furnishings.

Board charges are the same regardless of whether a student eats at the Moulton Union or Thorne Hall. Students who live in Bowdoin facilities, except apartments and a few other student residences, are required to take a 19-meal, 14-meal, or 10-meal residential board plan. First-year students are required to take the 19-meal plan for their entire first year on campus. Students living in College apartments or off campus may purchase a 9-meal or declining balance board plan or one of the residential plans, if they choose.

Other College Charges

All damage to the buildings or other property of the College by persons unknown may be assessed equally on all residents of the building in which the damage occurred. The Student Activities Fee is set by the student government, and its expenditure is allocated by the Student Activities Fee Committee.

Health Care

The facilities of the Peter Buck Center for Health and Fitness and the Counseling Service are available to all students. All students must maintain health insurance coverage while enrolled at Bowdoin. The College offers its own policy for those students who do not carry comparable insurance. The College's policy provides year-round coverage, whether a student is enrolled at Bowdoin or in an approved off-campus study program. The full-year accident and sickness insurance plan costs \$2,803.

A pamphlet specifying the coverage provided by the student health policy is available from the health center and will be mailed in the summer preceding the policy year. Any costs not covered by the insurance will be charged to the student's account.

Motor Vehicles

All motor vehicles, including motorcycles and motor scooters, used on campus or owned and/or operated by residents of any College-owned residence, must be registered with the Office of Safety and

Security. The registration decals cost \$100 and are valid for the academic year in which they are purchased. Vehicles must be reregistered each academic year. Students wishing to register a vehicle for a period of time less than one semester must make special arrangements with the Office of Safety and Security. All students maintaining motor vehicles at the College are required to carry adequate liability insurance. The College assumes no responsibility for the security of or damage to vehicles parked on campus. Parking on campus is limited and students will be assigned parking space based on availability. Comprehensive information regarding motor vehicles and campus parking is available here (<https://www.bowdoin.edu/security/parking-bikes-on-campus/student-parking.html>) and in the *Bowdoin College Student Handbook* online.

A LIBERAL EDUCATION AT BOWDOIN COLLEGE

William DeWitt Hyde's "The Offer of the College" spelled out a vision of the aspirations of a liberal education appropriate to the early twentieth century. Many elements of it still have currency more than one hundred years later. At the beginning of the twenty-first century, a vastly changed College in a dramatically altered world provides a related but expanded offer—of intellectual challenge and personal growth in the context of an active and engaged learning community closely linked to the social and natural worlds.

A liberal education cultivates the mind and the imagination; encourages seeking after truth, meaning, and beauty; awakens an appreciation of past traditions and present challenges; fosters joy in learning and sharing that learning with others; supports taking the intellectual risks required to explore the unknown, test new ideas, and enter into constructive debate; and builds the foundation for making principled judgments. It hones the capacity for critical and open intellectual inquiry—the interest in asking questions, challenging assumptions, seeking answers, and reaching conclusions supported by logic and evidence. A liberal education rests fundamentally on the free exchange of ideas—on conversation and questioning—that thrives in classrooms, lecture halls, laboratories, studios, dining halls, playing fields, and residence halls. Ultimately, a liberal education promotes independent thinking, individual action, and social responsibility.

Since its opening in 1802, Bowdoin has understood the obligation to direct liberal education toward the common good. In the twenty-first century, that obligation is stronger than ever. The challenge of defining a "common good" and acting on it is highlighted, however, in an interconnected world of widely varied cultures, interests, resources, and power. To prepare students for this complexity, a liberal education must teach about differences across cultures and within societies. At the same time, it should help students understand and respect the values and implications of a shared natural world and human heritage. By doing so, a liberal education will challenge students to appreciate and contend with diversity and the conflicts inherent in differing experiences, perspectives, and values at the same time that they find ways to contribute to the common project of living together in the world.

Although a liberal education is not narrowly vocational, it provides the broadest grounding for finding a vocation by preparing students to be engaged, adaptable, independent, and capable citizens.

A student in a residential liberal arts college is removed from many of the immediate responsibilities of daily adult life, making the four years of education extraordinarily privileged ones. Such an education, however, must engage that world—both contemporary and historical, both local and global. This engagement comes through individual and group research, service learning, volunteer activities, summer internships, off-campus study, and more.

The success of a Bowdoin education is evident in the capacity of graduates to be informed and critically analytic readers of texts, evidence, and conclusions; to be able to construct a logical argument; to communicate in writing and speaking with clarity and self-confidence; to understand the nature of artistic creation and the character of critical aesthetic judgment; to have the capacity to use quantitative and graphical presentations of information critically and confidently; and to access, evaluate, and make effective use of information resources

in varied forms and media. These fundamental capacities serve as crucial supports for a commitment to active intellectual inquiry—to taking independent and multifaceted approaches to solving complex problems; knowing how to ask important and fruitful questions and to pursue answers critically and effectively; sharing in the excitement of discovery and creativity; and being passionately committed to a subject of study. Graduates should thus have the ability to engage competing views critically, to make principled judgments that inform their practice, and to work effectively with others as informed citizens committed to constructing a just and sustainable world.

THE MISSION OF THE COLLEGE

It is the mission of the College to engage students of uncommon promise in an intense full-time education of their minds, exploration of their creative faculties, and development of their social and leadership abilities in a four-year course of study and residence that concludes with a baccalaureate degree in the liberal arts.

Two guiding ideas suffuse Bowdoin's mission. The first, from the College of the eighteenth and nineteenth centuries, defines education in terms of a social vision. "Literary institutions are founded and endowed for the common good, and not for the private advantage of those who resort to them . . . but that their mental powers may be cultivated and improved for the benefit of society" (President Joseph McKeen's inaugural address, 1802); "To lose yourself in generous enthusiasms and cooperate with others for common ends . . . ; this is the offer of the College" (President William DeWitt Hyde, 1903). The second idea stresses the formation of a complete individual for a world in flux: there is an intrinsic value in a liberal arts education of breadth and depth, beyond the acquisition of specific knowledge, that will enable a thinking person "to be at home in all lands and all ages" (President Hyde).

At the root of this mission is selection. First, and regardless of their wealth, Bowdoin selects students of varied gifts; diverse social, geographic, and racial backgrounds; and exceptional qualities of mind and character. Developed in association with one another, these gifts will enable them to become leaders in many fields of endeavor. Second, it recruits faculty members of high intellectual ability and scholarly accomplishment who have a passion for education, both of undergraduates and of themselves, as life-long creators and pursuers of knowledge.

The College pursues its mission in five domains:

1. Intellectual and Academic

The great mission of the College is to instill in students the love, the ways, and the habit of learning.

General education in the liberal arts. The academic disciplines are specialized modes of inquiry through which human beings perceive and intellectually engage the world. Both their power and their limits have led the College to make a long-standing commitment to general education. Specialist faculty cause non-specialist students to become critically acquainted with the perspectives and methods of disciplines in three general divisions of learning: the natural sciences, the humanities and the arts, and the social sciences. The College also sustains programs of interdisciplinary study to reveal complicated realities not disclosed by any single discipline. It requires study outside the perspectives of Europe and the West; and it encourages study abroad to foster students' international awareness and linguistic mastery.

The major field of study and independent work. Bowdoin places particular emphasis on the academic major, a concentrated engagement with the method and content of an academic discipline, in which advanced students take increasing intellectual responsibility for their own education. The College provides opportunities for honors projects and independent study, enabling students to engage in research and writing under the guidance of faculty mentors. The arrangement of teaching responsibilities of Bowdoin faculty presupposes professional duties not

only of original scholarship and creative work but also of supervision of advanced student projects.

Essential skills. The unevenness of American secondary education, the diversity of student backgrounds, and the demands of college-level work and effective citizenship all require that the College enable students to master essential quantitative and writing skills and skills of oral communication, with the guidance of faculty, other professionals, and qualified student peers.

The College believes that technology is not education, but that it is changing both education and society; and that it must be embraced by pedagogy and research and made easily and dependably available to students, faculty, and staff.

2. Social and Residential

Bowdoin students are selected from a large pool of applicants for their intellectual ability, seriousness of purpose, and personal qualities. By design, they differ widely in their backgrounds and talents—be they artistic, athletic, scientific, or otherwise. To enable such students to learn from each other, and to make lasting friendships, the College is dedicated to creating a rewarding and congenial residence life, open to all students, which, with communal dining, is at the core of the mission of a residential college. Bowdoin's system is based on residence halls linked to restored, medium-sized, self-governing College Houses.

The College devotes the talent of staff and faculty, and of students themselves, to the creation of opportunities for student growth and leadership in these residential contexts, reinforced by many volunteer programs and activities, student-run campus organizations, and opportunities to plan careers.

3. Athletic

Intercollegiate athletic competition against colleges with shared academic values, and other non-varsity sports, can foster self-control, poise, leadership, good health, and good humor. Bowdoin encourages student participation in professionally coached varsity and club programs, as well as intramural sports, and in an outing club program that enables students to explore and test themselves in Maine's rivers and forests and on its seacoast and islands.

4. Esthetic and Environmental

The College is dedicated to constructing and preserving buildings and campus spaces of the highest quality, believing that their beauty and serenity shape campus intellectual and esthetic life and inform the sensibilities of students who as graduates will influence the quality of spaces and buildings in their towns, businesses, and homes. A quadrangle of oaks and pines, ringed with historic architecture, and containing two museums with major collections of art and Arctic craft, deepens a Bowdoin student's sense of place, history, and civilization.

As a liberal arts college in Maine, Bowdoin assumes a particular responsibility to use nature as a resource for teaching and engaging students—notably to help them obtain a broad sense of the natural environment, local and global, and the effects and the role of human beings regarding it.

5. Ethical

Implicit in and explicit to its mission is the College's commitment to creating a moral environment, free of fear and intimidation, and where differences can flourish. Faculty and students require honesty in academic work. Coaches instruct that fatigue and frustration are no excuse for personal fouls. Deans and proctors set standards of probity and decency and enforce them, with student participation, in College procedures. Yet, recognizing that life will present graduates with

ambiguities that call for certainty less than for balance and judgment, Bowdoin makes few decisions for students, academically or socially—perhaps fewer than do many other residential colleges. It does so believing that students grow morally and sharpen personal identity by exercising free individual choice among varied alternatives, curricular and social. But the College also causes these decisions to occur in a context of density and variety—of ideas, artistic expression, and exposure to other cultures and other races—so that personal identity will not become an illusion of centrality.

Bowdoin College seeks to be a fair, encouraging employer of all those who serve the institution, providing opportunities for professional development, promotion and personal growth, and recognizing the value of each individual's contribution to its educational mission.

From its history of more than two hundred and twenty five years and its inheritance of buildings and endowment that are the gifts of Bowdoin alumni there derives a corollary. If the College is to pursue its educational purposes in perpetuity, its mission is also a provident and prudential one. Succeeding generations of members of the College must carry the costs of their own enjoyment of its benefits; as alumni they remain a part of Bowdoin, assuming responsibility for renewing the endowments, programs, and buildings that will keep Bowdoin a vital, growing educational force for future generations of students and faculty.

Finally, Bowdoin's intellectual mission is informed by the humbling and cautionary lesson of the twentieth century: that intellect and cultivation, unless informed by a basic sense of decency, of tolerance and mercy, are ultimately destructive of both the person and society. The purpose of a Bowdoin education—the mission of the College—is therefore to assist a student to deepen and broaden intellectual capacities that are also attributes of maturity and wisdom: self-knowledge, intellectual honesty, clarity of thought, depth of knowledge, an independent capacity to learn, mental courage, self-discipline, tolerance of and interest in differences of culture and belief, and a willingness to serve the common good and subordinate self to higher goals.

Environmental Mission Statement

The Bowdoin College community—being mindful of our use of the earth's natural resources, our impact on the environment of coastal Maine, and our responsibilities as members of a leading liberal arts college dedicated to serving the common good—recommit ourselves to environmental awareness and responsibility, and to actions that promote sustainability on campus and in the lives of our graduates.

This reaffirmation by the College of long-held principles comes at a time when the consequences of inaction are no longer abstract or shrouded in uncertainty. Although study and deliberation must continue, our accumulated knowledge about the effects of climate change demands the identification and implementation of effective solutions that will protect the environment while advancing economic development and security here and abroad. It is clear that we must conduct ourselves in a manner that meets our needs today without jeopardizing the ability of future generations to meet their own.

Bowdoin's ongoing efforts on behalf of sustainability and environmental stewardship take place in our classrooms, on campus, in our coastal research facilities, and in the community.

- As an educational institution that has long derived great benefit and much of its identity from the natural beauty of Maine, Bowdoin has a special obligation to challenge its students and faculty to examine, discuss, and debate issues of ecological preservation, social

justice, economic viability, and global responsibility. Accordingly, the College will continue to incorporate environmental awareness into the daily lives of students, and will ensure that Bowdoin graduates have the ability, knowledge, and intellectual flexibility to confront these complex issues through effective analysis and the application of creative thought, sound judgment, and ethical action.

- In its daily operations, the College will continue to reduce waste and pollution through conservation, recycling, and other sustainability practices. These efforts will continue to include the investigation and implementation of new technologies and methods aimed at reducing Bowdoin's impact on the environment.
- Bowdoin will also maintain its leadership role in the community by applying research and volunteer effort toward identifying and helping to solve the environmental challenges of Brunswick and Maine.

It is clear that actions taken or dismissed today will define the future condition of our world and society. As educators, scholars, and citizens long dedicated to the common good and privileged to "count Nature a familiar acquaintance," we, the members of the Bowdoin community, pledge ourselves and our efforts to this cause and to a just and sustainable future.

DIVERSITY, EQUITY, AND INCLUSION AND RACIAL JUSTICE

Bowdoin College acknowledges the work of its alumni, students, faculty, and staff of the College to further diversity, inclusion, and racial justice.

There is more to do in this regard with respect to students, faculty, and staff, and diversity in numbers is not enough. Bowdoin must also be an inclusive community, one with a genuine and effective commitment to racial justice where everyone has the opportunity to belong and to know that they belong. Bowdoin must also be a community where there is equity in the opportunity to pursue the same successes and outcomes.

Bowdoin's mission requires the College to prepare students to lead in a world where the demographics are changing rapidly and where individual identities are simultaneously being understood and celebrated—and contested and denigrated. These changes and issues have profound political, social, economic, cultural, and scientific implications. Bowdoin students need the skills and tools to understand, navigate, and discuss race and racism and their implications in a knowledgeable, authentic, and respectful way.

Diversity, equity, and inclusion (DEI) work at the College involves engaging with challenges and barriers across an array of identities and differences, including gender, socioeconomic status, sexual orientation, and ability, among others. It is focused initially on racial justice, with specific attention to issues and challenges facing the Black members of the Bowdoin community and society, motivated by inequality, that have been allowed to continue unremedied for generations.

This focus does not allow other critical issues to be set aside, and it will inform and enhance DEI work more broadly as the College seeks to:

- establish a culture where everyone has a true sense of belonging and where everyone has the same opportunities to find success;
- ensure that majority members of our community are truly engaged in this work;
- understand the history, context, and lived experiences of all members of the Bowdoin community including those who have been historically not well or not represented on campus, as well as those who are marginalized in other ways;
- build a shared understanding of the issues of race and nature of racism, and of the challenges facing those of marginalized identities more generally; and
- develop the tools to have honest and respectful discussions about these issues.

There is much to do in realizing these goals, and this work is underway in each of the College's divisions, led by the senior staff, to identify and correct those structures at Bowdoin (policies, practices, and behaviors) that impede equity of opportunity and the ability to belong. This work and the goals for 2022–2023 are available on the Bowdoin website (<https://www.bowdoin.edu/oid/the-work-ahead/>).

THE CURRICULUM

Bowdoin offers a course of study leading to the degree of bachelor of arts. Bowdoin students must design an education in the context of their own developing goals and aspirations and in relation to the College's vision of a liberal education, its distribution and division requirements, and the requirements of a major field of study. The College requires students to seek breadth in their education through a set of distribution and division requirements that stimulate students to navigate the curriculum in ways that encourage exploration and broaden students' capacities to view and interpret the world from a variety of perspectives.

To graduate, a student must also complete an approved major. The major program challenges students to develop a deeper understanding and self-assurance as independent and creative contributors to an area of study. Students choose a major, using the departmental, coordinate, or interdisciplinary approaches available at Bowdoin, as a way to engage a discipline in depth.

The College's curriculum introduces students to academic disciplines that bring conceptual and methodological traditions to bear in teaching disciplined inquiry, analysis, argument, and understanding. Throughout their four years, students build intellectual capabilities, self-confidence as independent thinkers and problem-solvers, and come to know the pleasures of discovering and developing proficiency in new areas of knowledge. A liberal education founded in both breadth and depth teaches students how to continue learning as the world changes and demands new perspectives, knowledge, and skills. All courses completed satisfactorily during the first two years count toward Bowdoin's general education requirements—the thirty-two credits required for the degree.

Designing an education is an education in itself. The most fulfilling liberal arts education cannot be fully planned before the first day of class because such mapping would not permit the many new paths for exploration that students discover as they learn about unfamiliar fields, find exciting questions and ideas, and uncover unanticipated interests and talents. Nor can a challenging education emerge if a student selects courses one by one each semester; a liberal education is much more than the sum of thirty-two credits. Bowdoin College permits a wide set of choices to enable students to broaden their views of the world and of their own talents and interests, and to deepen their knowledge and capacities. Designing an education thus requires self-examination, careful thought, substantial flexibility, some intellectual daring, and the wise counsel of academic advisors.

A vital part of the educational experience takes place in the interaction between students and their academic advisors. Each student is assigned a pre-major academic advisor at the start of the first year. The pre-major academic advising system is intended to help students take full advantage of the first two years at Bowdoin and begin to plan the remaining years. It provides a framework within which a student can work with a faculty member to make informed academic decisions. Such a partnership is particularly important during the period of transition and adjustment that typically takes place during the first year in college. Academic advisors make recommendations about courses, combinations of courses, or direct students toward other resources of the College. They may also play a role at moments of academic difficulty. The effectiveness of the system depends on the commitment of the student and the advisor. Students must declare their majors in the fourth semester of their college enrollment and afterwards are advised by faculty members of their major departments. Bowdoin maintains academic progress records that both advisors and students can access throughout the

student's career on the Polaris Degree Progress page (the student information system).

Students are obligated to comply with all policies and regulations set forth in the *Bowdoin College Catalogue and Academic Handbook* published in the academic year during which they matriculate, but they may elect to follow the requirements from any other Catalogue published during their tenure at Bowdoin instead. Students considering this change should contact the Office of the Registrar.

Academic Requirements for the Degree (p. 21)

To qualify for the bachelor of arts degree, a student must have:

- successfully passed thirty-two full-credit courses (or the equivalent);
- spent four semesters (successfully passed sixteen credits) in residence, at least two semesters of which have been during the junior and senior years;
- completed a first-year writing seminar; this should normally be completed by the end of the first semester and must be completed by the end of the second semester in college;
- completed at least one full-credit course (or the equivalent) in each of the following five distribution areas: mathematical, computational, or statistical reasoning; inquiry in the natural sciences; difference, power, and inequity; international perspectives; and visual and performing arts—these should normally be completed by the end of the fourth semester in college (the end of the student's sophomore year);
- completed at least one full-credit course (or the equivalent) in each of the following three divisions of the curriculum: natural science and mathematics, social and behavioral sciences, and humanities (in addition to the required course in the visual and performing arts); and
- completed all of the requirements for an approved major.

All Bowdoin students must be enrolled full time and are expected to make normal progress toward their degree, which includes taking no fewer than four credits each semester. Generally, students are not allowed to remain at Bowdoin for a ninth semester. There may be rare and exceptional circumstances that impact a student's ability to complete their degree within eight semesters. Students should speak to their dean for more information.

Distribution Requirements (p. 21)

Students must earn at least one full credit for a letter grade* in each of the following five distribution areas:

- **Difference, Power, and Inequity (DPI):** These courses examine difference in terms of power and inequity. Students learn theories, methods, and skills to analyze structures of privilege and inequality. Students confront how such structures intersect with their own experiences.
- **Inquiry in the Natural Sciences (INS):** These courses help students expand their understanding of the natural sciences through practices associated with questioning, measuring, modeling, and explaining the natural world.
- **International Perspectives (IP):** These courses assist students in developing a critical understanding of the world beyond the United States. IP courses provide students with the tools necessary to analyze non-US cultures, societies, and states (including indigenous

societies and sovereign nations within the United States and its territories), either modern or historical.

- **Mathematical, Computational, or Statistical Reasoning (MCSR):** These courses enable students to use mathematics and quantitative models and techniques to understand the world around them either by learning the general tools of mathematics and statistics or by applying them in a subject area.
- **Visual and Performing Arts (VPA):** These courses help students expand their understanding of artistic expression and judgment through creation, performance, and analysis of artistic work in the areas of dance, film, music, theater, and visual art.
- * First-year writing seminars, independent study courses, and honors projects do not fulfill any of the five Distribution Requirements. Further, these requirements may not be met by Advanced Placement or International Baccalaureate credits and may only be satisfied with courses taken at Bowdoin. These requirements should be completed by the end of the student's fourth semester in college. A course will be counted as meeting a Distribution Requirement if a student earns a grade of D or better; courses will only be counted if they are taken for a letter grade, though courses will count if they are required to be taken for a Credit/D/Fail grade. Students may not count the same course toward more than one Distribution Requirement. Also note that the requirement for completing a first-year writing seminar will only be met if the seminar is taken for regular letter grades.
- * A course graded Credit/D/Fail Only, e.g., music ensembles, may be used to fulfill a division or distribution requirement if a grade of CR (credit) is earned.

Division Requirements (p. 22)

Students must earn at least one full credit from each of the following three divisions of the curriculum:

- **Natural Science and Mathematics (a)**
- **Social and Behavioral Sciences (b)**
- **Humanities (c)**

Like the Distribution Requirements, Division Requirements may not be met by Advanced Placement or International Baccalaureate credits and may only be satisfied with courses taken at Bowdoin. A course will be counted as meeting a Division Requirement if a student earns a grade of D or better; courses will only be counted if they are taken for a letter grade, though courses will count if they are required to be taken for a Credit/D/Fail grade. With one exception, students may count the same course to meet a division and a distribution requirement. The exception is a course that is designated to meet the humanities division requirement and the visual and performing arts distribution requirement; students may not count such a course to meet both requirements.

The Major Programs (p. 22)

Students may choose one of six basic patterns to satisfy the major requirement at Bowdoin:

- one departmental major;
- two departmental majors (a double major);
- one coordinate major^a;
- one interdisciplinary major^a;
- one student-designed major; or
- any of the preceding with a departmental minor.

The requirements for completing specific majors and minors in each department are presented in detail in the Departments, Programs of Instructions, and Interdisciplinary section (p. 36). Interdisciplinary majors are described here. (p. 292) In certain majors, students declare a concentration, which is a focused course of study within a broader major.

Students should have ample time to be exposed to a broad range of courses and experiences before focusing their educational interests and so do not declare their majors until the fourth semester of their college enrollment. Normally, students are required to declare their majors before registering for courses for the junior year or applying to participate in junior- or senior-year off-campus study programs. Students declare their majors only after consultation with a major academic advisor(s). Since some departments have courses that must be passed or criteria that must be met before a student will be accepted as a major, students are encouraged to think well in advance about possible majors and to speak with faculty about their educational interests. Students may change their majors after consultation with the relevant departments, but they may not declare a new major after the first semester of the senior year. Special procedures exist for student-designed majors; these are described below.

Departmental and Program Majors (p. 22)

Departmental and program majors are offered in the following areas:

- Africana Studies (p. 36)
- Anthropology (p. 55)
- Art History (p. 66)
- Asian Studies (p. 82)
- Biochemistry (p. 101)
- Biology (p. 103)
- Chemistry (p. 115)
- Classics (p. 132)
- Computer Science (p. 145)
- Earth and Oceanographic Science (p. 158)
- Economics (p. 167)
- English (p. 185)
- Francophone Studies (p. 386)
- Gender, Sexuality, and Women's Studies (p. 225)
- German (p. 242)
- Government and Legal Studies (p. 250)
- Hispanic Studies (p. 386)
- History (p. 267)
- Italian Studies (p. 386)
- Latin American, Caribbean, and Latinx Studies (p. 298)
- Mathematics (p. 314)
- Music (p. 328)
- Neuroscience (p. 349)
- Philosophy (p. 354)
- Physics (p. 361)
- Psychology (p. 368)
- Religion (p. 375)
- Romance Languages and Literatures (p. 386)
- Russian (p. 405)
- Sociology (p. 412)

- Theater and Dance (p. 419)
- Visual Arts (p. 66)

A student may choose to satisfy the requirements of one department or program (single major) or to satisfy all of the requirements set by two departments or programs (double major). A student who chooses a double major may drop one major at any time.

Coordinate Major (p. 23)

The coordinate major encourages specialization in an area of learning within the framework of a recognized academic discipline. Coordinate majors are offered in digital and computational studies, education, and environmental studies. In these majors, students must pair the coordinate major with a departmental major, applying the coordinate discipline within the major field. For specific descriptions of these majors, see the following sections of the Catalogue: Digital and Computational Studies (p. 151), Education (p. 179), and Environmental Studies (p. 208).^a

Interdisciplinary Major (p. 23)

Interdisciplinary majors are designed to tie together the offerings and major requirements of two separate departments by focusing on a theme that integrates the two areas. Such majors usually fulfill most or all of the requirements of two separate departments and usually entail a special project to achieve a synthesis of the disciplines involved.^a

Anticipating that many students will be interested in certain patterns of interdisciplinary studies, several departments have specified standard requirements for interdisciplinary majors; these are:

- Art History and Archaeology
- Art History and Visual Arts
- Chemical Physics
- Computer Science and Mathematics
- English and Theater
- Mathematics and Economics
- Mathematics and Education
- Physics and Education

Student-Designed Major (p. 23)

Some students may wish to pursue a major program that does not fit the pattern of a departmental major, a coordinate major, or an interdisciplinary major. In such cases, a student may work with two faculty members to develop a major program that demonstrates significant strength in at least two departments. Such strength is to be shown in both the number and pattern of courses involved. A synthesizing project is required. Guidelines for the development of student-designed majors are available from the Office of the Registrar. Student-designed majors require the approval of the Curriculum Implementation Committee. Students must submit their proposals to the Curriculum Implementation Committee by December 1 of their sophomore year.

The Minor (p. 23)

Most departments and programs offer one or more minor programs consisting of no fewer than four courses and no more than seven courses, including all prerequisites. A minor program must be planned with the student's minor department no later than the end of the first semester of the senior year. Students may pursue one minor only and a minor may be dropped at any time.

The following departments and programs offer a minor:

- Africana Studies
- Anthropology
- Arabic (p. 323)^b
- Art (p. 66) (Art History or Visual Arts)
- Asian Studies (p. 82) (Asian Studies, Chinese, or Japanese)
- Biology
- Chemistry
- Cinema Studies (p. 124)^b
- Classics (p. 132) (Archaeology, Classical Studies, Classics, Greek, or Latin)
- Computer Science
- Digital and Computational Studies
- Earth and Oceanographic Science
- Economics (p. 167) (Economics or Economics and Finance)
- Education
- English
- Environmental Studies
- Gender, Sexuality, and Women's Studies
- German
- Government and Legal Studies
- History
- Latin American, Caribbean, and Latinx Studies
- Mathematics
- Middle Eastern and North African Studies (p. 323)^b
- Music (p. 328) (Music or Music Performance)
- Philosophy
- Physics
- Psychology
- Religion
- Romance Languages and Literatures (p. 386) (Francophone Studies, Hispanic Studies, or Italian Studies)
- Russian
- Sociology
- Theater and Dance (p. 419) (Theater or Dance)
- Urban Studies (p. 435)^b

^a Coordinate majors and interdisciplinary majors may not normally be combined with any other type of major. If a student has a compelling academic reason to pursue an interdisciplinary major with another departmental major or a coordinate major with another departmental major, they may seek an exception from the Associate Dean of Academic Affairs for Curriculum, Professor Dallas Denery (<https://www.bowdoin.edu/profiles/faculty/ddenery/>).

^b These are only offered as minors.

ACADEMIC STANDARDS AND REGULATIONS

Statement of Student Responsibility (p. 24)

The College's *Bowdoin College Catalogue and Academic Handbook* is available online (<https://bowdoin-public.courseleaf.com/>) to every Bowdoin student. Also, students have access to their academic records on Polaris (<https://polaris.bowdoin.edu/>), the College's student information system. In all cases, the student bears ultimate responsibility for reading and following the academic policies and regulations of the College and for notifying the Office of the Registrar of any problems in their records.

Information about Courses and Grades (p. 24)

Course Credit (p. 24)

Most Bowdoin courses earn one full credit, which is equal to four semester hours, and are considered to have equal weight toward degree requirements. A few courses, such as music performance courses, generally earn one-half credit each. In accordance with federal regulations, Bowdoin courses that count for one credit typically meet for fifteen-week semesters and three hours a week, with the expectation that a minimum of nine additional hours a week will be spent in lab, discussion group, film viewing, or preparatory work.

Course Load (p. 24)

All students at Bowdoin are full-time students and, in order to make normal progress toward the degree, are expected to register for no fewer than four credits each semester.

- Students may not take fewer than three credits per semester without approval from the Recording Committee.
- Students may not take more than five credits without approval from their academic advisor(s) and dean.
- First-year students may not take fewer than four credits per semester in the first and second semester of the first year without the approval of both their academic advisor and the dean of first-year students.
- Students may not take more than four credits while on academic probation without approval from the Recording Committee.

Seniors may be required to take one course per semester in their major department, at the department's discretion. Students should note that if they choose to take three courses, they may not elect Credit/D/Fail for any of them, as per the Credit/D/Fail policy. Taking courses Credit/D/Fail may impact a student's ability to qualify for awards such as the Sarah and James Bowdoin Scholars.

Bowdoin College normally admits a small number of special students each year. These students may follow alternative policies guiding course load and other rules. Please contact the Office of Admissions or the Office of the Registrar for more information.

No extra tuition charge is levied upon students who register for more than four credits, and, by the same token, no reduction in tuition is granted to students who choose to register for fewer than four credits during any of their eight semesters at Bowdoin. A student may be granted a tuition reduction for taking fewer than three credits only if a ninth

semester is required to complete the degree and they have previously been a full-time Bowdoin student for eight semesters. All appeals for this should be made in writing to the dean for student affairs and the head of finance and administration after a ninth semester of enrollment has been approved. The Recording Committee and Student Aid (when applicable) will review petitions for a ninth semester this based on extenuating circumstances. Upon completion of their degree requirements, students must graduate and cannot enroll for additional semesters, even if they have been enrolled for fewer than eight semesters and regardless of if they are recipients of federal, state, or institutional financial aid. In addition, students should not avoid registering for necessary courses to prolong their enrollment.

Attendance and Examinations (p. 24)

Athletics and other extracurricular activities do not exempt students from the normal policies governing attendance at classes and examinations. When conflicts arise, students should immediately discuss possible alternatives with course instructors. At times, however, students may find themselves having to make serious choices about educational priorities.

All academic work, except for final examinations, final papers, final lab reports, and final projects, is due on or before the last day of classes; although instructors may set earlier deadlines, they may not set later deadlines. All final academic work, including final examinations, final papers, final lab reports, and final projects, is due at or before 5:00 p.m. on the last day of the final examination period; although instructors may set earlier deadlines, they may not set later deadlines. In all cases, students should consult their course syllabi for specific deadlines for individual courses. The deadline for submitting final, approved honors projects to the library is determined by the College.

Additional course attendance rules include:

- Regular class attendance is expected and individual instructors may establish specific attendance requirements. At the beginning of each semester, instructors will make clear to students the attendance requirements of each course, within the parameters determined by the College. If expectations are unclear, students should seek clarification from their instructors.
- Students are expected to attend the first meeting of any course in which they are registered. Students who do not attend the first meeting may be dropped from the course at the discretion of the instructor, but only if the course was officially full before the first day of the semester. The Office of the Registrar maintains the list of full courses.

Additional examination attendance rules include:

- Attendance at examinations is mandatory. An absence from any examination, be it an hour examination or a final examination, may result in a grade of F. In the event of illness or other unavoidable cause of absence from examinations, instructors should expect to hear directly from students regarding their absence. In certain circumstances, if students are unable to communicate with faculty directly, faculty may receive notice from the Office of the Dean of Students.
- College final examinations are held at the close of each semester and must be given according to the schedule determined each semester by the Office of the Registrar. Extra classes may only be scheduled during Reading Period with permission from the dean for academic affairs. All testing activity is prohibited during Reading

Period including but not limited to take-home exams, final exams, and hour exams.

- A student with three one-hour examinations in one day or three final examinations in two days may reschedule one for a day mutually agreeable to the student and the instructor. To initiate this change during final exams only, students must obtain an Examination Rescheduling Form from the Office of the Registrar at least two weeks in advance of the conflicting exams. For in-class examinations taking place during the semester, students should make arrangements directly with the faculty members. Other changes may be made for emergencies or for educational desirability, but only with the approval of the Office of the Dean of Students.
- Students bear ultimate responsibility for arranging make-up or substitute coursework.

Time conflict overrides are only available to students when a course has multiple meetings for the same activity and the student need not attend all of them but they are introducing a time conflict error in the course registration process. Time conflict overrides are not available for a student to attend one class and arrange to watch asynchronous lectures and complete the coursework for a second class outside of the course time. Additionally, students are expected to attend classes according to the College's attendance policy, and federal credit hour regulation; partial attendance due to conflicting schedules is not permitted. Students with questions about obtaining a time conflict override should contact the Office of the Registrar. The instructors of both conflicting classes must give written permission for a student to register for two courses with any overlapping meeting times.

In recognition of Bowdoin's commitment to a diverse and inclusive student body and the variety of religions observed and practiced by our students, faculty are encouraged to avoid conflicts between in-class examinations and other significant academic work and major religious holidays. The calendar below was developed in collaboration with the director of religious and spiritual life and includes major observances of the officially recognized religious groups at Bowdoin.

- Students are expected to declare their intention to observe religious holidays at the beginning of the semester, and to work with an instructor when there is a conflict with a scheduled examination, paper, or project due date and a significant religious holiday observed by the student so that, when warranted, alternative arrangements for completing the work may be made.
- Students or faculty who have any questions regarding how best to balance the academic calendar alongside religious observances are encouraged to consult with the director of religious and spiritual life.

Date	Event
September 25-27, Sun.-Tues.	Rosh Hashanah, begins at sundown on Sept. 25 and concludes at sundown on Sept. 27
October 4-5, Tues.-Wed.	Yom Kippur, begins at sundown on Oct. 4 and concludes at sundown on Oct. 5
October 24, Mon.	Diwali
March 22-April 20, Wed.-Thurs.	Ramadan, begins at first light on March 22 and concludes at last light on April 20
April 5-12, Wed.-Wed.	Passover, begins at sundown on April 5 and concludes at sundown on April 12
April 7, Fri.	Good Friday
April 9, Sun.	Easter

April 21-23, Fri.-Sun. Eid-al-Fitr, begins at sundown on April 21 Sun.

Course Registration and Course Changes (p. 25)

Students register for courses each semester by obtaining their academic advisor's approval of their course requests and submitting them by the deadline specified by the Office of the Registrar. An advisor's release of the "Advisor Hold" in Polaris indicates that the advisor and student have discussed the student's course selections. Since most courses have maximum and minimum registration limits as well as registration priorities, students cannot assume they will be registered for their top-choice courses. Consequently, students should participate in all available "rounds" of registration to have their alternate course choices considered and to make adjustments to their schedules. For more information on advising, please see here (<https://www.bowdoin.edu/registrar/faculty/advising/>).

Registration for continuing students occurs at the end of the prior semester, generally about six weeks before final examinations. Registration for first-year and transfer students occurs during orientation. Students who are studying away are strongly encouraged to register at the same time as students who are on campus; the Office of the Registrar provides registration instructions and information at [bowdoin.edu/registrar](https://www.bowdoin.edu/registrar/) (<https://www.bowdoin.edu/registrar/>) and sends registration instructions to students at their Bowdoin email addresses. Registration in courses is complete only when students submit the Enrollment Form, which must be submitted by the end of the first week of classes. This form verifies that a student is on campus and attending classes. A student who does not submit the Enrollment Form may be removed from all classes and barred from using many of the services of the College including but not limited to dining services, library services, and fitness services. Enrollment Forms submitted late are subject to a \$50 fine. Any student who registers initially for courses after the first week of classes must pay a \$50 late fee.

Students may adjust their course schedules by participating in the course add/drop process. Instructions for this process are provided by the Office of the Registrar. An instructor will allow a student to add a course if the following three conditions have been met:

1. the student has the necessary qualifications, including but not limited to the course prerequisites;
2. the student and instructor have agreed on how missed class material and assignments will be managed; and
3. there is room in the course or the instructor may choose to override the class enrollment limit and allow additional students to register.

Normally, no course may be added after the second week of classes. Students may drop courses without permission during the first two weeks of the semester. Students in their first semester at Bowdoin may drop courses in the third through the seventh weeks with the permission of their dean and major or pre-major advisor. Students in their second semester or later may drop a total of two courses in their Bowdoin career during weeks three through seven of a semester with the permission of their major or pre-major academic advisor. This is a serious decision that can impact the completion of a student's education and should only be made in extenuating circumstances. If a student has previously dropped two courses after the second week of the semester in their second semester or beyond, the student will need to petition the Recording Committee for subsequent requests to drop a course during that period.

At no time may a student drop below three courses during any semester without permission from the Recording Committee. Any student who wants to add a course after the two-week deadline must also petition the Recording Committee. Generally, petitions are only approved if the student can show extreme personal or medical reasons for the lateness of the change. Any course dropped between the first week and end of the seventh week of the semester through Extended Drop will not appear on a student's transcript; anything dropped by the Recording Committee will appear on the transcript with a grade of W (for Withdrew). In order to add a course late, a student must have been attending the course from the very beginning of the semester and have instructor permission. Documentation may be required. Course changes approved by the Recording Committee will require payment of a \$50 late fee per change, unless the change is made for reasons outside the control of the student.

Students will not receive a grade for a course unless they have completed all steps to register for or add the course. Also, students will receive a failing grade for a course they stop attending unless all steps to drop the course have been completed before the deadline. Students are expected to monitor their records in Polaris (polaris.bowdoin.edu) (<https://bnrcas.bowdoin.edu/cas-web/login/?service=https%3A%2F%2Ffluminis.bowdoin.edu%2Fcas%2Fportal%2Flogin>)), the College's student information system; this includes monitoring the courses for which they are registered. Students bear ultimate responsibility for completing the processes that provide the College with an accurate record of their course schedule.

Auditing courses is a privilege normally extended to students, employees of the College, and community members. Auditors must obtain permission from the course instructor before attending the first class and follow their guidelines regarding in-class participation. Auditors are generally not permitted in full courses and are not allowed to attend first-year writing seminars. The College reserves the right to restrict the number of courses audited by any one person and to limit the total number of auditors on campus at any particular time. Transcripts are not offered for audited courses. Please see the Registrar's Office website for more information on auditing (<https://www.bowdoin.edu/registrar/faculty/teaching/auditors.html>).

Independent Study (p. 26)

With approval of a project director, normally a faculty member, a student may elect a course of independent study for which regular course credit will be given. A department will ordinarily approve one or two semesters of independent study. Where more than one semester's credit is sought for a project, the project will be subject to review by the department at the end of the first semester. In special cases that have the support of the department, credit may be extended for additional semester courses beyond two.

There are normally two levels of independent study and each should be registered for using a separate registration form available on the website of the Office of the Registrar (<https://www.bowdoin.edu/registrar/>). A directed reading course designed to allow a student to explore a subject not currently offered within the curriculum shall be numbered 2970–2998. An independent study that will culminate in substantial and original research or in a fine arts, music, or creative writing project shall be numbered 4000–4028. If a student, in consultation with a department, intends to pursue honors, the student can register for an appropriate honors project course number, 4050–4079. If a department determines that a project does not meet the standards for honors, the course number(s) for one or two semesters of independent study will be changed to 4000–4028. Collaborative studies allow students to

work in small groups guided by a member of the faculty. Intermediate collaborative studies are numbered 2999; advanced collaborative studies are numbered 4029. All levels of independent and collaborative studies are normally available in every academic department and program. Independent and collaborative studies may not be taken on a Credit/D/Fail basis and they may not be cross-listed.

In independent study and honors courses that will continue beyond one semester, instructors have the option of submitting at the end of each semester, except the last, a grade of S (for Satisfactory) in place of a regular letter grade. An S grade must be converted to a regular letter grade by the end of the subsequent term. All independent study grades must be regular letter grades by the end of the project's final semester.

Course Grades (p. 26)

Course grades are defined as follows:

- A, the student has mastered the material of the course and has demonstrated exceptional critical skills and originality;
- B, the student has demonstrated a thorough and above average understanding of the material of the course;
- C, the student has demonstrated a thorough and satisfactory understanding of the material of the course;
- D, the student has demonstrated a marginally satisfactory understanding of the basic material of the course (only a limited number of D grades may be counted toward the requirements for graduation); and
- F, the student has not demonstrated a satisfactory understanding of the basic material of the course.
- Plus (+) or minus (–) modifiers may be added to B and C grades; only the minus (–) modifier may be added to the A grade.

Courses that are dropped through the Recording Committee will be indicated with a W (for Withdrew) on the student's transcript.

Faculty report grades to the Office of the Registrar at the close of the semester. Each student in each course must be given a grade by the grade submission deadline as established by the registrar. Grade reports are available to students in Polaris shortly after the grade submission deadline.

Once reported, no grade is changed (with the exception of clerical errors) without the approval of the Recording Committee. Recorded grades cannot be changed on the basis of additional student work without approval of the Recording Committee. If students are dissatisfied with a grade received in a course, they should discuss the problem with the instructor. If the problem cannot be resolved in this manner, the student should consult with the chair of the department and, if necessary, with an associate dean in the Office of the Dean for Academic Affairs who will consult with the department as needed. The student may request a final review of the grade by the Recording Committee.

Most departments will not accept as prerequisites, or as satisfying the requirements of the major, courses for which a grade of D has been given. Questions should be referred directly to the department chair. Students who receive a grade of D or F in a course may retake the course. Both courses and both grades will appear on the transcript, but only one course credit will be given for successful completion of a given course. For grades recorded prior to Fall 2013, only the first grade earned in a repeated course is counted in a student's GPA; beginning with grades recorded for Fall 2013, all grades earned in repeated courses are counted

in a student's GPA. Bowdoin does not round up semester or cumulative GPAs. Instead, GPAs are truncated to display the first three decimals.

Credit/D/Fail Option (p. 27)

A student may choose to take a limited number of courses with the Credit/D/Fail grading option, as opposed to earning regular letter grades. A course may be changed from letter grades to Credit/D/Fail or vice versa up until the end of the seventh week of classes using the process established by the Office of the Registrar. When a student chooses the Credit/D/Fail grading option, a grade of CR (Credit) is given if the student produces work at a level of C- or above, a grade of D is given if the student produces work at a D level, and a grade of F is given otherwise.

In any given semester, a student must be registered for a minimum of 4.0 total credits to elect the Credit/D/Fail grading option for a course. A student who has 5.0 or more credits in their semester course load may elect to take an additional course on a Credit/D/Fail basis. A student may elect the Credit/D/Fail grading option for up to four courses within the 32 credits required for graduation; courses in excess of the 32 credits required may be taken Credit/D/Fail beginning with the semester following the one in which the 32 credits are completed and as long as the semester course load totals 4.0 credits or more. No more than two courses per semester can be taken Credit/D/Fail after the required 32 credits are earned. Courses that are only graded Credit/D/Fail (music ensemble and performance courses, as examples) are not counted within these restrictions. Please note that taking courses Credit/D/Fail may impact eligibility for the Sarah and James Bowdoin Scholar award.

Most departments and programs require that all courses taken to satisfy requirements for the major or minor be taken for regular letter grades. Please see specific department and program requirements for details. Courses taken to satisfy the College's first-year writing seminar requirement must be graded with regular letter grades, and courses satisfying distribution and division requirements must also be taken for regular letter grades (unless CR, D, and F are the only grades given for the course). An independent study, collaborative study, or honors project must be graded with regular letter grades.

A grade of CR (Credit) will not count toward a student's GPA. A grade of D or F received on the Credit/D/Fail grading scale will count toward a student's GPA, and it will count toward academic standing (probation, suspension, and dismissal).

Incompletes (p. 27)

The College expects students to complete all course requirements as established by instructors. In unavoidable circumstances (personal illness, family emergency, etc.) and with approval of the dean of students and the instructor, a grade of INC (Incomplete) may be recorded.

An Incomplete represents a formal agreement among the instructor, a dean, and the student for the submission of unfinished coursework under prescribed conditions. Students must initiate their request for an Incomplete on or before the final day of classes by contacting a dean. If the Incomplete has not been approved and received in the Office of the Registrar by the grade submission deadline and no other grade has been assigned, a grade of F will be recorded. If the Incomplete has been approved by all necessary individuals, a date is set by which time all unfinished work must be submitted. In all cases, students are expected to finish outstanding coursework in a period of time roughly equivalent to the period of distraction from their academic commitments. The instructor should submit a final grade within two weeks of this date. If the agreed-upon work is not completed within the specified time limit, the Office of the Registrar will change the Incomplete to Fail or ask the

instructor to give a grade based on work already completed. Extensions must be approved by the Dean of Students. Any exceptions to these rules may require approval of the Recording Committee.

Comment and Failure Cards (p. 27)

Faculty communicate the progress of students in their classes periodically through Comment Cards. These written observations alert students, academic advisors, athletic coaches, and the deans in the Office of the Dean of Students to potential problems confronting students. They can also be used by faculty to highlight improvement or successes. Students should view Comment Cards as academic progress reports providing warnings or highlighting achievements. When a Comment Card provides a warning, the student should immediately seek out their instructor to discuss strategies for improvement. Academic advisors and deans can also be very helpful in developing strategies for improvement and identifying existing support services and resources, but it is the student's responsibility to seek out each of these people. Not all course instructors utilize Comment Cards, so students should not rely on this form of communication as their only source of feedback regarding their progress or standing in a course.

At the end of each semester, instructors issue Failure Cards to students who fail courses. These notations provide precise reasons for a student's failing grades. Students and academic advisors generally find these comments instructive as they plan future coursework.

Transcripts (p. 27)

The Office of the Registrar will furnish official transcripts upon receipt of a request through the National Student Clearinghouse (<https://www.studentclearinghouse.org/>) that includes the student's signature. There is no charge for transcripts unless it is requested that materials be sent by an overnight delivery service. Current students may access their unofficial academic history via Polaris. For more information about obtaining an official transcript, consult the registrar's website (<https://www.bowdoin.edu/registrar/transcripts/>).

Satisfactory Academic Progress (p. 27)

Satisfactory Academic Progress (SAP) is a requirement for all Bowdoin students. Students are expected to make normal progress toward the degree, defined as achieving: the qualitative or GPA minimum standard; and the quantitative/pace or credits per semester standard. The College's minimum GPA for Academic Standing status and graduation is a cumulative 2.000 GPA. In addition to being subject to these standards, students receiving VA benefits must also maintain a 2.000 GPA to be eligible to continue to receive their VA benefits. Bowdoin expects all students to maintain an acceptable level of academic progress, therefore this Satisfactory Academic Progress (SAP) policy applies to all matriculated students. These standards have been developed in accordance with federal, state, and institutional regulations. The Recording/Action Committee (<https://www.bowdoin.edu/registrar/students/course-registration/recording-committee.html>) meets twice each year to review the academic records of students who are not meeting these standards. Students are placed on academic probation, suspension, or dismissal according to the criteria below; students on academic probation or suspension are not considered to be in good academic standing.

At the close of each semester, once grades post, all students' records will be assessed for academic and, if applicable, financial aid SAP. All students earning a cumulative or semester GPA of less than 2.000 will be reviewed, as well as those who have not met the quantitative measure outlined. In cases of repeated poor performance, a student may be

dismissed from the College. In cases when a student's academic standing changes, copies of correspondence with the student that outline the student's final academic standing are sent to the student's parent or guardian.

In cases where a student is also aided, the Office of Student Aid, the Office of the Registrar, and the Office of the Dean of Students will collaborate to ensure that student communication is coordinated through any aid warning and appeal processes. It is important to note that this policy and the College's financial aid SAP necessarily share regulations. While these policies share details, they are implemented separately from one another to maintain the integrity of each process. For details about the financial aid components of the SAP policy, please reference the Admissions and Financial Aid section (<https://bowdoin-public.courseleaf.com/admission-financial-aid/>) of the Catalogue and visit the Office of Student Aid website (<https://www.bowdoin.edu/student-aid/>).

GPA or Qualitative Standard (p. 28)

All Bowdoin course grades are included in a student's GPA; however, for the purposes of determining academic standing (good standing, academic probation, suspension, dismissal), first-semester grades may be omitted from the computation for sophomores, juniors, and seniors if that omission benefits the student. The Office of the Registrar will perform the computation to determine if this is the case using the following standard: the cumulative GPA for the student at the time will be determined with and without the first semester grades. If it is higher without the first semester grades, that calculation will be used. This will only occur for upperclass students' GPA calculation and beyond. Students in their first semester at Bowdoin will have their first semester GPA viewed as a "semester GPA" rather than cumulative for the purposes of the academic SAP policy.

The Office of the Dean of Students informs students of changes in academic standing according to the schedule below; students who have not met the minimum SAP requirement for aid will be notified by the director of student aid. For the purposes of determining internal academic standing only, the computation of required GPA for upperclass students omits first-semester grades if, and only if, this is advantageous to the student. The calculation is described above; SAP calculations for aid always include all semesters enrolled, as required by law.

Academic Standing Criteria (p. 28)

Students are placed on academic probation, suspension, or academically dismissed according to the criteria below. The GPAs outlined below also prompt aid action when applicable.

For students in good academic standing:

- Academic Dismissal:
 - If the *cumulative GPA* is 1.000 or lower, or the student meets the conditions for a second academic suspension.
 - If the student's GPA is 1.000 or lower at the end of their first semester at Bowdoin, they qualify for academic suspension and not dismissal.
- Academic Suspension:
 - If the *cumulative GPA* is 1.001–1.499, or the *semester GPA* is 1.000 or lower.
- Academic Probation:
 - If the *cumulative GPA* is 1.500–1.999, or the *semester GPA* is 1.001–1.999.
- Good Standing:

- If the *cumulative GPA* is greater than or equal to 2.000 and none of the other standards outlined above are met.

For students on academic probation:

- Academic Dismissal:
 - If *cumulative* or *semester GPA* is 1.000 or lower, or the student meets the conditions for a second academic suspension.
- Academic Suspension:
 - If *cumulative* and *semester GPA* are 1.001–1.999.
- Academic Probation:
 - If *cumulative* or *semester GPA* are 1.001–1.999.
- Good Standing:
 - If *cumulative GPA* is greater than or equal to 2.000 and none of the other standards outlined above are met.

Academic Probation: Students are placed on academic probation for one semester upon returning from academic suspension. Students on academic probation will be assigned to work closely with their academic advisor and a dean from the Office of the Dean of Students.

- Students must enroll in four full-credits graded with letter grades while on academic probation.
- Students on academic probation normally are not eligible to study away.

Quantitative Standard (p. 28)

The quantitative standard or pace is equivalent to the number of credits the student has successfully completed divided by the number of credits the student attempted. Students are expected to make normal progress toward the degree, defined as passing the equivalent of four full-credit courses each semester. For purposes of the academic review at the end of each term, and counting academic terms in attendance only, medical leaves will not be taken into consideration.

Any student who fails to register for a minimum of three credits and attend classes prior to the end of the first week of the term may be withdrawn from the College; this will count toward the student's eight semesters in their aid calculation. Transfer credit and pre-matriculation credits count in this calculation for academic and aid pace. Please note that there is a different calculation of this standard for aid; please see this section (<https://bowdoin-public.courseleaf.com/admission-financial-aid/>) of the Catalogue or here (<https://www.bowdoin.edu/student-aid/consumer-information/satisfactory-academic-progress.html>) for details. To comply with the satisfactory academic progress policy, each candidate in the four-year program must successfully complete the following minimum number of course and unit credits:

Semester	Expected Credits	Minimum Credits	Pace
First semester	4 credits	2 credits	50 percent
Second semester	8 credits	6 credits	75 percent
Third semester	12 credits	10 credits	83 percent
Fourth semester	16 credits	14 credits	88 percent
Fifth semester	20 credits	18 credits	90 percent
Sixth semester	24 credits	22 credits	92 percent
Seventh semester	28 credits	26 credits	93 percent

Students not making normal progress may be asked to make up deficient credits in approved courses at another accredited institution of higher education.

Academic Standing Appeals (p. 29)

Students who earn academic suspension or dismissal under the SAP policy have the option to appeal to the Recording/Action Committee (<https://www.bowdoin.edu/registrar/students/course-registration/recording-committee.html>). Each semester, in advance of the Recording Committee's Action Meeting, students who are up for academic suspension and dismissal will be given the opportunity to write a petition explaining any extenuating circumstances that led to their academic deficiency and reasons why they should not be placed on suspension or dismissed. The committee will review these materials and the decision of the committee is final. This is a separate review from the student aid appeal. The Office of Student Aid, the Office of the Registrar, and the Office of the Dean of Students will ensure that students who are involved in one or both appeal processes are given clear, concise instructions.

Notification Process

Students not making Satisfactory Academic Progress toward their degree will receive correspondence via their Bowdoin email address. This correspondence includes the appeal process instructions for both the academic and aid processes when applicable. Students will be notified of all deadlines related to the appeal processes in this communication.

Academic Standing Appeal Procedures

Students have the right to appeal their academic standing by submitting a petition to the Recording Committee. Petitions should include information regarding the extenuating circumstances that led to the student's deficiency in scholarship. Details can be found here (<https://www.bowdoin.edu/registrar/students/course-registration/recording-committee.html>) and students should consult their dean when drafting a petition.

The Recording Committee and Student Petitions (p. 29)

The Recording Committee is a standing faculty committee of the College whose purpose is to address matters pertaining to the academic standing of individual students and to consider exceptions to the policies and procedures governing academic life. The committee meets regularly to consider individual student petitions and at the end of each semester to review the records of students who are subject to probation, suspension, or dismissal. Decisions of the committee are final.

Students who are seeking exceptions to academic regulations or curricular requirements must petition the Recording Committee (<https://www.bowdoin.edu/registrar/students/course-registration/recording-committee.html>). The petition form is available online (<https://www.bowdoin.edu/registrar/students/course-registration/petition-form-recording-committee.html>). All petitions require the signature of a dean, and, depending on the nature of the request, some may require supporting documentation from a faculty member, doctor, or counselor. Students are notified of the outcome of their petitions by the secretary of the Recording Committee. Students should note that any courses dropped with Recording Committee permission will result in a W (for Withdrawn) being recorded on the students' transcripts. A grade of W does not factor into a student's GPA.

Transfer of Credit from Other Institutions (p. 29)

The Bowdoin degree certifies that a student has completed a course of study that meets standards established by the faculty. It is normally

expected that all of a student's coursework after matriculation will be completed either at Bowdoin or in an approved semester-long or yearlong off-campus study program. (More information about such programs can be found in the section on Off-Campus Study (p. 35).) Apart from taking courses at Bowdoin or in approved off-campus study programs, the College recognizes that there may be rare occasions when it would serve a student's educational interests to take courses elsewhere for credit toward the Bowdoin degree. In such cases, the work done elsewhere should represent a standard of achievement comparable to what is expected at Bowdoin in a field of study characteristic of the liberal arts.

A student may transfer a cumulative total of no more than four credits from study in programs from two- or four-year accredited colleges/universities. The College does not grant credit for internships, work completed through domestic for-profit institutions, correspondence courses, bridge programs, programs such as HBX CORE, professional study, vocational study, or outdoor education or similar field-study areas if required assignments consist of only reports or reflective summaries. Credit is not granted for courses taken elsewhere when Bowdoin classes are in session (the first day of classes through the last day of final exams each) except in special circumstances and with the prior approval of the Recording Committee.

Students must get pre-approval from the academic department at Bowdoin that corresponds to the subject of the course the student is seeking to transfer and the Office of the Registrar in advance of enrollment at another institution by submitting the online Application for Transfer of Credit (<https://www.bowdoin.edu/registrar/students/completing-degree/transfer-credit-form.html>). Without both pre-approvals, transfer of credit is possible only by approval of the Recording Committee. The online Application for Transfer of Credit (<https://www.bowdoin.edu/registrar/students/completing-degree/transfer-credit-form.html>) should be used only for pre-matriculation credit, accelerated terms, e.g., summer or winter, when Bowdoin classes are not in session, or for credit while on a medical leave or suspension if permission has been granted by the Office of the Dean of Students and not for study away. The Bowdoin department chair or their designee is notified by email when a student requests preapproval for transfer credit. In order to make their determination, the department chair or designee reviews a course description and/or syllabus for each course provided by the student in the online application and will approve or deny the request received via email. The application is then approved or denied by the Office of the Registrar. Students should not consider their application complete or enroll at another institution until both approvals are received.

In certain cases, students may be given conditional approval and be required to submit supporting documents, including the course syllabus and all papers and exams, after the course has been completed. The College may decline to grant credit if the course or the student's work in the course does not satisfy Bowdoin academic standards. Credit is not awarded for courses in which the student has earned a grade below C- or for courses not graded with regular letter grades, e.g., pass/fail. Students are responsible for ensuring these regulations are met.

No transfer credit will be awarded until an official transcript showing the number of credits or credit-hours and the grade(s) earned has been received from the other institution. It is the student's responsibility to ensure that the official transcript is sent directly to the Office of the Registrar, and the transcript must arrive in a sealed envelope or as a certified digital document. Normally the transcript must be received and final approval to transfer credit secured within one year following the term

in which the course was taken. Credit may not be transferred if a longer time period has elapsed without approval of the Recording Committee.

Transcripts of credit earned at other institutions that have been presented to Bowdoin College for admission or transfer of credit become part of the student's permanent record, but are not issued, reissued, or copied for distribution. Course titles and grades for courses that were transferred from other institutions are not recorded on the Bowdoin transcript; only the institutional name and the credit are listed.

Students should be aware that credits earned elsewhere may not transfer on a one-to-one basis; some courses may be accorded less than a full Bowdoin credit and no course taken elsewhere will be worth more than one Bowdoin credit, even if the course has accompanying laboratory credits. Students are advised to consult with the Office of the Registrar in advance to learn the basis on which transfer credit will be determined. Bowdoin courses generally meet for 45 hours a semester (3 hours a week), with the expectation that a minimum of 9 additional hours a week will be spent in lab, discussion group, film viewings, or preparatory work. For comparison purposes, students should know that one Bowdoin course is generally understood to be equal to four semester-hours or six quarter-hours at other colleges and universities.

For more details regarding the transfer credit process, please visit the Bowdoin website. (<https://www.bowdoin.edu/registrar/students/completing-degree/transfer-of-credit.html>)

Pre-Matriculation Credit (p. 30)

Students may have the opportunity to enroll in college-level coursework prior to matriculating at Bowdoin. Bowdoin College will consider granting credit for pre-matriculation coursework, providing the following criteria have been met:

1. the coursework must have been completed on a college campus at an accredited two- or four-year college/university in courses taught by college faculty;
2. the coursework must have been completed in a class with matriculated college students;
3. the courses may not have been used to satisfy any high-school graduation requirements; and
4. the coursework must represent a standard of achievement comparable to what is expected at Bowdoin in a field of study characteristic of the liberal arts.

Bowdoin also recognizes Advanced Placement, International Baccalaureate, and other international exams and may grant credit toward graduation requirements for them. Students should refer to the Advanced Placement and International Baccalaureate rules in effect at the time of their matriculation. (<https://www.bowdoin.edu/registrar/students/completing-degree/advanced-placement-ib.html>) Although students may apply more than four pre-matriculation credits to their academic records, a maximum of four pre-matriculation credits will be counted toward the thirty-two credits required for the Bowdoin degree from approved exams or other approved college/university courses.

Graduation (p. 30)

Students submit to the Office of the Registrar the Notice of Intent to Graduate in the semester prior to the semester in which they intend to graduate. This required form is considered the official application for graduation. Submission of this form begins the final degree audit process and ensures that students receive all notices related to Commencement. Students will generally receive written notice by May 1 that they

have been given preliminary clearance to graduate. Final clearance is determined after all academic work has been completed and final grades for the spring semester have been recorded.

Students may take part in only one Commencement, and they are expected to complete all degree requirements before they participate in graduation exercises. Speakers at Commencement and other students playing visible leadership roles in the ceremony must have completed all requirements for graduation. Students with two or fewer credits remaining and who can expect to complete all requirements by the end of the following August may be allowed to participate in Commencement but will not receive a diploma. In such cases, the degree will actually be conferred at the next conferral date following the completion of all requirements, and the diploma will be mailed to the student at that time. Bowdoin confers degrees three times a year: in May when degree requirements are completed in a spring semester, in October when degree requirements are completed in summer, and in December when degree requirements are completed in a fall semester.

The Award of Honors (p. 30)

General Honors

General honors (or Latin honors) are awarded with the degree on the basis of an average of all grades earned at Bowdoin, with a minimum of sixteen credits required for the computation. To compute the average, an A is assigned four points; a B, three points; a C, two points; a D, one point; and an F, zero points. Plus (+) or minus (–) modifiers add or subtract three-tenths of a point (0.3). Half-credit courses are weighted as one-half course. Credit grades (CR) are omitted from the computation, but a D or F grade received in a course taken on a Credit/D/ Fail basis does count. Beginning with grades recorded for Fall 2013, all grades earned in repeated courses are included ^a. The resulting grade point average (GPA) is not rounded but truncated to display the first three decimals. A degree *summa cum laude* is awarded to the top 2 percent of the graduating class as calculated by GPA; a degree *magna cum laude* is awarded to the top 8 percent of the graduating class as calculated by GPA; and a degree *cum laude* is awarded to the top 20 percent of the graduating class as calculated by GPA. It is Bowdoin's policy not to disclose the GPA ranges that determine Latin Honors as they shift with each class.

^a In the case of a course taken at Bowdoin one or more times prior to Fall 2013, only the first grade is included.

Departmental Honors: The Honors Project (p. 30)

The degree with a level of honors in a major subject is awarded to students who have distinguished themselves in coursework in the subject and in an honors project. The award is made by the faculty upon recommendation of the department or program.

The honors project offers seniors the opportunity to engage in original work under the supervision of a faculty member in their major department or program. It allows qualified seniors to build a bridge from their coursework to advanced scholarship in their field of study through original, substantial, and sustained independent research. The honors project can be the culmination of a student's academic experience at Bowdoin and offers an unparalleled chance for intellectual and personal development.

Students who have attained a specified level of academic achievement in their field of study by their senior year are encouraged to petition their department or program to pursue an honors project carried out under the supervision of a faculty advisor. The honors project usually takes

place over the course of two semesters; some departments allow single-semester honors projects. The honors project results in a written thesis and/or oral defense, artistic performance, or showing, depending on the student's field of study. Students receive a grade for each semester's work on the honors project and may be awarded a level of honors in their department or program, as distinct from general honors. Honors projects cannot be collaborative.

The honors project process differs across departments and programs in terms of qualification criteria, requirements for completion, the level of honors awarded, and the use of honors project credits to fulfill major course requirements. Students must complete an honors project to be eligible for departmental or program honors. If a student, in consultation with a department, intends to pursue honors, the student will register for an appropriate honors project course number, 4050–4079. Typically, all work accepted as fulfilling the requirements for departmental honors is to be submitted to the Bowdoin College library. If students do not fulfill the requirements for completion of the honors project but carry out satisfactory work for an independent study, they will receive independent study credit for one or two semesters and the course number will be changed to 4000–4028.

Sarah and James Bowdoin Scholars (p. 31) (Dean's List)

Sarah and James Bowdoin scholarships, carrying no stipend, are awarded in the fall on the basis of work completed the previous academic year. The award is given to the top 20 percent of students, as calculated by grade point average (GPA). Eligible students are those who completed the equivalent of eight full-credit Bowdoin courses during the academic year, six credits of which were graded with regular letter grades and seven credits of which were graded with regular letter grades or non-elective Credit/D/Fail grades. In other words, among the eight required full-credit courses or the equivalent, a maximum of two credits may be graded Credit/D/Fail, but only one credit may be for a course(s) the student elected to take with the Credit/D/Fail grading option. Grades for courses taken in excess of eight credits are included in the GPA. For further information on the College's method for computing GPA, consult the section on General Honors (p. 30).

A book, bearing a replica of the early College bookplate serving to distinguish the James Bowdoin Collection in the library, is presented to every Sarah and James Bowdoin Scholar who has earned a GPA of 4.00.

Students who receive College honors have their names sent to their hometown newspaper by the Office of Communications and Public Affairs. Students not wishing to have their names published should notify the office directly.

It is Bowdoin's policy not to disclose the GPA ranges that determine Sarah and James Bowdoin Scholars, as they can shift.

Other Academic Regulations (p.)

There are four types of leave from the College: (1) personal leave of absence; (2) medical leave of absence, both voluntary and involuntary; (3) disciplinary suspension; and (4) academic suspension.

Personal Leave of Absence (p. 31)

Bowdoin recognizes that, from time to time, a student may derive educational and personal value from taking a personal leave of absence from their studies. Students contemplating personal leaves are strongly encouraged to consider carefully their individual situations, including

progress toward degree completion and whether circumstances dictate that they should temporarily interrupt their course of study at Bowdoin.

Students wishing to take a personal leave from Bowdoin may, with the approval of a dean, and in consultation with their academic advisor, interrupt their Bowdoin education and take a voluntary personal leave of absence to pursue other interests for one or two semesters. A personal leave of absence functions as a withdrawal from the College, during which time the student is not enrolled at the College. If a student intends to take a personal leave from the College, they should review associated information (<https://www.bowdoin.edu/registrar/students/completing-degree/withdrawal.html>), meet with their dean, and complete the online Intent to Withdraw Form (<https://www.bowdoin.edu/registrar/students/protected-student/intent-to-withdraw-form.html>).

The conditions governing a personal leave of absence are as follows:

1. Students must be in good academic and social standing at the end of the semester immediately prior to the start of the leave.
2. Leaves typically begin at the start of a regular semester and may not extend beyond two semesters. Exceptions may be granted on a case-by-case basis by the dean of students.
3. A personal leave may not be used in lieu of a voluntary medical leave.
4. Leaves of absence, extensions, or terminations of leaves must have the approval of a dean.
5. Students on personal leave are not considered enrolled at Bowdoin and are expected to leave the College community.
6. Students on leave may not transfer academic credit to Bowdoin for coursework taken while on leave.
7. Students should be aware that taking a leave may affect their class standing.
8. Students should be aware that taking a leave may have financial implications related to tuition reimbursement, financial aid, and repayment status of any student loans. Returning students retain financial aid eligibility if they meet applicable deadlines.
9. While on leave, students are unable to compete in Bowdoin College athletic programs until after the last day of exams prior to the semester in which they are scheduled to return.
10. While on leave, students may be ineligible to apply for certain campus opportunities or leadership positions. Examples include, but are not limited to, off-campus study, Residential Life, Conduct Review Board, Outing Club, Career Exploration and Development (CXD), and McKeen Center. Students should speak with individual offices to determine eligibility.
11. Students who have not already completed the Off-Campus Study application process will not be permitted to study elsewhere during their leave and transfer credit back to Bowdoin.
12. Once a request for a leave of absence is approved, the decision is binding.

Students on leave will be able to participate in course registration for the semester in which they are expected to return. Course registration instructions will be sent to their Bowdoin email. Students returning from leave will be able to participate in the selection of housing via a proxy process.

Medical Leave of Absence (p. 31)

For a variety of reasons, students may find it beneficial to request a leave of absence to address a health condition. In limited circumstances, the College may deem it necessary to require a student to take a medical leave of absence. The medical leave status will continue until the student

is prepared to return to the College and is re-enrolled by the Re-enrollment Committee. This policy outlines the circumstances of such leaves as well as various procedures and conditions, including re-enrollment criteria and processes and implications for the student in terms of academic, financial, insurance, and housing matters.

Voluntary Medical Leave

A student is encouraged to request a voluntary medical leave in the event that they believe that their physical and/or mental health concerns are significantly interfering with their ability to succeed at Bowdoin and/or that the demands of college life are interfering with recovery, treatment, or safety. A student who, in consultation with either the director of health services or director of counseling services, determines that they need to request a voluntary medical leave should contact their dean to discuss the terms of the leave as determined by the College. Whenever possible, students intending to go on a medical leave from the College should review associated information (<https://www.bowdoin.edu/registrar/students/completing-degree/withdrawal.html>), meet with their dean, and complete the online Intent to Withdraw Form (<https://www.bowdoin.edu/registrar/students/protected-student/intent-to-withdraw-form.html>).

Involuntary Medical Leave

In unusual circumstances, the dean of students or their designee, in consultation with health services and/or counseling services professionals, may determine that a student needs to be placed on involuntary medical leave. In the event such a determination is made, the College will promptly convey that decision in writing to the student. Any student whose situation falls within the following categories may be subject to involuntary leave of absence:

- presents a substantial risk of harm to self or others or is failing to carry out substantial self-care obligations; or
- significantly disrupts the educational or other activities of the College community; or
- is unable to participate meaningfully in educational activities; or
- requires a level of care from the College community that exceeds the resources and staffing that the College can reasonably be expected to provide for the student's well-being.

The involuntary leave determination will be based upon an individualized assessment, reflecting reasonable judgment that relies on current medical knowledge or on the best available objective evidence. The decision will reflect consideration of a number of factors, including the student's ability to safely participate in the College's programs, inclusive of the student's ability to carry out substantial self-care obligations, and will examine whether the student is otherwise qualified, with or without reasonable accommodation, to effectively participate in the College community. The assessment will determine the student's impact on the campus community; the nature, duration, and severity of any risk posed; the probability that a potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures will sufficiently mitigate the risk. In particularly urgent situations, the College may require the student to leave campus on an interim basis while it performs the assessment.

Return from Hospitalization

A student who is hospitalized as a result of a physical or mental health issue may wish to take a medical leave from Bowdoin to recover. If so, the student should follow the voluntary medical leave process set forth herein. In the event the student no longer requires a hospital setting and does not wish to take a medical leave, that student must be evaluated by Bowdoin for readiness to return to campus before the student may return. Note that, in some situations, the hospital may determine that

the student is eligible for discharge; however, a separate administrative decision is to be made by Bowdoin with respect to whether or not that student may return to campus. It may be determined, upon such an individualized evaluation, that the student has recovered such that the student no longer requires a hospital setting but may still need more support than the student can receive in a residential college setting. In such situations, a required withdrawal from Bowdoin for medical reasons may be considered to allow for a more extended period of recuperation. In that situation, if the student is unwilling to take a voluntary medical leave, the involuntary medical leave process shall be followed as set forth herein.

Family Notification

The College reserves the right, consistent with applicable state and federal privacy laws, to notify a parent or guardian of their student's status if circumstances warrant and if it is believed to be in the best interest of the student and the College community.

Appeal Procedure for Involuntary Medical Leave

If a student believes that the College's decision to place them on an involuntary medical leave and/or the conditions the College may have placed upon the student's return from an involuntary medical leave are unreasonable or that the procedures and/or information relied upon in making the decision were wrong or unfair, the student may appeal the decision. The appeal must be made in writing to the dean for students. Appeals should clearly state the specific grounds for appeal and should present relevant information to support the statements including medical/clinical evidence in support of their position. In such situations, the student may be required to sign a limited release to enable the dean for students or their designee to consult with the student's health care provider on the involuntary leave decision and/or conditions placed upon the student's return. Once notified of the involuntary medical leave, the student has five (5) business days to submit their appeal. The student may not remain on campus during the appeal period. If no timely appeal is submitted, the decision about the involuntary medical leave and any conditions imposed are final. The dean for students or their designee will respond in writing to the student's written appeal within five (5) business days. The response will provide a conclusion as to whether or not the involuntary medical leave is appropriate upon a thorough review of the relevant facts and information. The dean for students reserves the right to request an assessment by an outside medical provider of the College's choice and at the College's expense when it is believed that the information available to the College so warrants. In such instances, a delay in the resolution of the appeal may be necessary.

The Re-enrollment Committee (p. 32)

Any student on leave from the College, including students on medical leave, personal leave, academic suspension, or disciplinary suspension, must request for re-enrollment before the student is permitted to return to Bowdoin.

Students who are eligible to apply for re-enrollment will be notified via their Bowdoin email account by the Office of the Dean of Students and provided instructions for re-enrollment. The Re-enrollment Committee—which is chaired by the dean of students or a designee, and includes representatives from the Office of Admissions, the Office of the Dean of Students, and the Office of Residential Life—reviews requests for re-enrollment twice annually. Letters requesting re-enrollment and supporting materials should be directed to the Office of the Dean of Students.

Students seeking re-enrollment are notified of the outcome of their petitions by their dean. Students should be aware that, in addition to

other applicable re-enrollment criteria, due to Bowdoin's enrollment model, no student is guaranteed to be re-enrolled to the College within the timeframe they request.

Students on any form of leave are typically not eligible to register for classes or make housing arrangements until they have been re-enrolled. Typically, a student will be able to participate in course registration for the semester in which they are expected to return upon approval of the request for re-enrollment. Course registration instructions will be sent to their Bowdoin email. Students will be able to participate in the selection of housing after re-enrollment.

Re-enrollment Criteria and Procedures (p. 33)

General Re-enrollment

A student who has been placed on a leave for academic performance, disciplinary, or medical reasons—whether voluntary or involuntary—must request re-enrollment before the student is allowed to return to Bowdoin College.

The student must send a letter to the Re-enrollment Committee in a timely manner, to the attention of the dean of students, requesting formal re-enrollment to the College. That letter must comply with the terms of the student's leave contained in the letter confirming the student's leave (which is typically from the Office of the Dean of Students or the Office of the Registrar). Once the Re-enrollment Committee has reached a decision, the student will be notified by their dean. The decision of the committee is final.

Re-enrollment Following Medical Leave

Where a student requests re-enrollment following a medical leave, or where the terms of a student's leave otherwise require it, the student must also send to the director of health services and/or the director of counseling services and wellness programs a report from the student's physician and/or health care provider. The report is expected to include discussion of the student's current health status, course of treatment undergone during the leave, and the student's compliance with any treatment plan, as well as any specific recommendations for the student and the College with respect to the student's successful return to Bowdoin. The report will address the following: (a) the student's readiness to return to the academic and cocurricular demands of college life; (b) the student's readiness to live on campus; (c) the student's ongoing treatment needs; (d) the student's readiness to return to competitive sports, if the student is a collegiate athlete; and (e) any other suggestions that the health care provider deems appropriate.

The student's health care provider submitting the report must be a licensed physician if the evaluation is regarding medical conditions and must be a licensed mental health provider if evaluating mental health conditions. Further, all providers must be unrelated to the student and must have a specialty and credentials appropriate for the condition(s) of concern. The student is responsible for any cost associated with the provider's evaluation.

The Re-enrollment Committee will review the information provided by the student and evaluate the appropriateness of the student's return. The committee may request further information from the student's health care providers. In order to provide for such requests, the student will be asked to sign and return a limited release form so that those individuals at the College who are involved in evaluating the student's return may consult with the student's outside health care provider(s) limited to aiding the College in assessing the student's readiness to return to campus life and if so, under what conditions. In addition, the director of health services and/or the director of counseling services and

wellness programs may also choose to meet with the student as part of the evaluation. The College reserves the right to request an assessment by an outside medical provider, of the College's choice at the College's expense, when it believes the circumstances so warrant.

In the event that the student is permitted to return to Bowdoin, the student will speak with their dean before returning in order to discuss the terms of the student's re-enrollment, including, if appropriate, a discussion of a continuing treatment plan for the student. If such a plan is established and if the student does not follow the established plan, the College will have the right to revoke its decision to re-enroll the student and will have the right to require the student to resume their medical leave immediately.

Additional Considerations

Students should review associated information (<https://www.bowdoin.edu/registrar/students/completing-degree/withdrawal.html>) to receive further guidance on the implications of withdrawing from the College.

Academic Implications (p. 33)

Enrollment Status

While on leave, the student is not an enrolled student at Bowdoin College. The leave status will continue until the student returns from a personal leave or is re-enrolled by the Re-enrollment Committee. Students should be aware that they are expected to complete their degree in eight semesters of enrollment (semesters in which they earn credit). Ninth semesters are rarely permitted and only by petition to the Recording Committee.

Taking Courses at Other Institutions

The College strictly regulates the circumstances under which students on leave may transfer credits for courses taken during their leave.

In certain circumstances, the dean of students may approve a limited course load (one or two courses preapproved by the College). Students on a medical leave will typically not be permitted to take courses during leave. If a student on a medical leave seeks approval to take courses during their leave, the student must provide support, in writing, from the student's health care provider. All requests for such course approval must be made in writing to the dean of students. Requests for transferring course credit for more than two courses are seldom granted and require prior approval of the Recording Committee.

In instances of suspensions for disciplinary or academic reasons, the student's suspension letter will provide all pertinent details regarding coursework during the suspension, including whether the student has permission to take courses, whether the student is required to take courses, and any parameters regarding when the courses may be taken, among others.

In all cases, if a student enrolls as a degree-seeking student at another institution and later wishes to return to Bowdoin, they must apply through the admission process as a transfer student.

Off-Campus Study Applications

Students on personal leave are permitted to submit applications for off-campus study, but must comply with the deadlines for those programs. Questions should be directed to the Office of International Programs and Off-Campus Study.

Course Registration

Once a student has been re-enrolled, they will be able to participate in course registration and the Office of the Registrar will send instructions

to the student's Bowdoin email. Students must consult with their academic advisor and dean when choosing courses following a leave.

Educational Record Reflection

The student's transcript will not reflect their leave. In the event a leave occurs after the start of the semester, courses for that semester will be listed on the transcript with grades of "W" (Withdrawn). A copy of the student's leave approval letter will be retained in the Office of the Dean of Students. The handling of the student's educational record is governed by the Family Education Rights and Privacy Act (FERPA). For more information about FERPA and a student's rights under the law, consult Student Privacy Rights Policies in the (<https://www.bowdoin.edu/dean-of-students/ccs/policies/student-records.html>) Code of Community Standards (<https://www.bowdoin.edu/dean-of-students/ccs/policies/student-records.html>).

Financial Implications (p. 34)

Financial Aid Eligibility

Any student not in attendance for one or more terms, for voluntary or involuntary reasons, should be aware that their withdrawal from the College may affect any financial aid they are receiving and/or any federal loans borrowed while enrolled. The student is advised to consult with the Office of Student Aid to: 1) ensure that all aid forms and required documents have been submitted prior to leaving the College; 2) review any loan repayment obligations that may come due during the leave; and 3) understand the deadlines and form requirements for aid application for return to the College.

Tuition and Fee Refunds

Tuition and fee refunds for leaves taken during the course of a semester are made in accordance with the College's refunds policy. For more information, consult the refunds section (p. 15).

Tuition Insurance

Tuition insurance is available, but it must be purchased prior to the start of the semester. Questions should be directed to the Bursar's Office.

Insurance Implications (p. 34)

If the student is currently enrolled in the Bowdoin Student Accident and Sickness Insurance Plan, their coverage will continue as specified by the plan policy. If the student waived Bowdoin's plan, they should consult their comparable plan for any exclusions or limitations. Questions should be directed to the student health insurance coordinator.

Housing Implications (p. 34)

On a case-by-case basis, the College, in consultation with the student's health care providers, may determine that the returning student should not live on campus but is capable of attending classes. In addition, College housing may not be available to the student upon their return, due to space limitations. Once the student has been re-enrolled, they can discuss availability and options with the Office of Residential Life. Students on medical leave are ineligible to participate in the spring housing lottery. In the event that College housing is not available, the student may choose to live in housing in the local area. The Office of Residential Life maintains information on local area rental listings. Questions should be directed to the Office of Residential Life.

Presence on Campus (p. 34)

While a student is on medical leave, or suspension for disciplinary or academic reasons, they will not be permitted to visit campus without prior written permission of the dean of students or their designee.

Permission will generally be granted for certain preapproved educational or health treatment purposes only.

Resignation (p. 34)

Students may resign from Bowdoin at any time. Resignation permanently and irrevocably terminates the student's official relationship with the College. If a student were to desire at some future date to return to Bowdoin, the student would need to reapply to the College through the regular admissions process as a transfer student. Given the permanency of resignation, students are encouraged to discuss their plans thoroughly with advisors, parents, and a dean. In instances where students have been away from the College for multiple semesters, including where students are not on a formal leave or where a leave period has expired, they may be administratively resigned. Furthermore, a student who enrolls in another institution as a degree-seeking student will be administratively resigned.

A decision to resign should be submitted in writing using the online Intent to Withdraw Form (<https://www.bowdoin.edu/registrar/students/protected-student/intent-to-withdraw-form.html>). Students should also reference other associated information (<https://www.bowdoin.edu/registrar/students/completing-degree/withdrawal.html>).

Upon resignation, tuition and fee refunds are made in accordance with the College's refunds policy.

The *Bowdoin College Catalogue and Academic Handbook* is current as of August 1, 2022. The *Code of Community Standards* may be updated more frequently after this date and is the authoritative source for information governing student life at Bowdoin.

OFF-CAMPUS STUDY

The Office of International Programs and Off-Campus Study prepares students to “be at home in all lands” through advising and programming that promote intentionality and integration to broaden and enrich the Bowdoin education. Whether off-campus study occurs abroad or in the United States, students are encouraged to participate in off-campus study as an extension of the on-campus educational experience, and expectations are that the courses in which students earn credit toward the degree be in a field of study characteristic of the liberal arts and be academically engaging and complementary to their studies at Bowdoin. Students contemplating off-campus study for the semester, academic year, or the summer should consult the Off-Campus Study website (<https://www.bowdoin.edu/ocs/>).

DEPARTMENTS, PROGRAMS OF INSTRUCTION, AND INTERDISCIPLINARY MAJORS AND MINORS

The departments and programs of instruction in the following descriptions are listed in alphabetical order. Note that major and minor requirements listed apply to students who matriculate in 2022–2023; other students must follow the major and minor requirements that were in place the year they matriculated. Recent editions of the *Bowdoin College Catalogue and Academic Handbook* can be found in the Archive (p. 781). Visit the Bowdoin Digital Commons (<https://digitalcommons.bowdoin.edu/course-catalogues/>) for the comprehensive collection.

Explanation of Symbols Used

Symbol	Definition
*	On leave for the fall semester.
**	On leave for the spring semester.
‡	On leave for the entire academic year.

All courses are listed under the originating department or program and may be cross-listed into other subject areas. Courses are numbered according to the following system:

Numbers	Definition
1000–1049	First-year writing seminars
1050–1099	Courses intended for non-majors
1100–1999	Introductory courses
2000–2969	Intermediate courses and seminars
2970–2998	Intermediate independent studies
2999	Intermediate collaborative study
3000–3999	Advanced courses and seminars
4000–4079	Advanced independent studies, advanced collaborative study, senior projects, and honors projects

Additional Information in the Course Descriptions

Distribution Requirements

Students must earn at least one full credit for a letter grade* in each of the following five distribution areas:

- **Difference, Power, and Inequity (DPI).** These courses examine difference in terms of power and inequity. Students learn theories, methods, and skills to analyze structures of privilege and inequality. Students confront how such structures intersect with their own experiences.
- **Inquiry in the Natural Sciences (INS).** These courses help students expand their understanding of the natural sciences through practices associated with questioning, measuring, modeling, and explaining the natural world.

- **International Perspectives (IP).** These courses assist students in developing a critical understanding of the world beyond the United States. IP courses provide students with the tools necessary to analyze non-US cultures, societies, and states (including indigenous societies and sovereign nations within the United States and its territories), either modern or historical.
 - **Mathematical, Computational, or Statistical Reasoning (MCSR).** These courses enable students to use mathematics and quantitative models and techniques to understand the world around them either by learning the general tools of mathematics and statistics or by applying them in a subject area.
 - **Visual and Performing Arts (VPA).** These courses help students expand their understanding of artistic expression and judgment through creation, performance, and analysis of artistic work in the areas of dance, film, music, theater, and visual art.
- * A course graded Credit/D/Fail Only, e.g., music ensembles, may be used to fulfill a division or distribution requirement if a grade of CR (credit) is earned.

Division Requirements

Students must earn at least one full credit from each of the following three divisions of the curriculum:

- **Natural Science and Mathematics (a)**
- **Social and Behavioral Sciences (b)**
- **Humanities (c)**

Courses that meet these requirements will be marked with the symbols in parentheses. Additionally, courses that are designated as first-year writing seminars will be marked with (FYWS).

Africana Studies Overview & Learning Goals Overview and Learning Goals

Africana studies offers courses in the following fields of study: African American; African, and African diaspora. Over the course of their major/minor in Africana studies, students acquire knowledge and develop skills through coursework, independent studies, and, in some cases, a senior honors project. These skills and knowledge include:

- learning about the past and present of the African continent and its diaspora, with a particular focus on the United States, by employing interdisciplinary methods;
- writing clear and concise arguments about the historical, literary, economic, political, social, visual, and religious texts of Africa and its diaspora;
- working collaboratively with peers and/or faculty on research pertaining to African American and African political thought and historical contexts;
- speaking or performing coherently to a diverse audience about a specific topic pertaining to African American and African culture and politics; and
- designing a project using primary and secondary sources regarding Africa and its diaspora.

Options for Majoring or Minor in the Department

Students may elect to major in Africana studies or to coordinate a major in Africana studies with digital and computational studies, education, or

environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in Africana studies.

Visiting Fellow: Donato Fhunsu

Contributing Faculty: Ericka A. Albaugh‡, Charlotte Daniels*, Guy Mark Foster, David M. Gordon, Tracy McMullen, Ingrid A. Nelson, Patrick J. Rael, Marceline Saibou‡, Hanétha Vété-Congolo

Faculty/Staff Website (<https://www.bowdoin.edu/africana-studies/faculty-and-staff/>)

Requirements

Africana Studies Major

The major in Africana studies consists of nine courses. There are two tracks or concentrations:

Code	Title	Credits
Required Courses		
AFRS 1101	Introduction to Africana Studies	1
Select one Africana studies intermediate seminar (2000–2969).		1
Select one Africana studies senior seminar (3000–3999).		1
Select six additional Africana studies electives. ^{a,b,c}		6

- a At least five courses at the intermediate or advanced level (2000 or higher)
- b Students in the African American concentration must take a least one course from the African and African Diaspora track.
- c Students in the African and African Diaspora concentration must take at least one course from the African American track.

For both concentrations:

- A maximum of two courses, either as an intermediate or advanced level independent study course or a course taken at another college or university, can count toward the major.
- An approved honors project fulfills the senior seminar requirement. A complete honors project comprises two semesters of work.

Africana Studies Minor

The minor in Africana studies consists of five courses.

Code	Title	Credits
Required courses		
AFRS 1101	Introduction to Africana Studies	1

Select four Africana studies elective courses from either of the two Africana studies tracks. ^{d,e} 4

- d Three of these courses must be at the 2000 and 3000 levels.
- e Only one of these four electives can be an intermediate or advanced level independent study course or a course taken at another college or university.

Additional Information

Additional Information and Program Policies

- A first-year writing seminar in Africana studies counts toward the major or minor in Africana studies.
- Courses that count toward the major or minor must be taken for regular letter grades, and students must earn grades of C- or better.
- The chair of Africana studies will work with students to discuss double-counting cross-listed courses with other departments or programs.

Information for Incoming Students (p. 37)

This fall, we will be offering one section of AFRS 1101 Introduction to Africana Studies; it is capped at 50 students and often fills. This class will likely also be offered in the spring, depending on student demand. All Africana studies classes are open to first-year students, with the exception of those taught at the 3000-level. Most of our courses attract students from all class years and academic interests, allowing first-years to get to know their fellow students in different years and with different levels of academic experience. There are many courses appropriate for first-year students that are cross-listed in other departments such as history, English, Francophone studies, anthropology and sociology. If you have questions about any of these courses, contact the department chair: Professor Brian Purnell (<https://www.bowdoin.edu/profiles/faculty/bpurnell/>).

Courses

AFRS 1005 (b) Women of Color in Politics
Non-Standard Rotation. Enrollment limit: 16.

Explores the significant roles that women of color have played in American politics and around the world. Begins with the US context, starting in the antebellum era and moving forward by reading biographies/autobiographies that provide voice to the experiences faced by women of color in both traditional and non-traditional political spaces. These include women of color as close confidants to male political figures (first ladies, wives, and mistresses) and as politicians, judges, activists, and revolutionaries. Then shifts to a more global context considering the perspectives of women of color in countries where they have championed gender equality and feminism, and where they have become powerful political actors. (Same as: GOV 1005, GSWS 1007)

Previous terms offered: Fall 2019, Fall 2018.

AFRS 1010 (b) Deconstructing Racism

Theo Greene.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines the social, political, and historical evolution of racism as a system and the challenges to studying and eradicating racism in contemporary American society. Investigates the construction of race, the various logics used to justify racial thinking, and the visible and invisible forces that perpetuate racial stratification and inequality in American life. Understands the various political and social debates that complicate and undermine how racism is defined and identified. Explores its impact on individuals, institutions, and cultures in the United States, and the various formal and subversive strategies deployed by individuals and collectives for challenging and combatting it. Emphasis on developing a language for discussing, debating, and writing about race and racism sociologically for public and academic audiences. (Same as: SOC 1010)

Previous terms offered: Fall 2019.

AFRS 1012 (c) Affirmative Action and United States History

Every Fall. Enrollment limit: 16.

Interdisciplinary exploration of the rise and fall (and reappearance) of the affirmative action debate that shaped so much of the American culture wars during the 1970s and 2000s. Students primarily study affirmative action in the United States, but comparative analysis of affirmative action systems in societies outside the United States, such as South Africa and India, is also considered. Examines important Supreme Court cases that have shaped the contours of affirmative action, the rise of diversity discourse, and the different ways political and cultural ideologies – not to mention historical notions of American identity – have determined when, where, and how affirmative action has existed and whom it benefits. Study of law, economics, sociology, anthropology, history, and political science introduces students to different methodological approaches that inform Africana studies and the field's examination of the role people of African descent have played in contemporary and historical American society. Writing intensive. Analytical discussions of assigned texts.

Previous terms offered: Fall 2021, Fall 2020.

AFRS 1021 (c, FYS) Bad Girls of the 1950s

Non-Standard Rotation. Enrollment limit: 16.

Explores the representation and life experiences of women who did not fit the cultural norm of suburban motherhood in 1950s America. Focuses on issues of class, race, sexuality, and gender in a decade shaped by fears about nuclear war and communism, and by social and political conformity. Topics include teenage pregnancy, women's grassroots political leadership, single womanhood, civil rights, emergent feminism, and, finally, the enduring cultural resonance of the apron-clad 1950s mom. Engages a variety of primary and secondary sources. Note: This course is part of the following field(s) of study: United States. (Same as: GSWs 1021, HIST 1001)

Previous terms offered: Fall 2019.

AFRS 1026 (c) Freedom Stories

Non-Standard Rotation. Enrollment limit: 16.

Explores the ways in which the idea of American freedom has been defined both with and against slavery through readings of legal and literary texts. Students come to terms with the intersections between the political, literary, and historical concept of freedom and its relation to competing definitions of American citizenship. (Same as: ENGL 1026)

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

AFRS 1029 (b, FYS) Buried Treasure, Hidden Curse? Politics of Natural Resource Extraction in Africa

Non-Standard Rotation. Enrollment limit: 16.

Oil, diamonds, gold. . . riches in the midst of poverty. How can Africa boast so many natural resources and yet remain the poorest continent on earth? What is the "resource curse?" Begins by putting Africa in the context of global resource extraction, oil in particular. Establishes Africa's long pre-colonial experience with trade in iron, gold, salt, and slaves. The colonial period deepened the reliance of many territories on specific resources, a pattern that continues to the present. Uses Burkina Faso as a specific example of gold extraction, contrasting industrial and artisanal mining. Modern streams of prospectors throughout West Africa echo the California gold rush, but with important distinctions. An introduction to political science, the interplay between national and foreign governments, international and domestic firms, and local and migrant prospectors as they vie for access to valuable resources are highlighted. (Same as: GOV 1029)

Previous terms offered: Fall 2018.

AFRS 1044 (c) Why Are You Here? Interpreting Humanity from Africana Perspectives

Non-Standard Rotation. Enrollment limit: 16.

This interdisciplinary course poses the central question of "why are you here" to first-year students with respect to their education at Bowdoin and their broader lives in general, providing tools from Africana traditions to help them develop their own answers. In a moment of moral, ecological, and political uncertainty, it can be difficult to know what it means to be a good person, how to live a good life, and what "the common good" actually is. We begin by studying the genealogy of the particular Western, secular, modern education and the forms of knowledge, culture, and humanity that it has both produced and undermined within Africana societies. After positioning ourselves and our educational tradition in perspective, we explore indigenous and Islamic forms of education and person formation and the various ways that they answer questions such as "who are you?", "why are you here?", and "what should you do with your life?"

Previous terms offered: Fall 2020.

AFRS 1101 (c) Introduction to Africana Studies

Deji Ogunnaike; Brian Purnell.

Every Fall. Fall 2022; Spring 2023. Enrollment limit: 50.

Focuses on major humanities and social science disciplinary and interdisciplinary African American and African diaspora themes in the context of the modern world. The African American experience is addressed in its appropriate historical context, emphasizing its important place in the history of the United States and connections to African diasporic experiences, especially in the construction of the Atlantic world. Material considered chronologically and thematically builds on historically centered accounts of African American, African diaspora, and African experiences. Introduces prospective Africana studies majors and minors to the field; provides an overview of the predominant theoretical and methodological perspectives in this evolving discipline; and establishes historical context for critical analyses of African American experiences in the United States, and their engagement with the African diaspora.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

AFRS 1105 (c) Egyptian Archaeology

Non-Standard Rotation. Enrollment limit: 50.

Introduces the techniques and methods of archaeology through an examination of Egyptian material culture. Emphasis is placed upon understanding the major monuments and artifacts of ancient Egypt from the prehistoric cultures of the Nile Valley through the period of Roman control. Architecture, sculpture, fresco painting, and other "minor arts" are examined at sites such as Saqqara, Giza, Thebes, Dendera, Tanis, and Alexandria. Considers the nature of this archaeological evidence, its context, and the relationship of archaeology to other disciplines such as africana studies, art history, anthropology, history, and classics. Course themes include the origins and development of complex state systems, funerary symbolism, contacts between Africa and the Mediterranean, and the expression of social, political and religious ideologies in art and architecture. Selected readings supplement illustrated presentations of the major archaeological finds of Egypt. Class meetings include artifact sessions in Bowdoin College Museum of Art. (Same as: ARCH 1103)

Previous terms offered: Fall 2021.

AFRS 1108 (c) Introduction to Black Women's Literature

Non-Standard Rotation. Enrollment limit: 50.

Examines the twin themes of love and sex as they relate to poems, stories, novels, and plays written by African American women from the nineteenth century to the contemporary era. Explores such issues as Reconstruction, the Great Migration, motherhood, sexism, group loyalty, racial authenticity, intra- and interracial desire, homosexuality, the intertextual unfolding of a literary tradition of black female writing, and how these writings relate to canonical African American male-authored texts and European American literary traditions. Students are expected to read texts closely, critically, and appreciatively. Possible authors: Harriet Jacobs, Frances Harper, Nella Larsen, Jessie Faucet, Ann Petry, Ntozake Shange, Suzan-Lori Parks, Alice Walker, Toni Morrison, Gayle Jones, Jamaica Kincaid, Terry McMillan, Sapphire, Lizzette Carter. (Same as: ENGL 1108, GSWS 1104)

Previous terms offered: Spring 2019.

AFRS 1109 (c) Black Women's Lives as the History of Africana Studies: Eighteenth and Nineteenth Century

Non-Standard Rotation. Enrollment limit: 50.

In conjunction with the fiftieth anniversary of Africana studies at Bowdoin, this yearlong, two-part course will address debates and issues of Africana studies through the lives of black women. In Part I, students will focus on early Africana studies texts, reading works by and about Phillis Wheatley, Sojourner Truth, Frances Harper, Ida B. Wells, and Anna Julia Cooper. We will take up differences and continuities between these thinkers to understand the politics of respectability, work, representation, sexuality, and family across multiple historical contexts. (Same as: ENGL 1301, GSWS 1301)

Previous terms offered: Fall 2019.

AFRS 1111 (c) Black Women's Lives as the History of Africana Studies: Twentieth and Twenty-first Century

Non-Standard Rotation. Enrollment limit: 50.

In conjunction with the fiftieth anniversary of Africana studies at Bowdoin, this course will address debates and issues of Africana studies through the lives of black women. Students will focus on the twentieth and twenty-first centuries reading works by and about Zora Neale Hurston, Pauli Murray, Nina Simone, Josephine Baker, Angela Davis, and Condoleezza Rice. We will take up differences and continuities between these thinkers to understand the politics of respectability, work, representation, sexuality, and family across multiple historical contexts. Though this course continues the themes of AFRS 1109, students need not take Part I to take Part II. (Same as: ENGL 1302, GSWS 1205)

Previous terms offered: Spring 2020.

AFRS 1185 (b, IP) Introduction to Africa-China Relations

Non-Standard Rotation. Enrollment limit: 50.

Chinese and some African government officials speak of Africa-China relations as a "win-win" partnership, "traditional friendship", and "brotherhood" predicated on historical, mutual marginalization by the West. Despite this, China and individual African countries remain highly unequal in their economic and political strength and global significance. There is also great diversity among the African Union's fifty-four states in their responses to and engagement with Beijing. Is it possible in this situation to have symmetrical bilateral relations? How do African leaders shape relations between their nation and China? Is China's engagement with African countries actually promoting development on the continent? Focusing on three key interaction points—precolonial Africa, the Bandung era (1955-1999), and "Going Out" (1999-present) — students will become acquainted with the actors, institutions, and domestic and global conditions driving engagement between the two regions. (Same as: ASNS 1185)

Previous terms offered: Spring 2020.

AFRS 1211 (c, IP, VPA) Introduction to Music in Africa

Every Other Year. Enrollment limit: 50.

Introduces students to the rich and diverse musical traditions of sub-Saharan Africa. Covers traditional and modern musical practices from various regions, and explores their roles in social, cultural, and political contexts from historical and contemporary perspectives. Students learn to identify basic regional musical properties and characteristic musical styles. Case studies may include West African dance-drumming, Ghanaian highlife, musical oral historians, "African Ballets," South African a cappella, the protest music of Nigerian Fela Kuti and Zimbabwean Thomas Mapfumo, as well as contemporary hip-hop and religious pop music. Based on lectures, readings, performances by visiting artists, discussions, and audio and video sources. No prior musical knowledge necessary. (Same as: MUS 1211)

Previous terms offered: Fall 2021, Fall 2018.

AFRS 1213 (c, VPA) Introduction to Caribbean Dances and Cultures

Non-Standard Rotation. Enrollment limit: 18.

From the folkloric dance forms to popular and secular dance practices, this course journeys through various islands and countries of the Caribbean to learn about their various histories and cultures, including the music, costumes, and basic rhythms associated with each particular dance form. This in-studio course provides a general introduction to some of the sacred and popular dances of the Caribbean. Although movement is the primary work of this course, what we learn in class may be supplemented by readings and outside research. *Please note that no prior experience or training is required. Grading will not be based on technical skill levels, but on mindful, full-bodied participation that demonstrates comprehension and articulation of course materials. (Same as: DANC 1213)

Previous terms offered: Fall 2021, Fall 2019.

AFRS 1241 (c) The Civil War Era

Every Other Fall. Enrollment limit: 50.

Examines the coming of the Civil War and the war itself in all its aspects. Considers the impact of changes in American society, the sectional crisis and breakdown of the party system, the practice of Civil War warfare, and social ramifications of the conflict. Includes readings of novels and viewing of films. Students are expected to enter with a basic knowledge of American history, and a commitment to participating in large class discussions. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 1241)

Previous terms offered: Fall 2018.

AFRS 1320 (c, DPI) Racial and Ethnic Conflict in U.S. Cities

Every Other Year. Enrollment limit: 50.

American cities have been historic cauldrons of racial and ethnic conflict. Concentrates on urban violence in American cities since 1898. Students study moments of conflict during the early republic and the nineteenth century. Topics examined include the post-Reconstruction pogroms that overturned interracial democracy; the Red Summer and its historical memory; the ways race and ethnicity shaped urban residential space; the effects of immigration on urban political economy and society, and the conflicts over space, labor, and social relations that arose; and the waves of urban violence that spread across the country in the mid-1960s. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 1320, URBS 1320)

Previous terms offered: Fall 2021.

AFRS 1407 (c, DPI, IP) Introduction to Anglophone African Literature: Contemporary Short Stories

Donato Fhunsu.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

This course is an introduction to Anglophone African Literature through contemporary short stories. It begins with a short study of the main points of the history and culture of Africa and its peoples in order to get the background needed for an informed and sensitive study of the short stories. Students then read four captivating collections of short stories written in the late twentieth century and early twenty-first century by both female and male authors from various parts of the African continent (Bessie Head, Chinua Achebe, Uwem Akpan, and Chimamanda Ngozi Adichie). The course focuses on the main theme of identity and explores several related perennial and current themes that help students appreciate what it means to be not only an African but also a global citizen, a human being with agency in a dynamic and changing world. [Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.] (Same as: ENGL 1303)

Previous terms offered: Spring 2022.

AFRS 1461 (c, DPI, IP) African Civilizations to 1850: Myth, Art, and History

David Gordon.

Every Other Year. Fall 2022. Enrollment limit: 50.

African peoples are often imagined as victims of history. This course challenges such stereotypes by introducing students to the great civilizations of medieval and early modern Africa. Includes the Nile Valley, Ethiopia, Mali, Oyo, Dahomey, Asante, Kongo, Lunda, Swahili, and Zulu. Various themes include political power and governance; culture and society; trade and economy; women and gender; and youth and generational conflict. Content is explored by reading fiction, poetry, myth, artwork (including art in the Bowdoin College Museum of Art), and historical scholarship. This course is part of the following field(s) of study: Africa. It also meets the non-Euro/US requirement and pre-modern requirements. (Same as: HIST 1461)

AFRS 1581 (c, VPA) History of Jazz I

Every Other Fall. Enrollment limit: 50.

A socio-cultural, historical, and analytical introduction to jazz music from the turn of the twentieth century to around 1950. Includes some concert attendance. (Same as: MUS 1281)

Previous terms offered: Fall 2021, Fall 2019.

AFRS 1592 (c, VPA) Issues in Hip-Hop I

Non-Standard Rotation. Enrollment limit: 50.

Traces the history of hip-hop culture (with a focus on rap music) from its beginnings in the Caribbean to its transformation into a global phenomenon by the early 1990s. Explores constructions of race, gender, class, and sexuality in hip-hop's production, promotion, and consumption, as well as the ways in which changing media technology and corporate consolidation influenced the music. Artists/bands investigated include Grandmaster Flash, Run-D.M.C., Public Enemy, De La Soul, Queen Latifah, N.W.A., MC Lyte, Snoop Doggy Dogg, and Dr. Dre. (Same as: MUS 1292, GSWS 1592)

Previous terms offered: Fall 2018.

AFRS 2052 (b, DPI) Race, Ethnicity, and Politics

Angel Saavedra Cisneros.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the impact of race and ethnicity on American politics. Key topics include the impact of race on government, and the development and influence of group identities. Also covers rights, representation, and voting, as well as impacts on education and criminal justice. (Same as: GOV 2052)

Previous terms offered: Spring 2020, Fall 2019.

AFRS 2141 (c) The History of African Americans from 1865 to the Present

Every Other Spring. Enrollment limit: 35.

Explores the history of African Americans from the end of the Civil War to the present. Issues include the promises and failures of Reconstruction, the Jim Crow era, black leadership and protest institutions, African American cultural styles, industrialization and urbanization, the world wars, the Civil Rights Movement, and conservative retrenchment. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2141)

Previous terms offered: Fall 2021, Spring 2019.

AFRS 2145 (c, DPI) The United States Civil War

Patrick Rael.

Every Other Fall. Fall 2022. Enrollment limit: 35.

This course explores the United States Civil War. Beginning with an overview of causes and ending with prospects for Reconstruction, it focuses on the key issues raised by the war: the relationship between military and political factors, the social changes wrought by war, and the crucial issues of slavery and emancipation. Note: This course is part of the following field(s) of study: United States (Same as: HIST 2145)

Previous terms offered: Fall 2020.

AFRS 2201 (c, DPI, VPA) Black Women, Politics, Music, and the Divine
Judith Casselberry; Brian Purnell.

Every Fall. Fall 2022. Enrollment limit: 16.

Seminar. Examines the convergence of politics and spirituality in the musical work of contemporary black women singer-songwriters in the United States. Analyzes material that interrogates and articulates the intersections of gender, race, class, and sexuality generated across a range of religious and spiritual terrains with African diasporic/black Atlantic spiritual moorings, including Christianity, Islam, and Yoruba. Focuses on material that reveals a womanist (black feminist) perspective by considering the ways resistant identities shape and are shaped by artistic production. Employs an interdisciplinary approach by incorporating ethnomusicology, anthropology, literature, history, and performance and social theory. Explores the work of Shirley Caesar, the Clark Sisters, Meshell Ndegeocello, Abby Lincoln, Sweet Honey in the Rock, and Dianne Reeves, among others. (Same as: GSWS 2207, MUS 2291, REL 2201)

Previous terms offered: Fall 2021, Fall 2018.

AFRS 2205 (c) Representing Race in the English Renaissance

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. How does "race" signify in the English Renaissance, a period that witnessed the emergence of the Atlantic slave trade, intensified urbanization in European capital cities, and the development of new global trade routes? Explores a range of literary strategies Renaissance authors use to represent ethnic, religious, and cultural otherness. Considers how literary and dramatic works might critique, justify, and reproduce racial ideologies. Texts include sonnets by Sidney and Shakespeare; plays by Marlowe, Shakespeare, and Middleton; masques by Ben Jonson; poetry by John Donne and William Herbert; and the first English "novel," Aphra Behn's "Oroonoko." Note: Fulfills the pre-1800 literature requirement for English majors. (Same as: ENGL 2015)

Previous terms offered: Spring 2020.

AFRS 2208 (b, DPI) Race and Ethnicity

Non-Standard Rotation. Enrollment limit: 35.

Introduction to the sociological study of race and ethnicity in the contemporary United States. Examines prominent theories pertaining to the social and cultural meanings of race and ethnicity, causes and consequences of structural racism, relationships between race and class, how immigration and assimilation shape and are shaped by social constructions of race and ethnicity, dynamic representations of race and ethnicity in the media, formation and shifts of intra-group and inter-group boundaries, and more. (Same as: SOC 2208, LACL 2708)

Prerequisites: SOC 1101 or AFRS 1101.

Previous terms offered: Fall 2021, Fall 2018.

AFRS 2220 (b) "The Wire": Race, Class, Gender, and the Urban Crisis
Every Other Spring. Enrollment limit: 16.

Postwar US cities were considered social, economic, political, and cultural zones of crisis. African Americans – their families; gender relations; their relationship to urban political economy, politics, and culture – were at the center of this discourse. Uses David Simon's epic series "The Wire" as a critical source on postindustrial urban life, politics, conflict, and economics to cover the origins of the urban crisis, the rise of an underclass theory of urban class relations, the evolution of the urban underground economy, and the ways the urban crisis shaped depictions of African Americans in American popular culture. (Same as: URBS 2620)

Prerequisites: AFRS 1101 or EDUC 1101 or GSWS 1101 or SOC 1101.

Previous terms offered: Spring 2022, Fall 2018.

AFRS 2228 (c, VPA) Protest Music

Non-Standard Rotation. Enrollment limit: 35.

Focuses on the ways black people have experienced twentieth-century events. Examines social, economic, and political catalysts for processes of protest music production across genres including gospel, blues, folk, soul, funk, rock, reggae, and rap. Analysis of musical and extra-musical elements includes style, form, production, lyrics, intent, reception, commodification, mass-media, and the Internet. Explores ways in which people experience, identify, and propose solutions to poverty, segregation, oppressive working conditions, incarceration, sexual exploitation, violence, and war. (Same as: ANTH 2227, MUS 2292)

Previous terms offered: Fall 2021, Fall 2018.

AFRS 2233 (b, IP) Peoples and Cultures of Africa

Non-Standard Rotation. Enrollment limit: 35.

Introduction to the traditional patterns of livelihood and social institutions of African peoples. Following a brief overview of African geography, habitat, and cultural history, lectures and readings cover a representative range of types of economy, polity, and social organization, from the smallest hunting and gathering societies to the most complex states and empires. Emphasis upon understanding the nature of traditional social forms. Changes in African societies in the colonial and post-colonial periods examined, but are not the principal focus. (Same as: ANTH 2533)

Prerequisites: AFRS 1101 or ANTH 1000 or higher.

Previous terms offered: Spring 2019.

AFRS 2236 (c, VPA) Afro-Modern II Techniques and Histories

Every Other Year. Enrollment limit: 22.

A continuation of modern dance principles introduced in Dance 1211 with the addition of African-derived dance movement. The two dance aesthetics are combined to create a new form. Technique classes include center floor exercises, movement combinations across the floor, and movement phrases. Students also attend dance performances in the community. (Same as: DANC 2241, LACL 2396)

Previous terms offered: Spring 2021, Fall 2019, Spring 2019.

AFRS 2238 (c, VPA) Gesturing Towards Meaning: Dance as a Meaning-Making Praxis

Every Other Year. Enrollment limit: 16.

An introduction to dance as a meaning-making, cultural practice. Using embodiment/performance, writing, and discussion, students will use the gestures embedded within dance cultures as critical tools necessary for analyzing and theorizing aspects of race, sexuality, gender, and nationalism. Accordingly, students will understand the meanings and roles of dance and gesture within larger historical, cultural, social, and theatrical contexts. In sum, this class examines dance forms and dancing bodies, such as Indian classical dance, Puerto Rican bomba, and blackface minstrelsy, to better understand how cultures throughout the globe come to know and understand both themselves and the world at large. (Same as: DANC 2506)

Prerequisites: DANC 1000 or higher or THTR 1000 or higher or AFRS 1000 or higher or GSWS 1000 or higher or ANTH 1000 or higher.

Previous terms offered: Spring 2020.

AFRS 2240 (c) Civil Rights and Black Power Movements in the Making of Modern America

Brian Purnell.

Every Other Year. Spring 2023. Enrollment limit: 35.

Examines the political activism, cultural expressions, and intellectual history that gave rise to a modern black freedom movement and its impact on the broader American (and international) society. Students study the emergence of community organizing traditions in the southern black belt as well as postwar black activism in US cities; the role the federal government played in advancing civil rights legislation; the internationalism of African American activism; and the relationship between black culture, aesthetics, and movement politics. The study of women and gender are a central component. Using biographies, speeches, and community and organization studies, students analyze the lives and contributions of Martin Luther King Jr., Ella Baker, Septima Clark, Malcolm X, Stokely Carmichael, Angela Davis, Huey Newton, and Fannie Lou Hamer, among others. Closely examines the legacies of the modern black freedom movement including the expansion of the black middle class, controversies over affirmative action, and the rise of black elected officials. Note: This course is part of the following filed(s) of study: United States. (Same as: HIST 2220)

Previous terms offered: Spring 2022, Spring 2021.

AFRS 2241 (c, IP, VPA) Traveling Textiles: Cultural Encounters from Trade Routes to the Runway

Non-Standard Rotation. Enrollment limit: 16.

Examines the histories and roles of textiles and clothing in crosscultural exchanges. Course material explores how textiles traveled between Africa, Asia, and Europe through precolonial trade routes to how nineteenth-century African textile designs are transformed on European and American fashion show runways today. The course asks questions about how colonial empires, institutions, artists, and other individuals have used textiles to mediate exchanges with other societies. Textiles from Africa represent dynamic visual expressions to investigate issues relating to cultural representation and constructions of identity and power. From tapestries and quilts to ceremonial cloths and everyday dress, we will explore the making, circulation, and use of textiles and their designs to understand what ideas and beliefs textiles carry and communicate. The course focuses on interactions between societies in Africa and other parts of the world, especially Europe, Asia, and the Americas. (Same as: ARTH 2370)

Previous terms offered: Spring 2019.

AFRS 2250 (c, IP, VPA) African Art and Visual Culture

Non-Standard Rotation. Enrollment limit: 35.

What makes an object or artwork "African?" What meanings does this labeling carry? In short, what is Africa? These questions grapple with how to explain, understand, and represent the arts and visual cultures of an entire continent. Explores the complexities and dynamics of artistic practices in Africa—from masquerades, ivories, architecture, and urban mural paintings to the works of blacksmiths, studio photographers, and contemporary artists. Studying the arts and visual cultures of Africa leads also to an exploration of the political systems, social practices, religious beliefs, and everyday life of many different historical and contemporary societies that sharpen understandings of the diversity across the continent. (Same as: ARTH 2380)

Previous terms offered: Fall 2018.

AFRS 2251 (c, VPA) Art and Politics in Africa

Non-Standard Rotation. Enrollment limit: 16.

In the 2018 Marvel film *Black Panther*, a provocative scene depicts Erik Killmonger talking with a curator about the acquisition of objects at the fictional Museum of Great Britain. The curator identifies an axe from seventh-century Benin. Killmonger disagrees. "It was taken by British soldiers in Benin," Killmonger claims, "but it's from Wakanda," the fictional nation portrayed in the film. This scene presents a starting point for this course's inquiry into issues of politics and African art. The course examines the impact of colonial relations on museum collections and displays of African art today, and the roles of art as political discourse in Africa. Materials analyze how leaders and institutions have used objects to articulate authority and navigate conflict during precolonial and colonial periods, nationalist movements, and the years since countries in Africa gained political independence. Topics address broader theoretical issues of power, appropriation, resistance, and heritage. (Same as: ARTH 2360)

Previous terms offered: Spring 2019.

AFRS 2261 (c, VPA) Holy Songs in a Strange Land

Judith Casselberry; Brian Purnell.

Every Other Spring. Spring 2023. Enrollment limit: 35.

Seminar. Examines black sacred music from its earliest forms, fashioned by enslaved Africans, through current iterations produced by black global actors of a different sort. Explores questions such as: What does bondage sound like? What does emancipation sound like? Can we hear corresponding sounds generated by artists today? In what ways have creators of sacred music embraced, rejected, and re-envisioned the "strange land" over time? Looks at musical and lyrical content and the context in which various music genres developed, such as Negro spirituals, gospel, and sacred blues. Contemporary artists such as Janelle Monáe, Beyoncé, Bob Marley, and Michael Jackson included as well. (Same as: MUS 2261)

Previous terms offered: Spring 2022, Spring 2019.

AFRS 2271 (c) Spirit Come Down: Religion, Race, and Gender in America

Every Spring. Enrollment limit: 35.

Examines the ways religion, race, and gender shape people's lives from the nineteenth century into contemporary times in America, with particular focus on black communities. Explores issues of self-representation, memory, material culture, embodiment, and civic and political engagement through autobiographical, historical, literary, anthropological, cinematic, and musical texts. (Same as: GSWS 2270, REL 2271)

Previous terms offered: Spring 2021.

AFRS 2292 (c, VPA) Geographies of the Sexiness: Dance and Politics of (Dis)Respectability Across the Americas

Every Spring. Enrollment limit: 16.

Dance—an art form whose medium is the body—and ethnography—the study of people and their cultures—are great tools for addressing some of the ways different dancing bodies have been historically policed for "dancing sex(y)." Other tools, such as critical dance and black theories, in addition to queer and feminist approaches, will also be utilized to comprehend the uneven ways these bodies are further racialized, sexualized, and gendered within the Americas. In particular, students will learn about various dances (such as the Brazilian samba to the Cuban rumba, Jamaican Dancehall, and the Trinidadian wine) through readings, lectures, and actual in-studio dancing. Ultimately, the intention here is to understand dancing as both a meaning-making activity and a way of understanding the world. In turn, it is an important lens for critically thinking, talking, researching, and writing about politics of identity (especially regarding nationality, gender, race, and sexuality). (Same as: DANC 2505, GSWS 2505, LACL 2392)

Previous terms offered: Spring 2021, Spring 2019.

AFRS 2294 (c) Issues in Hip-Hop II

Non-Standard Rotation. Enrollment limit: 35.

Traces the history of hip-hop culture (with a focus on rap music) from the 1990s to the present day. Explores how ideas of race, gender, class, and sexuality are constructed and maintained in hip-hop's production, promotion, and consumption, and how these constructions have changed and/or coalesced over time. Investigates hip-hop as a global phenomenon and the strategies and practices of hip-hop artists outside of the United States. Artists investigated range from Iggy Azalea to Jay-Z, Miz Korona to Ibn Thabit. (Same as: MUS 2294, GSW 2294)

Prerequisites: MUS 1292 (same as AFRS 1592 and GWS 1592).

Previous terms offered: Spring 2019.

AFRS 2300 (c, IP) Introduction to Africana Religions through Literature

Non-Standard Rotation. Enrollment limit: 16.

Africana religions are often described as lived traditions because experience is such a central part of their practice, nature, and structure. As an imaginative window into another lived experience, literature provides a unique opportunity to understand and experience the worldviews of Africana religions and peoples from more of an inside perspective than most academic material can provide. In this course literature written by and about people who come from these traditions will be studied in conjunction with academic sources on Africana religions and religion and literature to provide students with a deeper understanding of Africana worldviews and how they affect every facet of practitioners' lives. The works studied come from an array of different times, places, linguistic backgrounds, and traditions including the Yoruba religion, Islam, Christianity, Haitian Vodou, Brazilian Candomblé and more in Africa, Latin America, the Caribbean, and the United States. (Same as: LACL 2300, REL 2330)

Previous terms offered: Fall 2020.

AFRS 2326 (c) Critical Race Theory in the United States

Non-Standard Rotation. Enrollment limit: 35.

To master and think critically about classic and contemporary work in critical race theory, especially the work of Derrick Bell, Richard Delgado, Kimberle Crenshaw, and Tommy Curry, we will critically examine such topics as intersectionality, gender and black male studies, social dominance theory, the racial wealth gap, reparations, hate speech, the black/white binary, and revisionist history, among other topics. We will take a distinctively philosophical outlook on these topics: identify value assumption and analyze and evaluate arguments. Finally, we will ponder the relationship of critical race theory (a domain of critical legal studies) to contemporary philosophy of race (a domain of moral and political philosophy). Students will come away with a better understanding of both the conceptual and political issues involved in discussing contemporary issues of race. (Same as: PHIL 2326, LACL 2326)

Previous terms offered: Spring 2020.

AFRS 2330 (b) Diversity in Higher Education

Ingrid Nelson.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores higher education in the contemporary United States through a sociological lens, highlighting the ways that colleges and universities both promote social mobility and perpetuate inequality. Examines the functions of higher education for students and society; issues of inequality in college access, financing, campus experiences, and outcomes later in life; the challenges and benefits of diversity and inclusion; and other topics, with special attention across all topics to the case of African Americans. (Same as: SOC 2330, EDUC 2279)

Prerequisites: SOC 1101.

Previous terms offered: Spring 2021.

AFRS 2354 (c, IP) Conquest, Colonialism, and Independence: African History, 1885 - 1965

David Gordon.

Every Spring. Spring 2023. Enrollment limit: 35.

Surveys history of Africa after conquest by European powers until independence in the 1960s, with a focus on west and central Africa. Includes the global precursors to colonialism, African resistance to European encroachment, and the violence of conquest. The nature of the colonial endeavor, in terms of the type of colonial regime (concessionaire, settler, or trade) is explored alongside the policies of British, French, Belgian, and Portuguese colonists and early resistance to colonialism. Covers the rise of anti-colonial nationalism and decolonization and why European powers quit Africa after only sixty years of formal colonialism. Addresses the diverse hopes and visions of the first independent generation of African leaders, including Kwame Nkrumah, Leopold Sédhor, Nnandi Azikiwe, Julius Nyerere, and Patrice Lumumba. Concludes with colonial legacies in the form of the postcolonial "gatekeeper" state. Within this time frame, considers the politics of gender, race, and class. Note: This course is part of the following field(s) of study: Africa and Colonial Worlds. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 2364)

Previous terms offered: Spring 2021, Spring 2020, Fall 2018.

AFRS 2360 (c, IP) Recreating Africa: Diasporic Imaginings of Race and Space

Non-Standard Rotation. Enrollment limit: 35.

What does it mean to be African? Is the term bound by racial, ethnic, or spatial limitations? Who possesses the rights of access to the cultural products and expressions unique to the continent? This course focuses on how African and African-descended peoples remember and replicate Africa as cognitive object and cultural artifact. The course examines how the concept of Africa, as both home and identity, is recreated and imagined through diasporic perspectives. We will explore questions of home, identity, Afropolitanism, continuity, appropriation, authenticity, historical memory, and creolization, using examples from academic scholars, literary figures, and popular culture on the African continent and throughout its many diasporas. In addition to literature and research, film, music, photography, and artwork will be used to develop a critical understanding of the many contemporary forms used to recreate Africa.

Previous terms offered: Fall 2019.

AFRS 2365 (c, IP) The Rise of Swahili Civilization

Non-Standard Rotation. Enrollment limit: 35.

Considers the millennium-old interactions between peoples of Africa, the Middle East, and South Asia that created Swahili civilizations stretching from Mogadishu to Madagascar. Themes include the rise of dhow-based maritime trade; the spread of Islam; the slave trade and slavery; Omani, Portuguese, British, Italian, and German colonialisms; late colonial conflicts including the Mau Mau rebellion in Kenya and the revolution in Zanzibari. Ends with the rise of the post-colonial states of Tanzania, Kenya, Mozambique, Madagascar, and Somalia, and rebel insurgencies such as Somali pirates and Islamic fundamentalism. Note: This course is part of the following field(s) of study: Africa. This course meets the non-European/ US and pre-modern requirements for the History Major. (Same as: HIST 2365)

Previous terms offered: Fall 2019.

AFRS 2366 (c, IP) Apartheid's Voices: South African History, 1948 to 1994

Non-Standard Rotation. Enrollment limit: 35.

The study of apartheid in South Africa, the system of racial and ethnic segregation that began in 1948 and ended with the election of Nelson Mandela in 1994. Explores the many different facets of apartheid: how and why it emerged; its social and economic aspects; how people lived under, resisted, and collaborated with apartheid, and its similarities and differences to other forms of racial and identity-based governance, including European colonialism in Africa, US segregation, and Zionism in Israel / Palestine. The readings, lectures, and class discussions focus on the voices of diverse South Africans, activists, youth, workers, artists, soldiers, and students, exploring their different gendered, ethnic, and racial perspectives. NOTE: This course is part of the following field(s) of study: Africa; and Atlantic Worlds. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 2366)

Previous terms offered: Fall 2020.

AFRS 2382 (b, IP) Religions of the African Atlantic

Non-Standard Rotation. Enrollment limit: 16.

Introduces the religious beliefs and practices of African peoples and their descendants in the Americas. Topics will include historical spiritual links between Africa and the African diaspora, spirits and divinities from an Afro-Atlantic perspective, and religious contact and mixture in Africa and the Americas. The contributions of Afro-Atlantic peoples to global Christianity, Islam, and other world religions will be explored. After a brief historical and cultural grounding, the course pursues these issues thematically, considering various Afro-Atlantic religious technologies in turn, from divination and spirit possession to computers and mass media. (Same as: ANTH 2470, REL 2470)

Prerequisites: ANTH 1101 or SOC 1101 or AFRS 1101 or REL 1101.

Previous terms offered: Spring 2019.

AFRS 2384 (c, IP) Deities in Motion: Afro-Diasporic Religions

Every Other Fall. Enrollment limit: 16.

Religion has been central not only in the lives of members of the Black Atlantic World and also in terms of the formation of this world. This class provides a survey of some of the most prominent Afro-Atlantic diasporic religions such as Haitian Vodou, Brazilian Candomblé, Trinidadian Shango, and Cuban Santería/Regla de Ocha and also explores the particular dynamics of the Religion has been central not only in the lives of members of the Black Atlantic World but also in terms of the formation of this world. This class provides a survey of some of the most prominent Afro-Atlantic diasporic religions, such as Haitian Vodou, Brazilian Candomblé, Trinidadian Shango, and Cuban Santería/Regla de Ocha, and also explores the particular dynamics of the African religious diaspora. Complicating common assumptions about relations between diaspora and homeland as well as what constitutes a religion, it addresses issues of authenticity and authority, ancestrality, race, gender, transnationalism, and even problematic (mis)representations in Western society and pop culture. We will also pay close attention to the important and complicated role that the transatlantic slave trade played in the formation of these Atlantic societies and aspects of these religious traditions, such as conceptions of God and divinities, syncretism, divination, and spirit possession. (Same as: LACL 2384, REL 2484)

Previous terms offered: Spring 2021, Fall 2019.

AFRS 2387 (c, DPI, IP) Religion, Healing, and Literature in Africa and the African Diaspora

Donato Fhunsu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Conducted in English and with all the readings and discussions in English, this course is nonetheless a comparative and multilingual study (English, Spanish, French, Lingala, and Kikongo) of African, African American, Afro-Caribbean, and Afro-Latin American literatures and their intersections with religion. Building on the Gambian historian of religions Lamin Sanneh's work (Translating the Message: The Missionary Impact on Culture) showing that Christianity is a "translated" religion, the course explores, through the theory of critical translation and the radical imagination of Africana indigeneity, how African, African American, Afro-Caribbean, and Afro-Latin American writers (Mudimbe, Oyono, Ndongo-Bidyogo, Vera, Adichie, Condé, Laferrière, Montero, Zapata Olivella, and Walker) use the polyglossial space of the novel to "conjure" up individual, social, and ecological healing, and thus push the boundaries of the conventional understanding of "religion" and of "Christianity." (Same as: FRS 2387, LACL 2387)

Previous terms offered: Spring 2022.

AFRS 2388 (c, DPI, IP) Black Magic: Esoteric Arts of Africa and Its Diaspora

Deji Ogunnaike.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

African and Afro-diasporic religions have historically been linked with stereotypes of evil superstition or “black magic”, causing a great deal of prejudice and misinformation. These traditions, however, have their own much more complex, fascinating, and powerful traditions of esoteric arts that differ greatly from Western conceptions of “witchcraft.” In this course students will learn about African concepts often translated as “magic,” “witchcraft,” “sorcery,” or “juju,” why they are frequently misunderstood by outsiders, and how they have important implications for issues like gender, politics, resistance to oppression, and ethics. By speaking to real practitioners of these arts and reading accounts of people engaged in them, the course will demonstrate how African-derived esoteric arts have gained salience in the modern era and engage with issues including the emergence of “Blitchcraft” (Black witchcraft) online and African “witchcraft” as an analytical lens for the modern world.

AFRS 2406 (c) The African Diaspora in France and the Crisis of Citizenship

Non-Standard Rotation. Enrollment limit: 16.

One of the consequences of the French imperial experience has been the profound transformation not only of colonized regions, but also of French society and culture. This seminar will scrutinize the relationship between France and its former colonies in Africa, with a special emphasis on the current debates about national identity, difference, and assimilation in France. Through an exploration of novels, films, and popular cultures, our descent into the debate about national identity in France will trace and understand the presumed differences between French “natives,” “immigrants,” and “citizens.” Novels and films will include works by Medhi Charef, thomte Ryam, Faïza Guène, Tahar ben Jelloun, Rachid Bouchareb, Mathieu Kassovitz, and Yamina Benguigui. (Same as: FRS 3221)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Spring 2019.

AFRS 2407 (c, DPI, IP) Francophone Cultures

Meryem Belkaid.

Every Spring. Spring 2023. Enrollment limit: 18.

An introduction to the cultures of various French-speaking regions outside of France. Examines the history, politics, customs, cinema, and the arts of the Francophone world, principally Africa and the Caribbean. Increases cultural understanding prior to study abroad in French-speaking regions. (Same as: FRS 2407, LACL 2407)

Prerequisites: FRS 2305 or higher or Placement in FRS 2400 level or Placement in FRS 2305/2400 level.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

AFRS 2409 (c, DPI, IP) Spoken Word and Written Text

Katherine Dauge-Roth; Charlotte Daniels.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

Examines oral and written traditions of areas where French is spoken in Africa, the Caribbean, Europe, and North America from the Middle Ages to 1848. Through interdisciplinary units, students examine key moments in the history of the francophone world, drawing on folktales, epics, poetry, plays, short stories, essays, and novels. Explores questions of identity, race, colonization, and language in historical and ideological context. Taught in French. (Same as: FRS 2409, LACL 2209)

Prerequisites: FRS 2305 or higher or Placement in FRS 2400 level or Placement in FRS 2305/2400 level.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

AFRS 2412 (c, DPI, IP) Literature, Power, and Resistance

Meryem Belkaid.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

Examines questions of power and resistance as addressed in the literary production of the French-speaking world from the nineteenth through the twenty-first centuries. Examines how language and literature serve as tools for both oppression and liberation during periods of turmoil: political and social revolutions, colonization and decolonization, the first and second world wars. Authors may include Hugo, Sand, Sartre, Fanon, Senghor, Yacine, Beauvoir, Condé, Césaire, Djébar, Camus, Modiano, Perec, and Piketty. Students gain familiarity with a range of genres and artistic movements and explore the myriad ways that literature and language reinforce boundaries and register dissent. Taught in French. (Same as: FRS 2410, LACL 2210)

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

AFRS 2506 (c) American Literature II: 1865 - 1920

Every Other Spring. Enrollment limit: 35.

Continues the themes and issues introduced in American Literature I into the latter part of the nineteenth and early twentieth centuries. In particular, examines the aftermath of the Civil War and slavery, both its material devastation as well as the technological and literary innovation it generated that helped the country prosper for the next five decades. Examines the development of various literary movements including, realism, naturalism, and African American literature through readings of works by William Dean Howells, Henry James, Edith Wharton, W.E.B. DuBois, Charles Chesnutt, Paul Laurence Dunbar, Booker T. Washington, Stephen Crane, Sarah Orne Jewett, Mark Twain, Ida B. Wells, Frank Norris, Pauline Hopkins, and F. Scott Fitzgerald. (Same as: ENGL 2506)

Previous terms offered: Spring 2022, Spring 2021, Spring 2019.

AFRS 2530 (b, IP) Politics and Societies in Africa

Non-Standard Rotation. Enrollment limit: 35.

Surveys societies and politics in sub-Saharan Africa, seeking to understand the sources of current conditions and the prospects for political stability and economic growth. Looks briefly at pre-colonial society and colonial influence on state-construction in Africa, and concentrates on three broad phases in Africa's contemporary political development: (1) independence and consolidation of authoritarian rule; (2) economic decline and challenges to authoritarianism; (3) democratization and civil conflict. Presumes no prior knowledge of the region. (Same as: GOV 2530)

Previous terms offered: Fall 2021, Fall 2019.

AFRS 2582 (c) Reading "Uncle Tom's Cabin"

Non-Standard Rotation. Enrollment limit: 16.

Introduces students to the controversial history of reader responses to Harriet Beecher Stowe's 1852 antislavery novel, *Uncle Tom's Cabin*. Students engage with various theoretical approaches—reader response theory, feminist, African Americanist, and historicist—to the novel, then turn to the novel itself and produce their own literary interpretation. In order to do so, students examine the conditions of the novel's original production. By visiting various historic locations, the Stowe House on Federal Street, the First Parish on Maine Street, Special Collections of the Hawthorne-Longfellow Library, students compare the novel's original historical context to the history that the novel produced. Aside from reading Stowe's antislavery fiction, students also read works produced with and against *Uncle Tom's Cabin*. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2582)

Previous terms offered: Spring 2022, Spring 2020, Fall 2018.

AFRS 2596 (b, IP) Buried Treasure, Hidden Curse? The Politics of Natural Resource Extraction in Africa

Non-Standard Rotation. Enrollment limit: 16.

: Oil, diamonds, gold. . . riches in the midst of poverty. How can Africa boast so many natural resources and yet remain the poorest continent on earth? What is the "resource curse?" Begins by putting Africa in the context of global resource extraction, oil in particular. Establishes Africa's long pre-colonial experience with trade in iron, gold, salt, and slaves. The colonial period deepened the reliance of many territories on specific resources, a pattern that continues to the present. Uses Burkina Faso as a specific example of gold extraction, contrasting industrial and artisanal mining. Modern streams of prospectors throughout West Africa echo the California gold rush, but with important distinctions.. A research-based writing seminar in political science, the course will highlight the interplay between national and foreign governments, international and domestic firms, and local and migrant prospectors as they vie for access to valuable resources. Students will gain skills in library research, writing and revision, peer review and oral presentations. (IRBW) (Same as: GOV 2596)

Previous terms offered: Fall 2021.

AFRS 2603 (c) African American Fiction: Humor and Resistance

Non-Standard Rotation. Enrollment limit: 35.

Explores rich traditions of African American humor in fiction, comics, graphic narratives, and film. Considers strategies of cultural survival and liberation, as well as folkloric sources, trickster storytellers, comic double-voicing, and the lampooning of racial ideologies. Close attention paid to modes of burlesque, satirical deformation, caricature, tragicomedy, and parody in historical and contemporary contexts, including such writers and performers as Charles Chesnutt, Bert Williams, Langston Hughes, Zora Neale Hurston, Richard Pryor, Ishmael Reed, Aaron McGruder, Dave Chappelle, and Suzan-Lori Parks. (Same as: ENGL 2603)

Previous terms offered: Fall 2020.

AFRS 2604 (c, VPA) African American Literature and Visual Culture

Non-Standard Rotation. Enrollment limit: 35.

Explores creative collaborations and cross currents in African American literary and visual arts over the past century. Considers the problems of minstrelsy, masking, and caricature – as well as instruments of militant image-making in both literary and visual forms. Topics of special interest include uplift and documentary photography; modernist resistance languages of the Harlem Renaissance; shadows, silhouettes, and invisibility; comic strips and graphic narratives; and contemporary images – prints, texts, and illustrations – that introduce alternative socio-political allegories. The course will engage with works held in the Bowdoin College Museum of Art and in Special Collections and Archives. (Same as: ENGL 2604)

Previous terms offered: Spring 2021.

AFRS 2605 (c) The Harlem Renaissance

Non-Standard Rotation. Enrollment limit: 35.

Focuses on the African American literary and cultural call-to-arms of the 1920s. Modernist resistance languages; alliances and betrayals on the left; gender, sexuality, and cultural images; activism and literary journalism; and music and visual culture are of special interest. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2605)

Previous terms offered: Spring 2022.

AFRS 2620 (c) Separate and Unequal: Education, Race, and Democracy in the United States

Non-Standard Rotation. Enrollment limit: 35.

Examines the often-fraught connection between American educational ideals and the particularly American history of race and racism. Students will analyze this changing, contested, and pivotal connection through historical and philosophical perspectives. The course focuses on pivotal moments in the history of American education such as the development and expansion of public schools in the nineteenth century, the progressive education era, and the desegregation of American public education. In each of these moments, students will explore the actions of people—black, white, thinkers, theorists, activists, litigators, students, parents, educators, and citizens—who struggled to shape American education, as well as the ways in which the ideals driving such moments were both shaped by and silent to ongoing struggles surrounding race and racism. The course will conclude by asking students to examine how race and racism continue to shape American education today. (Same as: EDUC 2310)

Prerequisites: EDUC 1101 or AFRS 1101.

Previous terms offered: Spring 2019.

AFRS 2621 (b) Reconstruction

Patrick Rael.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Close examination of the decade following the Civil War. Explores the events and scholarship of the Union attempt to create a biracial democracy in the South following the war, and the sources of its failure. Topics include wartime Reconstruction, the Ku Klux Klan, Republican politics, and Democratic Redemption. Special attention paid to the deeply conflicted ways historians have approached this period over the years. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2621)

Prerequisites: HIST 1000 - 2969 or HIST 3000 or higher.

Previous terms offered: Spring 2021, Spring 2019.

AFRS 2626 (c) African Americans in New York City Since 1627

Brian Purnell.

Every Other Spring. Spring 2023. Enrollment limit: 16.

Intermediate seminar. Covers the history of people of African descent in what becomes New York City from the Dutch colonial period through the present. Students read key books on all major historical themes and periods, such as the early history of slavery and the slave trade; black life and religion during the early republic and gradual emancipation; the Civil War and draft riots; black communal life during the late nineteenth and early twentieth centuries; the Harlem Renaissance; the Great Depression; the civil rights era; the age of urban crisis; the 1980s and the rise of hip-hop; and blacklife since 9-11. Students gain wide exposure to working with primary sources. (Same as: URBS 2626)

AFRS 2630 (c) Staging Blackness

Non-Standard Rotation. Enrollment limit: 35.

Examines the history and contributions of African Americans to United States theater from the early blackface minstrel tradition, to the revolutionary theater of the Black Arts writers, to more recent postmodernist stage spectacles. Among other concerns, such works often dramatize the efforts of African Americans to negotiate ongoing tensions between individual needs and group demands that result from historically changing forms of racial marginalization. A particular goal is to highlight what Kimberly Benston has termed the expressive agency with which black writers and performers have imbued their theatrical presentations. Potential authors include Zora Neale Hurston, Langston Hughes, Lorraine Hansberry, Amiri Baraka, Ron Milner, Adrienne Kennedy, Ntozake Shange, George C. Wolfe, Anna Deavere Smith, Afro Pomo Homos, and August Wilson. (Same as: ENGL 2654, THTR 2854)

Previous terms offered: Fall 2018.

AFRS 2650 (c) African American Fiction: (Re) Writing Black Masculinities

Non-Standard Rotation. Enrollment limit: 35.

In 1845, Frederick Douglass told his white readers: "You have seen how a man was made a slave; you shall see how a slave was made a man." This simple statement effectively describes the enduring paradox of African American male identity: although black and white males share a genital sameness, until the nation elected its first African American president the former has inhabited a culturally subjugated gender identity in a society premised on both white supremacy and patriarchy. But Douglass's statement also suggests that black maleness is a discursive construction, i.e. that it changes over time. If this is so, how does it change? What are the modes of its production and how have black men over time operated as agents in reshaping their own masculinities? Reading a range of literary and cultural texts, both past and present, students examine the myriad ramifications of, and creative responses to, this ongoing challenge. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2650, GSWS 2260)

Previous terms offered: Fall 2021.

AFRS 2651 (c, DPI) Queer Race

Guy Mark Foster.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

How does the concept of queerness signify in cultural texts that are ostensibly about the struggle for racial equality? And vice versa, how does the concept of racialization signify in cultural texts that are ostensibly about the struggle for LGBT recognition and justice? While some of this work tends to reduce queer to traditional sexual minorities like lesbian and trans folk while downplaying racial considerations, others tend to limit the category race to people of color like blacks while downplaying questions about sexuality. Such critical and creative gestures often place queer and race in opposition rather than as intersecting phenomena. Students examine the theoretical and cultural assumptions of such gestures, and their implications, through close readings of selected works in both the LGBT and African American literary traditions. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2651, GSWS 2651)

AFRS 2652 (c) African American Writers and Autobiography

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. The struggle against anti-black racism has often required that individual African Americans serve as representative figures of the race. How have twentieth- and twenty-first-century black authors tackled the challenge of having to speak for the collective while also writing narratives that explore the singularity of an individual life? What textual approaches have these authors employed to negotiate this tension between what theorists of the genre broadly call referentiality and subjectivity? Authors include W. E. B. Du Bois, Zora Neale Hurston, Malcolm X, Jamaica Kincaid, Maya Angelou, Samuel Delaney, Barack Obama, among others. Note: Fulfills the literature of the Americas requirement for English majors. (Same as: ENGL 2013)

Previous terms offered: Spring 2020.

AFRS 2653 (c) Interracial Narratives

Non-Standard Rotation. Enrollment limit: 35.

Violence and interracial sex have long been conjoined in U.S. literary, televisual, and filmic work. The enduring nature of this conjoining suggests there is some symbolic logic at work in these narratives, such that black/white intimacy functions as a figural stand-in for negative (and sometimes positive) commentary on black/white social conflict. When this happens, what becomes of "sex" as a historically changing phenomenon when it is yoked to the historically unchanging phenomenon of the "interracial"? Although counter-narratives have recently emerged to compete with such symbolic portrayals, i.e. romance novels, popular films and television shows, not all of these works have displaced this earlier figural logic; in some cases, this logic has merely been updated. Explores the broader cultural implications of both types of narratives. Possible authors/texts: Richard Wright, Chester Himes, Ann Petry, Lillian Smith, Jack Kerouac, Frantz Fanon, Kara Walker, Amiri Baraka, Alice Walker, Octavia Butler, John R. Gordon, Kim McLarin, *Monster's Ball*, *Far From Heaven*, and *Sex and the City*. (Same as: ENGL 2653, GSWS 2283)

Previous terms offered: Fall 2019.

AFRS 2654 (c, DPI) White Negroes

Guy Mark Foster.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate seminar. Close readings of literary and filmic texts that interrogate widespread beliefs in the fixity of racial categories and the broad assumptions these beliefs often engender. Investigates whiteness and blackness as unstable and fractured ideological constructs that become most visible in narratives of racial passing. These are constructs that, while socially and historically produced, are no less real in their tangible effects, whether internal or external. May include works by Nella Larsen, Norman Mailer, John Howard Griffin, Mat Johnson, Toi Derricotte, and Mohsin Hamid. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2004, GSWS 2257)

AFRS 2660 (c, VPA) Introduction to Art History: African Americans and Art

Non-Standard Rotation. Enrollment limit: 50.

Investigates the intersection of African American life and art. Topics include the changing definitions of "African American Art," the embrace of African cultural production, race and representation in slavery and freedom, art as source of inspiration for social movements, and the politics of exhibition. Our mission is to develop art-historical knowledge about this critical aspect of American art history, while facilitating ways of seeing and writing about art. (Same as: ARTH 1500)

Previous terms offered: Fall 2021, Spring 2021, Fall 2019.

AFRS 2700 (c) Martin, Malcolm, and America

Every Other Year. Enrollment limit: 16.

Seminar. Examines the lives and thoughts of Martin L. King Jr. and Malcolm X. Traces the development in their thinking and examines the similarities and differences between them. Evaluates their contribution to the African American freedom struggle, American society, and the world. Emphasizes very close reading of primary and secondary material, use of audio and videocassettes, lecture presentations, and class discussions. In addition to being an academic study of these two men's political and religious commitment, also concerns how they inform our own political and social lives. Note: This course is part of the following field(s) of study: United States. (IRBW) (Same as: HIST 2700)

Previous terms offered: Spring 2019.

AFRS 2721 (c, DPI, VPA) Between the Alamo and the Wall: Latinx Activism in the United States

Non-Standard Rotation. Enrollment limit: 35.

This course explores the range of issues inspiring Latinx activism and its diverse expressions across the United States from the turn of the 20th century to the present. It introduces students to the intellectual traditions and analytical approaches that inform both Latinx and Afro-Latinx activism in the US. During the course of the semester students will 'travel' to U.S. cities (and regions) such as San Antonio and the Texas Borderlands, Los Angeles, Miami, New York, Chicago, and the Central Valley in California. As we 'travel' to these locations, we will explore diverse expressions of Latinx activism, including labor activism, cultural activism, political activism surrounding citizenship rights, and the struggles for gender and sexuality rights. Students will also learn about the many similarities and differences among Latinx communities in the United States, including Afo-Latinx communities, specifically Afro-Cuban in Miami, and Afro-Puerto Ricans and Afro-Dominicans in New York. We will explore how these communities have used and continue to use activist practices ranging from labor strikes to literary texts, to gain visibility and negotiate their rights within the country. This course will also draw connections between Latinx and Afro-Latinx and other activist movements in the US, from civil rights to labor rights and the formation of worker's unions. Drawing from various disciplines including history, law, literature, sociology, and cultural studies, students will explore how Latinx activism has shaped understandings of race and inclusion, gender, sexuality, and citizenship in the United States. (Same as: LACL 2421, GSWS 2720)

Previous terms offered: Spring 2022.

AFRS 2753 (b, IP) Science, Technology, and Medicine in Africa
Non-Standard Rotation. Enrollment limit: 35.

Introduction to the historical and ethnographic study of the politics of science, technology, and medicine in African contexts. Offers opportunities to learn about African experiences of science, technology, and medicine. Reconsiders common definitions of science and technology from the perspective of African cultures of expertise. Topics considered include the spiritual and religious dimensions of expert knowledge, environmental management, conservation, archaeology, hunting, metallurgy, healing, genetically modified organisms, pharmaceutical development, epidemiology, and information technology. Science and technology will be considered in relation to precolonial social formations, colonialism, independence struggles, and the postcolonial state. Course materials include historical and ethnographic writing as well as speculative fiction. (Same as: ANTH 2235)

Prerequisites: ANTH 1101 or AFRS 1101.

Previous terms offered: Spring 2020.

AFRS 2820 (c, IP) Toward the Arab Spring in North Africa: Colonialism, Nation-Building and Popular Uprisings
Non-Standard Rotation. Enrollment limit: 35.

The 2011 uprisings that began in Tunisia sparked a wave of revolutions in the Arab region. Protesters demanded dignity, social justice, and the fall of authoritarian regimes. The Arab Spring was the latest instance in a long tradition of popular contestation in Algeria, Morocco, Tunisia, and Libya. This course will explore the historical relationship between rulers and ruled populations and their contentious history from colonialism to the present by focusing on conflicts of a political, social, economic, and cultural nature. The course explores how popular protests evolved along the way and the different roles they have applied during these countries' transformations in the past century. Examples will include anti-colonial protests, anti-imperial solidarity movements, trade unions and workers marches, armed regional insurrections, student mobilization on university campuses, cultural dissidence, Berber contestation, anti-austerity riots, Islamist politics, and civil society activism. . Note: This course is part of the following field(s) of study: Africa. It fulfills the non Euro/US requirement for History majors and minors. (Same as: HIST 2295)

Previous terms offered: Spring 2019.

AFRS 2821 (c, IP) After Mandela: History, Memory, and Identity in Contemporary South Africa
Non-Standard Rotation. Enrollment limit: 16.

How do South Africans remember their past? Begins with the difficulties in developing a conciliatory version of the past during Nelson Mandela's presidency immediately after apartheid. Then explores the changing historiography and popular memory of diverse historical episodes, including European settlement, the Khoisan "Hottentot Venus" Sara Baartman, Shaka Zulu, the Great Trek, the Anglo-Boer War, the onset of apartheid, and resistance to it. Aims to understand the present-day social, economic, and cultural forces that shape the memories of South Africans and the academic historiography of South Africa. Note: This course is part of the following field(s) of study: Africa. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 2821)

Previous terms offered: Spring 2019.

AFRS 2822 (c, IP) Youth and Revolution in Africa: Changemakers and Child Soldiers

Non-Standard Rotation. Enrollment limit: 16.

Seminar. The African continent has an unmatched percentage of young people in relation to total population. Over the last sixty years, these youth have driven a continent-wide revolution against an intersection of traditional, gerontocratic, and neo-colonial structures. By studying student activism in apartheid and post-apartheid South Africa, youth movements against colonialism and neocolonialism in central Africa, the "blood diamond" wars of Liberia and Sierra Leone, the child soldiers of the Democratic Republic of Congo, and youth protests against policy brutality in West Africa, this course nuances oft-ascribed youth roles as changemakers and as child soldiers. It considers the gendered and political identities that have emerged through this continental societal revolution. Note: This course is part of the following field(s) of study: Africa. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 2822)

Previous terms offered: Spring 2021, Fall 2018.

AFRS 2823 (c, IP) Sacred Icons and Museum Pieces: The Powers of Central African Art
Non-Standard Rotation. Enrollment limit: 16.

Seminar. The art of Central Africa inspired European avant-garde artists from Pablo Picasso to Paul Klee. This course explores art as a historical source. What does the production, use, commerce, and display of art reveal about politics, ideology, religion, and aesthetics? Prior to European colonialism, what was the relationship between art and politics in Central Africa? How did art represent power? What does it reveal about gender relations, social divisions, and cultural ideals? The course then turns to the Euro-American scramble for Central African art at the onset of European colonialism. How did the collection of art, its celebration by European artists, and display in European and American museums transform patterns of production, cultural functions and aesthetic styles of Central African art? The course ends with current debates over the repatriation of African art. Note: This course is part of the following field(s) of study: Africa. This course meets the non-European/ US History requirements. (Same as: HIST 2823, ARTH 2390)

Previous terms offered: Fall 2019.

AFRS 2825 (c, IP) The Black Pacific: Historical and Contemporary Afro-Asian Diasporas
Non-Standard Rotation. Enrollment limit: 16.

Paul Gilroy's "The Black Atlantic: Modernity and Double Consciousness" (1995) explores the global black experience and black identity formations through a transatlantic frame. Gilroy's thesis argues that contemporary black identity constructions are a result of ongoing processes of travel and exchange between Africa, Europe, and the 'New World' during earlier periods of capital accumulation (transatlantic slavery and colonialism). Disrupts Gilroy's thesis, repositioning the focus, temporally and spatially, eastward. Examines often underexplored routes of passage and exchange between the African continent and the peoples of Japan, China, India, the Pacific Islands, and the Middle East. In doing so, considers Afro-Pacific encounters, exploring the circumstances for retaining and reclaiming Africana identity within these newly created communities.

Previous terms offered: Fall 2018.

AFRS 2826 (IP) The New Scramble for Africa: Capital Accumulation in the Global

Non-Standard Rotation. Enrollment limit: 35.

More than a century after European powers initially carved up the African continent during the Berlin Conference (1884–1885), Africa is again attracting the renewed attention of foreign powers interested in its extractive resources, land, markets, and positioning. The contemporary landscape differs from the “Scramble for Africa,” as it marks a shift from a solidly Western-led initiative to one in which new actors from the global south are taking on more pivotal roles. Superpowers (the United States, China, and Russia), colonial powers (UK, France, and Belgium), and less powerful states (Japan, India, and Brazil) are in competition with emerging African nations (Nigeria and South Africa) for wealth and influence on the continent. The course dedicates considerable time to exploring contemporary interactions between African states and their most significant external partner—China—considering questions of neocolonialism and neoimperialism, and asks students to conclude whether a new scramble for Africa is underway. (Same as: ASNS 2855)

Previous terms offered: Spring 2019.

AFRS 2862 (c, IP) The Haitian Revolution

Every Other Fall. Enrollment limit: 16.

Seminar. Examines one of the most significant and yet neglected revolutions in history. Between the years 1791-1804, Haitian revolutionaries abolished slavery and ultimately established a free and independent nation. Explores the Revolution's causes and trajectory and connects Haiti to the broader Atlantic world. Likewise, studies the revolution's aftermath and its impact on world history. This course is part of the following field(s) of study: Latin America, Atlantic Worlds, and Colonial Worlds. It fulfills the premodern and the non-Euro/US requirements for history majors and minors. (Same as: HIST 2862, LACL 2162)

Prerequisites: HIST 1000 - 2969 or LAS 1000 - 2969.

Previous terms offered: Fall 2021.

AFRS 2870 (c, IP) The Rise and Fall of New World Slavery

Non-Standard Rotation. Enrollment limit: 16.

Seminar. The form of slavery pioneered by Europeans who brought Africans to the New World occupies a unique place in the institution's long story. Examines the rise and demise of New World slavery: its founding, central practices, and long-term consequences. Just as New World slavery deserves to be considered a unique historical practice, so too do the impulses and transformations that led to its ending. Explores slavery as it rose and fell throughout the Atlantic basin, focusing particularly on Brazil, the Caribbean, and mainland North America. Investigates a range of issues: the emergence of market economies, definitions of race attendant to European commercial expansion, the cultures of Africans in the diaspora, slave control and resistance, free black people and the social structure of New World slave societies, and emancipation and its aftermath. Note: This course is part of the following field(s) of study: US, Europe, Atlantic Worlds and Colonial Worlds. (Same as: HIST 2870)

Previous terms offered: Spring 2020.

AFRS 3005 (b) Race, Crime, and the Law in the United States

Every Other Fall. Enrollment limit: 16.

Advanced seminar on the criminal justice system in America and the ways African Americans specifically, and racial minorities in general, experience protection and prosecution in it. Students read Harvard Law Professor Randall Kennedy's provocative text of the same title and explore and debate such topics as racial criteria in jury selection, racial disparities and capital punishment, and the rise of mass incarceration in America. Students study key Supreme Court decisions that have considered questions of race and criminal justice. Students conduct research on a specific academic question or policy issue of their choosing and present their findings.

Previous terms offered: Spring 2021.

AFRS 3010 (c) Reconstruction and Realism

Non-Standard Rotation. Enrollment limit: 16.

Advanced Seminar. Explores the rise of American literary realism that occurred following the Civil War and its relationship to the social and political events of the South's Reconstruction. Studies works by the major figures of the movement such as Charles Chesnutt, Paul Laurence Dunbar, William Dean Howells, Henry James, Sarah Orne Jewett, Mark Twain, and Edith Wharton. Students are required to develop original readings of these literary texts that engage the political and social contexts in which they were produced. All students present their research in written and oral form. Fulfills the advanced seminar requirement for African studies and English majors. (Same as: ENGL 3800)

Prerequisites: AFRS 2000 - 2969 or ENGL 2000 - 2969.

Previous terms offered: Spring 2021.

AFRS 3011 (c) African American Film

Elizabeth Muther.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Advanced Seminar. Explores a spectrum of films produced since 1950 that engage African American cultural experience. Topics may include black-white buddy movies, the L.A. Rebellion, blaxploitation, the hood genre, cult classics, comedy and cross-dressing, and romance dramas. Of special interest will be the documentary impulse in contemporary African American film; gender, sexuality, and cultural images; the politics of interpretation—writers, filmmakers, critics, and audiences; and the urban context and the economics of alienation. Extensive readings in film and cultural theory and criticism. Note: Fulfills the film theory requirement for Cinema Studies minors. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 3011, CINE 3011)

Prerequisites: ENGL 1000 or higher or AFRS 1000 or higher or FILM 1000 or higher or CINE 1000 or higher.

Previous terms offered: Spring 2020.

AFRS 3015 (c) James Baldwin

Non-Standard Rotation. Enrollment limit: 15.

Examines the major postwar writings of the controversial African American author and the role his fiction and nonfiction played in challenging that era's static understandings of racial, gender, and sexual politics. Although Baldwin lived abroad for much of his life, many critics associate the author narrowly with the United States black civil rights and sexual liberation struggles. In recent years, however, Baldwin has increasingly been recognized as a transnational figure and for his invaluable contributions to the discourse of globalization. Indeed, Baldwin's "geographical imagination," one informed by critical racial literacy, led him to anticipate many of the central insights of contemporary Queer Studies, Whiteness Studies, as well as Africana philosophical thought. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 3015, GSWS 3015)

Prerequisites: ENGL 2000 - 2969 or AFRS 2000 - 2969 or GLS 2000 - 2969 or GSWS 2000 - 2969.

Previous terms offered: Spring 2022.

AFRS 3020 (c) Black Heat, Black Cool: Theorizing Blackness

Every Spring. Enrollment limit: 16.

Interdisciplinary examination of ideas and expressions of blackness by black people in the United States from the nineteenth century to the present. Shifts focus from "what" is blackness to "where" and "when" is blackness. Students analyze the fluidity of blackness and the implications for the production of ideologies, discourses, and identities of black people. Materials for analysis may include primary and secondary written texts, film, video, and audio by James Baldwin, Beyoncé, Julie Dash, Martin Luther King Jr., Saidiya Hartman, Nina Simone Hortense Spillers, and Ida B. Wells.

Previous terms offered: Spring 2020, Spring 2019.

AFRS 3030 (c, DPI) Black Archival Praxis: Documenting and Preserving Black Life

Judith Casselberry; Brian Purnell.

Every Other Spring. Spring 2023. Enrollment limit: 15.

As the field of Africana Studies, and particularly slavery studies, has expanded, scholars raise a plethora of new questions and concerns regarding theories and methods in documentation of Black life and Black archival creation, preservation, and promotion. This advanced seminar explores fundamental questions about the concept of the archive, as well as past and current archival practices. Students will analyze conventional and unconventional scholarly and artistic repositories of Black life. Concepts of witnessing, testimony, (collective) memory, "living" archive, ethics, collection, ownership, and access will be explored. Materials for analysis may include music, film, literature, existing institutional archives, and ongoing digital recovery projects. Scholarly writings may include Michel-Rolph Trouillot, Zora Neal Hurston, James Scott, Jessica Marie Johnson, Saidiya Hartman, and Jaques Derrida.

AFRS 3033 (c) Contemporary Narratives of Slavery

Non-Standard Rotation. Enrollment limit: 16.

Examines recent literary and filmic narratives of slavery. Some scholars claim these texts heal readers of psychic pain while also facilitating a deep connection to long departed ancestors. For others, these works only nurture the "ledger of racist slights" that diasporic blacks continue to catalogue to the present day, all the while distracting each of us from cultivating a more hopeful stance with respect to our collective present. This course maps a critical space beyond the binary of either "therapeutic" or "prohibitive" claims to engage questions of racialized experience, feeling, identification, and desire. Authors and texts may include: Birth of a Nation, Octavia Butler, John R. Gordon, Yaa Gyasi, Toni Morrison, and Colson Whitehead. (Same as: ENGL 3033)

Prerequisites: ENGL 1000 - 1049 or ENGL 1100 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Spring 2019.

AFRS 3142 (c, DPI) Jim Crow Justice

Non-Standard Rotation. Enrollment limit: 16.

What are the historical origins of our modern system of mass incarceration? This research seminar explores the relationship between race and justice from the end of the Civil War through the early twentieth century. We will begin by framing our concerns in light of recent scholarship on the phenomenon (such as Michelle Alexander's *The New Jim Crow*), and then dig into the archives ourselves to craft 25-30 page research papers on aspects of the problem. Our sources will include Congressional documents, the Department of Justice Peonage Files, records of the NAACP, and other major collections. Students will benefit from prior coursework in African American history or Africana Studies. Note: This course is part of the following field(s) of study: US. (Same as: HIST 3142)

Prerequisites: HIST 1000 - 2969 or AFRS 1000 - 2969 or HIST 3000 or higher or AFRS 3000 or higher.

Previous terms offered: Spring 2022.

AFRS 3151 (c, DPI) Advanced Concepts in Music and Culture: African American Music

Tracy McMullen.

Every Other Year. Spring 2023. Enrollment limit: 15.

Examines music as a cultural "actor" within the context of American history. Central concerns may include representations of racialized identity via music; interpretation and reception of musical genres; "freedom" and constraint in musical performance; and issues of appropriation, musical borrowing, essentialism, and tradition. Authors may include Ralph Ellison, Amiri Baraka, Eileen Southern, and Sylvia Wynter. Artists and genres may include Kendrick Lamar, Nina Simone, John Coltrane, gospel, jazz, and hip hop. No music theory knowledge necessary. (Same as: MUS 3151)

Prerequisites: AFRS 1101 or ANTH 1101.

Previous terms offered: Fall 2018.

AFRS 3205 (c, IP) African Popular Music and Cultural Hybridity: Sounds, Discourses, and Critical Issues

Non-Standard Rotation. Enrollment limit: 12.

Examines the politics and poetics of cultural hybridity in the context of select popular music genres in and from Africa, and critically engages with related scholarly, nationalist, and popular discourses. Musical genres covered range from early twentieth-century West African palm wine music to contemporary manifestations of hip hop across the African continent and include musical products of post-independence cultural policies and the transnational marketing niche of "Afropop." The rise and popularity of these genres is historicized and analyzed in the context of major social, ideological, political, and economic forces that have shaped Africa over the past 100 years, including colonialism, modern urbanization, independence movements, and globalization. Course materials include writings from the fields of ethnomusicology, cultural studies, and postcolonial theory, musical audio and video recordings, and journalistic and promotional sources, as well as film documentaries. (Same as: MUS 3205)

Prerequisites: MUS 2000 - 2969 or AFRS 2000 - 2969 or MUS 3000 or higher or AFRS 3000 or higher.

Previous terms offered: Fall 2020.

AFRS 3210 (c, DPI, IP) African Women as Peacemakers

Donato Fhunsu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Advanced seminar on African women's studies and peace studies. Given their various stakes, women in African societies have always been peacemakers. In exploring these stakes, this seminar focuses on the lives and writings of six African women intellectuals (Yvonne Vera, Bessie Head, Mariama Bâ, Wangari Maathai, Ellen Johnson Sirleaf, and Leymah Gbowee), three of whom have won the Nobel Peace Prize. Students will investigate how these women and the stories they tell reconceptualize feminism and peaceful interactions among themselves and others (women, men, and the environment) in order to bring about individual transformation. By perceptively reading challenging texts, engaging in probing class discussions, keeping a weekly written "Peace Journal," and working collaboratively on a final group research with oral presentation, students will gain experiential insight into ideals and realities of the African women to reimagine feminism, peace, and relationships amid violence. (Same as: GSWS 3020)

Previous terms offered: Fall 2021.

AFRS 3211 (c) Bringing the Female Maroon to Memory: Female Marronage and Douboutism in French Caribbean Literature

Non-Standard Rotation. Enrollment limit: 16.

History has retained the names of great male Caribbean heroes and freedom fighters during slavery such as the Haitians, Mackandal or Toussaint Louverture, the Jamaican, Cudjoe or the Cuban Caba. Enslaved Africans who rebelled against oppression and fled from the plantation system are called maroons and their act, marronage. Except for Queen Nanny of the Jamaican Blue Mountains, only male names have been consecrated as maroons. Yet, enslaved women did fight against slavery and practice marronage. Caribbean writers have made a point of bringing to memory forgotten acts of marronage by women during slavery or shortly thereafter. Proposes to examine the fictional treatment French-speaking Caribbean authors grant to African or Afro-descent women who historically rebelled against slavery and colonization. Literary works studied against the backdrop of douboutism, a conceptual framework derived from the common perception about women in the French Caribbean which means strong woman. Authors studied may include Suzanne Dracius (Martinique), Fabienne Kanor (Martinique), André Schwart-Bart (Guadeloupe), Maryse Condé (Guadeloupe), Evelyn Trouillot (Haiti). Conducted in French. (Same as: FRS 3211, GSWS 3211, LACL 3211)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2021.

AFRS 3213 (c) Aesthetics in Africa and Europe

Non-Standard Rotation. Enrollment limit: 18.

Aesthetics – the critical reflection on art, taste, and culture; as much as beauty, the set of properties of an object that arouses pleasure—are central to all aspects of society-building and human life and relationships. Examines the notions of aesthetics and beauty, from pre-Colonial to contemporary times in cultures of the African and Western civilizations as expressed in various humanities and social sciences texts, as well as the arts, iconography, and the media. Considers the ways Africans and afro-descendants in the New World responded to the Western notions of aesthetics and beauty. Authors studied may include Anténor Firmin, Jean Price Mars, Senghor, Damas, Césaire, Cheick Anta Diop, Fanon, Glissant, Chamoiseau, Gyekye Kwame, Socrates, Plato, Jean-Baptiste du Bos, Diderot, Le père André, Baumgarten, Kant, Schopenhauer, Hegel, Hugo. (Same as: FRS 3213, LACL 3213)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2019.

AFRS 3219 (c) French Caribbean Intellectual Thought

Hanétha Vété-Congolo.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

An introduction to the main contemporary intellectual production emanating from the French Caribbean such as Haitian indigénisme and Martinican Négritude, Antillanité, and Créolité. Examines theoretical and literary texts by Jean Price-Mars, Jacques Roumain, Frantz Fanon, René Maran, Aimé Césaire, René Mesnil, Joseph Zobel, Edouard Glissant, or Patrick Chamoiseau. Addresses questions of collective identity, ethnicity, and cultural autonomy. (Same as: FRS 3219, LACL 3259)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2020.

AFRS 3220 (c) African Immigrant Voices in France

Non-Standard Rotation. Enrollment limit: 16.

Examines the ways both writers and sociologists give voice to the immigrant experience. Focuses on novels as well as sociological studies on African immigration in contemporary France. From a sociological survey that reads like a novel to a novel that reads like an ethnography, we will think through how these disciplines converge and diverge. Introduces students to the methodology behind qualitative interviews. Students conduct fieldwork in Lewiston or Portland and produce podcasts based on in-depth interviews. Students will grapple with positionality as well as the ethics and politics of storytelling. Brings attention to local francophone African immigrant communities in Maine. Readings include selections from Alain Mabanckou, Bessora, Stéphane Béaud, and Abdelmalek Sayad among others. (Same as: FRS 3220)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2018.

AFRS 3224 (c, DPI, IP) Deaccessioning Empire: African Art, Museums, and Memory

Madeline Bedecarre.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

Deaccessioning—the process of removing a work of art from a museum—brings up important issues in the art world: rethinking provenance or ownership, appropriation, the permanence of collections, and memory. Through that lens, this course explores the current/long-standing debates over the restitution of African art work and the decolonization of museums. The class focuses on how museums shape discourse around colonialism and influence the reception and circulation of African cultural productions. Students will study the history of ethnographic collecting practices, colonial exhibitions, the creation of a foreign market for African art in France, and the postcolonial politics of contemporary museums such as the Quai Branly. Students will study literature, film, and art that reimagine the curatorial space. Students will visit museums and meet with private collectors, artists, and curators. Students will become more informed and critical readers of museum spaces. Conducted in French. (Same as: FRS 3224)

Prerequisites: Two of: FRS 2409 (same as AFRS 2409 and LACL 2209) and FRS 2410 (same as AFRS 2412 and LACL 2210).

AFRS 3226 (c) A Body “Of One’s Own”: Caribbean and Latinx Women Writers

Non-Standard Rotation. Enrollment limit: 16.

What kind of stories do bodies tell or conceal? How does living in a gendered and racialized body effects the stories told by women? How do bodies and their stories converge with History or complicate historical “truths”? These are some of the questions addressed in this study of contemporary writing by women from the Hispanic Caribbean and the United States Latinx/Chicana communities. Feminists of color frame the analysis of literature, popular culture and film to guide an examination of the relation of bodies and sexuality to social power, and the role of this relation in the shaping of both personal and national identities. Theorists include Alexander, Barribeau, Curiel, Mendez and Segato. Novelists include Álvarez, Buitrago, García, Indiana Hernández, and Santos-Febres. Taught in Spanish with readings in Spanish and English. (Same as: HISP 3226, GSWS 3226, LACL 3226)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2020.

AFRS 3242 (c, VPA) Advanced Afro-Modern: Dancing Towards Social Change

Non-Standard Rotation. Enrollment limit: 16.

This course fuses Afro-Diasporan aesthetics and cultural concepts with critical dance studies and US modern/post-modern/contemporary concert dance traditions. Students will engage with various Afro-based dance practitioners (such as Jawole Willa Jo Zollar), cultural praxes (such as Sankofa), and improvisational structures (such as Jamaican Dancehall and Haitian Yanvalou) to deepen their ability to create, rehearse, and perform original choreography, specifically for the purposes of advocating for social change and cross-cultural understanding. Using virtual, archival, digital, embodied, and scholarly research, students will learn about and generate performance material that is deeply connected to the histories, spaces, and places that we remember, take-up, and occupy. Students will also be expected to execute collaborations with each other and those within their communities as they create and perform movement for their final dance projects. (Same as: DANC 3242, LACL 3342)

Prerequisites: DANC 1213 (same as AFRS 1213) or DANC 2241 (same as AFRS 2236) or DANC 1000 - 2969 or DANC 3000 or higher.

Previous terms offered: Spring 2022, Fall 2020.

AFRS 3260 (c) African American Literature and Law

Non-Standard Rotation. Enrollment limit: 16.

This course is organized around a number of key legal cases dealing with the constitution of an African American identity in the United States. Beginning with the case of the Amistad and concluding with the case of Brown v. Board of Education, students are invited to analyze the impact of these cases on works of literature and film.

Prerequisites: AFRS 1101 or AFRS 2000 - 2969.

Previous terms offered: Spring 2019.

AFRS 3420 (c, IP) Telling Africana Stories: Features and Truths of African and Diasporic Literature

Non-Standard Rotation. Enrollment limit: 16.

Stories and storytelling have remained one of the most central aspects of Africana cultures across continents and centuries, and these stories often differ in both form and content from modern Western literature. In this course, students will examine the reasons why and purposes for which stories are told, what they teach us about ourselves and the world, and how they display and convey important aspects of Africana societies in culturally specific ways. Literature—including epics, folktales, mythology, and novels—from various places and time periods across the African continent and diaspora will be read alongside related secondary literature. The class will also engage with central themes and issues like orality, differing conceptions of truth, experiential learning, identity, spirituality, and modernity and change, as well as alternative perspectives on time and history.

Prerequisites: AFRS 1000 or higher.

Previous terms offered: Spring 2021, Spring 2020.

AFRS 3520 (b, IP) State-Building in Comparative Perspective

Non-Standard Rotation. Enrollment limit: 15.

States form the foundation of modern politics. Comparative government explores their variation; international relations examine their interaction. States can be instruments of oppression or engines of progress, and recent scholarship has focused on their strength, weakness, and failure. This capstone course explores the processes that produced the early modern state in Europe, then looks at more recent attempts to replicate state development in Latin America, Asia, the Middle East, and Africa. The role of war in state formation and the subject of citizenship receive particular attention. (Same as: GOV 3520)

Previous terms offered: Spring 2021, Spring 2020.

AFRS 3570 (b, IP) Advanced Seminar in African Politics

Non-Standard Rotation. Enrollment limit: 16.

The continent of Africa boasts some of the most rapidly growing economies in the world, but the proportion of people living in poverty remains higher than in any other region. Nearly all African states experimented with democratic reform in the last two decades, but many leaders have become adept at using political institutions to entrench their power. Most large-scale civil wars have ended, but violence remains. Explores the economic, political, and security challenges of this continent of contrasts. Topics include poverty and economic growth, the “resource curse,” democratic institutions, civil society, ethnic relations, state failure, foreign assistance, and intervention. (Same as: GOV 3570)

Prerequisites: GOV 2530 (same as AFRS 2530) or HIST 2364 (same as AFRS 2354) or HIST 2822 (same as AFRS 2822).

Previous terms offered: Spring 2019.

AFRS 3600 (c, VPA) Race and Visual Representation in American Art
Non-Standard Rotation. Enrollment limit: 16.

Students enrolled in the Fall 2020 iteration of the course will have the opportunity to produce online content in support of “There Is a Woman in Every Color: Black Women in American Art,” a forthcoming exhibition at the Bowdoin College Museum of Art. (Same as: ARTH 3600)

Prerequisites: ARTH 1000 - 2970 or ARTH 3000 or higher or Placement in above ARTH 1100 or AFRS 1000 - 2970 or AFRS 3000 or higher.

Previous terms offered: Fall 2020.

Anthropology

Overview & Learning Goals

Overview

Anthropology explores the astonishing diversity and complexity of human life and culture in the contemporary moment and in historical and prehistorical times. A foundational part of a liberal arts education, anthropology challenges students to think critically about the assumptions we make about the world and the power hierarchies that shape our everyday lives. Anthropology examines how social, economic, environmental, and political relationships are reproduced and transformed in the present and across much longer timeframes (millennia as well as decades).

Through the subdisciplines of cultural anthropology and archaeology, students develop holistic and empirically based knowledge of local cultural practices and processes of change in regions including Africa, the Arctic and North Atlantic, Asia, Latin America, and Oceania. Students deepen their understanding of relationships of power and inequality (including gender, ethnicity, race, class, sexuality, age, etc.). Students consider the particularities of local everyday practices and the global circulation of people, ideas, and commodities. Throughout the curriculum, students are exposed to the discipline’s analytical concepts and tools, theoretical perspectives, and field-based qualitative and quantitative research.

Anthropology promotes intellectual curiosity, creative and interdisciplinary thinking, empirical and ethical scholarship, and respect for our common humanity. Our students develop skills that may be mobilized in a variety of fields, such as education, environmentalism, humanitarianism, journalism, law, media, medicine, museum administration, public policy, and social justice, as well as in graduate and professional studies.

Learning Goals

- To develop understanding of human cultural and biological diversity across time and space
- To gain familiarity with anthropological concepts, methods, and theories (within and across the sub-disciplines) and to utilize these to understand issues, relationships, and systems in the present and the past
- To develop the skills to collect and analyze various types of information (e.g., material, visual, narrative, oral, etc.) and to evaluate the use of qualitative and quantitative data in social science research and in everyday life

- To develop critical perspectives on relations of power and inequality through attention to local (ethnographic) particularities, global connections, and historical trajectories
- To communicate effectively through written and oral communication

Options for Majoring or Minorin in the Department

Students may elect to major in anthropology or to coordinate a major in anthropology with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in anthropology.

Department Website (<https://www.bowdoin.edu/anthropology/>)

Faculty

Susan A. Kaplan, *Department Chair*
Lori A. Brackett, *Department Coordinator*

Professors: Susan A. Kaplan, Krista E. Van Vleet*
Assistant Professors: Karime Castillo, William D. Lempert, Stephen McIsaac, Shreyas Sreenath

Faculty/Staff Website (<https://www.bowdoin.edu/anthropology/faculty-and-staff/>)

Requirements
Anthropology Major

The major in anthropology consists of ten courses.

Code	Title	Credits
Required Courses		
Core Courses:		
ANTH 1101	Introduction to Cultural Anthropology	1
ANTH 1103	Archaeology and the Human Experience	1
ANTH 2010	Anthropological Research: Methods and Ethics in Practice ^a	1
ANTH 2030	Anthropological Theory: Concepts in Context	1
Select six electives. ^{b,c}		6

- ^a Students are strongly encouraged to take this course as sophomores or juniors.
- ^b One elective must be an advanced course (3000–3999).
- ^c Only three 1000-level courses (1000–1999) may be counted toward the major.
- Eight of the ten courses required for the major must be Bowdoin anthropology courses. Up to two independent study or honors level courses advised by department faculty may be included in the eight Bowdoin courses required for the major.
- Up to two of the six elective courses, with departmental approval, may be taken from among off-campus study courses, and/or—with approval by the department chair—other Bowdoin courses in related fields that contribute to the student’s specific interests.

Anthropology Minor

The minor in anthropology consists of five courses.

Code	Title	Credits
Required Courses		
ANTH 1101	Introduction to Cultural Anthropology	1
or ANTH 1103	Archaeology and the Human Experience	
Select four elective courses. ^d		4

- ^d Three courses must be at the intermediate (2000–2969) or advanced level (3000–3999).
- One of the five courses, with department approval, may be from off-campus study.
- Only two 1000-level courses (1000–1999) may be counted toward the minor.

Additional Information
Additional Information and Department Policies

- In order for a course to fulfill major or minor requirements, a grade of C- or above must be earned in that course.
- Courses that count toward the major or minor must be taken for regular letter grades (not Credit/D/Fail).
- First-year writing seminars count toward the major or minor.
- There is no limit on how many courses a major or minor in anthropology can double-count with another department or program major.

Independent Study

For the anthropology major program, up to two semesters of intermediate or advanced level independent study or honors courses may be counted. For the anthropology minor program, one semester of intermediate or advanced level independent study may be counted.

Departmental Honors

Students seeking to graduate with honors in anthropology must have distinguished themselves in the major program. Students contemplating honors candidacy should have established records of A and B grades in anthropology courses. To pursue honors, students submit a written proposal early in the first semester of their senior year. Students then prepare an honors project, which ordinarily is a research paper written over the course of two semesters under the mentorship of a faculty advisor. A total of two independent study courses may be counted toward the major requirements in anthropology. Determination of honors is based on grades attained in major courses, an honors project that is approved by the department, and demonstration of the ability to work independently and creatively synthesize theoretical, methodological, archaeological, and/or ethnographic material.

Off-Campus Study

Off-campus study may contribute substantially to a major in anthropology and the department encourages students to consider academic work in another location, cultural context, and/or language. Students are advised to plan study away for their junior year and to complete ANTH 2010 Anthropological Research: Methods and Ethics in Practice—which focuses on research design, methods, and ethics—before studying away. Students must obtain provisional approval for their study-away courses in writing by department faculty before they leave, and then, to receive credit toward their major or minor, students must seek final approval from their advisor upon their return to Bowdoin. With

departmental approval, students may count up to two off-campus study courses toward their major requirements and up to one off-campus study course toward their minor requirements.

Advanced Placement and International Baccalaureate

For information on credit for International Baccalaureate tests, please see the department. No credit is given for Advanced Placement. In order to receive credit for International Baccalaureate work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Information for Incoming Students (p. 57)

Anthropology explores the diversity and complexity of humanity in contemporary cultures and in the “deep past.” We integrate the specifics of individual experience, local particularities of landscapes and communities, and broad regional and global contexts to better understand human actions and meanings, including relations of power, identity, and inequality. In our courses in cultural anthropology and archaeological archaeology students learn how to “make the strange familiar, and the familiar strange” through analysis of material, visual, sonic, and textual data.

The Anthropology Department welcomes first-year students into several of our courses. This fall the anthropologists are offering two first-year writing seminars, ANTH 1016 Imagining Futures and ANTH 1022 Fiction and Fraud in Archaeology: Debunking Modern Myths about Ancient Cultures. We also will teach one section of ANTH 1101 Introduction to Cultural Anthropology and one section of ANTH 1103 Archaeology and the Human Experience. Another entry level course being offered is ANTH 2105 Who Owns the Past? Contemporary Controversies and Contested Narratives. In the spring of 2023, we will teach another section of ANTH 1101 Introduction to Cultural Anthropology. We always save several seats for first-year students in these introductory courses.

None of these courses assume any prior work in anthropology. All of these courses contribute to the major or minor in Anthropology. We encourage students who may want to take 2000-level Anthropology courses – including courses that fulfill the College’s International Perspectives (IP) or Difference, Power and Inequity (DPI) distribution requirements – to take an introductory course (ANTH 1101 Introduction to Cultural Anthropology or ANTH 1103 Archaeology and the Human Experience) as soon as possible. Students who plan to major in Anthropology should take both introductory courses by the end of their second year.

Courses

ANTH 1016 (b) Imagining Futures

Willi Lempert.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

How, why, and for whom do we imagine the future? Focuses on the future through the lens of indigenous science fiction and off-Earth exploration and settlement. Students engage with indigenous films and science fiction, popular and scholarly literature about space exploration, and the writing of cultural anthropologists to develop skills in analyzing visual and written texts and to reflect on “the future” as created by our individual and collective hopes, fears, and expectations.

Previous terms offered: Fall 2019, Fall 2018.

ANTH 1022 (b) Fiction and Fraud in Archaeology: Debunking Modern Myths about Ancient Cultures

Karime Castillo.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Archaeology has inspired endless theories and stories about extraterrestrial aliens, lost civilizations, dark conspiracies, apocalyptic predictions, and mysterious technologies. While archaeology, in many ways, tries to solve ancient “mysteries,” and while archaeologists do sometimes crawl around in caves in the desert, archaeology is a discipline grounded in rigorous methodologies, careful accumulation and analysis of data, and scientific method. The course investigates a range of fringe archaeology theories and looks at how they were developed. Topics will include theories about the lost city of Atlantis, purported evidence of extraterrestrial influences on past cultures, and Viking incursions in the Americas. The course explores the many different myths about archaeology and ancient cultures and the stories’ impacts on contemporary society and our understanding of human history.

ANTH 1025 (b) Ties that Bind: The Anthropology of Relatedness

Non-Standard Rotation. Enrollment limit: 16.

Understanding relatedness, or kinship, illuminates the intimate and hierarchical relationships through which human beings, across time and place, live their lives. Drawing cases from small-scale indigenous societies and industrialized states across Africa, Asia, North and South America, and Oceania, the course challenges assumptions about “natural” relationships and biological givens. Introduces concepts, methods, and ethics in anthropology and encourages students to critically reflect on emergent global issues. Topics may include fosterage and adoption; reproductive governance, rights, and technologies; migration and transnational care networks; intimate violence; aging and personhood; and/or human/non-human relations. Incorporates attention to gender, race, ethnicity, age, and sexuality as dimensions of inequality that intersect with relatedness. Shows how relatedness is vital to understanding our personal dilemmas and relations that structure the global political economy.

Previous terms offered: Fall 2020.

ANTH 1029 (b) People Like Us: Class, Identity, and Inequality

Non-Standard Rotation. Enrollment limit: 16.

Our socioeconomic class shapes who we are. At the same time, class is a powerful form of inequality. We use three ethnographic case studies of class (in China, India, and in the U.S.), along with fiction, poetry, and film, to explore the following questions: How is class “performed” and interpreted in different cultures? How do class identities feed back into systems of inequality? How does class intersect with other forms of identity and inequality, such as gender, race, and caste? Key theorists are also brought into play. (Same as: ASNS 1048)

Previous terms offered: Fall 2021.

ANTH 1101 (b) Introduction to Cultural Anthropology

Stephen McIsaac; Shreyas Sreenath.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 50.

Cultural anthropology explores the diversities and commonalities of cultures and societies in an increasingly interconnected world. Introduces students to the significant issues, concepts, theories, and methods in cultural anthropology. Topics may include cultural relativism and ethnocentrism, fieldwork and ethics, symbolism, language, religion and ritual, political and economic systems, family and kinship, gender, class, ethnicity and race, nationalism and transnationalism, and ethnographic representation and validity.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ANTH 1103 (b) Archaeology and the Human Experience

Karime Castillo.

Every Fall. Fall 2022. Enrollment limit: 50.

An introduction to the discipline of archaeology, the course showcases human diversity through time and space. Topics include conflicting theories of human biological evolution, debates over the genetic and cultural bases of human behavior, development of artistic and religious expression, and expansion of human populations into diverse ecosystems around the world. Ways that relationships to environments changed as people domesticated plants and animals, and why many groups moved from a nomadic to settled village life are explored, as is the rise of complex societies and the state. Examines how contemporary archaeologists address colonialism, racism, and postcolonial interpretations of the past.

Previous terms offered: Spring 2022, Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ANTH 1125 (b, IP) Audiovisual Cultures: The Anthropology of Sight and Sound

Non-Standard Rotation. Enrollment limit: 16.

Explores sight and sound as reflections of historical, cultural, political, and social forces, challenging the assumption that seeing and hearing are solely biological processes. Draws on case studies from diverse cultures, places, and historical moments to ask how people see and hear differently and how they interpret the relationship between what their eyes and ears tell them. Introduces students to the interdisciplinary fields of visual studies and sound studies in order to reflect on a wide array of topics which may include aesthetics, the body, performance, power, technology, and media, among others. Asks in particular how anthropologists' attention to the audiovisual might enrich our understanding of the diverse ways that human beings live in and understand the world and how everyday processes, including our own experiences of seeing and hearing, produce culture. Attends to power hierarchies and social inequalities in diverse cultural contexts. Students engage in hands-on activities to produce audiovisual material as well as developing the skills to collect and analyze various types of audio and visual data.

Previous terms offered: Fall 2018.

ANTH 2010 (b) Anthropological Research: Methods and Ethics in Practice

Willi Lempert.

Every Spring. Spring 2023. Enrollment limit: 35.

This course is a hands-on introduction to the design of qualitative ethnographic research and the various practices through which anthropologists gather and analyze empirical data. Students gain skills in collecting information through methods such as participant observation, field notes, interviews, mapping, archival and library research, photography, and/or video. Students also employ various analytical techniques to interpret diverse forms of data (including aural, visual, material, and digital). Additionally, the course explores the use and misuse of various methodological approaches and the craft of ethnographic representation, especially in writing. Ethical practices and the protection of human subjects are highlighted, along with the power dimensions of anthropological research.

Prerequisites: ANTH 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ANTH 2030 (b) Anthropological Theory: Concepts in Context

Stephen McIsaac.

Every Fall. Fall 2022. Enrollment limit: 35.

This course explores theoretical approaches to the study of culture and society that have emerged from the nineteenth century through the present. Contemporary anthropology defines itself in relation to—and sometimes against—various theoretical traditions and historical influences. Close readings of anthropological texts elucidate some of the underlying assumptions of social theory and the historical contexts in which anthropologists have worked. Understanding how contemporary anthropologists employ, extend, challenge, or reframe earlier concepts and theories illuminates the abiding concerns and transformational possibilities of the discipline.

Prerequisites: ANTH 1101.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ANTH 2105 (c, DPI, IP) Who Owns the Past? Contemporary Controversies and Contested Narratives

Susan Kaplan.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Focuses on the meaning and significance of artifacts, archaeology sites, monuments, and art from a diversity of perspectives. Students learn about disagreements regarding who owns antiquities and ethnographic objects. They consider the ethical, cultural, and legal considerations of where heritage materials are housed, and whether they should be published and exhibited, and if so, by whom. They examine the impact of politics, conflicts, and war on cultural heritage sites and monuments, and learn about the illegal trafficking in antiquities and art. Students wrestle with museums' colonial legacies and consider how decolonizing practices are transforming museums and interpretations of the past. Case studies cover a broad array of museums, cultures, and nations. Readings, class discussions, visits by guest speakers, and hands-on work with objects are augmented by visits to the college's two museums. (Same as: ARCH 2207)

Previous terms offered: Fall 2020.

ANTH 2107 (b, IP) Investigating the Recent Past: Archaeology, Oral Narratives, and Written Records

Every Other Year. Enrollment limit: 35.

Archaeology is an effective way to study the past, even more so when integrated with oral and historical sources to understand and interpret cultural heritage from the relatively recent past. It can give voice to underrepresented groups, bringing to light histories that were silenced or forgotten. Case studies drawn from around the world illustrate the use of multiple lines of archaeological, visual, oral, and written evidence to examine issues of culture contact, colonialism, ethnicity, racism, slavery, immigration, and industrialization. Recent theoretical, methodological, and thematic developments in the field of historical archaeology will be explored, including the rise of community or collaborative archaeology and indigenous archaeology as strategies to challenge and decolonize dominant historical narratives.

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Spring 2022.

ANTH 2170 (b) Changing Cultures and Dynamic Environments

Non-Standard Rotation. Enrollment limit: 35.

Over the last 20,000 years the Earth's environment has changed in both subtle and dramatic ways. Some changes are attributable to natural processes and variation, some have been triggered by human activities. Referring to anthropological and archaeological studies, and research on past and contemporary local, regional, and global environments, examines the complex and diverse relationship between cultures and the Earth's dynamic environment. A previous science course is recommended.

Prerequisites: ANTH 1101 or ANTH 1103.

Previous terms offered: Spring 2022, Spring 2020.

ANTH 2213 (b, DPI, IP) Afterlives: Anthropology, History, Temporality

Stephen McIsaac.

Every Other Year. Fall 2022. Enrollment limit: 35.

Amid social movements calling for reparations, ongoing displacement, dispossession, and occupation, and enduring global inequality, understanding how histories of violence and subjugation permeate the present is more urgent than ever. Combines anthropology, literature, historiography, and critical theory to explore how histories of violence morph and find new expressions in the present. Asks how ordinary people live with, experience, and reckon with the afterlives of history in their everyday lives. Draws on scholarly articles and books, films, and other media to ask: In what ways do histories—personal, social, political—stay with us? Are past, present, and future so easily separable? How do people see, know, feel, or touch the past in their present lives? How do people resist the weight of history and carve out different possibilities for the future? Topics vary but include: psychic and structural legacies of colonialism; bodily aftereffects of war, trauma, and dispossession; spatial aftermaths of segregation; and environmental impacts of industry.

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Spring 2021.

ANTH 2215 (b, MCSR) Mapping the Social World: Geographic Information Systems in Social Science Research

Non-Standard Rotation. Enrollment limit: 20.

Examines the use of geographical information systems (GIS) to organize, analyze, and visualize spatial data within social science and humanities research. Introduces foundational concepts of cartography, database design, spatial data representation, and data visualization. Provides hands-on experience in spatial data collection, three-dimensional modeling, spatial analysis, spatial network analysis, and spatial statistics. The application of GIS to areas of social scientific and humanistic inquiry are explored through examination of case studies, weekly laboratory exercises, and an individual semester project that culminates in a conference-style research poster. Case studies and data sets are drawn from anthropology, archaeology, and related fields, such as sociology, history, and cultural geography. (Same as: URBS 2215)

Prerequisites: ANTH 1101 - 1103 or SOC 1101.

Previous terms offered: Fall 2021, Spring 2020, Spring 2019.

ANTH 2220 (b, IP) Medical Anthropology

Non-Standard Rotation. Enrollment limit: 35.

Medical anthropology explores health, medicine, and the body as embedded in cultural contexts and shaped by social inequalities. Introduces foundational concepts and approaches that emphasize the meanings and experiences of health and illness. Develops tools for understanding health, illness, and well-being within broader systems of power, including inequalities of gender, ethnicity, race, class, and sexuality. Examines case studies in a variety of contexts to trace the implications of these approaches. Topics may include the production of authoritative knowledge, symbolic and ritual healing, mental illness, pharmaceuticals, organ donation and the commodification of body parts, disability, and/or well-being. Reflects on the unique methods and perspectives that anthropologists bring to the field of medicine, along with the role of anthropologists in public debates about health.

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or SOC 1101.

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

ANTH 2227 (c, VPA) Protest Music

Non-Standard Rotation. Enrollment limit: 35.

Focuses on the ways black people have experienced twentieth-century events. Examines social, economic, and political catalysts for processes of protest music production across genres including gospel, blues, folk, soul, funk, rock, reggae, and rap. Analysis of musical and extra-musical elements includes style, form, production, lyrics, intent, reception, commodification, mass-media, and the Internet. Explores ways in which people experience, identify, and propose solutions to poverty, segregation, oppressive working conditions, incarceration, sexual exploitation, violence, and war. (Same as: AFRS 2228, MUS 2292)

Previous terms offered: Fall 2021, Fall 2018.

ANTH 2230 (b, DPI, IP) Language, Identity, and Power

Krista Van Vleet.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

As human beings, we are profoundly social. Most of our lives are spent interacting, directly or indirectly, with others. Language is central to this process. Through language people create, maintain, and transform personal identities, senses of belonging, and social differences, including those tied to inequity and privilege. Draws on cultural and linguistic anthropology to explore language as a social activity and resource intertwined with relationships of power. Analyzes the co-production of language and inequality (especially gender, sexuality, race, and ethnicity, class, dis/ability) at various scales, from face-to-face conversations to governmental policies. Encourages students' critical reflection on a wide array of ethnographic contexts (e.g., indigenous North and South America, Israel, Japan, Kenya, United States), our own linguistic experiences, and the seeming neutrality of our everyday lives through readings, assignments, and activities.

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Spring 2019.

ANTH 2235 (b, IP) Science, Technology, and Medicine in Africa

Non-Standard Rotation. Enrollment limit: 35.

Introduction to the historical and ethnographic study of the politics of science, technology, and medicine in African contexts. Offers opportunities to learn about African experiences of science, technology, and medicine. Reconsiders common definitions of science and technology from the perspective of African cultures of expertise. Topics considered include the spiritual and religious dimensions of expert knowledge, environmental management, conservation, archaeology, hunting, metallurgy, healing, genetically modified organisms, pharmaceutical development, epidemiology, and information technology. Science and technology will be considered in relation to precolonial social formations, colonialism, independence struggles, and the postcolonial state. Course materials include historical and ethnographic writing as well as speculative fiction. (Same as: AFRS 2753)

Prerequisites: ANTH 1101 or AFRS 1101.

Previous terms offered: Spring 2020.

ANTH 2243 (b, DPI, IP) Imagined South Asias, Everyday South Asias

Shreyas Sreenath.

Every Other Fall. Spring 2023. Enrollment limit: 35.

Interrogates the relation between the imagined and the everyday through a focus on South Asia, the most densely populated region in the world. Discusses how South Asia is imagined as a site of (post)colonial desires, despairs, and revolts as well as through civilizational or national tropes. Explores how these imagined South Asias are reshaped and disrupted by the everyday habitations of various political communities within the region and in diaspora. May include discussion of Afghanistan, Bangladesh, Bhutan, India, the Maldives, Nepal, Pakistan, and Sri Lanka. Through ethnography, fiction, poetry, film, and music aims to cultivate a distinctly postcolonial sensitivity to thinking about caste, gender, spirituality, ecology, language, militancy, and politics in the region. (Same as: ASNS 2571)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Fall 2021.

ANTH 2246 (b, DPI, IP) Anthropology of Care: Intimacy, Inequity, and Power

Krista Van Vleet.

Every Other Year. Spring 2023. Enrollment limit: 35.

Care shapes the relationships of children, adults, and elders within families, but care also extends far beyond the boundaries of households, incorporating domestic workers, medical professionals, missionaries, volunteers, NGOs, and governments. This course explores care as a form of intimate labor and an array of social practices that are embedded in local cultural contexts and shaped by global political economic relationships. Gender, race and ethnicity, class, nationality, (dis)ability, and age shape the configurations of caring by and caring for others. Incorporates attention to feminist, decolonial, and poststructuralist theories of power as operating on bodies, selves, and intimate relationships. Course texts include ethnographies, scholarly articles, and other materials. Draws on a wide array of contemporary contexts around the world for ethnographic case studies and challenges students to critically reflect on hierarchies of care in their own lives. (Same as: GSWS 2246)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or SOC 1101.

Previous terms offered: Spring 2020, Spring 2019.

ANTH 2250 (b) The Anthropology of Media

Non-Standard Rotation. Enrollment limit: 35.

Examines the social and political life of media and how it makes a difference in the daily lives of people as a practice—in production, reception, and/or circulation. Introduces some key concepts in social theory which have been critical to the study of the media across disciplines, ranging historically, geographically, and methodologically; investigates the role of media in constituting and contesting national identities, forging alternative political visions, transforming religious practice, and in creating subcultures; examines diverse source materials such as early experiments in documentary film to the Internet, from news reporting to advertising.

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2020, Fall 2018.

ANTH 2256 (b, IP) Ecological Crisis and Reparation: Arts of Living on a Damaged Planet

Shreyas Sreenath.

Every Other Year. Spring 2023. Enrollment limit: 35.

Human beings confront a paradox as we become aware of anthropogenic climate change. On the one hand, we are geological agents powerful enough to irreparably transform life on earth. On the other, we face collective despair and powerlessness in our attempts to avert certain ecological collapse. This course draws on contemporary anthropology and other approaches in the social sciences and humanities to explore how cultivating diverse 'arts of living' addresses this double-bind. Dominant environmental paradigms that emphasize 'natural conservation' are examined in relation to the re-emergence of patriarchy, racism, xenophobia, and class conflict in various socio-cultural contexts. Through course readings, activities, and assignments students re-imagine ecology from the starting point of repair rather than conservation in order to develop a more conducive ethics of life on an already damaged planet. (Same as: ENVS 2356)

Prerequisites: ANTH 1101 or ANTH 1103 or SOC 1101.

Previous terms offered: Spring 2022, Fall 2020.

ANTH 2257 (b, IP) Material Culture: The Anthropology of Stuff

Non-Standard Rotation. Enrollment limit: 35.

Humans everywhere and through time have made, consumed, and surrounded themselves with things. This course explores how these objects escape their intended purposes and exert power over us. Drawing on cross-cultural perspectives, it examines things—from the mundane to the extravagant—as mediums for the expression of identity, communication of ideas, and memory-making. Topics include consumerism, environmentalism, identity, class and inequality, crafting, and the maker movement. Students explore intersections between cultural anthropology and archaeology to understand how the study of things sheds light on societies in both the past and present. Introduces students to a variety of theoretical and methodological approaches to the study of material culture with opportunities to apply concepts to a variety of objects.

Prerequisites: ANTH 1000 or higher.

Previous terms offered: Spring 2020.

ANTH 2258 (b, IP) Ancient Civilizations of Mesoamerica

Karime Castillo.

Every Other Fall. Spring 2023. Enrollment limit: 35.

Explores the emergence of social complexity and state-level societies through a focus on ancient civilizations of Mesoamerica (Mexico, Guatemala, Belize, Honduras, and El Salvador). Among the diverse peoples and cultures that populated this region prior to the Spanish invasion, the Maya and the Aztec are among the most famous. This course challenges popular misconceptions about these and other societies who occupied this region over the course of 3500 years. Asks how cities rivaling in size those of the old world rose, collapsed, and sometimes disappeared. Considers the political structure and economic systems of these societies, their technologies, and their relationships with the environment. Explores ancient worldviews, belief systems, and political and religious power. Incorporates various types of evidence, including the archaeological material record, art, monumental architecture, and ethnohistorical sources, and the ways archaeologists analyze and interpret that evidence. (Same as: LACL 2758)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Fall 2021.

ANTH 2278 (b, DPI) Decolonizing Archaeology in Latin America

Karime Castillo.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the legacies of colonialism in modern Latin America and archaeologists' current efforts to decolonize Eurocentric interpretations and discourses of the colonial past. Focuses on indigenous and community archaeology as a means of reframing our understanding of the past and present. Discussions address the impact of colonialism in Latin America and the Caribbean, including how contemporary relationships in the region are structured by colonial history. Students work with case studies grounded in archaeological, ethnographic, and historical sources to learn how archaeology can help contest and subvert dominant narratives derived from colonialism. Indigenous resistance and resilience will be addressed along with cultural continuities and change. Topics may include identity and the construction of ethnicity, gender, and race; religion; slavery and diaspora; and art, architecture, and technology. (Same as: LACL 2755)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or LACL 1000 - 2969 or LACL 3000 or higher.

ANTH 2335 (b, MCSR) Advanced Topics in Geographic Information Systems and Remote Sensing

Non-Standard Rotation. Enrollment limit: 35.

In this project-based course, students pursue semester-long research projects that employ geographic information systems (GIS) and spatial analysis to address questions of relevance to social science and humanistic research. Provides theoretical and methodological training for advanced GIS applications in social science research, including implementing GIS in research design, field collection of spatial data, and data processing, management, visualization, and analysis. Case studies from anthropology, archaeology, and other social science and humanities fields are used to introduce a diversity of GIS applications. Additional topics will be tailored to the interests and research projects of enrolled students. Assignments in the course are designed to further progress on the semester research project. This course is intended for students with prior experience working with geographic information systems and/or conducting spatial analysis.

Prerequisites: ANTH 2215 (same as URBS 2215) or CSCI 3225 or EOS 2030 or ENVS 2004 (same as DCS 2335 and URBS 2004) or ENVS 2301 (same as DCS 2340 and URBS 2301) or ENVS 2331 (same as DCS 2331) or ENVS 3909 (same as DCS 3040) or HIST 2625 (same as DCS 2550).

Previous terms offered: Spring 2022, Spring 2021.

ANTH 2340 (b, IP) Ethnographic Film

Non-Standard Rotation. Enrollment limit: 35.

Considers the development of ethnographic film from an anthropological lens and international perspectives. Starting with the advent of the documentary and concluding with ethnographic new media, investigates how, why, and to what end film has been used as a tool by anthropologists and the communities that they work with to expand discussions about the modern world. Topics include filmmaking as a methodology for social scientists, the connections between ethnographic film and self-determination efforts in minority communities, critical examinations of media-making practices—onscreen and off—and the global impact these factors have had. (Same as: CINE 2831)

Prerequisites: ANTH 1101 or SOC 1101 or CINE 1101.

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

ANTH 2345 (b, IP) Gender, Race, and Citizenship in Brazil

Jay Sosa.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course examines how hierarchies of race, class, gender, and sexuality structure everyday life in Latin America's largest nation, Brazil. Twentieth century elites described Brazil as a racial democracy and a sexual paradise, but this vision is increasingly contested in the twenty-first century by Black, feminist, and LGBT social movements. Reading ethnographic accounts and watching film portrayals of daily life in Brazil across a number of case studies, we will examine how Brazilians encounter social inequality in a variety of intimate settings. Potential topics include: domestic labor, sex work, queer activism, plastic surgery and reproductive rights. Students will complete short response papers during the semester and complete a final research project on a self-selected topic that includes primary or secondary sources on Brazil. (Same as: GSWS 2345, LACL 2345)

Previous terms offered: Spring 2021, Fall 2020.

ANTH 2350 (b, IP) Global Indigenous Cinema

Willi Lempert.

Every Other Year. Spring 2023. Enrollment limit: 35.

Surveys Indigenous-produced film from around the globe, with an emphasis on contemporary Native North American and Aboriginal Australian cinema. Engages recent technological innovations in filmmaking. Analyzes film through discussion and writing, pairing screenings with readings of anthropological and Indigenous scholarship. Considers film in relation to the social, historical, and cultural contexts and broader global processes of indigenous media production and circulation. (Same as: CINE 2832)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher or SOC 1101.

Previous terms offered: Spring 2021, Spring 2019.

ANTH 2390 (b) Science, Technology, and Culture

Non-Standard Rotation. Enrollment limit: 35.

Explores science and technology as institutions and cultural forces that are culturally and historically situated. Introduces key theoretical approaches and concepts, focusing on anthropological research. Considers how scientific knowledge is produced in places such as laboratories, hospitals, clinical research sites, conservation areas, the military, and/or computing projects in diverse societies. Asks how power is ascribed to this way of knowing in everyday life. Compares western science with indigenous and traditional knowledge systems. Examines the role of science and technology in the social construction of race in colonial and postcolonial political projects. Takes a global perspective, juxtaposing cases from Asia, Latin America, Africa, and/or Oceania. Addresses differing definitions of science and technology, standards of objectivity, and the politics of technoscience.

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2019.

ANTH 2410 (b, IP) Landscapes of Power: Culture, Place, and the Built Environment

Non-Standard Rotation. Enrollment limit: 35.

Explores spaces, landscapes, and the built environment as arenas for producing, reproducing, and contesting relationships of power and authority. Human beings transform and are transformed by their physical surroundings, and relationships between people and places are shaped by culture, history, identity, and politics. Drawing on critical theories from anthropology, cultural geography, and related fields, students examine the intersections of space, place, and power using case studies from a variety of cultural and historical contexts. Considers how relationships of inequality become embedded in the landscape and the built environment. Topics include state violence, gated communities, colonialism, borders and borderlands, racial segregation, and gendered spaces.

Prerequisites: ANTH 1101 or ANTH 1103 or SOC 1101 or ANTH 2000 - 2969.

Previous terms offered: Spring 2021.

ANTH 2420 (b) The Anthropology of Sport

Non-Standard Rotation. Enrollment limit: 35.

Examines, from an anthropological perspective, the practice and conceptualization of sport. Using a variety of methodologies, investigates the meaning invested in various sporting endeavors, as well as how these vary across time and cultural context. Topics include soccer fandom in the UK, Title IX legislation in the US, Maori masculinity and rugby in New Zealand, the impact of instant replay, and the challenges of performance-enhancing drugs. Also considers the relationship between sports and nationalism, sports and gender, and the global political economy of multibillion-dollar athletic industries.

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2021, Spring 2020, Fall 2019, Fall 2018.

ANTH 2450 (b) Evolution as Science and Story: Monkey Trials, Selfish Genes, and Why Origins Matter

Non-Standard Rotation. Enrollment limit: 35.

Darwin was not the first to propose that humans originated through a process of evolution, but his book *On the Origin of Species* sparked a conflict that continues today. Surveys suggest that the American public is roughly split on the question of whether humans evolved or were created. This course draws on anthropological studies of science and of religion to situate the "culture wars" over evolution and creation in cultural and historical perspective. Introduces the science of evolution and multiple views on human origins from the nineteenth to twenty-first centuries. Considers origin stories from around the world to develop a framework for understanding how such stories provide powerful explanations of "where we come from" and "who we are." Considers contentious debates over teaching evolution, and why it matters. Incorporates primary texts from a variety of perspectives with scholarship in anthropology.

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or SOC 1000 - 2969 or SOC 3000 or higher.

Previous terms offered: Spring 2019.

ANTH 2470 (b, IP) Religions of the African Atlantic

Non-Standard Rotation. Enrollment limit: 16.

Introduces the religious beliefs and practices of African peoples and their descendants in the Americas. Topics will include historical spiritual links between Africa and the African diaspora, spirits and divinities from an Afro-Atlantic perspective, and religious contact and mixture in Africa and the Americas. The contributions of Afro-Atlantic peoples to global Christianity, Islam, and other world religions will be explored. After a brief historical and cultural grounding, the course pursues these issues thematically, considering various Afro-Atlantic religious technologies in turn, from divination and spirit possession to computers and mass media. (Same as: AFRS 2382, REL 2470)

Prerequisites: ANTH 1101 or SOC 1101 or AFRS 1101 or REL 1101.

Previous terms offered: Spring 2019.

ANTH 2480 (b, IP) War and Peace: Perspectives on Conflict in Humanity's Past and Present

Non-Standard Rotation. Enrollment limit: 35.

Explores perspectives on the origins and causes of war, the consequences of war on human society, the role of conflict in state formation and imperial expansion, and the relationship between war and the potential for peace. Mobilizes theories and analytical perspectives employed in archaeology and cultural anthropology to examine the material evidence for conflict, including traumatic injuries on human remains, fortifications, settlement patterns, weapons, and iconography. Investigates a range of case studies about prehistoric cultures in the New World (North and South America) as well as Africa, Asia, and the Pacific and considers implications for the contemporary world.

Prerequisites: ANTH 1101 or ANTH 1103.

Previous terms offered: Fall 2018.

ANTH 2533 (b, IP) Peoples and Cultures of Africa

Non-Standard Rotation. Enrollment limit: 35.

Introduction to the traditional patterns of livelihood and social institutions of African peoples. Following a brief overview of African geography, habitat, and cultural history, lectures and readings cover a representative range of types of economy, polity, and social organization, from the smallest hunting and gathering societies to the most complex states and empires. Emphasis upon understanding the nature of traditional social forms. Changes in African societies in the colonial and post-colonial periods examined, but are not the principal focus. (Same as: AFRS 2233)

Prerequisites: AFRS 1101 or ANTH 1000 or higher.

Previous terms offered: Spring 2019.

ANTH 2572 (b, IP) Contemporary Arctic Environmental and Cultural Issues

Non-Standard Rotation. Enrollment limit: 35.

Throughout the Arctic, northern peoples face major environmental changes and cultural and economic challenges. Landscapes, icescapes, and seascapes on which communities rely are being transformed, and arctic plants and animals are being affected. Many indigenous groups see these dramatic changes as endangering their health and cultural way of life. Others see a warming Arctic as an opportunity for industrial development. Addressing contemporary issues that concern northern peoples in general and Inuit in particular involves understanding connections between leadership, global environmental change, human rights, indigenous cultures, and foreign policies, and being able to work on both a global and local level. (Same as: ENVS 2312)

Prerequisites: Two of: either ANTH 1150 or ANTH 1101 or ANTH 1102 and ENVS 1101.

Previous terms offered: Fall 2021, Fall 2019.

ANTH 2610 (b) Sex and State Power

Jay Sosa.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Seminar. Examines sexual politics of the law, policing, public health, and state surveillance as they intersect with race, gender, class and disability. Explores feminist and queer responses to the relationship between sex and power from a variety of disciplines and traditions. Focuses on two major trends in the regulation of sex in the twentieth and twenty-first centuries: (1) how policy making has shifted from defining sexual morality to managing populations, and (2) the reinvigorated politics of the family as governments scale back their social welfare programs. Additional topics may include reproductive rights, sex work, marriage, hate crimes, surveillance, militarism, and prisons. Students learn main trends in the politics of sexuality and conduct guided research on the topic of their choice. (Same as: GSWS 2610)

Previous terms offered: Fall 2018.

ANTH 2723 (b) Religion and Social Transformation in South America

Non-Standard Rotation. Enrollment limit: 35.

Religious beliefs and practices intersect with processes of social change at various historical moments, illuminating the power dynamics of (trans)cultural encounters. Using cases from the Andean and Amazonian regions of South America, explores local indigenous cosmologies, rituals, and concepts of the sacred in relation to expansive regional and global religions, including Catholicism and Protestantism. Focuses on twentieth- and twenty-first-century social issues. Includes examples from pre-Columbian, Inca, and Spanish colonial periods to highlight the continuities and transformations in local and global institutions. Forefronts religion, as a facet of identity and inequality, intersecting with gender, race, ethnicity, class, and sexuality. Scholarly and popular texts introduce topics like religious syncretism; sacred landscapes; human-supernatural relations; religious violence and ritual protest; global capitalism and citizenship; everyday moralities, embodiment, and faith-based humanitarianism. (Same as: LACL 2724)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Spring 2021.

ANTH 2737 (b, IP) Family, Gender, and Sexuality in Latin America

Non-Standard Rotation. Enrollment limit: 35.

Focuses on family, gender, and sexuality as windows onto political, economic, social, and cultural issues in Latin America. Topics include indigenous and natural gender ideologies, marriage, race, and class; machismo and masculinity; state and domestic violence; religion and reproductive control; compulsory heterosexuality; AIDS; and cross-cultural conceptions of homosexuality. Takes a comparative perspective and draws on a wide array of sources including ethnography, film, fiction, and historical narrative. (Same as: GSWS 2237, LACL 2737)

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2019.

ANTH 2830 (b, IP) Descendants of the Sun: The Inca and their Ancestors

Non-Standard Rotation. Enrollment limit: 35.

Considers the Inca figure in contemporary imaginations, from mummies to archaeological sites like Machu Picchu. This course examines 12,000 years of cultural change in the Andean region of South America. Situates the Inca, perhaps the most well-known of the early civilizations that predated the European invasion, in relation to other cultures, including the Chavin, Paracas, Moche, Nasca, Wari, Tiwanaku, and Chimú. Topics include the peopling of South America; early religious traditions; cultural adaptations to mountainous and desert environments; origins and development of agriculture; domestication of llamas and alpacas; rise and fall of states; imperial expansion; artistic expression; architectural traditions; treatment of the dead and ancestor veneration; and Spanish colonization. Considers both archaeological and ethnohistorical research from the region that includes Ecuador, Peru, Bolivia, Chile, and Argentina. Includes opportunities to work with artifacts from the region. (Same as: LACL 2730)

Previous terms offered: Spring 2022, Fall 2020, Spring 2019.

ANTH 2840 (b, DPI) Contemporary Issues of Native North America

Willi Lempert.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Explores contemporary Native American issues within and beyond tribal nations. Topics may include sovereignty and decolonization, federal policy, cultural appropriation, gaming and casinos, blood quantum, the repatriation of human remains and objects, language revitalization, comedy, and the little-known history of Native Americans' influence on rock and roll. Throughout, we emphasize Indigenous-produced scholarship and media. Brings attention to tribal nations in Maine as well as the significance of recent political mobilizations in relation to the long history of Native activism.

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Fall 2020, Fall 2018.

ANTH 2850 (b) Indigenous Societies of Australia and New Zealand

Non-Standard Rotation. Enrollment limit: 35.

Surveys the contemporary social, economic, and political issues facing native peoples of Australia and New Zealand. Explores a range of indigenous Australian and Maori forms of social being historically, geographically, and methodologically. Through an examination of diverse source materials—such as ethnographic texts, art, novels, autobiographies, films, television, new media, and museum exhibitions—considers the ways that native identity has been constructed and challenged since the eighteenth century. Investigates the relationships between indigenous sovereignty, the nation state, and cultural production.

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Spring 2020.

ANTH 2860 (b, IP) Oceania: Indigenous Sovereignty and Settler Colonialism

Non-Standard Rotation. Enrollment limit: 35.

While often relegated to the margins, Oceania encompasses more than one-third of the globe, including a continent, thousands of islands, and the world's largest ocean. Engages Australia, Melanesia, Micronesia, and Polynesia thematically through the framework of Indigenous sovereignty and ongoing legacies of colonization. Traces unbroken lineages of traditional knowledge and contemporary practice through topics such as tattoo, surfing, and navigational wayfinding. Highlights Indigenous scholarship, media, and political movements that assert cultural and political self-determination. Challenges students to confront existential threats, including nuclear testing and rising sea levels, in the process of imagining hopeful and sovereign Oceanic futures.

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Spring 2021.

ANTH 3210 (b) Animal Planet: Humans and Other Animals

Non-Standard Rotation. Enrollment limit: 16.

Cultures around the world maintain different stances about non-human animals. People eat meat or avoid doing so. Religions advocate veneration, fear, or loathing of certain animals. Domesticated animals provide us company, labor, and food. Wild animals are protected, studied, photographed, captured, and hunted. Animals inhabit novels, are featured in art, and adorn merchandise. Students read ethnographies, articles, animal rights literature, and children's books; study museum collections; and examine animal themes in films and on the Web. Employing anthropological perspectives, students consider what distinguishes humans from other animals, how cultures are defined by people's attitudes about animals, and what might be our moral and ethical responsibilities to other creatures. (Same as: ENVS 3920)

Prerequisites: ANTH 2000 - 2969.

Previous terms offered: Spring 2021.

ANTH 3215 (b) The Anthropology of Art

Non-Standard Rotation. Enrollment limit: 16.

The aim of this course is two-fold: one, to introduce the student to the "classic" literature within the anthropology of art and to chart the development and interests of this sub-discipline of anthropology; and two, to use this material to develop an "anthropological" perspective on art that can be used as a key form of critical inquiry into diverse art forms. Topics to be discussed include the idea of aesthetics in cross-cultural context; the entanglement of primitivism and modernity; the role of class and taste in appreciating art; art and value in the marketplace; art and museum practice; tourist art and the value of authenticity; and colonial and postcolonial art.

Prerequisites: Two of: ANTH 1101 and ANTH 2000 - 2969.

Previous terms offered: Spring 2019.

ANTH 3217 (b, DPI, IP) Toxicities

Shreyas Sreenath.

Every Other Spring. Fall 2022. Enrollment limit: 16.

Examines the relationship between toxicity and human habitation, focusing on how toxic environments compel us to live in, attend to, and craft otherwise worlds. Delves into anthropological theories and ethnographies of disorder, contamination, waste, material entanglement, and more-than-human embodiment. Explores the uneven distribution of toxic burdens in local, national, and global contexts and traces toxic flows to illuminate capitalist, colonial, racial, gendered and caste logics. Engages with emergent popular politics that rewrite contamination as collaboration. Encourages students to consider possibilities of life otherwise, amid toxic realms that exceed purely human instrumentalities yet archive all too human histories of social power.

Prerequisites: ANTH 2000 - 2969.

Previous terms offered: Spring 2021.

ANTH 3222 (b) Cultural Performances

Non-Standard Rotation. Enrollment limit: 16.

"Cultural performances" include many media and events that are not typically thought of as performative in Euroamerican cultures. The term covers not only drama, dance and music, but also such cultural media as ritual, literature, political spectacle, sport and celebration. This course will approach performances in three ways: first, to see what they reveal about a culture, to both insiders and outsiders; second, to consider what social, psychological and political effects they can have on participants and their societies; and third, to investigate what methods have been used to study performance. We will examine a wide variety of cultural performances. Special attention will be paid to audiences, and to their reception and uses of symbolic material.

Prerequisites: Two of: ANTH 1101 or SOC 1101 and either ANTH 2000 - 2969 or either SOC 2000 - 2969 or ANTH 3000 or higher or SOC 3000 or higher.

Previous terms offered: Spring 2022, Fall 2020.

ANTH 3320 (b) Youth and Agency in Insecure Times

Non-Standard Rotation. Enrollment limit: 16.

Explores research on youth as a window into broader questions related to agency, identity, and social, political, and economic inequality in the contemporary world. Youth move between families, communities, and nations; claim belonging to divergent communities; create distinct identities; and navigate hierarchies. Incorporates attention to culturally specific notions of childhood, adolescence, and adulthood while highlighting youth and children as social actors. Draws on theoretical approaches to agency, subjectivity, and resistance in late-twentieth and early twenty-first-century anthropology. Considers methodological and ethical implications of research with children and youth. Topics may include adoption, citizenship, migration, labor, reproductive politics, human trafficking, tourism, and activism in Latin America, as well as Asia, Oceania, and/or Africa. Hierarchies of gender, ethnicity, race, sexuality, class, and age are considered throughout. (Same as: LACL 3720)

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Spring 2020, Fall 2018.

ANTH 3340 (b) Mindful Bodies: Anthropology of Embodiment

Stephen McIsaac.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Considers how embodiment—the lived experience of inhabiting a body—offers unique insight into a variety of social and political issues. Explores the body as a layered terrain of social, moral, political, biocultural, and historical forces. Examines the body as a site of power; as cultivated through techniques and discipline; as constitutive of personhood and identity; as a material, biological, and organic entity; and as a locus of experience, wisdom, and subjectivity. Topics vary but include: racialized, gendered, and classed dimensions of embodiment; critical disability studies; technological and biomedical enhancement; pain and pleasure; mindfulness, somatic therapy, and psychosomatic experience; sex and sexuality; affect and the sensorium; religious discipline and piety; self-expression and performance; and body/non-human/environment relations.

Prerequisites: ANTH 2000 - 2969.

Previous terms offered: Fall 2021.

Art

Overview & Learning Goals

Overview

The Department of Art comprises two programs: art history and visual arts. Majors in the department are expected to elect one of these programs. The major in art history is devoted primarily to the historical and critical study of the visual arts as an embodiment of some of humanity's cultural values and a record of the historical interplay of sensibility, thought, and society. The major in visual arts is intended to encourage a sensitive development of perceptual, creative, and critical abilities in visual expression.

Art History Learning Goals

Art history learning goals are introduced in 1000-level courses, utilized further in 2000-level courses, and refined in 3000- and 4000-level courses with an emphasis on independent practice.

Student majors in the discipline of art history will:

- Learn the structured method of visual analysis in order to deepen their understanding of visual and material form, spatial effects, and medium and technique of works of art, artifacts, and architecture, and then convey that understanding clearly.
- Engage with actual objects through deliberate and extended examination, using the architecture of the campus, holdings of the Museum of Art, Arctic Museum, and other campus collections.
- Acquire an understanding of the history of art across time and geography as being rooted both in the specific histories of particular periods and places and as involving broader systems of cultural connection, conflict, migration, resistance, exchange, appropriation, and assimilation.
- Learn to locate, identify, and assess critically the relevant historical sources in order to build an interpretation.
- Employ these skills to interpret any unfamiliar object, bringing to bear visual evidence, knowledge of the history of visual forms, and historical information about subject, meaning, and context.

- Challenge the initial subjective response to a work of art by exerting effort to inform themselves about cultures and art traditions that are unfamiliar to them.
- Question their own cultural assumptions about what art is and what artists are.
- Question the received wisdom of the discipline of art history, assessing anew the inherited categories, methods of analysis, and currently accepted interpretations of objects.
- Develop original research projects that can produce new knowledge and understandings.
- Develop strong writing and speaking skills in order to construct a solid thesis and supporting argument, and then communicate them effectively.

Art History Department Website (<https://www.bowdoin.edu/art-history/>)

Visual Arts Learning Goals

- Develop skills of direct observation of the world in order to examine the relationship between seeing and knowing.
- Embark upon a range of material explorations in order to gain technical proficiency and facility with multiple means of artistic production.
- Master the formal elements of visual design in order to articulate ideas and to develop an individual artistic language.
- Independently develop and be self-critical of one's creative production.
- Engage in critical discourse and extend it to one's daily life.
- Identify the concerns and motivations informing one's practice and articulate their significance within global historical and contemporary context.
- Locate one's work within the larger conversations defining the liberal arts.

Visual Arts Department Website (<https://www.bowdoin.edu/visual-arts/>)

Options for Majoring or Minor in the Department

Students may elect to major in art history, visual arts, the art history and archaeology interdisciplinary major, the art history and visual arts interdisciplinary major, or to coordinate a major in art history or visual arts with digital and computational studies, education, or environmental studies. Students pursuing coordinate or interdisciplinary majors may not normally elect a second major. Non-majors may elect to minor in art history or visual arts.

Faculty

Peggy Wang, *Chair*, Art History Division

Michael Kolster, *Chair*, Visual Arts Division

Tammis L. Donovan, *Coordinator*, Art History Division

Requirements

Art History

Art History Major

The art history major consists of ten courses, excluding first-year writing seminars.

Code	Title	Credits
Required Courses		
Select one ARTH course (numbered 1100–1999).		1
Select one course in African, Asian, or Ancient American Art History numbered 1103 or higher.		1
ARTH 1300	Introduction to Art History: Introduction to the Art of Ancient Mexico and Peru	
ARTH 2110	Sacred Arts of Japan	
ARTH 2180	Gender in Japanese Art	
ARTH 2190	Culture and Crisis in Modern and Contemporary Japanese Art	
ARTH 2200	Art and Revolution in Modern China	
ARTH 2210	From Mao to Now: Contemporary Chinese Art	
ARTH 2360	Art and Politics in Africa	
ARTH 2370	Traveling Textiles: Cultural Encounters from Trade Routes to the Runway	
ARTH 2380	African Art and Visual Culture	
ARTH 2710	Power and Politics in Pre-modern Chinese Art	
Select one of the following from Ancient and Medieval European Art History:		1
ARTH 2090/ ARCH 1101	Greek Archaeology	
ARTH 2100/ ARCH 1102	Roman Archaeology	
ARTH 2130	Art of Three Faiths: Christian, Jewish, and Islamic Art and Architecture, Third to Twelfth Centuries	
ARTH 2140	The Gothic World	
ARTH 2150	Illuminated Manuscripts and Early Printed Books	
ARTH 2260	Northern European Art of the Fifteenth and Sixteenth Centuries	
Select one of the following from Renaissance and Baroque European Art History:		1
ARTH 2220	The Medici's Italy: Art, Politics, and Religion, 1300-1600	
ARTH 2230	The Arts of Venice	
ARTH 2240	Monstrosity and Elegance: Mannerism in European Court Art, 1500-1600.	
ARTH 2320	Art in the Age of Velazquez, Rembrandt, and Caravaggio	
Select one of the following from Modern and Contemporary European and American Art History:		1
ARTH 2410	Sugar, Tobacco, Rice, and Rum: Art and Identity in Atlantic World, 1620–1812	

ARTH 2420	Realism and Its Discontents: European Art, 1839-1900	
ARTH 2440	Shoot, Snap, Instagram: A History of Photography in America	
ARTH 2450	American Furniture by Design	
ARTH 2520	Modern Art	
ARTH 2540	Contemporary Art	
ARTH 2620	American Art I: Colonial Period to the Civil War	
ARTH 2640	American Art from the Civil War to 1945	
Select one additional intermediate ARTH course (numbered 2000–2969).		1
Select two advanced ARTH seminars (numbered 3000–3999).		2
Select two additional ARTH courses numbered higher than 1100. ^a		2

^a Only one independent study may be used to satisfy this requirement.

A maximum of two courses for one semester of study from another college or university may count toward the major in art history with departmental approval of that transfer credit. If a student studies away for a full academic year, three courses from another college or university may count toward their art history major with departmental approval.

Art History Minor

Code	Title	Credits
Required Courses		
Select one ARTH course (numbered 1100-1999).		1
Select two intermediate ARTH courses (numbered 2000–2969).		2
Select one advanced ARTH course (numbered 3000–3999).		1
Select one additional ARTH course numbered higher than 1100. ^b		1

^b An independent study may be used to satisfy this requirement.

Only one course for one semester of study from another college or university may count toward a student's art history minor with departmental approval.

Courses that count toward the major and minor must be taken for regular letter grades (not Credit/D/Fail), and students must earn grades of C- or better in these courses.

Seminars in Art History

The seminars are intended to utilize the scholarly interests of members of the department and provide an opportunity for advanced work for selected students who have successfully completed enough of the regular courses to possess a sufficient background. The department does not expect to give all, or in some cases any, seminars each semester. As the seminars are varied, a given topic may be offered only once, or its form changed considerably from time to time.

Visual Arts

Visual Arts Major

The major consists of eleven courses.

Code	Title	Credits
Required Courses		
VART 1101	Drawing I	1
Select two of the following:		2

VART 1201	Printmaking I	
VART 1401	Photography I	
VART 1601	Sculpture I	
VART 1701	Digital Media I	
VART 3902	Advanced Studio	1
Select one 3000-level visual arts course labelled generally as Guided Independent Studio Practice. ^c		1
Select four additional visual arts electives. ^d		4
Select two courses in art history.		2

- ^c These advanced studio courses emphasize self-directed work with thematic prompts and in-progress critiques.
- ^d Any level course in visual arts may be used to satisfy this requirement, but no more than one of the four electives may be an independent study course.

Visual Arts Minor

The minor consists of six courses.

Code	Title	Credits
Required Courses		
VART 1101	Drawing I	1
Select one of the following:		1
VART 1201	Printmaking I	
VART 1401	Photography I	
VART 1601	Sculpture I	
VART 1701	Digital Media I	
Select three additional visual arts courses. ^e		3
Select one course in art history at any level.		1

^e Any level course in visual arts may be used to satisfy this requirement, but no more than one of the three electives may be an independent study course.

Courses that count toward the major and minor must be taken for regular letter grades (not Credit/D/Fail), and students must earn grades of C- or better in these courses.

A maximum of two studio visual arts courses and one art history course (for a total of three courses) taken at another college or university may count toward the major or minor in visual arts, with departmental approval of that transfer credit.

Visual arts courses without prerequisites are frequently oversubscribed; registration preference is then given to first- and second-year students, as well as to juniors and seniors fulfilling requirements of the visual arts major or minor.

Interdisciplinary Majors

Art history participates in interdisciplinary programs in art history and archaeology, and in art history and visual arts. Art history majors may pursue a coordinate major with digital and computational studies, environmental studies, or education. See the Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>).

Visual arts participates in interdisciplinary programs in art history and visual arts. Visual arts majors may pursue a coordinate major with digital and computational studies, environmental studies, or education. See

the Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>).

Additional Information
Additional Information and Department Policies
Art History

Students who received a minimum score of four on the Art History Advanced Placement exam are exempt from taking ARTH 1100 Introduction to Art History, but they must take an additional course to fulfill the one art history course numbered 1100–1999 for the art history majors and art history minor. In order to receive credit for Advanced Placement or International Baccalaureate work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Majors and minors in art history may double-count one course with another major or minor as long as the course is cross-listed with art history.

Art history majors are also encouraged to take courses in foreign languages and literature, history, philosophy, religion, and the other arts.

Visual Arts

Students who receive a four on the Studio Art: 2-D Design, Studio Art: 3-D Design, or Studio Art: Drawing AP exams, and complete VART 1101 Drawing I, VART 1201 Printmaking I, VART 1401 Photography I, or VART 1601 Sculpture I, with a minimum grade of B-, are eligible to receive a general credit toward their degree, but not major/minor credit. If a student has scores for more than one exam, only 1 total credit will be awarded. For information on credit for International Baccalaureate scores, please see the visual arts department. In order to receive credit for Advanced Placement or International Baccalaureate work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Majors and minors in visual arts may double-count an unlimited number of courses with another major or minor as long as the course is cross-listed with visual arts.

Information for Incoming Students: Art History (p. 68)

Art history offers ways to understand our world and our histories through the visual arts. Instead of looking at what people have written about their lives and experiences, we look at the ways they expressed their ideas, responded to their experiences, and created the world they lived in through paintings, sculptures, buildings, furniture, jewelry, stained glass, and much more. By teaching you how to look closely, Art History provides you with new ways to think about the images and objects around you.

Art history is offering two first-year writing seminars this fall: ARTH 1014 Becoming a Modern Artist: Matisse, Picasso, Valadon and ARTH 1021 Faked, Forged, Stolen, and Repatriated: Crimes Against Art. First-year students are also welcome to join all our 1000- and 2000- level courses. The 1000-level courses offer more general introductions to broad themes in art history: ARTH 1120 Introduction to Art History: The Body in East Asian Art. The 2000-level courses allow students to dive more deeply into specific topics and periods, but there is no expectation that students

have any previous experience with art history: ARTH 2120 Emperors, Caliphs, and Kings: the art of the earlier Middle Ages, ARTH 2135 Sacred: The Art of Devotion in the Middle Ages, ARTH 2230 The Arts of Venice, ARTH 2510 Industry and Imperialism: Nineteenth-Century British Art, and ARTH 2620 American Art I: Colonial Period to the Civil War.

Information for Incoming Students: Visual Arts (p. 69)

VART 1101 Drawing I, VART 1201 Printmaking I, VART 1401 Photography I, VART 1601 Sculpture I or VART 1701 Digital Media I are recommended to all students as a starting place in the visual arts curriculum, regardless of previous studio art experience. These courses have no prerequisites and presume no previous knowledge or aptitude beforehand, only a strong interest in the subject and the willingness to work. Students who have never taken an art class will be strongly welcomed and encouraged.

Materials and fees: an endowed fund (the Kaempfer Fund) will pay the cost of art materials - up to \$600 for photography courses and up to \$300 for other 1000-level courses - for students who have qualified for financial aid.

Introductory credit: student requests to apply AP credit or previous college credit to the major or minor will be discussed by the department on a case-by-case basis. We do not waive the requirement of VART 1101 Drawing I as a major or minor requirement or as a prerequisite for VART 1301 Painting I.

Courses

Art History

ARTH 1013 (c, FYS) Ideas on the Move: Travel, Trade, and the Visual Arts

Non-Standard Rotation. Enrollment limit: 16.

In our increasingly global world, it's easy to forget that people have been traveling and exchanging ideas throughout history. The visual arts have been one of the most effective ways to share ideas, and 'material culture' – the 'stuff' of our everyday lives – is a profound marker of the ongoing exchange of ideas between cultures. Students in this course use works of visual art and written texts to explore the ways in which people and ideas have moved and developed across cultures. Subject matter focuses on the pre-modern world (before c. 1800), with some consideration of more recent material.

Previous terms offered: Fall 2018.

ARTH 1014 (c) Becoming a Modern Artist: Matisse, Picasso, Valadon Pamela Fletcher.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Explores the early careers and art of Henri Matisse, Pablo Picasso, and Suzanne Valadon, artists who came of age at the dawn of the twentieth century. Matisse's family wanted him to be a lawyer; Picasso was a child prodigy; Valadon began her career modeling for the Impressionists. Educated within a traditional model, all three would go on to create radically new art forms, against the backdrop of the artistic, political, and philosophical upheavals of early twentieth century Europe. How did one become an artist at a moment when the very definition of art's appearance and function was in flux? Topics covered include: the role of personal identity in art making, relationships between artists and models, European encounters with art from Africa, the emergence of abstraction, the art market, and the cultural meanings of art and the artist in the modern world. Makes regular use of the rich holdings of the Bowdoin College Museum of Art.

Previous terms offered: Fall 2019.

ARTH 1016 (c, FYS) Art and the Environment: 1960 to Present

Non-Standard Rotation. Enrollment limit: 16.

Since the 1960s, artists in Western Europe and the United States have used the environment as a site of visual exploration, discussion, critique, and action. From Robert Smithson and his ever-disintegrating "Spiral Jetty," to Agnes Denes's "Wheatfield" growing alongside Wall Street, to Mierle Ukeles's installation and performance art in conjunction with the New York Department of Sanitation, to Eduardo Kac's "GFP Bunny," artists have explored the ways in which art objects are in dialogue with the environment, recycling, and biology. Works engage with concepts such as entropy, the agricultural industry, photosynthesis, and green tourism encouraging us to see in new ways the natural world around us. Visits to the Bowdoin College Museum of Art's collections complement the material studied. Writing-intensive course emphasizes firm understanding of library and database research and the value of writing, revision, and critique. (Same as: ENVS 1016)

Previous terms offered: Fall 2018.

ARTH 1017 (c) Envisioning Japan: Landscapes, Cityscapes, and Seascapes

Every Other Fall. Enrollment limit: 16.

How do pictures of places incite pride, wonder, desire, or fear? How can they be mobilized to promote national unity or invite social disintegration? From images of the urban pleasure quarters to scenes of sacred mountains, Japanese artists during the Edo period (1603–1868) produced landscapes, cityscapes, and seascapes to enable people to see and consume the country in new ways. This course focuses on Japanese woodblock prints to unpack how artists invested pictures—such as the renowned Great Wave—with the power to shape attitudes towards nature, belonging, and Japan's place in the world. (Same as: ASNS 1014)

Previous terms offered: Fall 2020.

ARTH 1020 (c) That's Not Art! Understanding Contemporary Art
Non-Standard Rotation. Enrollment limit: 16.

Contemporary art can be challenging. Black squares, white cubes, appropriated advertising images, activist posters, street art, and performances all pose to viewers questions of intention, interpretation, and evaluation. Why did twentieth- and twenty-first-century artists redefine traditional media and invent new forms of artistic practice and experience? How do we know when something is "art?" How do we know if it is good art? Topics covered include: abstraction, appropriation, performance, activism, the workings of the contemporary art market, and theories of value and taste.

Previous terms offered: Fall 2020, Fall 2018.

ARTH 1021 (c) Faked, Forged, Stolen, and Repatriated: Crimes Against Art

Dana Byrd.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines crimes against art, including acts of theft, vandalism, and forgery representing challenges to our shared heritage. Students develop skills in art historical interpretation and ethical reasoning as they engage with historical examples including the history and controversies of such noted stolen cultural artifacts including the Elgin Marbles, the Benin bronze plaques, and Chugach burial masks. Examines the billion dollar "black market" for stolen art, and the legal tools for restoring plundered goods through repatriation.

Previous terms offered: Spring 2021, Fall 2020.

ARTH 1022 (c) Living in a Material World: Thinking and Writing with Art and Architecture

Non-Standard Rotation. Enrollment limit: 16.

We are surrounded by objects and images, and our digitized world offers an endless stream of visual content, from ads and games to photos of friends and influencers. How do these material and visual elements shape our experiences and identities? Each of us will answer this differently, but analyzing the material and visual stuff of our lives offers all of us a powerful tool for understanding and shaping ourselves and our experiences. Examining and analyzing the material and visual world around us, we will develop a starter kit of skills in critical thinking, observation, research, and writing. Working with objects from a range of times and places in campus collections—Ethiopian paintings, medieval prayerbooks, Inuk embroideries—we will encounter new ways to think about works of art and architecture and material and visual culture. We will analyze the arguments of researchers and artists and practice developing and presenting our own arguments through a series of short papers.

Previous terms offered: Fall 2021.

ARTH 1023 (c) From Decoration to Decolonization: Islamic Art in the Museum

Non-Standard Rotation. Enrollment limit: 16.

Museums say as much about the people who make them as they do about the artwork they contain. Using examples from the history of Islamic art as well as Bowdoin College collections, this course examines issues of ethics, representation, and display in relation to contemporary museums. Provides an introduction to art historical interpretation and analysis, with an emphasis on the idea that museum displays are themselves a source that can be studied in depth.

Previous terms offered: Fall 2021.

ARTH 1100 (c, VPA) Introduction to Art History

Every Year. Enrollment limit: 75.

An introduction to the study of art history. Provides a chronological overview of art primarily from Western and East Asian traditions. Considers the historical context of art and its production, the role of the arts in society, problems of stylistic tradition and innovation, and points of contact and exchange between artistic traditions. Equivalent of Art History 101 as a major or minor requirement.

Previous terms offered: Spring 2020, Fall 2018.

ARTH 1120 (c, IP, VPA) Introduction to Art History: The Body in East Asian Art

Peggy Wang.

Every Other Year. Fall 2022. Enrollment limit: 50.

Explores theories, pictures, and practices of the human body in art. Studies depictions of the human form as well as arts that activate the body, including calligraphy, spatial design, performance, and ritual. Focuses primarily on East Asia, ranging from early traditions to contemporary examples. Deliberately sets out to challenge a Western-centric understanding of art and art history by developing ideas about the body that don't make a recourse back to the idealized nude. Draws on cross-cultural comparisons to explore themes of difference and global connectivity in art. Topics to be studied include identity, self-representation, the fragmented body, participant art, collective action, and radical hospitality. Examples of formats and artists to be studied include: shrines, scrolls, paintings, and works by Yoko Ono, Lee Mingwei, and Polit-Sheer-Form-Office. (Same as: ASNS 1865)

ARTH 1300 (c, IP, VPA) Introduction to Art History: Introduction to the Art of Ancient Mexico and Peru

Susan Wegner.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

A chronological survey of the arts created by major cultures of ancient Mexico and Peru. Mesoamerican cultures studied include the Olmec, Teotihuacan, the Maya, and the Aztec up through the arrival of the Europeans. South American cultures such as Chavín, Nasca, and Inca are examined. Painting, sculpture, and architecture are considered in the context of religion and society. Readings in translation include Mayan myth and chronicles of the conquest. (Same as: LACL 1300)

Previous terms offered: Spring 2022, Spring 2021, Fall 2019, Spring 2019.

ARTH 1400 (c, IP, VPA) Introduction to Art History: Art and Architecture of South Asia

Non-Standard Rotation. Enrollment limit: 50.

This course provides an introduction to the art and architectural traditions of South Asia. Students in this course will acquire a broad base of knowledge in the artistic movements, materials, and techniques of the region in their cultural and political contexts. Topics covered include Hindu, Buddhist, Jain, and Islamic devotional art, as well as luxury objects, artistic commodities, and folk and regional artistic practice. Students will also gain an understanding of South Asia's role in the art of global exchange, including the connected histories of the Indian Ocean world, colonialism, and modern national identities. Note: This course is part of the following field(s) of study: South Asia. (Same as: ASNS 1605)

Previous terms offered: Spring 2022.

ARTH 1500 (c, VPA) Introduction to Art History: African Americans and Art

Non-Standard Rotation. Enrollment limit: 50.

Investigates the intersection of African American life and art. Topics include the changing definitions of "African American Art," the embrace of African cultural production, race and representation in slavery and freedom, art as source of inspiration for social movements, and the politics of exhibition. Our mission is to develop art-historical knowledge about this critical aspect of American art history, while facilitating ways of seeing and writing about art. (Same as: AFRS 2660)

Previous terms offered: Fall 2021, Spring 2021, Fall 2019.

ARTH 1700 (c, IP, VPA) Barbarians, Crusaders, Mongols, and More: Artistic Exchange in the Ancient and Medieval World

Non-Standard Rotation. Enrollment limit: 50.

People around the globe have been traveling and exchanging ideas throughout history. The visual arts have been one of the most effective ways to share ideas, and they also serve as profound markers of the ongoing interchange of ideas between cultures and across time. Students in this course use visual art and architecture to investigate the ways in which people and ideas have moved and developed across cultures, and explore at an introductory level some of the core skills of the discipline of art history. Subject matter centers on specific moments of cultural interchange in the ancient and medieval period (up to c. 1500), across a diverse range of geographic areas. This course offers a starting point for anyone interested in art history.

Previous terms offered: Spring 2022.

ARTH 1710 (c, VPA) Building a Virtual Exhibition: A "Hands-On" Experience

Non-Standard Rotation. Enrollment limit: 50.

Students in this course work closely with Bowdoin College Museum of Art Staff to enhance the online presence of an exhibition that will be on view at the BCMA for part of the 2020/21 academic year. Working with medieval art, students are introduced to some of the basic skills of art history and explore digital and online strategies for sharing works of art and cultural knowledge with the general public. Subject matter includes African and European art from the medieval period (c. 500-c.1500). This course offers a starting point for anyone interested in art history.

Previous terms offered: Fall 2020.

ARTH 1720 (c, IP, VPA) Introduction to Art History: Temple and Tomb: Sacred Architecture of the Ancient and Medieval Eras

Kate Gerry.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

Students in this course will be introduced to some of the basic skills and principles of the discipline of art history through the exploration of a select group of monumental buildings from the pre-modern era. Focusing on religious architecture and related monumental arts, including stained glass, mosaics, and architectural sculpture, students will develop skills in critical looking and thinking, and will discover some of the key media, styles, and functions of ancient and medieval architecture. The course will cover many well-known sites, like the Great Pyramids of Giza, the Parthenon, the Dome of the Rock, and the Cathedral of Notre Dame, as well as lesser-known monuments like the Tomb of the Diver and the Beth Alpha Synagogue. This course offers a starting point for anyone interested in art history, and introduces some of the basic skills of the discipline.

ARTH 2090 (c, VPA) Greek Archaeology

Jim Higginbotham.

Every Other Fall. Fall 2022. Enrollment limit: 50.

Introduces the techniques and methods of classical archaeology as revealed through an examination of Greek material culture. Emphasis upon the major monuments and artifacts of the Greek world from prehistory to the Hellenistic age. Architecture, sculpture, fresco painting, and other "minor arts" are examined at such sites as Knossos, Mycenae, Athens, Delphi, and Olympia. Considers the nature of this archaeological evidence and the relationship of classical archaeology to other disciplines such as art history, history, and classics. Assigned reading supplements illustrated presentations of the major archaeological finds of the Greek world. (Same as: ARCH 1101)

Previous terms offered: Fall 2019.

ARTH 2100 (c, VPA) Roman Archaeology

Every Other Fall. Enrollment limit: 50.

Surveys the material culture of Roman society, from Italy's prehistory and the origins of the Roman state through its development into a cosmopolitan empire, and concludes with the fundamental reorganization during the late third and early fourth centuries. Lectures explore ancient sites such as Rome, Pompeii, Athens, Ephesus, and others around the Mediterranean. Emphasis upon the major monuments and artifacts of the Roman era: architecture, sculpture, fresco painting, and other minor arts. Considers the nature of this archaeological evidence and the relationship of classical archaeology to other disciplines such as art history, history, and classics. Assigned reading supplements illustrated presentations of the major archaeological finds of the Roman world. (Same as: ARCH 1102)

Previous terms offered: Fall 2020, Fall 2018.

ARTH 2120 (c, IP, VPA) Emperors, Caliphs, and Kings: the art of the earlier Middle Ages

Kate Gerry.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Explores the art and architecture produced across Europe and the Mediterranean region in the late antique and early medieval periods (c.250-c.1050), with attention paid to how the artistic practices of a number of cultures grew out of the Roman imperial tradition. Students explore the visual characteristics of the art and architecture from this period, and the relationship between early medieval art and the social, religious, and political history of the earlier Middle Ages. Topics include Anglo-Saxon, Byzantine, Carolingian, early Islamic, and Viking art. Students from all majors are welcome.

Previous terms offered: Fall 2020, Fall 2018.

ARTH 2125 (c, IP, VPA) Art of the Islamic World: 7th to 15th Century

Non-Standard Rotation. Enrollment limit: 35.

Surveys and explores the art and architecture of the Islamic world, from its inception in the early seventh century until the eve of the Ottoman Empire in the fifteenth century, with attention paid to the interactions between Islamic peoples and their neighbors in Europe and the Mediterranean. Students will explore a variety of media, including illustrated books, textiles, ceramics, metalwork, and mosaics from the Middle East, Central Asia, North Africa, and Spain, and will consider questions of gender and race. Students in this hybrid lecture/seminar will acquire a broad base of knowledge while exploring certain topics more deeply through readings and discussions.

Previous terms offered: Spring 2020.

ARTH 2126 (c, IP, VPA) Arts of the Islamic Book

Non-Standard Rotation. Enrollment limit: 15.

Books are a way of containing and circulating knowledge, but are also objects to be studied in their own right. The richly illuminated manuscripts produced throughout the Islamic world offer an opportunity to study calligraphy, painting, and ornament in their artistic and cultural contexts. Focusing on the collections of the Bowdoin College Museum of Art, this course presents and in-depth examination of the diverse visual traditions and techniques developed over from the ninth to the nineteenth centuries in the Middle East, North Africa, Central Asia, and the Indian subcontinent. Students in this hybrid lecture/seminar will acquire a broad base of knowledge, while exploring material and thematic topics more deeply through readings, discussions, and hands-on workshops. No foreign language knowledge is necessary, but at least one previous class in Art History, Asian Studies, or Middle East/North African Studies is required. (Same as: ASNS 2755, MENA 2126)

Prerequisites: ARTH 1000 - 2969 or ARTH 3000 or higher or ASNS 1000 - 2969 or ASNS 3000 or higher or MENA 1000 - 2969 or MENA 3000 or higher.

Previous terms offered: Spring 2022.

ARTH 2135 (c, IP, VPA) Sacred: The Art of Devotion in the Middle Ages

Kate Gerry.

Non-Standard Rotation. Fall 2022. Enrollment limit: 14.

This course explores the rich visual tradition of religious art in medieval Europe, with particular attention to the Cult of Saints, a phenomenon that continues to inspire artists working around the globe today. Discussion and research center on College collections, including works from the Wyvern collection, currently on loan at the Bowdoin College Museum of Art. Through readings, discussions, and object-based research projects, students learn about the production and reception of reliquaries, the representations of saints in illuminated manuscripts, sculpture, stained glass, and other media, and the highly personal ways in which medieval people used the visual arts to interact with the sacred. The course focuses on Europe and the Mediterranean basin, with some attention to similar issues in other regions.

Previous terms offered: Spring 2021.

ARTH 2140 (c, VPA) The Gothic World

Non-Standard Rotation. Enrollment limit: 35.

Introduces students to art produced in Europe and the Mediterranean from the twelfth through the early fifteenth century. Following a general chronological sequence, investigates the key artistic monuments of this period in a variety of media, including architecture, painting, manuscript illumination, stained glass, sculpture, and the decorative arts. Explores a particular theme in each class meeting through the close analysis of a single monument or closely related set of monuments, as well as those that students may encounter in future studies.

Previous terms offered: Spring 2022, Fall 2019.

ARTH 2145 (c, VPA) Gold, Paint, and Stone: The Arts of the High Middle Ages

Non-Standard Rotation. Enrollment limit: 35.

The High Middle Ages, or Romanesque period (c. 1000-c.1200), was a moment of enormous cultural and technological development, as people, goods, and ideas moved throughout Europe and the Mediterranean Basin. This course introduces students to the visual arts and architecture produced in western Europe with some comparative material from further afield. Topics will include the pilgrimage and the cult of saints, the development of narrative art, Islamic Spain, and the balance between conceptual art and naturalism that marks the style of this period.

Previous terms offered: Spring 2021, Spring 2019.

ARTH 2200 (c, IP, VPA) Art and Revolution in Modern China

Non-Standard Rotation. Enrollment limit: 35.

Examines the multitude of visual expressions adopted, re-fashioned, and rejected from China's last dynasty (1644-1911) through the Cultural Revolution (1966-1976). Major themes include the tension between identity and modernity, Westernization, the establishment of new institutions for art, and the relationship between cultural production and politics. Formats under study include ink painting, oil painting, woodcuts, advertisements, and propaganda. Comparisons with other cultures conducted to interrogate questions such as how art mobilizes revolution. (Same as: ASNS 2200)

Previous terms offered: Spring 2020.

ARTH 2210 (c, IP, VPA) From Mao to Now: Contemporary Chinese Art
Peggy Wang.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Examines the history of contemporary Chinese art and cultural production from Mao's Cultural Revolution (1966-1976) until today. Traces experiments in oil, ink, performance, installation, video, and photography and considers these media and formats as artistic responses to globalization, capitalist reform, urbanization, and commercialization. Tracks themes such as art and consumerism, national identity, global hierarchies, and political critique. Readings include primary sources such as artists' statements, manifestoes, art criticism, and curatorial essays. (Same as: ASNS 2201)

Previous terms offered: Spring 2021, Fall 2020, Fall 2018.

ARTH 2215 (c, IP, VPA) Art in India

Non-Standard Rotation. Enrollment limit: 35.

Examines mural, manuscript, and single-page painting from the fifth to the twentieth centuries. Questions to be covered include the identification and significance of courtly and regional styles, the role of patronage, and the impact of cross-cultural interactions. Through case studies of technique and artistic practice, this course will also situate the primacy of painting within the cultural and historical context of South Asia, including modern ramifications for connoisseurial analysis and the art market. Examples from major historical and cultural movements will include Buddhist monastic painting, medieval Jain and Sultanate manuscripts, Mughal allegorical and historical painting, Rajput and Pahari poetic and devotional scenes, and folk and commercial art. Through studies of these fundamental belief systems and structures, students will analyze diverse perspectives on South Asian history and culture. (Same as: ASNS 2514)

Previous terms offered: Fall 2021.

ARTH 2220 (c, VPA) The Medici's Italy: Art, Politics, and Religion, 1300-1600

Non-Standard Rotation. Enrollment limit: 35.

An exploration of the painting, sculpture, and architecture from Giotto's revolutionary paintings in 1300 through the fifteenth century with masters such as Donatello and up to High Renaissance giants, Leonardo da Vinci, Titian, Raphael, and Michelangelo. Examines art-making and function within the society that used it, including the role of women as patrons, artists and subjects of art. Readings in translation of sixteenth-century artists' biographies, art criticism, and popular literature. Class will make use of collections in the Bowdoin College Museum of Art, the Boston Museum of Fine Arts, and the Isabella Stewart Gardner Museum in Boston.

Previous terms offered: Fall 2021, Fall 2019.

ARTH 2230 (c, VPA) The Arts of Venice

Susan Wegner.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Venice is distinctive among Italian cities for its political structures, its geographical location, and its artistic production. Its resilience in the face of plague, flood and warfare shines forth in the brilliance of city's fabric and in the vibrantly colored art that ornaments it. This overview of Venetian art and architecture considers Venice's relationships to Byzantium and the Turkish east, Venetian colorism in dialogue with Tuscan-Roman disegno (drawing and composition), and the role of women as artists, as patrons, and as subjects of art. Includes art by the Bellini family, Giorgione, Titian, Veronese, Tintoretto, Tiepolo, Canaletto, and Rosalba Carriera, and the architecture of Palladio. No previous work in art history required.

Previous terms offered: Fall 2020.

ARTH 2240 (c, VPA) Monstrosity and Elegance: Mannerism in European Court Art, 1500-1600.

Non-Standard Rotation. Enrollment limit: 35.

Wealthy rulers vied with one another to collect the rarities being discovered across the world. They collected wonders such as "dragons" and exotic beasts such as giraffes, recording these precious beings in art. They even brought to their courts representatives from the peoples of the Americas, whom they deemed as marvels. At the same time, European culture stressed refinement, cool elegance, and graceful body types in both living humans and art. The resulting artworks show strange, disturbing and intriguing images, all gathered under the term "Mannerism." Using paintings, drawings, prints and medals from the Bowdoin College Museum of Art, this class studies artists such as Michelangelo, Pontormo, and El Greco in the courts in Austria, France, Spain and Italy. Readings in translation of scientific writings, formulas for ideal beauty and the grotesque, and handbooks for court life and manners. No previous work in art history required.

Previous terms offered: Spring 2022, Spring 2019.

ARTH 2270 (c, VPA) Painting with Light: Stained Glass in the Middle Ages and Beyond

Kate Gerry.

Non-Standard Rotation. Spring 2023. Enrollment limit: 14.

Stained glass is considered a hallmark of the European Middle Ages and was perhaps the most important artistic medium of the period. Students in this seminar explore the medium through readings, discussions, and an occasional trip to the museum. Discussion topics will include material and technical aspects of stained glass, its role within political and spiritual discourse, its relationship to architecture, monumental sculpture, and illuminated manuscripts, and the ways in which medieval artists used this medium to display some of the most important stories and ideas of the age. The course focuses on the Gothic period (c. 1140-c. 1500), but students also consider later developments.

ARTH 2320 (c, VPA) Art in the Age of Velazquez, Rembrandt, and Caravaggio

Susan Wegner.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

The art of seventeenth-century Europe. Topics include the revolution in painting carried out by Caravaggio, Annibale Carracci, and their followers in Rome; the development of these trends in the works of Rubens, Bernini, Georges de la Tour, Poussin, and others; and the rise of an independent school of painting in Holland. Connections between art, religious ideas, and political conditions are stressed.

Previous terms offered: Spring 2021.

ARTH 2360 (c, VPA) Art and Politics in Africa

Non-Standard Rotation. Enrollment limit: 16.

In the 2018 Marvel film *Black Panther*, a provocative scene depicts Erik Killmonger talking with a curator about the acquisition of objects at the fictional Museum of Great Britain. The curator identifies an axe from seventh-century Benin. Killmonger disagrees. "It was taken by British soldiers in Benin," Killmonger claims, "but it's from Wakanda," the fictional nation portrayed in the film. This scene presents a starting point for this course's inquiry into issues of politics and African art. The course examines the impact of colonial relations on museum collections and displays of African art today, and the roles of art as political discourse in Africa. Materials analyze how leaders and institutions have used objects to articulate authority and navigate conflict during precolonial and colonial periods, nationalist movements, and the years since countries in Africa gained political independence. Topics address broader theoretical issues of power, appropriation, resistance, and heritage. (Same as: AFRS 2251)

Previous terms offered: Spring 2019.

ARTH 2370 (c, IP, VPA) Traveling Textiles: Cultural Encounters from Trade Routes to the Runway

Non-Standard Rotation. Enrollment limit: 16.

Examines the histories and roles of textiles and clothing in crosscultural exchanges. Course material explores how textiles traveled between Africa, Asia, and Europe through precolonial trade routes to how nineteenth-century African textile designs are transformed on European and American fashion show runways today. The course asks questions about how colonial empires, institutions, artists, and other individuals have used textiles to mediate exchanges with other societies. Textiles from Africa represent dynamic visual expressions to investigate issues relating to cultural representation and constructions of identity and power. From tapestries and quilts to ceremonial cloths and everyday dress, we will explore the making, circulation, and use of textiles and their designs to understand what ideas and beliefs textiles carry and communicate. The course focuses on interactions between societies in Africa and other parts of the world, especially Europe, Asia, and the Americas. (Same as: AFRS 2241)

Previous terms offered: Spring 2019.

ARTH 2380 (c, IP, VPA) African Art and Visual Culture

Non-Standard Rotation. Enrollment limit: 35.

What makes an object or artwork "African?" What meanings does this labeling carry? In short, what is Africa? These questions grapple with how to explain, understand, and represent the arts and visual cultures of an entire continent. Explores the complexities and dynamics of artistic practices in Africa—from masquerades, ivories, architecture, and urban mural paintings to the works of blacksmiths, studio photographers, and contemporary artists. Studying the arts and visual cultures of Africa leads also to an exploration of the political systems, social practices, religious beliefs, and everyday life of many different historical and contemporary societies that sharpen understandings of the diversity across the continent. (Same as: AFRS 2250)

Previous terms offered: Fall 2018.

ARTH 2390 (c, IP) Sacred Icons and Museum Pieces: The Powers of Central African Art

Non-Standard Rotation. Enrollment limit: 16.

Seminar. The art of Central Africa inspired European avant-garde artists from Pablo Picasso to Paul Klee. This course explores art as a historical source. What does the production, use, commerce, and display of art reveal about politics, ideology, religion, and aesthetics? Prior to European colonialism, what was the relationship between art and politics in Central Africa? How did art represent power? What does it reveal about gender relations, social divisions, and cultural ideals? The course then turns to the Euro-American scramble for Central African art at the onset of European colonialism. How did the collection of art, its celebration by European artists, and display in European and American museums transform patterns of production, cultural functions and aesthetic styles of Central African art? The course ends with current debates over the repatriation of African art. Note: This course is part of the following field(s) of study: Africa. This course meets the non-European/ US History requirements. (Same as: HIST 2823, AFRS 2823)

Previous terms offered: Fall 2019.

ARTH 2420 (c, VPA) Realism and Its Discontents: European Art, 1839-1900

Non-Standard Rotation. Enrollment limit: 35.

A survey of European art from the advent of photography to the turn of the century. The nineteenth century witnessed an explosion of urban growth, increasing political and economic power for the middle and working classes, and revolutionary scientific and technological discoveries. How did the visual arts respond to and help shape the social forces that came to define Western modernity? Questions to be addressed include: What was the impact of photography and other technologies of vision on painting's relation to mimesis? How did new audiences and exhibition cultures change viewers' experiences and expectations of art? How did artists respond to the new daily realities of modern urban life, including the crowd, the commodity, railways, and electric light? Artists discussed include Courbet, Frith, Manet, Ford Madox Brown, Julia Margaret Cameron, Whistler, Ensor, Gauguin, and Cézanne.

Previous terms offered: Fall 2019.

ARTH 2430 (c, VPA) Modern Architecture: 1750 to 2000

Non-Standard Rotation. Enrollment limit: 35.

Examines major buildings, architects, architectural theories, and debates during the modern period, with a strong emphasis on Europe through 1900, and both the United States and Europe in the twentieth century. Central issues of concern include architecture as an important carrier of historical, social, and political meaning; changing ideas of history and progress in built form; and the varied architectural responses to industrialization. Attempts to develop students' visual acuity and ability to interpret architectural form while exploring these and other issues. (Same as: ENVS 2431, URBS 2431)

Previous terms offered: Fall 2021, Fall 2018.

ARTH 2440 (c, VPA) Shoot, Snap, Instagram: A History of Photography in America

Non-Standard Rotation. Enrollment limit: 35.

A survey of photography made and experienced in the United States from the age of daguerreotypes until the era of digital image processing. Addresses the key photographic movements, works, practitioners, and technological and aesthetic developments while also considering the social, political, cultural, and economic contexts for individual photographs. Photographers studied include Watkins, Bourke-White, Weegee, and Weems. Readings of primary sources by photographers and critics such as Stieglitz, Sontag, Abbott, and Benjamin bolster close readings of photographs. Builds skills of discussing, writing, and seeing American photography. Incorporates study of photography collections across the Bowdoin College campus.

Previous terms offered: Spring 2022.

ARTH 2450 (c, VPA) The Art of Making and Meaning

Dana Byrd.

Non-Standard Rotation. Spring 2023. Enrollment limit: 12.

A scholarly inquiry into materials and making with an emphasis on historic artifacts made for everyday use. Students will explore fabrication techniques, test the limits of materials, and refine haptic skills through the manipulation of materials, including clay, textiles, wood, and plastic. Through hands-on examination of artifacts in local collections, students develop the language, methodology, and interpretive skills for artifact and material analysis.

Previous terms offered: Fall 2019.

ARTH 2470 (c, VPA) The Bauhaus and its Legacy: Designing the Modern World

Non-Standard Rotation. Enrollment limit: 20.

The centennial of the Bauhaus—the school of modern design opened in 1919 in Weimar, Germany, and closed by the Nazis in 1933—is being celebrated around the world. More than just a school, the Bauhaus gave modernity a distinct physical form by connecting art to nature and industry in new ways. The Bauhaus also advanced the radical notion that modern design had a key social role to play: to improve the lives of all people. The course investigates the social mission, arts, vibrant way of life, and prominent figures at the Bauhaus, many leaders in fields of modern architecture, urbanism, and the arts of design. The course also explores the Bauhaus legacy that flourished throughout the twentieth century, focusing on US and Europe. The Bauhaus changed the world and even today we feel its impact, in the smallest of objects, our built environments, and the cities in which we live. Students will work closely with the Bauhaus exhibition that opens March 1, 2019, at the Bowdoin College Museum of Art and will carry out their own research projects. (Same as: ENVS 2470, URBS 2470)

Previous terms offered: Spring 2019.

ARTH 2510 (c, VPA) Industry and Imperialism: Nineteenth-Century British Art

Pamela Fletcher.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines art produced during Queen Victoria's reign (1837–1901). The Industrial Revolution gave rise to mass culture and consumer society as well as unprecedented amounts of pollution and environmental damage; the twin engines of capitalism and imperialism spawned Britain's vast Empire and activism by the working classes, women, and the colonized peoples of the British Empire transformed the political and social landscape. Victorian artists took seriously the question of how art might engage their changing modern world, and their diverse responses illuminate both nineteenth-century modernity and its continuing legacies. Topics may include: the representation of modern urban life and its moral challenges; depictions of the environment in landscape and animal painting; the invention of photography and mass visual culture; the rise of the modern art market; and episodes in the imperialist history of artistic contact, conflict and extraction between Britain and other nations.

ARTH 2520 (c, VPA) Modern Art

Pamela Fletcher.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

A study of the modernist movement in visual art in Europe and the Americas beginning with post-impressionism and examining in succession: expressionism, fauvism, cubism, futurism, constructivism, Dada, surrealism, the American affinities of these movements, and the Mexican muralists. Modernism is analyzed in terms of the problems presented by its social situation; its relation to other elements of culture; its place in the historical tradition of Western art; and its invocation of archaic, primitive, and Asian cultures.

Previous terms offered: Spring 2020.

ARTH 2540 (c, VPA) Contemporary Art

Non-Standard Rotation. Enrollment limit: 35.

Art of Europe and the Americas since World War II, with emphasis on the New York school. Introductory overview of modernism. Detailed examination of abstract expressionism and minimalist developments; pop, conceptual, and environmental art; and European abstraction. Concludes with an examination of the international consequences of modernist and contemporary developments, the impact of new electronic and technological media, and the critical debate surrounding the subject of postmodernism.

Previous terms offered: Spring 2021, Spring 2019.

ARTH 2560 (c, VPA) Women, Gender, And Sexuality in Western European and American Art, 1500 to Present

Non-Standard Rotation. Enrollment limit: 35.

This course will provide an introduction to the history of women as creators, subjects, and audiences of art in Western Europe and the United States from the Renaissance to the present. How do we (can we?) tell the stories of the forgotten people and identities of the past? What archives and artifacts are available, and how do we account for the gaps? How do we think historically about the variable categories of gender and sexuality? As we grapple with these questions, we will explore a wide range of methods and approaches to visual art that focus on questions of gender and sexuality in an intersectional context, and identify key concepts such as "bodies," "ideologies," and "identities." No previous work in art history required. (Same as: GSWS 2258)

Previous terms offered: Fall 2020, Fall 2018.

ARTH 2620 (c, DPI, VPA) American Art I: Colonial Period to the Civil War
Dana Byrd.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

An investigation of American architecture, sculpture, painting, and decorative arts from their contact-era origins until the Civil War. Emphasis is placed on American art as a distinct tradition shaped by the movement of people and things across the Pacific and Atlantic oceans to a continent populated by indigenous people. Explores how artists engaged and interpreted the world around them in material form, as well as the ways that this production served a host of ideological and aesthetic needs. Methods of art historical interpretation are analyzed and discussed using primary and secondary source readings. Studies original art and artifacts in the Bowdoin College Museum of Art and buildings on the Bowdoin campus and beyond.

Previous terms offered: Spring 2019.

ARTH 2640 (c, VPA) American Art from the Civil War to 1945

Non-Standard Rotation. Enrollment limit: 35.

A survey of American architecture, sculpture, painting, and photography from the Civil War and World War II. Emphasis on understanding art in its historical and cultural context. Issues to be addressed include the expatriation of American painters, the conflicted response to European modernism, the pioneering achievements of American architects and photographers, the increasing participation of women and minorities in the art world, and the ongoing tension between native and cosmopolitan forms of cultural expression. Works with original objects in the Bowdoin College Museum of Art.

Previous terms offered: Fall 2021.

ARTH 2710 (c, IP, VPA) Power and Politics in Pre-modern Chinese Art
Peggy Wang.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Introduces students to Chinese art from the First Emperors terracotta warriors in the third century BCE to the waning of the country's dynastic history in the nineteenth century CE. Following a chronological sequence, explores key mortuary spaces, religious objects, court art, and landscape painting with focus on themes of power and politics. Emphasis is placed on understanding changing art formats and functions in relation to socio-cultural contexts, such as shifts in belief systems, foreign imperial patronage, and the rise of literati expression. Readings include primary sources such as ancestral rites, Buddhist doctrines, imperial proclamations, and Chinese painting treatises. (Same as: ASNS 2020)

Previous terms offered: Spring 2019.

ARTH 3200 (c, VPA) Historicizing the Contemporary: Topics in Recent Chinese Art

Non-Standard Rotation. Enrollment limit: 12.

Identifies and explores key topics in recent publications of contemporary Chinese art. Alongside of subject matter, students analyze usages of socio-political context and methodologies for framing different narratives of contemporary Chinese art. Through studies of individual artists and larger contemporary art trends, students unpack current art histories while also proposing alternative approaches. Readings include monographs, exhibition catalogs, interviews, and systematic reviews of journals. Questions include: What are the challenges of historicizing the present? How does the global art world reconcile the existence of multiple art worlds? How have artists intervened in narratives of contemporary Chinese art? (Same as: ASNS 3070)

Previous terms offered: Spring 2021, Spring 2019.

ARTH 3240 (c, VPA) Leonardo da Vinci and Michelangelo: Science and Art through Drawing

Susan Wegner.

Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

Both Leonardo and Michelangelo produced hundreds of drawings in the service of their imaginative processes in creating great architecture, sculpture, and painting. In addition, both studied the human body through anatomical drawings, while Leonardo expanded his investigations to the bodies of animals, the movement of water, the flight of birds, and countless other natural phenomena. Exploring the theory of disegno (drawing and composing) as a divinely granted power, considers biographies, letters, and notebooks in translation, as well as scholarly literature on the Sistine Chapel frescoes, "The Last Supper," and other monuments now known to us only through drawings. Makes use of works from the collections of the Bowdoin College Museum of Art. Opportunities for hands-on learning of drawing techniques—chalk, pen and ink, wash, metal point—support investigations of these artists' accomplishments.

Prerequisites: ARTH 1100 or Placement in above ARTH 1100.

Previous terms offered: Fall 2020, Fall 2018.

ARTH 3330 (c, VPA) Studies in Seventeenth-Century Art: Caravaggio and Artemisia Gentileschi

Non-Standard Rotation. Enrollment limit: 12.

Contrasts two artists – one male, one female – whose powerful, naturalistic styles transformed European painting in the seventeenth century. Starting with a close examination of the artists' biographies (in translation), focuses on questions of their educations, artistic theories, styles as a reflection of character, and myths and legends of their lives. Also examines the meanings of seventeenth-century images of heroic women, such as Esther, Judith, and Lucretia, in light of social and cultural attitudes of the times.

Prerequisites: ARTH 1100 or Placement in above ARTH 1100.

Previous terms offered: Fall 2021.

ARTH 3350 (c, DPI, VPA) Desire and Difference: Exploring Gender, Sexuality, and Race in Medieval Art

Non-Standard Rotation. Enrollment limit: 12.

Gender, sexuality, race, and other aspects of identity have come to play a huge role in our public and private lives, and these same issues can be key to understanding how people lived and understood their lives in the past. Through in-class discussion and individual research projects, students in this seminar examine intersections of these concerns with the visual arts produced in medieval Europe and the Mediterranean region (c. 500 –c. 1500), gaining a deeper and richer understanding of how people in the past imagined and depicted themselves and their lives, and negotiated their senses of identity. Specific topics covered will include representations of women and minoritized groups, the roles played by women as makers and patrons of art, and the relevance of modern categories of sexuality, gender, and race in the context of medieval studies. (Same as: GSWS 3350)

Previous terms offered: Fall 2021, Spring 2019.

ARTH 3370 (c, IP, VPA) Medieval Art and the Modern Viewer: Building an Exhibition with Wyvern Collection

Non-Standard Rotation. Enrollment limit: 06.

The long-term loan of the Wyvern Collection of medieval art to the BCMA offers an opportunity for hands-on research in a museum setting. Students work directly with medieval works of art to conduct object-based research, develop some of the components of an exhibition, and explore specific aspects of medieval art history. As a group, students develop an exhibition concept and consider questions related to the display of objects. Individually, students research works of art and their cultural context and write museum labels, wall text, and essays. Topics for research and discussion might include religion, gender, and globalism in the Middle Ages or history and theory of collecting and display.

Prerequisites: ARTH 1000 - 2969 or ARTH 3000 or higher.

Previous terms offered: Fall 2019.

ARTH 3490 (c, IP, VPA) Re-mapping Global Contemporary Art

Peggy Wang.

Every Other Year. Fall 2022. Enrollment limit: 12.

Studies competing claims over what it means for contemporary art to be called global. In particular, traces how the controversial category of "global contemporary art" has been used to both perpetuate and resist Western-centered views of the world. Focuses on artworks, exhibitions, and texts that specifically counter Western-centrism in gatekeeping tactics, exclusionary systems of evaluation, and hegemonic art historical narratives. Examples include the 1989 Havana Biennial, 1999 Global Conceptualism: Points of Origin, post-colonial critiques, and recent artworks and exhibits that have sought to re-map global cartographies of contemporary art. Students taking this as an ASNS course will concentrate on examples relevant to their focus of study. (Same as: ASNS 3802)

ARTH 3500 (c) Transatlantic Modernisms: New York/London

Non-Standard Rotation. Enrollment limit: 12.

At the turn of the twentieth century, artists in New York and London grappled with the changes of modernity experienced in two of the largest industrialized cities in the Western world. Exploring new artistic styles and subjects, the artists of the Ashcan School and the Camden Town Group engaged new technologies and communication networks; new relationships between the rural, the urban, and the emerging suburban; the changing population of cities; and fights for social justice around questions of class, ethnicity, race, and gender. This course puts these two national stories into conversation, bringing together works produced on both sides of the Atlantic at a moment of artistic and social revolution. The seminar is part of ongoing planning for an exhibition at the Bowdoin College Museum of Art. Students will help generate an intellectual framework for such an exhibition, including exploring the collection and potential themes and comparisons, and learn some of the skills involved in mounting a loan exhibition.

Previous terms offered: Spring 2021.

ARTH 3570 (c) The Commercial Art Gallery

Pamela Fletcher.

Non-Standard Rotation. Spring 2023. Enrollment limit: 12.

Explores the commercial art gallery as a distinct institutional form, emphasizing its historical and functional differences from other exhibition venues. The class will draw upon theoretical and historical scholarship on museums and exhibition theory, but the primary focus will be uncovering the history of the commercial gallery in Europe and the United States from the late 18th century to the present, and developing a theoretical paradigm within which to locate the form.

Prerequisites: ARTH 1100 or Placement in above ARTH 1100.

Previous terms offered: Spring 2020.

ARTH 3600 (c, VPA) Race and Visual Representation in American Art
Non-Standard Rotation. Enrollment limit: 16.

Students enrolled in the Fall 2020 iteration of the course will have the opportunity to produce online content in support of "There Is a Woman in Every Color: Black Women in American Art," a forthcoming exhibition at the Bowdoin College Museum of Art. (Same as: AFRS 3600)

Prerequisites: ARTH 1000 - 2970 or ARTH 3000 or higher or Placement in above ARTH 1100 or AFRS 1000 - 2970 or AFRS 3000 or higher.

Previous terms offered: Fall 2020.

ARTH 3620 (c, VPA) Winslow Homer and American Art
Dana Byrd.
Every Other Year. Spring 2023. Enrollment limit: 12.

During his extensive career, Winslow Homer (1836-1910) worked in multiple modes, including woodcut prints for the popular press, watercolors, and paintings. In his depictions of freedmen, maimed Civil War veterans, and untamed nature, he provided a penetrating and often disturbing view of post-Civil War America. Over the past fifty years, interpretations of Homer's work have changed dramatically and broadened to include such themes and lenses as race, social class, and intertextuality. Exploration of Homer's oeuvre doubles as an inquiry into the historiography of American Art. Homer topics under consideration are: Civil War paintings, illustrations of leisure, depictions of women and children in the Gilded Age, and landscape and seascape paintings of the Caribbean and Maine. Close study opportunities include sessions at the Bowdoin College Museum of Art, Bowdoin College Special Collections, the Portland Museum of Art, and the Winslow Homer Studio in Prouts Neck, Maine.

Prerequisites: ARTH 2000 - 2969.

Previous terms offered: Fall 2018.

ARTH 3800 (c, VPA) The Thing
Non-Standard Rotation. Enrollment limit: 12.

The study of things, or material culture, has emerged as a multidisciplinary umbrella for the understanding of everyday life. Material culture encompasses everything made or done – clothes worn, houses occupied, art hung on walls, even the way bodies are modified. Exploration of object-based approaches to American culture proceeds through hands-on study of things such as grave markers, great chairs, and girandoles in the Bowdoin College Museum of Art and the historic house museums of Brunswick. Readings include primary sources and scholarly analyses of objects. Assignments enable students to hone descriptive, analytical, and interpretive writing skills.

Prerequisites: ARTH 1100 or Placement in above ARTH 1100.

Previous terms offered: Spring 2022, Spring 2020.

ARTH 3840 (c, VPA) Bad Art: An Alternative History of Modern Art
Non-Standard Rotation. Enrollment limit: 12.

What is the difference between good art and bad? Why do categories of value change over time? Since the last decades of the nineteenth century, a modernist aesthetic valuing formal innovation and absorptive autonomy has been a powerful force in making these distinctions. Examines the modernist evaluation of good art by attending to its opposite: those visual qualities, forms, and media that modernist criticism labeled bad art and cast out of the canon. Topics covered may include narrative and sentimental art, early popular cinema, comic strips and graphic novels, outsider art, regional art, relational aesthetics, and the self-conscious creation of bad art.

Previous terms offered: Spring 2019.

Visual Arts

VART 1101 (c, VPA) Drawing I
James Mullen; Mark Wethli; Mary Hart.
Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

This course is an introduction to drawing, with an emphasis on the development of perceptual, organizational, and critical abilities. Course projects entail objective observation, exploration of the abstract formal organization of graphic expression, and the development of a critical vocabulary of visual principles. Lectures and group critiques support studio projects in various drawing media.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

VART 1201 (c, VPA) Printmaking I
Mary Hart.
Every Semester. Fall 2022; Spring 2023. Enrollment limit: 14.

How do we design images that visually express what we want to communicate? This question is at the heart of the printmaking discipline, which originated in the book and news printing industries and was later adopted as a tool by visual artists. Offers an exploration of image making through traditional and digital craft. Basic printmaking strategies and materials are introduced, such as ink, pressure, stencils, and multiples. Practices fine art print processes (digital, relief, and intaglio) using contemporary formats such as zines, stenciling, found objects, and collaboration. Exposure to historical and contemporary examples of printmaking through library special collections and museum visits, trips to local print shops and artists' studios, demonstrations, visiting artist projects, and critiques supplement learning in the printmaking studio. Prior experience with other methods of image making, such as drawing or photography, is not required.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

VART 1301 (c, VPA) Painting I

Mark Wethli; James Mullen.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

An introduction to painting, with an emphasis on the development of perceptual, organizational, and critical abilities. Studio projects entail objective observation and analysis of still-life, landscape, and figurative subjects; exploration of the painting medium and chromatic structure in representation; and the development of a critical vocabulary of painting concepts. Lectures and group critiques augment studio projects in painting media.

Prerequisites: VART 1101.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

VART 1401 (c, VPA) Photography I

Michael Kolster.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

Photographic visualization and composition as consequences of fundamental techniques of black-and-white still photography. Class discussions and demonstrations, examination of masterworks, and field and laboratory work in 35mm format. Students are encouraged to provide their own 35mm film manually adjustable cameras, but the department has cameras for loan if necessary.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

VART 1601 (c, VPA) Sculpture I

Jackie Brown; Audrey Shakespear.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 14.

An introduction to sculpture, with emphasis on the development of perceptual, organizational, and critical abilities. Studio projects entail a variety of sculptural approaches, including exploration of the structural principles, formal elements, and critical vocabulary of the sculpture medium. Lectures and group critiques augment studio projects in paper, wood, and other media.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

VART 1701 (c, VPA) Digital Media I

Deepanjan Mukhopadhyay.

Non-Standard Rotation. Fall 2022; Spring 2023. Enrollment limit: 18.

Students in this course will learn about the emergence of digital media, its relationship to the internet, and the cultural and technical aspects of contemporary digital media-based art through studio projects, lectures, demonstrations, and readings. Students will examine the role of digital culture and networked society in the context of art. Using front-end coding as an artistic tool and process, students will produce studio projects. The course will cover basic principles of web design via HTML and CSS, basic understanding and production of digital media files such as animated GIFs and transparent PNGs, and basic website hosting.

Previous terms offered: Spring 2022, Fall 2021, Fall 2020, Spring 2020, Fall 2018.

VART 2101 (c, VPA) Drawing II

James Mullen.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of the principles introduced in Visual Arts 1101, with particular emphasis on figurative drawing. Studio projects develop perceptual, creative, and critical abilities through problems involving objective observation, gestural expression and structural principles of the human form, studies from historical and contemporary examples, and exploration of the abstract formal elements of drawing. Lectures and group critiques augment studio projects in various drawing media.

Prerequisites: VART 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

VART 2201 (c) Printmaking II

Non-Standard Rotation. Enrollment limit: 14.

A continuation of the principles introduced in Visual Arts 1201, with particular emphasis on independent projects.

Prerequisites: VART 1101 or VART 1201.

Previous terms offered: Spring 2020.

VART 2202 (c, VPA) The Living Print

Non-Standard Rotation. Enrollment limit: 18.

Through traditional and digital print media, we will explore how prints function and "live" in the common places we inhabit. Silkscreen and letterpress printing, laser-cut, and woodcut techniques will be introduced as we make images by hand and with computers. Installation, book arts, wearable art, and text-based printmaking projects will provide an aesthetic framework for exploring concepts in contemporary printmaking. Studio projects will be supported by critical discussions, museum visits, and field research about historic print examples, zines and posters, animation works, and installations.

Prerequisites: VART 1201 or VART 1101 or VART 1401.

Previous terms offered: Spring 2019.

VART 2203 (c, VPA) The Printed Book

Every Other Year. Enrollment limit: 12.

The Printed Book introduces students to methods of designing and creating artist's books, a visual art medium that uses the form or function of "book" as inspiration. With an emphasis on design, visual storytelling, and studio technique, students explore the printed page, sequenced imaging, and image/object hybrids through a variety of book structures. Students create and analyze book constructions through hands-on studio work, group and individual critiques, and the study of the cultural and historical significance of books. Readings, lectures, and field trips to library special collections both on and off campus support studio classroom exercises.

Prerequisites: VART 1101 or VART 1201 or VART 1601.

Previous terms offered: Spring 2022.

VART 2301 (c, VPA) Painting II

Non-Standard Rotation. Enrollment limit: 18.

A continuation of the principles introduced in Visual Arts 1301, with studio problems based on direct experience.

Prerequisites: VART 1301.

Previous terms offered: Fall 2021, Fall 2019.

VART 2302 (c) Landscape Painting

James Mullen.

Every Other Fall. Fall 2022. Enrollment limit: 18.

A continuation of principles introduced in Visual Arts 1301, with an emphasis on landscape painting. Studio projects investigate various relationships to nature through painting at a variety of sites and through the changing seasons of the coastal landscape. Painting activity is augmented with readings and presentations to offer a historical perspective on different languages, approaches, and philosophies in relation to the pictorial interpretation of landscape experience.

Prerequisites: VART 1301.

Previous terms offered: Fall 2018.

VART 2401 (c, VPA) Large Format Photography

Non-Standard Rotation. Enrollment limit: 18.

Review and expansion of concepts and techniques fundamental to black-and-white photography, with exploration of image-making potentials of different formats such as 35mm and view cameras. Seminar discussions and field and laboratory work. Students are encouraged to provide their own 35mm film manually adjustable cameras, but the department has cameras for loan if necessary.

Prerequisites: VART 1401.

Previous terms offered: Spring 2022.

VART 2402 (c, VPA) Photography and Color

Michael Kolster.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

A continuation of principles encountered in Visual Arts 1401, with an added emphasis on the expressive potential of color. Cameras of various formats, from the 35mm to the 4x5, are used to complete assignments. Approaches to color film exposure and digital capture, manipulation, and printing are practiced and the affect of color is examined. Through reading assignments, slide presentations, and discussions, students explore historical and cultural implications of color photography. Weekly assignments and group critiques structure class discussion.

Prerequisites: VART 1401.

Previous terms offered: Spring 2021, Fall 2019.

VART 2403 (c, VPA) Documentary Photography

Non-Standard Rotation. Enrollment limit: 18.

Sustained photographic exploration of situations that appear unfamiliar or foreign to the student's experience. A consideration of connections between the different moments encountered and described by the camera, followed with written and further visual articulation of discoveries made from these insights. Narrative strategies, viewer expectations, and the role of the image in the dissemination of knowledge are central concerns of critiques, discussions, and readings. Photographic prints to be produced only through the exposure of black-and-white film and traditional darkroom techniques. Final project consists of a book, exhibit, or publishable article employing both text and photographs.

Prerequisites: VART 1401.

Previous terms offered: Spring 2019.

VART 2405 (c, VPA) Photo Seminar

Michael Kolster.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

An extension of principles and techniques developed in Visual Arts 1401, with increased emphasis on independent projects. Seminar discussion and critiques, and field and laboratory work. Participants must provide their own non-automatic 35mm camera.

Prerequisites: VART 1401.

Previous terms offered: Spring 2020.

VART 2406 (c, VPA) Darkroom Techniques and Analog Photographic Process

Non-Standard Rotation. Enrollment limit: 12.

Students will pursue projects using analog photographic processes. Exposure and development of film, production of prints in wet darkroom, and exploration of other analog methods of image production will be covered. Discussions, critiques, and demonstrations will comprise most of the class sessions.

Prerequisites: VART 1401.

Previous terms offered: Fall 2021.

VART 2601 (c, VPA) Sculpture II

Non-Standard Rotation. Enrollment limit: 18.

A continuation of principles introduced in Visual Arts 1601, with particular emphasis on independent projects.

Prerequisites: VART 1601.

Previous terms offered: Fall 2021, Fall 2020.

VART 2602 (c, VPA) Sculpture - Mold Making and Casting

Every Other Year. Enrollment limit: 18.

Course builds on the use of everyday objects from Sculpture I and introduces advanced mold making and casting techniques. Students engage with a wide range of materials including clay, concrete, plaster, rubber, wax, and alternative materials like chocolate and soap. Through this process, students can alter and reimagine familiar everyday objects to explore how materials, forms, and images convey meaning in life and culture. Additional themes include art-by-instruction and installation.

Prerequisites: VART 1601.

Previous terms offered: Spring 2019.

VART 2603 (c, VPA) Armature and Surface: The Body

Audrey Shakespear.

Non-Standard Rotation. Spring 2023. Enrollment limit: 14.

A continuation of the principles introduced in Visual Arts 1601, with particular emphasis on figurative sculpture. This course examines the connections between surfaces and the structures that support them, using the human figure and its underlying armature as a primary example. In the first half of the semester, students will sculpt a scale model of the skeletal structure, muscles, and tendons comprising the human body. In the second half of the semester, students will work on body casting and a subsequent self-directed project. We will be using a variety of materials including but not limited to wood, metal, Plastilina, Algasafe, and plaster. Throughout the semester we will consider a wide range of reference materials, from traditional plaster casts to contemporary 3D body scanning and digital models.

VART 2701 (c, VPA) Digital Media II: New Media Beyond the Screen

Deepanjan Mukhopadhyay.

Every Spring. Fall 2022. Enrollment limit: 12.

This studio art course will introduce students to artworks rooted in digital media that occupy spaces and sites beyond stationary single screens. Students will explore new media practices and produce art projects using contemporary and emerging technologies, processes, and sites, including but not limited to microcomputers (Raspberry Pi) or microcontrollers (Arduino), augmented/virtual reality devices, video game environments, 3D printing, and video sculptures.

Prerequisites: VART 1000 - 2969 or VART 3000 or higher.

Previous terms offered: Spring 2022.

VART 3030 (c) Site-Specifics: Production of Socially Engaged Media

Non-Standard Rotation. Enrollment limit: 18.

Guided Independent Studio Practice. Students gain an understanding of how digital media technologies can serve as tools for creative cultural practice through the production of site-specific, socially engaged video, sound, and new media artworks. Site visits and meetings with community organizations will contribute to the development of works distributed and displayed through mobile devices, projection, installation and online platforms. Lectures, readings, and discussions provide a historical overview of the intersection of site-specificity and community-based sound and video works. Students develop technical skills in camerawork, lighting, audio recording, and editing, and are introduced to video and sound artists who consider race, class, gender, sexuality, labor and environmental politics. (Same as: DCS 3030)

Prerequisites: VART 1000 - 1999.

Previous terms offered: Spring 2019.

VART 3501 (c) Art, Science, and the Environment

Non-Standard Rotation. Enrollment limit: 18.

Guided independent studio practice. Explore crosspollination between art, science, and the environment through hands-on projects while also gaining exposure to a diverse range of contemporary artworks and interdisciplinary projects. Early assignments guide students through considerations for form, process, and meaning, followed by an emphasis on self-directed projects. (Same as: ENV 2433)

Prerequisites: VART 1100 - 2969.

Previous terms offered: Spring 2020.

VART 3502 (c) Abstraction

Non-Standard Rotation. Enrollment limit: 18.

Guided Independent Studio Practice. Through the study of interdisciplinary media and studio practice, explores abstraction in historical and contemporary contexts in terms of form, content, process, and meaning. After guided assignments, the emphasis shifts to self-directed projects. Choice of media to be determined jointly by faculty and students in the course.

Prerequisites: VART 1100 - 2969.

Previous terms offered: Spring 2022.

VART 3503 (c) Installation Art

Audrey Shakespear.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

Guided Independent Studio Practice. An exploration of installation art in the context of contemporary practice, especially as a means to transform space, create an environment, or offer a visceral experience. Early assignments guide students through considerations for form, content, process, and meaning, followed by an emphasis on self-directed projects. Choice of media to be determined jointly by faculty and students.

Prerequisites: Two of: VART 1100 - 2969 and VART 1100 - 2969.

Previous terms offered: Spring 2021, Fall 2018.

VART 3701 (c, VPA) Humans & Machines

Deepanjan Mukhopadhyay.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

Humans & Machines is a studio art course that explores the increasingly complex and intertwined relationships between humans and machines, especially those defined by emerging digital technologies. Through independent, self-guided projects students will investigate and criticize how our tendency to see these relationships in oppositional terms, such as 'consumer vs. producer', 'master vs. slave', and 'automation vs. labor' influences how we interact with technology and each other. Concepts and techniques involved in contemporary interdisciplinary art practices that explore similar themes will be introduced through discussions, visiting artists, and class critiques. Students will also be exposed to interdisciplinary technical approaches in digital fabrication that use newer technologies such as 3D printers and laser cutters to inform and support traditional art practices such as drawing, painting, sculpture, photography, printmaking, and performance.

VART 3800 (c) Art and Time

Non-Standard Rotation. Enrollment limit: 18.

Guided Independent Studio Practice. An exploration of the role of time in the visual arts. Through class assignments and independent projects, examines how artists can invoke and transform time. Attention given to historical and contemporary precedents. Seminar discussions, field trips, and class critiques.

Prerequisites: Two of: VART 1100 - 2969 and VART 1100 - 2969.

Previous terms offered: Fall 2020, Fall 2019, Fall 2018.

VART 3801 (c) Narrative Structures

Non-Standard Rotation. Enrollment limit: 18.

Guided Independent Studio Practice. Explores narrative content, forms, processes, meanings, and approaches in the visual arts, especially in the context of contemporary practice, through interdisciplinary media, as determined jointly by faculty and students in the course.

Prerequisites: Two of: VART 1100 - 2969 and VART 1100 - 2969.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

VART 3902 (c) Advanced Studio

Audrey Shakespear.

Every Spring. Spring 2023. Enrollment limit: 18.

Guided Independent Studio Practice. Concentrates on strengthening critical and formal skills as students start developing an individual body of work. Includes periodic reviews by members of the department and culminates with a group exhibition at the conclusion of the semester.

Prerequisites: VART 3000 or higher.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

Asian Studies

Overview & Learning Goals

Overview

The Asian Studies Program offers an interdisciplinary approach to the study of Asia that spans the regions of East Asia, South and Southeast Asia, and the Asian diaspora. In addition to language study, students may

take courses in anthropology, art history, cinema, gender and sexuality studies, government, history, literature and culture, music, religion, and sociology. For the major, each student is required to concentrate in a geographic area or discipline, acquire a working proficiency in one of the languages of East or South Asia, develop theoretical or methodological sophistication, and demonstrate a degree of applied specialization. These principles are reflected in the requirements outlined below.

Learning Goals

The Asian Studies Program provides a multidisciplinary curriculum that develops knowledge regarding the history, politics, religions, societies, and visual and literary cultures of East Asia and South Asia.

Majors concentrate on a geographical area (China, Japan, South Asia, or East Asia) or pursue a comparative study of several Asian areas through a sustained focus on a discipline (e.g., government, history, literature and visual culture, or religion). This is combined with sustained training in a relevant Asian language.

Besides being multidisciplinary, the Asian studies major also emphasizes broad temporal and regional scope; students thus pursue at least one course outside their chosen area of focus as well as at least one course each in premodern and modern Asia.

A fair number of Asian studies majors are double majors, finding fruitful connections between Asian studies and disciplines such as political science, economics, art history, and environmental studies.

In the Asian Studies Program, students will develop the following skills:

1. Learn about the language, literature, religion, visual culture, gender relations, history, and politics of a non-Western region and cultivate alternative perspectives on globalization;
2. Develop a broad historical and cross-regional understanding of Asia;
3. Demonstrate basic proficiency in an East Asian language consistent with two years of academic study at Bowdoin; for South Asia majors, this expectation is met by intensive language study for one semester in an approved study-away program;
4. Read primary texts critically and situate them in their historical, social, cultural, and political contexts, as well as interrogate key assumptions in secondary texts and provide informed responses and critiques;
5. Write analytical arguments and speak clearly and articulately about Asia and its diaspora; and
6. Conduct independent research using primary and secondary sources, applying theories and methods developed within the discipline or field.

Options for Majoring or Minor in the Program

Students may elect to major in Asian studies or to coordinate a major in Asian studies with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in Asian studies, Chinese, or Japanese.

Program Website (<https://www.bowdoin.edu/asian-studies/>)

Faculty

Christopher Heurlin, *Program Director*Jen Conner, *Program Coordinator*

Professor: Shu-chin Tsui (Cinema Studies)

Associate Professors: Christopher Heurlin (Government), Belinda Kong (English), Henry C. W. Laurence (Government), Vyjayanthi Ratnam Selinger†, Rachel L. Sturman (History)**, Peggy Wang (Art History)

Assistant Professors: Sakura Christmas (History), John Kim, Claire Robison (Religion)

Senior Lecturers: Hiroo Aridome, Xiaoke Jia

Lecturer: Jing Xie

Visiting Faculty: Ayami Morita

Contributing Faculty: Connie Y. Chiang, David Collings, Rachel Connelly, Shruti Devgan, Nancy E. Riley, Vineet Shende

Faculty/Staff Website (<https://www.bowdoin.edu/asian-studies/faculty-and-staff/>)

Requirements

Asian Studies Major

Students major in Asian studies by focusing on a particular geographic and cultural area— China, Japan, East Asia, or South Asia—or by specializing in a discipline. Eight courses are required in addition to the study of an Asian language.

Language Requirements

Two years of an East Asian language, or one year of a South Asian language, or the equivalent through intensive language study.

- In addition to the above language requirement, students may apply up to three advanced intermediate (2205–2206) or advanced (3307–3309) East Asian language courses toward the total of eight required courses.
- The College does not directly offer courses in any South Asian language. Arrangements may be made with the director of the program and the Office of the Registrar to transfer credits from another institution. Students should consult with their advisors on choosing an off-campus and/or study abroad program that will meet this language requirement.

Area-Specific or Discipline-Based Requirements

Area-Specific Option Requirements

A concentration in China, Japan, East Asia, or South Asia requires eight courses, six to seven of which must focus on the geographical area of specialization, with up to two courses in an area outside that specialization.

- Students specializing in China must take one pre-modern course in China (2000–2049, 2750) and one modern course in China (2050–2249).
- Students specializing in Japan must take one pre-modern course in Japan (2250–2299) and one modern course in Japan (2300–2499).
- Students focusing on South Asia must take courses in at least two of the following disciplines:
 - Anthropology (1026–1038), (1550–1774), (2500–2749), or (2750–2969)
 - History (1026–1038), (1550–1774), (2500–2749), or (2750–2969)
 - Religion (1026–1038), (1550–1774), (2500–2749), or (2750–2969)

Discipline-Based Option Requirements

Students must consult with their advisor concerning course selection.

- At least five courses must be in the chosen discipline: e.g., government, history, literature and visual culture (English, cinema

studies, and art history), religion, or any other approved discipline.

One of these five courses must be an advanced course (3000–4051) in the discipline of focus.

- Three remaining courses must explore related themes or relate to the student's language study. The study of an Asian language must be in one of the student's areas of study.

Additional Notes for Majors

Additional notes concerning both area-specific and discipline-based options:

- A senior seminar (3000–4051) is required and must be taken at Bowdoin.
- Asian studies majors may not also minor in Asian studies, Chinese or Japanese.

Asian Studies Minor

Students minor in Asian studies by taking five courses. Of these five, one may be an advanced language course (2205–3309). There are no area-based, disciplinary, or period requirements to the Asian studies minor.

Chinese Language Minor

Students minor in Chinese language by taking five courses. Of these five:

- four courses are required in Chinese; and
- one additional course may be either an advanced Chinese language course or a literature, film, art history, or visual culture course focused on China at any course level.

Students who have a background in Chinese must take four language courses from the point where they are placed in the placement exam.

Japanese Language Minor

Students minor in Japanese language by taking five courses. Of these five:

- four courses are required in Japanese; and
- one additional course may be either an advanced Japanese language course or a literature, film, art history, or visual culture course focused on Japan at any course level.

Students who have a background in Japanese must take four language courses from the point where they are placed in the placement exam

Additional Information

Additional Information and Program Policies

Major and Minors Policies

- One first-year writing seminar can count toward the major or minors;
- One course taken with the Credit/D/Fail grading option may count toward the major or minors as long as a CR (credit) is earned; if the course is taken for the major, it must not be at the 3000 level;
- Students must earn a grade of C- or better for a course to count toward the major or minors;
- Intermediate and advanced level independent studies count toward both the major and the minors. There is no limit on the number of

independent studies which may count toward the major and the minors; and

- One course may be allowed to double-count toward the major or minors.
- Advanced Placement and International Baccalaureate scores, in addition to the language placement exam, are only used for placement.

Off-Campus Study

Study abroad is highly recommended. Established programs in the People's Republic of China, Hong Kong, and Taiwan are available for students interested in China. Students are particularly encouraged to attend the ACC, CET, and IUP programs and the Middlebury Program in Kunming. The SILS at Waseda University, IES at Nanzan University, and JCMU programs are recommended for students interested in Japan, but students may select another program based on their academic interests. Students should consult with their advisors and the Asian studies office or website, as well as the Office of International Programs and Off-Campus Study, for information about these and other programs.

Up to three credits from off-campus study (excluding first- and second-year language courses) may count toward the major. Up to two credits from off-campus study (excluding language courses) may count toward the minors.

Program Honors

Students contemplating an honors project in Asian studies should have the following:

- a GPA of B+ or higher in program course offerings, or within their track of concentration;
- a clearly articulated and well-focused research topic; and
- a high measure of academic motivation and commitment.

An honors project in Asian studies is a significant scholarly undertaking. It is at once an opportunity and a responsibility. It allows students to conduct intensive research in an area of their choosing, work closely with several faculty advisors, and contribute their voice to an ongoing scholarly dialogue. It takes students into the library and sometimes beyond campus in search for materials and ideas that students make their own. It is, in many ways, what faculty members do in their own scholarly work.

Students interested in pursuing an honors project in Asian studies are highly encouraged to consult with their advisors early in the spring semester of their junior year. Honors projects require two semesters of work and both semesters may count towards major requirements.

Information for Incoming Students (p. 84)

Students considering an Asian Studies major should be advised that majors are required to take two years of an East Asian language (Chinese or Japanese) or the equivalent of one intensive year of a South Asian language (for example, Hindi, which is not offered at Bowdoin but can be accomplished through study abroad programs). Introductory Chinese and Japanese classes can only be taken in the fall semester and continue sequentially in the spring. Taking Japanese or Chinese language in their first semester will help students prepare for an Asian Studies major and make it easier to study abroad in Asia if they wish.

Students who have studied Japanese/Chinese in high school should have received a placement recommendation based on their performance on the placement test this summer and their language consultation. Any student who was unable to take the placement exam should consult with a faculty member in Japanese/Chinese as soon as possible.

For questions about Chinese language, please contact Professor Xiaoke Jia (<https://www.bowdoin.edu/profiles/faculty/xjia/>). For questions about Japanese language, please contact Professor Hiroo Aridome (<https://www.bowdoin.edu/profiles/faculty/haridome/>).

Courses

Asian Studies

ASNS 1014 (c) Envisioning Japan: Landscapes, Cityscapes, and Seascapes

Every Other Fall. Enrollment limit: 16.

How do pictures of places incite pride, wonder, desire, or fear? How can they be mobilized to promote national unity or invite social disintegration? From images of the urban pleasure quarters to scenes of sacred mountains, Japanese artists during the Edo period (1603–1868) produced landscapes, cityscapes, and seascapes to enable people to see and consume the country in new ways. This course focuses on Japanese woodblock prints to unpack how artists invested pictures—such as the renowned Great Wave—with the power to shape attitudes towards nature, belonging, and Japan's place in the world. (Same as: ARTH 1017)

Previous terms offered: Fall 2020.

ASNS 1017 (c) Global Asian Fantasy Fiction

Belinda Kong.

Every Other Fall. Fall 2022. Enrollment limit: 16.

Focuses on contemporary anglophone fantasy fiction of Asian-inspired worlds by writers of East and Southeast Asian descent. Examines how authors draw on diverse Asian genres such as the Chinese martial arts and magic cultivation epic, Hong Kong triad and gangster film, Korean fox and tiger myth, Singaporean and Malaysian ghost tale, and broadly Asian imperial court drama to address issues of gender and sexual identity, racial and class politics, empire and geopolitics, nationhood and state power, and historiography and literary representation. Authors may include Kat Cho, Zen Cho, Rebecca Kuang, Fonda Lee, Russell Lee, Yoon Lee, Ken Liu, Shelley Parker-Chan, Nghi Vo, Neon Yang, and Xiran Jay Zhao (Same as: ENGL 1017)

ASNS 1020 (c) Japanese Animation: History, Culture, Society

Non-Standard Rotation. Enrollment limit: 16.

Animation is a dominant cultural force in Japan and perhaps its most important cultural export. Examines the ways Japanese animation represents Japan's history and society and the diverse ways in which it is consumed abroad. How does animation showcase Japanese views of childhood, sexuality, national identity, and gender roles? How does its mode of story-telling build upon traditional pictorial forms in Japan? Focuses on the aesthetic, thematic, social, and historical characteristics of Japanese animation films; provides a broad survey of the place of animation in twentieth-century Japan. Films include "Grave of Fireflies," "Spirited Away," "Ghost in the Shell," "Akira," and "Princess Kaguya." (Same as: CINE 1020)

Previous terms offered: Fall 2020, Fall 2018.

ASNS 1036 (c) Commodity Life: Objects and Histories of India

Every Fall. Enrollment limit: 16.

What kinds of meanings and histories are held within objects? Uses the lens of four objects in the Indian subcontinent—rice, textiles, yoga, and photography—to trace histories of knowledge and skill, of commodification and global circulation, of power relations, and of personal attachments that these objects have generated. Central is thinking through the creative but also power-laden processes of making, using, and interpreting objects. This approach to the creative potential of analysis infuses class writing, revision, and discussion. Note: This course is part of the following field(s) of study: South Asia. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 1039)

Previous terms offered: Fall 2021.

ASNS 1042 (c, FYS) Dystopian Americas

Non-Standard Rotation. Enrollment limit: 16.

Explores recent dystopian fiction by multicultural writers in English who imagine America's near futures. While the dystopian genre has long been used to challenge prevailing power structures, we focus on works that further feature minority protagonists, combining examinations of race and ethnicity, gender, sexuality, and class in relation to contemporary themes of climate change, immigration, terrorism, globalization, and biotechnology. Authors include Margaret Atwood, Octavia Butler, Omar El Akkad, Chang-rae Lee, and Sabrina Vourvoulias. Also introduces the fundamentals of college-level writing, from a review of grammar and mechanics to discussions of textual analysis, thesis development, organizational structure, evidence use, synthesis of critics, and research methods. (Same as: ENGL 1015)

Previous terms offered: Fall 2018.

ASNS 1044 (c) Asia Noir: Crime Fiction and Film in East Asia

Non-Standard Rotation. Enrollment limit: 16.

Examines the genre of crime, mystery, and detective fiction in East Asian literature and cinema. Asks how did writers and filmmakers from China, Japan, and Korea imagine and represent criminality as both a moral and aesthetic problem? How did their works reflect and shape social concerns around crime and punishment; deviance and norms; objective and subjective truth, knowledge and power; and the value of popular entertainment? And how did these attitudes and forms evolve over time, under the pressures of tradition, modernity, and globalization? Possible texts by: Chen Xiaoping, Akutagawa Ryūnosuke, Edogawa Rampo, Tanizaki Jun'ichirō, Murakami Haruki, Kim Un-su, Jeong You-jeong, and Bong Joon-ho. All works read in English. Does not presume any knowledge of East Asia.

Previous terms offered: Fall 2021.

ASNS 1048 (b) People Like Us: Class, Identity, and Inequality

Non-Standard Rotation. Enrollment limit: 16.

Our socioeconomic class shapes who we are. At the same time, class is a powerful form of inequality. We use three ethnographic case studies of class (in China, India, and in the U.S.), along with fiction, poetry, and film, to explore the following questions: How is class "performed" and interpreted in different cultures? How do class identities feed back into systems of inequality? How does class intersect with other forms of identity and inequality, such as gender, race, and caste? Key theorists are also brought into play. (Same as: ANTH 1029)

Previous terms offered: Fall 2021.

ASNS 1185 (b, IP) Introduction to Africa-China Relations

Non-Standard Rotation. Enrollment limit: 50.

Chinese and some African government officials speak of Africa-China relations as a "win-win" partnership, "traditional friendship", and "brotherhood" predicated on historical, mutual marginalization by the West. Despite this, China and individual African countries remain highly unequal in their economic and political strength and global significance. There is also great diversity among the African Union's fifty-four states in their responses to and engagement with Beijing. Is it possible in this situation to have symmetrical bilateral relations? How do African leaders shape relations between their nation and China? Is China's engagement with African countries actually promoting development on the continent? Focusing on three key interaction points—precolonial Africa, the Bandung era (1955-1999), and "Going Out" (1999-present) — students will become acquainted with the actors, institutions, and domestic and global conditions driving engagement between the two regions. (Same as: AFRS 1185)

Previous terms offered: Spring 2020.

ASNS 1560 (c, IP) Merchants, Mughals, Mendicants: India and the Early Modern World

Non-Standard Rotation. Enrollment limit: 50.

Introductory exploration of the history of the Indian subcontinent and its connections to the broader world in an era shaped by the vibrant movement of people, goods, and ideas across the Indian Ocean, Europe, and Central Asia. Note: This course is part of the following field(s) of study: South Asia. It also fulfills the non Euro/US and pre-modern requirements for history majors and minors. (Same as: HIST 1440)

Previous terms offered: Fall 2019.

ASNS 1605 (c, IP, VPA) Introduction to Art History: Art and Architecture of South Asia

Non-Standard Rotation. Enrollment limit: 50.

This course provides an introduction to the art and architectural traditions of South Asia. Students in this course will acquire a broad base of knowledge in the artistic movements, materials, and techniques of the region in their cultural and political contexts. Topics covered include Hindu, Buddhist, Jain, and Islamic devotional art, as well as luxury objects, artistic commodities, and folk and regional artistic practice. Students will also gain an understanding of South Asia's role in the art of global exchange, including the connected histories of the Indian Ocean world, colonialism, and modern national identities. Note: This course is part of the following field(s) of study: South Asia. (Same as: ARTH 1400)

Previous terms offered: Spring 2022.

ASNS 1770 (c, IP) Epics Across Oceans

Non-Standard Rotation. Enrollment limit: 50.

Introduces students to the classic Indian epics that form a core literary and cultural tradition within South and Southeast Asia: the Ramayana and the Mahabharata. Examines how the epics were adapted across different kingships and polities in South and Southeast Asia, becoming part of the traditional culture of almost every part of this vast region. Since the royal patrons and the heroes of these epics were often linked, the manner in which the epics were told reveals the priorities of the different regions. Drawing on film, graphic novels, and multiple performance genres, explores the continuous reworking of these epics for both conservative and radical ends, from ancient India to the present day. (Same as: REL 1188)

Previous terms offered: Fall 2020, Fall 2018.

ASNS 1865 (c, IP, VPA) Introduction to Art History: The Body in East Asian Art

Peggy Wang.

Every Other Year. Fall 2022. Enrollment limit: 50.

Explores theories, pictures, and practices of the human body in art. Studies depictions of the human form as well as arts that activate the body, including calligraphy, spatial design, performance, and ritual. Focuses primarily on East Asia, ranging from early traditions to contemporary examples. Deliberately sets out to challenge a Western-centric understanding of art and art history by developing ideas about the body that don't make a recourse back to the idealized nude. Draws on cross-cultural comparisons to explore themes of difference and global connectivity in art. Topics to be studied include identity, self-representation, the fragmented body, participant art, collective action, and radical hospitality. Examples of formats and artists to be studied include: shrines, scrolls, paintings, and works by Yoko Ono, Lee Mingwei, and Polit-Sheer-Form-Office. (Same as: ARTH 1120)

ASNS 2002 (c, IP) The Foundations of Chinese Thought

Guo Jue.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Addresses Chinese thought from the time of Confucius, ca. sixth century B.C.E., up to the beginning of the Common Era. The first half of the time period nurtured many renowned thinkers who devoted themselves to the task of defining and disseminating ideas. The latter half witnessed the canonization of a number of significant traditions, including Confucianism. Major problems that preoccupied the thinkers include order and chaos, human nature, the relationship between man and nature, among others. Students instructed to treat philosophical ideas as historically conditioned constructs and to interrogate them in contexts. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non Euro/US requirements for history majors and minors. (Same as: HIST 2780)

Previous terms offered: Fall 2019, Fall 2018.

ASNS 2010 (c, IP) The Emergence of Chinese Civilization

Non-Standard Rotation. Enrollment limit: 35.

Introduction to ancient Chinese history (2000 B.C.E. to 800 C.E.). Explores the origins and foundations of Chinese civilization. Prominent themes include the inception of the imperial system, the intellectual florescence in classical China, the introduction and assimilation of Buddhism, the development of Chinese cosmology, and the interactions between early China and neighboring regions. Class discussion of historical writings complemented with literary works and selected pieces of the visual arts. Note: This course fulfills the pre-modern requirement for history majors. (Same as: HIST 2320)

Previous terms offered: Fall 2019.

ASNS 2011 (c, IP) Late Imperial China

Non-Standard Rotation. Enrollment limit: 35.

Introduction to late imperial China (800 to 1800) as the historical background to the modern age. Begins with the conditions shortly before the Golden Age (Tang Dynasty) collapses, and ends with the heyday of the last imperial dynasty (Qing Dynasty). Major topics include the burgeoning of modernity in economic and political patterns, the relation between state and society, the voice and presence of new social elites, ethnic identities, and the cultural, economic, and political encounters between China and the West. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non Euro/US requirements for history majors and minors. (Same as: HIST 2321)

Previous terms offered: Spring 2020, Fall 2018.

ASNS 2012 (c, IP) China's Path to Modernity: 1800 to Present

Non-Standard Rotation. Enrollment limit: 35.

Introduction to modern and contemporary Chinese history. Covers the period from the nineteenth century, when imperial China encountered the greatest national crisis in its contact with the industrial West, to the present People's Republic of China. Provides historical depth to an understanding of the multiple meanings of Chinese modernity. Major topics include: democratic and socialist revolutions; assimilation of Western knowledge and thought; war; imperialism; the origin, development, and unraveling of the Communist rule. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 2322)

Previous terms offered: Spring 2019.

ASNS 2013 (c, IP) China before 1000

Guo Jue.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Surveys the early history of China from the rise of complex society and state-level polity in the third millennium BCE to the fall of the Tang Empire in the tenth century CE. Focuses on the relationship between state and society and delineates the historical processes of their coevolution. Examines the formative era of political experimentation and social formation, the emergence of the bureaucratic state and agrarian society, and the development of imperial rule and multiethnic cultures. Also introduces major political and social institutions, economic systems, technological innovations, law, cosmology, philosophy, and religion, as well as arts and literature that became foundational to the Chinese state and Chinese society. Students will critically engage with a variety of source materials: archaeological data, historical writing, literary works, and visual culture. Note: This course fulfills the pre-modern and non-Euro/US requirements for history majors and minors. (Same as Asian Studies 2013.) (Same as: HIST 2285)

Previous terms offered: Fall 2021.

ASNS 2014 (c, IP) Death in Ancient China

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Explores the topic of death and the relationship between the living and the dead in the sociohistorical, ideological, and religious contexts of ancient China. What do the dead become and where do they go? What does it mean to become an ancestor or a ghost? How are the dead remembered and forgotten? The course considers mortuary space and architecture, burial practices, entombed objects, and funerary writings; it also examines diverse conceptions, regional differences, and historical contingencies behind the making of the dead from prehistoric time to the Middle Period, when Confucianism, Daoism, and Buddhism coexisted in China. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non-Euro/US requirements for history majors and minors. (Same as Asian Studies 2014.) (Same as: HIST 2745)

Previous terms offered: Fall 2021.

ASNS 2020 (c, IP, VPA) Power and Politics in Pre-modern Chinese Art
Peggy Wang.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Introduces students to Chinese art from the First Emperors terracotta warriors in the third century BCE to the waning of the country's dynastic history in the nineteenth century CE. Following a chronological sequence, explores key mortuary spaces, religious objects, court art, and landscape painting with focus on themes of power and politics. Emphasis is placed on understanding changing art formats and functions in relation to socio-cultural contexts, such as shifts in belief systems, foreign imperial patronage, and the rise of literati expression. Readings include primary sources such as ancestral rites, Buddhist doctrines, imperial proclamations, and Chinese painting treatises. (Same as: ARTH 2710)

Previous terms offered: Spring 2019.

ASNS 2030 (c, IP) Becoming China (1000-1911)

Guo Jue.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Surveys the history from the Middle Period to the end of Imperial China (1000-1911). Focuses on the emergence of a distinct consciousness of Chinese-ness and its changing relations with an ever-expanding known world. Examines issues surrounding ethnicity, cultural identity, territorial borders, foreign relations, diplomacy, and war, as well as local societies, commercial revolution, and technological innovations that made China one of the earliest nations stepping into modernity. Students will critically interrogate a variety of sources: historical writing and literary works, as well as material and visual culture. Students are expected to learn to think historically and globally, analyze primary sources and critique secondary scholarship, and craft compelling historical narratives that grapple with significant historical questions. [Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non-Euro/US requirements for history majors and minors]. (Same as: HIST 2297)

Previous terms offered: Spring 2022.

ASNS 2055 (c, IP) Unearthing China: National History and Chinese Archaeology since the 20th Century

Non-Standard Rotation. Enrollment limit: 16.

Explores the role of Chinese archaeology—a discipline of Western origin but developed exclusively in the Chinese soil—in the modern nation-building and national history writing in China since the twentieth century. This seminar considers critical development in practice and theory and discoveries of national and world significance, as well as topics of debate and controversies related to the origin of Chinese civilization, national narratives, and cultural identity and political unity from the birth of Chinese archaeology at the moment of grave national crises in the early twentieth century to its flourishing present, when Chinese archaeology enjoys tremendous state investments and attracts unprecedented public attention as China's economic and political power strengthens. Through the lens of Chinese archaeology, this seminar asks the students to critically and meaningfully engage China as a modern nation state from the perspectives of how its past have been unearthed and told. [Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non-Euro/US requirements for history majors and minors]. (Same as: HIST 2893)

Previous terms offered: Spring 2022.

ASNS 2060 (b, IP) Contemporary Chinese Politics

Christopher Heurlin.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the history and politics of China in the context of a prolonged revolution. Begins by examining the end of imperial rule, the development of Modern China, socialist transformations and the establishment of the PRC. After a survey of the political system as established in the 1950s and patterns of politics emerging from it, the analytic focus turns to political change in the reform era (since 1979) and the forces driving it. The adaptation by the Communist Party to these changes and the prospects of democratization are also examined. Topics include political participation and civil society, urban and rural China, gender in China, and the effects of post-Mao economic reform. (Same as: GOV 2440)

Previous terms offered: Fall 2020, Fall 2018.

ASNS 2061 (b, IP) U.S. - China Relations

Non-Standard Rotation. Enrollment limit: 35.

Examines the development of United States relations with China. Begins with a brief historical examination of the Opium War, then examines United States policy towards the Nationalists and the Communists during the Chinese Civil War. In the aftermath of the civil war and subsequent revolution, the role of China in the Cold War will be discussed. Then focuses on more contemporary issues in United States-China relations, drawing links between the domestic politics of both countries and how they influence the formulation of foreign policy. Contemporary issues addressed include human rights, trade, the Taiwanese independence movement, nationalism, and China's growing economic influence in the world. (Same as: GOV 2540)

Previous terms offered: Fall 2021, Spring 2021, Spring 2020.

ASNS 2071 (c, IP) China's Urbanization: Art and Architecture

Shu-chin Tsui.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores visual cultural trends in modern China with socialist and post-socialist conditions as the contextual setting and visual cultural studies the theoretical framework. Discussion topics include but not limited to the following: architecture, from the Imperial Palace to the Bird's Nest stadium; art, from socialist realism to post-socialist experiment; advertising, from Shanghai modern to global consumerism; and digital media, from the Internet to bloggers. Questions central to the course ask how visual cultural trends reflect and react to China's social-economic transitions, and how the state apparatus and the people participate in cultural production and consumption. This is a research-oriented course. Students gain knowledge about contemporary Chinese culture as well as skills in the critical analysis of cultural artifacts and trends.

Previous terms offered: Spring 2021, Fall 2019.

ASNS 2075 (c, IP, VPA) Ecocinema: China's Ecological and Environmental Crisis

Every Other Spring. Enrollment limit: 35.

Examines how China's economic development has caused massive destruction to the natural world and how environmental degradation affects the lives of ordinary people. An ecological and environmental catastrophe unfolds through the camera lens in feature films and documentaries. Central topics include the interactions between urbanization and migration, humans and animals, eco-aesthetics and manufactured landscapes, local communities and globalization. Considers how cinema, as mass media and visual medium, provides ecocritical perspectives that influence ways of seeing the built environment. The connections between cinema and environmental studies enable students to explore across disciplinary as well as national boundaries. Note: Fulfills the non-US cinema requirement and the film theory requirement for cinema studies minors. (Same as: CINE 2075, ENVS 2475)

Previous terms offered: Fall 2021, Fall 2019.

ASNS 2076 (c, IP) Fashion and Gender in China

Shu-chin Tsui.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines how the dress women wear and the fashion consumers pursuit reflect social-cultural identities and generate gender politics. Readings and discussions span historical periods, geographical locations, social-cultural groups, and identity categories. From bound feet to the Mao suit, and from qipao to wedding gowns, fashion styles and consumer trends inform a critical understanding of the nation, gender, body, class, and transnational flows. Topics include the intersections between foot-binding and femininity, qipao and the modern woman, the Mao suit and the invisible body, beauty and sexuality, oriental chic and re-oriental spectacle. With visual materials as primary source, and fashion theory the secondary, offers an opportunity to gain knowledge of visual literacy and to enhance analytical skills. (Same as: GSWS 2076)

Previous terms offered: Fall 2020.

ASNS 2078 (c, IP, VPA) Going Viral: The Cinema of Pandemics

Shu-chin Tsui.

Every Other Spring. Spring 2023. Enrollment limit: 35.

The onset of COVID-19 has led to anxiety and fear in our daily lives. The spread of this infectious disease and its destructive power prompts us to look to the film screen for ways we might comprehend the urgent subject confronting us. In considering how cinema has treated pandemics, the course will exam a number of thematic categories through cinematic articulations. The topics include but are not limited to: pandemics in history, the politics of pandemics, the fantasy or horror of pandemics, pandemics in Asia, and pandemics and animals. A carefully chosen roster of films include: The Seventh Seal, Outbreak and Contagion, The Flu that Killed 50 Million, Casandra Crossing, the South Korean productions of Flu and The Train to Busan, as well as 28 Days Later and Twelve Monkeys. The course meets the requirement for a major or minor in Asian studies, as well as the minor in cinema studies. (Same as: CINE 2080)

Previous terms offered: Spring 2021.

ASNS 2105 (c, IP) Everyone Eats: A Deep History of Foodways in China

Guo Jue.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Explores the deep history of foodways in China. Takes students on a historical journey to visit the earliest rice paddy of Neolithic villages in southern China, witness the elaborate food preparation and lavish feasting of the Han elites, meet the exotic ingredients and foreign peoples on the Silk Roads, and experience family and community meals of ordinary Chinese today. Through the lens of food, meals, and cuisine, this seminar engages students to make connections between a variety of topics—agriculture, environment, and food production; cooking utensils, recipes, and domestic labor; feast, famine, and politics; and food, region, and identity—to understand the history of China. This course fulfills the pre-modern and non-Euro/US requirements for history majors and minors. (Same as: HIST 2746)

ASNS 2110 (c, IP) Enemies of the State

Every Other Year. Enrollment limit: 16.

Seminar. Explores a series of historical individuals who have been incarcerated, exiled, or silenced by the Chinese state from the nineteenth through the twenty-first century. Covers three different regimes: the Qing Dynasty (1644–1912), the Republic of China (1912–1949), and People's Republic of China (1949–present). Main topics include state and state power, ethnic and religious conflicts, gender equality, and cyber activism. The selection of historical figures reflects the wide range and rich diversity of the Chinese population, including women, religious figures, and ethnic/sexual minorities. Note: This course fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2782)

Previous terms offered: Spring 2020.

ASNS 2200 (c, IP, VPA) Art and Revolution in Modern China

Non-Standard Rotation. Enrollment limit: 35.

Examines the multitude of visual expressions adopted, re-fashioned, and rejected from China's last dynasty (1644-1911) through the Cultural Revolution (1966-1976). Major themes include the tension between identity and modernity, Westernization, the establishment of new institutions for art, and the relationship between cultural production and politics. Formats under study include ink painting, oil painting, woodcuts, advertisements, and propaganda. Comparisons with other cultures conducted to interrogate questions such as how art mobilizes revolution. (Same as: ARTH 2200)

Previous terms offered: Spring 2020.

ASNS 2201 (c, IP, VPA) From Mao to Now: Contemporary Chinese Art
Peggy Wang.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Examines the history of contemporary Chinese art and cultural production from Mao's Cultural Revolution (1966-1976) until today. Traces experiments in oil, ink, performance, installation, video, and photography and considers these media and formats as artistic responses to globalization, capitalist reform, urbanization, and commercialization. Tracks themes such as art and consumerism, national identity, global hierarchies, and political critique. Readings include primary sources such as artists' statements, manifestoes, art criticism, and curatorial essays. (Same as: ARTH 2210)

Previous terms offered: Spring 2021, Fall 2020, Fall 2018.

ASNS 2252 (c, IP) Culture and Conquest in Japan: An Introductory History to 1800

Sakura Christmas.

Every Year. Fall 2022. Enrollment limit: 35.

How did Japan become Japan? This course introduces the origins of Japan from the archeological record until industrial modernity. Lectures survey the unification of Japan under a court-centered state, the rise and demise of the samurai as its ruling order, and the archipelago's shifting relationship to the larger world. We will not only focus on the culture of conquest by the warrior class, but also conquest via culture as inhabitants of the archipelago transferred and transformed material commodities, knowledge systems, and sacred beliefs from beyond its horizons. Readings emphasize voices that comment on gender, status, religion, science, and nature. Note: This course is part of the following field(s) of study: East Asia. It also meets the pre-modern and non euro/us requirements for history majors and minors. (Same as: HIST 2420)

Previous terms offered: Fall 2020.

ASNS 2270 (c, IP) Gods, Goblins, and Godzilla: The Fantastic and Demonic in Japanese Literature and Film

Non-Standard Rotation. Enrollment limit: 35.

From possessing spirits and serpentine creatures to hungry ghosts and spectral visions, Japanese literary history is alive with supernatural beings. Our study will range from the earliest times to modernity, examining these motifs in both historical and theoretical contexts. The readings will pose the following broad questions: How do representations of the supernatural function differently in myths of the ancient past and narratives of the modern nation? Are monstrous figures cast as miscreants, or do these transgressive figures challenge societal orthodoxy? How do Buddhist ideas influence the construction of demonic female sexuality in medieval Japan, and how is this motif redrawn in modern Japan? How are sociopolitical anxieties articulated in horror films like Godzilla? This course will draw on various genres of representation, from legends and novels to art and cinema. Students will gain an understanding of the cultural history of the monstrous in Japan and develop a broad appreciation of the hold that these creatures from the "other" side maintain over our cultural and social imagination. (Same as: GSWS 2236)

Previous terms offered: Spring 2022, Spring 2020.

ASNS 2271 (c, IP, VPA) Samurai in History, Literature, and Film

Non-Standard Rotation. Enrollment limit: 35.

An examination of representations of samurai in historical, literary, and filmic texts from the twelfth to the twentieth century. Topics include the changing understanding of the way of the warrior, the influence of warrior culture on the arts in medieval Japan, and the modern appropriation of the martial arts. Analyzes the romanticizing of samurai ethos in wartime writings and the nostalgic longing for a heroic past in contemporary films. Focus on the reimagining of the samurai as a cultural icon throughout Japanese history and the relationship of these discourses to gender, class, and nationalism. Readings include the "Tale of the Heike," "Legends of the Samurai," "Hagakure and Bushido: The Soul of Japan." Films may include "Genroku Chushingura," Akira Kurosawa's "Seven Samurai," and the animation series "Samurai 7."

Previous terms offered: Spring 2021, Spring 2019.

ASNS 2300 (c, IP) Literature of World War II and the Atomic Bomb in Japan: History, Memory, and Empire

Non-Standard Rotation. Enrollment limit: 35.

A study of Japan's coming to terms with its imperialist past. Literary representations of Japan's war in East Asia are particularly interesting because of the curious mixture of remembering and forgetting that mark its pages. Postwar fiction delves deep into what it meant for the Japanese people to fight a losing war, to be bombed by a nuclear weapon, to face surrender, and to experience Occupation. Sheds light on the pacifist discourse that emerges in atomic bomb literature and the simultaneous critique directed toward the emperor system and wartime military leadership. Also examines what is missing in these narratives – Japan's history of colonialism and sexual slavery – by analyzing writings from the colonies (China, Korea, and Taiwan). Tackles the highly political nature of remembering in Japan. Writers include the Nobel prize-winning author Ōe Kenzaburō, Ōoka Shōhei, Kojima Nobuo, Shimao Toshio, Hayashi Kyoko, and East Asian literati like Yu Dafu, Lu Heruo, Ding Ling, and Wu Zhou Liu.

Previous terms offered: Fall 2021, Fall 2019.

ASNS 2310 (c, IP) The Japanese Empire and World War II

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Charts the sudden rise and demise of the Japanese empire in the making of modern East Asia. Once stretching from the Mongolian steppe to the South Seas mandate, the Japanese empire continues to evoke controversy to this day. Discussions call attention to competing imperial visions, which challenged the coherence of the project as a whole. Primary sources introduce the lived experience of various individuals—emperors and coolies alike—who both conquered and capitulated to the imperial regime. Topics covered include settler colonialism, independence movements, transnational labor, fascist ideology, environmental warfare, the conundrum of collaboration, and war trials. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2890)

Previous terms offered: Spring 2021.

ASNS 2311 (c, IP) Empire and Nation in Japan

Sakura Christmas.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

In 1853, Commodore Matthew Perry sailed to Japan with four naval warships and issued an ultimatum: open up to trade or face foreign invasion. Charts Japan's swift emergence from its feudal origins to become the world's first non-Western, modern imperial power out of its feudal origins. Lectures introduce the origins, course, and consequences of building a modern state from the perspective of various actors that shaped its past: rebellious samurai, anarchist activists, the modern girl, imperial fascists, and office salarymen. Readings complicate dichotomies of East and West, modern and feudal, nation and empire through the lens of ethnicity, class, and gender. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2421)

Previous terms offered: Spring 2022, Spring 2020.

ASNS 2320 (b, IP) Japanese Politics and Society

Henry Laurence.

Every Fall. Fall 2022. Enrollment limit: 35.

Comprehensive overview of modern Japanese politics in historical, social, and cultural context. Analyzes the electoral dominance of the Liberal Democratic Party, the nature of democratic politics, and the rise and fall of the economy. Other topics include the status of women and ethnic minorities, education, war guilt, nationalism, and the role of the media. (Same as: GOV 2450)

Previous terms offered: Fall 2021, Fall 2019, Fall 2018.

ASNS 2321 (b, IP) Global Media and Politics

Non-Standard Rotation. Enrollment limit: 35.

Examines the interconnections between media, politics and society in cross-national perspective. Explores national differences in issues such as free speech policy; privacy rights; censorship and self-censorship; news production and consumption; and the role of public broadcasters such as the BBC and NHK. Also considers the role of pop culture in shaping national identities and creating diplomatic "soft power." Cases drawn primarily but not exclusively from the UK, Japan and the USA. (Same as: GOV 2446)

Previous terms offered: Fall 2018.

ASNS 2395 (b, IP) Japan and the World

Non-Standard Rotation. Enrollment limit: 35.

Explores the development of Japanese international relations since the Second World War and how Japan is currently adjusting its policies to meet the challenges of the twenty-first century. Despite having the world's third-largest economy and advanced technological resources, Japan has been widely viewed as underperforming in world affairs. The central question is whether Japan remains an "underperformer." Begins with a brief examination of Japanese foreign relations after the Meiji Restoration of 1868, then examines postwar Japanese foreign policy. Relations with the United States and China will receive special attention. Topics include Japanese participation in international institutions, the historical legacy of its past actions, the impact of US military bases in Japan, and contemporary debates over immigration. (Same as: GOV 2455)

Previous terms offered: Spring 2021, Spring 2020.

ASNS 2514 (c, IP, VPA) Art in India

Non-Standard Rotation. Enrollment limit: 35.

Examines mural, manuscript, and single-page painting from the fifth to the twentieth centuries. Questions to be covered include the identification and significance of courtly and regional styles, the role of patronage, and the impact of cross-cultural interactions. Through case studies of technique and artistic practice, this course will also situate the primacy of painting within the cultural and historical context of South Asia, including modern ramifications for connoisseurial analysis and the art market. Examples from major historical and cultural movements will include Buddhist monastic painting, medieval Jain and Sultanate manuscripts, Mughal allegorical and historical painting, Rajput and Pahari poetic and devotional scenes, and folk and commercial art. Through studies of these fundamental belief systems and structures, students will analyze diverse perspectives on South Asian history and culture. (Same as: ARTH 2215)

Previous terms offered: Fall 2021.

ASNS 2550 (c, IP) Religion and Fiction in Modern South Asia

Non-Standard Rotation. Enrollment limit: 35.

Explains the nexus between religion and society in modern South Asia via the prism of South Asian literature in English. Confined to prose fiction, considering its tendency to attempt approximations of reality. Interrogates how ideas of religion and ideas about religion manifest themselves in literature and affect understanding of south Asian religions among its readership. Does not direct students to seek authentic insights into orthodox or doctrinal religion in the literary texts but to explore the tensions between textual religion and everyday lived reality in South Asia. (Same as: REL 2219)

Previous terms offered: Fall 2018.

ASNS 2551 (c, IP) Mahayana Buddhism

Non-Standard Rotation. Enrollment limit: 35.

Studies the emergence of Mahayana Buddhist worldviews as reflected in primary sources of Indian, Chinese, and Japanese origins. Buddhist texts include the Buddhacarita (Life of Buddha), the Platform Sutra of the Sixth Patriarch, the Prajnaparamita-hrdaya Sutra (Heart Sutra of the Perfection of Wisdom), the Saddharmapundarika Sutra (the Lotus Sutra), the Sukhavati Vyuha (Discourse on the Pure Land), and the Vajraccedika Sutra (the Diamond-Cutter), among others. (Same as: REL 2223)

Previous terms offered: Spring 2019.

ASNS 2552 (c, IP) Hindu Literatures

Non-Standard Rotation. Enrollment limit: 35.

In this exploration of Hindu texts, we delve into some of the most ancient and beloved literature from the Indian subcontinent. Students read major scriptural sources, including the Vedas and Upanishads. In our study of the epics (the Ramayana and the Mahabharata, including the Bhagavad Gita), we discuss translations from Sanskrit and popular retellings of these stories into other languages and media. We discuss the Puranas, reading the story of the warrior Goddess in the Devi Mahatmyam and investigate visual representations of gods and goddesses. We also sample Sanskrit classical poetry and devotional literature to the Goddess translated from Bengali. (Same as: REL 2220)

Previous terms offered: Fall 2021, Fall 2019.

ASNS 2553 (c, IP) Religious Cultures of India

Non-Standard Rotation. Enrollment limit: 35.

A view of the religious cultures of India "from the ground up," focused on studies of lived religion beyond texts and institutional orthodoxies. With more than 1.3 billion people, India is home to an incredible diversity of religious cultures, including Hindu, Jain, Muslim, Christian, and Buddhist traditions. Readings examine traditions of pilgrimage, temple worship, yoga, goddess possession, healing practices, and rites of passage, including the ordination of monks and nuns. Themes include women's lived authority in contrast to patriarchal structures and contemporary intersections between religion, class, and modernity. Religious cultures of India also exist beyond the modern nation's borders, as diaspora populations have grown around the world and traditions of yoga, gurus, and mantra meditation are popular globally. The course explores these religious cultures in relation to new media and transnational networks, including debates about the practice of Indian religions in Asia and beyond. (Same as: REL 2221)

Previous terms offered: Spring 2022, Spring 2020.

ASNS 2554 (c, IP) Early Buddhism

Claire Robison.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Introduces students to the major trajectories of Buddhist religious thought and practice. Readings include primary sources such as sermons, monastic codes, miracle tales, sutras, and poetry, as well as secondary scholarship on diverse lived Buddhist practices. Examines Buddhism's transformations in specific historical and cultural settings, from its origins in South Asia to its spread throughout Central, East, and Southeast Asia. Highlights important historical developments, including early Buddhist monastic communities, philosophical traditions, the development of Buddhist art and architecture, Tibetan Buddhist traditions, devotion to the Lotus Sutra, Pure Land practice, and Chan/Zen traditions. Focuses on varied Buddhist practices and goals; dynamics of lay and monastic relations; debates about gender and ethnicity in Buddhist communities; and the interplay of everyday and transcendent concerns. (Same as: REL 2222)

Previous terms offered: Fall 2020, Fall 2018.

ASNS 2555 (c, IP) Religion and Politics in South Asia

Claire Robison.

Every Other Year. Fall 2022. Enrollment limit: 35.

An introduction to religion and politics in a region that is home to about one-fourth of the world's population, with a focus on India, Pakistan, Bangladesh, and Sri Lanka. Topics include religious nationalism, religion and violence, and the role of religion in legislative debates about sexuality and gender. Over the past few decades, the region has seen the growth of religious nationalisms in India and Pakistan, a civil war in Sri Lanka that divided citizens along religious and ethnic lines, and the militarization of Kashmir. But South Asia is also home to shared religious shrines and communities whose identities are "neither Hindu nor Muslim," resisting easy categorizations. Pride parades are held in Indian cities, but debates ensue on the role of religion in legislating sexuality. Questions include: How is religion related to national identity? Should religion have a place in democratic legal systems? Can Buddhist monks justify the use of violence in times of war? (Same as: REL 2288)

Previous terms offered: Spring 2020.

ASNS 2571 (b, DPI, IP) Imagined South Asias, Everyday South Asias

Shreyas Sreenath.

Every Other Fall. Spring 2023. Enrollment limit: 35.

Interrogates the relation between the imagined and the everyday through a focus on South Asia, the most densely populated region in the world. Discusses how South Asia is imagined as a site of (post)colonial desires, despairs, and revolts as well as through civilizational or national tropes. Explores how these imagined South Asias are reshaped and disrupted by the everyday habitations of various political communities within the region and in diaspora. May include discussion of Afghanistan, Bangladesh, Bhutan, India, the Maldives, Nepal, Pakistan, and Sri Lanka. Through ethnography, fiction, poetry, film, and music aims to cultivate a distinctly postcolonial sensitivity to thinking about caste, gender, spirituality, ecology, language, militancy, and politics in the region. (Same as: ANTH 2243)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Fall 2021.

ASNS 2581 (c, IP) The Making of Modern India and Pakistan

Non-Standard Rotation. Enrollment limit: 35.

Traces the history of India and Pakistan from the rise of British imperial power in the mid-eighteenth century to the present. Topics include the formation of a colonial economy and society; religious and social reform; the emergence of anti-colonial nationalism; the road to independence and partition; and issues of secularism, democracy, and inequality that have shaped post-colonial Indian and Pakistani society. Note: This course is part of the following field(s) of study: South Asia and Colonial Worlds. It fulfills the non Euro/US requirement of history majors and minors. (Same as: HIST 2342)

Previous terms offered: Spring 2022.

ASNS 2582 (c, IP) Media and Politics in Modern India

Non-Standard Rotation. Enrollment limit: 35.

Examines the new forms of politics and of popular culture that have shaped modernity in India. Topics include the emergence of mass politics, urbanization, modern visual culture, new media technologies, and contemporary media and democracy. Course includes a film component. Note: This course is part of the following field(s) of study: South Asia and Colonial Worlds. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 2343)

Previous terms offered: Spring 2021, Spring 2019.

ASNS 2585 (c, IP) Global Cities, Global Slums of India

Non-Standard Rotation. Enrollment limit: 16.

Seminar. How have cities in the so-called "developing world" come to take their contemporary forms? How is life in these cities and slums lived? Explores these and other questions through a focus on modern India. Drawing on film, fiction, memoirs, urban planning, and other materials, examines the processes through which cities and slums have taken shape, ongoing efforts to transform them, as well as some of the diverse ways of representing and inhabiting modern urban life. Note: This course is part of the following field(s) of study: Colonial Worlds and South Asia. It fulfills the non Euro/US requirement for history majors and minors. (Same as: HIST 2802, URBS 2802)

Previous terms offered: Fall 2020, Spring 2019.

ASNS 2586 (c, IP) Science and Technologies of Life in South Asia

Rachel Sturman.

Every Other Spring. Fall 2022. Enrollment limit: 16.

Seminar. Examines the history of science and technology by exploring how these knowledges have defined and shaped human and nonhuman life in South Asia in the modern era. Considers debates about scientific evidence, the making of scientific authority and expertise, and the cultures of technology, as well as the circulation of popular knowledges and their entanglements with privileged sciences. Focuses on how people have thought—and produced knowledge—about nature, the human body, and bodily differences (such as race, caste, gender, sexuality, ability). Topics may include: science and technology in the service of empire, nation, or capital (such as race science, tropical medicine, plantation agriculture, nuclear power, natural resource extraction); modern yoga and Ayurveda; the pharmaceutical industry and bioprospecting; theories of the origins of castes, tribes, or linguistic communities; and new reproductive and assistive technologies. Note: This course is part of the following field(s) of study: South Asia, Colonial Worlds. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2804)

Previous terms offered: Spring 2021.

ASNS 2587 (c, IP) Cities of the Global South

Rachel Sturman.

Every Other Year. Fall 2022. Enrollment limit: 35.

Examines the history, cultures, and politics of major cities shaped by histories of colonialism, the Cold War, and contemporary neoliberalism. We will consider the changing roles that these cities have played in colonial, national, and global economies, as well as the ideologies, aesthetic theories, and pragmatic contexts that have shaped their built environments. Key themes include: colonial and postcolonial urban planning and its limits; spatial inequalities; impacts of war and mass violence; urban economies; and the everyday sensory life of the city. Examples of possible cities include: Mumbai, New Delhi, Saigon, Manila, Cairo, Nairobi, and Lagos. This course is part of the following field(s) of study: South Asia and Colonial Worlds. It fulfills the non-Euro/US requirement for history majors and minors. This course satisfies the Introductory Survey and the non-US requirement requirement for the Urban Studies minor. (Same as: HIST 2346, URBS 2587)

Previous terms offered: Fall 2021.

ASNS 2601 (c, IP) Militancy and Monasticism in South and Southeast Asia

Non-Standard Rotation. Enrollment limit: 35.

Examines monastic communities throughout South and Southeast Asia and the ways they have been at the forefront of right-wing religious politics in the twentieth and twenty-first centuries. Across Asia, Hindu and Buddhist monks have been playing a political role that some consider contradictory to their spiritual image. Investigates how various monastic communities harness political power today, as well as how different communities in early-modern Asia used their spiritual standing and alleged supernatural powers to influence emperors and kings. (Same as: REL 2228)

Previous terms offered: Fall 2019.

ASNS 2610 (b, IP) Saved By the Girl? Politics of Girlhood in International Development

Every Other Fall. Enrollment limit: 35.

In recent decades, girls' education and empowerment has emerged as a key site for investment and advocacy. Girls are often represented as having the potential to solve wide-ranging societal issues, from poverty to terrorism. Interrogates the current focus on girls in international development by examining its cultural politics. What kinds of knowledges about people in the global south are produced in/through girl-focused campaigns? What is highlighted and what is erased? What are the consequences of such representations? Examinations lead to an exploration of the different theories of 'girl,' 'culture,' 'empowerment,' 'rights,' and 'citizenship' that are operative in this discourse. Situates girl-focused campaigns within the broader politics of humanitarianism and asks critical questions about conceptualizations of 'freedom' and the constitution of the 'human'. To provide a more nuanced understanding of the lives of girls in the global south, brings to bear ethnographic studies from Pakistan, Egypt, India, and Nepal. (Same as: GSWS 2268)

Previous terms offered: Fall 2018.

ASNS 2611 (b, IP) The World's Most Dangerous Place?: Gender, Islam, and Politics in Contemporary Pakistan

Non-Standard Rotation. Enrollment limit: 16.

This course engages in an academic study of the gender, religion, and politics in Pakistan to deepen students' understanding of the world's sixth-most populous country. We begin with accounts of the British colonization of South Asia and the nationalist movements that led to the creation of Pakistan. We then consider the myriad issues the nation has faced since 1947, focusing in particular on the debates surrounding sovereignty, gender and Islam. In addition to historical and ethnographic accounts, the course will center a number of primary texts (with English translations) including political autobiographies, novels, and terrorist propaganda materials. (Same as: GSWS 2710)

Previous terms offered: Spring 2021.

ASNS 2620 (b, IP) Sociological Perspectives on Asia(ns) and Media

Non-Standard Rotation. Enrollment limit: 35.

Explores Asian national and diasporic/transnational social contexts through the lens of various media, including print, film, television, advertising, music, and digital media. Helps understand how media construct societies and cultures and, in turn, how social institutions, interactions, and identities get reflected in media. Focuses on South Asia to explore questions of ideology and power; political economy of media; construction and representations of gender, sexuality, race, social class, nation, and religion; generations; and social movements and change. (Same as: SOC 2520)

Prerequisites: SOC 1101.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

ASNS 2740 (c, IP) Goddesses, Gurus, and Rulers: Gender and Power in Indian Religions

Non-Standard Rotation. Enrollment limit: 35.

Provides a historical perspective on how gender and power have intertwined in the diverse religious traditions of India. Explores ideas about femininities, masculinities, and genderqueer identities in religious texts and premodern religious communities, analyzing the influence of monastic ideals, economic patronage, and gendered notions of divine authority. Readings examine mythology, rituals, and ideas about gender and social power in Hindu, Buddhist, Jain, and Muslim traditions; including gender roles in family and culture; transgender identity and religion; and, in the latter part of the course, the impacts of colonialism, nationalist politics, and migration on gender and religion. (Same as: REL 2280, GSWS 2292)

Previous terms offered: Fall 2020, Spring 2019.

ASNS 2745 (c, IP) The Tigress' Snare: Gender, Yoga, and Monasticism in South and Southeast Asia

Non-Standard Rotation. Enrollment limit: 35.

There is no dearth of stories regarding the dangers of women and sexuality for Hindu, Buddhist, Jain, and Nath yogis and ascetics. Texts after texts written on ancient, classical, and early modern Asian monasticism point to the evil of women and the dangers they pose to those attempting to live monastic lives. Women, however, have historically been and continue to be involved in these religious traditions. This class will examine the highly gendered worldview found within South and Southeast Asian yogic and monastic texts. Primarily reading Hindu, Nath yogi, Jain, and Buddhist canonical teachings, the class will discuss the manner in which women have historically been viewed within these religious traditions. It will then shift to look at the manner in which women have been and continue to take part in these communities in their everyday life. Through the use of both academic readings and multimedia texts, the class will examine how women navigate their roles within these male-dominated communities, their reasons for joining these communities, and the differences that exist for women within the different monastic and yogic communities. (Same as: GSWS 2745, REL 2745)

Previous terms offered: Spring 2020, Spring 2019.

ASNS 2750 (c, IP) The Poetics of Emotion in China and Korea

John Kim.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Explores the relationship between form and feeling through a wide variety of poetry, fiction, philosophy, and visual sources from Chinese and Korean traditions, from The Classic of Poetry to Korean pop culture. With particular attention to the premodern period, examines how classical, vernacular, and popular forms create new spaces of feeling; how particular emotions shape cultural, philosophical, and political imaginations; and how environments and spaces, both real and projected, dialogue with selfhood and subjectivity. Addresses issues of language and representation, gender and sexuality, psychology and cognition, and crosscultural translation. Authors may include Wang Wei, Cao Xueqin, Yi Yulgok, and examples from Korean drama.

Previous terms offered: Fall 2020, Spring 2019.

ASNS 2755 (c, IP, VPA) Arts of the Islamic Book

Non-Standard Rotation. Enrollment limit: 15.

Books are a way of containing and circulating knowledge, but are also objects to be studied in their own right. The richly illuminated manuscripts produced throughout the Islamic world offer an opportunity to study calligraphy, painting, and ornament in their artistic and cultural contexts. Focusing on the collections of the Bowdoin College Museum of Art, this course presents and in-depth examination of the diverse visual traditions and techniques developed over from the ninth to the nineteenth centuries in the Middle East, North Africa, Central Asia, and the Indian subcontinent. Students in this hybrid lecture/seminar will acquire a broad base of knowledge, while exploring material and thematic topics more deeply through readings, discussions, and hands-on workshops. No foreign language knowledge is necessary, but at least one previous class in Art History, Asian Studies, or Middle East/North African Studies is required. (Same as: ARTH 2126, MENA 2126)

Prerequisites: ARTH 1000 - 2969 or ARTH 3000 or higher or ASNS 1000 - 2969 or ASNS 3000 or higher or MENA 1000 - 2969 or MENA 3000 or higher.

Previous terms offered: Spring 2022.

ASNS 2801 (c) Asian American Literature

Non-Standard Rotation. Enrollment limit: 35.

An introduction to the writings of Asian America and this literature's development from early twentieth century to the present. Focuses on the ways Asian American writers have responded to and contested dominant Western discourses of Asia/Asians. Also explores the intersections of race with gender, sexuality, class, and country of origin in shifting notions of Asian American identity. Authors include Winnifred Eaton, Carlos Bulosan, Monica Sone, John Okada, Frank Chin, Maxine Hong Kingston, and David Henry Hwang. (Same as: ENGL 2750)

Previous terms offered: Fall 2021, Fall 2018.

ASNS 2805 (c, DPI) Asian America's Margins

Every Other Year. Enrollment limit: 35.

Explores the margins of Asian America through literary perspectives of queerness, mixed-race identities, transnational and transracial adoption, disability, and mental illness. Examines the ways authors contest dominant white discourses of Asianness as well as the stigmatized zones within Asian American life. Authors may include K-Ming Chang, Alexander Chee, Nicole Chung, Thanh-Thao Sue Do, Velina Hasu Houston, Yiyun Li, Leah Lakshmi Piepzna-Samarasinha, Matthew Salesses, Jane Jeong Trenka, Ocean Vuong, Esmé Weijun Wang, and Alice Wong. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2760)

Previous terms offered: Spring 2022.

ASNS 2806 (c, DPI) New Fictions of Asian America

Belinda Kong.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines developments in Asian American literature since 2000 and asks how postmillennial fictions extend earlier writings' core concerns with racial identity and national belonging in the United States. Themes and contexts include globalization and transnationalism, illegal immigration and refugee experience, the post-9/11 security state and surveillance, the expansion of Asian capital, the global financial crisis, digital technology and social media, and climate change. Considers the diverse genres and functions of Asian American literature as not simply ethnic self-writing but also social satire, political critique, historical archaeology, cultural memory, and dystopic science fiction. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2758)

Previous terms offered: Spring 2021, Fall 2020.

ASNS 2808 (c) Asian Dystopias

Belinda Kong.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate Seminar. Focuses on contemporary dystopian novels by Asian and Asian diaspora writers. Explores the idea that dystopic fiction works not simply by reimagining time and forecasting bleak futures but also by remapping political spaces and redrawing social boundaries. Anarchists and vigilantes, aliens and clones, murderous children and mythic animal deities populate these worlds as writers examine totalitarianism and dissidence, globalization and labor slavery, pandemics and biotechnology, race riots and environmental devastation. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2023)

Previous terms offered: Fall 2020.

ASNS 2809 (c, IP) Global Asian Popular Fiction

Non-Standard Rotation. Enrollment limit: 35.

Explores the ways global Asian women writers have transformed popular genres as well as traditional forms as they address issues of gender identity, migration, political polarization, imperialist expansion, and ecological crisis. Examines how writers from East, South, and Southeast Asian lineages merge the anglophone novel and modern short story with modes spanning Asian and Western literary traditions, including myth, fairy tale, ancient epic, fantasy, romance, ghost tale, martial arts and magical narrative (wuxia and xianxia), and science fiction. Featured authors include Zen Cho, R. F. Kuang, and Tasha Suri, with possible brief works by Amanda Lee Koe, Anjali Sachdeva, Vandana Singh, Nghi Vo, and J. Y. Yang. (Same as: ENGL 2749)

Previous terms offered: Spring 2021.

ASNS 2839 (c) Buddhism in America

Robert Morrison; Joshua Ulrich.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Examines the two major strands of Buddhism in America: that of immigrant communities and that which is practiced by Americans without preexisting cultural ties to Buddhist traditions. After a brief introduction to Buddhism's emergence and spread in the first millennium, readings trace the differences between these varieties of American Buddhism. Themes to be explored include temples as sources of material, emotional, and spiritual support, Buddhist practices as source of cultural identity and connection to homelands, and religious innovations and controversies among American "converts." These latter include the poetry of Allen Ginsberg, Zen and the Art of Motorcycle Maintenance, and the widespread commercialization of Zen. (Same as: REL 2522)

Previous terms offered: Spring 2021, Fall 2019.

ASNS 2855 (IP) The New Scramble for Africa: Capital Accumulation in the Global

Non-Standard Rotation. Enrollment limit: 35.

More than a century after European powers initially carved up the African continent during the Berlin Conference (1884–1885), Africa is again attracting the renewed attention of foreign powers interested in its extractive resources, land, markets, and positioning. The contemporary landscape differs from the "Scramble for Africa," as it marks a shift from a solidly Western-led initiative to one in which new actors from the global south are taking on more pivotal roles. Superpowers (the United States, China, and Russia), colonial powers (UK, France, and Belgium), and less powerful states (Japan, India, and Brazil) are in competition with emerging African nations (Nigeria and South Africa) for wealth and influence on the continent. The course dedicates considerable time to exploring contemporary interactions between African states and their most significant external partner—China—considering questions of neocolonialism and neoimperialism, and asks students to conclude whether a new scramble for Africa is underway. (Same as: AFRS 2826)

Previous terms offered: Spring 2019.

ASNS 2860 (b, IP) Asian Communism: The Politics of China, Vietnam, North Korea, and Mongolia

Non-Standard Rotation. Enrollment limit: 35.

Examines the Asian communism in China, Vietnam, North Korea, and Mongolia. Asian communism presents a series of fascinating questions. Why did communist revolutions occur in some Asian states but not others? Why were relations between some Asian communist states peaceful while others were hostile? Why did some adopt significant economic reforms while others maintained command economies? Why did communist regimes persist in most Asian states, while Communism fell in Mongolia and all of Europe? The approach of the course is explicitly comparative and structured around thematic comparisons between the four states. (Same as: GOV 2445)

Previous terms offered: Spring 2022.

ASNS 2872 (b, IP) The Two Koreas and Geopolitics of Northeast Asia

Non-Standard Rotation. Enrollment limit: 35.

Examines the tumultuous developments on the Korean peninsula over the past century and their significance from historical, security, economic, and geopolitical perspectives. The challenges and choices facing the Korean people, their governments, neighboring countries, and the United States are assessed to understand how conditions have evolved to the high-stakes tensions that exist today, and what forces are shaping the future of both Koreas and Northeast Asia. The first half of the course considers the history of both Koreas and the conditions that underlie the modern political environment. The second half focuses on political developments of the last twenty-five years. (Same as: GOV 2550)

Previous terms offered: Spring 2019.

ASNS 2874 (c, IP) Madness in Korean Literature and Film

Every Other Fall. Enrollment limit: 35.

An introduction to the literary and filmic tradition of Korea's modern period through the thematic lens of madness. Explores the significance of madness within the history of twentieth- and twenty-first century Korean fiction, poetry, and film, from the colonial period and the Korean War to democratization and contemporary popular culture. With attention to political, economic, social, and technological developments, asks how the representation of madness illuminates problems of history and memory, language and representation, gender and sexuality, and global capitalism, that are both unique to the shaping of the Korean cultural identity and, at the same time, deeply universal. Authors and filmmakers may include Yi Sang, Kang Kyongae, Kim Tongni, O Chonghui, Kim Youngha, Han Kang, Park Chanwook, Lee Changdong, and Bong Joonho, as well as works relevant to North Korea.

Previous terms offered: Spring 2022, Spring 2020, Fall 2018.

ASNS 2875 (c, IP) Korea Beyond Borders: Contemporary Literature and Film

John Kim.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Examines the ways in which contemporary Korean literature and film take on the world. Looks beyond received cultural and historical boundaries by exploring how the world figures within the Korean cultural imagination, as well as how Korea might fit in with the rest of the world. Drawing from, but not limited to, the fiction and films emerging after the IMF (International Monetary Fund) and Asian financial crises of the 1990s and as part of the recent global surge of Korean pop culture, follows Korean writers, filmmakers, and their characters, as they move between national borders (North/South Korea, Japan, China, Vietnam Soviet Union, Europe, Australia, and the US) and boundaries of genre, form, language, and identity. Explores themes of history and memory; relocation and dislocation; capitalism and globalism; technology and reimagining the human. Authors and filmmakers may include: Han Kang, J. M. Lee, Bong Joon-ho, Min Jin Lee, Lee Chang-dong, Kim Youngha, and Bae Suah.

Previous terms offered: Spring 2021, Fall 2019.

ASNS 2880 (c) Asian American History, 1850 to the Present

Non-Standard Rotation. Enrollment limit: 35.

Surveys the history of Asian Americans from the mid-nineteenth century to the present. Explores the changing experiences of Asian immigrants and Asian Americans within the larger context of American history. Major topics include immigration and migration, race relations, anti-Asian movements, labor issues, gender relations, family and community formation, resistance and civil rights, and representations of Asian Americans in American popular culture. Readings and course materials include scholarly essays and books, primary documents, novels, memoirs, and films. This course is part of the following field(s) of study: United States. (Same as: HIST 2161)

Previous terms offered: Spring 2022, Spring 2020.

ASNS 2881 (c, DPI) Japanese American Incarceration: Removal, Redress, Remembrance

Connie Chiang.

Every Other Year. Fall 2022. Enrollment limit: 16.

Seminar. Examines the mass imprisonment of Japanese Americans during World War II. Focuses on how historians have interpreted this episode and how Japanese Americans have remembered and reclaimed it. Topics include government justifications for incarceration, the operation of the camps, the diverse experiences of Japanese Americans, the postwar redress movement, and historical memory and commemorations. Also analyzes the political application of this history in discussions of contemporary immigration policy and social justice more broadly. Readings include secondary and primary sources, such as court cases, government documents, films, photography, art, oral histories, memoirs, and fiction. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2641)

Previous terms offered: Fall 2020.

ASNS 2882 (c, DPI) Asian America and Empire: History, Society, Literature

Nancy Riley; Connie Chiang; Belinda Kong.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Asian America encompasses a diverse and dynamic population. This interdisciplinary course explores the complexities of Asian America by focusing on key historical and contemporary issues. Recognizing that much Asian American experience comes from the processes and history of US empire building, we will examine topics such as immigration, citizenship, the politics of race and ethnicity, identity formation, literary and cultural self-representation, community building, class and generational divides, gender and sexuality, and political mobilization. We will use a variety of lenses to gain critical perspective, including history, social relations and practices, and cultural production, such as literature, film, media, and art. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.

ASNS 2890 (c, IP) East Asian Environmental History, 1600-2000

Sakura Christmas.

Every Other Spring. Fall 2022. Enrollment limit: 16.

Seminar. The Anthropocene defines an epoch in which humans have become the dominant force in shaping their environment. Examines the role of East Asia in the emergence of this new era, from the seventeenth century to the present. In debating the narrative of ecological change in China, Japan, and Korea, readings and discussions focus on how successive regimes transformed their environments, and conversely, how those environments also structured modern human society. Questions what specific political, social, and economic changes triggered the Anthropocene in East Asia; how cultural, religious, and intellectual constructs have conditioned its arrival and acceleration. Weekly topics include: commodity frontiers, environmental sustainability, public health, industrial pollution, and nuclear technology. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2891, ENVS 2491)

Previous terms offered: Fall 2020.

ASNS 2892 (c, IP) Maps, Territory, and Power in Asia

Sakura Christmas.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. From the Mercator projection to GPS, maps structure our lived experience as much as they reflect "objective" representations of our surroundings. This seminar examines the geopolitical formations of and within Asia through the history of cartography from the seventeenth century to the present. In exploring both inland and maritime frontiers, we analyze how this technology has sought to exert scientific hegemony over alternate conceptions of space in Asian contexts in order to legitimize state power. In so doing, we trace the deep history of contemporary border disputes on land and at sea. Sessions include working with original specimens in special collections. Note: This course is part of the following field(s) of study: Colonial Worlds, East Asia and South Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2892)

Previous terms offered: Spring 2021.

ASNS 2900 (c, IP, VPA) Hollywood Imagination of Asia

Every Other Year. Enrollment limit: 35.

How has Hollywood treated Asia and Asians? To what extent have Hollywood film productions engaged in either erotic fascination or racial prejudice, when presenting Asia as a cinematic setting and Asians as a cultural other? Examining Hollywood's imaginative visions of the east, the course takes students on an exploratory journey from classic Hollywood films to contemporary blockbusters. Issues may include race and stardom in "Shanghai Express", yellowface in "Good Earth", the exotic Asian female in "The World of Suzie Wong", stereotypes of Tibetans in "Seven Years in Tibet", and an American's perception of Tokyo in "Lost in Translation". We will also explore the Orientalist imagination through sexualized Geisha or masculinized Mulan as well as transnational crossings in the animated film "Kungfu Panda". In addition to analyzing themes and the social-cultural implications of films, the course also introduces students to the cinematic language: mise-en-scene, cinematography, and editing. Counts toward the major in Asian studies and the minor in cinema studies. (Same as: CINE 2078)

Previous terms offered: Spring 2022, Spring 2020.

ASNS 2910 (b) Asian American Experience

Non-Standard Rotation. Enrollment limit: 35.

Explores the experience of Asian Americans in contemporary US society. Focusing on the present but drawing from historical experience, we look at important elements and issues for Asian Americans today: the role of immigration and immigration policy; the advantages and disadvantages of the promotion of a pan-Asian culture; the particular experiences of different Asian cultures in the US; the "myth of the model minority"; and the role of gender in these experiences. Also discusses what an understanding of Asian American experience adds to our understanding of race and ethnicity in the US today. (Same as: SOC 2268)

Prerequisites: SOC 1101.

Previous terms offered: Spring 2019.

ASNS 2920 (b, IP) Political and Economic Development in East Asia

Non-Standard Rotation. Enrollment limit: 35.

Provides an introduction to diversity and development in East Asia. The course first focuses on the rise and decline of a China- and a Japan-centric order before WWII and discusses their historical impacts on today's domestic politics and international relations. The course then traces the postwar political economic developments. It examines the economic miracles in Asian countries and discusses their democratization. It also presents the process of Chinese economic reform and its impacts on the regional order. The course finishes with an examination of the Asian financial crisis and its impacts on regional politics. (Same as: GOV 2444)

Previous terms offered: Fall 2020, Fall 2019.

ASNS 2921 (b, IP) International Relations in East Asia

Non-Standard Rotation. Enrollment limit: 35.

Analyzes relations between the various states in East Asia and between those states and countries outside the region, including the United States. The course addresses empirical and theoretical questions, including: What are the threats to peace and prosperity in the region, and how are the different countries responding? What explains the foreign policy strategies of different countries, including China and Japan, and how have they changed over time? How can broader theories of international relations inform, and be informed by, the nature of foreign policy choices in this region? Is East Asia headed toward greater cooperation or conflict? (Same as: GOV 2694)

Previous terms offered: Fall 2020, Fall 2019.

ASNS 3010 (c, IP) Neo-Confucianism

Every Other Year. Enrollment limit: 16.

Examines the so-called Neo-Confucian philosophy in historical contexts. The principle themes include ethics, cosmology, and epistemology. When most people think of Chinese philosophy, they think of philosophers from the classical period, e.g., Confucius. But these thinkers marked only the beginning of a rich and prolific philosophical tradition that continued for over two millennia. This class presents the central texts and themes of Neo-Confucianism and guides students to investigate them in the history of East Asia from 900 through early 1900s. The primary geographical focus is China, but we will also read works of important thinkers in Japan and Korea. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non Euro/US requirements for history majors and minors. (Same as: HIST 3321)

Prerequisites: ASNS 1000 - 2969 or ASNS 3000 or higher or HIST 1000 - 2969 or HIST 3000 or higher.

Previous terms offered: Spring 2019.

ASNS 3060 (b, IP) Capitalism and State Power in China

Christopher Heurlin.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

Seminar. Explores the paradoxes of contemporary China, a communist regime that boasts economic growth rates that are the envy of the world. While communism failed in Eastern Europe decades ago, the Chinese Communist Party has been surprisingly successful and leads one of the oldest dictatorships in the world. Explores how capitalism and state power actually work in China. Topics include ethnic conflict, patronage and corruption, elite politics, popular protest, elections, and civil society. Students develop and write a research paper on contemporary Chinese politics. Previous coursework in Chinese politics is not necessary. (Same as: GOV 3410)

Prerequisites: GOV 1000 - 2969 or GOV 3000 or higher or ASNS 1000 - 2969 or ASNS 3000 or higher.

Previous terms offered: Spring 2022, Spring 2021, Spring 2019.

ASNS 3070 (c, VPA) Historicizing the Contemporary: Topics in Recent Chinese Art

Non-Standard Rotation. Enrollment limit: 12.

Identifies and explores key topics in recent publications of contemporary Chinese art. Alongside of subject matter, students analyze usages of socio-political context and methodologies for framing different narratives of contemporary Chinese art. Through studies of individual artists and larger contemporary art trends, students unpack current art histories while also proposing alternative approaches. Readings include monographs, exhibition catalogs, interviews, and systematic reviews of journals. Questions include: What are the challenges of historicizing the present? How does the global art world reconcile the existence of multiple art worlds? How have artists intervened in narratives of contemporary Chinese art? (Same as: ARTH 3200)

Previous terms offered: Spring 2021, Spring 2019.

ASNS 3080 (c, IP, VPA) China's Cultural Revolution through Film

Shu-chin Tsui.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines China's Great Proletarian Cultural Revolution (1966-1976) through the lens of cinema. Viewed as one of the most destructive mass movements in China's modern history, the CR dramatically shaped national politics and deeply affected the life of ordinary people. With film productions made during and after the CR as primary materials, the course seeks to explain the nature of the Cultural Revolution as well as how motion pictures (re)construct CR rhetoric and why the CR remains a source of trauma that haunts the memories of those who experienced it. Popular film titles such as "The White Haired Girl", "To Live", "Farewell My Concubine", and others will lead students on a journey through history via the cinemas of socialist model operas, post-socialist retrospections, and alternative re-constructions. The course aims to be intellectually thought-provoking and cinematically engaging. Note: The course fulfills the major in Asian studies and minor in Chinese. It also fulfills the non-US cinema requirement for cinema studies minors (Same as: CINE 3053)

Prerequisites: ASNS 1000 - 2969 or ASNS 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Fall 2020.

ASNS 3300 (b, IP) Advanced Seminar in Japanese Politics

Henry Laurence.

Every Other Spring. Spring 2023. Enrollment limit: 15.

Analyzes the political, social, and cultural underpinnings of modern politics and asks how democracy works in Japan compared with other countries. Explores how Japan has achieved stunning material prosperity while maintaining among the best healthcare and education systems in the world, high levels of income equality, and low levels of crime. Students are also instructed in conducting independent research on topics of their own choosing. (Same as: GOV 3400)

Prerequisites: ASNS 2320 (same as GOV 2450).

Previous terms offered: Spring 2019.

ASNS 3760 (c, IP) Beyond Western Harmony: Composing with a Global Perspective

Non-Standard Rotation. Enrollment limit: 10.

Although functional harmony is the central organizing principle of Western music, it is completely absent in other complex musical systems around the world. Considers other means of music organization and how to incorporate those concepts in students' compositions. Topics include traditional polymeter in Ewe drumming, scale construction and metric design in Indian raag and taal, Confucian philosophy in Chinese sizhu music, and colotomic organization in Javanese gamelan. (Same as: MUS 3502)

Prerequisites: MUS 2401 or MUS 2403 or MUS 2501.

Previous terms offered: Spring 2021.

ASNS 3801 (c, DPI, IP) Imagined Asias

Non-Standard Rotation. Enrollment limit: 16.

Examines how Asia has been represented by America and Europe and how Asian authors have responded. Draws from a wide archive of literature, theory, film, and mass culture from mid-nineteenth century to the present. Not a survey: focus on case studies that explore historical exemplars of as well as conceptual alternatives to the critical model of orientalism, which regards western depictions of Asia as necessarily reflecting the culture of empire. Issues include US racial discourses of exoticism and the yellow peril; western modernist and postmodern appropriations of "oriental" cultures for self-critiques; and strategies of hybridity, self-orientalism, and occidentalism by Asian and Asian diasporic writers and filmmakers. Possible works by Edward Said, Pierre Loti, Bret Harte, Jack London, Winnifred Eaton, David Henry Hwang, Ezra Pound, Italo Calvino, Roland Barthes, Gayatri Spivak, Rey Chow, J. G. Ballard, Kazuo Ishiguro, Amitav Ghosh, Haruki Murakami, Bei Dao, Shan Sa, Su Tong, Ang Lee, Wong Kar-wai, and Stephen Chow. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 3028)

Prerequisites: ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher or ASNS 1000 - 2969 or ASNS 3000 or higher.

Previous terms offered: Spring 2022, Spring 2019.

ASNS 3802 (c, IP, VPA) Re-mapping Global Contemporary Art

Peggy Wang.

Every Other Year. Fall 2022. Enrollment limit: 12.

Studies competing claims over what it means for contemporary art to be called global. In particular, traces how the controversial category of "global contemporary art" has been used to both perpetuate and resist Western-centered views of the world. Focuses on artworks, exhibitions, and texts that specifically counter Western-centrism in gatekeeping tactics, exclusionary systems of evaluation, and hegemonic art historical narratives. Examples include the 1989 Havana Biennial, 1999 Global Conceptualism: Points of Origin, post-colonial critiques, and recent artworks and exhibits that have sought to re-map global cartographies of contemporary art. Students taking this as an ASNS course will concentrate on examples relevant to their focus of study. (Same as: ARTH 3490)

ASNS 3820 (c) Law and Justice in East Asia

Non-Standard Rotation. Enrollment limit: 16.

Examines how law and justice in East Asia became markers of modernity and sovereignty from the eighteenth to twentieth centuries. The kinds of punishment used in a society often act as a measure in judging whether that society is civilized or barbaric, advanced or backward. Major themes include: stereotypes of "oriental barbarism," torture and capital punishment, village law and gender, extraterritoriality and imperialism, sentiment and mass media, war tribunals, and thought reform. Students analyze legal documents in translation alongside recent scholarship in the field and write a major paper based on primary source research. No prior knowledge of an Asian language necessary. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 3420)

Prerequisites: ASNS 2000 - 2969 or HIST 2000 - 2969.

Previous terms offered: Spring 2022, Spring 2020.

Chinese

CHIN 1101 (c) Elementary Chinese I

Xiaoke Jia.

Every Fall. Fall 2022. Enrollment limit: 18.

A foundation course for communicative skills in modern Chinese (Mandarin). Five hours of class per week. Introduction to the sound system, essential grammar, basic vocabulary, and approximately 350 characters (simplified version). Develops rudimentary communicative skills. No prerequisite. Followed by Chinese 1102.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHIN 1102 (c) Elementary Chinese II

Xiaoke Jia.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Chinese 1101. Five hours of class per week. Covers most of the essential grammatical structures and vocabulary for basic survival needs and simple daily routine conversations. Introduction to the next 350 characters (simplified version), use of Chinese-English dictionary. Followed by Chinese 2203.

Prerequisites: CHIN 1101 or Placement in CHIN 1102.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHIN 1103 (c) Advanced Elementary Chinese I

Jing Xie.

Every Fall. Fall 2022. Enrollment limit: 18.

An accelerated course for elementary Chinese designed for heritage speakers and for students who have had some background in Chinese language. Emphasis on improvement of pronunciation, consolidation of basic Chinese grammar, vocabulary enhancement, reading comprehension, and writing. Three hours of class per week and individual tutorials. Followed by Chinese 1104. Students should consult with the program about appropriate placement.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHIN 1104 (c) Advanced Elementary Chinese II

Xiaoke Jia.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Chinese 1103. Three hours of class per week and individual tutorials. An all-around upgrade of communicative skills with an emphasis on accuracy and fluency. Covers more than 1,000 Chinese characters together with Chinese 1103. Propels those with sufficient competence directly to Advanced-Intermediate Chinese [2205 and 2206] after a year of intensive training while prepares others to move up to intermediate (second-year) Chinese language course. Followed by Chinese 2203 or 2205 with instructor's approval.

Prerequisites: CHIN 1103.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHIN 2203 (c) Intermediate Chinese I

Jing Xie.

Every Fall. Fall 2022. Enrollment limit: 18.

An intermediate course in modern Chinese. Five hours of class per week. Consolidates and expands the knowledge of grammar and vocabulary, with 400 additional characters. Further improves students' Chinese proficiency with a focus on accuracy, fluency, and complexity. Followed by Chinese 2204.

Prerequisites: CHIN 1102 or CHIN 1104 or Placement in CHIN 2203.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHIN 2204 (c) Intermediate Chinese II

Jing Xie.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Chinese 2203. Five hours of class per week. Further develops students' communicative competence and strives to achieve a balance between the receptive and productive skills. Students learn another 400 characters; read longer, more complex texts; and write short compositions with increasing discourse cohesion. Followed by Chinese 2205.

Prerequisites: CHIN 2203.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHIN 2205 (c) Advanced-Intermediate Chinese I

Jing Xie.

Every Fall. Fall 2022. Enrollment limit: 18.

A pre-advanced course in modern Chinese. Three hours of class per week. Upgrades students' linguistic skills and cultural knowledge to explore edited or semi-authentic materials. Followed by Chinese 2206.

Prerequisites: CHIN 2204 or Placement in CHIN 2205.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHIN 2206 (c) Advanced-Intermediate Chinese II

Jing Xie.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Chinese 2205. Three hours of class per week. Further enhances students' ability in the three modes of communication: interpretive, interpersonal, and presentative. Focuses on the improvement of reading comprehension and speed, and essay writing skills of expository and argumentative essays. Deals particularly with edited and/or authentic materials from Chinese mass media such as newspapers and the Internet. Followed by Chinese 3307.

Prerequisites: CHIN 2205.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHIN 3307 (c) Advanced Chinese I

Xiaoke Jia.

Every Fall. Fall 2022. Enrollment limit: 18.

An advanced course in modern Chinese. Three hours of class per week. Designed to develop mastery of the spoken and written language.

Emphasis given to reading and writing, with focus on accuracy, complexity, and fluency in oral as well as written expression. Assigned work includes written composition and oral presentations. Repeatable when contents are different.

Prerequisites: CHIN 2206 or Placement in CHIN 3307.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHIN 3308 (c) Advanced Seminar in Chinese: Social China

Every Spring. Enrollment limit: 18.

Advanced seminars in Chinese offer students the opportunity to study a disciplinary subject with Chinese as the language of instruction. Investigates pressing social issues in contemporary China such as air pollution, food contamination, left-behind children, leftover women, rural migrants, and more. Students broaden their understanding of social-cultural reality through primary and secondary sources in the target language. Discussion participation and short but formal essay compositions are regular in and out of class activities. Satisfies the minor requirement in Chinese and the major in Asian studies.

Prerequisites: CHIN 2206.

Previous terms offered: Spring 2022, Spring 2020.

CHIN 3309 (c, IP) Advanced Seminar in Chinese: Modern & Contemporary Chinese Literature

Xiaoke Jia.

Non-Standard Rotation. Spring 2023. Enrollment limit: 12.

An introduction to modern and contemporary Chinese literature. Provides students with an overview of Chinese literature since 1919. Examines the changes of China and Chinese language over the past one hundred years against sociocultural contexts. Selected works include but are not limited to fiction, poetry, drama, and prose. Authors may include Lu Xun, Eileen Chang, Xu Zhimo, Xiao Hong, Lao She, Cao Yu, Fang Fang, and Mo Yan. All readings, discussions, and assignments in Chinese. Equivalent of Chinese 3307 is recommended.

Prerequisites: CHIN 3307.

Previous terms offered: Spring 2021, Spring 2019.

Japanese

JPN 1101 (c) Elementary Japanese I

Hiroo Aridome.

Every Fall. Fall 2022. Enrollment limit: 18.

An introductory course in modern Japanese language. In addition to mastering the basics of grammar, emphasis is placed on active functional communication in the language, as well as reading and listening comprehension. Context-oriented conversation drills are complemented by audio materials. Basic cultural information also presented. The two kana syllabaries and sixty commonly used kanji are introduced. No prerequisite. Followed by Japanese 1102.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

JPN 1102 (c) Elementary Japanese II

Hiroo Aridome.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of the fundamentals of Japanese grammar structures and further acquisition of spoken communication skills, listening comprehension, and proficiency in reading and writing. Introduces an additional ninety kanji.

Prerequisites: JPN 1101 or Placement in JPN 1102.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

JPN 2203 (c) Intermediate Japanese I

Ayami Morita.

Every Fall. Fall 2022. Enrollment limit: 18.

An intermediate course in modern Japanese language, with introduction of advanced grammatical structures, vocabulary, and characters. Continuing emphasis on acquisition of well-balanced language skills based on an understanding of the actual use of the language in the Japanese sociocultural context. Introduces an additional 100 kanji.

Prerequisites: JPN 1102 or Placement in JPN 2203.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

JPN 2204 (c) Intermediate Japanese II

Ayami Morita.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Japanese 2203 with the introduction of more advanced grammatical structures, vocabulary, and characters.

Prerequisites: JPN 2203.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

JPN 2205 (c) Advanced-Intermediate Japanese I

Hiroo Aridome.

Every Fall. Fall 2022. Enrollment limit: 18.

Building on the fundamentals of Elementary and Intermediate Japanese, students increase their proficiency in both the spoken and written language. A variety of written and audiovisual Japanese language materials (essays, movies, manga, etc.) are used to consolidate and expand mastery of more advanced grammatical structures and vocabulary. Students read or watch relevant materials, discuss in class, and then write and/or present on selected Japan-related topics.

Prerequisites: JPN 2204 or Placement in JPN 2205.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

JPN 2206 (c) Advanced-Intermediate Japanese II

Hiroo Aridome.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation and progression of materials used in Japanese 2205.

Prerequisites: JPN 2205.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

JPN 3307 (c) Advanced Japanese I

Ayami Morita.

Every Fall. Fall 2022. Enrollment limit: 18.

An advanced course in modern Japanese designed to develop mastery of the spoken and written language. A variety of written and audiovisual Japanese language materials (essays, movies, manga, etc.) are used. This is a project-oriented class and students learn to express complex thoughts and feelings, as well as how to properly conduct oneself in a formal Japanese job interview situation.

Prerequisites: JPN 2206 or Placement in JPN 3307.

Previous terms offered: Fall 2021, Fall 2019, Fall 2018.

JPN 3308 (c) Advanced Japanese II

Ayami Morita.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

A continuation of Japanese 3307. Continued efforts to develop oral and written fluency in informal and formal situations. Reading of contemporary texts of literature, business, and social topics.

Prerequisites: JPN 3307.

JPN 3309 (c, IP) Advanced Japanese Seminar

Hiroo Aridome.

Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

An advanced Japanese language seminar where students will engage entirely with original texts and media created for everyday Japanese consumption (such as articles, essays, short stories, films, etc.) for class discussion and presentation. The discussions will be led by students and they will be encouraged to critically engage with the materials and make connections to issues in contemporary Japan. Projects will include a mock interview for which students will learn how to conduct themselves in formal Japanese situations (for example, Japanese workplaces, conferences, etc.). All readings and discussions in Japanese.

Prerequisites: Placement in JPN 3309.

Biochemistry

Overview & Learning Goals

Learning Goals

Biochemistry lies at the interface of chemistry and biology, a diffuse and ever-changing junction. A student of this reductionist way of evaluating our natural world must master multiple disciplines and approaches to understand this interface.

The Bowdoin biochemistry curriculum provides the tools and the chemical and biological fundamentals needed to evaluate and explain observed phenomena. Students will understand the basic chemistry of molecules that form the basis of life, including nucleic acids, proteins, lipids, and carbohydrates. How these molecules combine to form the flow of information within and between cells and species, and from generation to generation, is fundamental.

Students start by learning principles of chemistry and biology as underpinned by mathematics and physics, and move on to mid-level courses that combine these concepts and apply them to the understanding of biochemistry. These courses also provide more

advanced approaches for solving biochemical problems through experimentation.

Subsequent upper-level courses continue to explore the basis of energy and information flow in chemical and biological systems, and critically analyze structure and complex biochemical interactions that form the basis of life.

Biochemistry Core Competencies Map (<https://www.bowdoin.edu/biochemistry/pdf/biochemistry-core-competencies.pdf>)

Fundamental Learning Goals

Knowledge competencies

1. Master the foundational concepts of general and organic chemistry, including equilibrium, kinetics, and reactivity, and apply these concepts to biological systems.
2. Identify the factors that determine the three-dimensional structures of biological macromolecules and the organization of cells.
3. Evaluate how the structure of biological macromolecules relates to function, and predict how changes in structure will impact function.
4. Develop a conceptual, mechanistic, and mathematical understanding of biomolecular interactions, including binding and catalysis.
5. Explain how energy is stored, transformed, and harnessed in biological systems.
6. Understand how information is stored, retrieved, and transmitted in biological systems.

Skill-based competencies

1. Solve complex data-based problems.
2. Critically evaluate the primary literature.
3. Independently propose and design experiments and approaches to address questions in biochemistry.
4. Safely perform laboratory-based experiments.
5. Effectively communicate scientific information in oral, written, and visual formats to specialized and general audiences.
6. Interpret and critically analyze data, while appropriately invoking the principles of probability and statistics.
7. Understand and apply theoretical, conceptual, and empirical models.

Options for Majoring in the Program

Students may elect to major in biochemistry or to coordinate a major in biochemistry with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Bowdoin does not offer a minor in biochemistry.

Associate Professors: Benjamin C. Gorske (Chemistry), Anne E. McBride (Biology), Kana Takematsu (Chemistry)

Laboratory Instructors: Aimee Eldridge, Kate R. Farnham

Faculty/Staff Website (<https://www.bowdoin.edu/biochemistry/faculty-and-staff/>)

Requirements

Biochemistry Major

Code	Title	Credits
Required Courses		
BIOL 1102	Biological Principles II	1
or BIOL 1109	Scientific Reasoning in Biology	
BIOL 2124	Biochemistry and Cell Biology	1
Select one of the following:		1
CHEM 1092	Introductory Chemistry and Quantitative Reasoning II	
CHEM 1102	Introductory Chemistry II	
CHEM 1109	General Chemistry	
CHEM 2250	Organic Chemistry I	1
CHEM 2260	Organic Chemistry II	1
CHEM 2320	Biochemistry	1
CHEM 2510	Chemical Thermodynamics and Kinetics	1
MATH 1700	Integral Calculus (or higher)	1
PHYS 1130	Introductory Physics I	1
or PHYS 1140	Introductory Physics II	
Select two electives from the following (one must be 3000 or above):		2
BIOL 2210	Plant Ecophysiology	
BIOL 2112	Genetics and Molecular Biology	
BIOL 2118	Microbiology	
BIOL 2175	Developmental Biology	
BIOL 2566	Molecular Neurobiology	
BIOL 3304	The RNA World	
BIOL 3314	Advanced Genetics and Epigenetics	
BIOL 3333	Advanced Cell and Molecular Biology	
CHEM 2100	Chemical Analysis	
CHEM 3250	Structure Determination in Organic Chemistry	
CHEM 3270	Biomimetic and Supramolecular Chemistry	
CHEM 3310	Chemical Biology	
CHEM 3510	Reactivity and Kinetics	

A minimum of eleven courses from among the required and elective biochemistry courses must be completed for the major. Students placing into MATH 1800 Multivariate Calculus or higher must take MATH 1300 Biostatistics, MATH 1400 Statistics in the Sciences, or one math course at the 1800-level or above.

Students placing out of BIOL 1109 Scientific Reasoning in Biology, CHEM 1109 General Chemistry, PHYS 1130 Introductory Physics I, or PHYS 1140 Introductory Physics II must still complete a minimum of eleven courses related to biochemistry.

Additional Information

Additional Information and Program Policies

- Only one D grade is allowed in courses required for the major. This D must be offset by a grade of B or higher in another course also required for the major.

- Students may not count courses taken Credit/D/Fail toward the major.
- Advanced placement exams are used for placement in courses for the biochemistry major, but do not count toward the eleven courses required for the major.
- Biochemistry majors cannot minor or major in biology, chemistry, or neuroscience, and may only double-count courses to a second major or a minor with permission of the Biochemistry Program.
- Bowdoin does not offer a minor in biochemistry.
- Students may request transfer credit by talking with the program director the semester prior to enrolling in a course.
- Independent studies do not count as an elective, but can count as one of the eleven required courses for the major.
- Students may engage in independent study at the advanced (4000–4051) level. Majors pursuing honors in biochemistry are required to register for BIOC 4050 during the first semester of their senior year and BIOC 4051 during the second semester of their senior year.
- Advanced independent studies and honors projects do not count as electives, but may be applied to towards the total number of credits required to complete the major.
- Many research advisors require that students perform summer research in their laboratory prior to registering for advanced independent study, so interested students should aim to finalize such plans with their prospective research advisor in the first semester of their junior year.

Information for Incoming Students (p. 102)

The Biochemistry major requires a firm foundation in both chemistry and biology prior to enrollment in the core biochemistry courses. First-year students with an interest in biochemistry should complete introductory chemistry coursework (CHEM 1091 Introductory Chemistry and Quantitative Reasoning I, CHEM 1092 Introductory Chemistry and Quantitative Reasoning II, CHEM 1101 Introductory Chemistry I, CHEM 1102 Introductory Chemistry II or CHEM 1109 General Chemistry) and introductory biology coursework (BIOL 1101 Biological Principles I, BIOL 1102 Biological Principles II or BIOL 1109 Scientific Reasoning in Biology) by the end of the first year, if possible. Please consult the biology (<https://bowdoin-public.courseleaf.com/departments-programs/biology/#additionalinformationtext>) and chemistry (<https://bowdoin-public.courseleaf.com/departments-programs/chemistry/#additionalinformationtext>) sections of the Catalogue for information about introductory course sequences and proper placement.

If placement results indicate a two-semester introductory chemistry sequence is required, students are recommended to begin with introductory chemistry in their first semester. If the two-semester introductory biology sequence is also required, one option is to complete these courses in the sophomore year, in parallel with the organic chemistry sequence; please consult with a member of the biochemistry program for suggestions about timing. The most important planning step is to ensure that CHEM 1092 Introductory Chemistry and Quantitative Reasoning II, or CHEM 1102 Introductory Chemistry II, or CHEM 1109 General Chemistry is completed during the first year to enable enrollment in the two-semester organic chemistry sequence in the sophomore year. Please contact a member of the biochemistry program if you have any questions.

Note that completing the tiered biochemistry major requires, in most cases, that students take a math and a lab-science course, or take two lab-science classes, at the same time in their first year. This is most often during the second semester; for example, a student placed in

CHEM 1101 Introductory Chemistry I/CHEM 1102 Introductory Chemistry II and BIOL 1109 Scientific Reasoning in Biology may choose to enroll in CHEM 1102 Introductory Chemistry II and BIOL 1109 Scientific Reasoning in Biology in their second semester of their first year. Taking more than one math/lab-science course in the same semester of the first year can be challenging, so students are encouraged to speak with their pre-major academic advisors about designing a feasible course schedule if they are considering future study in biochemistry.

Additional information: For a flow diagram of courses required for the biochemistry major, please visit the "Navigating the Major" page (<https://www.bowdoin.edu/biochemistry/requirements/navigating-the-biochemistry-major.html>) of the biochemistry program's website.

Courses

BIOC 2124 (a, INS, MCSR) Biochemistry and Cell Biology

Bruce Kohorn; Aimee Eldridge.

Every Fall. Fall 2022. Enrollment limit: 35.

Focuses on the structure and function of cells as we have come to know them through the interpretation of direct observations and experimental results. Emphasis is on the scientific (thought) processes that have allowed us to understand what we know today, emphasizing the use of genetic, biochemical, and optical analysis to understand fundamental biological processes. Covers details of the organization and expression of genetic information, and the biosynthesis, sorting, and function of cellular components within the cell. Concludes with examples of how cells perceive signals from other cells within cell populations, tissues, organisms, and the environment. Three hours of lab each week. Not open to students who have credit for Biology 2423. (Same as: BIOL 2124)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

BIOC 2320 (a, MCSR) Biochemistry

Danielle Dube; Kate Farnham.

Every Spring. Spring 2023. Enrollment limit: 36.

Focuses on the chemistry of living organisms. Topics include structure, conformation, and properties of the major classes of biomolecules (proteins, nucleic acids, carbohydrates, and lipids); enzyme mechanisms, kinetics, and regulation; metabolic transformations; energetics and metabolic control. Lectures and four hours of laboratory work per week. This course satisfies a requirement for the biochemistry major. (Same as: CHEM 2320)

Prerequisites: CHEM 2260 or CHEM 2261.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOC 2423 (a, INS) Biochemistry of Cellular Processes

Jake Muscato.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the biochemical mechanisms that underlie the basis of life. Starts with the chemistry of proteins, DNA, lipids, and carbohydrates to build the main elements of a cell. Moves on to the process of gene organization and expression, emphasizing the biochemical mechanisms that regulate these events. Explores next the organization of the cell with emphasis on genetic and biochemical regulation. Concludes with specific examples of multicellular interactions, including development, cancer, and perception of the environment. This course does NOT satisfy a requirement for the biochemistry major and is not open to students who have credit for Biology 2124. Students who intend to enroll in Biology 2124 should not register for Biology 2423. (Same as: BIOL 2423)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 or BIOL 2100 or higher and CHEM 1092 or either CHEM 1102 or CHEM 1109 or CHEM 2250.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

Biology

Overview & Learning Goals

Learning Goals

General Competencies and Goals

The mission of Bowdoin College's biology department is to offer an educational program that informs, challenges, and stimulates undergraduates in a broad range of biological inquiry at many levels of organization, from biochemistry and molecular biology through population and ecosystem ecology. In addition to covering current and historical concepts and controversies in biology, the curriculum is designed to give students critical analytical, problem-solving, quantitative, and writing skills, thereby preparing them for further study in biology and related fields at the graduate level, in the health professions, in scientific education, or in other areas, depending upon the students' interests. Courses in the biology department also meet the needs of non-majors and contribute to general scientific literacy.

The goals of our curriculum are for students to acquire the ability to: (1) interpret biological knowledge; (2) undertake self-designed research through courses or independent research; (3) communicate outcomes of research; (4) apply biological concepts to novel situations; (5) apply knowledge from multiple fields to biological questions and vice versa.

Fundamental Concepts

Integrative Biology

1. Bioenergetics (from the level of molecules and cells to ecosystems)
2. Structure and function (compartmentalization, chemical basis of life, central dogma, emergent properties)
3. Balance of forces and trade-offs
4. Homeostasis and regulation (from signaling pathways to population regulation)
5. Evolution (phylogenetics, heredity, mechanisms of evolutionary change)

- 6. Ecology (species interactions, population biology, ecosystem processes, natural history)
- 7. Influence of biology on social issues (conservation, research practices, bioethics)

Ecology, Evolution, and Marine Biology

- 1. Environmental determinants of organismal structure and function
- 2. Energy flow through ecosystems
- 3. The regulation of populations
- 4. Population interactions
- 5. Structure, assembly, and dynamics of communities
- 6. Micro-evolutionary processes—from molecules to phenotypic traits
- 7. Macro-evolutionary processes—history of life, role of extinction, phylogenetic relationships
- 8. The relationship between genotype and phenotype
- 9. Applying ecological and evolutionary concepts to contemporary environmental and social issues

Molecular and Cellular Biology

- 1. Bioenergetics
- 2. Structure and function (cellular compartmentalization, the chemical basis of life, emergent properties in biological systems)
- 3. The manner in which information is stored in the genome and retrieved
- 4. Balance of forces and trade-offs
- 5. Homeostasis and regulation
- 6. Evolution (phylogenetics, heredity, mechanisms of evolutionary change)
- 7. Bioethics and social issues

Core Skills

- 1. Understanding and using the primary literature in support of research
- 2. Asking questions and generating testable hypotheses
- 3. Hypothesis testing and experimental design
- 4. Laboratory and field data collection
- 5. Data analysis, including statistical and quantitative analyses
- 6. Data interpretation
- 7. Written and oral communication and presentations

Options for Majoring or Minorin in the Department

Students may elect to major in biology or to coordinate a major in biology with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in biology, with the exception of biochemistry and neuroscience majors.

Adjunct Lecturer: Olaf Ellers
Visiting Faculty: Jacob Muscato, Daniel Powell (Neuroscience)

Laboratory Instructors: Pamela J. Bryer, Shana Stewart Deeds, Aimee M. Eldridge, Kate R. Farnham, Anja Forche, Sandra Fussell, Stephen A. Hauptman, Kyle Martin, Jaret S. Reblin, Bethany Whalon

Faculty/Staff Website (<https://www.bowdoin.edu/biology/faculty-and-staff/>)

Requirements
Biology Major

Students majoring in biology can meet their major requirements by completing either the Integrative Biology concentration, the Ecology, Evolution, and Marine Biology concentration, or the Molecular and Cellular Biology concentration. Each concentration consists of twelve courses, including at least eight courses in the department, exclusive of independent study or honors projects and courses below 1100.

Integrative Biology Concentration

Code	Title	Credits
Required Courses		
BIOL 1102	Biological Principles II	1
or BIOL 1109	Scientific Reasoning in Biology	
<i>Select one of the following:</i>		1
CHEM 1092	Introductory Chemistry and Quantitative Reasoning II	
CHEM 1102	Introductory Chemistry II	
CHEM 1109	General Chemistry	
any other CHEM course above 1109		
Select two courses higher than 1100 from any two of the following departments:^a		2
computer science, earth and oceanographic science, physics, or MATH 1300 or higher.		
Select one 2000-level course (or above) in any of the natural sciences:		1
including biology (division a courses), or one course in MATH 1300 or higher.		
Select one core course from each of the three groups below:^b		3

<i>Group 1</i>		
BIOL 2112	Genetics and Molecular Biology	
BIOL 2118	Microbiology	
BIOL 2124	Biochemistry and Cell Biology	
BIOL 2135	Neurobiology	
BIOL 2175	Developmental Biology	
<i>Group 2</i>		
BIOL 2135	Neurobiology	
BIOL 2175	Developmental Biology	

BIOL 2210	Plant Ecophysiology	
BIOL 2214	Comparative Animal and Human Physiology	
Group 3		
BIOL 2316	Evolution	
BIOL 2319	Biology of Marine Organisms	
BIOL 2325	Biodiversity Conservation Science	
BIOL 2327	Ecology	
BIOL 2330	Marine Molecular Ecology and Evolution	
Select four elective biology courses above 1100. ^c		4

- a PSYC 2520 Data Analysis may also satisfy this requirement in place of MATH 1300 Biostatistics, or higher.
- b Courses listed in more than one group may not be double-counted between groups.
- c Two of the elective courses must be numbered higher than 2499.

Ecology, Evolution, and Marine Biology Concentration

Code	Title	Credits
Required Courses		
BIOL 1102	Biological Principles II	1
or BIOL 1109	Scientific Reasoning in Biology	
BIOL 3308	Research in Ecology, Evolution, and Marine Biology	1
<i>Select one of the following:</i>		<i>1</i>
CHEM 1092	Introductory Chemistry and Quantitative Reasoning II	
CHEM 1102	Introductory Chemistry II	
CHEM 1109	General Chemistry	
any other CHEM course above 1109		
<i>Select one of the following:</i>		<i>1</i>
a mathematics course 1300 or higher		
PSYC 2520	Data Analysis	
Foundation in Ecology, Evolution, and Marine Biology		
<i>Select two of the following:</i>		<i>2</i>
BIOL 2327	Ecology	
BIOL 2316	Evolution	
BIOL 2319	Biology of Marine Organisms	
or BIOL 2333	Benthic Ecology	
Breadth in the biological sciences		
<i>Select one from each of the following groups:</i>		<i>2</i>
<i>Molecular and Cellular Biology</i>		
BIOL 2112	Genetics and Molecular Biology	
BIOL 2118	Microbiology	
BIOL 2124	Biochemistry and Cell Biology	
BIOL 2175	Developmental Biology	
<i>Integrative Physiology</i>		
BIOL 2210	Plant Ecophysiology	
BIOL 2214	Comparative Animal and Human Physiology	
BIOL 2135	Neurobiology	
Advanced topics in Ecology, Evolution, and Marine Biology		
<i>Select two from the advanced topics options:</i>		<i>2</i>
BIOL 2503	Methods in Ocean Change Ecology	
BIOL 2557	Immunology	
BIOL 2581	Forest Ecology and Conservation	

BIOL 3280	Plant Responses to the Environment	
BIOL 3117	Current Topics and Research in Marine Science	
BIOL 3307	Evolutionary Developmental Biology	
BIOL 3309	Ecotoxicology: Pollution Impacts on Ecosystems and Human Health	
BIOL 3317	Molecular Evolution	
BIOL 3381	Ecological Genetics	
BIOL 3554	Biomechanics	
Natural and Computational Science		
<i>Select two of the following:</i>		<i>2</i>
BIOL 1101	Biological Principles I	
BIOL 1174	Biomathematics	
BIOL 2210	Plant Ecophysiology (if not used to meet another requirement)	
BIOL 2319	Biology of Marine Organisms (if not used to meet another requirement)	
BIOL 2333	Benthic Ecology (if not used to meet another requirement)	
BIOL 3314	Advanced Genetics and Epigenetics	
CHEM 2050	Environmental Chemistry	
CHEM 2250	Organic Chemistry I	
CSCI 1101	Introduction to Computer Science (or higher)	
ENVS 2004	GIS and Remote Sensing: Understanding Place	
ENVS 2201	Perspectives in Environmental Science	
EOS 1505	Oceanography	
EOS 2005	Biogeochemistry: An Analysis of Global Change	
EOS 2525	Marine Biogeochemistry	
PHYS 1130	Introductory Physics I	
or PHYS 114	Introductory Physics II	

Molecular and Cellular Biology Concentration

Code	Title	Credits
Required Courses ^d		
BIOL 1102	Biological Principles II	
or BIOL 1109	Scientific Reasoning in Biology	
Foundation in Molecular and Cellular Biology		4
BIOL 2112	Genetics and Molecular Biology	
BIOL 2124	Biochemistry and Cell Biology	
BIOL 2118	Microbiology	
or BIOL 2175	Developmental Biology	
BIOL 2316	Evolution	
Advanced Topics in Molecular and Cellular Biology		1
<i>Select one of the following:</i>		
BIOL 2551	Molecular Ecology	
BIOL 2553	Neurophysiology	
BIOL 2566	Molecular Neurobiology	
BIOL 2557	Immunology	
BIOL 3303	Topics in Cancer Biology	
BIOL 3304	The RNA World	
BIOL 3307	Evolutionary Developmental Biology	
BIOL 3314	Advanced Genetics and Epigenetics	
BIOL 3317	Molecular Evolution	
BIOL 3333	Advanced Cell and Molecular Biology	

Seminar in Molecular and Cellular Biology 1

Select one from the following:

BIOL 3303	Topics in Cancer Biology
BIOL 3304	The RNA World
BIOL 3307	Evolutionary Developmental Biology
BIOL 3314	Advanced Genetics and Epigenetics
BIOL 3317	Molecular Evolution
BIOL 3333	Advanced Cell and Molecular Biology

Other Natural and Computational Science courses

Select one of the following: 1

CHEM 1092	Introductory Chemistry and Quantitative Reasoning II
CHEM 1102	Introductory Chemistry II
CHEM 1109	General Chemistry
Any other CHEM course above the introductory level	
CHEM 2250	Organic Chemistry I

Select two physical, mathematical, statistical, or computational courses, each from a different group below: 2

Computer Science above 1100	
Physics above 1100	
Math above 1299 or PSYC 2520	

Select one of the following: 1

BIOL 1101	Biological Principles I
Any BIOL course numbered 2000 or higher	
CHEM 2320	Biochemistry

d Courses listed in more than one requirement may not be double-counted between requirements.

Biology Minor

The minor consists of five courses within the department, exclusive of independent study and courses below the 1100 level.

Code	Title	Credits
Required Courses		
BIOL 1102	Biological Principles II	1
or BIOL 1109	Scientific Reasoning in Biology	
Select two core courses. ^{e,f,g}		2
Select two elective biology courses above 1100.		2

- e To focus on integrative biology, take one course from two different core groups of the Integrative Biology core course group list.
- f To focus on ecology, evolution, and marine biology, take two courses from the Foundation in Ecology, Evolution, and Marine Biology requirement list.
- g To focus on molecular and cellular biology, take two courses from the Foundation in Molecular and Cellular Biology requirement list.

Additional Information
Additional Information and Department Policies

Students are advised to complete BIOL 1102 Biological Principles II or BIOL 1109 Scientific Reasoning in Biology and courses in chemistry for the major by the end of the sophomore year. Students planning

postgraduate education in science or the health professions should note that graduate and professional schools may have additional admissions requirements in chemistry, mathematics, and physics. It is strongly advised that students consult with faculty on the design of their major and discuss the options of research projects through independent studies, fellowship-funded summer research, and honors projects. Students planning careers in the health professions should contact Seth Ramus (<https://www.bowdoin.edu/profiles/staff/sramus/>), director of health professions advising.

The biology department participates in the biochemistry (p. 101), environmental studies, (p. 208) and neuroscience (p. 349) programs. Students majoring or minoring in biology may not also major in biochemistry or neuroscience.

With departmental approval, students are allowed to count courses taken at a different college or university toward the major. Normally no more than two transfer credits can be applied to the biology major and no more than one transfer credit can be applied to the biology minor.

Advanced Placement or International Baccalaureate credits may not be used to fulfill any of the course requirements for the major.

Electives for the biology major or minor may be double-counted in a second department or program.

Grade Requirements

Only one D grade is allowed in courses required for the major or minor. This D must be offset by a grade of B or higher in another course also required for the major or minor. Courses that count toward the major or minor must be taken for regular letter grades (not Credit/D/Fail).

Information for Incoming Students (p. 106)

Most students interested in exploring biology at Bowdoin start by taking either BIOL 1101 Biological Principles I or BIOL 1109 Scientific Reasoning in Biology. BIOL 1101 Biological Principles I is the first of a two-semester introductory biology sequence. Each year BIOL 1101 Biological Principles I is offered in the fall semester and BIOL 1102 Biological Principles II is offered in the spring semester, allowing students to explore 2000-level biology courses in the following year. BIOL 1109 Scientific Reasoning in Biology is a one-semester introductory biology course that prepares students to explore 2000-level courses in subsequent semesters. BIOL 1109 Scientific Reasoning in Biology is offered every semester.

Incoming first-year students who complete the biology placement exam and the quantitative reasoning (QR) exam receive one of the four recommendations below:

- Enroll in BIOL 1101 Biological Principles I
- Contact Professor Anne McBride (<https://www.bowdoin.edu/profiles/faculty/amcbride/>) or Pamela Bryer (<https://www.bowdoin.edu/profiles/staff/pbryer/>) to discuss placement (this category is reserved for those on the boundary of a recommendation of BIOL 1101 Biological Principles I or BIOL 1109 Scientific Reasoning in Biology)
- Enroll in BIOL 1109 Scientific Reasoning in Biology
- Enroll in a 2000-level biology course (a small number of students receive this placement; students seeking this placement should contact Professor Anne McBride (<https://www.bowdoin.edu/profiles/faculty/amcbride/>))

Incoming first-year students should take the biology placement and QR exams in the summer prior to matriculation. AP/IB scores are considered in combination with information from biology placement and QR exams

in recommending placements. A placement recommendation is required for a student to request a biology course numbered above 1099 during course registration.

If a student did not complete these exams in the summer prior to matriculation but wishes to enroll in a biology department course, they should complete the biology placement test immediately and inform Pamela Bryer (<https://www.bowdoin.edu/profiles/staff/pbryer/>) once completed so that a recommendation can be made for them.

Courses

BIOL 1023 (a) Personal Genomes

Non-Standard Rotation. Enrollment limit: 16.

An introduction to the field of genetics and its impact on the modern world. As the cost of DNA sequence analysis plummets, many believe that sequencing entire genomes of individuals will soon become part of routine preventative health care. How can information gleaned from genome affect decisions about health? Beyond medical applications, how might personal genetic information be used in other areas of life, and society as a whole? What ethical, legal, and social issues are raised by widespread use of genetic information? These questions are explored through readings, discussion, and writing assignments.

Previous terms offered: Fall 2020, Fall 2018.

BIOL 1026 (a) Approaches to Neuroscience

Hadley Horch.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Students will be introduced to the basics of neurobiology, and begin to understand the challenges inherent to studying the brain. Topics will include basic neuronal function, animal behavior, mutations and mental illness, drugs and addiction, neuroethics, and consciousness. Readings from journal articles, websites, and popular press science books will be used. Critical thinking skills will be practiced through several writing assignments as well as in-class discussions and debates.

Previous terms offered: Fall 2020, Fall 2019.

BIOL 1027 (a, FYS) Evolutionary Links

Non-Standard Rotation. Enrollment limit: 16.

Seminar exploring our deep evolutionary history from the first multicellular animals to *Homo sapiens*. Emphasizes the living and fossil species that illustrate important transitions that resulted in the evolution of new anatomical features, physiology, and behavior. Includes an embryo observation unit with data collection and analysis. Readings from online media, popular science books, and primary scientific articles. Frequent writing with an emphasis on styles used in modern biology.

Previous terms offered: Spring 2019.

BIOL 1056 (a, INS) Ecology and Society

Vladimir Douhovnikoff.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

Presents an overview of ecology covering basic ecological principles and the relationship between human activity and the ecosystems that support us. Examines how ecological processes, both biotic (living) and abiotic (non-living), influence the life history of individuals, populations, communities, and ecosystems. Encourages student investigation of environmental interactions and how human-influenced disturbance is shaping the environment. Required field trips illustrate the use of ecological concepts as tools for interpreting local natural history. (Same as: ENVS 1056)

Previous terms offered: Spring 2022, Fall 2021, Fall 2020.

BIOL 1060 (a, INS, MCSR) Prove It!: The Power of Data to Address Questions You Care About

Non-Standard Rotation. Enrollment limit: 24.

Climate change, biodiversity loss, pollution, and other environmental issues present significant threats to ecological integrity, human health, and social justice. An overwhelming amount of information exists on these topics, from a variety of perspectives—some reliable, some not. Strategies are required for processing this information and drawing conclusions. Students develop skills in accessing reliable information, data analysis, and interpretation, as well as science communication. (Same as: ENVS 1060)

Previous terms offered: Spring 2022, Fall 2018.

BIOL 1061 (a, INS) Life in Changing Seas

Non-Standard Rotation. Enrollment limit: 50.

Discover the living worlds in the oceans and estuaries of our planet. Life in the sea is incredibly diverse, and iconic marine ecosystems (e.g., kelp forests and coral reefs) support complex communities of marine species. Life in the sea is also increasingly important to supporting human populations through food provision and mitigation of climate change. This course, intended for non-science majors, will build a broad knowledge base of different marine ecosystems. Special attention will also be given to Maine's marine ecosystems and connections between Maine's modern economy and the sea, as well as traditional use of Maine's coastal habitats by Native peoples. It will also overview important ocean-based ecosystem services and how these are threatened by climate change and overexploitation. This course will include lecture, discussions, and hands-on exploration of local marine life.

Previous terms offered: Spring 2021.

BIOL 1066 (a, INS) The Molecules of Life

Every Other Spring. Enrollment limit: 50.

An exploration of the basic molecules of life. Starting with DNA we will explore how cells use and pass on this stored information to produce a variety of products used to form cells and organisms. This basic science will be related to every-day examples of biology, health, agriculture, and social issues arising from these applications; genetic modification for health and food production, drug and vaccine development, CO₂ and our warming the planet. Hands-on experience with DNA, protein, lipids and complex carbohydrates will be included in the regular class meeting time. The class will be a combination of lecture, discussion and exploration in a lab setting and outdoors.

Previous terms offered: Spring 2021, Spring 2020, Spring 2019.

BIOL 1068 (a, INS) Cancer Biology

Non-Standard Rotation. Enrollment limit: 32.

Examines the biological basis of cancer, including the role of oncogenes and tumor suppressors in regulating how the cell divides, how environmental agents and viruses can induce DNA mutations leading to cancerous growth, and the genetic basis of cancerous cells. Examines diagnostic procedures and explores emerging technologies that are developing new treatments based on cancer cell characteristics.

Previous terms offered: Fall 2020, Spring 2020, Fall 2019, Fall 2018.

BIOL 1069 (a, INS) The Microbial World: Small Creatures, Big Impacts

Jake Muscato.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Microscopic organisms, microbes, are found in soil, water, air, the human body, and practically every other habitat imaginable. They play central roles in causing and controlling disease, shaping the environment, producing important foods and medicines, and countless other processes on Earth. Examines the diverse ways in which microbes shape the world with emphasis on molecular mechanisms, microbial evolution, and scientific techniques. Enhances understanding of the natural world and the scientific process using primary and secondary literature, data-focused problem solving, and guided research projects. Assumes no background in science.

BIOL 1090 (a, INS) Understanding Climate Change

Every Spring. Enrollment limit: 20.

Why is the global climate changing and how will biological systems respond? Includes sections on climate systems and climate change, reconstructing ancient climates and past biological responses, predicting future climates and biological responses, climate policy, the energy crisis, and potential solutions. Incorporates a few field trips and laboratories designed to illustrate approaches to climate change science at the cellular, physiological, and ecological levels. (Same as: ENVS 1090)

Previous terms offered: Spring 2021, Spring 2019.

BIOL 1095 (a, INS) Perspectives in Ecology: Seeking Solutions to Challenging Problems

Non-Standard Rotation. Enrollment limit: 50.

In this era of climate change, human impacts on ecosystems and questions of how to protect and restore ecosystems are at the forefront of ecology. In this course, we will explore human-environment relationships and topics of human-induced ecological disturbance, such as climate change, land-use change, and development through data analysis, lectures, and readings. We will read fantasy, science-fiction, nonfiction, op-eds, and journalism pieces written from a diverse range of perspectives and use these readings as a framework for understanding the current state of ecology with a specific focus on ecosystem restoration and climate change. Students will develop written and verbal communication skills in addition to broadening their understanding of ecology and scientific rigor, with a goal of understanding the issues in modern ecology and seeking and validating solutions.

Previous terms offered: Spring 2021.

BIOL 1099 (a, INS) Brains in Motion: Exploring the Interface between Mind and Body

Manuel Diaz-Rios.

Every Fall. Fall 2022. Enrollment limit: 24.

This course is an introductory exploration of the nervous system as it relates to bodily functions. It explores neurons as the basic building blocks of brain and behavior. Through lectures and classroom experiments, students would learn how electrochemical nerve signals control body movement, cardiovascular function, reflexes, and brain activity. Further, students explore how the nervous system can interact with machine interfaces, including prosthetics. (Same as: NEUR 1099)

Previous terms offered: Fall 2021, Spring 2021, Fall 2020.

BIOL 1101 (a, INS, MCSR) Biological Principles I

Kate Farnham; Jack Bateman.

Every Fall. Fall 2022. Enrollment limit: 35.

The first in a two-semester introductory biology sequence. Topics include fundamental principles of cellular and molecular biology with an emphasis on providing a problem-solving approach to an understanding of genes, RNA, proteins, and cell structure and communication. Focuses on developing quantitative skills, as well as critical thinking and problem solving skills. Lecture and weekly laboratory/discussion groups. To ensure proper placement, students must take the biology placement examination and must be recommended for placement in Biology 1101. Students continuing in biology will take Biology 1102, not Biology 1109, as their next biology course.

Prerequisites: Placement in BIOL 1101.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

BIOL 1102 (a, INS, MCSR) Biological Principles II

Amy Johnson; Kyle Martin.

Every Spring. Spring 2023. Enrollment limit: 35.

The second in a two-semester introductory biology sequence. Emphasizes fundamental biological principles extending from the physiological to the ecosystem level of living organisms. Topics include physiology, ecology, and evolutionary biology, with a focus on developing quantitative skills as well as critical thinking and problem solving skills. Lecture and weekly laboratory/discussion groups.

Prerequisites: BIOL 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 1109 (a, INS, MCSR) Scientific Reasoning in Biology

Pamela Bryer; Bruce Kohorn; Patricia Jones; Barry Logan; Michael Palopoli.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 40.

Lectures examine fundamental biological principles, from the sub-cellular to the ecosystem level with an emphasis on critical thinking and the scientific method. Laboratory sessions will help develop a deeper understanding of the techniques and methods used in the biological science by requiring students to design and conduct their own experiments. Lecture and weekly laboratory/discussion groups. To ensure proper placement, students must take the biology placement examination and must be recommended for placement in Biology 1109.

Prerequisites: Placement in BIOL 1109.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

BIOL 1158 (a, INS, MCSR) Perspectives in Environmental Science

Phil Camill; Shana Stewart Deeds; Brandon Tate.

Every Spring. Spring 2023. Enrollment limit: 35.

Understanding environmental challenges requires scientific knowledge about the different spheres of the Earth – land, water, air, and life – and how they interact. Presents integrated perspectives across the fields of biology, chemistry, and earth and oceanographic science to examine the scientific basis for environmental change from the molecular to the global level. Foundational principles are developed to address major course themes, including climate change, energy, soil/air/water pollution, chemical exposure and risk, land use change, and biodiversity loss. Laboratory sessions consist of local field trips, laboratory experiments, group research, case study exercises, and discussions of current and classic scientific literature. (Same as: ENVS 2201, CHEM 1105)

Prerequisites: BIOL 1101 or BIOL 1109 or CHEM 1091 - 2260 or PHYS 1130 or PHYS 1140 or EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221) or EOS 2115 or EOS 2335 or EOS 2345 (same as ENVS 2270) or EOS 2365 or EOS 2525 (same as ENVS 2251) or EOS 2535 or EOS 2585 (same as ENVS 2282) or ENVS 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 1174 (a, MCSR) Biomathematics

Mary Lou Zeeman.

Every Fall. Spring 2023. Enrollment limit: 30.

A study of mathematical modeling in biology, with a focus on translating back and forth between biological questions and their mathematical representation. Biological questions are drawn from a broad range of topics, including disease, ecology, genetics, population dynamics, and neurobiology. Mathematical methods include discrete and continuous (ODE) models and simulation, box models, linearization, stability analysis, attractors, oscillations, limiting behavior, feedback, and multiple time-scales. Within the biology major, this course may count as the mathematics credit or as biology credit, but not both. Students are expected to have taken a year of high school or college biology prior to this course. (Same as: MATH 1808)

Prerequisites: MATH 1600 or higher or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in 2000, 2020, 2206 (M) or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

BIOL 2024 Science Communication

Barry Logan.

Non-Standard Rotation. Fall 2022. Enrollment limit: 20.

Scientists are communicators, using images, graphical representations, written and spoken words to convey their findings. Those findings achieve their greatest impact through dissemination; a research project is not complete until it has been described for others. Mindfulness of the intended audience and the goals of communication dictate the most suitable forms. Explores and develops effective communication with peer scientists, potential funders (i.e., grant proposals), non-specialist scientists, children and adult lay audiences through written work, presentations, posters, displays, podcasts, short videos and documentary films. Involves individual and group projects, critiques, site visits, and engagement with scientists and communication professionals (including journalists, filmmakers and museum curators).

Prerequisites: BIOL 1100 - 2969 or BIOL 3000 or higher or CHEM 1100 - 2969 or CHEM 3000 or higher or EOS 1100 - 2969 or EOS 3000 or higher or PHYS 1100 - 2969 or PHYS 3000 or higher.

Previous terms offered: Spring 2021.

BIOL 2112 (a, INS, MCSR) Genetics and Molecular Biology

Jack Bateman; Aimee Eldridge.

Every Spring. Spring 2023. Enrollment limit: 35.

Integrated coverage of organismic and molecular levels of genetic systems. Topics include modes of inheritance, the structure and function of chromosomes, the mechanisms and control of gene expression, recombination, mutagenesis, techniques of molecular biology, and human genetic variation. Laboratory sessions are scheduled.

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 2118 (a, INS) Microbiology

Anne McBride; Sandra Fussell.

Every Spring. Spring 2023. Enrollment limit: 35.

An examination of the structure and function of microorganisms, from viruses to bacteria to fungi, with an emphasis on molecular descriptions. Subjects covered include microbial structure, metabolism, and genetics. Control of microorganisms and environmental interactions are also discussed. Laboratory sessions every week.

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 2124 (a, INS, MCSR) Biochemistry and Cell Biology

Bruce Kohorn; Aimee Eldridge.

Every Fall. Fall 2022. Enrollment limit: 35.

Focuses on the structure and function of cells as we have come to know them through the interpretation of direct observations and experimental results. Emphasis is on the scientific (thought) processes that have allowed us to understand what we know today, emphasizing the use of genetic, biochemical, and optical analysis to understand fundamental biological processes. Covers details of the organization and expression of genetic information, and the biosynthesis, sorting, and function of cellular components within the cell. Concludes with examples of how cells perceive signals from other cells within cell populations, tissues, organisms, and the environment. Three hours of lab each week. Not open to students who have credit for Biology 2423. (Same as: BIOC 2124)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

BIOL 2135 (a, INS, MCSR) Neurobiology

Stephen Hauptman; Hadley Horch.

Every Fall. Fall 2022. Enrollment limit: 35.

Examines fundamental concepts in neurobiology from the molecular to the systems level. Topics include neuronal communication, gene regulation, morphology, neuronal development, axon guidance, mechanisms of neuronal plasticity, sensory systems, and the molecular basis of behavior and disease. Weekly lab sessions introduce a wide range of methods used to examine neurons and neuronal systems. (Same as: NEUR 2135)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

BIOL 2175 (a, INS, MCSR) Developmental Biology

Jake Muscato; Sandra Fussell.

Every Fall. Fall 2022. Enrollment limit: 35.

An examination of current concepts of embryonic development, with an emphasis on experimental design. Topics include cell fate specification, morphogenetic movements, cell signaling, differential gene expression and regulation, organogenesis, and the evolutionary context of model systems. Project-oriented laboratory work emphasizes experimental methods. Lectures and three hours of laboratory per week.

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

BIOL 2210 (a, INS, MCSR) Plant Ecophysiology

Barry Logan; Jaret Reblin.

Every Spring. Spring 2023. Enrollment limit: 35.

Examines the functional attributes of plants and the manner in which they vary across the plant kingdom by the processes of evolution and acclimation. Topics of focus include photosynthesis and protection against high-light stress, the acquisition and distribution of water and mineral nutrients, and environmental and hormonal control of development. Special topics discussed may include plant parasitism, carnivory, the origins and present state of agriculture, plant responses to global climate change, plant life in extreme environments, and the impacts of local land-use history on plant communities. Contemporary research instrumentation is used in weekly laboratories, some conducted in the field, to enable first-hand exploration of phenomena discussed in lecture. (Same as: ENVS 2223)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2020, Fall 2019, Fall 2018.

BIOL 2214 (a, INS, MCSR) Comparative Animal and Human Physiology

Stephen Hauptman; Daniel Powell.

Every Spring. Spring 2023. Enrollment limit: 35.

An examination of animal function, from the cellular to the organismal level. The underlying concepts are emphasized, as are the experimental data that support current understanding of animal function. Topics include the nervous system, hormones, respiration, circulation, osmoregulation, digestion, and thermoregulation. Labs are short, student-designed projects involving a variety of instrumentation. Lectures and four hours of laboratory work per week.

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 2284 (a) Ecology of Rivers

Every Other Fall. Enrollment limit: 12.

Explores the ecology of river systems. Rivers are linear features through watersheds and across the landscape where ecosystem influences are reflected, focused, and transported from hilltops to coastal estuaries, and sometimes back again. Considers the role of rivers as corridors connecting a wide range of ecosystems, as indicators of broader landscape ecology, and as ecosystems in their own right with particular focus on the interaction of geomorphology, hydrology, and biology in the development and function of these dynamic and essential ecosystems. (Same as: ENVS 2284)

Prerequisites: BIOL 2315 (same as ENVS 2224) or BIOL 2316 or BIOL 2319 (same as ENVS 2229) or BIOL 2325 (same as ENVS 2225) or BIOL 2330 (same as ENVS 2233).

Previous terms offered: Fall 2021.

BIOL 2311 (a, INS, MCSR) Coral Reefs in the Anthropocene

Non-Standard Rotation. Enrollment limit: 35.

Coral reefs are the largest biogenic structures on earth that support exceptional levels of biodiversity in all the branches of the tree of life. They also face multiple threats due to human activities, including increased ocean acidity that is reducing reef construction, major coral bleaching events that are increasing in intensity and frequency, overfishing of increasingly limited wild fisheries stocks, and changes in land use in tropical nations and islands that can have strong local impacts on reef health. This course will explore the geological processes that build coral reefs, and the ecological and evolutionary processes that maintain exceptionally high levels of biodiversity. It will apply theory and data to the challenges now confronting coral reef ecosystems, and their future prospects. The class will include lectures, discussions, weekly lab meetings, and field trips.. (Same as: ENVS 2211)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level or CHEM 1092 or CHEM 1102 or CHEM 1109 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109 or ENVS 2201 (same as BIOL 1158 and CHEM 1105) or MATH 1001 - 2969 or Placement in MATH 1600 (M) or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 1808 {2108} (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) or PHYS 1130 or PHYS 1140 or Placement in PHYS 1140.

Previous terms offered: Fall 2020.

BIOL 2316 (a, INS, MCSR) Evolution

Bethany Whalon; Michael Palopoli.

Every Spring. Spring 2023. Enrollment limit: 35.

Examines one of the most breathtaking ideas in the history of science – that all life on this planet descended from a common ancestor. An understanding of evolution illuminates every subject in biology, from molecular biology to ecology. Provides a broad overview of evolutionary ideas, including the modern theory of evolution by natural selection, evolution of sexual reproduction, patterns of speciation and macro-evolutionary change, evolution of sexual dimorphisms, selfish genetic elements, and kin selection. Laboratory sessions are devoted to semester-long, independent research projects.

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 2319 (a, INS, MCSR) Biology of Marine Organisms

Bethany Whalon; Amy Johnson.

Every Fall. Fall 2022. Enrollment limit: 35.

The study of the biology and ecology of marine mammals, seabirds, fish, intertidal and subtidal invertebrates, algae, and plankton. Also considers the biogeographic consequences of global and local ocean currents on the evolution and ecology of marine organisms. Laboratories, field trips, and research projects emphasize natural history, functional morphology, and ecology. Lectures and four hours of laboratory or field trip per week. One weekend field trip included. Students have the opportunity to take an optional field trip to the Bowdoin Scientific Station on Kent Island in the Bay of Fundy. (Same as: ENVS 2229)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

BIOL 2327 (a, INS) Ecology

Patricia Jones; Shana Stewart Deeds.

Every Fall. Fall 2022. Enrollment limit: 35.

Ecology, the study of how organisms interact with each other and their environment, incorporates topics from how organisms cope with environmental stressors to global carbon cycling. Addresses current questions in ecology, from global change to food security to invasive species. Lectures, labs, primary and popular literature emphasize how scientists use the tenets of ecology to address current environmental issues. Labs, discussions and activities focus on practical applications of ecological theory, scientific writing and data analysis on topics such as plant-insect interactions, amphibian decline, river restoration and natural history. (Same as: ENVS 2227)

Prerequisites: BIOL 1102 or BIOL 1109 or ENVS 2201 (same as BIOL 1158 and CHEM 1105) or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

BIOL 2333 (a, INS, MCSR) Benthic Ecology

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon.

Every Fall. Fall 2022. Enrollment limit: 15.

The principles of ecology, emphasizing the hard- and soft-bottom communities of Casco Bay and Harpswell Sound. Field trips and field exercises demonstrate the quantitative principles of marine ecological research, including good practices in sampling designs and field experiments. A class field project designs and implements a long-term study, based at the Bowdoin Marine Laboratory, to monitor and detect changes in community structure driven by climate change in the twenty-first century. Course includes an extended field trip to the tropics that will allow students to get hands-on experience monitoring ecosystem health and change in a coral reef system. Assumes a basic knowledge of biological statistics. Taught in residence at the Schiller Coastal Studies Center. Benthic Ecology is a course-module in the Bowdoin Marine Science Semester and is taught with three other co-requisite courses. (Same as: ENVS 2333)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2019.

BIOL 2423 (a, INS) Biochemistry of Cellular Processes

Jake Muscato.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the biochemical mechanisms that underlie the basis of life. Starts with the chemistry of proteins, DNA, lipids, and carbohydrates to build the main elements of a cell. Moves on to the process of gene organization and expression, emphasizing the biochemical mechanisms that regulate these events. Explores next the organization of the cell with emphasis on genetic and biochemical regulation. Concludes with specific examples of multicellular interactions, including development, cancer, and perception of the environment. This course does NOT satisfy a requirement for the biochemistry major and is not open to students who have credit for Biology 2124. Students who intend to enroll in Biology 2124 should not register for Biology 2423. (Same as: BIOC 2423)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 or BIOL 2100 or higher and CHEM 1092 or either CHEM 1102 or CHEM 1109 or CHEM 2250.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 2501 (a, INS) Biological Oceanography

Every Fall. Enrollment limit: 15.

Features classroom, laboratory, and fieldwork emphasizing fundamental biological processes operating in pelagic environments. It includes a hybrid of topics traditionally taught in physical and biological oceanography courses: major ocean current systems, physical structure of the water column, patterns and process of primary production, structure and function of pelagic food webs. Field trips to Casco Bay and Harpswell Sound will introduce students to the methods and data structures of biological oceanography. Taught in residence at the Bowdoin Marine Laboratory, Biology 2501/Environmental Studies 2231 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 2330 (same as Environmental Studies 2233), and English 2804 (same as Environmental Studies 2804) are co-requisites of this course. (Same as: ENVS 2231)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2018.

BIOL 2503 (a, INS, MCSR) Methods in Ocean Change Ecology

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon.

Every Fall. Fall 2022. Enrollment limit: 12.

Explores how marine organisms, populations, communities, and ecosystems will respond to global ocean change. Concepts in ecology, behavior, physiology, and evolution will be highlighted to demonstrate how marine systems are affected by ocean change factors like warming, ocean acidification, hypoxia, habitat loss, and invasive species. Emphasizes in-depth discussion of key literature to exemplify the theory, study design, and analysis tools marine scientists employ to research current and projected ocean change. Also integrates laboratory, fieldwork, and computer activities to illustrate approaches to monitoring and predicting shifts in biological communities. Taught in residence at the Schiller Coastal Studies Center. Biology 2503/Environmental Studies 2235 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 3117 (same as Environmental Studies 2217), and History 2129 (same as Environmental Studies 2449) are co-requisites of this course. (Same as: ENVS 2235)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2021, Fall 2019.

BIOL 2510 (a, INS) Neuropharmacology

Manuel Diaz-Rios; Tina Rioux.

Every Spring. Spring 2023. Enrollment limit: 24.

This course will discuss drug-induced changes in the functioning of the nervous system. The specific focus will be to provide a description of the cellular and molecular actions of drugs (natural or artificial) on the communication between neurons (known as synaptic transmission) and on the production of behaviors such as walking, breathing, heart function, and learning/memory, among others. This course will also refer to specific diseases of the nervous system and their treatment, in addition to giving an overview of the techniques used for the study of neuropharmacology. The lab portion of this course would involve the dissection and handling of mouse tissue. If you are not comfortable with the idea of dissecting mice you should not take this course. (Same as: NEUR 2510)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and either BIOL 2135 (same as NEUR 2135) or BIOL 2214 (same as NEUR 2214) or PSYC 2050 (same as NEUR 2050).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

BIOL 2553 (a, INS) Neurophysiology

Tina Rioux; Daniel Powell.

Every Fall. Fall 2022. Enrollment limit: 20.

A comparative study of the function of the nervous system in invertebrate and vertebrate animals. Topics include the mechanism that underlie both action potentials and patterns of spontaneous activity in individual nerve cells, interactions between neurons, and the organization of neurons into larger functional units. Lectures and four hours of laboratory work per week. (Same as: NEUR 2553)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and either BIOL 2135 or BIOL 2214 or PSYC 2050.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

BIOL 2557 (a, INS) Immunology

Non-Standard Rotation. Enrollment limit: 35.

Covers the development of the immune response, the cell biology of the immune system, the nature of antigens, antibodies, B and T cells, and the complement system. The nature of natural immunity, transplantation immunology, and tumor immunology also considered.

Prerequisites: BIOL 2112 or BIOL 2118 or BIOL 2124 (same as BIOC 2124) or BIOL 2175.

Previous terms offered: Fall 2021, Fall 2018.

BIOL 2566 (a, INS) Molecular Neurobiology

Hadley Horch; Anja Forche.

Every Spring. Spring 2023. Enrollment limit: 24.

Examination of the molecular control of neuronal structure and function. After understanding classic cloning techniques and experiments, students will learn more modern variations of techniques related to nucleic acid sequencing, protein visualization, and genetic manipulation. Additional topics such as intracellular signaling, neurotrophins and cell death, growth cone guidance, and the molecular basis of learning and memory are covered. The final portion of the course revolves around pathological disorders, such as Alzheimer's disease and spinal cord injuries, culminating in an independent investigation of the molecular basis of a neurological disorder of each student's choosing. Students will gain experience reading and interpreting primary research articles, working collaboratively in small groups, and communicating scientifically. Weekly laboratory sessions are devoted to exploring the molecular basis of compensatory plasticity in the cricket auditory system. (Same as: NEUR 2566)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level and either BIOL 2112 or BIOL 2124 (same as BIOC 2124) or BIOL 2135 (same as NEUR 2135) or BIOL 2553 (same as NEUR 2553) or PSYC 2050 (same as NEUR 2050).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 2581 (a, INS) Forest Ecology and Conservation

Vladimir Douhovnikoff.

Every Other Fall. Fall 2022. Enrollment limit: 15.

An examination of how forest ecology and the principles of silviculture inform forest ecosystem restoration and conservation. Explores ecological dynamics of forest ecosystems, the science of managing forests for tree growth and other goals, natural history and historic use of forest resources, and the state of forests today, as well as challenges and opportunities in forest restoration and conservation. Consists of lecture, discussions, field trips, and guest seminars by professionals working in the field. (Same as: ENVS 2281)

Previous terms offered: Fall 2018.

BIOL 3117 (a, INS, MCSR) Current Topics and Research in Marine Science

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon. Every Fall. Fall 2022. Enrollment limit: 12.

Current Topics and Research in Marine Science is an experiential research course in which students design and carry out an individual semester long research project. In an advanced seminar setting, students choose topics and learn to (1) search for information in the scientific literature; (2) evaluate the utility of papers to their research topic; (3) identify gaps in existing understanding; (4) formulate hypothesis-driven research questions; and (5) utilize the R programming environment for analysis and presentation of scientific data. Ultimately, students design and carry out a research project that includes integration of their understanding of the scientific literature. Students present their results in a final oral presentation and written paper. Taught in residence at the Schiller Coastal Studies Center. Biology 3117/Environmental Studies 2217 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 2503 (same as Environmental Studies 2235), and History 2129 (same as Environmental Studies 2449) are co-requisites of this course. (Same as: ENVS 2217)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2021, Fall 2019.

BIOL 3280 (a, INS) Plant Responses to the Environment

Non-Standard Rotation. Enrollment limit: 16.

Plants can be found growing under remarkably stressful conditions. Even your own backyard poses challenges to plant growth and reproduction. Survival is possible only because of a diverse suite of elegant physiological and morphological adaptations. The physiological ecology of plants from extreme habitats (e.g., tundra, desert, hypersaline) is discussed, along with the responses of plants to environmental factors such as light and temperature. Readings from the primary literature facilitate class discussion. Excursions into the field and laboratory exercises complement class material. (Same as: ENVS 3280)

Prerequisites: BIOL 2210 (same as ENVS 2223) or BIOL 2325 (same as ENVS 2225).

Previous terms offered: Spring 2020.

BIOL 3303 (a, INS) Topics in Cancer Biology

Non-Standard Rotation. Enrollment limit: 16.

Discusses characteristics of cancer cells, including unregulated cell cycle progression, evading growth suppression, lack of apoptosis, replicative immortality, angiogenesis, metastasis, altered metabolism, and evading immune destruction. Readings from the primary literature, with discussion.

Prerequisites: BIOL 2112 or BIOL 2124 (same as BIOC 2124) or CHEM 2310 (same as BIOC 2310) or BIOL 2423 (same as BIOC 2423) or BIOL 2118 or BIOL 2175.

Previous terms offered: Spring 2019.

BIOL 3304 (a, INS) The RNA World

Anne McBride.

Every Fall. Fall 2022. Enrollment limit: 15.

Seminar exploring the numerous roles of ribonucleic acid, from the discovery of RNA as a cellular messenger to the development of RNAs to treat disease. Topics also include RNA enzymes, interactions of RNA viruses with host cells, RNA tools in biotechnology, and RNA as a potential origin of life. Focuses on discussions of papers from the primary literature.

Prerequisites: BIOL 2112 or BIOL 2118 or BIOL 2124 (same as BIOC 2124) or BIOL 2423 (same as BIOC 2423) or CHEM 2320 (same as BIOC 2320).

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

BIOL 3307 (a, INS) Evolutionary Developmental Biology

Every Spring. Enrollment limit: 15.

Advanced seminar investigating the synergistic but complex interface between the fields of developmental and evolutionary biology. Topics include the evolution of novel structures, developmental constraints to evolution, evolution of developmental gene regulation, and the generation of variation. Readings and discussions from the primary scientific literature.

Prerequisites: BIOL 2175 or BIOL 2316.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 3308 (a, INS) Research in Ecology, Evolution, and Marine Biology

Patricia Jones.

Every Spring. Spring 2023. Enrollment limit: 16.

Focuses on research methods in field biology, reading the primary literature, and training in scientific writing and presentation, careers in ecology, and next steps to pursuing those careers. Prepares students for productive future research experiences in areas of ecology, marine biology, animal behavior, and evolution. Students will focus on a research topic of their interest, for which they will read the primary literature, design experiments, produce a draft of a scientific paper, deepen their understanding of statistics and present their proposed research. Includes field excursions to marine and terrestrial environments. (Same as: ENVS 3308)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and either BIOL 2315 (same as ENVS 2224) or BIOL 2316 or BIOL 2319 (same as ENVS 2229) or BIOL 2325 (same as ENVS 2225) or BIOL 2330 (same as ENVS 2233) or BIOL 2210 (same as ENVS 2223) or BIOL 2327 (same as ENVS 2227).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 3309 (a, INS) Ecotoxicology: Pollution Impacts on Ecosystems and Human Health

Every Other Spring. Enrollment limit: 15.

Chemical exposure can strongly impact both ecological communities and human health, often in complex and unexpected ways, yet limited data and scientific uncertainty make pollution regulation challenging. Examines pollution impacts on biological systems, from the organism to the ecosystem scale, with a focus on emerging research areas, including evolutionary ecotoxicology and the potential synergy of multiple environmental stressors. Investigates how society might use available toxicological data to protect ecological integrity and human health. Guest visitors explore political, historical, and social justice aspects, providing an interdisciplinary lens. Reading-, writing-, and discussion-focused seminar (Same as: ENVS 3930)

Prerequisites: BIOL 2000 - 2969 or CHEM 2000 - 2969 or EOS 2000 - 2969 or ENVS 2201 (same as BIOL 1158 and CHEM 1105).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 3311 (a) Motor Systems Neurobiology

Manuel Diaz-Rios.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

In this course you will learn about the main animal models used in the study of how the nervous system controls motor behavior as animals, including humans, interact with the environment. The course will cover the principal motor systems (including those for walking, flying, swimming, breathing, and others), focusing in particular on bridging the gap between molecular/cellular neuroscience and higher-level perception and behavior. Topics to be covered include neuroanatomy, neurophysiology and functions of the most studied animal behaviors, and the groups of interconnected neurons (termed neural circuits) that control them. Students will read, interpret, analyze, and discuss seminal (classical) and recent scientific papers from influential motor systems neurobiology laboratories. The course will also discuss the relevance of these neuronal motor systems to human diseases. (Same as: NEUR 3311)

Prerequisites: BIOL 2112 or BIOL 2124 (same as BIOC 2124) or BIOL 2135 (same as NEUR 2135) or BIOL 2175 or BIOL 2553 (same as NEUR 2553) or BIOL 2566 (same as NEUR 2566) or PSYC 2750 (same as NEUR 2750) or PSYC 2751.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

BIOL 3314 (a, INS) Advanced Genetics and Epigenetics

Jack Bateman.

Every Fall. Fall 2022. Enrollment limit: 15.

A seminar exploring the complex relationship between genotype and phenotype, with an emphasis on emerging studies of lesser-known mechanisms of inheritance and gene regulation. Topics include dosage compensation, parental imprinting, paramutation, random monoallelic expression, gene regulation by small RNAs, DNA elimination, copy number polymorphism, and prions. Reading and discussion of articles from the primary literature.

Prerequisites: BIOL 2112.

Previous terms offered: Fall 2020, Fall 2019, Fall 2018.

BIOL 3317 (a, INS) Molecular Evolution

Michael Palopoli.

Every Fall. Fall 2022. Enrollment limit: 15.

Examines the dynamics of evolutionary change at the molecular level. Topics include neutral theory of molecular evolution, rates and patterns of change in nucleotide sequences and proteins, molecular phylogenetics, and genome evolution. Students read and discuss papers from the scientific literature.

Prerequisites: BIOL 2112 or BIOL 2118 or BIOL 2124 or BIOL 2175 or BIOL 2316.

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

BIOL 3318 (a, INS) Advanced Molecular Microbiology

Jake Muscato.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Advanced seminar-style course exploring the molecular basis for the many interactions between humans and microorganisms. Includes topics such as pathogenicity and infection, antimicrobial development and resistance, microbial evolution, microbiomes in health and disease, and biotechnology and industrial microbiology. Focuses on reading, interpretation, analysis, and discussion of articles from the primary scientific literature.

BIOL 3325 (a, INS) Topics in Neuroscience

Daniel Powell.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

An advanced seminar focusing on one or more aspects of neuroscience, such as neuronal regeneration and development, modulation of neuronal activity, or the neural basis of behavior. Students read and discuss original papers from the literature. (Same as: NEUR 3325)

Prerequisites: BIOL 2135 (same as NEUR 2135) or BIOL 2553 (same as NEUR 2553) or BIOL 2566 (same as NEUR 2566) or BIOL 2588 (same as NEUR 2588) or PSYC 2750 (same as NEUR 2750)- 2751 or PSYC 2775 (same as NEUR 2775).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 3329 (a, INS) Neuronal Regeneration

Every Fall. Enrollment limit: 15.

The consequences of neuronal damage in humans, especially in the brain and spinal cord, are frequently devastating and permanent. Invertebrates, on the other hand, are often capable of complete functional regeneration. Examines the varied responses to neuronal injury in a range of species. Topics include neuronal regeneration in planaria, insects, amphibians, and mammals. Students read and discuss original papers from the literature in an attempt to understand the basis of the radically different regenerative responses mounted by a variety of neuronal systems. (Same as: NEUR 3329)

Prerequisites: BIOL 2112 or BIOL 2124 or BIOL 2135 or BIOL 2175 or BIOL 2553 or BIOL 2566 or PSYC 2750 or PSYC 2751.

Previous terms offered: Fall 2021.

BIOL 3333 (a, INS) Advanced Cell and Molecular Biology

Bruce Kohorn.

Every Spring. Spring 2023. Enrollment limit: 15.

An exploration of the multiple ways cells have evolved to transmit signals from their external environment to cause alterations in cell architecture, physiology, and gene expression. Examples are drawn from both single-cell and multi-cellular organisms, including bacteria, fungi, algae, land plants, insects, worms, and mammals. Emphasis is on the primary literature, with directed discussion and some background introductory remarks for each class.

Prerequisites: BIOL 2124 or CHEM 2310 or BIOL 2423.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

BIOL 3381 (a) Ecological Genetics

Non-Standard Rotation. Enrollment limit: 15.

Covers the principles of population and quantitative genetics from an ecological perspective. Focuses on key concepts in the evolution of natural and managed populations, including subjects such as the heritability of ecologically important traits, inbreeding effects, and random genetic drift. Discusses various field and lab methods using genetic information in the study of ecology.

Prerequisites: BIOL 2000 - 2999.

Previous terms offered: Spring 2019.

BIOL 3554 (a, INS, MCSR) Biomechanics

Amy Johnson.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

Examines the quantitative and qualitative characterization of organismal morphology and explores the relationship of morphology to measurable components of an organism's mechanical, hydrodynamic and ecological environment. Students read, interpret, analyze, and discuss scientific papers. Discussions, lectures, problem sets, and a final literature-based paper emphasize (1) the analysis of morphology, including analyses of the shape of individual organisms, different modes of locomotion, and the mechanical and molecular organization of the tissues; (2) characterization of water flow associated with organisms; and (3) analyses of the ecological and mechanical consequences to organisms of their interaction with their environment.

Prerequisites: BIOL 1102 or BIOL 1109 or BIOL 2100 or higher or CHEM 1100 or higher or EOS 1100 or higher or MATH 1100 or higher or PHYS 1100 or higher.

Previous terms offered: Spring 2022, Spring 2020.

Chemistry

Overview & Learning Goals

Learning Goals

Mission Statement

Our mission is to help our students develop an understanding of and appreciation for chemistry, and to inspire and enable them to learn the practical and critical thinking skills necessary to both excel in their careers and to contribute to society as scientifically literate citizens.

We believe that this mission is best accomplished using a two-pronged strategy:

1. by applying proven and innovative approaches to teaching and learning in the classroom and the laboratory; and
2. by coupling our classroom pedagogy to high-quality research at the frontiers of chemistry.

Mapping Learning Goals to the Chemistry Curriculum Chart (<https://www.bowdoin.edu/chemistry/pdf/chemistry-learning-goals-mapping.pdf>)

Learning Outcomes for the Chemistry Major

Our students will understand, integrate, apply, and communicate fundamental and emerging chemical principles, moving from guided to self-designed investigations through courses or independent research.

Our students will achieve these outcomes by meeting knowledge and skill-based competencies.

Chemistry Knowledge Competencies

1. Structure and properties
2. Synthesis, reactivity, and transformation
3. Energy, equilibrium, and kinetics
4. Models and measurements

Skill-Based Competencies

1. Apply problem-solving strategies to quantitative and conceptual problems
2. Perform routine laboratory activities safely and responsibly
3. Document laboratory activities and manage data responsibly and ethically
4. Use chemical instruments with an understanding of their principles, capabilities, and outputs
5. Interpret complex data sets and propose evidence-based conclusions
6. Apply theoretical, conceptual, and empirical models
7. Search, engage, and evaluate scientific literature and databases
8. Communicate chemistry effectively in written, visual, and oral formats
9. Work collaboratively
10. Independently propose, design, and implement experiments and approaches to address questions in chemistry

Options for Majoring or Minor in the Department

Students may elect to major in chemistry, the chemistry and physics interdisciplinary major, or to coordinate a major in chemistry with digital and computational studies, education, or environmental studies.

Students pursuing a coordinate or interdisciplinary major may not normally elect a second major. Non-majors may elect to minor in chemistry with the exception of students majoring in biochemistry.

Department Website (<https://www.bowdoin.edu/chemistry/>)

Faculty

Richard D. Broene, *Department Chair*
Emily Murphy, *Department Coordinator*

Professors: Richard D. Broene, Danielle H. Dube (Biochemistry), Elizabeth A. Stemmler, Dharni Vasudevan (Environmental Studies)
Associate Professor: Benjamin C. Gorske (Biochemistry), Kana Takematsu (Biochemistry)

Assistant Professors: Allison Dzubak, Amnon Ortoll-Bloch

Senior Lecturer: Michael P. Danahy

Visiting Faculty: Sean Lutz, Brandon Tate (Environmental Studies)

Laboratory Instructors: Rene L. Bernier, Martha B. Black, Kurt Luthy, Paulette M. Messier, Inoka Pathiraja, Caryn Prudente, Denny Tesfa

Faculty/Staff Website (<https://www.bowdoin.edu/chemistry/faculty-and-staff/>)

Requirements Chemistry Major

The chemistry major consists of a core curriculum and additional electives within a single area of concentration.

Code	Title	Credits
Required Courses		
Select one of the following: ^a		1
CHEM 1092	Introductory Chemistry and Quantitative Reasoning II	
CHEM 1102	Introductory Chemistry II	
CHEM 1109	General Chemistry	
CHEM 2100	Chemical Analysis	1
CHEM 2250	Organic Chemistry I	1
CHEM 2400	Inorganic Chemistry	1
Select one of the following: ^b		1
MATH 1700	Integral Calculus	
MATH 1750	Integral Calculus, Advanced Section	
placement above MATH 1750		
PHYS 1130	Introductory Physics I	2
& PHYS 1140	and Introductory Physics II ^c	
Select a concentration:		
Chemical Concentration (p. 117)		5
Educational Concentration (p. 117)		7
Environmental Concentration (p.)		5
Geochemical Concentration (p. 117)		5
Neurochemical Concentration (p. 117)		7

^a Note that CHEM 1091 Introductory Chemistry and Quantitative Reasoning I are a prerequisite for CHEM 1092 Introductory Chemistry and Quantitative Reasoning II; CHEM 1101 Introductory Chemistry I is a prerequisite for CHEM 1102 Introductory Chemistry II. Placement above CHEM 1109 General Chemistry serves to meet this requirement and students do not have to replace the credit as part of the major requirements.

^b Placement above MATH 1700 Integral Calculus/MATH 1750 Integral Calculus, Advanced Section satisfies the math requirement for the major and students do not have to replace the credit as part of the major requirements. Students intending to pursue graduate studies are encouraged to take a math course.

^c Only one physics course is required for students placed into PHYS 1140 Introductory Physics II. Students placed above PHYS 1140 Introductory Physics II are not required to take a physics course to satisfy the requirements of the major, nor do they have to replace the credit in order to complete the requirements for the major. Note that PHYS 1130 Introductory Physics I is a prerequisite for PHYS 1140 Introductory Physics II.

Students are advised to begin their core curriculum as soon as possible. Depending on preparation and placement results, some students may begin with advanced courses.

Chemical Concentration

The Chemical Concentration consists of five credits.

Code	Title	Credits
CHEM 2260	Organic Chemistry II	1
or CHEM 2261	Organic Chemistry II with Research Laboratory	
CHEM 2510	Chemical Thermodynamics and Kinetics	1
CHEM 2520	Quantum Chemistry and Spectroscopy	1
Select two electives from the following: ^d		2
CHEM 2320	Biochemistry	
or CHEM 2550	Introduction to Computational Chemistry	
CHEM 3000 or higher		

^d Only one course numbered 4000 or higher can serve as one of the two electives.

Educational Concentration

The Educational Concentration consists of seven credits.

Code	Title	Credits
CHEM 2510	Chemical Thermodynamics and Kinetics	1
or CHEM 2520	Quantum Chemistry and Spectroscopy	
EDUC 1101	Contemporary American Education ^e	1
EDUC 2203	Educating All Students ^e	1
EDUC 3301	Teaching and Learning ^e	1
EDUC 3302	Curriculum Development ^e	1
Select two additional chemistry electives in consultation with the advisor.		2

^e These four courses also count toward an education minor or education coordinate major. This is the only exception to chemistry's double-counting rule for majors that allows only two courses to count double between two majors or a major and a minor.

Students interested in pursuing a minor or coordinate major in education, or the Bowdoin Teacher Scholars certification program, should consult with their major advisor as well as with a faculty member in the education department to discuss course selection and content area prerequisites.

Environmental Concentration

The Environmental Concentration consists of five credits.

Code	Title	Credits
CHEM 2510	Chemical Thermodynamics and Kinetics	1
Select two molecular perspective courses:		2
CHEM 2050	Environmental Chemistry	
CHEM 3050	Environmental Fate of Organic Chemicals	
CHEM 3055	Catalysis in Sustainable Chemical Processes	
CHEM 3060	Transformation of Organic Chemicals in the Environment	
CHEM 3100	Instrumental Analysis	
Select one environmental perspectives course:		1
CHEM 1105	Perspectives in Environmental Science	
EOS 2005	Biogeochemistry: An Analysis of Global Change	

EOS 2525	Marine Biogeochemistry	
EOS 2585	Ocean and Climate	
EOS 3020	Earth Climate History	
PHYS 2810	Atmospheric and Ocean Dynamics	
PHYS 3810	The Physics of Climate	
BIOL 2319	Biology of Marine Organisms	
BIOL 2333	Benthic Ecology	
BIOL 2327	Ecology	
BIOL 2581	Forest Ecology and Conservation	
One additional course from the molecular or environmental perspectives lists		1
At least one course from the advanced level (3000–3999) of either molecular or environmental perspectives courses		

Geochemical Concentration

Code	Title	Credits
CHEM 2050	Environmental Chemistry	1
CHEM 2510	Chemical Thermodynamics and Kinetics	1
CHEM 3100	Instrumental Analysis	1
Select two electives from the following: ^f		2
EOS 2005	Biogeochemistry: An Analysis of Global Change	
EOS 2165	Mountains to Trenches	
EOS 2585	Ocean and Climate	
EOS 3020	Earth Climate History	
EOS 3115	Research in Mineral Science	

^f At least one elective must be at the advanced level (3000–3999).

Neurochemical Concentration

The Neurochemical Concentration consists of seven credits.

Chemistry majors completing the neurochemical concentration cannot also major in neuroscience.

Code	Title	Credits
BIOL 1102	Biological Principles II	1
or BIOL 1109	Scientific Reasoning in Biology	
CHEM 2260	Organic Chemistry II	1
or CHEM 2261	Organic Chemistry II with Research Laboratory	
CHEM 2320	Biochemistry	1
CHEM 2510	Chemical Thermodynamics and Kinetics	1
or CHEM 2520	Quantum Chemistry and Spectroscopy	
Select two electives from the following:		2
BIOL 2135	Neurobiology	
BIOL 2510	Neuropharmacology	
BIOL 2553	Neurophysiology	
BIOL 2566	Molecular Neurobiology	
One advanced neuroscience course (3000–3999)		1

Chemistry Minor

The minor consists of four chemistry courses at or above the intermediate level (2000–2969). One intermediate or advanced independent study can count toward the minor.

Interdisciplinary Majors

The chemistry department participates in the biochemistry and environmental studies programs, as well as in the interdisciplinary chemical physics major. See Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>) area for more information.

Additional Information

Additional Information and Department Policies

- Only one grade of D may be counted for the major or minor. This D must be offset by a grade of B or higher in another chemistry course also required for the major or minor.
- Generally, courses for the major or minor must be taken for regular letter grades (not Credit/D/Fail). Under special circumstances, however, a student may petition the department chair to allow one course required for the major or minor to be taken with the Credit/D/Fail grading option.
- With prior approval from the department chair, up to two transfer credits can count toward the major or minor.
- Majors may double-count two courses with another department or program with one exception: majors pursuing the educational concentration may double-count the four required education courses. Minors may double-count an unlimited number of courses with another department or program.
- Biochemistry majors may not declare a major or minor in chemistry. Chemistry majors completing the neurochemical concentration may not also major in neuroscience.

Advanced Placement/International Baccalaureate (AP/IB)

Students who received a minimum score of four on the Chemistry AP exam or a minimum score of five on the Chemistry IB exam are eligible to receive a credit and can count it toward the major or minor after completion of CHEM 2050 Environmental Chemistry, CHEM 2100 Chemical Analysis, CHEM 2250 Organic Chemistry I, CHEM 2400 Inorganic Chemistry, CHEM 2510 Chemical Thermodynamics and Kinetics, or CHEM 2520 Quantum Chemistry and Spectroscopy with a minimum grade of C-; however, credit is not given if the student places into or elects to take CHEM 1091 Introductory Chemistry and Quantitative Reasoning I, CHEM 1092 Introductory Chemistry and Quantitative Reasoning II, CHEM 1101 Introductory Chemistry I, CHEM 1102 Introductory Chemistry II or CHEM 1109 General Chemistry. Regardless of AP/IB score, all students must take the placement exam. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Career Paths

The chemistry major can serve as preparation for many career paths after college, including the profession of chemistry, graduate studies in the sciences, medicine, secondary school teaching, and many fields in the business world. The department offers programs based on the interests and goals of the student; therefore, a prospective major should discuss their plans with the department as soon as possible. Regardless of career goals, students are encouraged to develop their critical thinking and problem-solving skills by participating in a collaborative student-

faculty research project (Chemistry 2970–2999, 4000–4051, or summer research).

The department also offers an American Chemical Society-certified major in chemistry. The requirements for certification are met by taking additional courses in chemistry and other disciplines. Students interested in this certification program should consult their advisor and refer to guidelines found at acs.org/cpt (<http://acs.org/cpt/>).

Independent Study/Honors Projects

Students may engage in independent study at the intermediate (2970–2999) or advanced (4000–4051) level. Only one advanced level independent study or honors project can count as an elective toward the major. Majors pursuing honors in chemistry are required to register for CHEM 4050 during the first semester and CHEM 4051 during the second semester of their senior year, and attend weekly seminars/workshops on Fridays, 2:30 p.m. to 4:00 p.m., during both semesters.

Information for Incoming Students (p. 118)

Students must take the chemistry placement exam to enroll in any chemistry course numbered 1091 and higher. If students do not complete the chemistry placement exam in the summer prior to matriculation, they need to take the chemistry placement exam immediately and notify the department (<https://www.bowdoin.edu/chemistry/>) when they have completed the exam so that an assessment can be made prior to course registration. Placements are determined based on the result of the chemistry placement exam and other information, which includes the Quantitative Reasoning (QR) placement exam, physics placement exam (also strongly recommended for students interested in chemistry courses), SAT or ACT scores, and AP or IB scores.

Chemistry courses numbered between 1000–1090 are meant to fulfill the INS (Inquiry in the Natural Sciences) distribution degree requirement and assume no previous science background. They are appropriate for students who do not intend to take further courses in chemistry at Bowdoin. They do not require a placement in chemistry.

CHEM 1091 Introductory Chemistry and Quantitative Reasoning I is offered as an invitation-only fall-semester course and is intended for students with limited background in chemistry who will benefit from additional time devoted to improving quantitative skills and meets for three one-hour lecture sections per week, one three-hour laboratory per week, and one hour and a half problem solving/quantitative skills building session per week. It leads to CHEM 1092 Introductory Chemistry and Quantitative Reasoning II in the spring.

CHEM 1101 Introductory Chemistry I is offered only as a fall-semester course and is intended for students with limited to adequate backgrounds in chemistry and meets for a total of three lecture-hours per week, and one three-hour laboratory per week. It leads to CHEM 1102 Introductory Chemistry II in the spring.

CHEM 1109 General Chemistry is a one-semester course, taught during both the fall and spring semesters, intended for students with solid high school chemistry preparation and meets for a total of three lecture-hours per week and one four-hour laboratory per week.

Chemistry courses at the 2000-level, which are open to students with the "CHEM 2000-level/CHEM 1109" or "CHEM 2000-level" placement, are appropriate for students with outstanding high-school chemistry preparation. These course options are CHEM 2250 Organic Chemistry I and CHEM 2100 Chemical Analysis in the fall semester and CHEM 2400 Inorganic Chemistry and CHEM 2050 Environmental

Chemistry in the spring semester. While CHEM 2510 Chemical Thermodynamics and Kinetics and CHEM 2520 Quantum Chemistry and Spectroscopy are also entry points, students must also meet prerequisites in mathematics and physics to enroll in these courses. Students who start and complete a 2000-level chemistry course are not permitted to register concurrently or in a future semester for CHEM 1101 Introductory Chemistry I or CHEM 1109 General Chemistry. Students interested in 2000-level courses should contact the instructors to learn more about the course.

Summary of Placements in Chemistry

- CHEM 1091: permits registration in CHEM 1091 Introductory Chemistry and Quantitative Reasoning I only
- CHEM 1101: permits registration in CHEM 1101 Introductory Chemistry I only
- CHEM 1109/1101: permits registration in CHEM 1109 General Chemistry or CHEM 1101 Introductory Chemistry I (this placement indicates the student is on the border between these two entry points. Students are permitted to enroll in either course and should consult with the instructors to ensure proper entry to the curriculum)
- CHEM 1109: permits registration in CHEM 1109 General Chemistry only
- CHEM 2000-level/CHEM 1109: permits registration in Chemistry at the 2000-level or CHEM 1109 General Chemistry (this placement indicates the student is on the border between these two entry points. Students are permitted to enroll in either course and should consult with the instructors to ensure proper entry to the curriculum)
- CHEM 2000-level: permits registration in Chemistry at the 2000-level or CHEM 1109 General Chemistry (this placement indicates that a student should enroll in a 2000-level chemistry course, CHEM 2250 Organic Chemistry I is the most common entry point)

Additional information: When deciding to begin with a 1000-level chemistry course or a 1000-level biology course during their first semester, many students find a grounding in chemistry helpful before beginning a course in biology. As a word of caution, some first-year students find it advantageous to wait until their sophomore year to start chemistry; however, this means they cannot take CHEM 2250 Organic Chemistry I until their junior year if they begin with introductory chemistry as a sophomore. Students who placed into MATH 1050 Quantitative Reasoning or PHYS 1093 Introduction to Quantitative Reasoning in the Physical Sciences need not take both and are strongly recommended to enroll in PHYS 1093 Introduction to Quantitative Reasoning in the Physical Sciences as this course provides the appropriate grounding for 1000-level science courses, as well as MATH 1600 Differential Calculus.

Courses

CHEM 1054 (a, INS) Chemistry in Art and Design

Brandon Tate.

Non-Standard Rotation. Spring 2023. Enrollment limit: 24.

Examines the intersections of chemical science with the visual and performing arts. Fundamental concepts of atomic structure, chemical bonding, and chemical reactions are introduced through discussions of the material composition of artists' tools and media. Selected topics include the molecular origin of color in pigments and dyes, the ageing and weathering of architectural structures over time, the science behind the preservation and restoration of works of art, and the development of polymers for 3D printing. Laboratory activities include hands-on applications of the scientific method to answer questions about the chemistry of artistic media as well as the creation of an original work of art inspired by chemistry. Assumes no background in science. Not open to students who have credit for a Chemistry course numbered 1000 or higher or who have placements in CHEM 1109, CHEM 2000 level, or CHEM 2000/1109.

CHEM 1055 (a, INS) Science of Food and Wine

Non-Standard Rotation. Enrollment limit: 24.

Methods of food and wine preparation and production emerged from essentially controlled scientific experiments, even if the techniques of cooking are often carried out without thought of the underlying physical processes at play. Considers the science behind food and wine using bread baking, cooking techniques, the role of microbes in our diet, and wine making and appreciation to explore the chemistry and biology that underlie our gastronomy. Molecular structures and complex interactions central to cooking and wine are examined in integrated laboratory exercises. Assumes no background in science. Not open to students who have credit for a chemistry course numbered 1090 or higher.

Previous terms offered: Spring 2021.

CHEM 1057 (a, INS) Chemistry for the Common Good

Non-Standard Rotation. Enrollment limit: 24.

Scientific reasoning and public engagement are parts of civic responsibility, necessary in our pursuit of the common good. From concerns about equal access to clean air and water to realization of the devastating effects of the opioid crisis, future leaders in the community who plan to engage in meaningful discussions of society's pressing issues must develop an appreciation of the science that underlies these issues. This course will develop students' knowledge of chemistry through examination of a broad range of community issues, discovering how knowledge of chemistry is integrated into both our understanding and proposed solutions to today's problems. Students work together to actively explore related chemical concepts and the process of scientific inquiry in integrated lab exercises. Throughout the semester, students reflect, discuss, and reevaluate how their growing knowledge of chemistry impacts their own commitments and approaches to community activities. Assumes no background in science. Not open to students who have credit for a Chemistry course numbered 1000 or higher or who have placements in CHEM 1109, CHEM 2000 level, or CHEM 2000/1109.

Previous terms offered: Spring 2020.

CHEM 1058 (a, INS) Drug Discovery

Non-Standard Rotation. Enrollment limit: 25.

The process of drug discovery of medicinal compounds has evolved over millennia, from the shaman's use of medicinal herbs to the highly evolved techniques of rational design and high-throughput screening used by today's pharmaceutical industry. Examines past and present approaches to drug discovery, with an emphasis on the natural world as a source of drugs, historical examples of drug discovery, and the experiments undertaken to validate a drug. Encourages students to take initial steps to identify novel therapeutics and to directly compare conventional versus herbal remedies in integrated laboratory exercises. Assumes no background in science. Not open to students who have credit for a chemistry course numbered 1090 or higher.

Previous terms offered: Spring 2021, Fall 2019.

CHEM 1059 (a, INS) Chemistry of Consumer Goods

Non-Standard Rotation. Enrollment limit: 50.

Natural and synthetic "chemicals" make up virtually everything we purchase and consume from breakfast cereals to soaps, shampoo bottles, and over-the-counter medications. Examines the chemical components of food, drugs, soaps, plastics, and other consumer goods we encounter daily. Explores scientific resources that can be used to obtain information on product components, safety, and regulations. Also considers topics related to some of the current safety concerns raised by chemicals found in common household items through case studies and research projects. Assumes no background in science. Not open to students who have credit for a chemistry course numbered 1090 or higher.

Previous terms offered: Spring 2019.

CHEM 1091 (a, INS) Introductory Chemistry and Quantitative Reasoning I

Michael Danahy; Sean Lutz; Brandon Tate.

Every Fall. Fall 2022. Enrollment limit: 15.

The first course in a two-semester introductory college chemistry sequence covering the same content as Chemistry 1101/1102 with additional instruction focused on developing quantitative reasoning and problem-solving skills in the context of learning chemistry. Topics include the properties of matter, atomic and molecular structure, quantum and periodic trends, chemical bonding, intermolecular forces, stoichiometry, and aqueous solutions. Three hours of lecture, mandatory one-hour problem-solving session, and three hours of laboratory work per week. To ensure proper placement, students must take the chemistry placement examination prior to registration and must be recommended for placement in Chemistry 1091. Not open to students who have taken Chemistry 1101, 1102, or 1109. Students continuing in chemistry take Chemistry 1092 as their next chemistry course.

Prerequisites: Placement in CHEM 1091.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHEM 1092 (a, INS, MCSR) Introductory Chemistry and Quantitative Reasoning II

Elizabeth Stemmler; Ren Bernier; Inoka Pathiraja; Sean Lutz; Kurt Luthy; Caryn Prudente.

Every Spring. Spring 2023. Enrollment limit: 15.

The second course in a two-semester introductory college chemistry sequence that follows Chemistry 1091. Incorporates additional instruction focused on developing quantitative reasoning and problem-solving skills in the context of learning chemistry. Topics include gases, properties of solutions, thermodynamics and thermochemistry, kinetics, equilibrium, electrochemistry, and acid-base chemistry. Three hours of lecture, mandatory one-hour problem-solving session, and four hours of laboratory work per week.

Prerequisites: CHEM 1091.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHEM 1093 (a, MCSR) Introduction to Quantitative Reasoning in the Physical Sciences

Liz McCormack.

Every Fall. Fall 2022. Enrollment limit: 20.

Climate science. Quantum Physics. Bioengineering. Rocket science. Who can understand it? Anyone with high school mathematics (geometry and algebra) can start. Getting started in physics requires an ability to mathematically describe real world objects and experiences. Prepares students for additional work in physical science and engineering by focused practice in quantitative description, interpretation, and calculation. Includes hands-on measurements, some introductory computer programming, and many questions about the physics all around us. Registration for this course is by placement only. To ensure proper placement, students must have taken the physics placement examination prior to registering for Physics 1093. (Same as: PHYS 1093)

Prerequisites: Placement in PHYS 1093.

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

CHEM 1101 (a, INS) Introductory Chemistry I

Sean Lutz; Amnon Ortoll-Bloch; Brandon Tate.

Every Fall. Fall 2022. Enrollment limit: 45.

The first course in a two-semester introductory college chemistry sequence. Introduction to the states of matter and their properties, stoichiometry and the mole unit, properties of gases, thermochemistry, atomic structure, and periodic properties of the elements. Lectures, review sessions, and four hours of laboratory work per week. To ensure proper placement, students must take the chemistry placement examination and must be recommended for placement in Chemistry 1101. Students continuing in chemistry take Chemistry 1102, not Chemistry 1109, as their next chemistry course.

Prerequisites: Placement in CHEM 1101 or Placement in CHEM 1109/1101.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHEM 1102 (a, INS, MCSR) Introductory Chemistry II

Elizabeth Stemmler; Sean Lutz; Ren Bernier; Inoka Pathiraja; Kurt Luthy; Caryn Prudente.

Every Spring. Spring 2023. Enrollment limit: 40.

The second course in a two-semester introductory college chemistry sequence. Introduction to chemical bonding and intermolecular forces, characterization of chemical systems at equilibrium and spontaneous processes, the rates of chemical reactions, and special topics. Lectures, review sessions, and four hours of laboratory work per week. Students who have taken Chemistry 1109 may not take Chemistry 1102 for credit.

Prerequisites: CHEM 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHEM 1105 (a, INS, MCSR) Perspectives in Environmental Science

Phil Camill; Shana Stewart Deeds; Brandon Tate.

Every Spring. Spring 2023. Enrollment limit: 35.

Understanding environmental challenges requires scientific knowledge about the different spheres of the Earth – land, water, air, and life – and how they interact. Presents integrated perspectives across the fields of biology, chemistry, and earth and oceanographic science to examine the scientific basis for environmental change from the molecular to the global level. Foundational principles are developed to address major course themes, including climate change, energy, soil/air/water pollution, chemical exposure and risk, land use change, and biodiversity loss. Laboratory sessions consist of local field trips, laboratory experiments, group research, case study exercises, and discussions of current and classic scientific literature. (Same as: ENVS 2201, BIOL 1158)

Prerequisites: BIOL 1101 or BIOL 1109 or CHEM 1091 - 2260 or PHYS 1130 or PHYS 1140 or EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221) or EOS 2115 or EOS 2335 or EOS 2345 (same as ENVS 2270) or EOS 2365 or EOS 2525 (same as ENVS 2251) or EOS 2535 or EOS 2585 (same as ENVS 2282) or ENVS 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHEM 1109 (a, INS, MCSR) General Chemistry

Michael Danahy; Ren Bernier; Inoka Pathiraja; Sean Lutz; Kurt Luthy; Caryn Prudente; Danielle Dube; Denny Tesfa.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

A one-semester introductory chemistry course. Introduction to models of atomic structure, chemical bonding, and intermolecular forces; characterization of chemical systems at equilibrium and spontaneous processes; the rates of chemical reactions; and special topics. Lectures, review sessions, and four hours of laboratory work per week. Students who have taken Chemistry 1102 may not take Chemistry 1109 for credit. To ensure proper placement, students must take the chemistry placement examination and must be recommended for placement in Chemistry 1109.

Prerequisites: Placement in CHEM 1109/1101 or Placement in CHEM 1109 or Placement in CHEM 2000/1109 or Placement in CHEM 2000 level.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

CHEM 2050 (a, INS) Environmental Chemistry

Every Other Spring. Enrollment limit: 20.

Focuses on two key processes that influence human and wildlife exposure to potentially harmful substances, chemical speciation and transformation. Equilibrium principles as applied to acid-base, complexation, precipitation, and dissolution reactions are used to explore organic and inorganic compound speciation in natural and polluted waters; quantitative approaches are emphasized. Weekly laboratory sections are concerned with the detection and quantification of organic and inorganic compounds in air, water, and soils/sediments. (Same as: ENVS 2255, EOS 2325)

Prerequisites: CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109.

Previous terms offered: Spring 2022, Spring 2020.

CHEM 2100 (a, INS, MCSR) Chemical Analysis

Elizabeth Stemmler; Kurt Luthy.

Every Fall. Fall 2022. Enrollment limit: 20.

Methods of separating and quantifying inorganic and organic compounds using volumetric, spectrophotometric, electrometric, and chromatographic techniques are covered. Chemical equilibria and the statistical analysis of data are addressed. Lectures and four hours of laboratory work per week.

Prerequisites: CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHEM 2250 (a) Organic Chemistry I

Benjamin Gorske; Richard Broene; Michael Danahy; Paulette Messier; Inoka Pathiraja; Caryn Prudente.

Every Fall. Fall 2022. Enrollment limit: 35.

Introduction to the chemistry of the compounds of carbon. Describes bonding, conformations, and stereochemistry of small organic molecules. Reactions of hydrocarbons, alkyl halides, and alcohols are discussed. Kinetic and thermodynamic data are used to formulate reaction mechanisms. Lectures, review sessions, and four hours of laboratory work per week.

Prerequisites: CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHEM 2260 (a) Organic Chemistry II

Michael Danahy; Richard Broene; Benjamin Gorske; Kurt Luthy; Martha Black; Caryn Prudente; Paulette Messier.

Every Spring. Spring 2023. Enrollment limit: 30.

Continuation of the study of the compounds of carbon. Highlights the reactions of aromatic, carbonyl-containing, and amine functional groups. Mechanistic reasoning provides a basis for understanding these reactions. Skills for designing logical synthetic approaches to complex organic molecules are developed. Lectures, review sessions, and four hours of laboratory work per week.

Prerequisites: CHEM 2250.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHEM 2261 (a) Organic Chemistry II with Research Laboratory

Non-Standard Rotation. Enrollment limit: 08.

This laboratory section will differ from the others associated with this course by focusing on the conduct of actual research, in which students will design, construct, and test new enzyme mimics intended to facilitate to the discovery of new medicines. As in the other laboratory sections, students will learn to generate experimental plans based on those found in the literature, execute experiments efficiently and safely, analyze and explain their data, and generate appropriate reports of their activities. The assessment and time expectations both in and outside of the laboratory are designed to be identical to those of the other laboratory sections, while giving the participants a perspective on modern chemistry research techniques and allowing them to contribute to advancing an important scientific field.

Prerequisites: CHEM 2250.

Previous terms offered: Spring 2019.

CHEM 2320 (a, MCSR) Biochemistry

Danielle Dube; Kate Farnham.

Every Spring. Spring 2023. Enrollment limit: 36.

Focuses on the chemistry of living organisms. Topics include structure, conformation, and properties of the major classes of biomolecules (proteins, nucleic acids, carbohydrates, and lipids); enzyme mechanisms, kinetics, and regulation; metabolic transformations; energetics and metabolic control. Lectures and four hours of laboratory work per week. This course satisfies a requirement for the biochemistry major. (Same as: BIOC 2320)

Prerequisites: CHEM 2260 or CHEM 2261.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHEM 2400 (a, INS, MCSR) Inorganic Chemistry

Amnon Ortoll-Bloch; Denny Tesfa.

Every Spring. Spring 2023. Enrollment limit: 24.

An introduction to the chemistry of the elements with a focus on chemical bonding, periodic properties, and coordination compounds. Topics in solid state, bioinorganic, and environmental inorganic chemistry are also included. Provides a foundation for further work in chemistry and biochemistry. Lectures and four hours of laboratory work per week.

Prerequisites: CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHEM 2510 (a, INS, MCSR) Chemical Thermodynamics and Kinetics

Kana Takematsu; Martha Black.

Every Fall. Fall 2022. Enrollment limit: 36.

Thermodynamics and its application to chemical changes and equilibria that occur in the gaseous, solid, and liquid states. The behavior of systems at equilibrium and chemical kinetics are related to molecular properties by means of statistical mechanics and the laws of thermodynamics. Lectures and four hours of laboratory work per week. Mathematics 1800 is recommended.

Prerequisites: Three of: either CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109 and MATH 1700 or higher or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and either PHYS 1130 or PHYS 1140.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CHEM 2520 (a, INS, MCSR) Quantum Chemistry and Spectroscopy

Kana Takematsu; Martha Black.

Every Spring. Spring 2023. Enrollment limit: 12.

Development and principles of quantum chemistry with applications to atomic structure, chemical bonding, chemical reactivity, and molecular spectroscopy. Lectures and four hours of laboratory work per week. Mathematics 1800 is recommended. Note: Chemistry 2510 is not a prerequisite for Chemistry 2520.

Prerequisites: Three of: either CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109 and MATH 1700 or higher or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and PHYS 1140.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

CHEM 2550 (a, INS, MCSR) Introduction to Computational Chemistry
Non-Standard Rotation. Enrollment limit: 35.

An introduction to theories, models, and methods in computational chemistry. Computational modeling is used to explain observed chemical phenomena, predict properties of hypothetical chemical systems, and design or propose molecules and/or materials with specific properties. Depending on the nature of the chemical system and the information desired, different approximations and computational approaches are needed and explored in class. Students use existing computational modeling codes running on the Bowdoin high-performance computing grid to apply theories and methods to chemical problems. Three hours of lecture and one hour open lab session per week.

Prerequisites: Three of: either CHEM 2250 or CHEM 2400 or CHEM 2520 or PHYS 3140 and PHYS 1140 and MATH 1700 - 2969 or Placement in MATH 1800 (M) or Placement in MATH 1808 {2108} (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Fall 2021, Spring 2021.

CHEM 3050 (a, INS) Environmental Fate of Organic Chemicals
Non-Standard Rotation. Enrollment limit: 16.

More than 100,000 synthetic chemicals are currently in daily use. In order to determine the risk posed to humans and ecosystems, the extent and routes of chemical exposure must be understood and anticipated. Addresses the fate of organic chemicals following their intentional or unintentional release into the environment. Why do these chemicals either persist or break down, and how are they distributed between surface water, ground water, soil, sediments, biota, and air? Analysis of chemical structure used to gain insight into molecular interactions that determine the various chemical transfer and transformation processes, while emphasizing the quantitative description of these processes. (Same as: ENVS 3905)

Prerequisites: CHEM 2250.

Previous terms offered: Fall 2020.

CHEM 3055 (a) Catalysis in Sustainable Chemical Processes
Brandon Tate.
Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Catalysis is a versatile tool in the development of sustainable chemical processes and renewable alternatives to fossil fuels and petrochemicals. The introduction of catalysis to an industrial chemical process provides opportunities for improved energy efficiency, reduced waste, conservation of scarce natural resources, lower costs, and greater selectivity, potentially facilitating chemical transformations that are otherwise inaccessible. This course covers essential concepts in transition state theory and chemical kinetics and the application of catalysis to outstanding problems in global chemical sustainability. Approaches to the design, characterization, and optimization of inorganic, organic, and biological catalysts are discussed in the context of applications including chemical energy storage, carbon capture and utilization, biomass conversion, sustainable plastics and polymers, and environmental remediation. (Same as: ENVS 3904)

Prerequisites: CHEM 2250.

CHEM 3100 (a) Instrumental Analysis
Every Other Spring. Enrollment limit: 15.

Theoretical and practical aspects of instrumental techniques, including nuclear magnetic resonance spectroscopy, infrared spectroscopy, Raman spectroscopy, and mass spectrometry are covered, in conjunction with advanced chromatographic methods. Applications of instrumental techniques to the analysis of biological and environmental samples are covered. Lectures and two hours of laboratory work per week.

Prerequisites: CHEM 2100.

Previous terms offered: Spring 2022, Spring 2020.

CHEM 3200 (a) Advanced Organic Chemistry: Organometallic Chemistry
Non-Standard Rotation. Enrollment limit: 15.

In-depth study of compounds containing metal-carbon bonds and their reactions, with emphasis on synthesis and spectroscopy. A mechanistic approach is used to discover how these species act as catalysts or intermediates in synthetic organic reactions. Special techniques for handling these often sensitive molecules are introduced.

Prerequisites: Two of: either CHEM 2260 or CHEM 2261 and CHEM 2400.

Previous terms offered: Fall 2019.

CHEM 3250 (a) Structure Determination in Organic Chemistry
Non-Standard Rotation. Enrollment limit: 12.

The theory and application of spectroscopic techniques useful for the determination of the molecular structures of organic molecules are discussed. Mass spectrometry and infrared, ultraviolet-visible, and nuclear magnetic resonance (NMR) spectroscopies are applied to structure elucidation. Heavy emphasis is placed on applications of multiple-pulse, Fourier transform NMR spectroscopic techniques. Lectures and at least two hours of laboratory work per week.

Prerequisites: CHEM 2260 or CHEM 2261.

Previous terms offered: Fall 2021.

CHEM 3270 (a) Biomimetic and Supramolecular Chemistry
Benjamin Gorske.
Non-Standard Rotation. Fall 2022. Enrollment limit: 15.

A guided exploration of the primary scientific literature concerning weak covalent and noncovalent interactions that collectively determine the three-dimensional structures of biomimetic and foldameric molecules and that govern the aggregation of molecules into discrete multi-molecular assemblies. Surveys practical applications in biochemical investigation, catalysis, and medicine, as well as in the young but rapidly expanding sciences of molecular and nanostructural engineering. NOTE: There is NO LABORATORY WORK associated with this course. The required designated lab is a required discussion session.

Prerequisites: CHEM 2260 or CHEM 2261.

Previous terms offered: Spring 2022, Spring 2021, Fall 2018.

CHEM 3310 (a) Chemical Biology

Danielle Dube.

Every Other Fall. Spring 2023. Enrollment limit: 16.

The power of organic synthesis has had a tremendous impact on understanding of biological systems. Examines case studies in which synthetically derived small molecules have been used as tools to tease out answers to questions of biological significance. Topics include synthetic strategies that have been used to make derivatives of the major classes of biomolecules (nucleic acids, proteins, carbohydrates, and lipids) and the experimental breakthroughs these molecules have enabled (e.g., polymerase-chain reaction, DNA sequencing, microarray technology). Emphasis on current literature, experimental design, and critical review of manuscripts.

Prerequisites: CHEM 2320.

Previous terms offered: Fall 2021, Fall 2020, Spring 2019.

CHEM 3400 (a) Advanced Inorganic Chemistry

Sean Lutz.

Every Other Spring. Spring 2023. Enrollment limit: 12.

Inorganic chemistry is incredibly diverse and wide-ranging in scope. Symmetry, spectroscopy, and quantum-based theories and computational methods are employed to gain insight into the molecular and electronic structures and reaction mechanisms of inorganic compounds. Examples from the current literature emphasized, including topics in inorganic photochemistry and biochemistry. Chemistry 2520 is recommended.

Prerequisites: CHEM 2400.

Previous terms offered: Spring 2021, Spring 2019.

CHEM 3510 (a) Reactivity and Kinetics

Non-Standard Rotation. Enrollment limit: 15.

Explores reactivity and kinetics from a physical chemistry perspective. We will survey theories and applications to model observed synthetic, gas phase, surface, and biological reactions. In particular, we will utilize a molecular picture to rationalize current and past discoveries in chemistry. Planned topics include aspects of the isotope effect and tunneling in catalysis, potential energy surfaces and molecular dynamic models, photochemistry and conical intersections, reaction dynamics and molecular beam experiments, enzymology, surface catalysis, polymer-binding, and charge-transfer models. Emphasis will be placed on reading and discussing scientific literature.

Prerequisites: CHEM 2510.

Previous terms offered: Spring 2020.

Cinema Studies

Overview & Learning Goals

Overview and Learning Goals

The Cinema Studies Program introduces students to the history, form, and analysis of motion pictures through an interdisciplinary approach. It explores how cinema, as an art form and cultural product, reflects the vision of filmmakers and influences our understanding of historical and lived realities. A key goal of the program is to teach the critical analysis of images in an increasingly image-driven society. Upon completing the minor, students should be able to:

- demonstrate mastery of basic conceptual and visual vocabulary used in the study of film, in particular the ability to analyze film in terms of mise-en-scene, cinematography, editing, sound, and narrative structure;
- analyze the formal components of cinema within aesthetic, historical, sociocultural, political, and international contexts, as well as in light of theoretical frameworks related to gender and sexuality, race and ethnicity, class, and/or global interactions;
- demonstrate knowledge of the history of national and international cinemas, as well as major filmmakers and different genres;
- describe the relation of film to other art forms such as literature, theater, music, and dance; and
- demonstrate an understanding of how different aspects of the film experience—from preproduction and production through distribution, marketing, exhibition, and reception—engage in processes of making meaning.

Options for Minor in the Program

Students may elect to minor in cinema studies. Bowdoin does not offer a major in cinema studies.

Program Website (<https://www.bowdoin.edu/cinema-studies/>)

Faculty

Ann L. Kibbie, *Program Director*Laurie Holland, *Program Coordinator*

Professors: Aviva Briefel (English)‡, Shu-chin Tsui (Asian Studies), Tricia Welsch‡

Associate Professor: Allison A. Cooper (Romance Languages and Literatures)

Visiting Faculty: Tanya Goldman

Contributing Faculty: Meryem Belkaïd, Elena Cueto Asín, Ann L. Kibbie, Aaron Kitch, William Lempert, Meredith McCarroll, Elizabeth Muther, Patrick Rael, Marilyn Reizbaum, Vineet Shende, Jill Smith, Birgit Tautz, Anthony Walton

Faculty/Staff Website (<https://www.bowdoin.edu/cinema-studies/faculty-and-staff/>)

Requirements

Cinema Studies Minor

The cinema studies minor consists of five courses.

Code	Title	Credits
Required Courses		
CINE 1101	Film Narrative	1
Select one of the following:		1
CINE 2201	History of Film 1895 to 1935	
CINE 2202	Film History 1935 to 1975	
Select one 3000-level seminar in cinema studies that must be taken at Bowdoin.		1
Select one cinema studies course that incorporates theory.		1
Select one cinema studies course in non-US cinema.		1

Additional Information

Additional Information and Program Policies

- Students minoring in cinema studies are required to complete a total of five courses with a grade of C- or better. Courses taken Credit/D/Fail do not count toward the minor.
- Students may count one class for more than one requirement, such as a 3000-level course with a theory component. Students may also take both CINE 2201 History of Film 1895 to 1935 and CINE 2202 Film History 1935 to 1975 for credit toward the minor. All students successfully completing the minor will still complete five classes.
- No more than two courses below the 2000 level, including first-year writing seminars, count toward the minor.
- No more than one independent study, at the intermediate or advanced level, may count toward the minor.
- Normally, one course taken at another college or university may be applied to the minor at the introductory or 2000 level upon approval by the program director and faculty.
- Minors may double-count one course with another department or program.

Information for Incoming Students (p. 125)

Film has emerged as one of the most important art forms of the modern era. Cinema Studies at Bowdoin introduces students to the techniques, history, and literature of film to cultivate an understanding of both the vision and craft of film artists and the views of society and culture expressed in cinema. The Cinema Studies minor consists of five courses. First-year students interested in Cinema Studies are welcome in any course that does not have a prerequisite. Students can also contact the instructor to ask about joining any of our courses.

In fall 2022, courses offered or cross-listed with CINE that invite first-year students are: CINE 1101 Film Narrative, CINE 2203 Film History 1975-Present, CINE 2263 Documentary and Nonfiction Storytelling: Theories and Forms, and RUS 2413 Memory in Contemporary Russian and East European Cinema.

Courses

CINE 1020 (c) Japanese Animation: History, Culture, Society

Non-Standard Rotation. Enrollment limit: 16.

Animation is a dominant cultural force in Japan and perhaps its most important cultural export. Examines the ways Japanese animation represents Japan's history and society and the diverse ways in which it is consumed abroad. How does animation showcase Japanese views of childhood, sexuality, national identity, and gender roles? How does its mode of story-telling build upon traditional pictorial forms in Japan? Focuses on the aesthetic, thematic, social, and historical characteristics of Japanese animation films; provides a broad survey of the place of animation in twentieth-century Japan. Films include "Grave of Fireflies," "Spirited Away," "Ghost in the Shell," "Akira," and "Princess Kaguya." (Same as: ASNS 1020)

Previous terms offered: Fall 2020, Fall 2018.

CINE 1025 (c) Crime Film

Non-Standard Rotation. Enrollment limit: 16.

Considers gangster films in depth, exploring how popular narrative film manages the threat posed by the criminal's racial, ethnic, or gender difference. Examines shifts in the genre's popularity and assesses the implications of considering genre entertainment art. Weekly writing, extensive reading, and mandatory attendance at evening film screenings.

Previous terms offered: Fall 2021, Fall 2018.

CINE 1101 (c, VPA) Film Narrative

Tanya Goldman.

Every Year. Fall 2022. Enrollment limit: 50.

An introduction to a variety of methods used to study motion pictures, with consideration given to films from different countries and time periods. Examines techniques and strategies used to construct films, including mise-en-scène, editing, sound, and the orchestration of film techniques in larger formal systems. Surveys some of the contextual factors shaping individual films and our experiences of them (including mode of production, genre, authorship, and ideology). No previous experience with film studies is required.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CINE 1118 (c) Introduction to Media Studies

Non-Standard Rotation. Enrollment limit: 50.

What does it mean when we say that we live in the age of media? First, we will examine some of the classical theoretical texts that define the study of media and look at new forms of modern mass media that emerged in the twentieth century, such as radio and television. Later, we will look more closely at our contemporary world of computerized media and information technology, including software and social media. Throughout the course, we will examine the factors that influence media as well as the ways in which media influences society and individuals. Texts include films by Jordan Peele, Ryan Coogler, Allan J. Pakula, Sidney Lumet, and Billy Wilder, students' own social media practices, and theoretical texts by Marshall McLuhan, Friedrich Kittler, and Alexander R. Galloway. (Same as: ENGL 1118)

Previous terms offered: Spring 2021.

CINE 1151 (c, VPA) Acting for the Camera

Non-Standard Rotation. Enrollment limit: 16.

Acting for the Camera introduces students to the intellectual, vocal, physical and emotional challenge of the acting process, distilled for on-camera work. Students will learn and practice exercises examining human behavior within the camera's frame and moment-to-moment storytelling. They will create on-screen acting projects, then analyze their own and peers' work while also studying celebrated professionals' work within the art of acting on camera. Students will also learn the language of the screenplay and how to analyze it for acting clues, learning, developing and deploying new techniques that help translate that analysis into embodied performance. (Same as: THTR 1151)

Previous terms offered: Fall 2020.

CINE 1152 (c, IP, VPA) Berlin: Sin City, Divided City, City of the Future
Non-Standard Rotation. Enrollment limit: 50.

An examination of literary, artistic, and cinematic representations of the city of Berlin during three distinct time periods: the "Roaring 20s," the Cold War, and the post-Wall period. Explores the dramatic cultural, political, and physical transformations that Berlin underwent during the twentieth century and thereby illustrates the central role that Berlin played, and continues to play, in European history and culture, as well as in the American cultural imagination. For each time period studied, compares Anglo-American representations of Berlin with those produced by German artists and writers, and investigates how, why, and to what extent Berlin has retained its status as one of the most quintessentially modern cities in the world. No knowledge of German is required. Note: Fulfills the non-US cinema requirement for cinema studies minors. (Same as: GER 1152)

Previous terms offered: Fall 2020, Spring 2019.

CINE 1161 (c, VPA) Introduction to Film Music
Every Other Year. Enrollment limit: 50.

From silent films (which were always accompanied with music and were therefore never really "Silent") to today's computer enhanced blockbusters, music has always been an integral part of cinema, allowing for suspension of disbelief, establishing mood and emotion, and cogenerating narrative. Through lectures and film viewings, discussion sections, small group projects, and readings (hyperlinked to movie clips), students in this course will gain the ability to critically analyze the musical language of cinema and understand how its related aesthetics, technology, and economics have changed over the last 100 years. Films studied will include works scored by Desplat, Herrmann, Junkie XL, Korngold, Ligeti, Public Enemy, Raskin, Simon, Tamar-Kali, Vangelis, and Williams. (Same as: MUS 1261)

Previous terms offered: Fall 2021, Fall 2020, Spring 2019.

CINE 2075 (c, IP, VPA) Ecocinema: China's Ecological and Environmental Crisis
Every Other Spring. Enrollment limit: 35.

Examines how China's economic development has caused massive destruction to the natural world and how environmental degradation affects the lives of ordinary people. An ecological and environmental catastrophe unfolds through the camera lens in feature films and documentaries. Central topics include the interactions between urbanization and migration, humans and animals, eco-aesthetics and manufactured landscapes, local communities and globalization. Considers how cinema, as mass media and visual medium, provides ecocritical perspectives that influence ways of seeing the built environment. The connections between cinema and environmental studies enable students to explore across disciplinary as well as national boundaries. Note: Fulfills the non-US cinema requirement and the film theory requirement for cinema studies minors. (Same as: ASNS 2075, ENVS 2475)

Previous terms offered: Fall 2021, Fall 2019.

CINE 2078 (c, IP, VPA) Hollywood Imagination of Asia
Every Other Year. Enrollment limit: 35.

How has Hollywood treated Asia and Asians? To what extent have Hollywood film productions engaged in either erotic fascination or racial prejudice, when presenting Asia as a cinematic setting and Asians as a cultural other? Examining Hollywood's imaginative visions of the east, the course takes students on an exploratory journey from classic Hollywood films to contemporary blockbusters. Issues may include race and stardom in "Shanghai Express", yellowface in "Good Earth", the exotic Asian female in "The World of Suzie Wong", stereotypes of Tibetans in "Seven Years in Tibet", and an American's perception of Tokyo in "Lost in Translation". We will also explore the Orientalist imagination through sexualized Geisha or masculinized Mulan as well as transnational crossings in the animated film "Kungfu Panda". In addition to analyzing themes and the social-cultural implications of films, the course also introduces students to the cinematic language: mise-en-scene, cinematography, and editing. Counts toward the major in Asian studies and the minor in cinema studies. (Same as: ASNS 2900)

Previous terms offered: Spring 2022, Spring 2020.

CINE 2080 (c, IP, VPA) Going Viral: The Cinema of Pandemics
Shu-chin Tsui.
Every Other Spring. Spring 2023. Enrollment limit: 35.

The onset of COVID-19 has led to anxiety and fear in our daily lives. The spread of this infectious disease and its destructive power prompts us to look to the film screen for ways we might comprehend the urgent subject confronting us. In considering how cinema has treated pandemics, the course will exam a number of thematic categories through cinematic articulations. The topics include but are not limited to: pandemics in history, the politics of pandemics, the fantasy or horror of pandemics, pandemics in Asia, and pandemics and animals. A carefully chosen roster of films include: The Seventh Seal, Outbreak and Contagion, The Flu that Killed 50 Million, Casandra Crossing, the South Korean productions of Flu and The Train to Busan, as well as 28 Days Later and Twelve Monkeys. The course meets the requirement for a major or minor in Asian studies, as well as the minor in cinema studies. (Same as: ASNS 2078)

Previous terms offered: Spring 2021.

CINE 2116 (c) Spanish Cinema: Taboo and Tradition
Non-Standard Rotation. Enrollment limit: 16.

Introduces students to film produced in Spain, from the silent era to the present, focusing on the ways in which cinema can be a vehicle for promoting social and cultural values, as well as for exposing religious, sexual, or historical taboos in the form of counterculture, protest, or as a means for society to process change or cope with issues from the past. Looks at the role of film genre, authorship, and narrative in creating languages for perpetuating or contesting tradition, and how these apply to the specific Spanish context. Taught in English. Note: Fulfills the non-US cinema requirement for cinema studies minors. (Same as: HISP 2116)

Previous terms offered: Spring 2019.

CINE 2141 (c, DPI, VPA) Gender and Sexuality in Teen Cinema

Angel Matos.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

How does the figure of the teen mobilize different ideologies of gender, sexuality, and queerness in various genres of film? How do contemporary sociocultural circumstances affect the creation, reception, and interpretation of teen films produced throughout the decades? In this course, students will examine how different films frame, approach, and at times misrepresent adolescent experience. Students will explore how understandings of adolescence, gender, and sexuality have shifted over the decades, how teen sexuality is visually aestheticized, and how representations of gender and teen sexuality are inflected by other domains of identity such as race and class. In addition to learning how to "close read" these films, taking notions such as editing, sound, form, and style into consideration, students will explore and apply queer and feminist frameworks to unlock innovative and politically viable ways of critiquing these so-called vapid and uncritical cultural productions. Attendance at weekly evening screenings is mandatory. (Same as: GSWS 2320)

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Fall 2020.

CINE 2201 (c, VPA) History of Film 1895 to 1935

Every Other Fall. Enrollment limit: 35.

Examines the development of film from its origins to the American studio era. Includes early work by the Lumière, Méliès, and Porter, and continues with Griffith, Murnau, Eisenstein, Chaplin, Keaton, Stroheim, Pudovkin, Lang, Renoir, and von Sternberg. Special attention is paid to the practical and theoretical concerns over the coming of sound. Attendance at weekly evening screenings is required.

Previous terms offered: Spring 2022, Fall 2020, Fall 2018.

CINE 2202 (c, VPA) Film History 1935 to 1975

Every Other Spring. Enrollment limit: 35.

A consideration of the diverse production contexts and political circumstances influencing cinema history in the sound era. National film movements to be studied include Neorealism, the French New Wave, and the New German Cinema, as well as the coming of age of Asian and Australian film. Also explores the shift away from studio production in the United States, the major regulatory systems, and the changes in popular film genres. Attendance at weekly evening screenings is required.

Previous terms offered: Spring 2021, Spring 2019.

CINE 2203 (c, VPA) Film History 1975-Present

Allison Cooper.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Focuses on developments in filmmaking over the last fifty years, including international trends in the uses of film as a storytelling medium and in the global film market. Examines the rise of New Hollywood and the Movie Brats in the 1970s amid the decline of the big studios, as well as the emergence of alternatives to classical Hollywood filmmaking in Europe, Russia, Africa, and Asia and the Pacific Rim. Considers the responses of twenty-first-century filmmakers to the terrorism, financial disaster, immigration crises, and uncertain political leadership of recent decades. Examines modern technologies that have affected how films are made and consumed, from videocassettes in the 1980s to contemporary streaming services. Explores intense disruptions of the COVID-19 pandemic for filmmaking and across national cinemas. Attendance at weekly evening film screenings required. Fulfills the film history requirement for Cinema Studies minors.

Prerequisites: CINE 1000 - 2969 or CINE 3000 or higher.

CINE 2222 (c, VPA) Images of America in Film

Non-Standard Rotation. Enrollment limit: 35.

Explores American culture and history by looking at studio- and independently-produced films. Topics include sex and race relations, ethnicity and the American Dream, work and money and their role in self-definition, war and nostalgia, and celebrity and the role of Hollywood in the national imagination. Attendance at weekly evening screenings is required.

Previous terms offered: Spring 2020.

CINE 2224 (c, VPA) The Films of Alfred Hitchcock

Non-Standard Rotation. Enrollment limit: 35.

Considers the films of Alfred Hitchcock from his career in British silent cinema to the Hollywood productions of the 1970s. Examines his working methods and style of visual composition, as well as consistent themes and characterizations. Of particular interest is his adaptation of Daphne du Maurier's "Rebecca" as a way of exploring the tensions between literary sources and film, and between British and American production contexts. Ends with a brief look at Hitchcock's television career and his influence on recent film. Attendance at weekly evening screenings is required.

Prerequisites: CINE 1101 or CINE 2201 or CINE 2202.

Previous terms offered: Fall 2021.

CINE 2252 (c, IP, VPA) British Film

Non-Standard Rotation. Enrollment limit: 35.

Surveys the first hundred years of British cinema from the silent period to contemporary films. Topics covered: invention of cinema and patterns of movie-going in the United Kingdom; work of important directors and producers (Alfred Hitchcock, Carol Reed, Alexander Korda); changes brought by World War II; the Angry Young Men of the 50s and 60s; and recent developments (heritage films, postcolonial perspectives, Scottish film). Attendance at weekly evening screenings is required. Note: Fulfills the non-US cinema requirement for Cinema Studies minors. Fulfills the non-US cinema requirement for Cinema Studies minors.

Previous terms offered: Spring 2021.

CINE 2261 (c) Gender, Film, and Consumer Culture

Non-Standard Rotation. Enrollment limit: 35.

How do we spend money, and why? Examines the relationship between gender and consumer culture over the course of the twentieth century. Explores women's and men's relationships to consumer culture in a variety of contexts: the heterosexual household, the bachelor pad, the gay-friendly urban cafeteria, the advertising agency, and the department store. Also explores the ways in which Hollywood films, from the 1930s to the present, have both furthered and complicated gendered notions about the consumption of goods. (Same as: GSWS 2261)

Previous terms offered: Spring 2020.

CINE 2263 (c, DPI, VPA) Documentary and Nonfiction Storytelling: Theories and Forms

Tanya Goldman.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines a diverse range of nonfiction media from past to present. Films will be read as both discrete works of cinema and as socio-political objects. In addition to surveying milestones from the global documentary tradition and emergent digital practices, this course also explores works that use nonfiction footage in ways distinct from popular modes of documentary, such as city symphonies and found footage films, as well as more prosaic nonfiction modes such as newsreels, propaganda, and science films. The course pursues several related modes of inquiry: What aesthetic techniques have filmmakers employed to represent reality? How have filmmakers and scholars theorized documentary practice and ethics? And how has nonfiction filmmaking been conceived of as ideologically "useful"? This is accomplished through close readings of film and written texts, in-class discussion, written responses, and longer analytical papers. Fulfills the film theory requirement for cinema studies minors. Attendance at weekly evening screenings is required.

CINE 2270 (c) The Woman's Film

Every Other Year. Enrollment limit: 35.

Concentrating in large part on the classical Hollywood period, we will explore films that center on women's experiences and that are (or seem to be) intended for a female audience. We will examine the genres of melodrama, film noir, gothic, and comedy in relation to the performance of female identity; representations of gender, class, race, and sexuality; and theories of spectatorial identification. The last part of the class will consider ways in which contemporary women's films draw on and reconfigure the themes brought up by earlier narratives. Directors might include Arzner, Cukor, Haynes, Hitchcock, Mankiewicz, Varda, and Vidor. (Same as: GSWS 2273)

Previous terms offered: Spring 2021, Spring 2019.

CINE 2271 (c) The Blockbuster: The Art, Commerce, and Politics of Popular Filmmaking

Tanya Goldman.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Hollywood has become synonymous with the blockbuster, a category defined by big expectations — big budgets, big special effects, big stars, big marketing campaigns, and big controversies. This course examines this ubiquitous mode of film production by approaching it as a formal style, industrial strategy, mode of production, and cultural phenomenon. The course explores cinema's history as spectacle and topics including narrative conventions, special effects, franchises, transmedia storytelling, and fandom. Films will be read alongside media paratexts (such as trailers and merchandising) that position these products in the marketplace. The course also addresses how blockbusters have become visible sites for efforts to reform Hollywood culture in response to demands for racial, gender, and pay equity. In this multivalent approach, this course explores the conditions that inform the past, present, and potential futures of American commercial filmmaking on a global scale.

CINE 2272 (c, DPI, VPA) American Feminist Film History

Tanya Goldman.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course explores U.S. film history by surveying the contributions of women directors, actresses, and behind-the-scenes workers from the silent era to the 1990s. The course investigates a range of questions: What types of work have women performed? How have political, cultural, and industrial factors shaped opportunities available to women? How have women produced and experienced racial, ethnic, gender, and sexual identities on screen and in the workplace? How has difference affected opportunities available to women and the stories that get to be told? Are there distinctive stylistic or narrative preoccupations that characterize made by women? What does it mean to practice feminist filmmaking, criticism, and history? How might highlighting the experiences of women in the film world empower us to rewrite dominant film histories? To address these questions, the course surveys a range of feature films, documentaries, and experimental works created by both the renowned and the unsung.

CINE 2416 (c) Race and Memory in Southern Literature and Film

Non-Standard Rotation. Enrollment limit: 16.

"The past is never dead. It's not even past." William Faulkner Intermediate Seminar. The American South is haunted by its history. Decades of Indian removal and nearly 250 years of enslavement of Africans and African-Americans resulted in hierarchies of race, which are woven into the poetry, music, literature and film of the South. This course explores literature and film of and about the American South (1920-2021) with a focus on the tangled intersections of race and memory. Literary works may include William Faulkner, Kiese Laymon, Eudora Welty, Alice Walker, Flannery O'Connor, Jesmyn Ward, Natasha Trethewey, Jean Toomer, and Leanne Howe. Films may include *Birth of a Nation* (Parker), *Get Out* (Peele), *In the Heat of the Night* (Jewison), *Moonlight* (Jenkins), *Big Fish* (Burton), *Beasts of the Southern Wild* (Zeitlin), *Mississippi Burning* (Parker), and *Selma* (DuVernay). Intermediate Seminar. (IRBW) Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2016)

Previous terms offered: Spring 2022.

CINE 2426 (c) The Horror Film in Context

Non-Standard Rotation. Enrollment limit: 35.

Examines the genre of the horror film in a range of cultural, theoretical, and literary contexts. Considers the ways in which horror films represent violence, fear, and paranoia; their creation of identity categories; their intersection with contemporary politics; and their participation in such major literary and cinematic genres as the gothic, comedy, and family drama. Texts may include works by Craven, Cronenberg, De Palma, Freud, Hitchcock, Kristeva, Kubrick, Poe, Romero, and Shelley. Note: Fulfills the film theory requirement for Cinema Studies minors. (Same as: ENGL 2426, GSWS 2426)

Previous terms offered: Fall 2021, Fall 2019.

CINE 2428 (c, VPA) Introduction to Film Theory

Non-Standard Rotation. Enrollment limit: 35.

A survey of some of the major currents in film theory from the early days of motion pictures to the present, including formalism, genre theory, auteur theory, psychoanalytic theory, feminist theory, and queer theory. Includes mandatory evening film screenings; a choice of two screening times available for each film. Note: Fulfills the film theory requirement for cinema studies minors.. (Same as: ENGL 2428)

Previous terms offered: Spring 2022, Spring 2020.

CINE 2502 (c, VPA) Film Scoring

Vineet Shende.

Every Other Year. Fall 2022. Enrollment limit: 35.

The celebrated German film director Fatih Akin has stated, "Film is a two dimensional thing—it goes up and down and left to right but if you put music into that two dimensional medium, it acquires a third, fourth, and fifth dimension." This course will explore the myriad ways that music creates deeper meaning in film. This will be accomplished through both analysis of preexisting films scores and composing original music for five common filmic categories: establishing sequences, montage sequences, dialogue underscoring, and action and love scenes. Students will need to be able to read music notation. (Same as: MUS 2502)

Prerequisites: MUS 1401 or MUS 2403 or CINE 1000 - 2969 or CINE 3000 or higher.

CINE 2553 (c, VPA) Italy's Cinema of Social Engagement

Allison Cooper.

Every Other Spring. Spring 2023. Enrollment limit: 35.

An introduction to Italian cinema with an emphasis on Neorealism and its relationship to other genres, including Comedy Italian Style, the Spaghetti Western, the horror film, the "mondo" (shock documentary), and mafia movies, among others. Readings and discussions situate films within their social and historical contexts, and explore contemporary critical debates about the place of radical politics in Italian cinema (a hallmark of Neorealism), the division between art films and popular cinema, and the relevance of the concept of an Italian national cinema in an increasingly globalized world. No prerequisite required. Taught in English (films screened in Italian with English subtitles). Note: Fulfills the non-US cinema requirement for cinema studies minors. (Same as: ITAL 2553)

Previous terms offered: Fall 2018.

CINE 2602 (c, VPA) Post-Soviet Russian Cinema

Non-Standard Rotation. Enrollment limit: 35.

Newly freed from censorship, Russian filmmakers in the quarter-century between 1990 and 2015 created compelling portraits of a society in transition. Their films reassess traumatic periods in Soviet history; grapple with formerly taboo social problems such as alcoholism, anti-Semitism, and sexual violence; explore the breakdown of the Soviet system; and critique the darker aspects of today's Russia, often through the lens of gender or sexuality—specifically addressing subjects such as machismo, absent fathers, rape, cross-dressing, and birthing. Central are the rapid evolution of post-Soviet Russian society, the emergence of new types of social differences and disparities and the reinvention of old ones, and the changing nature of social roles within the post-Soviet social fabric. Taught in English. (Same as: RUS 2410, GSWS 2410)

Previous terms offered: Spring 2019.

CINE 2603 (c, IP, VPA) Memory in Contemporary Russian and East European Cinema

Reed Johnson.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the subject of collective memory and reconstructions of the past in post-socialist Eastern European cinema, focusing primarily on Russian-language films. How does this area of the world, with its fraught histories of wars, revolutions and other social upheavals, describe or inscribe the past in recent films, from the historical blockbuster to more intimate contemporary narratives haunted by past events? And how do these films about the darkest episodes of the region's history shed light on the ways in which we either commemorate or repress historical traumas in our own culture(s) today? Scholarship on nostalgia, cultural taboos, repressed memory, reconciliation, and collective memory will help us to form a complex understanding of how filmmakers not only represent the past in their work, but also recreate it anew on the screen in order to fit the needs of the current moment. (Same as: RUS 2413)

CINE 2645 (VPA) Filmmaking and Born-Digital Storytelling

Non-Standard Rotation. Enrollment limit: 18.

Considers filmmaking in a networked world, as well as the cultural implications of new technologies. Students will create innovative, internet-based films that engage in the changing digital landscape of ubiquitous computing. Students will learn the basics of film production, including digital camera operation, sound recording, lighting, nonlinear editing, basic compositing, and green screen—tools needed to create compelling films, interactive videos, VR and AR experiences, and innovative transmedia projects. Additionally, students will study the history and proliferation of cinema engaged with digital technologies and the internet. (Same as: DCS 2645)

Prerequisites: DCS 1000 - 2969 or DCS 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Spring 2021, Fall 2019.

CINE 2831 (b, IP) Ethnographic Film

Non-Standard Rotation. Enrollment limit: 35.

Considers the development of ethnographic film from an anthropological lens and international perspectives. Starting with the advent of the documentary and concluding with ethnographic new media, investigates how, why, and to what end film has been used as a tool by anthropologists and the communities that they work with to expand discussions about the modern world. Topics include filmmaking as a methodology for social scientists, the connections between ethnographic film and self-determination efforts in minority communities, critical examinations of media-making practices—onscreen and off—and the global impact these factors have had. (Same as: ANTH 2340)

Prerequisites: ANTH 1101 or SOC 1101 or CINE 1101.

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

CINE 2832 (b, IP) Global Indigenous Cinema

Willi Lempert.

Every Other Year. Spring 2023. Enrollment limit: 35.

Surveys Indigenous-produced film from around the globe, with an emphasis on contemporary Native North American and Aboriginal Australian cinema. Engages recent technological innovations in filmmaking. Analyzes film through discussion and writing, pairing screenings with readings of anthropological and Indigenous scholarship. Considers film in relation to the social, historical, and cultural contexts and broader global processes of indigenous media production and circulation. (Same as: ANTH 2350)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher or SOC 1101.

Previous terms offered: Spring 2021, Spring 2019.

CINE 2860 (c) Character, Plot, Scene, Theme, Dream: The Fundamentals of Screenwriting

Anthony Walton.

Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

Introduction to the basic practices of writing for the screen, including concepts, techniques, and predictable problems. Students study and analyze films and scripts from the perspective of the screenwriter and complete a writing project of their own. Note: Fulfills the creative writing concentration requirement for English majors. (Same as: ENGL 2860)

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

CINE 2900 (c, IP, VPA) Terrorists and Spies, Borders and Bridges: Highlights of German Cinema since 1980

Non-Standard Rotation. Enrollment limit: 35.

Examines the particular ways in which, in the aftermath of New German Cinema (NGC), the cinematic medium constructs protagonists of mass appeal (terrorists, spies, slackers, etc.) while moving beyond the limits and possibilities of a national cinematic tradition and toward a European (and global) cinematic language. Pays special attention to historical advancement, over the past four decades, of material conditions of film production, distribution, and reception as well as to the development of cinematic genres, techniques, and effects that cinema has on other art forms. Filmmakers/films may include von Trotta ("Marianne and Juliane"), Petersen ("Das Boot," "The Neverending Story"), von Donnersmarck ("Lives of Others"), Wolf ("Solo Sunny"), Schlöndorff ("The Legend of Rita"), Misselwitz ("Winter adé"), Edel ("Baader-Meinhof Complex"), Hirschbiegel ("Downfall"), Ade ("Forest for the Trees," "Toni Erdmann"), Link ("Nowhere in Africa"), Petzold ("Yella," "Barbara"), Tykwer ("Run Lola Run," "Three"), Schmid ("Distant Lights"), Dresen ("Stopped on Track"), Dörrie ("Men," "Nobody Loves Me"), Ruzowitsky ("Counterfeiters"), Maccarone ("Veiled"), Akin ("Edge of Heaven," "The Cut"), Gerster ("A Coffee in Berlin"), Schipper ("Victoria"). Fulfills international requirement for cinema studies. Taught in English. (Same as: GER 2252)

Previous terms offered: Spring 2021.

CINE 2901 (c, IP, VPA) The Ethics of the Image

Birgit Tautz.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the representation of a range of ethical questions in film as well as the ethics of film, including the formal and stylistic, historical, and political decisions made in constructing cinematic images. Arranged in the form of case studies, compares and contrasts examples of international film with a focus on theoretical questions and approaches. May consider the ways in which films represent traumatic events in history (e.g., the Holocaust), environmental disasters, and sexual and gender identity, to name a few. Addresses questions of cinematic genre as well as spectatorship (e.g., identification and repulsion, taste, appropriateness, humor, shock, activism as response). Note: Fulfills the film theory and the non-US cinema requirements for cinema studies minors. (Same as: GER 2253)

Prerequisites: GER 1000 or higher or CINE 1000 or higher or ENGL 1000 or higher or HIST 1000 or higher or VART 1000 or higher.

Previous terms offered: Spring 2020.

CINE 3011 (c) African American Film

Elizabeth Muther.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Advanced Seminar. Explores a spectrum of films produced since 1950 that engage African American cultural experience. Topics may include black-white buddy movies, the L.A. Rebellion, blaxploitation, the hood genre, cult classics, comedy and cross-dressing, and romance dramas. Of special interest will be the documentary impulse in contemporary African American film; gender, sexuality, and cultural images; the politics of interpretation—writers, filmmakers, critics, and audiences; and the urban context and the economics of alienation. Extensive readings in film and cultural theory and criticism. Note: Fulfills the film theory requirement for Cinema Studies minors. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 3011, AFRS 3011)

Prerequisites: ENGL 1000 or higher or AFRS 1000 or higher or FILM 1000 or higher or CINE 1000 or higher.

Previous terms offered: Spring 2020.

CINE 3037 (c) The Female Gothic in Literature and Film

Non-Standard Rotation. Enrollment limit: 16.

In her memoir, *In the Dream House*, author Carmen Maria Machado defines the female gothic as consisting of "woman plus habitation." In this class, we will examine literary and cinematic texts that represent the endangerments faced by women in architectural and social spaces. We will explore the affects of fear and paranoia and their relationship to domesticity, as well as the ways in which more recent modes of the gothic have shifted their concerns to intersectional identities. Authors and directors may include Ari Aster, Alfred Hitchcock, Shirley Jackson, Henry James, Carmen Maria Machado, Toni Morrison, Jordan Peele, and Silvia Moreno-Garcia. Fulfills the advanced seminar requirement for English majors and Cinema Studies minors and the theory requirement for Cinema Studies minors. (Same as: ENGL 3037, GSWS 3037)

Prerequisites: ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Spring 2022.

CINE 3053 (c, IP, VPA) China's Cultural Revolution through Film

Shu-chin Tsui.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines China's Great Proletarian Cultural Revolution (1966-1976) through the lens of cinema. Viewed as one of the most destructive mass movements in China's modern history, the CR dramatically shaped national politics and deeply affected the life of ordinary people. With film productions made during and after the CR as primary materials, the course seeks to explain the nature of the Cultural Revolution as well as how motion pictures (re)construct CR rhetoric and why the CR remains a source of trauma that haunts the memories of those who experienced it. Popular film titles such as "The White Haired Girl", "To Live", "Farewell My Concubine", and others will lead students on a journey through history via the cinemas of socialist model operas, post-socialist retrospections, and alternative re-constructions. The course aims to be intellectually thought-provoking and cinematically engaging. Note: The course fulfills the major in Asian studies and minor in Chinese. It also fulfills the non-US cinema requirement for cinema studies minors (Same as: ASNS 3080)

Prerequisites: ASNS 1000 - 2969 or ASNS 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Fall 2020.

CINE 3077 (c, IP, VPA) Divas, Stardom, and Celebrity in Modern Italy

Non-Standard Rotation. Enrollment limit: 16.

Examines Italy's role in the evolution of the modern-day diva, star, and celebrity: from the transformation of religious icons such as the Madonna and the Magdalene into the divas, vamps, and femme fatales of early cinema to the development of silent cinema's strongman into a model for charismatic politicians like Fascist leader Benito Mussolini and media-mogul-turned-prime-minister Silvio Berlusconi. Pays special attention to tensions between Italy's association with cinematic realism and its growing celebrity culture in the second half of the twentieth century through today. Texts may include *Cabiria*, *La Dolce Vita*, *A Fistful of Dollars*, *A Special Day*, and *The Young Pope*, along with readings on key topics in star studies, such as silent stardom; stardom and genre; transnational stardom; and race, sex, and stardom. Students make use of bibliographic and archival sources to conduct independent research culminating in term papers and audiovisual essays. Note: fulfills the non-US cinema and theory requirements for Cinema Studies minors. Taught in English. (Same as: ITAL 3077)

Previous terms offered: Spring 2020.

CINE 3310 (c) Gay and Lesbian Cinema

Non-Standard Rotation. Enrollment limit: 16.

Considers both mainstream and independent films made by or about gay men and lesbians. Four intensive special topics each semester, which may include classic Hollywood stereotypes and euphemisms; the power of the box office; coming of age and coming out; the social problem film; key figures; writing history through film; queer theory and queer aesthetics; revelation and revaluations of film over time; autobiography and documentary; the AIDS imperative. Writing intensive; attendance at evening film screenings is required. Note: Fulfills the film theory requirement for cinema studies minors. (Same as: GSWS 3310)

Prerequisites: CINE 1000 or higher.

Previous terms offered: Fall 2019.

CINE 3321 (c) German Expressionism and Its Legacy

Non-Standard Rotation. Enrollment limit: 16.

Considers the flowering of German cinema during the Weimar Republic and its enormous impact on American film. Examines work produced in Germany from 1919 to 1933, the films made by German expatriates in Hollywood after Hitler's rise to power, and the wide influence of the expressionist tradition in the following decades. Attendance at weekly evening screenings is required.. Note: Fulfills the non-US cinema requirement for cinema studies minors.

Prerequisites: CINE 1000 or higher.

Previous terms offered: Fall 2020.

CINE 3322 (c) Film and Biography

Non-Standard Rotation. Enrollment limit: 16.

Explores how filmmakers have constructed public history through films professing to tell the life stories of important individuals. Examines the biopic as a significant and long-lived genre, looks at issues of generic change and stability, and considers the narrative process in relation to historic events and individuals. Attendance at weekly evening screenings is required.

Previous terms offered: Spring 2020.

CINE 3323 (c, VPA) Film Language

Non-Standard Rotation. Enrollment limit: 16.

Explores film as a language with its own set of governing rules or codes distinct from those used for storytelling in other mediums. Analyzes key films that have expanded cinema's communicative power together with theoretical writings that interpret that power. Studies the ideologies associated with aspects of film language like montage, parallel editing, and deep focus. Films include works by D.W. Griffith, Akira Kurosawa, Stanley Kubrick, Julie Dash, and Christopher Nolan, among others. Readings include works by Soviet avant-garde theorist and filmmaker Sergei Eisenstein, French film theorists André Bazin and Christian Metz, and American art historian and theorist Kaja Silverman, among others. Weekly assignments include film screenings, readings, and oral and written film analyses. Students will complete independent, semester-long research projects culminating in term papers or audiovisual essays. Note: fulfills the 3000-level and theory requirement.

Prerequisites: CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Fall 2020.

CINE 3333 (c) The Films of John Ford

Non-Standard Rotation. Enrollment limit: 16.

Examines the films of John Ford, from the silent period to the 1960s. Considers his working methods and visual composition, as well as consistent themes and characterizations. Investigates Ford's reputation in light of shifting American cultural values. Attendance at weekly evening screenings is required.

Prerequisites: CINE 1101 or CINE 2201 or CINE 2202.

Previous terms offered: Spring 2022, Spring 2019.

CINE 3352 (c) North African Cinema: From Independence to the Arab Spring

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Provides insight into contemporary film production from the Maghreb (Algeria, Tunisia, and Morocco). Explores questions of gender and sexuality, national identity, political conflict, and post- and neo-colonial relationships in the context of globalization and in conditions of political repression and rigid moral conservatism. Examines how filmmakers such as Lakhdar Hamina, Férid Boughedir, Moufida Tlatli, Nedir Moknèche, Malek Bensmaïl, Lyès Salem, Hicham Ayoub, and Leyla Bouzid work in a challenging socio-economic context of film production in consideration of setbacks and obstacles specific to the developing world. Taught in French. (Same as: FRS 3216, MENA 3216)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2020.

CINE 3395 (c, IP) Global Germany?

Non-Standard Rotation. Enrollment limit: 15.

The fall of the Berlin Wall and the concomitant end of the Cold War ushered in what many cultural critics call the era of globalization. An exploration of how contemporary German culture (1990-present) grapples with both the possibilities and uncertainties presented by globalization. Examines a myriad of cultural texts – films, audio plays, dramas, short fiction, novels, photographs, websites – as well as mass events (i.e., the Love Parade, the 2006 World Cup) within their political, social, and economic contexts to show how Germany's troubled past continues to affect the role it plays on the global stage and how its changing demographics – increased urbanization and ethnic diversity – have altered its cultural and literary landscape. Critically considers issues such as migration, terrorism and genocide, sex tourism, the formation of the European Union, and the supposed decline of the nation-state. Frequent short writings, participation in debates, and a final research project based upon a relevant topic of individual interest are required. All materials and course work in German. (Same as: GER 3397)

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2021.

Classics

Overview & Learning Goals

Overview

The Department of Classics offers a classics major with three different concentrations: one with a focus on Greek and Roman culture and history (classical studies), one with a focus on Greek and Roman material culture (classical archaeology), and one with a focus on Greek and Latin literature (classical languages and literature). Students pursuing these majors are encouraged to study not only the languages and literatures but also the physical monuments of Greece and Rome. This approach is reflected in the requirements for the three concentrations: courses in classical archaeology, history, culture, and Greek and/or Latin must be fulfilled in each concentration.

The classics program welcomes students who have not studied classical languages, as well as those who have had some prior training in Latin and/or Greek. The objective of Greek and Latin courses is to study the ancient languages and literatures in the original. By their very nature, these courses involve students in the politics, history, and philosophies of antiquity. Advanced language courses focus on the analysis of textual material and on literary criticism.

Learning Goals

Students will:

1. Explore the foundations of ancient Greek and Roman societies through the study and analysis of language, traditions, and material culture in their historical context.
2. Read texts closely and deliberately.
3. Read artifacts, monuments, and spaces closely and deliberately.
4. Write clearly and persuasively about the archaeological, historical, and literary dimensions of Greece, Rome, and the ancient Mediterranean.
5. Connect Greek and Roman histories and cultures to those of other ancient and modern societies.
6. Engage directly with texts written in Greek and Latin and artifacts produced in the ancient Greek and Roman world.
7. Present or perform thoughtfully and confidently to a diverse audience material pertaining to Greek, Roman, or ancient Mediterranean culture.
8. Complete a research project incorporating both primary and secondary sources.

Options for Majoring or Minor in the Department

Students may elect to major in classics, the art history and archaeology interdisciplinary major, or to coordinate the major in classics with digital and computational studies, education, or environmental studies. Students pursuing a coordinate or interdisciplinary major may not normally elect a second major. Non-majors may elect to minor in archaeology, classics, classical studies, Greek, or Latin. Art history and archaeology interdisciplinary majors may declare a classics, classical studies, Greek, or Latin minor, but not an archaeology minor.

Requirements Classics Major

The classics major consists of ten courses with concentrations in three possible areas: classical studies, classical archaeology, and classical languages and literatures.

Classical Studies Concentration

Code	Title	Credits
Select at least one archaeology (ARCH) course at the 1000 level or above		1
Select at least four classics (CLAS) courses, at least three of which must be at the 2000 level or above ^a		4
Select at least two additional courses from any departmental designation (ARCH, CLAS, GRK, or LATN) at the 3000 level or above		2
Select at least either three Greek (GRK) or three Latin (LATN) courses		3

- ^a Students may count as one of their required classics (CLAS) courses any one appropriate course taught in another department, e.g., anthropology, art history, government, philosophy, religion, with the consultation and approval of classics faculty.

Classical Archaeology Concentration

Code	Title	Credits
Select at least five archaeology (ARCH) courses, at least two of which must be at the 2000 level or above, and at least one of which must be at the 3000 level or above		5
Select at least either three Greek (GRK) or three Latin (LATN) courses		3
Select two additional elective courses from any departmental designation (ARCH, CLAS, GRK, or LATN) at any level, including first-year writing seminars ^b		2

- ^b Students may count as one of their elective courses any one appropriate course taught in another department, e.g., anthropology, art history, government, philosophy, religion, with the consultation and approval of classics faculty.

Classical Languages and Literatures Concentration

Code	Title	Credits
Select at least six Greek (GRK) and/or Latin (LATN) courses, including two at the 3000 level or above		6
Select at least one archaeology (ARCH) course at the 1000 level or above		1
Select at least one classics (CLAS) course at the 1000 level or above		1
Select at least two classics (CLAS) courses at the 2000 level or above ^c		2

- ^c Students may count as one of their required classics (CLAS) 2000-level courses any one appropriate course taught in another department, e.g., anthropology, art history, government, philosophy, religion, with the consultation and approval of classics faculty.

Classics Minor Greek

Code	Title	Credits
Select five courses in the department, including at least four in the Greek language.		5

Latin

Code	Title	Credits
Select five courses in the department, including at least four in the Latin language.		5

Classics

Code	Title	Credits
Select at least five courses in the department, including at least four in both Greek and Latin languages; of these four one should be either GRK 2204 or above, or LATN 3000 or above		5

Archaeology

Code	Title	Credits
Select at least six courses in the department; at least one archaeology (ARCH) 1000-level course, two ARCH 2000-level courses, one ARCH 3000-level course, and two other departmental courses (ARCH, CLAS, GRK, or LATN) at any level ^d		6

- ^d Students may count as one of their classics (CLAS) or archaeology (ARCH) 2000-level courses any one appropriate course taught in another department, e.g., anthropology, art history, government, philosophy, religion, with the consultation and approval of classics faculty.

Classical Studies

Code	Title	Credits
Select at least six courses in the department; at least one archaeology (ARCH) course at the 1000-level or above, one classics (CLAS) course at the 1000-level or above, three CLAS courses at the 2000-level or above, and one CLAS or ARCH course at the 3000-level or above ^d		6

- ^d Students may count as one of their classics (CLAS) or archaeology (ARCH) 2000-level courses any one appropriate course taught in another department, e.g., anthropology, art history, government, philosophy, religion, with consultation and approval of classics faculty.

Interdisciplinary Major

The department participates in an interdisciplinary program in archaeology and art history. See the Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>).

Additional Information

Additional Information and Department Policies

- As a capstone to this major, at least one 3000-level course taken in the senior year is required.
- Courses that count toward the programs offered by the department must be taken for regular letter grades (not Credit/D/Fail), and students must earn grades of C- or better in these courses.
- One first-year writing seminar may count as an elective toward the major and minor.
- Normally, independent studies and honors projects only count toward the major or minor with prior approval of the department.

- Majors may double-count two courses with another department or program and minors may double-count one course with another department or program.

Classics and Archaeology at Bowdoin and Abroad

Archaeology classes regularly use the outstanding collection of ancient art in the Bowdoin College Museum of Art (<https://www.bowdoin.edu/art-museum/>). Of special note are the exceptionally fine holdings in Greek painted pottery and the very full and continuous survey of Greek and Roman coins. In addition, there are numerous opportunities for study or work abroad.

Bowdoin is a participating member of the Intercollegiate Center for Classical Studies in Rome, where students majoring in classics and classical archaeology can study in the junior year. It is also possible to receive course credit for field experience on excavations. Interested students should consult members of the department for further information. Students can count up to four courses taken abroad toward the major; up to three in one semester, or four from a full year abroad. Students can count up to two courses taken abroad toward the minor; one per semester spent abroad. Students must consult with departmental faculty prior in order to determine course eligibility.

Students contemplating graduate study in classics or classical archaeology are advised to begin the study of at least one modern language in college, as most graduate programs require competence in French and German as well as in Latin and Greek.

Advanced Placement and International Baccalaureate (AP/IB)

Students who received a minimum score of four on the Latin AP exam are eligible to receive a general credit toward the degree if they take a Latin course at the 3000 level and earn a minimum grade of B-. Regardless of AP scores, students should complete the placement questionnaire. No major or minor credit is given. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin. Students who took the Latin IB exam should consult the department for credit.

Information for Incoming Students (p. 134)

Classics is the study of the ancient Greek and Roman worlds within the broader context of the ancient Mediterranean and the ancient Near East. Our discipline combines the study of art history, archaeology, history, literature, philosophy, and the languages of Greek and Latin. Our students use these multiple perspectives in order to better understand and better imagine the diversity of peoples who lived thousands of years before us, to reflect on what this past has meant to later ages, and to learn more about how it continues to shape our own ideas in the present day.

Please note that the department offers many other classes under the archaeology and classics rubrics that are designed for first-year student enrollment, and have spaces set aside especially for first-year students. These classes do not require any knowledge of Latin or Greek, nor do they require any prior study of the Classical World. For fall 2022 these include: ARCH 1012 The Archaeology of Ritual and Myth in the Ancient Mediterranean, ARCH 1101 Greek Archaeology, CLAS 1011 Shame, Honor, and Responsibility, CLAS 1114 Power, Inequality, and Social Conflict in the Ancient Mediterranean, and CLAS 2241 Transformations: Mythical Metamorphoses from Classical Antiquity to the 21st Century.

Students interested in beginning Latin should enroll in LATN 1101 Elementary Latin I which is offered in the fall. Students interested in beginning Greek should enroll in GRK 1101 Elementary Greek I, which is offered in the spring. Because of the sequential nature of language study and the pattern of offerings in the department, students should plan on taking both semesters of Latin over one academic year; students interested in the elementary Greek sequence should plan to take GRK 1101 Elementary Greek I in the spring and GRK 1102 Elementary Greek II the following fall.

Students who have studied Latin or Greek in high school, as well as students interested in beginning Latin or Greek here at Bowdoin, should complete the Latin or Greek placement questionnaire in Blackboard in the summer prior to matriculation. In order to make placement recommendations we take into consideration past study, AP and SAT II scores, and a brief conversation with the student about their interests. Most first-year students who are continuing Latin enroll in either LATN 2203 Intermediate Latin for Reading or LATN 2210 Catullus. Students with exceptionally strong backgrounds, however, may enroll in LATN 3310 Catullus. Most first-year students who are continuing Greek enroll in either GRK 1102 Elementary Greek II or GRK 2204 Homer.

Members of the Classics Department faculty are always happy to talk with students individually in order to discuss placement and sequencing of courses.

Courses

Archaeology

ARCH 1012 (c) The Archaeology of Ritual and Myth in the Ancient Mediterranean

Jim Higginbotham.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines ancient religious traditions and practice through the study of artifacts from the ancient Mediterranean housed in the Bowdoin College Museum of Art. Students actively engage in the analysis of artifacts from Egypt, Assyria, Etruria, Greece, and Italy that represent aspects of ancient religious practice. Student writing assignments draw inspiration from select objects from the collection that include many examples of sculpture, pottery, and coins. Illustrated presentations and assigned reading provide the archaeological contexts for the artifacts under study, as well as explore the cultural narratives recounted in history and myth. Sites such as Giza, Kalhu, Delphi, Olympia, Athens, Pompeii, and Rome are explored as the settings for the rituals and myths that helped define the cultures of the ancient Mediterranean world.

Previous terms offered: Fall 2018.

ARCH 1014 (c, FYS) Living and Dying in Ancient Rome

Non-Standard Rotation. Enrollment limit: 16.

The Roman house and tomb were a constant focus of public life. Consequently, what the Romans considered private appears to be public from our modern perspectives. Explores the construction of social identity in the Roman world by examining ancient concepts of both private and public by analyzing houses and tombs as evidence for personal and familial tastes, social practices, and social expectations. This course studies both literary and archaeological evidence in order to consider how Roman domestic and funerary art was meant to create an appropriate setting for the construction of social identity, as well as for the performance of religious rituals. Explores the material context of the Roman house by examining its layout, architectural features, and decoration, and also explores funerary monuments and the public display of works of art in private contexts. Material focuses on the ancient and well-preserved cities of Pompeii and Herculaneum.

Previous terms offered: Fall 2019.

ARCH 1101 (c, VPA) Greek Archaeology

Jim Higginbotham.

Every Other Fall. Fall 2022. Enrollment limit: 50.

Introduces the techniques and methods of classical archaeology as revealed through an examination of Greek material culture. Emphasis upon the major monuments and artifacts of the Greek world from prehistory to the Hellenistic age. Architecture, sculpture, fresco painting, and other "minor arts" are examined at such sites as Knossos, Mycenae, Athens, Delphi, and Olympia. Considers the nature of this archaeological evidence and the relationship of classical archaeology to other disciplines such as art history, history, and classics. Assigned reading supplements illustrated presentations of the major archaeological finds of the Greek world. (Same as: ARTH 2090)

Previous terms offered: Fall 2019.

ARCH 1102 (c, VPA) Roman Archaeology

Every Other Fall. Enrollment limit: 50.

Surveys the material culture of Roman society, from Italy's prehistory and the origins of the Roman state through its development into a cosmopolitan empire, and concludes with the fundamental reorganization during the late third and early fourth centuries. Lectures explore ancient sites such as Rome, Pompeii, Athens, Ephesus, and others around the Mediterranean. Emphasis upon the major monuments and artifacts of the Roman era: architecture, sculpture, fresco painting, and other minor arts. Considers the nature of this archaeological evidence and the relationship of classical archaeology to other disciplines such as art history, history, and classics. Assigned reading supplements illustrated presentations of the major archaeological finds of the Roman world. (Same as: ARTH 2100)

Previous terms offered: Fall 2020, Fall 2018.

ARCH 1103 (c) Egyptian Archaeology

Non-Standard Rotation. Enrollment limit: 50.

Introduces the techniques and methods of archaeology through an examination of Egyptian material culture. Emphasis is placed upon understanding the major monuments and artifacts of ancient Egypt from the prehistoric cultures of the Nile Valley through the period of Roman control. Architecture, sculpture, fresco painting, and other "minor arts" are examined at sites such as Saqqara, Giza, Thebes, Dendera, Tanis, and Alexandria. Considers the nature of this archaeological evidence, its context, and the relationship of archaeology to other disciplines such as african studies, art history, anthropology, history, and classics. Course themes include the origins and development of complex state systems, funerary symbolism, contacts between Africa and the Mediterranean, and the expression of social, political and religious ideologies in art and architecture. Selected readings supplement illustrated presentations of the major archaeological finds of Egypt. Class meetings include artifact sessions in Bowdoin College Museum of Art. (Same as: AFRS 1105)

Previous terms offered: Fall 2021.

ARCH 1105 (c) The Archaeology of Building: Architecture in the Ancient Mediterranean World

Non-Standard Rotation. Enrollment limit: 50.

Explores the materials, design and construction of ancient buildings and monuments from around the Mediterranean. Explores the connections between form and function using archaeological evidence from select examples of structures drawn from Egyptian, Phoenician, Greek, Etruscan, and Roman traditions. Students trace the origins and evolution of particular architectural styles that are still in use today, including the Greek orders of Doric, Ionic, and Corinthian as well as their antecedents in earlier Egyptian and Near-Eastern traditions. Examines various types of structures including houses, temples, tombs, theaters, aqueducts, and baths while considering architectural planning and design, the manner of construction, and the contexts in which buildings were commissioned, built, and used. Selected readings, including ancient texts in translation, supplement illustrated presentations of the major archaeological finds.

Previous terms offered: Spring 2022.

ARCH 2202 (c, IP) Augustan Rome

Non-Standard Rotation. Enrollment limit: 35.

Upon his ascent to power after a century of war, Rome's first princeps, Augustus, launched a program of cultural reformation and restoration that was to have a profound and enduring effect upon every aspect of life in the empire, from fashions in entertainment, decoration, and art, to religious and political habits and customs. Using the city of Rome as its primary text, this course investigates how the Augustan "renovation" of Rome is manifested first and foremost in the monuments associated with the ruler: the Mausoleum of Augustus, theater of Marcellus, temple of Apollo on the Palatine, Altar of Augustan Peace, and Forum of Augustus as well as many others. Understanding of the material remains themselves is supplemented by historical and literary texts dating to Augustus's reign, as well as by a consideration of contemporary research and controversies in the field. (Same as: CLAS 2202, URBS 2402)

Previous terms offered: Spring 2020.

ARCH 2204 (c, IP) Buried by Vesuvius: The Archaeology of Roman Daily Life

Non-Standard Rotation. Enrollment limit: 35.

Destroyed by the eruption of Vesuvius in AD 79, the archaeological remains of Pompeii, Herculaneum, and the neighboring sites around the Bay of Naples are unparalleled in their range and completeness. The study of this material record reveals a great deal about the domestic, economic, religious, social, and political life in ancient Italy. Examines archaeological, literary, and documentary material ranging from architecture and sculpture to wall painting, graffiti, and the floral remains of ancient gardens, but focuses on interpreting the archaeological record for insight into the everyday life of the Romans. In addition, explores the methods and techniques employed by archaeologists since the sites were "rediscovered" in the sixteenth century. Archaeological materials are introduced through illustrated presentations, supplementary texts, and sessions in the Bowdoin College Museum of Art.

Previous terms offered: Fall 2020.

ARCH 2206 (c) Hispania Antiqua: The Archaeology of Ancient Spain

Non-Standard Rotation. Enrollment limit: 35.

Surveys the early history of the Iberian peninsula through its material culture and highlights the interplay between the geography of Spain and diverse patterns of human settlement. Begins with the study of the indigenous Iberian peoples in Spain during their Late Neolithic and Bronze Ages and then examines the impact made by the arrival of traders and colonists from Phoenicia and the Greek world. Connections to Africa highlight the period of Carthaginian occupation starting in the sixth century B.C.E. and leading up to the Roman conquest in the third century B.C.E. Under Roman control the number and complexity of settlements increased and, as early as the first century B.C.E., the Spanish provincial elite began to play active roles in Roman commercial and political life. Concludes with the decline of Roman control in late antiquity and the changes for the peninsula brought about after the invasion of the Visigoths.

Previous terms offered: Fall 2021.

ARCH 2207 (c, DPI, IP) Who Owns the Past? Contemporary Controversies and Contested Narratives

Susan Kaplan.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Focuses on the meaning and significance of artifacts, archaeology sites, monuments, and art from a diversity of perspectives. Students learn about disagreements regarding who owns antiquities and ethnographic objects. They consider the ethical, cultural, and legal considerations of where heritage materials are housed, and whether they should be published and exhibited, and if so, by whom. They examine the impact of politics, conflicts, and war on cultural heritage sites and monuments, and learn about the illegal trafficking in antiquities and art. Students wrestle with museums' colonial legacies and consider how decolonizing practices are transforming museums and interpretations of the past. Case studies cover a broad array of museums, cultures, and nations. Readings, class discussions, visits by guest speakers, and hands-on work with objects are augmented by visits to the college's two museums. (Same as: ANTH 2105)

Previous terms offered: Fall 2020.

ARCH 2209 (c, IP) The Limits of Empire: Archaeology of the Roman Frontier

Non-Standard Rotation. Enrollment limit: 35.

The Roman frontier, or "limites" in Latin, occupied an important place in the history and imagination of the Romans. Dangerous, mysterious, but enticing, the borders of the Roman Empire were active areas of cultural and economic exchange. Examines archaeological evidence to provide a view of what was foreign to the Romans and also how Roman culture was seen by others. Traces the historical development of the Roman frontier and explores important sites from across the ancient world including Hadrian's Wall in the United Kingdom, Palmyra and Dura Europos in Syria, Leptis Magna in Libya, Volubilis in Morocco, and Chersonesos in the Crimea. Selected readings, including ancient texts in translation, supplement illustrated presentations of the major archaeological finds. Class meetings include artifact sessions in the Bowdoin College Museum of Art.

Previous terms offered: Spring 2019.

ARCH 2211 (c, IP) Archaeology of the Aegean Bronze Age

Non-Standard Rotation. Enrollment limit: 35.

Explores the ancient civilizations located around the Aegean Sea during prehistory from the end of the Neolithic period to around 1000 BCE. Study focuses on the Cycladic, Minoan, and Mycenaean cultures within their wider Mediterranean context, including their contacts with the neighboring cultures of Anatolia, the Levant, Egypt, and South Italy. These Bronze Age societies left a rich material record of palaces and funerary complexes, frescoes and vase paintings, and other artifacts that together shed light on the people living around the ancient Aegean. Their culture also inspired the creation of later myths and literature (e.g., the Iliad and the Odyssey). Presentations explore ancient sites such as Thera (Santorini), Knossos, Phaistos, Mycenae, Tiryns, Hattusa, and Troy. Course themes include the origins and development of complex state systems, funerary symbolism, and the expression of social, political, and religious ideologies in art and architecture. Archaeological materials are introduced through illustrated presentations, supplementary texts, and virtual sessions in the Bowdoin College Museum of Art.

Previous terms offered: Spring 2021.

ARCH 2212 (c, IP) Archaeology of the Etruscans and Early Italy

Jim Higginbotham.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the archaeology of ancient Italy from the Neolithic period to the first century BCE with particular emphasis on Etruscan material culture. Illustrated presentations and class discussions explore the settlement of the Italian peninsula, Sicily, and Sardinia in remote prehistoric times; the development of Iron Age Italic cultures and their contact with the Phoenicians and the Greeks; the emergence of Etruria as a dominant society in Italy; and the Etruscan influence on early Rome. Presentations explore ancient sites such as Caere (Cerveteri), Pyrgi, Tarquinia, Vulci, Orvieto, and Volterra. Artifacts and monuments including architecture, sculpture, pottery, and paintings are studied in their historical and cultural context in order to understand the evolution of early Italic society and the prominent role played by the Etruscans. Class study includes artifacts in the collections of the Bowdoin College Museum of Art.

ARCH 3301 (c, IP) The Endangered Past: Archaeology and the Current Threat to Cultural Heritage

Non-Standard Rotation. Enrollment limit: 16.

Archaeological exploration has exposed a rich array of sites and artifacts that can be experienced first-hand by an ever-growing number of visitors. This exposure has placed unprecedented pressures on countries to provide access while ensuring the protection of this important cultural heritage. Economic challenges, mass-tourism, and political strife challenge our effort to preserve the past. The heightened visibility of these remains coupled with their connections to ancient traditions has also attracted the ire of forces intent on obliterating the past. Examines the state of cultural heritage focusing on ancient sites in the Mediterranean and the Near East, including sites in Syria, Turkey, Greece, Italy, Lebanon, Egypt, and Libya. Explores the factors that have placed archaeological sites in jeopardy and examines possible solutions to these challenges. Sessions in the Bowdoin College Museum of Art incorporate select examples of the ancient collection that are connected to areas of the ancient world at risk. In this setting, explores the role of museums as custodians of the past and how current events have informed the discussions around cultural patrimony.

Prerequisites: ANTH 1101 or ANTH 1102 or ANTH 1150 or ARCH 1101 (same as ARTH 2090) or ARCH 1102 (same as ARTH 2100) or ARTH 1100.

Previous terms offered: Spring 2021.

ARCH 3302 (c) Ancient Numismatics

Non-Standard Rotation. Enrollment limit: 15.

Surveys Greek and Roman coinage by examining a series of problems ranging chronologically from the origins of coinage in the seventh century B.C. to the late Roman Empire. How do uses of coinage in Greek and Roman society differ from those of the modern era? How does numismatic evidence inform us about ancient political and social, as well as economic, history? Classes held in the Bowdoin College Museum of Art and course assignments are based on coins in the collection.

Prerequisites: ARCH 1101 (same as ARTH 2090) or ARCH 1102 (same as ARTH 2100) or ARTH 2090 or ARTH 2100.

Previous terms offered: Spring 2022.

ARCH 3304 (c) Pottery in Archaeology: Ceramic Arts in the Ancient Mediterranean

Non-Standard Rotation. Enrollment limit: 12.

Examines the importance of pottery in the archaeology of the Ancient Mediterranean through the study of Egyptian, Greek, Etruscan, and Roman ceramics in the Bowdoin College Museum of Art. Ranging in date from Predynastic Egypt to the waning years of the Roman Empire, the Bowdoin collection presents over 4000 years of ceramic evidence that serves as a basis for study of ancient technology and artistic design, as well as economic and social history. Through select reading and direct analysis, students examine the techniques employed by ancient potters to shape, decorate, and fire ceramics while using tools important in the study of ceramics, including methods of scientific analysis, artifact conservation, and restoration. In addition, students contribute to the online catalogue of the ancient collection while engaging in their own original research. Classes are held in the Bowdoin College Museum of Art, with course assignments and final project based on ceramics in the collection.

Prerequisites: ARCH 1100 - 1103 or ARTH 2090 or ARTH 2100.

Previous terms offered: Spring 2019.

ARCH 3311 (c) Portraits from Antiquity

Jim Higginbotham.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

For ancient cultures the art of portraiture had important religious, political, and social functions. Portraits, whether of gods, rulers, or common folk, were uniquely suited to communicate a variety of messages in a form easily recognizable to the intended audience. The success of the genre is clear from its widespread use and from the ways that it incorporated the accumulated traditions of ancient Mediterranean history. From profiles carved in relief and painted on vases to figures molded in terracotta and portraits sculpted in the round, explores a range of art representing Egyptian, Assyrian, Cypriot, Greek, and Roman cultures. Using artifacts housed in the collections of the Bowdoin College Museum of Art, examines the traditions, styles, and techniques that inform the portrayals of individuals in the ancient world, and what they teach about the societies that produced them.

Prerequisites: ARCH 1101 (same as ARTH 2090)- 1102 or ARTH 1100 or ARTH 2090 or ARTH 2100 or VART 1101 or VART 1301 or VART 1401 or VART 1601.

ARCH 3320 (c) The Culture of Spectacle in Antiquity and Beyond

Non-Standard Rotation. Enrollment limit: 16.

Investigates the political, economic, cultural, and social aspects of the notion of "spectacle" in the ancient Classical world. Competition and performance in front of a public audience characterized both Greek and Roman societies. By focusing on Greek athletic games, and theatrical representations in both Greece and Rome, as well as Roman gladiatorial combats, this course explores the purpose and function of ancient mass media spectacles capable of attracting an extensive crowd, while addressing themes such as class, gender, violence, humor, and religion. We will rely on the reading of primary literary sources (such as Pindar and Martial), as well as the analysis of the full range of archaeological evidence (i.e., wall paintings, mosaics, architecture, sculptures, finds, and graffiti) to reconstruct the ideologies and historical practices involved with ancient sports and public entertainments.

Previous terms offered: Spring 2020.

Classics

CLAS 1011 (c) Shame, Honor, and Responsibility

Jennifer Clarke Kosak.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

This course examines some of the fundamental problems posed in epic and tragic texts from ancient Greece and Rome: What is our responsibility to ourselves, to our families, and to our society and what is beyond our personal control? How does the society in which we are born shape our identities and our values? How can and do individuals choose to act within the constraints of social norms? We will explore these questions by focusing in particular on three concepts strikingly visible in ancient Greek and Roman epic and tragedy: shame, honor and responsibility. Texts include Homer's epic poems, the Iliad and the Odyssey; a selection of tragedies by Sophocles and Euripides; and the Roman poet Vergil's epic, the Aeneid.

Previous terms offered: Fall 2021, Fall 2020.

CLAS 1017 (c) The Heroic Age: Ancient Supermen and Wonder Women

Non-Standard Rotation. Enrollment limit: 16.

The modern concept of the superhero is an enduring vestige of the ancient concept of the hero, the ancient Greek word used to describe men of exceptional ability. Looks at heroes and heroines in ancient literature and culture, considering a range of sources from ancient Babylon to imperial Rome. Considers the changing definition of hero, the cultural values associated with heroism, the role played by gender and sexuality in the definition of the hero, and analogues to ancient heroes in modern cinema. Examines more nebulous and problematic models for the ancient villain and considers how contrasting definitions of hero and antihero can be used to understand ancient thought concerning human nature.

Previous terms offered: Fall 2020, Fall 2019.

CLAS 1025 (c) Ancient Empires and Ancient Others: Power, Ethnicity, and Identity in the Ancient Mediterranean

Non-Standard Rotation. Enrollment limit: 16.

What was it like to live in the ancient Mediterranean? For hundreds of years (e.g., 200 BCE–600 CE), the answer to this question would depend, at least in part, on where someone lived and how they identified themselves in relationship to the Roman empire and its centers of power. This course examines not only what it may have been like to live within the Roman empire as a person who identified with other ancient communities, but also attempts to understand what contact with the Romans would have been like for people who lived under other ancient political systems. What were encounters with the Roman world like for those far away from Rome, for example, on trade routes that connected Rome to India? What was life like for those oppressed by Roman authority, who lived as colonized subjects or enslaved people? This course approaches these questions by directly examining ancient evidence, such as texts from within and beyond the Roman world, as well as the work of modern scholars.

Previous terms offered: Fall 2021.

CLAS 1101 (c, IP) Classical Mythology

Michael Nerdahl.

Every Other Spring. Spring 2023. Enrollment limit: 50.

Focuses on the mythology of the Greeks and the use of myth in classical literature. Other topics considered are recurrent patterns and motifs in Greek myths; a cross-cultural study of ancient creation myths; the relation of mythology to religion; women's roles in myth; and the application of modern anthropological, sociological, and psychological theories to classical myth. Concludes with an examination of Ovid's use of classical mythology in the "Metamorphoses."

Previous terms offered: Fall 2021, Spring 2021, Spring 2020.

CLAS 1111 (c, IP) History of Ancient Greece: From Homer to Alexander the Great

Non-Standard Rotation. Enrollment limit: 50.

Surveys the history of Greek-speaking peoples from the Bronze Age (ca. 3000-1100 B.C.E) to the death of Alexander the Great in 323 B.C.E. Traces the political, economic, social, religious, and cultural developments of the Greeks in the broader context of the Mediterranean world. Topics include the institution of the polis (city-state); hoplite warfare; Greek colonization; the origins of Greek science; philosophy and rhetoric; and fifth-century Athenian democracy and imperialism. Necessarily focuses on Athens and Sparta, but attention is also given to the variety of social and political structures found in different Greek communities. Special attention is given to examining and attempting to understand the distinctively Greek outlook in regard to gender, the relationship between human and divine, freedom, and the divisions between Greeks and barbarians (non-Greeks). A variety of sources – literary, epigraphical, archaeological – are presented, and students learn how to use them as historical documents. Note: This course is part of the following field(s) of study: Europe. It fulfills the pre-modern requirement for history majors and minors. (Same as: HIST 1111)

Previous terms offered: Fall 2019.

CLAS 1112 (c, IP) History of Ancient Rome: From Romulus to Justinian

Non-Standard Rotation. Enrollment limit: 50.

Surveys the history of Rome from its beginnings to the fourth century A.D. Considers the political, economic, religious, social, and cultural developments of the Romans in the context of Rome's growth from a small settlement in central Italy to the dominant power in the Mediterranean world. Special attention is given to such topics as urbanism, imperialism, the influence of Greek culture and law, and multiculturalism. Introduces different types of sources – literary, epigraphical, archaeological, etc. – for use as historical documents. Note: This course is part of the following field(s) of study: Europe. It fulfills the pre-modern requirement for history majors and minors. (Same as: HIST 1112)

Previous terms offered: Fall 2020.

CLAS 1113 (c, IP) The World of Late Antiquity

Joshua Hartman.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

The fall of Rome has captured the imagination of students and historians for centuries, perhaps to a fault. When conversations focus on destruction, they neglect the many times that the Roman state avoided catastrophes or recovered from them. Studying late antiquity, Rome's most turbulent and dynamic era, uncovers the story of such near misses and recoveries, revealing a civilization that survived for millennia through a paradoxical combination of conservatism and radical change. Even before late antiquity, Rome had changed dramatically from its origins as a city state, transforming into an imperial republic and, later, a monarchy. In late antiquity, that empire became Christian, and its monarchs became despots. Its citizens sought protection from saints as much as from soldiers, from bishops as often as from emperors. Yet for all these changes, the inhabitants of this world continued to claim, perhaps louder than ever, that they were still Romans.

CLAS 1114 (c) Power, Inequality, and Social Conflict in the Ancient Mediterranean

Steve Shennan.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

The Athenian Democracy and the Roman Republic were formed in a crucible of conflicts over status, wealth, and the distribution of power. Although these different societies took different organizational directions, they faced similar challenges over time. Both also left behind a wealth of literary, legal, and material testimony to these challenges. Primary sources as varied as tragedy and comedy, law-court speeches, insult poetry, painting, sculpture, and philosophical texts provide insights into ancient ideas about freedom, sexuality, property rights, citizenship, individual flourishing, and commitments to a common good. This course takes a comparative approach to social history by exploring how Athenians and Romans tried to solve various kinds of social problems, and how such issues also became opportunities for growth and change. Broad introduction to ancient history, the use of primary sources, and general historical method. First-year students welcome. No prerequisites.

CLAS 2102 (c) Socrates and the Problem of History

Non-Standard Rotation. Enrollment limit: 35.

Explores the figure of Socrates as he is represented in various texts and artifacts in order to introduce students to problems of historical method. By closely reading authors such as Plato, Xenophon, Aristophanes, and Aristotle, students learn how to reconstruct a model of Socrates that is less idealized, but more historically accurate, than the Socrates we encounter in the historical imagination and popular culture. This course introduces students to methodological issues regarding evidence and argument that are directly relevant not only to ancient history and ancient philosophy, but to the epistemological contests currently taking place in our present moment.

Previous terms offered: Spring 2019.

CLAS 2202 (c, IP) Augustan Rome

Non-Standard Rotation. Enrollment limit: 35.

Upon his ascent to power after a century of war, Rome's first princeps, Augustus, launched a program of cultural reformation and restoration that was to have a profound and enduring effect upon every aspect of life in the empire, from fashions in entertainment, decoration, and art, to religious and political habits and customs. Using the city of Rome as its primary text, this course investigates how the Augustan "renovation" of Rome is manifested first and foremost in the monuments associated with the ruler: the Mausoleum of Augustus, theater of Marcellus, temple of Apollo on the Palatine, Altar of Augustan Peace, and Forum of Augustus as well as many others. Understanding of the material remains themselves is supplemented by historical and literary texts dating to Augustus's reign, as well as by a consideration of contemporary research and controversies in the field. (Same as: ARCH 2202, URBS 2402)

Previous terms offered: Spring 2020.

CLAS 2214 (c, IP) The Republic of Rome and the Evolution of Executive Power

Non-Standard Rotation. Enrollment limit: 35.

Examines in depth the approaches to leadership within the governmental system that enabled a small, Italian city-state to take eventual control of the Mediterranean world and how this state was affected by its unprecedented military, economic, and territorial growth. Investigates and re-imagines the political maneuverings of the most famous pre-Imperial Romans, such as Scipio Africanus, the Gracchi, and Cicero, and how political institutions such as the Roman Senate and assemblies reacted to and dealt with military, economic, and revolutionary crises. Looks at the relationship of the Roman state to class warfare, the nature of electoral politics, and the power of precedent and tradition. While examining whether the ultimate fall precipitated by Caesar's ambition and vision was inevitable, also reveals what lessons, if any, modern politicians can learn about statesmanship from the transformation of the hyper-competitive atmosphere of the Republic into the monarchical principate of Augustus. All sources, such as Livy's history of Rome, Plutarch's "Lives," letters and speeches of Cicero, and Caesar's "Civil War," are in English, and no prior knowledge of Roman antiquity is required. Note: This course fulfills the pre-modern requirement for history majors and minors. (Same as: HIST 2008)

Previous terms offered: Spring 2022, Spring 2019.

CLAS 2224 (c, IP) City and Country in Roman Culture

Non-Standard Rotation. Enrollment limit: 35.

We are all now quite familiar with the way in which the American political landscape has been painted (by the pundits at least) in two contrasting colors: Blue and Red. These "states of mind" have become strongly associated with particular spatial differences as well: Urban and Rural, respectively. Examines the various ways in which Roman culture dealt with a similar divide at different times in its history. Explores the manner in which "urban" and "rural" are represented in Roman literature and visual arts, and how and why these representations changed over time, as well as the realities and disparities of urban and rural material culture. Studies the city and the country in sources as varied as Roman painting, sculpture, architecture, and archaeology, and in Roman authors such as Varro, Vergil, Horace, Pliny and Juvenal. Modern authors will also be utilized as points of comparison. Analyzes how attitudes towards class, status, gender and ethnicity have historically manifested themselves in location, movement, consumption and production. One of the main goals of the course is to challenge our modern urban vs. rural polarity by looking at a similar phenomenon within the context of Roman history. (Same as: URBS 2424)

Previous terms offered: Fall 2018.

CLAS 2232 (c, VPA) Ancient Greek Theater

Non-Standard Rotation. Enrollment limit: 35.

Examines the development and character of tragedy and comedy in ancient Greece. Topics include the dramatic festivals of Athens, the nature of Greek theaters and theatrical production; the structure and style of tragic and comic plays; tragic and comic heroism; gender, religion and myth in drama; the relationship of tragedy and comedy to the political and social dynamics of ancient Athens. Some attention will be paid to the theory of tragedy and to the legacy of Greek drama. Authors include Aeschylus, Sophocles, Euripides, and Aristophanes. Includes a performance component.

Previous terms offered: Spring 2020.

CLAS 2238 (c, IP) The Politics of Memory: Commemoration in Ancient Greece and Rome

Non-Standard Rotation. Enrollment limit: 35.

How will we be remembered? How should we be remembered? And how do we decide to honor or sanction events that have occurred or people who have died, whether in the past or in our own lifetimes? This course explores these questions by comparing the commemorative practices of ancient Greece and Rome with those of our own time. Examines public and private memorials to those who have died, including poems, eulogies, mausoleums, statues, and gravestones, along with tributes to those who have triumphed (and sometimes those who have lost), whether on the battlefield or in less deadly contests. Also considers practices such as *damnatio memoriae* (erasure from historical memory) and ancestor worship, literary tropes such as "immortality through song," and the changing interpretation and reuse of commemorative monuments over time. Includes analysis of materials in the Bowdoin College Museum of Art, as well as field trips to local cemeteries and memorials. All readings in English.

Previous terms offered: Spring 2021.

CLAS 2241 (c, IP) Transformations: Mythical Metamorphoses from Classical Antiquity to the 21st Century

Barbara Weiden Boyd.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

The word “transformations” is a translation of the title of the Latin poet Ovid’s most famous work, the *Metamorphoses*, whose theme is mythical transformation. The mythical changes narrated by Ovid have inspired creativity of all sorts in the arts and will serve as the basis for this course. The first half of the semester will be devoted to careful reading and discussion of Ovid’s *Metamorphoses*. The remainder of the semester will turn its focus outward, to consider Ovid’s afterlife in the many poems, novels, and plays his work has inspired. We will also consider Ovid’s enduring status as “artist in exile.” Readings for the course, in addition to selected works of Ovid, may include works by Shakespeare, Ted Hughes, Nathaniel Hawthorne, Franz Kafka, Mary Zimmerman, David Malouf, Christoph Ransmayr, and Nina MacLaughlin.

Previous terms offered: Spring 2019.

CLAS 2243 (c, IP) When Silent Women Speak: Classical Heroines in Contemporary Literature

Barbara Weiden Boyd.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

The truism that the women of classical antiquity are silent plays out all too literally in the historical record: the women of ancient Greece and Rome have left only scarce and fragmentary remains of texts in their own voice. This erasure has provoked a remarkable response in contemporary literature, as writers have taken up the challenge to restore the missing voices of ancient women. In this course, several recent works of fiction will be read against their ancient models in epic and drama, and the cultural and political forces influencing both ancient and modern texts will be examined. Readings may include Madeline Miller, *Circe*; Margaret Atwood, *Penelopiad*; Pat Barker, *The Silence of the Girls*; Colm Toibin, *House of Names*; Christa Wolf, *Medea*; and Ali Smith, *Girl Meets Boy*; other readings may be included to reflect student interest. All readings are in English, and no prior familiarity with classical antiquity is required.

CLAS 2350 (c, IP) Myth in Arabic Literature: From the Qur’an to Modern Poetry and Prose

Non-Standard Rotation. Enrollment limit: 35.

Examines various myths in Arabic literature in translation. Discusses how myths of different origins (Ancient Near East, Greco-Roman Mediterranean, Ancient Arabia, Iran, India, Judeo-Christian traditions) have been reinterpreted and used in Arabic-speaking cultures from the sixth until the twenty-first century, to deal with questions such as the struggle of people against gods, their defiance against fate, their quest for salvation, their pursuit of a just society, and their search for identity. Explores various genres of Arabic literature from the Qur’an, the hadith (i.e., prophetic sayings), ancient and modern poetry, medieval prose and travel literature, “1001 Nights”, Egyptian shadow theater, and modern short stories and novels. In this way, presents Arabic literature as global, rooted in different ancient traditions and dealing with the perennial questions of humanity. (Same as: ARBC 2350, REL 2350)

Previous terms offered: Spring 2019.

CLAS 2736 (c) Ancient Greek Medicine

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Explores the development of scientific thinking in the ancient Greek world by examining the history of Greek medicine. Topics include the development of Greek rationalist thought; concepts of health and disease; notions of the human body, both male and female; the physician’s skills (diagnosis, prognosis, remedy); similarities and differences between religious and scientific views of disease; concepts of evidence, proof, and experiment; and Greek medical thinking in the Roman world. All readings in English. This course emphasizes the skills and approaches to writing in the Classics discipline.

Previous terms offered: Fall 2019.

CLAS 2757 (c) Tacitus: On How to be a Good Citizen under a Bad Emperor

Non-Standard Rotation. Enrollment limit: 16.

Can one honorably serve, and even flourish under, a leader who is widely understood to be dishonest, incompetent, and corrupt? Before the Roman author Tacitus was a historian, he was a senator who advanced himself politically during the rule of Domitian, who was arguably the very worst of the Roman emperors. As a central focus, a careful reading of the works of Tacitus, with accompanying secondary scholarship, seeks to answer the question of how and when to collaborate with a deplorable regime and what such collaboration might cost. All readings in English. (IRBW)

Prerequisites: CLAS 1112 (same as HIST 1112) or CLAS 2202 (same as ARCH 2202 and URBS 2402) or CLAS 2214 (same as HIST 2008) or ARCH 1102 (same as ARTH 2100).

Previous terms offered: Fall 2021, Fall 2018.

CLAS 3306 (c) Leadership, Morality, and the Ancients: The Works of Plutarch

Michael Nerdahl.

Non-Standard Rotation. Fall 2022. Enrollment limit: 10.

“One cannot read Plutarch without a tingling of the blood.” A prolific author, Plutarch produced dynamic writings on such topics as education, self-improvement, the nature of the soul, the virtues of men and women, music, natural science, vegetarianism, and love. His eclectic philosophical thought culminated in his greatest work, the “*Parallel Lives*,” a collection of biographies on statesmanship designed to present examples from Greco-Roman history—like Alexander the Great, Julius Caesar, Antony and Cleopatra, not to mention preeminent leaders from Sparta and Athens—to serve as mirrors for ethical self-reflection. Considers the context of Plutarch’s philosophy and literary presentation and how they relate to modern leadership, ethical behavior, multi-cultural understanding, and the utility of moral instruction. Readings likely to include works of Plato as well as selections from Plutarch’s “*Moralia*” and “*Parallel Lives*.” All readings in English. Research Seminar.

Prerequisites: CLAS 1100 - 1999 or ARCH 1100 - 1999 or GRK 1100 - 1999 or LATN 1100 - 1999 or CLAS 2000 - 2969 or ARCH 2000 - 2969 or GRK 2000 - 2969 or LATN 2000 - 2969.

Previous terms offered: Fall 2018.

CLAS 3310 (c, IP) Imagining Rome

Non-Standard Rotation. Enrollment limit: 16.

The mythical fate-driven foundation of Rome and the city's subsequent self-fashioning as *caput mundi* (capital of the world) have made the city an idea that transcends history, and that has for millennia drawn historians, poets, artists, and, most recently, filmmakers to attempt to capture Rome's essence. As a result, the city defined by its ruins is continually created anew; this synergy between the ruins of Rome – together with the mutability of empire that they represent – and the city's incessant rebirth through the lives of those who visit and inhabit it offers a model for understanding the changing reception of the classical past. This research seminar explores the cycle of ancient Rome's life and afterlife in the works of writers and filmmakers such as Livy, Virgil, Tacitus, Juvenal, Petrarch, Shakespeare, Keats, Goethe, Gibbon, Hawthorne, Freud, Moravia, Rossellini, Fellini, Bertolucci, and Moretti. All readings in English. (Same as: URBS 3410)

Prerequisites: ARCH 1102 (same as ARTH 2100) or ARCH 2201 or higher or CLAS 1000 or higher or GRK 1000 or higher or LATN 1000 or higher.

Previous terms offered: Spring 2021, Fall 2019.

CLAS 3314 (c) Ancient Odysseys

Non-Standard Rotation. Enrollment limit: 16.

Wily Odysseus, the man of many ways, is famous as a clever strategist, an outstanding archer, and a first-rate fighter; he is also an expert storyteller, whose fantastic tales are embedded within the compelling narrative of Homer's *Odyssey*. Both the figure of Odysseus and the epic poem that tells his story had an enduring power and influence over centuries of Greek and Roman culture. Begins with a careful reading of the *Odyssey*; then turns to other texts that engage with the poem, whether by explicitly exploring Odysseus' character and motivations, or by using the narrative patterns and themes of the epic to construct their original tales of heroes (and heroines) who experience "odysseys" of their own. Texts likely to include Sophocles's *Philoctetes*, Chariton's *Chaereas and Callirhoe*, Lucian's *True Histories*, Petronius's *Satyricon* and Ovid's *Metamorphoses*. Considers the importance of storytelling in the construction of human identity and the meaning of a human life. Readings in English.

Prerequisites: CLAS 1000 - 1999 or CLAS 2000 - 2969 or ARCH 1000 - 1999 or ARCH 2000 - 2969 or GRK 1000 - 1999 or GRK 2000 - 2969 or LATN 1000 - 1999 or LATN 2000 - 2969.

Previous terms offered: Spring 2022.

CLAS 3325 (c) Deadly Words: Language and Power in the Religions of Antiquity

Non-Standard Rotation. Enrollment limit: 16.

In the ancient Mediterranean world, speech was fraught with danger and uncertainty. Words had enormous power—not just the power to do things but a tangible power as things. Words attached themselves to people as physical objects. They lived inside them and consumed their attention. They set events in motion: war, conversion, marriage, death, and salvation. This course investigates the precarious and deadly presence of oral language in the religious world of late antiquity (150 CE to 600 CE). Focusing on evidence from Christian, Jewish, and pagan sources—rabbinic literature, *piyyutim*, curse tablets, amulets, monastic sayings, creeds, etc.—students will come to understand the myriad ways in which words were said to influence and infect religious actors. For late ancient writers, words were not fleeting or ethereal, but rather quite tactile objects that could be felt, held, and experienced. It is the physical encounter with speech that orients this course. (Same as: REL 3325)

Previous terms offered: Spring 2022, Spring 2019.

Greek**GRK 1101 (c) Elementary Greek I**

Jennifer Clarke Kosak.

Every Spring. Spring 2023. Enrollment limit: 18.

Introduces students to basic elements of ancient Greek grammar and syntax; emphasizes the development of reading proficiency and includes readings, both adapted and in the original, of various Greek authors.

Focuses on Attic dialect.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GRK 1102 (c) Elementary Greek II

Jennifer Clarke Kosak.

Every Fall. Fall 2022. Enrollment limit: 18.

A continuation of Greek 1101; introduces students to more complex grammar and syntax, while emphasizing the development of reading proficiency. Includes readings, both adapted and in the original, of Greek authors such as Plato and Euripides. Focuses on Attic dialect.

Prerequisites: GRK 1101 or Placement in GRK 1102.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GRK 2203 (c) Intermediate Greek for Reading

Joshua Hartman.

Every Spring. Spring 2023. Enrollment limit: 18.

A review of the essentials of Greek grammar and syntax and an introduction to the reading of Greek prose through the study of one of Plato's dialogues. Equivalent of Greek 1102 or two to three years of high school Greek is required.

Prerequisites: GRK 1102 or Placement in GRK 2203.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GRK 2204 (c, IP) Homer

Michael Nerdahl.

Every Fall. Fall 2022. Enrollment limit: 18.

An introduction to the poetry of Homer. Focuses both on reading and on interpreting Homeric epic. All materials and coursework in Greek.

Prerequisites: GRK 2203 or Placement in GRK 2204.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GRK 3303 (c) The Historians

Jennifer Clarke Kosak.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Focuses on the histories of Herodotus or Thucydides. Course may be repeated for credit if the contents change. Research seminar.

Prerequisites: GRK 2204 or higher or Placement in GRK 3000 level.

Previous terms offered: Spring 2020, Spring 2019.

GRK 3304 (c) Greek Comedy

Non-Standard Rotation. Enrollment limit: 16.

Examines the genre of ancient Greek comedy through the close reading of one play in Greek and additional plays in translation. Considers the history, structure, language and performance of Greek comic plays, the role of comedy in Athenian society, and definitions of comedy and the comic. Explores issues such as comic critiques of contemporary social and political problems, the connection between humor and violence, and questions of universality and specificity in comic humor.

Prerequisites: GRK 2204 or higher.

Previous terms offered: Spring 2021.

GRK 3305 (c) Greek Tragedy

Non-Standard Rotation. Enrollment limit: 12.

Introduces the genre of tragedy through the reading of Sophocles' play "Philoctetes." Considers the nature of tragedy, the particular style and interests of Sophocles, the place of the play within Sophocles' works, his relationship to other tragedians, and the role of theater in classical Athens. Several other tragedies read in translation. Final portion devoted to a production of a section of the play in Greek.

Prerequisites: GRK 2204 or higher or Placement in GRK 3000 level.

Previous terms offered: Spring 2022, Fall 2019.

Latin

LATN 1101 (c) Elementary Latin I

Michael Nerdahl.

Every Fall. Fall 2022. Enrollment limit: 18.

A thorough presentation of the elements of Latin grammar. Emphasis is placed on achieving a reading proficiency.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

LATN 1102 (c) Elementary Latin II

Michael Nerdahl.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Latin 1101. During this term, readings are based on unaltered passages of classical Latin.

Prerequisites: LATN 1101 or Placement in LATN 1102.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

LATN 2203 (c) Intermediate Latin for Reading

Steve Shennan.

Every Fall. Fall 2022. Enrollment limit: 18.

A review of the essentials of Latin grammar and syntax and an introduction to the reading of Latin prose and poetry. Materials to be read change from year to year, but always include a major prose work. Equivalent of Latin 1102, or two to three years of high school Latin is required.

Prerequisites: LATN 1102 or Placement in LATN 2203.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

LATN 2204 (c, IP) Studies in Latin Literature

Jennifer Clarke Kosak.

Every Spring. Spring 2023. Enrollment limit: 18.

An introduction to different genres and themes in Latin literature. The subject matter and authors covered may change from year to year (e.g., selections from Virgil's "Aeneid" and Livy's "History," or from Lucretius, Ovid, and Cicero), but attention is always given to the historical and literary context of the authors read. While the primary focus is on reading Latin texts, some readings from Latin literature in translation are also assigned. Equivalent of Latin 2203 or three to four years of high school Latin is required.

Prerequisites: LATN 2203 or Placement in LATN 2204.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

LATN 2208 (c, IP) Roman Elegy

Non-Standard Rotation. Enrollment limit: 08.

Near the end of the first century B.C., a general-poet named Gallus established the conventions of a new poetic form, Roman elegy, perhaps the most Roman of all poetic genres. It employs Greek meter and draws heavily from Greek models, and yet has no true analogue from the Hellenic world. The elegists—charming, playful, and downright funny—were part of a unique literary circle and offer a rare opportunity to see how poets engaged in literary rivalry and one-upmanship. Readings include works of the Augustan elegists, Tibullus, Propertius, and Ovid. Discusses the origins of elegy as well as its relationship to other genres, especially epic and oratory, conceptions of gender in the Augustan age, and Latin elegy's role in challenging Roman cultural and political expectations, as the dalliances portrayed by the elegists are strikingly at odds with the social agenda of the first Roman emperor, Augustus. Taught concurrently with Latin 3308.

Previous terms offered: Fall 2020.

LATN 2209 (c, IP) Julius Caesar

Non-Standard Rotation. Enrollment limit: 08.

Few figures altered the course of the Mediterranean World as much as Julius Caesar: warlord, historian, general, statesman, orator, and innovator, his deeds were as horrific as they were transformative, and symbolize the chaotic era of strife that devastated Rome, but also led to the genocide and provincial conquest of Gaul. By reading selections from his own works as well as works of poetry, epistolography, history, and oratory from the late Republic, as well as modern works that examine or re-imagine his legacy, students will come to grips with the grand game Caesar was playing that resulted not only in the demise of the nearly 500 year old Republic of Rome and the subjugation of millions of Gauls, but his own murder at the hands of his fellow senators. Students will also examine the validity of the use of Caesar as a politically evocative model. This is a bilevel course, with students at the 2209 and 3309 levels meeting together but with a different syllabus for each level.

Previous terms offered: Fall 2021.

LATN 2210 (c, IP) Catullus

Barbara Weiden Boyd.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

The intimacy and immediacy of Catullan lyric and elegiac poetry have often been thought to transcend time and history; in his descriptions of a soul tormented by warring emotions, Catullus speaks to all of us who have felt love, desire, hatred, or despair. Yet Catullus is a Roman poet, indeed, the Roman poet par excellence, under whose guidance the poetic tools once wielded by the Greeks were once and for all transformed by the Roman world of the first century BC. Catullus is a product of his time; in turn, he helps to make his time comprehensible to us. Catullus is studied in all his complexity by engaging the entire literary corpus he has left, and so to understand his crucial role in shaping the Roman poetic genius. Taught concurrently with Latin 3310.

Previous terms offered: Fall 2018.

LATN 2215 (c, IP) The Swerve: Lucretius's De rerum natura

Non-Standard Rotation. Enrollment limit: 16.

T. Lucretius Carus (c. 94-55 BCE) is the author of a poem, "on the nature of things," composed in six books of didactic-epic hexameters. A student of Epicurean philosophy, Lucretius adapts both the beliefs and protoscientific discoveries of one of classical antiquity's most influential intellectual traditions to Latin poetry; his poem proves a model both for subsequent classical poets and for the rationalist movements of the Renaissance. In this seminar, we will read selections from the poem in Latin, and the entire work in English, and consider recent scholarly approaches to Lucretius's work. We will also devote several weeks at the end of the semester to Lucretius's postclassical influence and reception. This is a bilevel course, with students at the 2215 and 3315 levels meeting together but with a different syllabus for each level.

Previous terms offered: Fall 2019.

LATN 3302 (c) Ovid's Metamorphoses

Barbara Weiden Boyd.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

Publius Ovidius Naso (Ovid, 43 B.C.E.–17 C.E.) is a sophisticated and rewarding writer of Latin poetry, whose work was greatly influential on the writers and artists of succeeding eras. His epic-style *Metamorphoses*, in fifteen books, gathers together several hundred episodes of classical myth, organized through an elaborate play with chronology, geography, history, philosophy, and politics; the resulting narrative is at once clever, romantic, bleak, and witty, and repeatedly draws attention to its own self-conscious poetics while carrying the reader along relentlessly. Focuses on a close reading of three books in Latin, against the background of the entire poem read in English, and considers at length the ideological contexts for and implications of Ovid's work. Assignments include several projects intended to train students to conduct research in Classics; this seminar counts as a research seminar.

Prerequisites: LATN 2204 or higher or Placement in LATN 3300 level.

Previous terms offered: Spring 2019.

LATN 3305 (c, IP) Virgil: The Aeneid

Non-Standard Rotation. Enrollment limit: 16.

Born in 70 BCE, the poet Virgil (Publius Vergilius Maro) lived through the traumatic decades that saw the end of the Roman republic and witnessed firsthand the political rebirth of Rome managed by Octavian after the battle of Actium. Virgil's "Aeneid," written in the first decade of the restored Republic, reflects both the historical turmoil of the time and its outcome; at the same time, it stands as the greatest artistic achievement of the period (and, arguably, of all Latin literature). Three books of the "Aeneid" read in Latin, and the remainder of the poem read in English, with special attention given to political and cultural approaches to the epic and its reception. Research seminar.

Prerequisites: LATN 2204 or higher or Placement in LATN 3300 level.

Previous terms offered: Spring 2020.

LATN 3308 (c) Roman Elegy

Non-Standard Rotation. Enrollment limit: 12.

Near the end of the first century BC, a general-poet named Gallus established the conventions of a new poetic form, Roman Elegy. This genre, in which the devoted lover laments his treatment at the hand of his fickle domina, is perhaps the most Roman of all poetic genres. It employs Greek meter and draws heavily from Greek models, and yet has no true analogue from the Hellenic world. The elegists charming, playful, and downright funny were part of a unique literary circle, and offer a rare opportunity to see how poets engaged in literary rivalry and one-upmanship. Works of the Augustan elegists Tibullus, Propertius, and Ovid are read, and the origins of elegy are discussed as well as its relationship to other genres, especially epic and oratory. Reading this comical and self-aware branch of poetry reveals insightful perspectives on conceptions of gender in the Augustan age. Also questions Latin elegy's role in challenging Roman cultural and political expectations, as the dalliances portrayed by the elegists are strikingly at odds with the social agenda of the first Roman emperor, Augustus. Research seminar.

Prerequisites: LATN 2204 or higher or Placement in LATN 3300 level.

Previous terms offered: Fall 2020.

LATN 3309 (c, IP) Julius Caesar

Non-Standard Rotation. Enrollment limit: 08.

Few figures altered the course of the Mediterranean World as much as Julius Caesar: warlord, historian, general, statesman, orator, and innovator, his deeds were as horrific as they were transformative, and symbolize the chaotic era of strife that devastated Rome, but also led to the genocide and provincial conquest of Gaul. By reading selections from his own works as well as works of poetry, epistolography, history, and oratory from the late Republic, as well as modern works that examine or re-imagine his legacy, students will come to grips with the grand game Caesar was playing that resulted not only in the demise of the nearly 500 year old Republic of Rome and the subjugation of millions of Gauls, but his own murder at the hands of his fellow senators. Students will also examine the validity of the use of Caesar as a politically evocative model. This is a bilevel course, with students at the 2209 and 3309 levels meeting together but with a different syllabus for each level.

Prerequisites: LATN 2204 or higher or Placement in LATN 3300 level.

Previous terms offered: Fall 2021.

LATN 3310 (c, IP) Catullus

Barbara Weiden Boyd.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

The intimacy and immediacy of Catullan lyric and elegiac poetry have often been thought to transcend time and history; in his descriptions of a soul tormented by warring emotions, Catullus appears to speak to and for all who have felt love, desire, hatred, or despair. But Catullus is a Roman poet – indeed, the Roman poet par excellence, under whose guidance the poetic tools once wielded by the Greeks were once and for all appropriated in and adapted to the literary and social ferment of first century BCE Rome. Close reading of the entire Catullan corpus in Latin complemented by discussion and analysis of contemporary studies of Catullus work, focusing on constructions of gender and sexuality in Roman poetry, the political contexts for Catullus's work, and Catullus in Roman intellectual and cultural history.

Previous terms offered: Fall 2018.

LATN 3315 (c, IP) The Swerve: Lucretius's De rerum natura

Non-Standard Rotation. Enrollment limit: 16.

T. Lucretius Carus (c. 94-55 BCE) is the author of a poem "on the nature of things," composed in six books of didactic-epic hexameters. A student of Epicurean philosophy, Lucretius adapts both the beliefs and protoscientific discoveries of one of classical antiquity's most influential intellectual traditions to Latin poetry; his poem proves a model both for subsequent classical poets and for the rationalist movements of the Renaissance. In this seminar, we will read selections from the poem in Latin, and the entire work in English, and consider recent scholarly approaches to Lucretius's work. We will also devote several weeks at the end of the semester to Lucretius's postclassical influence and reception. This is a bilevel course, with students at the 2215 and 3315 levels meeting together but with a different syllabus for each level.

Previous terms offered: Fall 2019.

LATN 3318 (c) Literature and Culture under Nero

Non-Standard Rotation. Enrollment limit: 12.

During Nero's time as princeps (54-68 CE), despite the unstable and often cruel nature of the ruler himself, Rome experienced a period of literary, artistic, and cultural development unseen since Augustus. Works in Stoic philosophy, Roman tragedy, epic poetry, and a new genre, the satiric novel, thrived under Nero's rule. By reading selections of the works of Seneca, Lucan, and Petronius, and analyzing historical works about Nero, we can see how thinkers and artists function in a world dictated by an eccentric and misguided—but artistically inclined—autocrat. Examines the relationships of the works to the principate and to Roman culture, how the authors were affected by the powers that be, and what their works say about the ever-evolving society of Rome. Research seminar.

Prerequisites: LATN 2204 or higher or Placement in LATN 3300 level.

Previous terms offered: Spring 2021.

LATN 3319 (c) Many Persephones: Transformations of Myth from the Augustans to Late Antiquity

Non-Standard Rotation. Enrollment limit: 16.

Persephone and her mother, Demeter, represent enduring figures in the mythological imaginary of the ancient Mediterranean. The story of Persephone's abduction and ultimate reunification with her mother became a popular subject for Roman poets as they rivaled their Greek predecessors in creating hexameter epics. The Persephone myth was commemorated in two separate works by the Augustan poet Ovid. Centuries later, in order to assert his own claim to Latin poetic excellence, the Egypto-Greek immigrant Claudius Claudianus crafted his own retelling of the myth. In this course students read both Ovid and Claudian as they study not only the myth itself, but also how diverse Roman audiences related to it in their changing cultural contexts. Students analyze the poem as a case study in literary reception, paying close attention to the ways that these poets seek to differentiate themselves, often quite self-consciously, from their predecessors.

Prerequisites: LATN 2204 or higher or Placement in LATN 3300 level.

Previous terms offered: Spring 2022.

Computer Science

Overview & Learning Goals

Overview

The major in computer science focuses on critical thinking and problem-solving and is designed to blend traditional core areas (theory, systems, and artificial intelligence) with emerging areas such as human-computer interaction, social and economic networks, nature-inspired computation, distributed systems, and resource-efficient algorithms.

Learning Goals

A student graduating from Bowdoin with a computer science major will:

1. have critical thinking skills enabling the solution of problems by developing and analyzing algorithms;
2. have a variety of skills enabling the design, implementation, debugging, and testing of complex problems using a programming language;
3. have experience working on a large computer science project;

- be able to connect the use of computer science to other disciplines and have the experience of working on at least one project that does this directly;
- have a capstone experience with current research in computer science, including reading the literature, learning advanced material independently, and working on a research project under the supervision of a faculty member;
- have experience working as part of a team;
- be able to recognize, identify, and analyze the social and ethical issues that arise from the use of computer science techniques in society; and
- have experience presenting technical content in both oral and written form.

Options for Majoring or Minor in the Department

Students may elect to major in computer science, the computer science and mathematics interdisciplinary major, or to coordinate the computer science major with digital and computational studies, education, or environmental studies. Students pursuing a coordinate or interdisciplinary major may not normally elect a second major. Non-majors may elect to minor in computer science.

Department Website (<https://www.bowdoin.edu/computer-science/>)

Faculty

Laura I. Toma, *Department Chair*

Suzanne M. Theberge, *Senior Department Coordinator*

Professor: Laura I. Toma

Associate Professor: Sean K. Barker, Mohammad T. Irfan (Digital and Computational Studies)†, Stephen M. Majercik‡

Assistant Professors: David Byrd, Cibele Freire, Sarah M. Harmon

Lecturer: Kai Presler-Marshall

Adjunct Lecturer: Stephen Houser

Faculty/Staff Website (<https://www.bowdoin.edu/computer-science/faculty-and-staff/>)

Requirements

Computer Science Major

The major in computer science consists of at least ten courses.

Code	Title	Credits
Required Courses		
CSCI 2101	Data Structures	1
CSCI 2200	Algorithms	1
CSCI 2330	Foundations of Computer Systems	1
Select at least one course from each of the following areas, for a total of six computer science electives, at least three of which must be advanced-level courses numbered 3000 or higher.		6
<i>Algorithms/Theory</i>		
CSCI 2210	Theory of Computation	
CSCI 2220	Logic in Computer Science	
CSCI 3210	Computational Game Theory	
CSCI 3250	Computational Geometry	
CSCI 3225	GIS Algorithms and Data Structures	
<i>Artificial Intelligence</i>		
CSCI 2400	Artificial Intelligence	

CSCI 3400	Cognitive Architecture
CSCI 3420	Optimization and Uncertainty
CSCI 3445	Nature-Inspired Computation
CSCI 3465	Financial Machine Learning
CSCI 3725	Computational Creativity

Systems

CSCI 2320	Principles of Programming Languages
CSCI 2335	Software Engineering
CSCI 3300	Computer Networks
CSCI 3310	Operating Systems
CSCI 3325	Distributed Systems

Projects Courses

CSCI 3225	GIS Algorithms and Data Structures
CSCI 3325	Distributed Systems
CSCI 3445	Nature-Inspired Computation
CSCI 3465	Financial Machine Learning
CSCI 3715	Human-Computer Interaction
CSCI 3725	Computational Creativity

Select one mathematics course numbered 1000 or higher.

1

Computer Science Minor

The minor in computer science consists of CSCI 2101 Data Structures, plus at least three courses, numbered 2000 or higher. Independent studies in computer science cannot count toward the minor.

Interdisciplinary Major

The department participates in an interdisciplinary major program in computer science and mathematics. See the Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>).

Additional Information

Additional Information and Department Policies

- Each of the courses required for the major or minor must be taken for a regular letter grade (not Credit/D/Fail) with a minimum earned grade of C-.
- The prerequisite for 2000-level courses is a grade of C or better on the final exam in CSCI 1101 Introduction to Computer Science or CSCI 1103 Programming with Data. For courses at the 2000 level or above, a grade of C- or better must be earned in the course for it to serve as a prerequisite for another computer science course.
- One independent study at the intermediate or advanced level may be applied toward the required number of computer science courses, but cannot be used to fulfill any other requirements (areas, projects, or 3000 level).
- At most two of the nine computer science courses required for the major, or one of the four computer science courses required for the minor, can be transfer credit from other institutions.

- Majors may double-count one course with another department or program. Minors may not double-count any courses with another department or program.
- Advanced Placement and International Baccalaureate scores, in addition to the computer science placement test, are only used for placement.
- Students—particularly those who intend to do graduate work in computer science—are encouraged to collaborate with faculty on research projects through independent studies, honors projects, and fellowship-funded summer research.

Information for Incoming Students (p. 147)

Students interested in computer science generally start with CSCI 1101 Introduction to Computer Science (offered every semester) or CSCI 1103 Programming with Data (offered every fall; previously named Accelerated Introduction to Computer Science) both of which provide an introduction to core concepts in computer science. In rare cases, students may jump directly into CSCI 2101 Data Structures (see below for more information).

Note that introductory computer science classes regularly fill to capacity, and registration priority is given to first-years. You are encouraged to take these courses early, as you will have a smaller chance to enroll as an upper-class student. Students who are interested in pursuing a major in computer science are especially encouraged to take CSCI 1101 Introduction to Computer Science or CSCI 1103 Programming with Data during their first year at Bowdoin. *All* computer science classes regularly fill to capacity and taking an introductory course after the first year can make it difficult to complete the major.

Introductory Courses

- Students with no programming background normally start with CSCI 1101 Introduction to Computer Science.
- Students with some programming background normally start with CSCI 1103 Programming with Data.
 - CSCI 1103 Programming with Data covers the same core material as CSCI 1101 Introduction to Computer Science but at an accelerated pace through basic material and with some additional topics. Students who enroll in CSCI 1103 Programming with Data are expected to have basic comfort with programming concepts; experience with Python specifically is not required or expected.
 - Examples of programming background appropriate for CSCI 1103 Programming with Data include AP or IB coursework in computer science, completion of DCS 1100 Introduction to Digital and Computational Studies or DCS 1200 Data Driven Societies, informal programming experience, or experience from other science courses. Prior knowledge of computer science is used for course placement only and does not count as credit toward the major or minor.
 - Students intending to enroll in CSCI 1103 Programming with Data as their first computer science or digital and computational studies course must email the instructor directly to request a registration override and can find that information in the Classfinder (<https://classfinder.bowdoin.edu/classfinder/>).
 - Students with some programming background, but who wish to enroll in CSCI 1101 Introduction to Computer Science instead of CSCI 1103 Programming with Data must meet with a professor in the department to discuss their particular situation.

- Students with substantial programming background normally start with CSCI 1103 Programming with Data or, in rare cases, CSCI 2101 Data Structures.
 - In exceptional cases, students with a strong computer science/programming background may skip CSCI 1101 Introduction to Computer Science/CSCI 1103 Programming with Data and enroll directly in CSCI 2101 Data Structures. Students interested in this option must consult with the department. This course uses Java, but does not assume any prior Java experience (most students enter with Python experience only). The course has a 1½ hour lab. Students interested in this option should contact the department to complete an informal placement recommendation questionnaire.
 - If they receive a result that indicates CSCI 1103 Programming with Data, they should enroll in that course. If they receive a result that indicates CSCI 1103 Programming with Data or possibly CSCI 2101 Data Structures, and they wish to explore the possibility of enrolling in CSCI 2101 Data Structures, they should follow up with one of the instructors of the CSCI 2101 Data Structures sections and can find that information in the Classfinder (<https://classfinder.bowdoin.edu/classfinder/>).
 - Prior knowledge of computer science is used for placement only and does not count as credit towards the major. Students with any questions about appropriate placement should talk to a member of the department prior to registration.

Courses

CSCI 1101 (a, MCSR) Introduction to Computer Science

Cibele Freire; Kai Presler-Marshall; Stephen Houser.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

What is computer science, what are its applications in other disciplines, and what is its impact in society? A step-by-step introduction to the art of problem solving using the computer and programming. Provides a broad introduction to computer science and programming through real-life applications. Weekly labs provide experiments with the concepts presented in class. Assumes no prior knowledge of computers or programming. Final examination grade must be C or better to serve as a prerequisite for Computer Science 2101.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

CSCI 1103 (a, MCSR) Programming with Data

Kai Presler-Marshall.

Every Fall. Fall 2022. Enrollment limit: 30.

Intended for students with some programming experience, but not enough to move directly into Data Structures. An accelerated introduction to the art of problem solving using the computer and the Python programming language. Weekly labs and programming assignments focus on "big data" and its impact on the world. (Same as: DCS 1300)

Prerequisites: CSCI 1055 or DCS 1100 or DCS 1200 or Placement in above CSCI 1101.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

CSCI 2101 (a, MCSR) Data Structures

Sarah Harmon; David Byrd.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 22.

Solving complex algorithmic problems requires the use of appropriate data structures such as stacks, priority queues, search trees, dictionaries, hash tables, and graphs. It also requires the ability to measure the efficiency of operations such as sorting and searching in order to make effective choices among alternative solutions. Offers a study of data structures, their efficiency, and their use in solving computational problems. Laboratory exercises provide an opportunity to design and implement these structures. Students interested in taking Computer Science 2101 are required to pass the computer science placement examination with a grade of C or better before class starts.

Prerequisites: CSCI 1101 or CSCI 1103 (same as DCS 1300) or Placement in above CSCI 1101 and CSCI 1101 or CSCI 1103 (same as DCS 1300) or Placement in above CSCI 1101.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

CSCI 2200 (a, MCSR) Algorithms

Laura Toma.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 22.

An introductory course on the design and analysis of algorithms. Introduces a number of basic algorithms for a variety of problems such as searching, sorting, selection, and graph problems (e.g., spanning trees and shortest paths). Discusses analysis techniques, such as recurrences and amortization, as well as algorithm design paradigms such as divide-and-conquer, dynamic programming, and greedy algorithms.

Prerequisites: CSCI 2101.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

CSCI 2210 (a, MCSR) Theory of Computation

Cibele Freire.

Non-Standard Rotation. Fall 2022. Enrollment limit: 30.

Studies the nature of computation and examines the principles that determine what computational capabilities are required to solve particular classes of problems. Topics include an introduction to the connections between language theory and models of computation, and a study of unsolvable problems.

Prerequisites: CSCI 2101.

Previous terms offered: Fall 2021, Fall 2020, Spring 2019.

CSCI 2320 (a, MCSR) Principles of Programming Languages

Every Year. Enrollment limit: 30.

Studies design principles and paradigms of programming languages. Different paradigms of languages correspond to distinct ways of thinking about problem solving. For example, functional languages (such as Haskell) focus attention on the behavioral aspects of a problem; object-oriented languages (such as Ruby) focus attention on data—how to model and manipulate it. Despite their differences, a common set of principles often guide language design. Covers principles of language design and implementation including syntax, semantics, type systems, control structures, and compilers. Also covers various paradigms of languages including imperative, object-oriented, web, and functional languages.

Prerequisites: CSCI 2330.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

CSCI 2330 (a, MCSR) Foundations of Computer Systems

Sean Barker.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 22.

A broad introduction to how modern computer systems execute programs, store information, and communicate. Examines the hardware and software components required to go from a program expressed in a high-level programming language like C to the computer actually running the program. Topics include concepts of program compilation and assembly, machine code, data representation and computer arithmetic, basic microarchitecture, the memory hierarchy, processes, and system-level I/O. Regular, programming-intensive projects provide hands-on experience with the key components of computer systems.

Prerequisites: CSCI 2101.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

CSCI 2335 (a) Software Engineering

Kai Presler-Marshall.

Every Fall. Fall 2022; Spring 2023. Enrollment limit: 35.

A Java-based introduction to the processes of software engineering. How to design, implement, and test small-to medium-sized object-oriented systems, including the use of appropriate design notation to create a design before implementation. Closed-box and open-boxed testing, including writing and executing system test plans, writing unit tests, and using code coverage. An introduction to the best practices of software engineering, including pair programming, test-first development, static analysis, version control, and continuous integration. An introduction to project management. Class will feature several multi-week, hands-on projects; some projects will require students to work together in small teams (three to four members). Time permitting, we may also cover an introduction to full-stack web development, including HTML, JavaScript, and Databases.

Prerequisites: CSCI 2101.

CSCI 2345 (a, MCSR) In situ D4: Real-world Database Design, Development, and Deployment

Non-Standard Rotation. Enrollment limit: 22.

This project-based course approaches database systems management from the perspective of database designers, developers, data analysts, and diverse sets of users. Topics include relational and non-relational databases (SQL/NoSQL), data modeling, transactions and isolation, and web-based information retrieval applications. Includes both individual programming assignments and a multidimensional, semester-long project culminating in student research and demonstration of a real-world information systems application. In 2019, the research project will focus on designing databases and information retrieval interfaces for the purpose of navigating public spaces and increasing multimodal information access for users with blindness or low vision constraints. The course will also provide opportunities for ongoing student research in the development of accessibility technologies after the completion of the course.

Prerequisites: CSCI 2330.

Previous terms offered: Spring 2020.

CSCI 2350 (a) Social and Economic Networks

Non-Standard Rotation. Enrollment limit: 22.

Examines the social and economic aspects of today's connected world from a multitude of perspectives; namely, network science, computer science, sociology, and economics. The fundamental questions to be addressed are: What are the properties of real-world networks? What are the effects of networks on our behavioral choices like quitting smoking or eating healthy? How do cascades in networks lead to outcomes like videos going viral? How does Google search the Internet and make money doing so? Debates issues around centrality in networks. Uses game theory to study strategic interactions in networks and markets. (Same as: DCS 2350)

Prerequisites: DCS 1100 or CSCI 1101 or CSCI 1103 (same as DCS 1300).

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

CSCI 2400 (a, MCSR) Artificial Intelligence

David Byrd.

Every Year. Fall 2022. Enrollment limit: 35.

Explores the principles and techniques involved in programming computers to do tasks that would require intelligence if people did them. State-space and heuristic search techniques, logic and other knowledge representations, reinforcement learning, neural networks, and other approaches are applied to a variety of problems with an emphasis on agent-based approaches.

Prerequisites: CSCI 2101.

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

CSCI 2500 (a) Computing, Ethics, and Society

Every Year. Enrollment limit: 16.

Explores ethical and moral case studies associated with advances in computing, artificial intelligence, and emerging technologies. An examination of various codes of ethics for computing professional societies and their limitations in addressing the complexity of evolving technologies is a central focus. Students investigate current issues using an interdisciplinary approach. Course topics include but are not limited to: net neutrality, information privacy and data harvesting, algorithmic bias, autonomous vehicles, intellectual property, networked communications, cybersecurity, government and privacy, workforce disruptions, and professional conduct in a diverse tech workplace. Course materials integrate foundational literature in the field of computer ethics, as well as contemporary sources of public dialogue regarding the ethical conduct of computing and technology development.

Previous terms offered: Fall 2018.

CSCI 2715 (a, MCSR) Human-Computer Interaction

Sarah Harmon.

Every Year. Spring 2023. Enrollment limit: 30.

How can we design technologies that result in positive and valuable (instead of ineffective and frustrating) experiences? Introduces key principles of user interface development by way of theory and hands-on practice. Topics include design principles (as informed by human perception and cognition) and prototyping techniques, as well as how to inspect and measure usability. Culminates in a final project, which is presented at the end of the term.

CSCI 3210 (a) Computational Game Theory

Every Year. Enrollment limit: 16.

Advanced algorithms course with a focus on game theory. Topics include computational complexity, linear programming, approximation algorithms, and algorithms for solving games. Game theory, also known as the mathematical theory of strategic interactions, rose to prominence due to its applicability to a variety of strategic scenarios ranging from markets and auctions to kidney exchanges to social influence. These scenarios often involve complex interactions in large-scale systems, giving rise to many computational questions, including: how algorithms for certain games are devised; how local interactions lead to global outcomes; how individual choices, such as selfishness, impact outcomes.

Prerequisites: CSCI 2200.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

CSCI 3250 (a) Computational Geometry

Laura Toma.

Every Year. Spring 2023. Enrollment limit: 22.

Computational Geometry refers to the study of geometric problems from a computational point of view, with focus on the design and analysis of algorithms for problems involving collections of points, lines and polygons. Computational Geometry emerged as a field driven by geometric problems in graphics and robotics, and its list of applications has continued to grow to areas such as pattern recognition, graph drawing, surface simplification and meshing, crystallography, molecular simulation, planning and autonomous vehicles. Class covers some of the basic concepts and fundamental geometric problems, such as: convex hulls, art gallery and visibility problems, geometric searching with range trees and kd-trees, intersection problems, proximity problems, point and polygon triangulation, and motion planning. Requirements include regular, programming-intensive projects.

Previous terms offered: Fall 2021.

CSCI 3300 (a) Computer Networks

Non-Standard Rotation. Enrollment limit: 16.

Computer networks are everywhere: e-mail, the Web, wireless networks, mobile devices, networked sensors, satellite communication, peer-to-peer applications. New applications based on networks appear constantly. Provides an introduction to the exciting field of computer networks by taking a top-down approach. Begins with an overview of computer networks, hardware and software components, the Internet, and the concept of protocols and layered service. Delves into details about the four main layers making up the computer network stack: Application (HTTP, FTP, e-mail, DNS, peer-to-peer applications and socket programming), Transport (TCP, UDP, and congestion control), Network (IP, routers, and routing algorithms) and Link Layer and Local Area Networks (medium access control, switches, and Ethernet). Also covers wireless and mobile networks (CDMA, WiFi, cellular internet access, mobile IP, and managing mobility).

Prerequisites: CSCI 2330.

Previous terms offered: Spring 2021, Fall 2019, Fall 2018.

CSCI 3310 (a) Operating Systems

Sean Barker.

Every Other Year. Fall 2022. Enrollment limit: 16.

Explores the design and implementation of computer operating systems, which provide a well-known, convenient, and efficient interface between user programs and the underlying computer hardware. The operating system is responsible for sharing resources such as processors, memory, and disks, as well as providing common services needed by many different programs. Topics include process and thread management, synchronization and concurrency, memory management, I/O and file systems, and virtual machines. Intensive programming projects involve implementing key components of operating systems and provide exposure to design principles used in many different types of computer systems.

Prerequisites: CSCI 2330.

Previous terms offered: Spring 2021.

CSCI 3325 (a) Distributed Systems

Every Other Year. Enrollment limit: 16.

Studies the key design principles and implementation challenges of distributed systems, which are collections of independent, networked machines functioning as single systems. Topics include networking and communication protocols, naming, synchronization, consistency and replication, fault tolerance, and security. Students gain exposure to real-world distributed systems through programming-intensive projects, as well as critiques of research papers covering a variety of real-world systems ranging from the Internet to file systems.

Prerequisites: CSCI 2330.

Previous terms offered: Spring 2022, Spring 2019.

CSCI 3400 (a) Cognitive Architecture

Eric Chown.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Advances in computer science, psychology, and neuroscience have shown that humans process information in ways that are very different from those used by computers. Explores the architecture and mechanisms that the human brain uses to process information. In many cases, these mechanisms are contrasted with their counterparts in traditional computer design. A central focus is to discern when the human cognitive architecture works well, when it performs poorly, and why. Conceptually oriented, drawing ideas from computer science, psychology, and neuroscience. No programming experience necessary. (Same as: DCS 3400)

Prerequisites: CSCI 2101 or BIOL 2135 or PSYC 2040 or PSYC 2740.

Previous terms offered: Spring 2019.

CSCI 3420 (a) Optimization and Uncertainty

Every Other Year. Enrollment limit: 16.

Optimization problems and the need to cope with uncertainty arise frequently in the real world. A numeric framework, rather than the symbolic one of traditional artificial intelligence, is useful for expressing such problems. In addition to providing a way of dealing with uncertainty, this approach sometimes permits performance guarantees for algorithms. Topics include constraint satisfaction, systematic and non-systematic search techniques, probabilistic inference and planning, and population-based optimization techniques (e.g., genetic algorithms and ant colony optimization). Formerly Computer Science 3425.

Prerequisites: CSCI 2101.

Previous terms offered: Fall 2021, Spring 2020.

CSCI 3445 (a) Nature-Inspired Computation

Every Other Year. Enrollment limit: 16.

The size and complexity of real-world optimization problems can make it difficult to find optimal solutions in an acceptable amount of time. Researchers have turned to nature for inspiration in developing techniques that can find high-quality solutions in a reasonable amount of time; the resulting algorithms have been applied successfully to a wide range of optimization problems. Covers the most widely used algorithms, exploring their natural inspiration, their structure and effectiveness, and applications. Topics drawn from: genetic algorithms, particle swarm optimization, ant colony optimization, honeybee algorithms, immune system algorithms, and bacteria optimization algorithms. Requirements include labs, programming assignments, and a larger final project.

Prerequisites: CSCI 2101.

Previous terms offered: Spring 2022, Spring 2021, Fall 2019, Fall 2018.

CSCI 3465 (a, MCSR) Financial Machine Learning

David Byrd.

Every Spring. Spring 2023. Enrollment limit: 16.

Machine learning (ML) is the study of computer programs that can autonomously improve performance by exposure to additional data, and it is increasingly central to financial research and the finance industry. Both established firms and “FinTech” startups use ML to determine creditworthiness, allocate investment resources, and predict the future of company, sector, or national equities. These efforts raise interesting technical and ethical questions. Course content is divided between advanced technical topics like deep neural networks, deep reinforcement learning, and multi-agent simulation, and financial topics like the efficient markets hypothesis, capital assets pricing model, and mean-variance portfolio optimization. Emphasis is on empirical machine learning applied to financial topics, careful analysis of the results, and the need for responsible approaches to ML. Programming-heavy, project-heavy course. Strong CS background is needed. No prior finance knowledge is expected.

Prerequisites: CSCI 2400.

Previous terms offered: Spring 2022.

CSCI 3725 (a) Computational Creativity

Sarah Harmon.

Every Year. Fall 2022. Enrollment limit: 16.

Introduces theoretical foundations of modeling and evaluating creativity. Students learn techniques to assess creative systems and implement, analyze, and extend algorithms relevant to the latest state of the art. Special topics may include augmented creativity, hybrid systems, narrative intelligence, and algorithmic composition. Culminates in a final report that describes a novel creative technique or framework.

Prerequisites: CSCI 2101.

Previous terms offered: Spring 2021, Fall 2020, Fall 2019, Fall 2018.

Digital and Computational Studies

Overview & Learning Goals

Overview

Digital and computational studies (DCS) is “computation in context”—a focus on digital objects (e.g., a computer program) that exist in digital environments. Analysis includes:

- **Artifacts:** objects of study, which are shared with many fields in the liberal arts. The questions explored include asking how digital objects are interpreted in physical, social, historical, and cultural contexts.
- **Architectures:** the infrastructures that give rise to the objects, their use, or their study, which are also shared with other fields. The questions explored include consideration of the consequences of these associated infrastructures, data, technology, and labor for understanding the object.
- **Abstractions:** the models built and theories tested through those models. The questions explored include asking what different models reveal about objects and what common ground exists between different fields that use those models.
- **Agency:** interpretation and decision-making. The questions explored include examination of how computation or the existence of a digital object shape who can make decisions, how results are interpreted, or how empowerment to act or express knowledge are influenced under the above conditions.
- **Accountability:** consequences and responsibility. An evaluative and critical exploration of ethical considerations of artifacts and the unintended outcomes of their deployment.

Objects are not merely analyzed—they are also created. A significant part of the student experience in DCS is collaborative and creative across fields of expertise. This creation can connect with virtually any discipline on campus.

Learning Goals

1. Ability to apply digital and computational techniques to at least one other discipline and work on at least one large project that does this directly
2. Ability to recognize, identify, and analyze the social and ethical issues that arise from the use and creation of digital artifacts in society
3. Ability to think critically about digital artifacts—interpreting them as image, code, and/or narrative
4. Ability to examine the relationship between digital artifacts and the physical, emotional, social, civic, ethical, political, and economic aspects of the people who interact with them
5. Ability to examine the histories of and consequences for using digital artifacts with regard to their associated infrastructure, data, technology, and labor
6. Ability to examine the actions and reactions involving digital artifacts, as well as the artifacts and architecture they engender
 - To critically assess data, including how it was gathered and the practical (social and ethical) implications of its use
 - To assess whether a given method of inquiry is appropriate to address a research question
 - To engage with questions drawn from different disciplines across the liberal arts through digital and computational methods

- To engage each of the following areas, but to get a deeper experience with at least one:
 - To understand the basic structures and limitations of computer programs
 - To understand the basic techniques and limitations of computational text analysis
 - To understand the basic techniques and limitations of network analysis
 - To understand the basic techniques and limitations of digital mapping
- To work collaboratively and communicate across disciplines
- To research, write, and present within multiple disciplines using a combination of traditional and digital techniques and artifacts

Options for Majoring or Minorin in the Program

Students may elect to coordinate a major in digital and computational studies with any other department/program major. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in digital and computational studies.

Program Website (<https://www.bowdoin.edu/digital-and-computational-studies/>)

Faculty

Crystal Hall, Program Director
Tammis L. Donovan, Program Coordinator

Professor: Eric L. Chown
Associate Professors: Crystal Hall, Mohammad Irfan (Computer Science)‡
Assistant Professor: Fernando Nascimento
Adjunct Lecturer: Aaron Gilbreath (spring semester)

Faculty/Staff Website (<https://www.bowdoin.edu/digital-and-computational-studies/faculty-and-staff/>)

Requirements
Digital and Computational Studies
Coordinate Major

Students coordinate their study of digital and computational studies (DCS) with any department/program at Bowdoin that offers a major. To satisfy the requirements for the coordinate major in DCS, students must complete the eight credits detailed below as well as the major requirements within their coordinated department/program.

Code	Title	Credits
Required Courses:		
DCS 1100	Introduction to Digital and Computational Studies	1
DCS 2450	Technology and the Common Good	1
DCS 3998	Capstone Design ^a	1
DCS 3999	Capstone Implementation ^a	1
Select one of the following:		1
DCS 2335	GIS and Remote Sensing: Understanding Place	
DCS 2350	Social and Economic Networks	
DCS 2470	Artificial Intelligence in the World	
DCS 2500	Digital Text Analysis	
Select three more DCS courses of your choice. ^b		3

- a This is a yearlong culminating course sequence providing an opportunity for a research project that combines the student’s coordinated disciplinary major with DCS.
- b These three DCS courses should intentionally connect to the coursework in the student’s coordinated major discipline to foster exploration of their complementary nature and must be selected in consultation with a faculty advisor in the Digital and Computational Studies Program. With prior approval from the program director, courses offered outside of DCS may be used to fulfill this requirement.

Digital and Computational Studies Minor

Code	Title	Credits
DCS 1100	Introduction to Digital and Computational Studies	1
Four other courses in DCS, at least three of which should be at the 2000 level or above		4

Additional Information

- Courses count toward the major or minor if grades of C- or better are earned.
- One course taken with the Credit/D/Fail grading option may count toward the major or minor as long as a CR (credit) grade is earned.
- One first-year writing seminar may count toward the major or minor.
- A maximum of two independent studies can count toward the major at either the intermediate or advanced level. Independent studies do not count toward the minor.
- The director of digital and computational studies works with students to discuss double-counting cross-listed courses with other departments or programs.
- With prior approval, two courses from a one-semester study-away program may be counted toward the major; three courses may be counted toward the major from a yearlong program. One course from a one-semester study-away program may be counted toward the minor.

Information for Incoming Students (p. 152)

Digital and Computational Studies addresses topics that span disciplines across campus, uniting them through computational thinking, data analysis, critique of digital objects, and creative problem solving. In particular, computation is not presented merely as a technique to be exploited, but as an object of study with corresponding strengths and weaknesses. Students in DCS classes have the opportunity to work on digital projects, many of them in collaboration with other students.

The following courses are open to first year students and count toward the requirements for the DCS coordinate major or minor: DCS 1100 Introduction to Digital and Computational Studies, offered every fall, and DCS 1500 Understanding and Deploying Computational Methods. The latter requires completion of DCS 1100 Introduction to Digital and Computational Studies as a prerequisite and will be open to first-year students in the spring.

The following courses, when offered, are also open to first year students and count toward electives for the DCS coordinate major or minor: DCS 1020 How to Read a Million Books and HIST 1024 Serious Games: Critical Play for History, both first-year writing seminars, and PHIL 1336 Ethics for a Digital World.

All of these courses assume no background in any of the subjects covered, ranging from humanities, social sciences, computer science, and

mathematics. Several DCS courses are cross-listed with other disciplines. They may be open to first year students, and may count as electives.

Courses

DCS 1020 (c) How to Read a Million Books

Crystal Hall.

Every Other Fall. Fall 2022. Enrollment limit: 16.

Confronts the challenges of having too many things to read and limited attention spans to persuade someone that a written interpretation is valid. Explores different methods of reading (i.e. close, surface, text mining, thematic) at different scales, from 1 book to millions of data points from Bowdoin's library collections. Activities evaluate both the process and rationale for different reading and writing methods. Assumes no knowledge of programming.

Previous terms offered: Spring 2021, Fall 2020, Fall 2019, Fall 2018.

DCS 1024 (c, FYS) Serious Games: Critical Play for History

Non-Standard Rotation. Enrollment limit: 16.

Did you know that Monopoly began life a game that criticized modern capitalism? Have you ever wondered what sense it makes that in Sid Meier's Civilization, Abraham Lincoln can found the American tribe in 4,000 BCE? This course explores how commercial video and board games can help us understand the past. In return, understanding something about how the discipline of history works will help us think about games as representations of the past. Games to be studied and played may include: Catan, Diplomacy, Monopoly, Sid Meier's Civilization V, Spirit Island, and Twilight Struggle. Students should expect to complete four structured writing assignments and several shorter writing assignments. The course includes a weekly evening game lab. Note: This course is part of the following field(s) of study: US. (Same as: HIST 1024)

Previous terms offered: Fall 2019.

DCS 1025 (c) Digital Games and History

Patrick Rael.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

This first-year writing seminar explores how digital games represent the past. We begin by focusing on the emergence of digital culture in recent decades, seeking to understand the role electronic simulations play in our lives. We move on to exploring the representation of history in commercial video games, from Sid Meier's Civilization series, to Assassin's Creed IV: Black Flag. Why are video games such a popular way of depicting past events? What constraints does the digital game format impose on these representations? How are these constraints conditioned by the nature of these games as commercial products sold in a global marketplace? Finally, how should we approach some games' representation of difficult histories—those that may involve war, colonialism, and racism? Along the way, we will learn how to access campus information sources, use intellectual property responsibly, and write essays for the college level. This course includes a weekly required evening lab for dedicated gaming time and film screenings. (Same as: HIST 1025)

DCS 1100 (c, MCSR) Introduction to Digital and Computational Studies

Fernando Nasc; Eric Chown.

Every Fall. Fall 2022; Spring 2023. Enrollment limit: 35.

Examines the impact of digital artifacts, networked interaction, and computational analysis on the ways in which we establish new knowledge, engage in creative and social practices, and understand the self. Studies how the combination of large-scale digital data and computational modeling methods shape our agency as decision-makers. Emphasis on how the Liberal Arts shape and are shaped by these processes. Coursework includes quantitative analysis, machine learning, text and network analysis, critical readings in the field, and short, exploratory projects. Assumes no knowledge of programming or any software that will be used.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Fall 2019, Fall 2018.

DCS 1200 (MCSR) Data Driven Societies

Every Spring. Enrollment limit: 35.

What sorts of questions can and should be answered using digital and computational methods? How can such methods in conjunction with data can reveal new insights and questions about the world? How do we construct models to help us better understand social phenomena? Covers topics such as data gathering, validation, analysis, and presentation, as well as statistics and programming. Provides substantive experience in digital and computational methods, and a critical lens for understanding and evaluating what computers can (and cannot) bring to the study of our world.

Previous terms offered: Spring 2020, Spring 2019.

DCS 1209 (b, DPI, MCSR) Using "Big Data" to Investigate and Suggest Solutions to Economic and Social Problems

Erik Nelson.

Non-Standard Rotation. Fall 2022. Enrollment limit: 20.

Students will use "big data" to understand and address some of the most important social and economic problems of our time. The course will give students an introduction to cutting edge research and policy applications in economics in a non-technical manner that does not require prior coursework in economics or statistics, making it suitable both for students exploring economics for the first time, and for more advanced students who are interested in the class's topics. Social and economic problems that we will cover include equality of opportunity, education, racial disparities, criminal justice, labor market participation, entrepreneurship, health care and public health, the opioid crisis, climate change, and environmental justice. In the context of these topics, the course will also provide an introduction to basic methods in data science, including regression, causal inference, and machine learning. Students will use software packages R, Stata, Arc GIS, and Excel. (Same as: ECON 1099)

DCS 1300 (a, MCSR) Programming with Data

Kai Presler-Marshall.

Every Fall. Fall 2022. Enrollment limit: 30.

Intended for students with some programming experience, but not enough to move directly into Data Structures. An accelerated introduction to the art of problem solving using the computer and the Python programming language. Weekly labs and programming assignments focus on "big data" and its impact on the world. (Same as: CSCI 1103)

Prerequisites: CSCI 1055 or DCS 1100 or DCS 1200 or Placement in above CSCI 1101.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

DCS 1500 (MCSR) Understanding and Deploying Computational Methods

Eric Chown.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 50.

Computational tools, including programming, are increasingly important across the liberal arts. Such tools, however, cannot be effectively created or used without a fundamental understanding of computation. This course provides a foundation for the use of these tools in conjunction with the critical framework of DCS. A major goal of the course is to teach introductory programming, but with a focus on how programming can be used to complement and even to implement methodologies including text analysis, network analysis, GIS and visualization. Students will use these methods in the service of critically engaging with data. E.g., where computer science focuses mainly on problem solving, this course is fundamentally about exploration and often problem discovery. No prior programming knowledge is required.

Prerequisites: DCS 1100.

DCS 1650 (c) Ethics for a Digital World

Aliosha Barranco Lopez.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Digital technologies make our lives easier in many ways—e.g., we can communicate with others around the world, we can order devices to play music, we can get instant directions to go basically anywhere! But is there any ethical cost to enjoying the benefits that come from these types of technologies? This course investigates a variety of ethical issues arising from and connected with digital technology. Topics covered might include privacy and big data, algorithmic bias, surveillance capitalism, social media and mental manipulation, fake news, internet shaming, and the moral status of superintelligence. (Same as: PHIL 1336)

DCS 2100 (c, IP) Digital Florence

Every Other Spring. Enrollment limit: 35.

Asks what a digital representation of a city could and should be, particularly in a moment when travel is limited, using Florence, Italy as a case study. Examines digital image, text, and spatial data about the city, juxtaposing it against non-digital primary sources, secondary critical readings, reflections on experiences of urban and other spaces, and data that we will create in class. Emphasizes shifting definitions across time, language, and digital artifacts of what and who is Florentine in these representations. Coursework happens in three phases: going "under the hood" of the popular digital artifacts that provide an experience of Florence in order to evaluate strengths and weaknesses of representation; expanding our definition of Digital Florence to find local perspectives on what the essential features of the city could be; and proposing a digital intervention that better reflects the values we have identified throughout the semester. Assumes no programming knowledge. Taught in English. (Same as: ITAL 2100, URBS 2100)

Previous terms offered: Spring 2022.

DCS 2272 (b, DPI, IP) Digital Media and Society

Shruti Devgan.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Explores how digital media construct societies and cultures, and in turn how social institutions, interactions, and identities get reflected in/through digital media. Draws from multiple socio-cultural contexts to take a global and transnational approach to understand sociological themes such as self, social interaction, and community; social control and surveillance; constructions of gender, sexuality, race, social class, and religion; generations; transnational migration; emotional/affective labor; and social movements and change. Challenges binary dystopian and utopian representations of digital media to cultivate a more nuanced understanding. (Same as: SOC 2272)

Prerequisites: SOC 1101.

DCS 2310 (a) Big Data in Astrophysics and Cosmology

Non-Standard Rotation. Enrollment limit: 18.

Astronomy has been transformed in recent years by the open availability of large data sets. This course uses several astronomical "case studies" to introduce methods and computational tools for analysis of data, after which students will design, complete, and present an astronomical data analysis project of their own. Students will examine the abilities and limitations of these methods, and their impact on the types of questions we can answer and who has access to research. Possible topics include but are not limited to: using galaxy surveys to find large-scale structure in the universe, finding and characterizing exoplanets or binary star systems from light curves, or using supernova data to estimate cosmological parameters. Computation is an important part of the course, but programming experience is not required. (Same as: PHYS 2310)

Prerequisites: PHYS 1130 or PHYS 1510.

Previous terms offered: Spring 2021.

DCS 2331 (b, MCSR) The Nature of Data: Introduction to Environmental Analysis

Every Spring. Enrollment limit: 20.

Examines emerging digital techniques in environmental management and analysis within government, academic, and media sectors. Provides an overview of social science methods including analysis of qualitative data, text analysis, spatial analysis, survey design and analysis, and social network analysis. Topics include collaborative resource management, leveraging the power of social networks, spatial analysis, social-ecological system management, the role of volunteered information and citizen science, and expanding capacities for adaptation and resilience. Labs as part of class time provide students exposure to standard software programs used in social science research, including NVivo, ArcGIS, and Gephi and introduce the basics of R as a programming language for text analysis, and spatial analysis. (Same as: ENVS 2331)

Previous terms offered: Fall 2020, Spring 2020.

DCS 2335 (a, MCSR) GIS and Remote Sensing: Understanding Place

Eileen Sylvan Johnson.

Every Year. Fall 2022. Enrollment limit: 20.

Geographical information systems (GIS) organize and store spatial information for geographical presentation and analysis. They allow rapid development of high-quality maps and enable powerful and sophisticated investigation of spatial patterns and interrelationships. Introduces concepts of cartography, database management, remote sensing, and spatial analysis. Examines GIS and remote sensing applications for natural resource management, environmental health, and monitoring and preparing for the impacts of climate change from the Arctic to local-level systems. Emphasizes both natural and social science applications through a variety of applied exercises and problems culminating in a semester project that addresses a specific environmental application. Students have the option of completing a community-based project. (Same as: ENVS 2004, URBS 2004)

Previous terms offered: Fall 2021, Spring 2021, Spring 2020, Spring 2019.

DCS 2340 (b, MCSR) Building Resilient Communities

Eileen Sylvan Johnson.

Every Year. Spring 2023. Enrollment limit: 20.

Explores approaches by communities and regions to build resilience in the face of changing environmental and social conditions. Examines the ways communities establish policies and collaborate with state, federal, private and nonprofit sectors towards strengthening local economies, safeguarding environmental values, protecting public health, addressing issues of economic and social justice, and implementing mitigation and adaptation strategies. Provides students with firsthand understanding of how digital and computational technologies including Geographic Information Systems (GIS) are playing an increasingly important role in understanding and informing effective approaches for expanding resilience at a community level to inform policy decision. Students gain proficiency with GIS as part of the course. (Same as: ENVS 2301, URBS 2301)

Previous terms offered: Fall 2020.

DCS 2350 (a) Social and Economic Networks

Non-Standard Rotation. Enrollment limit: 22.

Examines the social and economic aspects of today's connected world from a multitude of perspectives; namely, network science, computer science, sociology, and economics. The fundamental questions to be addressed are: What are the properties of real-world networks? What are the effects of networks on our behavioral choices like quitting smoking or eating healthy? How do cascades in networks lead to outcomes like videos going viral? How does Google search the Internet and make money doing so? Debates issues around centrality in networks. Uses game theory to study strategic interactions in networks and markets. (Same as: CSCI 2350)

Prerequisites: DCS 1100 or CSCI 1101 or CSCI 1103 (same as DCS 1300).

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

DCS 2450 (c) Technology and the Common Good

Fernando Nasc.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

As the pace of technological change continues to accelerate, it raises questions about the impacts, positive and negative, on society. Will technology make our lives more comfortable and pleasant or will it destroy human society and lead us to a catastrophic ending? The answers largely depend on our ability to consider new technology advancements in light of desires to live good lives within just institutions. Students engage with topics of current relevance such as artificial intelligence, gene editing, virtual reality, robotics, and the internet of things. Discusses the underlying technological aspects of each and the possible implications for society. Students apply philosophical and ethical concepts and frameworks to consider how technology can become a positive force for the common good and debate possible ways to evaluate and avoid undesirable effects of current and future technologies. No prior programming experience required.

Prerequisites: DCS 1100.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

DCS 2460 (c, MCSR) Smart Phones, Mobile Selves

Fernando Nasc.

Every Fall. Fall 2022. Enrollment limit: 35.

Mobile Devices are increasingly present in our lives. More and more "smart," they transform how we communicate, access information, experience our physical spaces, create and maintain friendships, monitor our health, and have fun. In this course, we will critically consider the consequences of these technological artifacts for how we define our personal identities, our interpersonal relationships, and the organization of our societies. In order to deepen our discussions, within the experiential context of DCS, we will learn how the software of mobile devices is structured, how they communicate with each other, with local sensors and other wearable devices. We will also study the physical and social architectures that connect our mobile experiences, including how they are likely to change in the coming years and their possible implications. This course does not require any prior knowledge in computer science or mobile communications.

Prerequisites: DCS 1100 or DCS 1200.

Previous terms offered: Fall 2020.

DCS 2470 Artificial Intelligence in the World

Every Spring. Enrollment limit: 35.

Artificial Intelligence (AI) is changing the world. It is being widely deployed by governments, police forces, and businesses. AI algorithms are touted as being without bias, and claims are made that AI regularly outperforms humans on a wide variety of tasks. The truth is far more complex. In this class, we will examine the systems being deployed in the world, the algorithms behind them, and their impact on the world. In particular, we will focus on the relationship between the data used by AI systems and their performance. Special attention will be paid to machine learning systems and students will engage in project-based machine learning activities.

Prerequisites: DCS 1100.

Previous terms offered: Spring 2020.

DCS 2500 (MCSR) Digital Text Analysis

Crystal Hall.

Every Year. Spring 2023. Enrollment limit: 35.

Explores how digital techniques can enhance our understanding of text. Investigates how to make sense of the burgeoning number of textual sources in a timely manner and what new questions can be raised and answered by computer-based text analysis. Students learn to apply tools for analyzing large texts to problems drawn from areas throughout the liberal arts, such as psychology, philosophy, and literature. In addition, students address questions ranging from authorship of Supreme Court opinions, to using thirty years of newspapers to reexamine historical questions, to interpreting Raphael's masterpiece "School of Athens" through an analysis of Aristotle's and Plato's works. While doing so they also study the strengths and weaknesses of these approaches. No previous computer programming experience is required.

Previous terms offered: Fall 2021, Spring 2020, Spring 2019.

DCS 2550 (b, MCSR) Mapping American History using Geographic Information Systems (GIS)

Non-Standard Rotation. Enrollment limit: 16.

In this intermediate seminar we will use Geographic Information Systems to explore historical problems in 19th-century US history. We will introduce and practice basic statistical techniques, and use the class GIS database to investigate problems, construct our own historical datasets, and make our own maps. Class projects will challenge students to develop critical thinking skills in historical and computational methods, and practice effective data presentation. We will work with a wide array of history data, including information on race, ethnicity, gender, religion, agriculture, slavery, and voting behavior in the period in question. Throughout, we will probe the possibilities and limitations of GIS as a digital technology and methodological approach to historical analysis. This course is part of the following field(s) of study: United States. (Same as: HIST 2625)

Prerequisites: HIST 1000 - 2969 or HIST 3000 or higher.

Previous terms offered: Fall 2021, Fall 2020.

DCS 2640 (c, VPA) Interactivity, Computation, and Media Architecture

Non-Standard Rotation. Enrollment limit: 18.

The use of media architecture has become an increasingly common way to engage with our surroundings. Explores how embedded computation affects the way the built environment is experienced. Students consider how digital media is changing notions of place and how we interact with and learn about it. Through short- and long-term projects, students explore how to design and prototype computationally driven experiences, which are embedded into architectural spaces. Reading and writing assignments enhance skills in questioning new media and guide consideration of issues surrounding privacy, surveillance, the digital city, geography of cyberspace, representation and identity, technology in the new global economy, space, and audience. Using the graphical programming language Max, students work with data to alter environments using light, sound, and projection and create digital installations. No previous experience with programming is required.

Prerequisites: DCS 1000 - 2969 or DCS 3000 or higher or CSCI 1000 - 2969 or CSCI 3000 or higher.

Previous terms offered: Fall 2019, Fall 2018.

DCS 2645 (VPA) Filmmaking and Born-Digital Storytelling

Non-Standard Rotation. Enrollment limit: 18.

Considers filmmaking in a networked world, as well as the cultural implications of new technologies. Students will create innovative, internet-based films that engage in the changing digital landscape of ubiquitous computing. Students will learn the basics of film production, including digital camera operation, sound recording, lighting, nonlinear editing, basic compositing, and green screen—tools needed to create compelling films, interactive videos, VR and AR experiences, and innovative transmedia projects. Additionally, students will study the history and proliferation of cinema engaged with digital technologies and the internet. (Same as: CINE 2645)

Prerequisites: DCS 1000 - 2969 or DCS 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Spring 2021, Fall 2019.

DCS 2650 (VPA) Art, Technology, and Design for Social Change

Every Other Spring. Enrollment limit: 18.

Both individually and collaboratively, students create public art projects and tools that engage in cultural critique utilizing digital tools, computational methods, and design thinking. Students explore firsthand the intersection of design, technological innovation, and art across multiple disciplines. Discussions, projects, and readings examine various aspects of social change including queer and feminist activist practices, new media theory, data as material, emerging data visualization forms, art for and from networks, critical design for community engagement, and artistic interventions in public spaces.

Previous terms offered: Spring 2019.

DCS 2800 (DPI) Digital Privilege

Every Other Fall. Enrollment limit: 35.

The promise of the internet was that it was a world without "prejudice or privilege". Instead it has exacerbated the elements of privilege already prominent in society. This course examines issues of privilege in digital environments both through the lens of algorithms and through interactions with others, with a particular emphasis on social media. The course begins with an examination of supportive environments, the consequences when the supportive components fail, and the roots of those failures. We will then use that perspective to look at digital environments, examining different forms of privilege, including race, gender, age, and class among others to show how the digital environment often makes issues around privilege worse rather than better. Meanwhile, many groups are simply unable to take advantage of the digital world at all. Work for the course will consist of a series of short papers and a culminating project that takes on one form of privilege in more detail.

Prerequisites: DCS 1100 or DCS 1200.

Previous terms offered: Fall 2021.

DCS 3012 (c, IP) Informatica Umanistica and Digital Humanities

Crystal Hall.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

This course asks how different computational text analysis can be in two cultural environments: the digital humanities as practiced in the US and informatica umanistica in Italy. Our case study for texts to study will be Italian epic poetry of the Renaissance, the equivalent of today's Marvel comic universe in terms of range of characters, complexity of plotlines, action sequences, humor, popularity, and fan-fiction spinoffs. We will draw on the multiple language backgrounds of all students in the course and the combined skills of advanced students in DCS and Italian. We will practice collaborative, iterative research development around the geographies, networks, and textual features of our texts. Activities will include discussion, hands-on use of digital tools, assigned readings, and a culminating project.

DCS 3030 (c) Site-Specifics: Production of Socially Engaged Media

Non-Standard Rotation. Enrollment limit: 18.

Guided Independent Studio Practice. Students gain an understanding of how digital media technologies can serve as tools for creative cultural practice through the production of site-specific, socially engaged video, sound, and new media artworks. Site visits and meetings with community organizations will contribute to the development of works distributed and displayed through mobile devices, projection, installation and online platforms. Lectures, readings, and discussions provide a historical overview of the intersection of site-specificity and community-based sound and video works. Students develop technical skills in camerawork, lighting, audio recording, and editing, and are introduced to video and sound artists who consider race, class, gender, sexuality, labor and environmental politics. (Same as: VART 3030)

Prerequisites: VART 1000 - 1999.

Previous terms offered: Spring 2019.

DCS 3301 (b, DPI, MCSR) Putting Inequality on the Map: Analyzing Inequality with Geographic Information Systems

Aaron Gilbreath.

Non-Standard Rotation. Spring 2023. Enrollment limit: 20.

Course uses Geographic Information Systems (GIS) and R statistical software to analyze issues of inequality in the United States. Investigates the roles of maps and mapping technology in creating and reinforcing racial and economic inequality. Readings will contextualize these methods in the fields of economics, environmental studies, and sociology. Topics include environmental justice, segregation and housing policy, educational inequalities, crime and policing. Students will learn data management and statistical techniques using R, and mapping and spatial analysis using GIS. Students will produce independent projects at the end of the semester.

DCS 3350 (a, MCSR) Contagion

Every Spring. Enrollment limit: 16.

Project-based advanced networks course. Investigates how the historic perspective of contagion has inspired its expansive contemporary view, ranging from interventions in epidemics to diffusion in social networks to network effects on behavioral aspects like smoking, obesity, and happiness. Studies various network models and their properties. Programming projects involve implementation of network models and applying these models to large-scale, real-world networks with millions of agents, with a particular focus on critically assessing the models and algorithms using computational thinking. Projects also involve creating computer simulations to study models of residential segregation by race. Takes a critical view of the implications of various predictive algorithms, including techniques for disease prediction.

Prerequisites: DCS 1100 or CSCI 1101 or CSCI 1103 (same as DCS 1300).

Previous terms offered: Spring 2021, Spring 2020.

DCS 3400 (a) Cognitive Architecture

Eric Chown.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Advances in computer science, psychology, and neuroscience have shown that humans process information in ways that are very different from those used by computers. Explores the architecture and mechanisms that the human brain uses to process information. In many cases, these mechanisms are contrasted with their counterparts in traditional computer design. A central focus is to discern when the human cognitive architecture works well, when it performs poorly, and why. Conceptually oriented, drawing ideas from computer science, psychology, and neuroscience. No programming experience necessary. (Same as: CSCI 3400)

Prerequisites: CSCI 2101 or BIOL 2135 or PSYC 2040 or PSYC 2740.

Previous terms offered: Spring 2019.

DCS 3450 Cognition in Analog and Digital Environments

Every Fall. Enrollment limit: 16.

Human cognition was shaped by an environment unlike the one we live in today. The human capacity for perception and thought are not neutral; rather, they are attuned to the physical world in which the mind evolved. The digital world presents the mind with a very different environment, one in which the human capacity to effectively process information is often stretched to its limit. Meanwhile, large corporations are using psychology, AI, and machine learning in order to more effectively capture and keep our attention. This course examines the relationship of cognition to the environment, whether it be analog or digital, and focuses on the unusual challenges to cognition that come from operating in today's digital world.

Prerequisites: DCS 1100 or DCS 1200.

Previous terms offered: Spring 2022, Fall 2019.

DCS 3900 DCS Capstone Implementation and Design

Crystal Hall.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Provides a culminating experience allowing students to connect DCS to their other chosen discipline. Guided development and implementation of data creation, methodology evaluation, contextualization of topic and results in scholarly conversations, and translation of results and implications across digital media. Students can combine the course units into a single, unifying research project or propose alternative assignments that demonstrate DCS analytical skills and connections across core DCS topics. Assigned readings will address themes in interdisciplinary research, weekly activities will focus on developing best practices, and all work will have opportunities for peer review throughout the semester.

Prerequisites: Two of: DCS 1100 and DCS 2450.

DCS 3998 Capstone Design

Every Fall. Enrollment limit: 16.

Guided development of the outline and proposal for the DCS senior coordinate major project. Concentrates on evaluating methodologies appropriate to the topic, developing a data set along with biography and management plan, practicing iterative project design, and establishing a foundational and interdisciplinary research bibliography. Assigned readings will address best practices in the field for starting and maintaining long-term projects; weekly activities will focus on developing the scholarly rationale for project design choices and presenting updates; and proposal components will have an opportunity for peer review throughout the semester.

Prerequisites: DCS 1100.

Previous terms offered: Fall 2021.

DCS 3999 Capstone Implementation

Every Spring. Enrollment limit: 18.

Guided independent implementation of the DCS senior coordinate major project. Concentrates on contextualization of methods and results, articulation of critical analysis, evaluation of possible project expansion or next steps, and presentation of the final outcome(s). Assigned readings will focus on interdisciplinary research models; weekly activities will engage with the scholarly communities represented by the project; and project components will have an opportunity for peer review throughout the semester.

Prerequisites: DCS 3998.

Previous terms offered: Spring 2022, Spring 2021.

Earth and Oceanographic Science

Overview & Learning Goals

Overview

Faculty and students in the Department of Earth and Oceanographic Science (EOS) at Bowdoin investigate fundamental questions about our planet's past, present, and future. We sample rocks, sediments, and shells to reconstruct Earth's geologic history and past climates; collect water and deploy sensors to discern patterns in properties and processes in the Ocean; and use satellites and scanning electron microscopes to study Earth's systems, from global to microscopic scales. From tracking how a harmful algal bloom develops along a coastline to learning how supervolcanoes form deep within Earth, studies in EOS open up a world of possibilities.

Learning Goals

EOS majors:

1. Gain fluency within and ability to integrate among earth systems by focusing on surface earth processes, solid earth processes, and oceans
2. Observe records and interpret processes in time and space
 - a. from the surface of Earth to the core
 - b. from atomic to global spatial scales
 - c. from instantaneous to billion-year time scales
3. Describe components and their relationships and behaviors within systems (e.g., pools, flows, and feedbacks)
4. Recognize and communicate the connections between earth systems and society, including human impacts on Earth, natural hazards, and Earth's resources
5. Learn and apply EOS methods, including:
 - a. Asking questions/defining hypotheses
 - b. Making field- and laboratory-based observations
 - c. Collecting and analyzing data
 - d. Mapping
 - e. Graphing
 - f. Modeling
 - g. Understanding uncertainty
 - h. Reading and synthesizing literature
 - i. Communicating: writing/presentation
6. Transition from guided to self-driven and reflective learning

7. Work collaboratively with peers with varied backgrounds and skill sets

Options for Majoring or Minor in the Department

Students may elect to major in earth and oceanographic science or to coordinate a major in earth and oceanographic science with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in earth and oceanographic science.

Department Website (<https://www.bowdoin.edu/earth-oceanographic-science/>)

Faculty

Emily M. Peterman, *Department Chair*

Bridget Spaeth, *Department Coordinator*

Professors: Rachel J. Beane, Philip Camill (Environmental Studies), Collin S. Roesler

Associate Professors: Michèle G. LaVigne†, Emily M. Peterman

Visiting Faculty: Evan Dethier

Laboratory Instructors: Cathryn Field, Joanne Urquhart

Faculty/Staff Website (<https://www.bowdoin.edu/earth-oceanographic-science/faculty-and-staff/>)

Requirements

Earth and Oceanographic Science (EOS) Major

The major consists of ten courses.

Code	Title	Credits
Select one of the following:		1
EOS 1105	Introducing Earth	
EOS 1305	Environmental Geology and Hydrology	
EOS 1505	Oceanography	
Required courses:		3
EOS 2005	Biogeochemistry: An Analysis of Global Change	
Select two earth and oceanographic science electives at the intermediate (2000–2969) or advanced (3000–3999) level. ^a		
Select one of the following:		1
BIOL 1102	Biological Principles II	
BIOL 1109	Scientific Reasoning in Biology	
CHEM 1092	Introductory Chemistry and Quantitative Reasoning II	
CHEM 1102	Introductory Chemistry II	
CHEM 1109	General Chemistry	
CSCI 1101	Introduction to Computer Science	
MATH 1300	Biostatistics	
MATH 1400	Statistics in the Sciences	
MATH 1800	Multivariate Calculus	
MATH 1808	Biomathematics	
2000-level math course		
PHYS 1140	Introductory Physics II	
Select one Solid Earth course with a laboratory:		1
EOS 2105	Mineral Science	

EOS 2115 Volcanology

EOS 2125 Field Studies in Structural Geology

EOS 2145 The Plate Tectonics Revolution

EOS 2155 Geomechanics and Numerical Modeling

EOS 2165 Mountains to Trenches

EOS 2225 Structural Geology and Analysis

EOS 2375 Data Science and Hydrology

Select one Earth Surface Processes course with a laboratory: **1**

EOS 2335 Sedimentary Systems

EOS 2345 Geomorphology: Form and Process at the Earth's Surface

EOS 2365 Coastal Processes and Environments

Select one Oceans course with a laboratory: **1**

EOS 2525 Marine Biogeochemistry

EOS 2565 Coastal Oceanography

EOS 2585 Ocean and Climate

Select one research experience course: **1**

EOS 3115 Research in Mineral Science

EOS 3165 Research in Earth and Oceanographic Science: Topics in Petrotectonics

EOS 3515 Research in Oceanography: Topics in Paleooceanography

EOS 3525 Coastal Dynamics & Ecosystems

Select one senior seminar: **1**

EOS 3020 Earth Climate History

EOS 3140 Tectonics and Climate

- ^a One of these electives may be one of the following courses: BIOL 2319 Biology of Marine Organisms, BIOL 2325 Biodiversity Conservation Science, or CHEM 3050 Environmental Organic Chemistry; or CSCI 3225 GIS Algorithms and Data Structures; or ENVS 2004 GIS and Remote Sensing: Understanding Place; or ENVS 2331 The Nature of Data: Introduction to Environmental Analysis; or PHYS 2250 Physics of Solids, PHYS 2510 Astrophysics; or PHYS 2810 Atmospheric and Ocean Dynamics; or an approved off-campus study or summer field course comparable to a 2000-level or above EOS course at Bowdoin.

Earth and Oceanographic Science (EOS) Minor

The minor consists of five courses.

Code	Title	Credits
Required Courses		
EOS 2005	Biogeochemistry: An Analysis of Global Change	1
Select four additional courses meeting the following criteria: 4		
no more than one introductory course numbered 1100–1999		
at least two courses must be lab courses; and		
at least three courses must be at the 2000 level or above.		

Additional Information

Additional Information and Department Policies

- First-year writing seminars do not count toward the major or minor requirements.
- Only one course numbered 1100–1999 in EOS may be counted toward the major requirements.
- Students may opt to begin the major with EOS 2005 Biogeochemistry: An Analysis of Global Change having previously taken BIOL 1102 Biological Principles II or BIOL 1109 Scientific Reasoning in Biology; or CHEM 1092 Introductory Chemistry and Quantitative Reasoning II, CHEM 1102 Introductory Chemistry II, or CHEM 1109 General Chemistry. Such students may substitute an intermediate EOS laboratory course (2000–2969) or research experience course (EOS 3115 Research in Mineral Science, or EOS 3515 Research in Oceanography: Topics in Paleooceanography) for introductory EOS (1100–1999).
- Independent studies and honors projects do not count toward the major or minor requirements. Honors research requires two semesters of work. Additional details about honors are located here (<https://www.bowdoin.edu/earth-oceanographic-science/requirements/honors.html>).
- All courses counted toward the major or minor must be completed with a C- or better.
- Courses taken to fulfill major or minor requirements must be taken for regular letter grades (not Credit/D/Fail).
- Normally, one course taken at another college or university may be counted toward the EOS major requirements with departmental approval.
- Courses taken at other institutions or study away programs may not be counted toward the EOS minor.
- Students coordinating their EOS major with environmental studies may only double-count two cross-listed courses. Minors may double-count an unlimited number of cross-listed courses with another department or program.

Postgraduate Study

Students planning postgraduate study in EOS should note that they might present a stronger application if they take additional courses in the department and in the contributing sciences: biology, chemistry, computer science, mathematics, and physics. It is strongly advised that students consult with faculty on the design of their major and discuss the options of research projects through independent studies, fellowship-funded summer research, and honors projects.

Interdisciplinary Majors

Interdisciplinary majors at Bowdoin are distinct from the coordinate majors with digital and computational studies, education, and environmental studies. The department does not explicitly participate in formal interdisciplinary programs. However, the Departments of Earth and Oceanographic Science and Physics have identified major and minor pathways for students interested in majoring in EOS with an interest in physics (EOS major/physics minor), and students interested in majoring in physics with an EOS application (physics major/EOS minor). Students interested in an EOS major/physics minor with a focus in the solid earth discipline would be best served by selecting their optional physics courses from:

Code	Title	Credits
Solid Earth Discipline		
PHYS 2130	Electric Fields and Circuits	
PHYS 2150	Statistical Physics	
PHYS 2230	Modern Electronics	
PHYS 2250	Physics of Solids	
PHYS 2510	Astrophysics	
PHYS 3000	Methods of Theoretical Physics	
PHYS 3010	Methods of Experimental Physics	
PHYS 3020	Methods of Computational Physics	

Students interested in an EOS major/physics minor with a focus in the surface earth discipline would be best served by selecting their optional physics courses from:

Code	Title	Credits
Surface Earth Discipline		
PHYS 2130	Electric Fields and Circuits	
PHYS 2220	Engineering Physics	
PHYS 2230	Modern Electronics	
PHYS 2810	Atmospheric and Ocean Dynamics	
PHYS 3010	Methods of Experimental Physics	
PHYS 3020	Methods of Computational Physics	

Students interested in an EOS major/physics minor with a focus in the oceanography discipline would be best served by selecting their optional physics courses from:

Code	Title	Credits
Oceanography		
PHYS 2130	Electric Fields and Circuits	
PHYS 2150	Statistical Physics	
PHYS 2230	Modern Electronics	
PHYS 2240	Acoustics	
PHYS 2810	Atmospheric and Ocean Dynamics	
PHYS 3000	Methods of Theoretical Physics	
PHYS 3010	Methods of Experimental Physics	
PHYS 3020	Methods of Computational Physics	
PHYS 3120	Advanced Mechanics	
PHYS 3130	Electromagnetism	

Information for Incoming Students (p. 160)

Faculty and students in the Department of Earth and Oceanographic Science (EOS) at Bowdoin investigate fundamental questions about our planet’s past, present, and future. We sample rocks, sediments, and shells to reconstruct Earth’s geologic history and past climates; collect water and deploy sensors to discern patterns in properties and processes in the Ocean; and use satellites and scanning electron microscopes to study Earth’s systems, from global to microscopic scales. From tracking how a harmful algal bloom develops along a coastline to learning how supervolcanoes form deep within Earth, studies in EOS open up a world of possibilities.

EOS 1020 Archives of Earth: Past and Future is a recently developed first-year writing seminar that explores Earth’s vibrant history and considers our role in shaping the future of Earth.

EOS 1105 *Introducing Earth*, offered in the fall, is an introductory course aimed at first-year students. 20 seats are reserved for first-year students. The Earth is a dynamic system that has been shaped in part by geologic processes (ex: earthquakes, volcanic activity, mountain building). Classes and weekly laboratories introduce students to Earth and plate tectonics through accessible field experiences along the Maine coast, rock and mineral specimens, images and models.

EOS 1505 *Oceanography*, offered in the spring, is an introductory course cross-listed with environmental studies. Registration priority is given to first-year students. Topics include: tectonic evolution of the ocean basins; the record of ocean history preserved in deep-sea sediments; global ocean circulation, waves, and tides; ocean ecosystems; the ocean's role in climate change. Classes and weekly labs examine these principles in the setting of Casco Bay and the Gulf of Maine.

Other useful information

No placement tests are required for EOS courses. EOS is a popular coordinate major with environmental studies. Either EOS 1105 *Introducing Earth* or EOS 1505 *Oceanography* meets the introductory science course requirement for environmental studies.

Courses

EOS 1020 (a) Archives of Earth: Past and Future

Emily Peterman.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

An introduction to the evolution of Earth and a glimpse into Earth's future. We will examine pivotal moments in Earth's history, from the formation of Earth's moon, to the rise of oxygen, to colliding continents, and the explosion of life on Earth. What differentiates Earth from other rocky planets? What events have shaped the evolution of Earth? What will future Earth look like? What role are we playing in shaping this future world? These questions are explored through readings, discussions, presentations, and writing.

Previous terms offered: Fall 2021.

EOS 1070 (a, INS) Sea-Level Rise: Science, Policy, and Society

Non-Standard Rotation. Enrollment limit: 50.

Global sea-level rise is accelerating due to climate change. Such a rise, combined locally with sinking land and/or trapping of coastal sediment, creates dramatic impacts on human lives and property, as well as coastal ecosystems and the services they provide. Explores the scientific basis for sea-level rise and projections of future impacts, options for policy responses over decadal and single-event (disaster) time scales, and narratives about coastal populations. What are trade-offs between armoring and retreat from the coast? Are disasters natural or human-caused? How do race and socioeconomic status influence risk and recovery? Who shapes the narratives on coastal residents and refugees? Who controls the planning process, and how should science be communicated in times of hyper-partisanship?

Previous terms offered: Spring 2021, Fall 2020.

EOS 1105 (a, INS) Introducing Earth

Rachel Beane; Joanne Urquhart.

Every Fall. Fall 2022. Enrollment limit: 36.

The Earth is a dynamic system that has been shaped in part by geologic processes such as earthquakes, volcanic activity, and mountain building. During classes and weekly laboratories, students are introduced to Earth and plate tectonics through accessible field experiences along the Maine coast, rock and mineral specimens, images, and models. Students practice making observations, collecting data, and communicating interpretations, and then synthesize the course curriculum and their laboratory findings through a final project.

Previous terms offered: Fall 2021, Spring 2021, Fall 2020, Fall 2019, Fall 2018.

EOS 1305 (a, INS, MCSR) Environmental Geology and Hydrology

Non-Standard Rotation. Enrollment limit: 36.

An introduction to aspects of geology and hydrology that affect the environment and land use. Topics include lakes, watersheds and surface-water quality, groundwater contamination, coastal erosion, and/or landslides. Weekly labs and fieldwork examine local environmental problems affecting Maine's rivers, lakes, and coast. Students complete a community-based research project. (Same as: ENVS 1104)

Previous terms offered: Spring 2019.

EOS 1505 (a, INS) Oceanography

Collin Roesler; Cathryn Field.

Every Spring. Spring 2023. Enrollment limit: 36.

The fundamentals of geological, physical, chemical, and biological oceanography. Topics include tectonic evolution of the ocean basins; deep-sea sedimentation as a record of ocean history; global ocean circulation, waves, and tides; chemical cycles; ocean ecosystems and productivity; and the ocean's role in climate change. Weekly labs and fieldwork demonstrate these principles in the setting of Casco Bay and the Gulf of Maine. Students complete a field-based research project on coastal oceanography. (Same as: ENVS 1102)

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

EOS 2005 (a) Biogeochemistry: An Analysis of Global Change

Cathryn Field; Phil Camill.

Every Fall. Fall 2022. Enrollment limit: 35.

Understanding global change requires knowing how the biosphere, geosphere, oceans, ice, and atmosphere interact. An introduction to earth system science, emphasizing the critical interplay between the physical and living worlds. Key processes include energy flow and material cycles, soil development, primary production and decomposition, microbial ecology and nutrient transformations, and the evolution of life on geochemical cycles in deep time. Terrestrial, wetland, lake, river, estuary, and marine systems are analyzed comparatively. Applied issues are emphasized as case studies, including energy efficiency of food production, acid rain impacts on forests and aquatic systems, forest clearcutting, wetland delineation, eutrophication of coastal estuaries, ocean fertilization, and global carbon sinks. Lectures and three hours of laboratory or fieldwork per week. (Same as: ENVS 2221)

Prerequisites: EOS 1100 - 1999 or BIOL 1102 or BIOL 1109 or CHEM 1092 or CHEM 1102 or CHEM 1109 or ENVS 1102 or ENVS 1104 or ENVS 1515.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

EOS 2010 (a) Isotope Geochemistry

Non-Standard Rotation. Enrollment limit: 35.

By analyzing the isotope variability of elements, scientists approach questions related to solid earth, earth surface, and ocean evolution. Radioactive decay and stable isotope mass fractionation are applied to authentic data sets to examine the timing of earth layer differentiation, the age of rock packages, paleotemperatures, the rate of weathering, erosion, and sedimentary basin development, and other applications.

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) or CHEM 1102 or CHEM 1109.

Previous terms offered: Spring 2020, Spring 2019.

EOS 2020 (a, INS) Earth, Ocean, and Society

Every Spring. Enrollment limit: 35.

Explores the historical, current, and future demands of society on the natural resources of the earth and the ocean. Discusses the formation and extraction of salt, gold, diamonds, rare earth elements, coal, oil, natural gas, and renewable energies (e.g., tidal, geothermal, solar, wind). Examines how policies for these resources are written and revised to reflect changing societal values. Students complete a research project that explores the intersection of natural resources and society. (Same as: ENVS 2250)

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) or ENVS 1102 or ENVS 1104 or ENVS 1515.

Previous terms offered: Spring 2021, Spring 2019.

EOS 2030 (a, MCSR) Geographic Information Systems (GIS) Applications in Earth and Oceanographic Science

Evan Dethier.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course is a hands-on introduction to using geospatial datasets within a geographic information system (GIS) with direct applications to investigating questions in earth and oceanographic sciences. Emphasis is placed on using digital maps as a tool to assist with scientific inquiry and successful communication of findings. Technical topics include geospatial data acquisition and database management, coordinate systems and projections, creation and manipulation of raster and vector datasets, data digitization, incorporation of field data into GIS, using LiDAR and other remote sensing applications, and the production of professional quality final maps. As the culmination of this course students will propose and investigate a geospatial question that aligns with their academic/research interests or as a collaborative project with a community organization.

Prerequisites: EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102).

Previous terms offered: Fall 2019.

EOS 2105 (a) Mineral Science

Rachel Beane.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Minerals are the earth's building blocks and an important human resource. The study of minerals provides information on processes that occur within the earth's core, mantle, crust, and at its surface. At the surface, minerals interact with the hydrosphere, atmosphere and biosphere, and are essential to understanding environmental issues. Minerals and mineral processes examined using hand-specimens, crystal structures, chemistry, and microscopy.

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2022.

EOS 2110 (a, INS) Volcanoes

Non-Standard Rotation. Enrollment limit: 18.

Volcanoes make the news for their human impact, and they reveal much about the inner workings of Earth. Examination of volcanic eruptions, landforms, products, and hazards. Exploration of tectonic influence and magmatic origins of volcanoes. Investigation into the impact of volcanoes on humans, climate, and Earth history.

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) or ENVS 2221.

Previous terms offered: Spring 2022.

EOS 2125 (a, INS, MCSR) Field Studies in Structural Geology

Non-Standard Rotation. Enrollment limit: 18.

Geologic structures yield evidence for the dynamic deformation of the earth's crust. Examines deformation at scales that range from the plate-tectonic scale of the Appalachian mountains to the microscopic scale of individual minerals. A strong field component provides ample opportunity for describing and mapping faults, folds, and other structures exposed along the Maine coast. Class exercises focus on problem solving through the use of geologic maps, cross-sections, stereographic projections, strain analysis, and computer applications.

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) or ENVS 1102 or ENVS 1104 or ENVS 1515.

Previous terms offered: Fall 2018.

EOS 2145 (a, INS) The Plate Tectonics Revolution

Every Other Spring. Enrollment limit: 18.

Although only about forty years old, the theory of plate tectonics forever changed the way we view our earth, from static to dynamic. Plate tectonics provides a global framework to understand such varied phenomena as earthquakes, volcanoes, ocean basins, and mountain systems both on continents (e.g., the Himalaya, the Andes) and beneath the seas (e.g., the Mid-Atlantic Ridge, the East Pacific Rise). In-depth analysis of plate boundaries, the driving forces of plate tectonics, global plate reconstructions, and the predictive power of plate tectonics. Lectures and three hours of laboratory or fieldwork per week.

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) or ENVS 1102 or ENVS 1104 or ENVS 1515.

Previous terms offered: Spring 2019.

EOS 2155 (a, MCSR) Geomechanics and Numerical Modeling

Non-Standard Rotation. Enrollment limit: 18.

Introduces fundamental physical processes important to the transport of heat, solid mass, and fluids in Earth and on Earth's surface. Emphasizes heat conduction, rock strength and failure, and viscous fluid flow.

Provides practice with quantitative expression of physical processes that govern geologic processes. Solutions for problems are derived from first principles, including conservation and flux laws.

Prerequisites: Two of: either EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) and MATH 1600 or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M).

Previous terms offered: Spring 2020, Spring 2019.

EOS 2225 (a, INS, MCSR) Structural Geology and Analysis

Emily Peterman.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

Geologic structures provide evidence of the dynamic deformation and evolution of the Earth's crust. Analysis of these structures yields insight into the processes and products of deformation. This course explores: the mechanics of rock deformation, qualitative and quantitative analysis of structural features, techniques of strain analysis, and synthesis of geologic data in a spatial and temporal context. We examine evidence of deformation at scales that range from the plate-tectonic scale to the microscopic scale of individual minerals. Weekly laboratories focus on problem solving through the use of geologic maps, cross-sections, stereographic projections, strain analysis, virtual field trips, and an array of software applications designed for visualizing and interrogating spatial datasets. Students complete a final project involving the techniques of structural geology and analysis.

Prerequisites: EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2021, Fall 2020.

EOS 2325 (a, INS) Environmental Chemistry

Every Other Spring. Enrollment limit: 20.

Focuses on two key processes that influence human and wildlife exposure to potentially harmful substances, chemical speciation and transformation. Equilibrium principles as applied to acid-base, complexation, precipitation, and dissolution reactions are used to explore organic and inorganic compound speciation in natural and polluted waters; quantitative approaches are emphasized. Weekly laboratory sections are concerned with the detection and quantification of organic and inorganic compounds in air, water, and soils/sediments. (Same as: CHEM 2050, ENVS 2255)

Prerequisites: CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109.

Previous terms offered: Spring 2022, Spring 2020.

EOS 2330 (a, INS) Quaternary Environments: Reconstructing Landscapes Changed by Climate Shifts in Recent Geologic Past

Non-Standard Rotation. Enrollment limit: 35.

The past 2.6 million years of Earth's history, known as the Quaternary, is uniquely characterized by intense and frequent swings in global climate. The record of both 'Ice Ages' and interglacial warming in Earth's recent geologic past can be studied through many lenses of Earth science. In this course we will explore how sedimentology, geomorphology, and dating methods can be applied to reconstruct past environments associated with Quaternary climate shifts. Specific topics include Quaternary climate records and forcing mechanisms, basic glacial dynamics, isostasy and sea level changes, sediments, landforms, and dating methods. Students will complete a semester long project investigating the Quaternary record of a specific region of the world and will participate in several field trips exploring the Quaternary record of New England. (Same as: ENVS 2266)

Prerequisites: EOS 1100 or higher.

Previous terms offered: Fall 2020, Spring 2020.

EOS 2335 (a, INS) Sedimentary Systems

Every Year. Enrollment limit: 16.

Investigates modern and ancient sedimentary systems, both continental and marine, with emphasis on the dynamics of sediment transport, interpretation of depositional environments from sedimentary structures and facies relationships, stratigraphic techniques for interpreting earth history, and tectonic and sea-level controls on large-scale depositional patterns. There will be one daylong field trip to explore more remote locations.

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) or ENVS 1102 or ENVS 1104 or ENVS 1515.

Previous terms offered: Spring 2021, Spring 2020.

EOS 2340 (a, INS) Human Land Use Change

Evan Dethier.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Human activity since the Industrial Revolution has changed the physical world faster than during almost any period in earth history. Examines such changes to the earth surface and their impacts on earth systems, with attention to topics such as agriculture, deforestation, urbanization, climate change, mining, and river damming. Investigates how land use change has altered natural processes using various analytical techniques and sources, including historical archives and satellite or other spatial data. Introduces computer programming techniques to carry out these analyses. Draws inspiration from efforts to dismantle historic inequities, restore environmental function, and promote a just world, focusing on solutions. Students complete a culminating research project of academic and/or community interest.

EOS 2345 (a) Geomorphology: Form and Process at the Earth's Surface

Evan Dethier.

Every Other Fall. Fall 2022. Enrollment limit: 35.

Earth's surface is marked by the interactions of the atmosphere, water and ice, biota, tectonics, and underlying rock and soil. Even familiar landscapes beget questions on how they formed, how they might change, and how they relate to patterns at both larger and smaller scales. Examines Earth's landscapes and the processes that shape them, with particular emphasis on rivers, hillslopes, and tectonic and climatic forcing. (Same as: ENVS 2270)

Prerequisites: EOS 1105 or EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2020, Fall 2019, Fall 2018.

EOS 2365 (a) Coastal Processes and Environments

Every Year. Enrollment limit: 15.

Coasts are among the most densely populated and dynamic components of the earth system, with forms that reflect the interplay among sediment delivery, reshaping by waves and coastal currents, changes in land subsidence and/or sea levels, and human interventions. Understanding these processes and how they may change is a first step toward reducing risk and developing resilient coastal communities. Examines coastal environments (e.g., deltas, barrier islands, beaches, salt marshes), the processes that shape them, and underlying controls. Considers impacts of climate change and sea-level rise on coastal erosion and flooding, and trade-offs involved in human responses to such problems.

Prerequisites: EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2020.

EOS 2375 (a, INS) Data Science Approaches for Hydrology

Evan Dethier.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

The politics of land and water have shaped the history of the United States since its founding. Today, addressing urgent threats posed by floods, droughts, depleted groundwater resources, and water pollution is central to creating a sustainable, just society. Builds a foundation in hydrology, the study of water. Considers how human activities impact water systems and, in turn, how water systems impact human lives and livelihoods. Analyzes urgent hydrological problems using publicly available big data, such as remote sensing/GIS data, direct monitoring datasets, and student data generated in weekly labs, developing transferrable data science and programming skills. Students complete an original big data research project.

EOS 2525 (a) Marine Biogeochemistry

Every Spring. Enrollment limit: 15.

Oceanic cycles of carbon, oxygen, and nutrients play a key role in linking global climate change, marine primary productivity, and ocean acidification. Fundamental concepts of marine biogeochemistry used to assess potential consequences of future climate scenarios on chemical cycling in the ocean. Past climate transitions evaluated as potential analogs for future change using select case studies of published paleoceanographic proxy records derived from corals, ice cores, and deep-sea sediments. Weekly laboratory sections and student research projects focus on creating and interpreting new geochemical paleoclimate records from marine archives and predicting future impacts of climate change and ocean acidification on marine calcifiers. (Same as: ENVS 2251)

Prerequisites: Two of: EOS 1100 - 1999 or either ENVS 1102 or ENVS 1104 or ENVS 1515 and EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

EOS 2530 (a) Poles Apart: Exploration of Earth's High Latitudes

Every Other Year. Enrollment limit: 35.

The Arctic and Antarctic polar regions are largely dominated by ice, yet they are vastly different in terms of geography. The Arctic is an ocean largely surrounded by continents, while the Antarctic is a continent surrounded by ocean. Antarctica is dominated by ice caps, glaciers and ice shelves, surrounded by a seasonal band of sea ice. The Arctic Ocean is mostly covered year-round by sea ice with ice caps and glaciers found mainly in Greenland. These differences lead to profoundly contrasting impacts on global climate and ocean circulation. Tectonic evolution, ice dynamics, ocean circulation, and biology of these regions are compared and contrasted through lectures and readings and discussions of journal articles. Readings from twentieth century journals of polar exploration are used to provide students with first hand accounts of scientific discoveries and a "sense of place", that deep emotional connection people have toward a place. Fulfills the within-department elective in EOS. (Same as: ENVS 2287)

Prerequisites: EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2021, Fall 2019.

EOS 2540 (a, INS) Equatorial Oceanography

Every Year. Enrollment limit: 35.

The equatorial ocean is a region with virtually no seasonal variability, and yet undergoes the strongest interannual to decadal climate variations of any oceanographic province. This key region constitutes one of the most important yet highly variable natural sources of carbon dioxide (CO₂) to the atmosphere. Explores how circulation, upwelling, biological activity, biogeochemistry, and CO₂ flux in this key region vary in response to rapid changes in climate. Particular emphasis on past, present, and future dynamics of the El Niño Southern Oscillation. In-class discussions are focused on the primary scientific literature.

Prerequisites: EOS 1105 - 1515 or EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2022, Spring 2021, Spring 2019.

EOS 2550 (a, INS, MCSR) Satellite Remote Sensing of the Ocean

Collin Roesler.

Every Other Fall. Fall 2022. Enrollment limit: 35.

In the 1980s, NASA's satellite program turned some of its space-viewing sensors towards the earth to better understand its processes. Since that time, NASA's Earth Observatory mission has yielded a fleet of satellites bearing an array of sensors that provide a global view of the earth each day. Global-scale ocean properties, including bathymetry, temperature, salinity, wave height, currents, primary productivity, sea ice distribution, and sea level, are revealed through satellite-detection of ultraviolet, visible, infrared and microwave energy emanating from the ocean. These satellite data records currently exceed thirty years in length and therefore can be used to interpret climate-scale ocean responses from space. A semester-long research project, targeted on a student-selected oceanic region, focuses on building both quantitative skills through data analysis and writing skills through iterative writing assignments that focus on communicating data interpretation and synthesis. (Same as: ENVS 2222)

Prerequisites: Two of: either EOS 1105 - 2969 or EOS 3000 or higher and either MATH 1300 - 2969 or MATH 3000 or higher or Placement in MATH 1600 (M) or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Fall 2018.

EOS 2565 (a, INS, MCSR) Coastal Oceanography

Every Other Year. Enrollment limit: 15.

Coastal oceans lie between the shore and the continental shelves. While they represent less than 10 percent of the global ocean, they are responsible for more than half of the global ocean productivity and are the oceanic regime most experienced by humans. They are also the connection between terrestrial environment and the open ocean, and thus quite sensitive to anthropogenic activities. Interdisciplinary exploration of the coastal ocean includes geologic morphology, tides and coastal currents, river impacts, and coastal ecosystems, with examples taken from global coastal oceans. Weekly labs focus on developing skills in field observation, experimentation, and data analysis in the context of the Gulf of Maine. Fulfills the 2000-level ocean core requirement for the EOS major.

Prerequisites: Two of: EOS 1100 - 1999 and EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2021, Fall 2019.

EOS 2585 (a, INS, MCSR) Ocean and Climate

Collin Roesler.

Every Other Year. Fall 2022. Enrollment limit: 18.

The ocean covers more than 70 percent of Earth's surface. It has a vast capacity to modulate variations in global heat and carbon dioxide, thereby regulating climate and ultimately life on Earth. Beginning with an investigation of paleo-climate records preserved in deep-sea sediment cores and in Antarctic and Greenland glacial ice cores, the patterns of natural climate variations are explored with the goal of understanding historic climate change observations. Predictions of polar glacial and sea ice, sea level, ocean temperatures, and ocean acidity investigated through readings and discussions of scientific literature. Weekly laboratory sessions devoted to field trips, laboratory experiments, and computer-based data analysis and modeling to provide hands-on experiences for understanding the time and space scales of processes governing oceans, climate, and ecosystems. Laboratory exercises form the basis for student research projects. Mathematics 1700 is recommended. (Same as: ENVS 2282)

Prerequisites: Two of: either EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221) and MATH 1600 or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Fall 2020, Fall 2018.

EOS 2680 (a, INS, MCSR) Ocean Carbon Climate Change Solutions

Non-Standard Rotation. Enrollment limit: 35.

As the largest decadal-to-millennial timescale carbon store on Earth, the ocean has outstanding potential for sequestering carbon dioxide from the atmosphere. And, as a significant fraction of the global population lives near the ocean, ocean carbon solutions have the potential to reach huge markets and directly touch the lives of billions. This course explores the ocean's possible contribution to the reversal of climate change via a multiple-perspective, critical assessment of natural and geoengineering solutions for increasing ocean carbon uptake or reducing emissions. Course work will focus on analysis of open-ended problems based on current research papers, the use of real-world, open-source quantitative tools for mapping and scaling up ocean climate solutions, and sharing results via in-class presentations.

Prerequisites: Three of: EOS 1100 - 1999 and EOS 2005 (same as ENVS 2221) and MATH 1600 or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M).

Previous terms offered: Fall 2020, Spring 2020.

EOS 2685 (a, INS, MCSR) Fluent in Fluids: Finding Patterns from Teacups to Oceans

Non-Standard Rotation. Enrollment limit: 18.

The subtle balances of forces in fluids impact everyday life at a range of scales spanning Earth's climate to the flow of blood. Fluids are also surprising and sublime because their flows can result in unexpected organization out of chaos, and very small features can steer currents that are many orders of magnitude larger. This introductory fluids course explores a new way of looking at fluids by searching for and quantifying patterns in flows. Labs will test how shifts in key parameters change the overall flow. In class, a primarily conceptual formulation of fluid dynamics and simplified mathematical models of fluids will be used to explain the movement of fluids at large and small scales. Along each step of the way, real-world examples drawn from as diverse contexts as the kitchen sink and cutting-edge oceanographic research will be used to illustrate the nature of fluids and their impact.

Prerequisites: Three of: EOS 1100 - 1999 and EOS 2005 (same as ENVS 2221) and MATH 1600 or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M).

Previous terms offered: Spring 2020.

EOS 2810 (a, INS, MCSR) Atmospheric and Ocean Dynamics

Every Other Fall. Enrollment limit: 35.

A mathematically rigorous analysis of the motions of the atmosphere and oceans on a variety of spatial and temporal scales. Covers fluid dynamics in inertial and rotating reference frames, as well as global and local energy balance, applied to the coupled ocean-atmosphere system. (Same as: PHYS 2810, ENVS 2253)

Prerequisites: PHYS 1140.

Previous terms offered: Fall 2020.

EOS 3020 (a) Earth Climate History

Phil Camill.

Every Spring. Spring 2023. Enrollment limit: 16.

The modern world is experiencing rapid climate warming and some parts extreme drought, which will have dramatic impacts on ecosystems and human societies. How do contemporary warming and aridity compare to past changes in climate over the last billion years? Are modern changes human-caused or part of the natural variability in the climate system? What effects did past changes have on global ecosystems and human societies? Students use environmental records from rocks, soils, ocean cores, ice cores, lake cores, fossil plants, and tree rings to assemble proxies of past changes in climate, atmospheric CO₂, and disturbance to examine several issues: long-term carbon cycling and climate, major extinction events, the rise of C₄ photosynthesis and the evolution of grazing mammals, orbital forcing and glacial cycles, glacial refugia and post-glacial species migrations, climate change and the rise and collapse of human civilizations, climate/overkill hypothesis of Pleistocene megafauna, climate variability, drought cycles, climate change impacts on disturbances (fire and hurricanes), and determining natural variability versus human-caused climate change. (Same as: ENVS 3902)

Prerequisites: EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

EOS 3050 (a) The Physics of Climate

Non-Standard Rotation. Enrollment limit: 35.

A rigorous treatment of the earth's climate, based on physical principles. Topics include climate feedbacks, sensitivity to perturbations, and the connections between climate and radiative transfer, atmospheric composition, and large-scale circulation of the oceans and atmospheres. Anthropogenic climate change also studied. (Same as: PHYS 3810, ENVS 3957)

Prerequisites: PHYS 2150 or PHYS 2810 (same as ENVS 2253 and EOS 2810) or PHYS 3000.

Previous terms offered: Spring 2021.

EOS 3115 (a) Research in Mineral Science

Non-Standard Rotation. Enrollment limit: 15.

Minerals are the earth's building blocks and an important human resource. The study of minerals provides information on processes that occur within the earth's core, mantle, crust, and at its surface. At the surface, minerals interact with the hydrosphere, atmosphere and biosphere, and are essential to understanding environmental issues. Minerals and mineral processes examined using hand-specimens, crystal structures, chemistry, and microscopy. Class projects emphasize mineral-based research.

Prerequisites: EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2020, Spring 2019.

EOS 3140 (a) Tectonics and Climate

Non-Standard Rotation. Enrollment limit: 16.

Exploration of the complex interactions between tectonics and climate. Discussion of current research is emphasized by reading primary literature, through class discussions and presentations, and by writing scientific essays. The emphasis on current research means topics may vary, but include: the rise of continents, the evolution of plate tectonics on Earth over the last 4.5 billion years, ancient mountain belts, supercontinents, the record of earth system processes preserved in the geologic record, predictions of how the modern earth system will be recorded in the future rock record, the topographic growth of mountain belts, and Cenozoic climate change.

Prerequisites: EOS 1105 or EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2021.

EOS 3165 (a) Research in Earth and Oceanographic Science: Topics in Petrotectonics

Emily Peterman.

Every Spring. Spring 2023. Enrollment limit: 15.

Rocks preserve a record of their geologic history through their chemistry, mineralogy, and texture. Many of these attributes are linked to the tectonic setting in which the rock formed, which have (co)varied with changes in Earth's atmosphere, biosphere, hydrosphere, and lithosphere. We will examine the distribution, composition, structure, and mineralogy of rocks and their relationships to tectonic environments. The petrotectonic evolution of Earth and resultant geologic archive will be explored using hand specimens, microscopy, chemical analysis, thermodynamic modeling, and field study. We will also discuss natural hazards, natural resources, and their intersections with society and the environment. Laboratory activities and projects emphasize developing research and communication skills in the geosciences, culminating in an independent research project. Includes a weekly laboratory and fulfills the 3000-level capstone research course requirement for the EOS major.

Prerequisites: Three of: either EOS 2115 or EOS 2125 or EOS 2145 or EOS 2155 or EOS 2165 or EOS 2225 and either EOS 2335 or EOS 2345 (same as ENVS 2270) or EOS 2365 and either EOS 2525 (same as ENVS 2251) or EOS 2565 or EOS 2585 (same as ENVS 2282) or EOS 2685.

Previous terms offered: Spring 2022, Spring 2021.

EOS 3515 (a) Research in Oceanography: Topics in Paleooceanography
Non-Standard Rotation. Enrollment limit: 18.

The ocean plays a key role in regulating Earth's climate and serves as an archive of past climate conditions. The study of paleooceanography provides a baseline of natural oceanographic variability against which human-induced climate change must be assessed. Examination of the oceans' physical, biological, and biogeochemical responses to external and internal pressures of Earth's climate with focus on the Cenozoic Era (past 65.5 million years). Weekly labs and projects emphasize paleooceanographic reconstructions using deep-sea sediments, corals, and ice cores. Includes a laboratory and fulfills the 3000-level research experience course requirement for the EOS major.

Prerequisites: EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

Economics

Overview & Learning Goals

Overview

The major in economics is designed for students who wish to obtain knowledge of the theoretical and empirical techniques of economics, and to learn how these techniques complement other perspectives learned at Bowdoin. The major provides an opportunity to learn economics as a social science, to study the process of drawing inferences from bodies of data and testing hypotheses against observation, and to apply economic theory to social objectives, including those that are not obviously "economic" in nature. Economics as a way of thinking is broadly useful to many students who are interested in a wide range of individual goals and social concerns (pursuit of "The Common Good"). Economics addresses the functioning of economic institutions (i.e., financial markets, labor markets, corporations, government agencies), and current policy issues: determinants of the pace and nature of economic development; the allocation of health-care services; impacts of urban policy and the design

of cities; the advantages and disadvantages of government spending and debt; the tendency toward poverty and its alleviation; human impacts on the environment and ways of addressing them; environmental justice; the effects of globalization and technological change on various groups across society; arguments for and against deregulation; the economics of racial and gender injustice, etc. The major is a useful preparation for graduate study in economics, law, business, finance, or public administration, but majors have also gone on to medicine, environmental policy, education, and many other fields.

Learning Goals

The following are main learning goals for students of economics at Bowdoin College. While these goals are targeted toward majors, they also apply to students pursuing the minor in economics and the minor in economics and finance.

In addition to majors and minors, the economics department serves other constituencies at the College: those interested primarily in satisfying their MCSR requirement; those interested in obtaining a baseline level of economic literacy to complement the rest of their liberal arts education; and those taking economics courses as an explicit part (core course or elective) of another course of study. Many, but perhaps not all, of the goals presented below apply to these other student groups as well.

Goal 1: Demonstrate understanding of the major concepts, theoretical perspectives, basic research findings, and methods in economics.

Breadth in the discipline is accomplished through ECON 1050 Principles of Microeconomics and Quantitative Reasoning or ECON 1101 Principles of Microeconomics and ECON 1102 Principles of Macroeconomics, and in three core classes: ECON 2555 Microeconomics, ECON 2556 Macroeconomics, and ECON 2557 Economic Statistics. In addition, majors are required to complete four topics courses, three at the advanced level. The advanced-level courses provide depth in a particular topic, ask students to more rigorously apply some of the analytical tools first introduced in the core classes, and, in many cases, require students to write a long research paper. The minor is much more about breadth than depth. Still, each minor is exposed to all the introductory material, one intermediate-level theory course, one statistics course (not necessarily in economics), and one or two applied courses.

Goal 2: Apply principles of economics to conceptually understand behavior of individuals, households, firms, nongovernmental organizations, and governments in the real world.

This goal is achieved in introductory courses (ECON 1101 Principles of Microeconomics and ECON 1102 Principles of Macroeconomics), which many students take to gain "economic literacy," as well as in our intermediate elective courses. This goal is also present in advanced classes.

Goal 3: Use algebraic, graphical, and numerical tools to build "models," i.e., simplified representations of individual, firm, and government incentives and behaviors that affect the allocation of scarce resources.

The use of theoretical models is central to the methodology of economics, and modeling is prevalent throughout all of our courses. In core courses, more sophisticated models using calculus are developed. The tools developed in the introductory and core courses are used in intermediate and upper-level electives, respectively, in the construction of more context-specific models. In addition, students in intermediate and upper-level electives and in ECON 2557 Economic Statistics are

introduced to methods that allow economists to estimate or calibrate the models with data.

Goal 4: Articulate economic arguments using a range of “modalities”: verbal, graphical, algebraic/mathematical, and numerical.

This goal is addressed in all economics courses, starting with ECON 1101 Principles of Microeconomics and ECON 1102 Principles of Macroeconomics. Intermediate and advanced electives emphasize verbal arguments to a greater extent; introductory and core courses focus more on graphical and algebraic tools and the ability to numerically characterize outcomes. Advanced courses employ more sophisticated mathematical methods, such as constrained optimization, control theory, etc.

Goal 5: Communicate effectively both orally and through writing to transmit information and to construct a cogent argument.

This goal is addressed primarily in economics seminar courses, which all include a significant research paper. Many intermediate-level courses also have students synthesize and critique economic arguments in the popular press and other nontechnical publications. In many intermediate-level electives and advanced seminars, students are required to make oral presentations to the class.

Goal 6: Acquire skills to empirically test economic hypotheses and otherwise extract insight from data; understand the distinction between causation and spurious correlation.

This goal is addressed primarily in the ECON 2557 Economic Statistics core course and ECON 3516 Econometrics, but also in some elective courses. Students in many upper-level seminars employ statistical methods in a limited context and interpret the empirical results presented in the peer-reviewed literature. Many independent studies and honors students in economics include a significant empirical/statistical component in their work.

Goal 7: Utilize economic reasoning to assess the impacts of different policies and to understand how the perspective of economics can illuminate current events and policy debates.

The analysis of policy begins in economics introductory courses, where students develop simple models of the intervention of government in markets (e.g., taxation and price controls in ECON 1101 Principles of Microeconomics; monetary and fiscal policies in ECON 1102 Principles of Macroeconomics). Core micro- and macroeconomics courses carry out similar analysis with higher technical sophistication. Several elective courses are also offered that emphasize policy solutions to address market failure and achieve distributional equity goals, e.g., ECON 2001 Economic Policy, ECON 2218 Environmental Economics and Policy, ECON 2228 Natural Resource Economics and Policy, ECON 3511 Economic Evaluation of Public Programs, and ECON 3560 Urban Economics.

Goal 8: Understand both the usefulness and the limitations of economic methodology, as well as the assumed values (and perhaps “biases”) implicit in economic modeling approaches. Understand the difference between positive and normative statements. Understand and articulate the distinctions between economics and other social science fields, as well as the ways these fields can jointly enhance understanding of human systems.

Introductory and theory courses firmly emphasize the scientific nature of economics, i.e., its emphasis on positive/testable characterizations

and predictions of human behavior rather than normative assertions. Throughout the curriculum, the potential benefits of economic tools are emphasized, but also advocate “disciplinary humility.” While some courses are more inherently interdisciplinary than others (e.g., ECON 3518 Environmental and Natural Resource Economics, ECON 2227 Human Resources and Economic Development), and others emphasize critique of orthodox economic-modeling frameworks (e.g., ECON 2221 Marxian Political Economy), virtually all courses stress that economic tools provide just one of many different valuable perspectives from which to understand human behavior and approach complex issues.

Goal 9: Understand the economic research process at the level of the peer-reviewed academic literature and evaluate its methods, findings, and conclusions; develop an ability to compare, critique, and understand connections between research findings in the peer-reviewed literature.

While students in any of the department’s courses may be asked to read academic literature in economics, this goal is most consistently addressed by students in advanced courses. Seminar courses all include a culminating research project that requires in-depth engagement with the primary academic literature in economics.

Goal 10: Give students interested in the graduate study of economics the tools and knowledge necessary to be accepted at a top economics department.

The department’s upper-level courses provide much of this background, acquaint students with the peer-reviewed literature, have them produce their own research project, and give them insights into their faculty member’s own research in a particular field of economics. Many of the students interested in graduate school undertake an honors project. Faculty also mentor those students interested in going on to graduate school; other relevant information is available on the departmental web page.

Options for Majoring and Minor in the Department

Students in the Department of Economics may elect to major in economics, the mathematics and economics interdisciplinary major, or to coordinate a major in economics with digital and computational studies, education, or environmental studies. Students pursuing a coordinate or interdisciplinary major may not normally elect a second major. Non-majors may elect to minor in economics or economics and finance.

Faculty

Erik Nelson, *Department Chair*
Sue Kohorn, *Department Coordinator*

Professors: Rachel Connelly, Guillermo E. Herrera, B. Zorina Khan
Associate Professors: Matthew J. Botsch, Gregory P. DeCoster, Stephen Meardon, Erik Nelson, Daniel F. Stone
Assistant Professors: Martin Abel, Duman B-Rad, Jessica LaVoice**, Gonca Senel
Visiting Faculty: Taul Cheong

Faculty/Staff Website (<https://www.bowdoin.edu/economics/faculty-and-staff/>)

Requirements

Economics Major

There are seven required courses for the major:

Code	Title	Credits
Required Courses		
Core		
ECON 2555	Microeconomics	1
ECON 2556	Macroeconomics	1
ECON 2557	Economic Statistics	1
Select three advanced topics courses numbered in the 3000s, at least one of which must be designated as a seminar (course number higher than 3500).		3
Select one additional course in economics numbered 2000 or higher.		1

Either ECON 1050 Principles of Microeconomics and Quantitative Reasoning or ECON 1101 Principles of Microeconomics serve as prerequisites for ECON 1102 Principles of Macroeconomics and, because these are prerequisites for most other economics courses, most students begin their work in economics with these introductory courses. Prospective majors are encouraged to take at least one core course by the end of the sophomore year, and all three core courses should be completed by the end of the junior year. Advanced topics courses have one or more of ECON 2555 Microeconomics, ECON 2556 Macroeconomics, and ECON 2557 Economic Statistics as prerequisites.

All prospective majors and minors are required to complete MATH 1600 Differential Calculus or its equivalent prior to enrolling in the core courses. (A math placement into MATH 1700 Integral Calculus or higher counts as satisfying the MATH 1600 Differential Calculus requirement.)

Economics Minor

Code	Title	Credits
Required Courses		
ECON 2555	Microeconomics	1
or ECON 2556	Macroeconomics	
Select two additional courses numbered 2000 or higher.		2
Select one of the following: ^a		1
ECON 2557	Economic Statistics	
MATH 1300	Biostatistics	
MATH 1400	Statistics in the Sciences	
MATH 2606	Statistics	
PSYC 2520	Data Analysis	
a score of four or five on the Advanced Placement Statistics exam		

^a Of this list, only ECON 2557 Economic Statistics can simultaneously contribute to the requirement of two additional courses numbered 2000 or higher.

Economics and Finance Minor

Code	Title	Credits
Required Courses		
ECON 2555	Microeconomics	1
ECON 3401	Financial Economics	1

One upper division course from ECON 2556, ECON 2557, or 3000–4001 ^b	1
One course in the finance range: ECON 2400–2499, 3402–3499, or 3600–3699 ^b	1
Select one of the following: ^c	1
ECON 2557	Economic Statistics
MATH 1300	Biostatistics
MATH 1400	Statistics in the Sciences
MATH 2606	Statistics
PSYC 2520	Data Analysis
a score of four or five on the Advanced Placement Statistics exam	

- ^b One elective may fulfill both the upper division and finance requirements. If a student uses one course to fulfill both requirements, the student is required to take another elective numbered 2000 or above.
- ^c Of this list, only ECON 2557 Economic Statistics can simultaneously satisfy the upper division requirement.

Because ECON 2555 Microeconomics is a prerequisite for ECON 3401 Financial Economics and other upper-level economics courses, prospective minors are encouraged to complete ECON 2555 Microeconomics by the end of their sophomore year.

Interdisciplinary Major

The department participates in an interdisciplinary major in mathematics and economics. See the Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>).

Additional Information

Additional Information and Department Policies

- Normally, no more than two courses taken at another college or university may be counted toward economics major or minor requirements with departmental approval.
- Economic courses numbered 1000 to 1099 (with the exception of ECON 1050 Principles of Microeconomics and Quantitative Reasoning) do not fulfill departmental requirements or serve as prerequisites for higher-level courses.
- An independent study can be used to satisfy no more than one major requirement; an intermediate independent study can satisfy a 2000-level elective, or an advanced independent study can satisfy a 3000-level non-seminar.
- Similarly, an independent study can be used to satisfy no more than one elective course requirement in either the economics minor or the economics and finance minor.
- To fulfill major or minor requirements, courses must be taken for letter grades and a C- or better must be earned.
- In order for a course to serve as a prerequisite for a required course, students must earn a C- or better, or CR (credit), if taken Credit/D/Fail.
- Economics majors cannot also minor in economics or economics and finance.
- The statistics courses that count toward the minors that are from outside economics may double-count toward the economics minors.
- Students who aspire to advanced work in economics, e.g., an honors thesis and/or graduate study in a discipline related to

economics, are strongly encouraged to master multivariate calculus (MATH 1800 Multivariate Calculus) and linear algebra (MATH 2000 Linear Algebra) early in their careers. Such students are also encouraged to take MATH 2606 Statistics instead of ECON 2557 Economic Statistics as a prerequisite for ECON 3516 Econometrics. The ECON 2557 Economic Statistics requirement is waived for students who complete MATH 2606 Statistics and ECON 3516 Econometrics. Students should consult the Department of Economics about other mathematics courses that are especially useful for advanced study in economics.

- Students who do honors enroll in ECON 4050 and then ECON 4051 the following semester. However, a successfully completed honor's project is only worth one 3000-level non-seminar credit.

Advanced Placement/International Baccalaureate (AP/IB)

- Students who received a score of four or five on the Microeconomics AP exam are eligible to receive credit for ECON 1101 Principles of Microeconomics. Any credit awarded for the Microeconomics AP exam will be removed from the student's record if the student elects to take ECON 1050 Principles of Microeconomics and Quantitative Reasoning or ECON 1101 Principles of Microeconomics.
- Students who received a score of four or five on the Macroeconomics AP exam are eligible to receive credit for ECON 1102 Principles of Macroeconomics. Any credit awarded for the Macroeconomics AP exam will be removed from the student's record if the student elects to take ECON 1102 Principles of Macroeconomics.
- Students who received a minimum score of six on the Economics IB exam (HL) are eligible to receive one general college credit and placement into courses requiring either ECON 1101 Principles of Microeconomics or ECON 1102 Principles of Macroeconomics. Any credit awarded for the Economics IB exam (HL) will be removed from the student's record if the student elects to take ECON 1101 Principles of Microeconomics or ECON 1102 Principles of Macroeconomics.
- Students who received a score of four or five on the Statistics AP exam have the option to use that score to satisfy the statistics requirement for either of the minors but not for the major.
- In order to receive credit for Advanced Placements/International Baccalaureate work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Information for Incoming Students (p. 170)

Economics addresses the functioning of economic institutions (i.e., financial markets, labor markets, corporations, government agencies), and current policy issues: determinants of the pace and nature of economic development; the allocation of health-care services; impacts of urban policy and the design of cities; the advantages and disadvantages of government spending and debt; the tendency toward poverty and its alleviation; human impacts on the environment and ways of addressing them; environmental justice; the effects of globalization and technological change on various groups across society; arguments for and against deregulation; the economics of racial and gender injustice, etc. The major is a useful preparation for graduate study in economics, law, business, finance, or public administration, but majors have also gone on to medicine, environmental policy, education, agricultural work, computer science, non-profit work, and many other fields.

In fall 2022 the economics department is offering three other courses designed for first years. While these courses do not count towards the

major, they will provide first-year students an alternative entryway into the discipline. These courses are: ECON 1013 The Moral Economy, ECON 1018 The Art of the Deal: Commerce and Culture, and ECON 1099 Using "Big Data" to Investigate and Suggest Solutions to Economic and Social Problems.

The economics department provides an initial course placement for all new students, based on each student's responses to the math questionnaire, quantitative skills assessment tool, and any officially submitted AP information. Based on this information, students are placed in one of the following gateway courses for Economics:

- ECON 1050 Principles of Microeconomics and Quantitative Reasoning
- ECON 1101 Principles of Microeconomics
- ECON 1102 Principles of Macroeconomics
- or a 2000-level elective of their choosing

Students who have questions about their placement, or who wish to register for a first economics course that is different from their original placement, should email the economics placement coordinator Professor Rachel Connelly (<https://www.bowdoin.edu/profiles/faculty/connelly/>). If students have not officially submitted AP/IB scores, then that information was not been considered and their placement may need to be adjusted.

- ECON 1101 Principles of Microeconomics has multiple sections offered each semester and is the standard gateway course into the department. ECON 1101 Principles of Microeconomics serves as a prerequisite for ECON 1102 Principles of Macroeconomics and several additional 2000 level electives.
- ECON 1050 Principles of Microeconomics and Quantitative Reasoning covers all the material in ECON 1101 Principles of Microeconomics in a more supported Quantitative Reasoning (QR) environment that requires weekly lab taught by QR faculty in conjunction with the economics faculty member assigned to the course. It also serves as a prerequisite for ECON 1102 Principles of Macroeconomics and several additional 2000 level electives.
 - In academic year 2022-2023, ECON 1050 Principles of Microeconomics and Quantitative Reasoning will be taught in the spring. Students placed in ECON 1050 Principles of Microeconomics and Quantitative Reasoning who are interested in majoring in economics should be assured that it is fine to wait until the spring to begin taking economics classes and are encouraged to take MATH 1050 Quantitative Reasoning in the fall.
- Students who take MATH 1050 Quantitative Reasoning in the fall and do well in that course can then take either ECON 1101 Principles of Microeconomics with a prerequisite override of their placement or ECON 1050 Principles of Microeconomics and Quantitative Reasoning in the spring. Students who find they need more practice with QR concepts are encouraged to choose ECON 1050 Principles of Microeconomics and Quantitative Reasoning in the spring even after taking MATH 1050 Quantitative Reasoning in the fall.
- Students who received the "2000-level elective" placement and want to get started right away with economics should consider one of the following fall 2022 electives as appropriate places to begin: ECON 2001 Economic Policy or ECON 2215 U.S. Income Inequality.

- With rare exceptions, students wishing to start immediately with ECON 2555 Microeconomics or ECON 2556 Macroeconomics should wait until the spring term. Students seeking that exception should see the Economics department placement coordinator Professor Rachel Connelly (<https://www.bowdoin.edu/profiles/faculty/connelly/>).
- Students should be aware that any credit awarded for AP/IB scores in economics will be removed from their record if they elect to take a lower-level course. For more details, see the department's AP/IB policy above (p. 170).

Courses

ECON 1013 (b) The Moral Economy

Stephen Meardon.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

An examination of the moral questions arising from economic analysis during the industrial revolution. Readings include original texts by Adam Smith, Karl Marx, and Henry George, and historical treatments of their lives and circumstances; also the late nineteenth century fictional treatment of novelist and editor William Dean Howells. The authors' rhetorical strategies as well as their moral premises and political-economic ideas will be studied.

Previous terms offered: Fall 2020.

ECON 1018 (b) The Art of the Deal: Commerce and Culture

Zorina Khan.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Explores the economics of culture, including the analysis of markets for art, music, literature, and movies. If culture is priceless, then why do artists starve while providers of pet food make billions? Why are paintings by dead artists generally worth more than paintings by living artists? Could music piracy on the information superhighway benefit society? Can Tom Hanks turn a terrible movie into a contender at the box office? Students are not required to have any prior knowledge of economics, and will not be allowed to argue that baseball comprises culture.

Previous terms offered: Fall 2020.

ECON 1050 (b, MCSR) Principles of Microeconomics and Quantitative Reasoning

Rachel Connelly.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

A quantitative reasoning supported introduction to economic analysis and institutions, with special emphasis on the allocation of resources through markets. Covers the same content as Economics 1101 with added instruction in the quantitative skills used in modern microeconomics, providing a firm foundation for further coursework in economics. Students desiring a comprehensive introduction to economic reasoning should take both this course (or Economics 1101) and 1102. To ensure proper placement, students must fill out economics department placement form and must be recommended for placement in Economics 1050. Not open to students have taken Economics 1101.

Prerequisites: MATH 1050 or Placement in ECON 1050.

Previous terms offered: Spring 2022, Spring 2021, Fall 2019, Fall 2018.

ECON 1082 (b) Economic Literacy

Non-Standard Rotation. Enrollment limit: 50.

A nontechnical introduction to the operation of modern capitalist economies, with a focus on the US. The course is intended to provide a level of economic literacy adequate to understand economic policy debates as conducted in the popular press. The emphasis is on using a small number of fundamental concepts to clarify how economies function, and to provide a foundation for informed evaluation of competing economic policy agendas. Topics include incentives; decision-making; markets as a means of allocating resources; characteristics of market allocation; measures and history of US economic performance; international trade, finance, and globalization; and structure and function of the monetary and financial systems. Throughout the course, discussion will address alternative perspectives on the appropriate role of government in the economy. Not open to students who have credit for Economics 1050, 1101, or 1102. Does not satisfy the prerequisite for any other course in economics. (NOTE: this course was previously offered as Economics 100 Introduction to the Economy)

Previous terms offered: Spring 2021, Spring 2020.

ECON 1099 (b, DPI, MCSR) Using "Big Data" to Investigate and Suggest Solutions to Economic and Social Problems

Erik Nelson.

Non-Standard Rotation. Fall 2022. Enrollment limit: 20.

Students will use "big data" to understand and address some of the most important social and economic problems of our time. The course will give students an introduction to cutting edge research and policy applications in economics in a non-technical manner that does not require prior coursework in economics or statistics, making it suitable both for students exploring economics for the first time, and for more advanced students who are interested in the class's topics. Social and economic problems that we will cover include equality of opportunity, education, racial disparities, criminal justice, labor market participation, entrepreneurship, health care and public health, the opioid crisis, climate change, and environmental justice. In the context of these topics, the course will also provide an introduction to basic methods in data science, including regression, causal inference, and machine learning. Students will use software packages R, Stata, Arc GIS, and Excel. (Same as: DCS 1209)

ECON 1101 (b, MCSR) Principles of Microeconomics

Zorina Khan; Taul Cheong; Daniel Stone; Jessica LaVoice.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

An introduction to economic analysis and institutions, with special emphasis on the allocation of resources through markets. The theory of demand, supply, cost, and market structure is developed and then applied to problems in antitrust policy, environmental quality, energy, education, health, the role of the corporation in society, income distribution, and poverty. Students desiring a comprehensive introduction to economic reasoning should take both Economics 1101 and 1102. For proper placement students should fill out the economics placement request form and must be recommended for placement in Economics 1101. Not open to students who have taken Economics 1050.

Prerequisites: MATH 1050 or Placement in ECON 1101.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ECON 1102 (b, MCSR) Principles of Macroeconomics

Duman B-Rad; Stephen Meardon.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

An introduction to economic analysis and institutions, with special emphasis on determinants of the level of national income, prices, and employment. Current problems of inflation and unemployment are explored with the aid of such analysis, and alternative views of the effectiveness of fiscal, monetary, and other governmental policies are analyzed. Attention is given to the sources and consequences of economic growth and to the nature and significance of international linkages through goods and capital markets.

Prerequisites: ECON 1050 or ECON 1101 or Placement in ECON 1102 or Placement in earned ECON 1101.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ECON 2001 (b) Economic Policy

Gregory DeCoster.

Every Year. Fall 2022. Enrollment limit: 35.

Economic analysis can bring clarity to confused and contentious policy debates. Focuses on using economic analysis to anticipate the potential consequences of implementing major policy proposals, including those relating to globalization, international trade and finance, inequality of income and wealth, economic growth and development, the financial system, the government budget and debt, price stability and employment, and the environment.

Prerequisites: ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2022, Fall 2020, Fall 2019, Fall 2018.

ECON 2201 (b, IP, MCSR) International Economics

Every Other Year. Enrollment limit: 35.

Explores classical and modern theories of international trade and international finance and applies them to contemporary in the global marketplace. Considers policy implications of both trade and the regulation of trade on topics including financial gains from trade, balance of payments, international monetary regimes, and exchange rate policies.

Prerequisites: Two of: either ECON 1101 or ECON 1050 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2022, Spring 2019.

ECON 2210 (b) Economics of the Public Sector

Non-Standard Rotation. Enrollment limit: 35.

Theoretical and applied evaluation of government activities and the role of government in the economy. Topics include public goods, public choice, income redistribution, benefit-cost analysis, health care, social security, and incidence and behavioral effects of taxation. Not open to students who have credit for Economics 3510.

Prerequisites: Two of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level.

Previous terms offered: Fall 2018.

ECON 2213 (b) History of Economic Thought

Non-Standard Rotation. Enrollment limit: 35.

A historical study of insights and methods of inquiry into the functions of markets and the role of government in shaping them. Readings include the original works of economic thinkers from the eighteenth to twentieth centuries, including Adam Smith, David Ricardo, Henry Carey, Karl Marx, Henry George, Thorstein Veblen, and John Maynard Keynes, among others. Different historiographical approaches are employed, including examination of the problems motivating past thinkers as well as the relevance of their ideas to modern economics.

Prerequisites: Two of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level.

Previous terms offered: Fall 2021, Spring 2020.

ECON 2215 (b, MCSR) The Political Economy of U.S. Income Inequality

Douglas Blair.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

After an initial look at how we measure economic inequality, we examine economic inequality trends over the past four decades in the US. We then embark on a tour of some leading economic hypotheses for the rise in inequality, ranging from immigration and globalization to superstars and winner-take-all markets. We will also examine how the degree of US inequality varies according to which political party is in power. We will also explore differences between rich and poor in voting power, political voice and participation—and whether these differences matter in the extent to which average citizens or elites get their way in the making of public policy that affects economic inequality. Our path toward answering these questions touches on many disciplines in the arts and sciences, including anthropology, economics, history, philosophy, political science, psychology, and sociology.

Prerequisites: ECON 1050 or ECON 1101 or Placement in ECON 2000 Level.

ECON 2218 (b, MCSR) Environmental Economics and Policy

Non-Standard Rotation. Enrollment limit: 35.

An exploration of environmental degradation and public policy responses in industrial economies. Market failures, property rights, and materialistic values are investigated as causes of pollution and deteriorating ecosystem functions. Guidelines for equitable and cost-effective environmental policy are explored, with an emphasis on the roles and limitations of cost-benefit analysis and techniques for estimating non-monetary values. Three core themes are the transition from “command and control” to incentive-based policies; the evolution from piecemeal regulation to comprehensive “green plans” (as in the Netherlands); and the connections among air pollution, energy systems, and global warming. (Same as: ENVS 2302)

Prerequisites: ECON 1050 or ECON 1101 or Placement in ECON 1102 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2021.

ECON 2219 (b, MCSR) Institutional Approaches to Climate Change
Every Other Fall. Enrollment limit: 35.

How do various public and private institutions, including governments, firms, and nonprofits, incorporate climate change into their decision-making? Explores how and why institutions set greenhouse gas mitigation goals, how they propose to achieve their goals, and the larger economic and social implications of institutional climate action plans. Further, questions how institutions at all levels are adapting or planning to adapt to climate change. Critiques the efficacy and efficiency of climate action plans. Topics explored include renewable energy credit and offset markets; energy markets; carbon markets and taxes; financing of climate action plans; incentivizing energy efficiency and other climate-friendly practices; technology adoption; the economics of technological change; employee, student, and citizen activism; shareholder activism; and corporate social responsibility. Introduction to basic economic modeling by working with graphs, tables, and schematics. Problem sets and written assignments used to assess learning. For a final project, students write a climate action plan for an institution of their choice. (Same as: ENVS 2351)

Prerequisites: Two of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ENVS 1101.

Previous terms offered: Fall 2018.

ECON 2221 (b, MCSR) Marxian Political Economy
Non-Standard Rotation. Enrollment limit: 35.

An examination of Karl Marx's method of analysis of capitalist market economies, focusing on the interconnected roles played by market relations, class/power relations, exploitation, and internal tendencies towards growth, crisis, and qualitative change. Students are introduced to Marxian method and economic theory through the original works of Marx, including Volume I of "Capital," and secondary works of contemporary and later critics. Historical and biographical sources are studied to illuminate Marx's inspirations and motives. Subsequently, applications of the Marxian framework to the modern capitalist economy are considered critically, with an emphasis on the secular and cyclical instability of the economy, changing institutional structures, labor market issues, and globalization.

Prerequisites: ECON 1050 or ECON 1100 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2022, Spring 2019.

ECON 2227 (b, IP, MCSR) Human Resources and Economic Development

Taul Cheong.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

An analysis of human resource issues in the context of developing countries. Topics include the composition of the labor force by age and gender, productivity of the labor force, unemployment and informal sector employment, child labor and the health and schooling of children, and the effects of structural adjustment policies and other policy interventions on the development and utilization of human resources. Examples from selected African, Asian, and Latin American countries are integrated throughout and the interaction of sociocultural environments with economic forces is considered.

Prerequisites: ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

ECON 2228 (b, MCSR) Natural Resource Economics and Policy
Guillermo Herrera.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

A study of the economic issues surrounding the existence and use of renewable natural resources (e.g., forestry/land use, fisheries, water, ecosystems, and the effectiveness of antibiotics) and exhaustible resources (such as minerals, fossil fuels, and old growth forest). A basic framework is first developed for determining economically efficient use of resources over time, then extended to consider objectives other than efficiency, as well as the distinguishing biological, ecological, physical, political, and social attributes of each resource. Uncertainty, common property, and various regulatory instruments are discussed, as well as alternatives to government intervention and/or privatization. (Same as: ENVS 2303)

Prerequisites: ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2022, Spring 2020.

ECON 2304 (b, IP, MCSR) Economics of the European Union
Non-Standard Rotation. Enrollment limit: 35.

Focuses on the core economic aspects of the EU integration while taking into account historical and political influences. Major contemporary macroeconomic issues like monetary unification, fiscal policy in a monetary union, theory of customs unions, labor markets and migration, and financial markets and EU crises analyzed through theoretical approaches and empirical evidence.

Prerequisites: Two of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level.

Previous terms offered: Fall 2021, Fall 2019.

ECON 2323 (b, MCSR) The Economics of Information, Uncertainty, and Communication

Non-Standard Rotation. Enrollment limit: 35.

Many standard economic models assume perfect and complete information. This course explores how economic and social phenomena can be better understood by relaxing this assumption. Topics include Bayesian updating, decision-making under uncertainty, risk preferences, adverse selection, moral hazard, signaling, cheap talk, strategic disclosure, the efficient market hypothesis, advertising, media, and social learning. Develops and uses selected tools from probability theory and game theory.

Prerequisites: ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2019.

ECON 2380 (b, MCSR) Economic History of American Enterprise
Non-Standard Rotation. Enrollment limit: 35.

Considers the history of American enterprise over the past two centuries. First examines key issues in the economics of the firm, entrepreneurship, and innovation during the nineteenth century (the period of the second industrial revolution). Then addresses these issues from a more recent perspective (the so-called third industrial revolution). Assesses what lessons for the twenty-first century can be learned from an examination of the development of enterprise since the nineteenth century; and analyzes the extent to which today's "New Economy" raises novel questions for economic theory and its applications.

Prerequisites: ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2020, Spring 2019.

ECON 2409 (b, MCSR) Economics of Money, Banking, and Finance
Gregory DeCoster.
Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Introduction to the functions, structure, and operation of modern monetary and financial systems as they relate to the performance of the economic system. Contemporary debates regarding the effectiveness with which financial institutions and markets fulfill the basic functions of finance in a capitalist economy, and the policy choices of the Federal Reserve System and other regulatory agencies will be emphasized. Formerly Economics 2209. Not open to students who have taken Economics 2301, 3301, 3302.

Prerequisites: Two of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level.

Previous terms offered: Fall 2019.

ECON 2429 (b, MCSR) Financial Crises
Non-Standard Rotation. Enrollment limit: 35.

Presents a historical and theoretical overview of financial crises, from the Dutch Tulipmania of 1636–1637, through the stock market crash of 1929, to the Financial Crisis of 2007–2009. Investigates why financial crises occur, how they spill over onto the broader macroeconomy, and whether policymakers should respond. Covers models of bubbles, banking panics, sovereign debt crises, and currency crises. Closely studies specific historical episodes and considers what lessons can be drawn for contemporary financial regulation and economic policy.

Prerequisites: Two of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2021, Spring 2020.

ECON 2555 (b, MCSR) Microeconomics
Guillermo Herrera; Martin Abel; Erik Nelson.
Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

An intermediate-level study of contemporary microeconomic theory. Analysis of the theory of resource allocation and distribution, with major emphasis on systems of markets and prices as a social mechanism for making resource allocation decisions. Topics include the theory of individual choice and demand, the theory of the firm, market equilibrium under competition and monopoly, general equilibrium theory, and welfare economics.

Prerequisites: Three of: ECON 1050 or either ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level and MATH 1600 or higher or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ECON 2556 (b, MCSR) Macroeconomics
Matthew Botsch.
Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

An intermediate-level study of contemporary national income, employment, and inflation theory. Consumption, investment, government receipts, government expenditures, money, and interest rates are examined for their determinants, interrelationships, and role in determining the level of aggregate economic activity. Policy implications are drawn from the analysis.

Prerequisites: Three of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level and MATH 1600 or higher or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ECON 2557 (b, MCSR) Economic Statistics

Erik Nelson; Rachel Connelly.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

An introduction to the data and statistical methods used in economics. A review of the systems that generate economic data and the accuracy of such data is followed by an examination of the statistical methods used in testing the hypotheses of economic theory, both micro- and macro-. Probability, random variables and their distributions, methods of estimating parameters, hypothesis testing, regression, and correlation are covered. The application of multiple regression to economic problems is stressed. Students who have taken Mathematics 2606 are encouraged to take Economics 3516 instead of this course.

Prerequisites: Three of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level and Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) or MATH 1600 or higher.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ECON 3208 (b) International Trade

Stephen Meardon.

Discontinued Course. Fall 2022. Enrollment limit: 25.

Offers a theoretical and empirical analysis of international trade. Particular attention is given to the standard models of trade: the Ricardian model, the Heckscher-Ohlin model, the specific factors model, and the monopolistic competition model, as well as an introduction to applied general equilibrium models of trade liberalization. Also analyzes current topics such as barriers to trade (quotas, tariffs); the effects of trade liberalization on wage inequality; regional integration blocs; the globalization debate; and the relation between trade, growth, and productivity. Data analysis is used in order to evaluate the success or shortcomings of the theoretical models.

Prerequisites: Two of: ECON 2555 and ECON 2556.

Previous terms offered: Spring 2021.

ECON 3305 (b) Game Theory and Strategic Behavior

Daniel Stone.

Non-Standard Rotation. Fall 2022. Enrollment limit: 25.

A rigorous introduction to mathematical game theory, the theory of strategic behavior. Topics include dominance, rationalizability, pure and mixed strategy Nash equilibrium, sequential and repeated games, subgame perfect equilibrium, bargaining, and games of incomplete information. Applications to business, politics, and sports discussed.

Prerequisites: ECON 2555.

Previous terms offered: Fall 2021, Fall 2019, Fall 2018.

ECON 3350 (b) Mathematical Economics

Non-Standard Rotation. Enrollment limit: 18.

A survey of some of the mathematical techniques used to conduct economic analyses. Topics include utility maximization under uncertainty; solving constrained optimization problems with mathematical programming; optimal control theory; solving complex equations and systems of equations with numerical methods; dynamic programming; and general equilibrium analysis. Students learn to solve problems with MATLAB and other similar programming and statistical software.

Prerequisites: Two of: ECON 2555 and MATH 1800.

Previous terms offered: Fall 2021.

ECON 3355 (b, MCSR) Behavioral Economic Theory

Every Other Year. Enrollment limit: 25.

Behavioral economics is the study of deviations from the standard microeconomics assumptions of optimization and pure self-interest, and economic implications of such deviations. This course covers benchmark theoretical models of the main topics of behavioral economics: biases in belief formation, decisions under certainty and uncertainty, intertemporal choice, nonstandard preferences and preference formation including social forces, and nonstandard strategic choice. The course emphasizes theory but will also cover related experimental and empirical evidence.

Prerequisites: ECON 2555.

Previous terms offered: Spring 2020.

ECON 3401 (b) Financial Economics

Matthew Botsch.

Non-Standard Rotation. Fall 2022. Enrollment limit: 25.

An introduction to the economics of finance using the tools of intermediate microeconomic theory. Explores the economic role of financial markets in determining the price of risk, allocating capital across space, and moving economic value through time. Particular emphasis on questions of market efficiency and social usefulness. Topics likely to include choice under uncertainty, the time value of money, portfolio optimization, the Capital Asset Pricing Model, the Efficient Market Hypothesis, options and derivatives, and the Modigliani-Miller Theorem. Formerly Economics 3301. Not open to students with credit for Economics 2301 taken in the fall 2014 or fall 2015 semesters.

Prerequisites: ECON 2555.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

ECON 3423 (b, MCSR) Economics of Competitive Advantage

Gregory DeCoster.

Every Year. Fall 2022; Spring 2023. Enrollment limit: 30.

Study of the economics underlying successful competitive strategy. Utilizing a small number of fundamental economic concepts and a series of case studies, the course focuses on the strategic imperatives of competitive markets, the sources and dynamics of competitive advantage, and the challenges of skillful management of competitive interactions. In addition, the course examines the historical origins and evolution of the company as an entity, along with governmental efforts to police anticompetitive practices, and develops the corporate finance and accounting concepts required for competitive analysis.

Prerequisites: ECON 2555.

Previous terms offered: Spring 2022, Spring 2021, Fall 2020, Spring 2020.

ECON 3509 (b) International Finance

Non-Standard Rotation. Enrollment limit: 18.

Seminar. Surveys a number of topics in international finance and international macroeconomics, including balance of payments, exchange rate determination, the Mundell-Fleming model of output and exchange rate, exchange rate regimes, international capital flows, and international financial crises. Involves data analysis to empirically evaluate the theoretical models. Also provides a special focus on Asia and Europe by discussing issues such as Asia's role in the global imbalances and the effect of Euro on the capital markets.

Prerequisites: ECON 2556.

Previous terms offered: Spring 2021, Fall 2020, Spring 2020, Fall 2018.

ECON 3510 (b, MCSR) Poverty and Economic Development

Taul Cheong.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Seminar. Examines the issue of poverty in developing countries and considers policy interventions and their potential consequences. Begins by broadly characterizing poverty in developing countries before examining the intersection of poverty and such topics as education, risk and shocks, health, and the distribution of resources within households. Teaches current techniques for causal identification in applied microeconomics using examples from a variety of contexts, including Sub-Saharan Africa and Asia.

Prerequisites: Two of: ECON 2555 and ECON 2555 and either ECON 2557 or ECON 3516 and either ECON 2557 or ECON 3516.

Previous terms offered: Spring 2022, Fall 2019.

ECON 3511 (b) Economic Evaluation of Public Programs

Non-Standard Rotation. Enrollment limit: 18.

Seminar. How to measure the effectiveness of public policy programs. Covers the basics of cost-benefit analysis and modern empirical methods used to measure and evaluate impacts of public programs. Examines the strengths and limitations of randomized control experiments, natural experiments, and non-experimental observational designs with applications to education, health, public assistance, and labor market policies.

Prerequisites: ECON 2557 or MATH 2606.

Previous terms offered: Fall 2021, Fall 2020, Spring 2019.

ECON 3515 (b, DPI, MCSR) Geographic Inequality, Public Policy, and GIS

Non-Standard Rotation. Enrollment limit: 16.

Explores economic inequalities using spatial geographic data and Geographic Information Systems (GIS) and statistical tools. Investigates the role of place in contributing to racial, gender, health, and income inequalities and assesses public policy effectiveness in addressing or contributing to these inequalities. Topics include health and mortality differences, environmental justice, segregation and housing policy, intergenerational links, educational inequalities, crime and policing. Students will learn GIS methods and produce independent research projects at the end of the semester.

Prerequisites: ECON 2557 or MATH 2606 or MATH 1300 or MATH 1400 or PSYC 2520 or ECON 3516.

Previous terms offered: Spring 2022.

ECON 3516 (b) Econometrics

Jessica LaVoice.

Every Fall. Fall 2022. Enrollment limit: 18.

Seminar. A study of the mathematical formulation of economic models and the statistical methods of testing them. A detailed examination of the general linear regression model, its assumptions, and its extensions. Applications to both micro- and macroeconomics are considered. Though most of the course deals with single-equation models, an introduction to the estimation of systems of equations is included. An empirical research paper is required.

Prerequisites: Two of: ECON 2557 or MATH 2606 and MATH 1600 or higher or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ECON 3518 (b) Environmental and Natural Resource Economics

Guillermo Herrera.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

Seminar. Analysis of externalities and market failure; models of optimum control of pollution and efficient management of renewable and nonrenewable natural resources such as fisheries, forests, and minerals; governmental vs. other forms of control of common-pool resources; and benefit-cost analysis of policies, including market-based and non-market valuation. Permission of instructor required during add/drop for students who have credit for Economics 2218. (Same as: ENVS 3918)

Prerequisites: Two of: ECON 2555 and ECON 2557.

Previous terms offered: Fall 2021, Fall 2019.

ECON 3519 (b) The Economics of Development

Non-Standard Rotation. Enrollment limit: 18.

Seminar. Theoretical and empirical analysis of selected microeconomic issues within the context of developing countries. Has a dual focus on modeling household decisions and on the effects of government policy and intervention on household behavior and well-being. Topics include agricultural production, land use systems, technology and credit markets, household labor allocation and migration, investment in education and health, and income inequality.

Prerequisites: Two of: ECON 2555 and ECON 2557 or MATH 2606.

Previous terms offered: Fall 2018.

ECON 3521 (b) The Economics of Land Use, Ecosystem Services, and Biodiversity

Non-Standard Rotation. Enrollment limit: 18.

Seminar. Analysis of the economic forces that shape land-use patterns, the relationship between land-use patterns and ecosystem service provision and biodiversity persistence, and the economic value of ecosystem service provision. Investigates methods for increasing ecosystem service values on the landscape and the economic cost of these methods. Analysis of land-use externalities and the failure of land-use patterns to generate maximum societal net benefits; neoclassical economic theory on land-use; methods for estimating market value of land; methods of non-market valuation; efficient land-use patterns from a societal perspective; methods for finding efficient land-use patterns; and governmental and non-governmental organization land conservation programs. Permission of instructor required during add/drop for all students; required at all times for students who have credit for Economics 2218 (same as Environmental Studies 2302) or 2228 (same as Environmental Studies 2228). (Same as: ENVS 3921)

Prerequisites: Three of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level and MATH 1600 or higher or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2021, Spring 2019.

ECON 3525 (b) Economic Growth in the Long Run

Duman B-Rad.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

This course aims to answer why some countries are rich and others are poor. Explores the underlying determinants of economic growth using both theoretical and empirical approaches. "Proximate" determinants, including physical capital, human capital, and technology, are examined in comparison with "deep" determinants, including geography and climate, institutions, culture and religion, and historical events. Methods include formal models, analysis of qualitative and quantitative historical evidence, and cross-country growth regressions.

Prerequisites: Two of: ECON 2555 and ECON 2557.

ECON 3526 (b) Trade Doctrines and Trade Deals

Non-Standard Rotation. Enrollment limit: 18.

Seminar. An inquiry into the consequences of theory meeting practice in international trade negotiations. The historical relationship between economic ideas and the bilateral trade treaties, multilateral trade arrangements, and retaliatory tariff laws of Great Britain and the United States considered. The timeline extends from the eighteenth century to the present, from the Treaty of Methuen (1703) to the World Trade Organization.

Prerequisites: ECON 2555.

Previous terms offered: Fall 2020.

ECON 3531 (b) The Economics of the Family

Non-Standard Rotation. Enrollment limit: 18.

Seminar. Microeconomic analysis of the family, gender roles, and related institutions. Topics include marriage, fertility, married women's labor supply, divorce, and the family as an economic organization. (Same as: GSWS 3302)

Prerequisites: Two of: ECON 2555 and either ECON 2557 or ECON 3516.

Previous terms offered: Spring 2022, Fall 2019.

ECON 3533 (b) Behavioral Economics

Daniel Stone.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Standard economics (i.e., neoclassical economics) assumes that individuals are self-interested, rational actors, who optimize well-defined, stable objective functions. Behavioral economics is the study of systematic departures from these assumptions, and the implications for economic outcomes. Topics include errors in information-processing and belief formation, behavioral choice under uncertainty (loss aversion, reference dependence), time inconsistent behavior (self-control problems), and social preferences (altruism, fairness, and reciprocity).

Prerequisites: Two of: ECON 2555 and either ECON 2557 or MATH 2606 or ECON 3516.

Previous terms offered: Spring 2022, Spring 2020, Spring 2019.

ECON 3535 (b) Economics of Education

Rachel Connelly.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

Seminar. Examines the theoretical and empirical analysis of education decision-making and the consequences of educational choices using an economic lens. Begins with the basic human capital model and expands on it to consider signaling, the interplay between ability and human capital, modeling expectations, and the many challenges of measuring the rate of return to educational investment. Educational policies from preschool to graduate studies are also considered, including the public funding of education, class size, and outcome testing. Examples are drawn from both developed and developing countries. (Same as: EDUC 3535)

Prerequisites: Two of: ECON 2555 and ECON 2557 or MATH 2606.

Previous terms offered: Spring 2021, Spring 2020.

ECON 3540 (b) Law and Economics

Zorina Khan.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

Seminar. Law and economics is one of the most rapidly growing areas in the social sciences. The field applies the concepts and empirical methods of economics to further our understanding of the legal system. Explores the economic analysis of law and legal institutions, including the economics of torts, contracts, property, crime, courts, and dispute resolution. Also focuses on topics in law and economics such as antitrust and regulation, corporations, the family, labor markets, product liability, and intellectual property. Students are introduced to online sources of information in law, and are required to apply economic reasoning to analyze landmark lawsuits in each of these areas. Not open to students who have credit for Economics 3541.

Prerequisites: ECON 2555.

Previous terms offered: Spring 2021, Fall 2019, Fall 2018.

ECON 3545 (b) Applied Macroeconomics for Policy and Finance

Non-Standard Rotation. Enrollment limit: 18.

Seminar. When is an economy heading for a crisis? How can we assess its debt dynamics—both government debt and aggregate external debt—and the robustness of its financial institutions? When is an economy set for more rapid growth? Analytic answers to questions like these—which are critical to the work of the IMF, major investors and fund managers, and economic commentators—are the essence of the macroeconomic diagnostics covered.

Prerequisites: Two of: ECON 2555 and ECON 2556.

Previous terms offered: Fall 2018.

ECON 3547 (b, MCSR) Big Data and Economics

Non-Standard Rotation. Enrollment limit: 16.

A through exploration of the implications that the data revolution, which has been brought about by the Internet and technological advances, has brought to the study of economics. Administrative data, real-time data, and openly available data sets have made it possible to answer questions that were previously problematic, and to offer near real-time analysis of time sensitive questions. Four overarching topics are explored: big data innovations, big data and economic theory, big data for public policy, and the limitations of big data.

Prerequisites: Two of: ECON 2555 and ECON 2557.

Previous terms offered: Spring 2020.

ECON 3551 (b, MCSR) Labor Economics

Martin Abel.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

Seminar. The course covers: i) decisions made by employers in the hiring process and employment relationship, ii) decisions made by job seekers and workers, iii) the role that governments play in designing labor markets policies. The first block investigates how firms screen applicants and motivate workers, including the design of incentives, employment of big data, and issues relating to hiring and workplace discrimination. The second block explores how individuals search for work, form wage expectations, and decide whether to migrate for work. Last, we will focus on the role of the government in designing (active) labor market policies such as wage subsidies, quotas, and job counseling. Methodologically, we will review empirical strategies used to study these topics, enabling students to read academic journal articles. Students have the choice of either creating a detailed research design or an empirical research project that includes original data work.

Prerequisites: Two of: ECON 2555 and ECON 2557.

ECON 3552 (b, DPI, MCSR) Detecting Discrimination

Martin Abel.

Every Year. Spring 2023. Enrollment limit: 18.

Seminar. An applied economic research course designed for students interested in applying quantitative research to investigate discrimination and other social issues. We review research methods with a particular focus on experimental research. We discuss theories for why people discriminate and examine empirical evidence on the prevalence of discrimination. Each term the seminar will be organized around a common theme. Students work in groups to implement their own research project. Through a combination of lectures, workshops and group project work, students get a hands-on experience on how to conduct empirical research including identifying research questions; designing surveys; designing and implementing experiments; obtaining institutional approval to conduct research with human subjects; cleaning, managing, analyzing, and presenting primary data; and writing an academic style paper.

ECON 3559 (b, MCSR) The Behavioral Economics of Affective Polarization

Daniel Stone.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

Seminar. This course will introduce students to the main topics of behavioral economics—the approach to economics relaxing the traditional assumptions of rational and purely self-interested choice—with an emphasis on applications to affective polarization, or why interpersonal disagreement tends to lead to interpersonal hostility. The course will focus on affective polarization in US politics over recent decades but will also discuss affective polarization in other political and non-political contexts. The course will be based on the instructor's book on the topic (an e-version will be available free to students) and cover related journal articles and books from economics and other social sciences. Students will conduct research projects on theories of affective polarization and interventions for reducing it.

ECON 3560 (b) Urban Economics

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Studies the relationship between economics and urban geography, specifically focusing on how individuals, firms, and other organizations make economic choices across urban areas. Provides theoretical and empirical analyses of cities from both historical and contemporary vantage points. Topics include the development of urban areas, patterns of land use within cities, and the causes and consequences of urban poverty, segregation, congestion, and crime. Also examines the merits of policy responses to these urban problems.

Prerequisites: Two of: ECON 2555 and either ECON 2557 or MATH 2606 or ECON 3516.

Previous terms offered: Spring 2022, Spring 2021.

ECON 3562 (b, IP, MCSR) Economics with Satellites

Every Fall. Enrollment limit: 18.

Seminar. Imagine a future where we could do miraculous things. We could quantify economic activity anywhere in the world—even in the midst of pandemics or wars—using satellites to measure city lights at night and densities of air pollution. We could observe the economy living and breathing in real-time, applying artificial intelligence to identify and count cars in images of millions of parking lots. We could do things that were never before possible: uncover ethnic favoritism by assessing the quality of roofs in slums, create a global inventory of crop yields and forecast the effect of global warming over the next century, and even quantify the effect of illegal loggers in the Amazon - to the last tree. The future is now. This class will introduce students to the growing field of using satellite data to conduct economic analysis, and offer a new perspective on the global economy: From space.

Prerequisites: ECON 2557.

Previous terms offered: Fall 2021.

ECON 3564 (b, MCSR) The Economics of Epidemics

Erik Nelson.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

An examination of policy responses to epidemics. Policy responses to bacterial and viral diseases, including AIDS and malaria, as well as policy responses to lifestyle diseases, such as opioid addiction and type 2 diabetes, will be analyzed, critiqued, and compared through an economic lens. Examines the strengths and limitations of various causal inference methods in evaluating these public health initiatives and assessing their impacts on health and economic outcomes.

Prerequisites: Two of: ECON 2555 and either ECON 2557 or ECON 3516.

Previous terms offered: Spring 2022.

ECON 3634 (b) Behavioral Finance

Non-Standard Rotation. Enrollment limit: 16.

Seminar. An extensive literature from psychology documents that decision-makers do not behave fully rationally. Behavioral economic theories that incorporate these insights have revolutionized the study of finance. Explores the implications of behavioral deviations from the standard model for financial markets and financial decision-making, including nonstandard preferences, nonstandard beliefs, and heuristics and biases. Emphasizes recent empirical research in the field. Topics may include: noise traders, news models of bubbles, predictability, the disposition effect, status-quo bias, investor inattention, overconfidence, managerial traits, learning from experience effects. Formerly Economics 3534.

Prerequisites: Two of: ECON 2557 or MATH 2606 and either ECON 2555 or ECON 2556 or ECON 3516.

Previous terms offered: Spring 2022.

Education

Overview & Learning Goals

Overview

The education department fuses Bowdoin College's spirit of inquiry and commitment to the common good.

Core Values

The following core values guide all aspects of the education department's curriculum, teaching, and scholarship:

1. Be aware of the big picture. The study of education sheds light on one of the fundamental public institutions of the United States. Such study also reveals the humanistic dimensions of teaching and learning that are vital to constructing a meaningful life. Responsible teaching and informed dialogue about education depend upon a solid background in the social foundations of education.
2. Embrace theory and practice. Theoretical and text-based inquiries, as well as empirical studies of all kinds, provide a basis for understanding the purpose and practice of education. For teachers, effective practice depends upon a strong foundation of content knowledge and thoughtful application of curricular and pedagogical theory to practice. Teachers and students at all levels of education gain expertise by listening, observing, doing, and reflecting.
3. Model and live in the spirit of inquiry. Students and instructors in the education department position themselves first as learners about those they teach and about the communities in which they teach. They recognize the limitations of their own perspectives and the need to draw on multiple sources of knowledge. Students and instructors in the department believe that teachers, especially, cannot assume that others will learn as they did and do. Therefore, teachers cannot teach only as they were taught. Teaching is an intellectually challenging practice that requires ongoing learning, self-assessment, collaboration, and research.

Learning Goals

The following learning goals emerge from the education department's core values and inform the development of individual courses:

1. Students draw on disciplinary and interdisciplinary perspectives to analyze education and schooling, including how power and inequity shape policies, dilemmas, and debates.
2. Students draw on disciplinary and interdisciplinary perspectives to analyze educational practices, teaching, and learning, including how power and inequity shape learning experiences and outcomes.
3. Students demonstrate their understanding of the diverse ways individuals and groups make meaning and interpret their experiences of education.
4. Students create well-reasoned and research-based arguments to support their beliefs about equitable and quality educational practices, learning environments, and schooling.

Academic Program

Students may choose to coordinate their study of education with any department/program at Bowdoin that offers a major or they may minor in education.

Course selection for the coordinate major is completed in close consultation with an education department advisor. Students who choose to major in sociology, for instance, might construct a course of study that explores “schooling and social difference” and take courses in educational philosophy, sociology of education, student exceptionality, education and citizenship, and gender, sexuality, and schooling. Students who choose to major in government and legal studies might construct a course of study in “school reform” and take courses in educational policy, education and law, school privatization, urban education, and educational history. Students who choose to major in biology and are considering becoming life science teachers might construct a course of study around “science teaching and learning” and take courses in student exceptionality, science education, teaching and learning, curriculum development, and urban education.

Options for Majoring or Minor in the Department

Students may elect to coordinate a major in education with any other department/program major, or to elect either the mathematics and education or physics and education interdisciplinary major. Students pursuing a coordinate or interdisciplinary major may not normally elect a second major. Non-majors may elect to minor in education.

Department Website (<https://www.bowdoin.edu/education/>)

Faculty

Charles Dorn, *Department Chair*

Lynn A. Brettler, *Department Coordinator*

Professors: Charles Dorn, Doris A. Santoro
Assistant Professor: Alison Riley Miller

Lecturer: Kathryn Byrnes

Faculty/Staff Website (<https://www.bowdoin.edu/education/faculty-and-staff/>)

Requirements

Education Coordinate Major

Students coordinate their study of education with any department/program at Bowdoin that offers a major. To satisfy the requirements for the coordinate major in education, students must complete the six credits

detailed below as well as the major requirements within their coordinated department/program.

Code	Title	Credits
Required Courses		
EDUC 1101	Contemporary American Education	1
Select one first-year writing seminar in education (1000-1049) or one education course at the 2000 level or higher.		1
Select four courses at the 2000 level or higher.		4

- Students may count one intermediate independent study and one advanced independent study toward the major.
- With departmental approval, one study away course or course that is not cross-listed with the education department may be used to fulfill the major requirements.
- Majors may count up to two courses cross-listed with education towards the major.
- All majors are encouraged to take a course at the 3000 level.

Education Minor

A minor in education requires four courses:

Code	Title	Credits
Required Courses		
EDUC 1101	Contemporary American Education	1
Select one first-year writing seminar in education (1000-1049) or one course in education at the 2000 level or higher.		1
Select two courses in education at the 2000 level or higher.		2

- Students may count one intermediate independent study or one advanced independent study toward the minor.
- With departmental approval, one study away course or course that is not cross-listed with the education department may be used to fulfill the minor requirements.
- Minors may count up to two courses cross-listed with education towards the minor.
- All minors are encouraged to take a course at the 3000 level.

Interdisciplinary Majors

The education department participates in interdisciplinary programs in education and mathematics and in education and physics. See the Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>) area for more information.

Additional Information

Additional Information and Department Policies

- Students may count one intermediate independent study and one advanced independent study toward the major.
- Students may count one intermediate independent study or one advanced independent study toward the minor.
- Students may count up to two courses cross-listed with education toward the coordinate major.
- All majors and minors are encouraged to take an education course at the 3000 level.

- Courses that count toward the coordinate major or minor must be taken for regular letter grades.
- Students must earn a grade of C- or better in order to have a course count toward the coordinate major or minor or serve as a prerequisite.

Bowdoin Teacher Scholars Program

The Bowdoin Teacher Scholars are a select group of Bowdoin undergraduates and graduates who embrace the College's commitment to the common good by becoming teachers through a rigorous scholarly and classroom-based program. For the most current information about the Bowdoin Teacher Scholars program, please visit the website here (<https://www.bowdoin.edu/education/teacher-scholars/>).

- Students interested in the Bowdoin Teacher Scholars teacher certification program may complete the program's four prerequisite courses in the context of the coordinate major or the minor, or they may choose to do so outside of either the coordinate major or the minor.
- Courses in the teaching pathway must be taken at Bowdoin.
- Courses must be taken for regular letter grades to apply to Bowdoin Teacher Scholars eligibility.
- Students must earn a grade of C- or better in order to have a course count as a content area requirement.
- Students should be aware that EDUC 3301 Teaching and Learning and EDUC 3302 Curriculum Development have "content area" prerequisite courses that are taken outside of the education department. These are:
 - **Social Studies:** Two courses in history and two additional courses in government, anthropology, economics, history, sociology, or psychology.
 - **English:** Four courses in English.
 - **Mathematics:** Four courses in mathematics.
 - **World Languages:** Four courses in a language.
 - **Life Science:** Four courses in biology.
 - **Physical Science:** Three courses in one of the following: earth and oceanographic science, chemistry, or physics, and one course in one of the other departments.

Information for Incoming Students (p. 181)

Students who have an interest in studying education (including those who hope to become certified secondary school teachers) should take EDUC 1101 Contemporary American Education either their first or second semester (the course is offered every semester). The department is also offering a first-year writing seminar in fall 2022, EDUC 1015 Urban Education and Community Organizing, designed to introduce students to College level writing through the study of education as a discipline.

The Bowdoin Education Department offers a no-cost opportunity to become a certified public school teacher. Students who complete the Bowdoin Teacher Scholars program are eligible for loan reimbursement. This program can be completed as an undergraduate or within two years of graduation. Please see a member of the Education Department (<https://www.bowdoin.edu/education/faculty-and-staff/>) to discuss your eligibility and plan your pathway.

Courses

EDUC 1015 (c, FYS) Urban Education and Community Organizing

Doris Santoro.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Approaches urban schools and communities as sites of promise and innovation as well as sites for social and political struggle. Examines the significance of community organizing as a form of education and the role of community organizing to improve urban schools. Readings include an examination of organizing tactics from historical figures such as Saul Alinsky, Ella Baker, Myles Horton, and Dolores Huerta. Topics may include "grow your own" teacher initiatives, parent trigger laws, and culturally-sustaining educational programming. (Same as: URBS 1015)

Previous terms offered: Spring 2020.

EDUC 1020 (c) The Educational Crusade

Charles Dorn.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Why do you go to school? What is the central purpose of public education in the United States? Should public schools prepare students for college? The workforce? Competent citizenship? Who makes these decisions and through what policy process are they implemented? Explores the ways that public school reformers have answered such questions, from the Common School Crusaders of the early nineteenth century to present advocates of No Child Left Behind. Examining public education as both a product of social, political, and economic change and as a force in molding American society, highlights enduring tensions in the development and practice of public schooling in a democratic republic.

Previous terms offered: Fall 2021, Fall 2020.

EDUC 1028 (b) Sociology of Campus Life: Race, Class, and Inequality at Elite Colleges

Non-Standard Rotation. Enrollment limit: 16.

Explores higher education in the contemporary United States through a sociological lens, highlighting the ways that elite colleges and universities both promote social mobility and perpetuate inequality. Examines the functions of higher education for students and society; issues of inequality in college access, financing, campus experiences, and outcomes later in life; the history and consequences of affirmative action; how and why historically white colleges and universities have diversified their student bodies; the challenges and benefits of diversity and inclusion on campus; and other topics. Emphasis on writing sociologically for public and academic audiences (Same as: SOC 1028)

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

EDUC 1101 (c, DPI) Contemporary American Education

Doris Santoro.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 48.

What are the purposes of public education and what makes it public? Do schools serve an individual good or a collective good? Is America's system of public education organized to serve these purposes? What is the public's responsibility towards public education? How do current school reforms affect various stakeholders? The primary objective is to examine the cultural, social, economic, and institutional dilemmas confronting public schooling in the United States today. By approaching these dilemmas as unsolved puzzles instead of systematic failures, important insights are gained into the challenges confronting a democratic society historically committed to the public provision of education. Considers which theories and purposes of education motivate current reform efforts. Likewise, examines who shapes public discourse about public education and by what strategies. Employs a mixed approach of reading, discussion, and class-based activities to explore important educational issues including school reform and finance, charter schools, busing, vouchers, unequal educational opportunities and outcomes; and accountability, standardization, and testing.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

EDUC 2049 (c) Learning from Nature: A History of Environmental Education in America

Charles Dorn.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Species Extinction. Deforestation. Acid Rain. Climate Change. For a century and a half Americans have quarreled ardently over the causes and consequences of environmental decline. The frequency of these debates—and their ferocity—compels the question of how Americans came to know and believe, what they thought they knew and believed, about the natural world. This course investigates how educators and entrepreneurs, politicians and policy makers, used environmental education as a vehicle for promoting a wide array of cultural, political, and economic beliefs alongside, if not often in place of, fostering students' understanding of the natural world. It examines many different forms of environmental education put into practice over the course of the long-twentieth century and demonstrates how teaching about nature was often harnessed to influence young people's identities, behaviors, and beliefs.

Prerequisites: EDUC 1020 or EDUC 1101 or HIST 1000 - 2969 or HIST 3000 or higher.

EDUC 2203 (c) Educating All Students

Alison Riley Miller.

Every Fall. Fall 2022; Spring 2023. Enrollment limit: 25.

An examination of the economic, social, political, and pedagogical implications of universal education in American classrooms. Focuses on the right of every student, including students with physical and/or learning differences, and those who have been identified as gifted, to an equitable education. Requires a minimum of twenty-four hours of observation in a local secondary school.

Prerequisites: EDUC 1101.

Previous terms offered: Fall 2021, Spring 2021, Fall 2020, Fall 2019, Fall 2018.

EDUC 2204 (c) Educational Policy

Non-Standard Rotation. Enrollment limit: 35.

An examination of educational policy-making and implementation at the federal, state, and local levels. Particular attention is paid to the relationship between policy and school practice and the role practitioners play in policy-making. Policies explored include school choice, standards and accountability, No Child Left Behind, Race to the Top, the Common Core, and Proficiency-Based Instruction.

Prerequisites: EDUC 1020 or EDUC 1101.

Previous terms offered: Fall 2019.

EDUC 2206 (b, DPI) Sociology of Education

Non-Standard Rotation. Enrollment limit: 35.

Examines the ways that formal schooling influences individuals and the ways that social structures and processes affect educational institutions. Explores the manifest and latent functions of education in modern society; the role education plays in stratification and social reproduction; the relationship between education and cultural capital; the dynamics of race, class, and gender in education; and other topics. (Same as: SOC 2206)

Prerequisites: Two of: SOC 1101 and SOC 2000 - 2969.

Previous terms offered: Spring 2022, Fall 2020.

EDUC 2211 (c) Education and the Human Condition

Non-Standard Rotation. Enrollment limit: 35.

Explores the relationship between education and being/becoming human. Topics may be guided by the questions: What does it mean to be an educated person? How can education lead to emancipation? How might teaching and learning lead to the good life? What is our responsibility to teach the next generation? Readings may include works by Hannah Arendt, John Dewey, W. E. B. Du Bois, Plato, Jacques Rancière, among others.

Previous terms offered: Spring 2022, Spring 2019.

EDUC 2221 (c) Democracy's Citadel: Education and Citizenship in America

Non-Standard Rotation. Enrollment limit: 35.

Examines the relationship between education, citizenship, and democracy in America. Questions explored include: What does public mean and how necessary is a public to democracy? Is there something democratic about how Americans choose to govern their schools? What does citizenship mean? Is education a public good with a collective economic and civic benefit, a private good with benefits to individuals whose future earnings depend on the quality of their education, or some combination of the two? What type of curriculum is most important for civic education and how should it be taught? What policies are necessary to prevent economic inequality from undermining education's role in fostering democratic citizenship? To what extent are the concepts of education for democracy and democratic education related?

Prerequisites: EDUC 1020 or EDUC 1101.

Previous terms offered: Fall 2018.

EDUC 2222 (b) Educational Psychology

Kathryn Byrnes.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course introduces the foundations of adolescent development and educational psychology. We examine topics such as identity development, cognitive development, social and cultural approaches to learning, risk taking, resilience, and positive youth development for young people ages 10-19. Course concepts and theories will be grounded in empirical research and will be applied to understanding contemporary opportunities and challenges faced by adolescent learning in both school and out-of-school environments. Insights for the ways in which educators can design learning experiences to better serve students' needs from a variety of backgrounds will be cultivated through a field placement working with students. (Same as: PSYC 2012)

Prerequisites: EDUC 1101 or PSYC 1101 or Placement in above PSYC 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

EDUC 2248 (c) Getting In: Merit, Equity, and Educational Admissions

Non-Standard Rotation. Enrollment limit: 35.

What does it take to get admitted to a school, class, or program? From the time students enter the educational system, they encounter judgments about their worthiness for countless opportunities. What factors weigh in their favor? Who decides whether they deserve a spot? What does a fair admissions system look like? In this course, students will be introduced to the theory and practice of educational admissions in multiple contexts. While providing a broad overview, this course will also engage students in a deep exploration of contemporary and controversial topics that have a profound influence on the field, including: access and equity; bias and discrimination; standardized tests and "non-cognitive" variables; race and ethnicity in selective admission; academic tracking; and giftedness. By the end of the course, students will have a deeper understanding of the competing interests, ethical considerations, and social implications that factor into educational admissions.

Prerequisites: EDUC 1101.

Previous terms offered: Spring 2020.

EDUC 2249 (c) The Evolution of Testing and Data Use in Schools

Non-Standard Rotation. Enrollment limit: 35.

Traces the evolution of testing and data use in education, from the development of college entrance exams to the movement for merit-based teacher compensation. With an eye toward practical application, students will learn to analyze test and data use by applying the principles of validity and reliability that underlie educational measurement. The course addresses the diversity of ways that test data are used by teachers, students, researchers, and policymakers to inform education policy and everyday classroom practice. Topics of focus include high-stakes standardized testing, classroom assessment, data-based decision-making, large scale assessment, and teacher accountability. Students will learn to manipulate data and analyze various types of measurement instruments, and conduct research projects on topics of their choice.

Prerequisites: EDUC 1101.

Previous terms offered: Spring 2019.

EDUC 2250 (b) Education and Law

Non-Standard Rotation. Enrollment limit: 19.

A study of the impact of the American legal system on the functioning of schools in the United States through an examination of Supreme Court decisions and federal legislation. Analyzes the public policy considerations that underlie court decisions in the field of education and considers how those judicial interests may differ from the concerns of school boards, administrators, and teachers. Issues to be discussed include constitutional and statutory developments affecting schools in such areas as free speech, sex discrimination, religious objections to compulsory education, race relations, teachers' rights, school financing, and the education of those with disabilities. (Same as: GOV 2024)

Previous terms offered: Fall 2021, Fall 2020, Spring 2019.

EDUC 2260 (c) Science Education: Purpose, Policy, and Potential

Alison Riley Miller.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Why do all Americans need to learn science and what are we doing to improve science education in our schools? With the release of the Next Generation Science Standards and in response to America's poor standing on international assessments of math and science, there has been a shift in public interest and dialogue around why and how we teach science that is reminiscent of the late 1950s after the Soviet launch of Sputnik. Considers the goals of science education in the United States and explores research and policy related to science curriculum, teaching practice, and student learning.

Previous terms offered: Spring 2022, Spring 2020.

EDUC 2272 (c) Urban Education and Community Organizing

Non-Standard Rotation. Enrollment limit: 35.

Approaches urban schools and communities as sites of promise and innovation as well as social and political struggle. Examines the significance of community organizing as a form of education and the role of community organizing to improve, defend, and transform urban schools. Engages in major debates around urban education through readings and films. Features the perspectives of leading education researchers, policymakers, community organizers, and teacher scholars. Includes discussions of popular education, parent trigger laws, privatization, social movement unionism, and culturally-sustaining educational programming. (Same as: URBS 2272)

Previous terms offered: Fall 2020.

EDUC 2279 (b) Diversity in Higher Education

Ingrid Nelson.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores higher education in the contemporary United States through a sociological lens, highlighting the ways that colleges and universities both promote social mobility and perpetuate inequality. Examines the functions of higher education for students and society; issues of inequality in college access, financing, campus experiences, and outcomes later in life; the challenges and benefits of diversity and inclusion; and other topics, with special attention across all topics to the case of African Americans. (Same as: SOC 2330, AFRS 2330)

Prerequisites: SOC 1101.

Previous terms offered: Spring 2021.

EDUC 2285 (c) The Ivory Tower: Higher Education in American History
Non-Standard Rotation. Enrollment limit: 16.

What roles have colleges and universities in the United States played over time? This course examines the social, political, and economic tensions that transformed higher education from a collection of small, narrowly defined, postsecondary institutions in the eighteenth century into a vast, multipurpose educational enterprise in contemporary society. The course emphasizes writing as a process and incorporates instruction in research-driven writing leading to students completing a major research project. (IRBW)

Prerequisites: EDUC 1020 or EDUC 1101 or HIST 1000 or higher.

Previous terms offered: Spring 2022, Spring 2021.

EDUC 2310 (c) Separate and Unequal: Education, Race, and Democracy in the United States

Non-Standard Rotation. Enrollment limit: 35.

Examines the often-fraught connection between American educational ideals and the particularly American history of race and racism. Students will analyze this changing, contested, and pivotal connection through historical and philosophical perspectives. The course focuses on pivotal moments in the history of American education such as the development and expansion of public schools in the nineteenth century, the progressive education era, and the desegregation of American public education. In each of these moments, students will explore the actions of people—black, white, thinkers, theorists, activists, litigators, students, parents, educators, and citizens—who struggled to shape American education, as well as the ways in which the ideals driving such moments were both shaped by and silent to ongoing struggles surrounding race and racism. The course will conclude by asking students to examine how race and racism continue to shape American education today. (Same as: AFRS 2620)

Prerequisites: EDUC 1101 or AFRS 1101.

Previous terms offered: Spring 2019.

EDUC 3301 (c) Teaching and Learning

Alison Riley Miller.

Every Fall. Fall 2022. Enrollment limit: 18.

A study of what takes place in classrooms: the methods and purposes of teachers, the response of students, and the organizational context. Readings and discussions help inform students' direct observations and written accounts of local classrooms. Peer teaching is an integral part of the course experience. Requires a minimum of thirty-six hours of observation in a local secondary school. Education 3302 must be taken concurrently with this course. In order to qualify for this course students must have Education 1101 and 2203; junior or senior standing; a concentration in a core secondary school subject area (English: four courses in English; foreign language: four courses in the language; life science: four courses in biology; mathematics: four courses in mathematics; physical science: three courses in chemistry, earth and oceanographic science, or physics and one course in one of the other departments listed; or social studies: two courses in history and two courses in anthropology, economics, government, history, psychology or sociology. Permission of the instructor.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

EDUC 3302 (c) Curriculum Development

Charles Dorn.

Every Fall. Fall 2022. Enrollment limit: 18.

A study of the knowledge taught in schools; its selection and the rationale by which one course of study rather than another is included; its adaptation for different disciplines and for different categories of students; its cognitive and social purposes; the organization and integration of its various components. Education 3301 must be taken concurrently with this course. In order to qualify for this course, students must have Education 1101 and 2203; junior or senior standing; and a concentration in a core secondary school subject area (English: four courses in English; foreign language: four courses in the language; life science: four courses in biology; mathematics: four courses in mathematics; physical science: three courses in chemistry, earth and oceanographic science, or physics and one course in one of the other departments listed; or social studies: two courses in history and two courses in anthropology, economics, government, history, psychology, or sociology). Permission of the instructor.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

EDUC 3303 (c) Student Teaching Practicum

Charles Dorn.

Every Spring. Spring 2023. Enrollment limit: 18. Credit/D/F Only.

Required of all students who seek secondary public school certification, this final course in the student teaching sequence requires that students work full time in a local secondary school from early January to late April. Grading is Credit/D/Fail. Education 3304 must be taken concurrently. Students must complete an application and interview. Students with the following are eligible for this course: Education 2203, 3301, and 3302; junior or senior standing; a cumulative 3.0 grade point average; a 3.0 grade point average in Education 3301 and 3302; and eight courses in a subject area that enables them to be certified by the State of Maine (English: eight courses in English; world language: eight courses in the language; life science: six courses in biology and two additional courses in biology, biochemistry, or neuroscience; mathematics: eight courses in mathematics; physical science: six courses in chemistry, earth and oceanographic science, or physics, and one course in each of the other departments listed; or social studies: six courses in history (at least two must be non-United States history) and one course each in two of the following departments: anthropology, economics, government, psychology, or sociology).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

EDUC 3304 (c) Bowdoin Teacher Scholar Seminar: Analysis of Teaching and Learning

Charles Dorn.

Every Spring. Spring 2023. Enrollment limit: 18.

Taken concurrently with Education 3303, Student Teaching Practicum. Considers theoretical and practical issues related to effective classroom instruction. Students with the following are eligible for this course: Education 2203, 3301, and 3302; junior or senior standing; a cumulative 3.0 grade point average; a 3.0 grade point average in Education 3301 and 3302; and eight courses in a subject area that enables them to be certified by the State of Maine (English: eight courses in English; world language: eight courses in the language; life science: six courses in biology and two additional courses in biology, biochemistry, or neuroscience; mathematics: eight courses in mathematics; physical science: six courses in chemistry, earth and oceanographic science, or physics, and one course in each of the other departments listed; or social studies: six courses in history (at least two must be non-United States history) and one course each in two of the following departments: anthropology, economics, government, psychology, or sociology).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

EDUC 3333 (c) Contemporary Research in Education Studies

Doris Santoro.

Every Year. Spring 2023. Enrollment limit: 16.

Draws together different theoretical, policy, and practice perspectives in education in the United States around a specific topic of inquiry determined by the instructor. Examines methodological perspectives in the field, e.g., quantitative, qualitative, and humanistic research. Students read original, contemporary research and develop skills to communicate with various educational stakeholders.

Prerequisites: Three of: EDUC 1101 and EDUC 2000 - 2969 or either EDUC 3000 or higher and either EDUC 2000 - 2969 or EDUC 3000 or higher.

Previous terms offered: Spring 2022, Spring 2021, Fall 2019, Fall 2018.

EDUC 3535 (b) Economics of Education

Rachel Connelly.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

Seminar. Examines the theoretical and empirical analysis of education decision-making and the consequences of educational choices using an economic lens. Begins with the basic human capital model and expands on it to consider signaling, the interplay between ability and human capital, modeling expectations, and the many challenges of measuring the rate of return to educational investment. Educational policies from preschool to graduate studies are also considered, including the public funding of education, class size, and outcome testing. Examples are drawn from both developed and developing countries. (Same as: ECON 3535)

Prerequisites: Two of: ECON 2555 and ECON 2557 or MATH 2606.

Previous terms offered: Spring 2021, Spring 2020.

English

Overview & Learning Goals

The Department of English at Bowdoin College takes a broad and varied approach to the study of Anglophone literature (British, American, and global) across a range of periods and genres.

Curriculum Map of the English Major

Students undertake a flexible path of rigorous study through the major in order to become engaged, informed, and resourceful readers and writers. Majors develop fluency in critical methodologies and paradigms of the field. Students may also choose from courses in creative writing, including poetry, fiction, nonfiction, and screenwriting. The department's curriculum contributes to Africana studies; Asian studies; cinema studies; environmental studies; gender, sexuality, and women's studies; and theater.

The department offers courses across all levels, from first-year writing seminars to fiction-writing workshops and advanced seminars. At the introductory level, the department offers first-year writing seminars and 1100-level courses. In addition to more advanced classes at the 2000 and 3000 levels, the department also offers opportunities for independent work, such as independent studies and honors projects.

Introductory Courses

First-year writing seminars in English offer reading- and writing-intensive introductions to Anglophone literature and film focused on particular themes. They also introduce students to college-level analytical writing.

ENGL 1060 English Composition is a skills-based and workshop-driven class aimed at helping students to improve their writing. It focuses on the nuts and bolts of composition, including grammar and mechanics, modes of argumentation and analysis, and citation practices. Students gain portable writing skills for college and for life, through practice and revision. (Does not count toward the English major.)

ENGL 1070 The Art of Rhetoric and Composition is a workshop-driven class aimed at helping students perfect their writing and speaking. Intended for confident writers, it focuses on imitating excellent models of analysis drawn from the history of rhetoric and literature, including etymology, use of literature for writing persuasive prose, and modes of public speaking. (Does count toward the English major)

Courses numbered in the 1100s are general introductions to Anglophone literature through broad overviews of particular genres, methods, and topics that transcend specific historical periods. Students learn to apply basic methods to literary analysis and cultivate greater appreciation of primary texts. Intended for prospective majors and non-majors alike.

Intermediate Courses

2000-level courses constitute the core offerings in the major, covering all periods in the Anglophone literary tradition, from early medieval literature to the present.

Intermediate seminars are 2000-level courses with a cap of sixteen students per class. They offer the opportunity for more intensive work in literary analysis and deeper focus on methodological skills required for advanced research in the major. Students practice applying and move toward mastery of theoretical and critical paradigms. Potential

majors are strongly encouraged to take an intermediate seminar in their sophomore year.

Remaining 2000-level courses offer in-depth and period-based study of Anglophone literature through specific historical or cultural subfields. Students learn to analyze literary texts informed by an engagement with secondary sources and develop greater awareness of critical paradigms and methodologies.

Advanced Courses

3000-level seminars offer a capstone experience in the major. Students gain greater awareness of current critical trends within a literary subfield and develop facility with reading and evaluating scholarship. These advanced courses offer students the opportunity for collaborative work and for conducting independent research that may lead to an honors project.

Options for Majoring or Minorin in the Department

Students may elect to major in English, the English and theater interdisciplinary major, or to coordinate a major in English with digital and computational studies, education, or environmental studies. Students pursuing a coordinate or interdisciplinary major may not normally elect a second major. Non-majors may elect to minor in English.

Faculty

Guy Mark Foster, *Department Chair*
Laurie Holland, *Department Coordinator*

Professors: Aviva Briefel (Cinema Studies)‡, Brock Clarke, David Collings, Marilyn Reizbaum
Associate Professors: Tess Chakkalakal (Africana Studies)‡, Guy Mark Foster, Ann Louise Kibbie, Aaron W. Kitch, Belinda Kong (Asian Studies), Hilary J. Thompson, Elizabeth Muther, Emma Maggie Solberg‡
Assistant Professors: Morten K. Hansen, Samia Rahimtoola, Alex Marzano-Lesnevich*
Senior Writer in Residence: Anthony E. Walton
Lecturer: Meredith McCarroll
Visiting Faculty: Zahir Janmohamed

Faculty/Staff Website (<https://www.bowdoin.edu/english/faculty-and-staff/>)

Requirements
English Major

There is no required gateway course to the major. All entering first-year students may enroll in first-year writing seminars, 1000-level courses, and some 2000-level courses. All second-semester first-year students may enroll in any 2000-level course. Prospective majors are encouraged to take a first-year writing seminar in their first year and an intermediate (2000-level) seminar in their second year. Students planning to undertake an honors project are encouraged to take a 3000-level seminar and the ENGL 2841 Introduction to Literary and Cultural Theory course in their junior year.

Note that the following major and minor requirements took effect in the 2021–2022 academic year. Students who matriculated before fall 2021 must meet the requirements from the Catalogue of the academic year of their entry to Bowdoin. Students interested in changing their Catalogue year should contact the Office of the Registrar. Catalogues

from prior years can be found in the Archive (<https://bowdoin-public.courseleaf.com/archive/>).

The major requires a minimum of ten courses. These must include the following:

Code	Title	Credits
Required Courses		
Select two pre-1800 courses.		2
Select two courses in African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature. ^a		2
Select one intermediate seminar (2000–2099).		1
Select one 3000-level seminar.		1
The remaining courses may be selected from first-year writing seminars, introductory courses at the 1100 level, intermediate or advanced literature courses at the 2000 and 3000 levels, intermediate independent study, advanced independent study or honors (numbered 4000–4051), and introductory or advanced creative writing courses in the English department.		4

^a At least one of these courses must be US-based. Courses in the following number ranges will count: 1100–2969 and 3000–3999. Majors may take courses in the same area, e.g., African American literature. Independent studies may count by approval of the chair.

No more than two courses may come from the department’s roster of first-year writing seminars and introductory courses; no more than two creative writing courses count toward the major. ENGL 1050 Writing Studio, ENGL 1060 English Composition, and ENGL 2805 Theory and Practice of Tutoring Writing do not count toward the major; ENGL 1070 The Art of Rhetoric and Composition is eligible for major or minor credit.

English Major with Concentration in Creative Writing
English majors with a concentration in creative writing must satisfy the requirements for the major, including an introductory-level and an intermediate- or advanced-level creative writing course in a single genre, and an additional elective course in another creative writing genre. Two of these creative writing courses may be the two allowed within the ten courses required for the major, with an additional creative writing course above the ten required (for a total of eleven courses). One independent study may count toward the concentration with approval from the department chair.

English Minor

The minor requires five courses in the department. At least three of these must be numbered 2000 or higher. No more than one creative writing course may count toward the minor. ENGL 1050 Writing Studio, ENGL 1060 English Composition, and ENGL 2805 Teaching Writing: Theory and Practice do not count toward the minor. Transfer credits and independent studies may not be applied to the minor. Minors may double-count one course with another department or program.

Interdisciplinary Major

The department participates in an interdisciplinary major in English and theater. See the Interdisciplinary Majors (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>).

Additional Information

Additional Information and Department Policies

Major/Minor Grade Policy

- Courses that count toward the major and minor must be taken for a letter grade (not Credit/D/Fail), and students must earn grades of C- or better in these courses.
- Majors may double-count three courses with another department or program.

Transfer Credit Policies

With the approval of the chair, the English department accepts up to two transfer credits for classes taken outside of the department, either at Bowdoin or at another institution. Students may count one upper-level (2000- or 3000-level) course in cinema studies toward the major. Students may count up to two upper-level foreign language literature or film courses taken at Bowdoin or at another institution, provided that the works are read in that language, or taught in one of the official languages of the foreign country where the course is taken. Only one pre-1800 course may be transferred for credit. The department does not give transfer credit for 2000-level seminars or 3000-level seminars. Students may not apply transfer credits to the minor. Students planning to study away should meet with the chair of the department at least one semester prior to departure.

Advanced Placement/International Baccalaureate (AP/IB)

Students who received a minimum score of four on the English Literature and Composition AP exam, or a minimum score of six on the English IB exam, are eligible to receive a general credit toward their degree (though not toward a major or minor) following the completion of an English course, not including ENGL 1050 Writing Studio, ENGL 1060 English Composition, ENGL 1070 The Art of Rhetoric and Composition, or creative writing courses (numbered 1200–1299 and 2850–2899), with a minimum grade of B-. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Honors Projects

A student who maintains an A/B average in the courses required for the English major may decide to become an honors candidate at the end of their junior year. Honors candidates engage in an honors project and prepare a thesis under the supervision of an advisor during their senior year. Students are required to register for their honors project for two semesters, ENGL 4050 and ENGL 4051, and may apply both semesters of work to their major requirements.

Information for Incoming Students (p. 187)

All Bowdoin students must take a first-year writing seminar in their first year of enrollment and the department is offering the following first-year writing seminars in fall 2022: ENGL 1003 Shakespeare's Afterlives, ENGL 1017 Global Asian Fantasy Fiction, ENGL 1027 The Real Life of Literature, ENGL 1034 America in the World, ENGL 1042 Dangerous Enchantments, ENGL 1043 Fact and Fiction, and GSWS 1040 Unhappy Queers, cross-listed in English. Incoming students with concerns about their level of preparation for writing at the college level should consult with their pre-major academic advisor, take advantage of the writing support programs in the Baldwin Center for Learning and Teaching (<https://www.bowdoin.edu/baldwin-center/>), and/or reach

out to the Director of Writing and Rhetoric, Meredith McCarroll (<https://www.bowdoin.edu/profiles/faculty/mmccarro/>). Options for students seeking additional writing support and instruction include enrollment in a first-year writing seminar in the fall followed by ENGL 1060 English Composition in the spring; or a first-year writing seminar in each of the student's first two semesters.

ENGL 1117 Introduction to Environmental Literature is open to incoming first-year students. All 2000-level English courses are open to first-years beginning in the spring semester of their first year.

Some creative writing courses are open to first-year students, but they should be aware that these classes fill up quickly. These classes are: ENGL 1228 Introductory Fiction Workshop, ENGL 1225 Introduction to Poetry Writing Workshop, ENGL 2860 Character, Plot, Scene, Theme, Dream: The Fundamentals of Screenwriting, ENGL 2864 The Personal (Essay) is Political.

Courses

ENGL 1003 (c) Shakespeare's Afterlives

Aaron Kitch.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Romeo and Juliet as garden gnomes, Richard III as Adolf Hitler, King Lear as aging patriarch of an Iowa family farm...these are just some of the ways that Shakespeare's plays and characters have been reimagined in literature produced in the time since he lived and wrote for the London stage. Placing individual plays by Shakespeare in conversation with particular adaptations, we examine the aesthetic, cultural, and political dimensions of Shakespearean drama and his literary and cultural legacy as found in later fiction, drama, and film. Plays by Shakespeare may include 1 Henry IV, Twelfth Night, Hamlet, King Lear, and The Tempest, together with adaptations by Oscar Wilde, Tom Stoppard, Jane Smiley, and Arthur Philips.

Previous terms offered: Fall 2020.

ENGL 1005 (c) Victorian Monstrosity

Non-Standard Rotation. Enrollment limit: 16.

Examines various monsters and creatures that emerge from the pages of Victorian narratives. What do these strange beings tell us about literary form, cultural fantasies, and anxieties; or about conceptions of selfhood and the body? How do they embody (or disembody) identities that subvert sexual, racial, and gendered norms? Authors may include Lewis Carroll, Richard Marsh, Robert Louis Stevenson, Bram Stoker, and H.G. Wells. (Same as: GSWS 1005)

Previous terms offered: Fall 2021.

ENGL 1006 (c) Seeing White: Constructions of Race and Strategies for Antiracism

Non-Standard Rotation. Enrollment limit: 16.

What does “white” mean as a racial identity? What are the differences in white privilege and white supremacy? How do film, television and literature hold up and construct whiteness? Film scholar and cultural critic Richard Dyer calls us to “see whiteness” as a social construction by “making it strange”. Students in this class will make whiteness strange through a study of the historical meaning(s) of American whiteness and the representations of whiteness, as well as a personal engagement with whiteness at Bowdoin. Anti-racist whiteness, multiraciality and whiteness, a contemporary rise in white supremacy, and non-white conceptions of American whiteness will all be topics of this course.

Previous terms offered: Fall 2021, Fall 2020.

ENGL 1007 (c) Joan of Arc

Non-Standard Rotation. Enrollment limit: 16.

Joan of Arc was burned at the stake in 1431 at the age of nineteen. This course explores the long history of this warrior, heretic, and saint, beginning with the medieval records of her trial and execution and then moving through the centuries and the countless stories told about her in literature, art, music, and cinema all the way up to the present moment.

Previous terms offered: Fall 2021, Fall 2019.

ENGL 1008 (c) Unhappy Queers

Angel Matos.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Unhappiness has been pivotal in shaping queer cultural productions and in mobilizing the visibility of queer life in literature and media. In representing the difficulties of coming out, the social ramifications of HIV and AIDS, or the institutional, personal, and systemic violence imposed on queer bodies and communities—queer texts became an archive that rendered queer practices legible through feelings of sadness and despair. This seminar examines contemporary queer literature and media to critically examine the role that sadness plays in this archive, and to think deeply about the role of emotion in representing queer lives and experiences. What is the role of happiness, hope, and joy in an archive so focused on negative emotions and outcomes? How is the concept of happiness reliant on normative attitudes and ideologies, and how do queer texts disrupt this equation by highlighting alternative ways of succeeding, thriving, and existing in the world? How do sad queer texts push us to acknowledge the insufficiency of progress-driven narratives that are circulated today? Through writing, reading, and examining a variety of queer fiction and media, students will develop their own answers to these questions (Same as: GSWS 1040)

ENGL 1009 (c, FYS) The Ravages of Love

Non-Standard Rotation. Enrollment limit: 16.

Examines examples of overwhelming love in eighteenth and nineteenth century novels from England, France, and Germany. Through close reading and intensive writing, considers the intersection of love with the difficulties created by class and gender difference; the power of desire to challenge social convention and the terms of ordinary reality; the confrontations between love, egotism, and seduction; and the implications of love's attempt to dare all, even at the risk of death. Discusses the political overtones of these narratives of love and their place within the construction of gender, sexuality and subjectivity in Western culture. Authors may include Prevost, Goethe, Laclos, Hays, Austen, Bronte, and Flaubert. (Same as: GSWS 1009)

Previous terms offered: Fall 2019.

ENGL 1010 (c) Creating Monsters

Non-Standard Rotation. Enrollment limit: 16.

What makes a “monster”? What does it mean to think of oneself as a monster? What obligations do their creators, and their societies, have to the monsters they have created? This course will focus on famous literary monsters, including Mary Shelley's *Frankenstein*, Bram Stoker's *Dracula*, and Robert Louis Stevenson's *Dr. Jekyll and Mr. Hyde*. In addition to reading the literary works that gave birth to these creatures, we will explore the film representations that have helped to shape these monsters in the cultural imagination.

Previous terms offered: Fall 2018.

ENGL 1011 (c) Trolls, Frogs, and Princesses: Fairy Tales and Retellings

Non-Standard Rotation. Enrollment limit: 16.

Explores the resiliency of fairy tales across cultural boundaries and historical time. Traces the genealogical origins of the classic tales, as well as their metamorphoses in historical and contemporary variants, fractured tales, and adaptations in literature and film. The class is designed to help students write confidently and with power in a variety of contexts, harnessing the resources of grammar, style, rhetorical form, persuasion, argumentation—and magic, of course.

Previous terms offered: Fall 2020.

ENGL 1012 (c) Jane Austen

Non-Standard Rotation. Enrollment limit: 16.

A study of Jane Austen's major works, *Sense and Sensibility*, *Pride and Prejudice*, *Emma*, *Mansfield Park*, and *Persuasion*. (Same as: GSWS 1025)

Previous terms offered: Fall 2021, Fall 2019.

ENGL 1014 (c, FYS) Memoir as Testimony

Non-Standard Rotation. Enrollment limit: 16.

Explores cultural movements and moments in the US and beyond through memoirs, graphic memoirs, and personal essays as well as critical essays on the memoir form. Examines how the story of an individual life is always, also, the story of a historical moment. Readings may include work by Alison Bechdel, Eula Biss, Thi Bui, Ta-Nehisi Coates, Garrard Conley, Maxine Hong Kingston, Sonya Livingston, Rian Malan, Claudia Rankine, Loung Ung, J.D. Vance, Jesmyn Ward, and others. Writing assignments critical and creative in form. Students both analyze these works and produce their own, capturing and interrogating what historical moments they themselves are living through.

Previous terms offered: Fall 2018.

ENGL 1015 (c, FYS) Dystopian Americas

Non-Standard Rotation. Enrollment limit: 16.

Explores recent dystopian fiction by multicultural writers in English who imagine America's near futures. While the dystopian genre has long been used to challenge prevailing power structures, we focus on works that further feature minority protagonists, combining examinations of race and ethnicity, gender, sexuality, and class in relation to contemporary themes of climate change, immigration, terrorism, globalization, and biotechnology. Authors include Margaret Atwood, Octavia Butler, Omar El Akkad, Chang-rae Lee, and Sabrina Vourvoulias. Also introduces the fundamentals of college-level writing, from a review of grammar and mechanics to discussions of textual analysis, thesis development, organizational structure, evidence use, synthesis of critics, and research methods. (Same as: ASNS 1042)

Previous terms offered: Fall 2018.

ENGL 1017 (c) Global Asian Fantasy Fiction

Belinda Kong.

Every Other Fall. Fall 2022. Enrollment limit: 16.

Focuses on contemporary anglophone fantasy fiction of Asian-inspired worlds by writers of East and Southeast Asian descent. Examines how authors draw on diverse Asian genres such as the Chinese martial arts and magic cultivation epic, Hong Kong triad and gangster film, Korean fox and tiger myth, Singaporean and Malaysian ghost tale, and broadly Asian imperial court drama to address issues of gender and sexual identity, racial and class politics, empire and geopolitics, nationhood and state power, and historiography and literary representation. Authors may include Kat Cho, Zen Cho, Rebecca Kuang, Fonda Lee, Russell Lee, Yoon Lee, Ken Liu, Shelley Parker-Chan, Nghi Vo, Neon Yang, and Xiran Jay Zhao (Same as: ASNS 1017)

ENGL 1018 (c) Jane Eyre, Everywhere

Non-Standard Rotation. Enrollment limit: 16.

Charlotte Brontë's 1847 novel, "Jane Eyre," had a profound impact not only on subsequent nineteenth-century fiction, but also on twentieth- and twenty-first century literary representations of female experience. Begins with a close reading of Brontë's novel and then moves on to exploring modern literary rewritings of this narrative. Considers both how Brontë's themes are carried out through these various texts and why her narrative has been such a rich source of reinterpretation. In addition to Brontë, authors may include Du Maurier, James, Messud, Park, and Rhys. (Same as: GSWS 1018)

Previous terms offered: Fall 2020, Fall 2018.

ENGL 1026 (c) Freedom Stories

Non-Standard Rotation. Enrollment limit: 16.

Explores the ways in which the idea of American freedom has been defined both with and against slavery through readings of legal and literary texts. Students come to terms with the intersections between the political, literary, and historical concept of freedom and its relation to competing definitions of American citizenship. (Same as: AFRS 1026)

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

ENGL 1027 (c) The Real Life of Literature

Guy Mark Foster.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines literary fiction set against the backdrop of actual historical events, such as wars, social protest events, terrorist attacks, earthquakes, the HIV/AIDS pandemic, the Holocaust, and political assassinations. Students not only analyze the literary strategies writers employ to fictionalize history and to historicize fiction, but also explore the methodological and philosophical implications of such creative gestures. In the end, this two-fold process transforms both categories in ways that permanently unsettle the status of fiction as merely imaginative and the historical as merely fact. Potential authors: Virginia Woolf, Octavia Butler, Yasmina Khadra, David Mura, Nicole Krause, Andrew Holleran, among others.

Previous terms offered: Fall 2021, Fall 2019, Fall 2018.

ENGL 1034 (c) America in the World

Morten Hansen.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines America as it is seen in literature from home and abroad. How have American authors described America's place in the world? How has America's present role as the sole global superpower affected how we view its past? What does America look like today from the perspective of the third world? Explores the way literature represents space and time, from current events to world history. Authors include Henry James, James Baldwin, Toni Morrison, Jamaica Kincaid, and Chimamanda Ngozi Adichie.

Previous terms offered: Fall 2021, Fall 2019.

ENGL 1042 (c) Dangerous Enchantments

David Collings.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

A course in close reading. Examines renditions of dark enchantment in the lyrical tradition extending from Romanticism through the twentieth century. Considers poetry which depicts the dangers of being transported by the sheer beauty of song, seduced by encounters with inhumanly beautiful beings, or transformed by fusion with divine power. Explores how such enchantments alter familiar versions of eroticism and transgress the limits of subjectivity, embodiment, gender, and social identity. Authors may include Coleridge, Wordsworth, Keats, Tennyson, Dickinson, Yeats, Crane, and Stevens.

ENGL 1043 (c) Fact and Fiction

Brock Clarke.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

An introduction to the study and creation of various kinds of narrative forms (short story, travel essay, bildungsroman, detective fiction, environmental essay, satire, personal essay, etc.). Students write critical essays and use the readings in the class as models for their own short stories and works of creative nonfiction. Class members discuss a wide range of published canonical and contemporary narratives and workshop their own essays and stories. In doing so, the class dedicates itself to both the study of literature and the making of it.

Previous terms offered: Fall 2020, Fall 2018.

ENGL 1045 (c, FYS) This is America: Being and Becoming American
Non-Standard Rotation. Enrollment limit: 16.

Who defines America? Who can be (or become) American? Who cannot? What walls and passports have existed to block or welcome immigrants to America over its two nearly two-and-a-half centuries? We will engage with various historical and literary sources such as essays, fiction, narrative and documentary films, poems, newspapers, and popular music through the field of American studies. Who maintains norms around America and American identity, and at what cost to its populace? As a first-year seminar, this course will focus students on the cyclical process of writing—drafting and revising throughout the semester. Students will work on close reading strategies and develop as academic writers and thinkers.

Previous terms offered: Fall 2019.

ENGL 1050 Writing Studio

Non-Standard Rotation. Enrollment limit: 16. .5 Credit Credit/D/F Only.

To be taken in conjunction with any first-year seminar. This course offers sustained support for students to develop skills needed for the first-year seminar and beyond: close reading, preparing for class discussion, drafting and revising essays, information literacy and library skills, grammar, and presentation strategies. Students will work independently, meeting regularly with the director of writing and rhetoric, the director of the Writing Project, and writing assistants. At semester's end, students will submit a portfolio of all drafts with revisions and reflections. The aim of this course is to supplement the instruction in the first-year seminar, to offer directive instruction not often included in the first-year seminar, and to build strong habits in the first semester. One-half credit; grading is Credit/D/Fail.

Previous terms offered: Fall 2019, Fall 2018.

ENGL 1060 (c) English Composition

Meredith McCarroll.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Practice developing the skills needed to research, write, and revise college-level essays in this workshop-based course. Focus on the nuts and bolts of academic writing, including grammar and style, strategies of argument and analysis, and citation practices. Gain useful writing and research skills for college and life after college. Does not count toward the English major.

Previous terms offered: Spring 2022, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ENGL 1070 (c) The Art of Rhetoric and Composition

Every Spring. Enrollment limit: 16.

Intended for confident writers who want to ensure that they leave college speaking and writing not just proficiently, but also magnificently and irresistibly. Learn the challenging art of writing from the best, beginning with classics and moving to the current period: authors may include Philip Sydney, Jonathan Swift, Mark Twain, George Orwell, Jessica Mitford, and David Foster Wallace. Writing intensive. This course may be counted toward the major and minor in English.

Previous terms offered: Spring 2019.

ENGL 1105 (c) Introduction to Poetry

Non-Standard Rotation. Enrollment limit: 50.

An examination of how to read a poem and how the poem is made. The course focuses on the evolution of poetic forms: sonnets, villanelles, stanza poems, elegy, and free forms (including free verse and spoken word) will be studied, drawn from a variety of historical, national, and cross-cultural traditions and anti-traditions. Students are introduced to the mechanics of poetry, such as prosody, poetic devices, and ekphrasis. For those who love or fear poetry.

Previous terms offered: Fall 2021, Fall 2019.

ENGL 1106 (c) Introduction to Drama

Non-Standard Rotation. Enrollment limit: 24.

Explores the history of drama written in English from its origins in the deep past through to the present day. Studies how plays across space and time have moved spectators to laugh, cry, and gasp. Authors include Samuel Beckett, Tony Kushner, William Shakespeare, and August Wilson. (Same as: THTR 1806)

Previous terms offered: Fall 2020, Fall 2018.

ENGL 1108 (c) Introduction to Black Women's Literature

Non-Standard Rotation. Enrollment limit: 50.

Examines the twin themes of love and sex as they relate to poems, stories, novels, and plays written by African American women from the nineteenth century to the contemporary era. Explores such issues as Reconstruction, the Great Migration, motherhood, sexism, group loyalty, racial authenticity, intra- and interracial desire, homosexuality, the intertextual unfolding of a literary tradition of black female writing, and how these writings relate to canonical African American male-authored texts and European American literary traditions. Students are expected to read texts closely, critically, and appreciatively. Possible authors: Harriet Jacobs, Frances Harper, Nella Larsen, Jessie Faucet, Ann Petry, Ntozake Shange, Suzan-Lori Parks, Alice Walker, Toni Morrison, Gayle Jones, Jamaica Kincaid, Terry McMillan, Sapphire, Lizzette Carter. (Same as: AFRS 1108, GSWS 1104)

Previous terms offered: Spring 2019.

ENGL 1110 (c) English Literature and Social Power

Non-Standard Rotation. Enrollment limit: 50.

Considers how works of literature encode or resist modes of social power, reinforce or subvert the mapping of urban space, articulate or undermine strategies of cultural entitlement, create or contest narrative solutions to urban conflict, and absorb these conflicts into the workings of individual consciousness. Examines the relationship between ideology and literary form, placing both in the context of transformations in English culture from the early seventeenth through the early twentieth centuries. Discusses writings by Jonson, Defoe, Pope, Wordsworth, Austen, Dickens, and Woolf alongside critical and interpretive essays.

Previous terms offered: Spring 2020.

ENGL 1111 (c) Introduction to LGBTQ Fiction

Non-Standard Rotation. Enrollment limit: 35.

Using an intersectional reading approach, students closely analyze both classic and more contemporary lesbian, gay, trans, and queer fictional texts of the last one hundred years. Students consider the historically and culturally changing ways that sexuality has been understood within popular, medical, as well as religious discourses. And because gender conflict and the tendency to analogize the struggles of sexual and racial minorities are key features of this literary tradition, students are expected to engage this subject matter sensitively and critically. Possible texts include *The Well of Loneliness*, *Giovanni's Room*, *Rubyfruit Jungle*, *A Single Man*, *Oranges Are Not the Only Fruit*, and *The Limits of Pleasure*. (Same as: GSWS 1111)

Previous terms offered: Spring 2022.

ENGL 1117 (c, DPI) Introduction to Environmental Literature

Samia Rahimtoola.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Introduces students to literature that features the relationship of humans with their 'natural' environment, while asking how such relationships are sustained and delimited by structures of class, race and ethnicity, citizenship, and gender/sexuality. Students will gain an understanding of environmental literature's powerful role in shaping conversations about national belonging, American ethnic and racial identity, and how to best live an environmental life, while directing the majority of their attention to how writers from the margins—African American, Latinx, Indigenous, and global—challenge these orthodoxies. Key topics include American agrarianism, the pastoral and wild, and the literatures of environmental justice. Authors may include Henry David Thoreau, Aldo Leopold, Willa Cather, Helena María Viramontes, Leslie Marmon Silko, and Octavia Butler. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors (Same as: ENVS 1117)

Previous terms offered: Fall 2019.

ENGL 1118 (c) Introduction to Media Studies

Non-Standard Rotation. Enrollment limit: 50.

What does it mean when we say that we live in the age of media? First, we will examine some of the classical theoretical texts that define the study of media and look at new forms of modern mass media that emerged in the twentieth century, such as radio and television. Later, we will look more closely at our contemporary world of computerized media and information technology, including software and social media. Throughout the course, we will examine the factors that influence media as well as the ways in which media influences society and individuals. Texts include films by Jordan Peele, Ryan Coogler, Allan J. Pakula, Sidney Lumet, and Billy Wilder, students' students' own social media practices, and theoretical texts by Marshall McLuhan, Friedrich Kittler, and Alexander R. Galloway. (Same as: CINE 1118)

Previous terms offered: Spring 2021.

ENGL 1225 (c) Introduction to Poetry Writing Workshop

Anthony Walton.

Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

Intensive study of the writing of poetry through the workshop method. Students expected to write in free verse and in form, and to read deeply from an assigned list of poets. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Fall 2020, Fall 2018.

ENGL 1228 (c) Introductory Fiction Workshop

Brock Clarke.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 12.

Introduces the beginning fiction writer to the craft of fiction writing, with an emphasis on the literary short story. Studies a wide range of published stories as well as examines student work. Critical writings on craft introduce students to technical aspects of the form: character, dialogue, setting, point of view, scene, summary, etc. Exercises and short assignment lead to longer works. All are expected to read, comment on, and discuss in depth each story that passes through the workshop, as well as to complete a major revision. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

ENGL 1240 (c) The Art of the Essay

Non-Standard Rotation. Enrollment limit: 12.

An introduction to creative nonfiction writing through an examination of traditional and experimental forms of the essay, including narrative, lyric, and persuasive. Students will read and discuss a range of published works to gain an understanding of the form and its techniques – voice, tone, structure, pacing – and will write and revise a series of essays. All are expected to fully participate in weekly workshop discussions. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Fall 2021, Spring 2020, Fall 2018.

ENGL 1241 (c) The Art of Creative Research

Non-Standard Rotation. Enrollment limit: 12.

A creative nonfiction course that regards research as inspiration for the imagination. Teaches archival research, while also expanding the definition of the archive. Addresses the creation of a research plan, methods of organizing research, and fact-checking, as well as the use of imagined scenes and speculation in nonfiction, hybrid and meta-narratives, and other forms of factual invention. Students read a wide range of published work, including that by D'Agata, Biss, Fremont, Skloot and others, as well as studying podcasts and other media. Students are expected to participate fully in workshop discussions and write short essays leading to a longer final project. While students are expected to write nonfiction for all assignments, the course is intended to be useful to the fiction writer as well in the tools it covers. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Spring 2021, Spring 2019.

ENGL 1242 (c) Writing the History, Culture, and Politics of Food
Zahir Janmohamed.

Non-Standard Rotation. Spring 2023. Enrollment limit: 12.

Students read a wide range of published works about the history, culture, and politics of food— including writings by Henry David Thoreau, M.F.K. Fisher, Edna Lewis, and Michael Pollan—and write and revise substantial narratives that combine personal and researched material. Focuses on the craft of writing, particularly on structure and voice. All students are expected to fully participate in weekly workshop discussions. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Spring 2022.

ENGL 1301 (c) Black Women's Lives as the History of Africana Studies: Eighteenth and Nineteenth Century

Non-Standard Rotation. Enrollment limit: 50.

In conjunction with the fiftieth anniversary of Africana studies at Bowdoin, this yearlong, two-part course will address debates and issues of Africana studies through the lives of black women. In Part I, students will focus on early Africana studies texts, reading works by and about Phillis Wheatley, Sojourner Truth, Frances Harper, Ida B. Wells, and Anna Julia Cooper. We will take up differences and continuities between these thinkers to understand the politics of respectability, work, representation, sexuality, and family across multiple historical contexts. (Same as: AFRS 1109, GSWS 1301)

Previous terms offered: Fall 2019.

ENGL 1302 (c) Black Women's Lives as the History of Africana Studies: Twentieth and Twenty-first Century

Non-Standard Rotation. Enrollment limit: 50.

In conjunction with the fiftieth anniversary of Africana studies at Bowdoin, this course will address debates and issues of Africana studies through the lives of black women. Students will focus on the twentieth and twenty-first centuries reading works by and about Zora Neale Hurston, Pauli Murray, Nina Simone, Josephine Baker, Angela Davis, and Condoleezza Rice. We will take up differences and continuities between these thinkers to understand the politics of respectability, work, representation, sexuality, and family across multiple historical contexts. Though this course continues the themes of AFRS 1109, students need not take Part I to take Part II. (Same as: AFRS 1111, GSWS 1205)

Previous terms offered: Spring 2020.

ENGL 1303 (c, DPI, IP) Introduction to Anglophone African Literature: Contemporary Short Stories

Donato Fhunsu.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

This course is an introduction to Anglophone African Literature through contemporary short stories. It begins with a short study of the main points of the history and culture of Africa and its peoples in order to get the background needed for an informed and sensitive study of the short stories. Students then read four captivating collections of short stories written in the late twentieth century and early twenty-first century by both female and male authors from various parts of the African continent (Bessie Head, Chinua Achebe, Uwem Akpan, and Chimamanda Ngozi Adichie). The course focuses on the main theme of identity and explores several related perennial and current themes that help students appreciate what it means to be not only an African but also a global citizen, a human being with agency in a dynamic and changing world. [Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.] (Same as: AFRS 1407)

Previous terms offered: Spring 2022.

ENGL 2000 (c) Contemporary Literature

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. Examines "the contemporary" as both our current historical moment in the twenty-first century and an experience of coming to grips with the present. Questions how writers conceive of the now, and how their representations of the present can help in understanding emergent phenomena such as drone warfare, climate crisis, Black Lives Matter, and the function of art in the current century. To help assess what, if anything, might be new about contemporary life and literature, explores various critical and theoretical approaches to the present. Focuses on twenty-first-century American texts including poetry, prose, and a significant body of cross-genre works. Authors may include Margaret Atwood, Junot Diaz, Renee Gladman, Ben Lerner, Dawn Lundy Martin, Maggie Nelson, and Claudia Rankine.

Previous terms offered: Fall 2020, Fall 2019.

ENGL 2004 (c, DPI) White Negroes

Guy Mark Foster.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate seminar. Close readings of literary and filmic texts that interrogate widespread beliefs in the fixity of racial categories and the broad assumptions these beliefs often engender. Investigates whiteness and blackness as unstable and fractured ideological constructs that become most visible in narratives of racial passing. These are constructs that, while socially and historically produced, are no less real in their tangible effects, whether internal or external. May include works by Nella Larsen, Norman Mailer, John Howard Griffin, Mat Johnson, Toi Derricotte, and Mohsin Hamid. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: AFRS 2654, GSWS 2257)

ENGL 2006 (c) Getting Real : The Development of Literary Realism

Non-Standard Rotation. Enrollment limit: 16.

Intermediate seminar. Examines the development of literary realism and brings it forward to consider current issues regarding authenticity and representational veracity. Extends beyond English letters to do so (US and UK), moving to works on the continent; and beyond the page to film, television, and the visual arts. In conjunction with the primary texts, studies the changing concept of realism through the theoretical debates that have surrounded the shifts, including the modernist critique of the real, the challenge to postmodernism, the demand for aesthetic and journalistic accountability, the contest between realism and satire. Intended to provide a focused entrée into the major and the discipline of literary study. Authors include Gustav Flaubert, Lorraine Hansberry, Philip Roth, Susan Sontag, Frederick Wiseman, Gordon Parks, Ava DuVernay, Larry David, Stephen Colbert, Bruno Latour, and Jacques Derrida.

Previous terms offered: Fall 2018.

ENGL 2010 (c) The Rise of the Novel

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. While prose fiction pre-dates the eighteenth century, it is during this century that both writers and readers begin to construct the idea of the novel as we know it. Uses a variety of eighteenth-century novels to explore the evolution of what we call the novel, and also explores various critical and theoretical approaches to the genre. Readings include Daniel Defoe's "Robinson Crusoe" and "Roxana," Samuel Richardson's "Pamela," Ann Radcliffe's "The Romance of the Forest," Mary Wollstonecraft's "The Wrongs of Woman," and Jane Austen's "Sense and Sensibility," as well as a wide range of critical and theoretical essays. Note: Fulfills the pre-1800 literature requirement for English majors.

Previous terms offered: Spring 2019.

ENGL 2011 (c) Science and Art of the Sex Photograph

Non-Standard Rotation. Enrollment limit: 16.

Intermediate seminar. Explores the way in which late nineteenth- and early twentieth-century scientific uses of the photograph (e.g., by scientism, eugenics) to configure sexuality and gender were adjusted by modern visual arts and literary photographs. We will consider a variety of early scientific studies, contemporary theories of sexuality and biopolitics (Foucault), and of photography (Benjamin, Barthes, Sontag); photographs by Man Ray, Claude Cahun, Gordon Parks (with Ralph Ellison), Catherine Opie; film by Michelangelo Antonioni ("Blow-up"); prose works by Virginia Woolf, W.G. Sebald, Claudia Rankine. (Same as: GSWS 2602)

Previous terms offered: Fall 2020.

ENGL 2012 (c) Chaucer

Non-Standard Rotation. Enrollment limit: 16.

Intermediate seminar. Introduces students to the major works of Geoffrey Chaucer, the father of English literature, focusing on his masterpiece, "The Canterbury Tales." Explores Chaucer's work in the context of his sources from Plato to Dante as well as his lasting influence on later literature, cinema, and culture. [Note: Fulfills the pre-1800 requirement for English majors.]

Previous terms offered: Spring 2022, Spring 2020.

ENGL 2013 (c) African American Writers and Autobiography

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. The struggle against anti-black racism has often required that individual African Americans serve as representative figures of the race. How have twentieth- and twenty-first-century black authors tackled the challenge of having to speak for the collective while also writing narratives that explore the singularity of an individual life? What textual approaches have these authors employed to negotiate this tension between what theorists of the genre broadly call referentiality and subjectivity? Authors include W. E. B. Du Bois, Zora Neale Hurston, Malcolm X, Jamaica Kincaid, Maya Angelou, Samuel Delaney, Barack Obama, among others. Note: Fulfills the literature of the Americas requirement for English majors. (Same as: AFRS 2652)

Previous terms offered: Spring 2020.

ENGL 2014 (c) Romantic Sexualities

David Collings.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate seminar. Investigates constructions of sexuality in English romantic writing, especially tales of seduction by supernatural or demonic figures; the sexualized world of the Gothic; the Byronic hero; lyrical depictions of incest; the yearning for an eroticized muse or goddess; and same-sex desire in travel writing, diaries, and realist fiction. Discusses the place of such writing in the history of normative and non-normative sexual identities, repression, the unconscious, and the sublime. Authors may include Burke, Lewis, Mary Shelley, Byron, Wollstonecraft, Lister, Austen, Coleridge, and Keats, with further readings in queer theory and the history of sexuality. (Same as: GSWS 2660)

Previous terms offered: Spring 2021, Spring 2019.

ENGL 2015 (c) Representing Race in the English Renaissance

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. How does "race" signify in the English Renaissance, a period that witnessed the emergence of the Atlantic slave trade, intensified urbanization in European capital cities, and the development of new global trade routes? Explores a range of literary strategies Renaissance authors use to represent ethnic, religious, and cultural otherness. Considers how literary and dramatic works might critique, justify, and reproduce racial ideologies. Texts include sonnets by Sidney and Shakespeare; plays by Marlowe, Shakespeare, and Middleton; masques by Ben Jonson; poetry by John Donne and William Herbert; and the first English "novel," Aphra Behn's "Oroonoko." Note: Fulfills the pre-1800 literature requirement for English majors. (Same as: AFRS 2205)

Previous terms offered: Spring 2020.

ENGL 2016 (c) Race and Memory in Southern Literature and Film

Non-Standard Rotation. Enrollment limit: 16.

"The past is never dead. It's not even past." William Faulkner Intermediate Seminar. The American South is haunted by its history. Decades of Indian removal and nearly 250 years of enslavement of Africans and African-Americans resulted in hierarchies of race, which are woven into the poetry, music, literature and film of the South. This course explores literature and film of and about the American South (1920-2021) with a focus on the tangled intersections of race and memory. Literary works may include William Faulkner, Kiese Laymon, Eudora Welty, Alice Walker, Flannery O'Connor, Jesmyn Ward, Natasha Trethewey, Jean Toomer, and Leanne Howe. Films may include *Birth of a Nation* (Parker), *Get Out* (Peele), *In the Heat of the Night* (Jewison), *Moonlight* (Jenkins), *Big Fish* (Burton), *Beasts of the Southern Wild* (Zeitlin), *Mississippi Burning* (Parker), and *Selma* (DuVernay). Intermediate Seminar. (IRBW) Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: CINE 2416)

Previous terms offered: Spring 2022.

ENGL 2017 (c) Beowulf

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. Surveys the earliest literature written in the British Isles, the surrounding seas, and the wider world: the sagas of the Vikings, the songs of the Christians, and the chronicles of Muslim ambassadors from Baghdad. Focuses in particular on the earliest poetry written in the English language. Culminates in the study of *Beowulf*, the greatest poem of this period. Texts include: *Beowulf*, *The Saga of King Hrolf Kraki*, and *The Book of Ahmad Ibn Fadlān*. Note: This class fulfills the pre-1800 literature requirement for English majors.

Previous terms offered: Spring 2021, Spring 2019.

ENGL 2018 (c) Odd Jobs: Work in Victorian Literature and Culture

Non-Standard Rotation. Enrollment limit: 16.

Intermediate Seminar. Explores both fictional and nonfictional representations of labor in the Victorian period. Of central concern will be the intersections and differences between journalistic and literary depictions of manual labor; the ways in which different novelistic genres (realism, children's literature, the gothic) depict work in distinct ways; and the varying representations of working class and middle-class modes of working. Authors may include Dickens, Gaskell, Hardy, Kingsley, Marx, and Mayhew. As an intermediate seminar, this course offers the opportunity for more intensive work in literary analysis and deeper focus on methodological skills required for advanced research in the major.

Previous terms offered: Spring 2021, Spring 2019.

ENGL 2019 (c, DPI, IP) Fictions of Global English

Non-Standard Rotation. Enrollment limit: 16.

Intermediate seminar. Explores modern and contemporary literature from around the world, considering modes of writing that have developed with the global spread of the English language and other languages' collision with English. Attention given to vernacular writing and the embrace of so-called non-standard, weird, or rotten English. Examines ways writers have engaged with the history of colonialism and the forces of globalization as well as their attempts to forge a new cosmopolitan literature. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.

Previous terms offered: Spring 2022.

ENGL 2020 (c) Modern American Poetry

Samia Rahimtoola.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Intermediate Seminar. Approaches twentieth- to twenty-first-century American poetry as a mode of thought and form of critique in dialogue with modernity's social and technological upheavals. Considers poems on the page and in the ear, poets' roles in society (as prophets, outlaws, recluses, and revolutionaries), and heated debates about what poetry is and why it matters. Serious attention paid to formal intricacies of language and to the contexts—social, political, scientific—in which this language gains significance. Through closely reading poems, students will learn to appreciate and analyze this at times baffling, at times incisive form. Poets include Dunbar, Dickinson, Stevens, Pound, Stein, Hughes, Brooks, O'Hara, Mayer, Notley, Hejinian, and Long Soldier.

Previous terms offered: Spring 2020.

ENGL 2023 (c) Asian Dystopias

Belinda Kong.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate Seminar. Focuses on contemporary dystopian novels by Asian and Asian diaspora writers. Explores the idea that dystopic fiction works not simply by reimagining time and forecasting bleak futures but also by remapping political spaces and redrawing social boundaries. Anarchists and vigilantes, aliens and clones, murderous children and mythic animal deities populate these worlds as writers examine totalitarianism and dissidence, globalization and labor slavery, pandemics and biotechnology, race riots and environmental devastation. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ASNS 2808)

Previous terms offered: Fall 2020.

ENGL 2024 (c) Embodying the Renaissance

Every Other Year. Enrollment limit: 16.

The English Renaissance (c. 1500-1650) defined the human body in new ways as a source of knowledge, pleasure, and representation, even as the body remained subject to surveillance, punishment, and torture. This course explores a range of different bodies in prose, drama, and poetry through the critical lenses of race and gender as well as in relation to scientific, religious, and medical knowledge and practices. Topics include anatomical dissection, the humoral body, the cult of virginity, marking the body (i.e., tattoos), and contrasting theories of sexual reproduction. We also attend to newly racialized bodies produced by the nascent slave trade and new efforts of colonial expansion. This writing-intensive intermediate seminar culminates in a self-designed research project on a topic designed by students and informed by additional research. Primary authors include William Shakespeare, Christopher Marlowe, Aemilia Lanyer, Katharine Philips, John Donne, and Margaret Cavendish. Note: Fulfills the pre-1800 requirement for English majors. (IRBW) (Same as: GSWS 2021)

Previous terms offered: Fall 2021.

ENGL 2027 (c, IP) Worlds Beyond the Human

Hilary Thompson.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Intermediate Seminar. This course looks at the ways writers from around the world are crafting narratives that are no longer merely human-centered. We will examine depictions of an array of nonhuman species, including animals, animal spirits, insects, plants, and more. We will explore new ideas about ways to read creaturely and multispecies fictions, particularly in our era of globalization and planetary environmental concern, and we may venture beyond the bounds of literary fiction to look at varieties of science and fantasy fiction. Guiding questions include the following: How far can fiction stretch its traditional bounds in attempting to inhabit the forms of consciousness, perception, and sentience of other species? How does even fiction that portrays human stories change when it represents these as intertwined with or interrupted by the lives of other species? How might our ideas of the human and our place on the planet become transformed as we read such narratives? Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.

ENGL 2028 (c) Mean Women Writers

Marilyn Reizbaum.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Intermediate Seminar. Parul Sehgal has described Muriel Spark's genius as a writer "cruelty mixed with camp, the lightness of touch, the flick of the wrist that lands the lash." Spark herself said that she "loves her characters like a cat loves a bird." This course will study a variety of modern women writers, whose writing has been variously called "mean," "cruel," "indifferent," "cold." We will examine a number of genres (including the graphic novel) in a style that is "scrupulously mean," to borrow from James Joyce's characterization of his early writing, which has been famously praised for producing the very same effects that are seen as harsh or harmful in women writers of the same era, until today. We will consider both gendered theories of writing along with primary texts; authors may include such writers as Maggie Nelson Virginia Woolf, Hannah Arendt, bell hooks, Muriel Spark, Patricia Highsmith, Elfriede Jelinek, Dorothy Parker, Octavia E. Butler, Cathy Park Hong, and Emil Ferris. (Same as: GSWS 2028)

ENGL 2029 (c) Women and the Eighteenth-Century Novel

Ann Kibbie.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate Seminar. Explores how women are represented in eighteenth-century fiction, and the impact of women writers and readers on the development of the novel. Readings may include Eliza Haywood's *Love in Excess*, Samuel Richardson's *Pamela*, Henry Fielding's *Shamela*, and Mary Wollstonecraft's *The Wrongs of Woman*, and Jane Austen's *Lady Susan* and *Pride and Prejudice*. Note: Fulfills the pre-1800 requirement for English majors.

ENGL 2104 (c) King Arthur and the Knights of the Round Table

Non-Standard Rotation. Enrollment limit: 35.

Explores the legends of King Arthur, Merlin, Queen Guinevere, and the knights of the Round Table, progressing from the stories' origins in medieval myth and romance through to their many Renaissance, Victorian, and modern revivals. Texts include: Geoffrey of Monmouth, "History of the Kings of Britain"; Sir Gawain and "The Green Knight"; Thomas Malory, "The Death of Arthur"; Tennyson, "Idylls of the King"; "Monty Python and the Holy Grail." Note: Fulfills the pre-1800 requirement for English majors.

Previous terms offered: Fall 2021, Fall 2019.

ENGL 2109 (c) Medieval Women Writers

Every Other Year. Enrollment limit: 35.

This course introduces students to the writings of medieval women, cis and trans—queens and princesses, heretics and saints, scientists and philosophers—who lived in the four centuries between the years 1000 and 1400 CE. We will read their autobiographies, manifestos, secret letters, visions of paradise, love poems, and fairy tales. Although this course focuses on women who wrote in the English language, it also explores the wider world in which these women lived and traveled, from Paris to Timbuktu and Shiraz to Iceland. We will put the medieval texts we read into conversation with the work of contemporary women writers like Michaela Coel, Sally Rooney, and Jia Tolentino. Note: This class fulfills the pre-1800 requirement for the English major. (Same as: GSWS 2109)

Previous terms offered: Spring 2021.

ENGL 2200 (c, VPA) English Renaissance Drama

Aaron Kitch.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Focusing on plays by Shakespeare and his contemporaries, this class explores new genres, character types, and modes of experience made possible by the development of professional theater in early modern London. In addition to situating plays by Christophe Marlowe, Ben Jonson, Thomas Middleton, and other authors in their political and cultural contexts, we will also ask how their plays elevated questions of race, gender, and sexuality. Students will select, memorize, and ultimately perform one scene from one of the plays, working together in small groups to bring new life to old texts. Note: Fulfills the pre-1800 literature requirement for English majors. (Same as: THTR 2823)

Previous terms offered: Fall 2020, Spring 2019.

ENGL 2202 (c) Renaissance Sexualities

Non-Standard Rotation. Enrollment limit: 35.

How do Renaissance authors represent sexual desires and dilemmas? What strategies do authors use to represent, for instance, drives that have not been codified and labeled according to modern epistemologies? Topics include the inarticulacy of homoeroticism and other forms of attachment as they shape Shakespearean comedy, minor epic, and tragicomic romance, with special attention to the poetics of same-sex desire and the erotics of theatrical performance by boy actors on the London stage. Authors include Shakespeare, Thomas Middleton, John Ford, Thomas Crashaw, and Margaret Cavendish, with secondary readings by Eve Sedgwick, Jonathan Goldberg, and Laurie Shannon, among others. Note: Fulfills the pre-1800 requirement for English majors. (Same as: GSWS 2202)

Previous terms offered: Spring 2020.

ENGL 2203 (c) Shakespeare and Politics

Non-Standard Rotation. Enrollment limit: 40.

Considers Shakespeare as a political thinker whose plays both interrogate important works of political philosophy and respond to pressing political matters of his day (and beyond). This team-taught course encourages open-ended debate and argumentation in order to foster informed and critical conversation between Shakespeare and Cicero, Plutarch, Machiavelli, and Montaigne, among others. Beginning with ancient and early modern philosophical reflection on human nature, the state, justice, the virtues of rulers, and ideas of citizenship, the course proceeds to take up Shakespeare's dramatization of these topics in the context of the changing English monarchy, religious controversy, the enduring influence of the Roman Republic, the emergence of capitalism, and the politics of race and gender. Note: This course fulfills the pre-1800 requirement for English majors. (Same as: GOV 2245)

Previous terms offered: Spring 2022.

ENGL 2205 (c) Shakespeare's Tragedies: Pathos and Politics

Every Other Year. Enrollment limit: 35.

Explores Shakespeare's tragedies with special attention to their theatrical expansiveness and political importance. Also considers central questions problems of plot and character, as well as foundational issues of race and gender in the plays, which will include Titus Andronicus, Romeo and Juliet, Richard III, Julius Caesar, Hamlet, and King Lear. Some classical accounts of tragedy by Aristotle, Hegel, Nietzsche, and more contemporary authors will guide our conversations. In order to experience as well as study the plays at the heart of the course, we will watch recorded performances from the newly available Globe on Screen database. Students will also have the opportunity to perform scenes from the plays in optional scene study groups. Note: Fulfills the pre-1800 literature requirement for English majors.

Previous terms offered: Fall 2019.

ENGL 2206 (c) English Renaissance Poetry

Every Other Year. Enrollment limit: 35.

Explores the creative resurgence of poetic verse between the accession of Queen Elizabeth I in 1558 and the beginning of the English Civil War in 1642. Traces the rise and fall of particular genres, including the sonnet and the minor epic, while attending to the political function of much verse written in the period. Also considers significant religious, sexual, and biographical meanings of poems by authors that may include Edmund Spenser, Christopher Marlowe, William Shakespeare, John Donne, George Herbert, and Aemilia Lanyer. Also considers some early works by John Milton. Note: This class fulfills the pre-1800 requirement for the English major.

Previous terms offered: Spring 2021.

ENGL 2207 (c, VPA) Remaking Shakespeare

Non-Standard Rotation. Enrollment limit: 20.

Bridging the unhelpful divide between critical scholarship and performance studies in studying drama, this co-taught course enables students to "remake" Shakespeare as an author for both page and stage. By integrating techniques of theatrical performance with modes of textual analysis, the course balances critical and performative approaches to produce a thorough and embodied understanding of Shakespeare. In analyzing Shakespearean language with an eye to performance, for example, students will increase their understanding of the plays. Likewise, producing scholarly writing about Shakespeare will enhance the way that students perform his works. Students will produce scene studies as well as a range of writing assignments, including a research essay. Note: Fulfills the pre-1800 requirement for English majors. (Same as: THTR 2812)

Previous terms offered: Fall 2021.

ENGL 2208 (c, VPA) Shakespeare's Comedies

Aaron Kitch.

Every Other Year. Spring 2023. Enrollment limit: 35.

Explores Shakespeare's evolution as a master of comic drama by considering his accomplishments in plot, characterization, and language. We will pay special attention to the politics of his humor both then and now, as well as to historical staging practices and issues of race, gender, and class that animate many of the plays. We will enhance our readings of the plays by watching videos of recent performances of the plays by the Globe Theater, Royal Shakespeare Company, and other professional companies. Students will also have the option to create and perform scenes working in small groups. Plays may include The Two Gentlemen of Verona, A Midsummer Night's Dream, As You Like It, Much Ado about Nothing, Measure for Measure, Twelfth Night, and The Tempest. Note: Fulfills the pre-1800 requirement for English majors.

ENGL 2290 (c) Paradise Lost

Non-Standard Rotation. Enrollment limit: 35.

A critical study of Milton's epic poem, "Paradise Lost." Readings will include other works by Milton that are relevant to our focus on this major work. Note: Fulfills the pre-1800 literature requirement for English majors.

Previous terms offered: Fall 2021, Fall 2019.

ENGL 2301 (c) True Lives: Creating Fame, Infamy, and Celebrity in the Eighteenth Century

Every Other Spring. Enrollment limit: 35.

Explores the representation of private life in the poetry and prose of the period (including diaries, private journals, public and private letters, and autobiographies), with an emphasis on the emergence of the modern author. Works may include James Boswell's *London Journal*, Alexander Pope's *Rape of the Lock* and autobiographical poems, Lady Mary Wortley Montagu's travel letters, Lord Chesterfield's letters of advice to his illegitimate son, and the autobiography of Olaudah Equiano. [Note: Fulfills the pre-1800 requirement for English majors.]

Previous terms offered: Spring 2022.

ENGL 2304 (c) Age of Satire

Non-Standard Rotation. Enrollment limit: 35.

Explores various forms of satire and parody in the prose, poetry, drama, and visual art of the Restoration and the Eighteenth Century, as well as the various attempts to censor or otherwise control satire. Works include Alexander Pope's "*Rape of the Lock*," John Gay's "*Beggars Opera*," Jonathan Swift's "*Gulliver's Travels*," Henry Fielding's "*Tom Jones*," and the paintings and prints of William Hogarth. Note: Fulfills the pre-1800 literature requirement for English majors.

Previous terms offered: Spring 2020.

ENGL 2305 (c) Imagining London in Eighteenth-Century Literature

Ann Kibbie.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Focuses on journals, plays, poems, and novels in which London itself plays a vital role, including James Boswell's "*London Journal*," Daniel Defoe's "*Moll Flanders*," John Gay's "*Trivia*"; or the "*Art of Walking the Streets of London*," and Frances Burney's "*Evelina*." In addition to engaging in critical analysis of these literary texts, students learn how to use digital mapping, spatial analysis, and image markup to imagine eighteenth-century London and work collaboratively to create maps charting the movements of real people (such as Boswell) and fictional characters (such as Moll Flanders) within the city. Theaters, coffeehouses, shops, prisons, hospitals, and parks are among the public spaces explored in order to contextualize, enrich, and question the literature. Note: Fulfills the pre-1800 requirement for English majors. (Same as: URBS 2305)

Previous terms offered: Spring 2019.

ENGL 2306 (c, VPA) Taking Liberties with Shakespeare

Non-Standard Rotation. Enrollment limit: 35.

Playwrights for the Restoration and eighteenth-century stage set about improving Shakespeare, correcting what they saw as flaws in the original plays. "*King Lear*" received a happy ending. "*The Tempest*'s" Caliban got a wife. "*The Merchant of Venice*" became "*The Jew of Venice*." Compares the Shakespearean originals to the altered versions in order to explore questions of artistic license, revision, and changing notions of comedy and tragedy. Discusses how larger changes in the theater itself, including the use of women actors, transform the Shakespearean scene. Note: This class fulfills the pre-1800 literature requirement for English majors. (Same as: THTR 2813)

Previous terms offered: Fall 2018.

ENGL 2307 (c) Gothic Fictions of the Eighteenth and Nineteenth Century

Ann Kibbie.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores British Gothic fiction (tales of suspense or terror) from the eighteenth and nineteenth centuries. Readings may include Horace Walpole's *Castle of Otranto*, Ann Radcliffe's *Mysteries of Udolpho*, Jane Austen's *Northanger Abbey*, Mary Shelley's *Frankenstein*, Robert Louis Stevenson's *Dr. Jekyll and Mr. Hyde*, and Bram Stoker's *Dracula*. Note: Fulfills the pre-1800 requirement for English majors

ENGL 2350 (c) Radicals, Feminists, Poets, Monsters, circa 1800

Non-Standard Rotation. Enrollment limit: 35.

Examines the rise of and reactions to radical literature in the wake of the French Revolution. Focuses on such topics as extravagant lyricism, anarchism, non-violent revolution, and the critique of marriage, family, male privilege, and patriarchal religious belief, as well as the defense of tradition and the depiction of revolution as monstrosity. Discusses radical rewritings of classical myth, the uses of fiction for political critique, and the intersections between sharp historical change and the emergence of the Gothic. Authors may include Burke, Blake, Wollstonecraft, Godwin, Percy Shelley, and Mary Shelley. (Same as: GSWS 2242)

Previous terms offered: Fall 2020, Fall 2018.

ENGL 2352 (c) Natural Supernaturalism

David Collings.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the Romantic attempt to blend aspects of the transcendental – such as the sublime, immortality, and divinity – with ordinary life, the forms of nature, and the resources of human consciousness. Discusses theories of the sublime, poetry of the English landscape, mountaintop experiences, tales of transfiguration, and evocations of intimacy with nature. Explores the difficulties of representing the transcendental in secular poetry and the consequences of natural supernaturalism for our own understanding of nature. Authors include Burke, Wordsworth, Coleridge, Kant, and Shelley. (Same as: ENVS 2438)

Previous terms offered: Fall 2019.

ENGL 2405 (c) Victorian Plots

Non-Standard Rotation. Enrollment limit: 35.

Focusing primarily on the novel, examines Victorian narrative form. Considers whether there are certain types of plots that are peculiar to the period; the ways in which characters develop (or not) as stories unravel; and how literary elements such as description, dialogue, and setting emerge in Victorian texts. Along the way, analyzes the economic, social, and cultural factors that determine aspects of the novel. Authors may include Emily Bronte, Wilkie Collins, Charles Dickens, George Eliot, Elizabeth Gaskell, and Anthony Trollope.

Previous terms offered: Spring 2022, Spring 2020.

ENGL 2426 (c) The Horror Film in Context

Non-Standard Rotation. Enrollment limit: 35.

Examines the genre of the horror film in a range of cultural, theoretical, and literary contexts. Considers the ways in which horror films represent violence, fear, and paranoia; their creation of identity categories; their intersection with contemporary politics; and their participation in such major literary and cinematic genres as the gothic, comedy, and family drama. Texts may include works by Craven, Cronenberg, De Palma, Freud, Hitchcock, Kristeva, Kubrick, Poe, Romero, and Shelley. Note: Fulfills the film theory requirement for Cinema Studies minors. (Same as: CINE 2426, GSWS 2426)

Previous terms offered: Fall 2021, Fall 2019.

ENGL 2428 (c, VPA) Introduction to Film Theory

Non-Standard Rotation. Enrollment limit: 35.

A survey of some of the major currents in film theory from the early days of motion pictures to the present, including formalism, genre theory, auteur theory, psychoanalytic theory, feminist theory, and queer theory. Includes mandatory evening film screenings; a choice of two screening times available for each film. Note: Fulfills the film theory requirement for cinema studies minors.. (Same as: CINE 2428)

Previous terms offered: Spring 2022, Spring 2020.

ENGL 2451 (c) Modernism/Modernity

Marilyn Reizbaum.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the cruxes of the “modern,” and the term’s shift into a conceptual category rather than a temporal designation. Although not confined to a particular national or generic rubric, takes British and transatlantic works as a focus and includes fiction, poetry and visual art. Organized by movements or critical formations of the modern, i.e., modernisms, psychoanalysis, postmodernism, cultural critique, transnationalism. Readings of critical literature in conjunction with primary texts. Authors/directors/artists may include T. S. Eliot, James Joyce, Langston Hughes, Virginia Woolf, Katherine Mansfield, Zadie Smith, J. M. Coetzee, Roberto Bolaño, Man Ray, Stanley Kubrick. (Same as: GSWS 2247)

Previous terms offered: Fall 2020, Fall 2018.

ENGL 2453 (c) "Words are all we have": The Irish Story

Marilyn Reizbaum.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course considers the storied nature of ideas about Ireland through the consideration of a variety of Irish artists. Part of the aim of the course is to register the changes in the ways Irish letters have been reimagined by writers and critics in the last 50 years. In this iteration, we will be focusing on Samuel Beckett’s oeuvre, which includes prose, drama (famously and notoriously, *Waiting for Godot*), essays, radio, and film (e.g., *Film with Buster Keaton* in 1964). He has been designated a modernist, a postmodernist and not Irish at all, having lived in France for most of his writing life: “exile was a condition of Being.” Beckett’s reach has been enormous: his work has been the subject of numerous critical thinkers in the last century, including Theodor Adorno and Jacques Lacan, whom we will read. We will look at his Irish contemporaries, including James Joyce, Sean O’Casey, Edna O’Brien, and outside impact on e.g. J.M. Coetzee, Maggie Nelson, and painters such as Jasper Johns. (Same as: GSWS 2453)

Previous terms offered: Spring 2021.

ENGL 2454 (c) The Modern Novel or What the Novel Thinks

Marilyn Reizbaum.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

An abiding description of the dramatically carnivalesque Circe chapter of James Joyce’s *Ulysses* is as the “unconscious” of the novel. This is provocative in a number of ways, not least of which through its suggestion that the novel, rather than a character or narrator per se, has a mind, which can both think and suppress thought. Such an idea represents a turn on the classic modernist technique of “stream of consciousness” or postmodern concept of “metafiction.” Another staple comment about Joyce’s novel suggests that the novel reads its readers, as well as, or better than, the other way around. This course will examine these ideas of novelistic knowingness through several modern and contemporary novels, drawing on a variety of narrative theories, cognitive and affect theories, and psychoanalysis. Possible authors include Ian McEwan, Virginia Woolf, Vladimir Nabokov, W. G. Sebald, J.M Coetzee, Theresa Hak Kyung Cha, Ali Smith, Zadie Smith, Muriel Spark, Roberto Bolaño, Franco Moretti, Roland Barthes. (Same as: GSWS 2454)

ENGL 2457 (c, VPA) Modern Drama in Theory and Practice

Non-Standard Rotation. Enrollment limit: 25.

Ibsen, Brecht, and Beckett are undoubtedly some of the most influential playwrights of the twentieth century. As both scholarly and performance texts, their plays have long presented challenges to scholars and theater artists alike. Yet they—the scholarly and artistic—rarely work together to benefit from the insights each approach can offer. Beginning with plays like, for example, “*A Doll’s House*,” “*The Good Person of Setzuan*,” and “*Waiting for Godot*,” students then move to more contemporary masters, including groundbreaking playwrights of color Lorraine Hansberry and Suzan Lori-Parks, and provocateur Martin McDonagh. Lastly, students examine the legacy of Beckett’s work in television by examining contemporary television drama like “*Pose*”. (Same as: THTR 2410)

Previous terms offered: Spring 2022, Spring 2019.

ENGL 2505 (c) American Literature to 1865

Non-Standard Rotation. Enrollment limit: 35.

Surveys American literature from the colonial period to the Civil War. Studies accounts of early contact, narratives of captivity and slavery, sermons, autobiographies, poems, and novels. Authors include Winthrop, Rowlandson, Franklin, Douglass, Hawthorne, Melville, Stowe, Thoreau, Whitman, and Dickinson. Note: Fulfills the pre-1800 requirement for English majors.

Previous terms offered: Fall 2020, Fall 2018.

ENGL 2506 (c) American Literature II: 1865 - 1920

Every Other Spring. Enrollment limit: 35.

Continues the themes and issues introduced in American Literature I into the latter part of the nineteenth and early twentieth centuries. In particular, examines the aftermath of the Civil War and slavery, both its material devastation as well as the technological and literary innovation it generated that helped the country prosper for the next five decades. Examines the development of various literary movements including, realism, naturalism, and African American literature through readings of works by William Dean Howells, Henry James, Edith Wharton, W.E.B. DuBois, Charles Chesnutt, Paul Laurence Dunbar, Booker T. Washington, Stephen Crane, Sarah Orne Jewett, Mark Twain, Ida B. Wells, Frank Norris, Pauline Hopkins, and F. Scott Fitzgerald. (Same as: AFRS 2506)

Previous terms offered: Spring 2022, Spring 2021, Spring 2019.

ENGL 2548 (c) Wild Things: Gender, Sexuality, and Wilderness

Non-Standard Rotation. Enrollment limit: 35.

Examines how ideas of wildness and wilderness have been used to generate different gender and sexual identities and politics through literature and other cultural forms in the United States. Considers wilderness and wildness in relation to rugged individualism; transgressive sexualities; representations of health, disease, and disability; the extension of and resistance to state control of the body; and the intersections of gender, sexuality, race, and class. Students will learn how the idea of wilderness has been associated with and adopted by different bodies and identities over time, from the early European colonists' first encounter with Indigenous peoples and the American continent to the twenty-first century, which scientists have characterized as the era of the sixth mass extinction. Readings include canonical works of wilderness writing and lesser-known texts, including queer pastorals, feminist travelogues, and HIV/AIDS memoirs. (Same as: ENVS 2548, GSWS 2548)

Previous terms offered: Spring 2020.

ENGL 2550 (c) Modern and Contemporary American Literature

Non-Standard Rotation. Enrollment limit: 35.

Survey of twentieth and early twenty-first-century American literature. Readings include novels, short stories, poems, and plays. Explores the relationship between literary form and the changes brought on by the epochal events of modernity. Pays special attention to how America is imagined and reimagined as a geographical space, a community, and a set of purposes. Topics include immigration, changing race relations, war, issues of gender and sexuality, and new technologies. Authors may include Willa Cather, Ernest Hemingway, Tennessee Williams, James Baldwin, and Claudia Rankine.

Previous terms offered: Fall 2018.

ENGL 2551 (c) American Literature since 1945: Beats, Cyborgs, Primitives

Samia Rahimtoola.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

An exploration of how American authors responded to the rise of totalitarianism, corporate bureaucracy, consumer culture, and the emergence of new technologies of automation and war that were seen to threaten the individual in the mid-twentieth century. Traces the emergence of new literary practices associated with postmodernism as efforts to represent and critique these trends, and examines key figures—the Beat poet, the cyborg, and the primitive—as flashpoints in cultural debates about what constitutes the human. Key topics include the aesthetics of spontaneity, the status of art in a time of consumerism, the influence of mass media on the feel of everyday life, and art's at times contentious, at times inspired relationship with technology. Texts may include novels, poems, and readings by Hannah Arendt, Flannery O'Connor, Vladimir Nabokov, Theodor Adorno, Norbert Wiener, Charles Olson, Jack Kerouac, Diane Di Prima, PK Dick, and Amiri Baraka.

Previous terms offered: Fall 2020, Spring 2019.

ENGL 2554 (c) Classic Twentieth-Century LGBT Cultural Texts

Non-Standard Rotation. Enrollment limit: 35.

Analyzes some of the most enduring, and in some cases infamous, lesbian and transgendered cultural texts of the twentieth century. Whether authored by avowed LGBT authors or by non-LGBT cultural producers, such works reflect some of the specific challenges that U.S. and European writers and others have continued to face in depicting portrayals of same-sex identities and desires that seek to reject totalizing narratives of pathology and criminalization. Possible texts include: *The Well of Loneliness*, *Death in Venice*, *Giovanni's Room*, *The Boys in the Band*, *The Front Runner*, *Stone Butch Blues*, *Hitchcock's Rope*, *The Children's Hour*, *Will and Grace*, and *Six Feet Under*. (Same as: GSWS 2554)

Previous terms offered: Spring 2020.

ENGL 2555 (c) Fictions of Finance

Non-Standard Rotation. Enrollment limit: 35.

The world of economics and the world of literature have for centuries shared a vocabulary. Words such as speculation, value, interest, and depression have both financial and cultural connotations. In this course, we will examine this connection as it develops across the 20th- and 21st-century American fiction. How do the stories we tell and the ways we tell them evolve with shifts in the marketplace? How does culture influence the economy? How have authors and filmmakers dealt with huge economic events such as the financial crisis of 2007? In considering the social ramifications of the world of finance, the course will also draw on a variety of theoretical texts ranging from political economy to cultural studies. Authors and filmmakers include Edith Wharton, W. E. B. Du Bois, F. Scott Fitzgerald, Ursula K. Le Guin, Don DeLillo, Marlon James, Ben Lerner and Martin Scorsese.

Previous terms offered: Fall 2020.

ENGL 2556 (c) America and the Globe

Every Other Year. Enrollment limit: 35.

What does it mean when we say that we live in a global age? And what are the connections between the global and the American? We will examine contemporary fiction, film, and culture from or about the United States that contemplate America's place in the world. We will consider the global reach and dominance of American culture and the increasingly multiethnic nature of contemporary American life. We will examine questions of race, gender, and class under a global lens and reflect on how such subjects as global migration, worldwide media like the internet, and increased economic interdependence are portrayed in novels and films. Texts include novels by Toni Morrison, Teju Cole, Valeria Luiselli, and Tommy Orange; films by Boots Riley and Bong Joon-ho; and theoretical texts by Saskia Sassen, Immanuel Wallerstein, and Sylvia Wynter. [Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.]

Previous terms offered: Spring 2022.

ENGL 2582 (c) Reading "Uncle Tom's Cabin"

Non-Standard Rotation. Enrollment limit: 16.

Introduces students to the controversial history of reader responses to Harriet Beecher Stowe's 1852 antislavery novel, *Uncle Tom's Cabin*. Students engage with various theoretical approaches—reader response theory, feminist, African Americanist, and historicist—to the novel, then turn to the novel itself and produce their own literary interpretation. In order to do so, students examine the conditions of the novel's original production. By visiting various historic locations, the Stowe House on Federal Street, the First Parish on Maine Street, Special Collections of the Hawthorne-Longfellow Library, students compare the novel's original historical context to the history that the novel produced. Aside from reading Stowe's antislavery fiction, students also read works produced with and against *Uncle Tom's Cabin*. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: AFRS 2582)

Previous terms offered: Spring 2022, Spring 2020, Fall 2018.

ENGL 2603 (c) African American Fiction: Humor and Resistance

Non-Standard Rotation. Enrollment limit: 35.

Explores rich traditions of African American humor in fiction, comics, graphic narratives, and film. Considers strategies of cultural survival and liberation, as well as folkloric sources, trickster storytellers, comic double-voicing, and the lampooning of racial ideologies. Close attention paid to modes of burlesque, satirical deformation, caricature, tragicomedy, and parody in historical and contemporary contexts, including such writers and performers as Charles Chesnutt, Bert Williams, Langston Hughes, Zora Neale Hurston, Richard Pryor, Ishmael Reed, Aaron McGruder, Dave Chappelle, and Suzan-Lori Parks. (Same as: AFRS 2603)

Previous terms offered: Fall 2020.

ENGL 2604 (c, VPA) African American Literature and Visual Culture

Non-Standard Rotation. Enrollment limit: 35.

Explores creative collaborations and cross currents in African American literary and visual arts over the past century. Considers the problems of minstrelsy, masking, and caricature – as well as instruments of militant image-making in both literary and visual forms. Topics of special interest include uplift and documentary photography; modernist resistance languages of the Harlem Renaissance; shadows, silhouettes, and invisibility; comic strips and graphic narratives; and contemporary images – prints, texts, and illustrations – that introduce alternative socio-political allegories. The course will engage with works held in the Bowdoin College Museum of Art and in Special Collections and Archives. (Same as: AFRS 2604)

Previous terms offered: Spring 2021.

ENGL 2605 (c) The Harlem Renaissance

Non-Standard Rotation. Enrollment limit: 35.

Focuses on the African American literary and cultural call-to-arms of the 1920s. Modernist resistance languages; alliances and betrayals on the left; gender, sexuality, and cultural images; activism and literary journalism; and music and visual culture are of special interest. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: AFRS 2605)

Previous terms offered: Spring 2022.

ENGL 2650 (c) African American Fiction: (Re) Writing Black Masculinities

Non-Standard Rotation. Enrollment limit: 35.

In 1845, Frederick Douglass told his white readers: "You have seen how a man was made a slave; you shall see how a slave was made a man." This simple statement effectively describes the enduring paradox of African American male identity: although black and white males share a genital sameness, until the nation elected its first African American president the former has inhabited a culturally subjugated gender identity in a society premised on both white supremacy and patriarchy. But Douglass's statement also suggests that black maleness is a discursive construction, i.e. that it changes over time. If this is so, how does it change? What are the modes of its production and how have black men over time operated as agents in reshaping their own masculinities? Reading a range of literary and cultural texts, both past and present, students examine the myriad ramifications of, and creative responses to, this ongoing challenge. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: AFRS 2650, GSWs 2260)

Previous terms offered: Fall 2021.

ENGL 2651 (c, DPI) Queer Race

Guy Mark Foster.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

How does the concept of queerness signify in cultural texts that are ostensibly about the struggle for racial equality? And vice versa, how does the concept of racialization signify in cultural texts that are ostensibly about the struggle for LGBT recognition and justice? While some of this work tends to reduce queer to traditional sexual minorities like lesbian and trans folk while downplaying racial considerations, others tend to limit the category race to people of color like blacks while downplaying questions about sexuality. Such critical and creative gestures often place queer and race in opposition rather than as intersecting phenomena. Students examine the theoretical and cultural assumptions of such gestures, and their implications, through close readings of selected works in both the LGBT and African American literary traditions. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: AFRS 2651, GSWS 2651)

ENGL 2653 (c) Interracial Narratives

Non-Standard Rotation. Enrollment limit: 35.

Violence and interracial sex have long been conjoined in U.S. literary, televisual, and filmic work. The enduring nature of this conjoining suggests there is some symbolic logic at work in these narratives, such that black/white intimacy functions as a figural stand-in for negative (and sometimes positive) commentary on black/white social conflict. When this happens, what becomes of "sex" as a historically changing phenomenon when it is yoked to the historically unchanging phenomenon of the "interracial"? Although counter-narratives have recently emerged to compete with such symbolic portrayals, i.e. romance novels, popular films and television shows, not all of these works have displaced this earlier figural logic; in some cases, this logic has merely been updated. Explores the broader cultural implications of both types of narratives. Possible authors/texts: Richard Wright, Chester Himes, Ann Petry, Lillian Smith, Jack Kerouac, Frantz Fanon, Kara Walker, Amiri Baraka, Alice Walker, Octavia Butler, John R. Gordon, Kim McLarin, *Monster's Ball*, *Far From Heaven*, and *Sex and the City*. (Same as: AFRS 2653, GSWS 2283)

Previous terms offered: Fall 2019.

ENGL 2654 (c) Staging Blackness

Non-Standard Rotation. Enrollment limit: 35.

Examines the history and contributions of African Americans to United States theater from the early blackface minstrel tradition, to the revolutionary theater of the Black Arts writers, to more recent postmodernist stage spectacles. Among other concerns, such works often dramatize the efforts of African Americans to negotiate ongoing tensions between individual needs and group demands that result from historically changing forms of racial marginalization. A particular goal is to highlight what Kimberly Benston has termed the expressive agency with which black writers and performers have imbued their theatrical presentations. Potential authors include Zora Neale Hurston, Langston Hughes, Lorraine Hansberry, Amiri Baraka, Ron Milner, Adrienne Kennedy, Ntozake Shange, George C. Wolfe, Anna Deavere Smith, *Afro Pomo Homos*, and August Wilson. (Same as: AFRS 2630, THTR 2854)

Previous terms offered: Fall 2018.

ENGL 2700 (c, IP) The Animal and the Human

Non-Standard Rotation. Enrollment limit: 35.

Considers the changing philosophical and political significance of representations of the animal and of human/animal interactions in modern and contemporary literature. Focuses on global fiction and investigates the role of the animal in the theories and philosophies of biopolitics, shamanism, and animism. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.

Previous terms offered: Fall 2021.

ENGL 2706 (c, IP) Novels Across Nations

Hilary Thompson.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Modern and contemporary fiction that engages the global by having characters who cross borders or inhabit more than one national category; having stories that make readers question the homogeneity and cohesiveness of the traditional nation-state; or having readerships located beyond the settings of their narratives. Writers from Africa, Asia, the Caribbean, and the Middle East may be considered, as well as issues of anti-colonialism, globalization, warfare, migration, and diaspora. Possible authors read include Chimamanda Ngozi Adichie, Amitav Ghosh, Helon Habila, Mohsin Hamid, Kazuo Ishiguro, Randa Jarrar, Andrea Levy, Dinaw Mengestu, Chinelo Okparanta, Yvonne Adhiambo Owuor, Elif Shafak, and Kim Thuy. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.

Previous terms offered: Spring 2019.

ENGL 2749 (c, IP) Global Asian Popular Fiction

Non-Standard Rotation. Enrollment limit: 35.

Explores the ways global Asian women writers have transformed popular genres as well as traditional forms as they address issues of gender identity, migration, political polarization, imperialist expansion, and ecological crisis. Examines how writers from East, South, and Southeast Asian lineages merge the anglophone novel and modern short story with modes spanning Asian and Western literary traditions, including myth, fairy tale, ancient epic, fantasy, romance, ghost tale, martial arts and magical narrative (*wuxia* and *xianxia*), and science fiction. Featured authors include Zen Cho, R. F. Kuang, and Tasha Suri, with possible brief works by Amanda Lee Koe, Anjali Sachdeva, Vandana Singh, Nghi Vo, and J. Y. Yang. (Same as: ASNS 2809)

Previous terms offered: Spring 2021.

ENGL 2750 (c) Asian American Literature

Non-Standard Rotation. Enrollment limit: 35.

An introduction to the writings of Asian America and this literature's development from early twentieth century to the present. Focuses on the ways Asian American writers have responded to and contested dominant Western discourses of Asia/Asians. Also explores the intersections of race with gender, sexuality, class, and country of origin in shifting notions of Asian American identity. Authors include Winnifred Eaton, Carlos Bulosan, Monica Sone, John Okada, Frank Chin, Maxine Hong Kingston, and David Henry Hwang. (Same as: ASNS 2801)

Previous terms offered: Fall 2021, Fall 2018.

ENGL 2758 (c, DPI) New Fictions of Asian America

Belinda Kong.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines developments in Asian American literature since 2000 and asks how postmillennial fictions extend earlier writings' core concerns with racial identity and national belonging in the United States. Themes and contexts include globalization and transnationalism, illegal immigration and refugee experience, the post-9/11 security state and surveillance, the expansion of Asian capital, the global financial crisis, digital technology and social media, and climate change. Considers the diverse genres and functions of Asian American literature as not simply ethnic self-writing but also social satire, political critique, historical archaeology, cultural memory, and dystopic science fiction. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ASNS 2806)

Previous terms offered: Spring 2021, Fall 2020.

ENGL 2760 (c, DPI) Asian America's Margins

Every Other Year. Enrollment limit: 35.

Explores the margins of Asian America through literary perspectives of queerness, mixed-race identities, transnational and transracial adoption, disability, and mental illness. Examines the ways authors contest dominant white discourses of Asianness as well as the stigmatized zones within Asian American life. Authors may include K-Ming Chang, Alexander Chee, Nicole Chung, Thanh-Thao Sue Do, Velina Hasu Houston, Yiyun Li, Leah Lakshmi Piepzna-Samarasinha, Matthew Salesses, Jane Jeong Trenka, Ocean Vuong, Esmé Weijun Wang, and Alice Wong. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ASNS 2805)

Previous terms offered: Spring 2022.

ENGL 2801 (c, VPA) Of Comics and Culture

Non-Standard Rotation. Enrollment limit: 35.

An introduction to comics, graphic narratives, and sequential art. Explores elements of the history of the comics – especially in a United States cultural context – while examining the formal dimensions of this hybrid art. Considers the cultural functions of this work in theoretical terms, as well as the sociology of its reception. Examines comics as personal narrative, social criticism, political commentary, fantasy, and science fiction, among other modes. Special focus on the functions of humor, irony, pathos, and outrage, as deployed in historical and contemporary comic forms.

Previous terms offered: Fall 2021.

ENGL 2804 (c) Maine Writers and the Environment

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon.

Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

Explores the wild and diverse literary territories of the state of Maine – past and present – with a focus on coastal narratives and environmental writing. Considers Maine's multi-ethnic folkways, its austere modernisms, remorseless gothic landscapes, natural splendors and antagonisms, coastal rhapsodies and adversities, and contemporary environmental imperatives. Includes poetry, short stories, novels, memoirs, personal narratives, children's literature, nature writing, and environmental advocacy by such writers as Thoreau, Jewett, Robinson, Millay, Beston, Carson, McCloskey, King, Russo, Strout, and Bryan. Taught in residence at the Bowdoin College Schiller Coastal Studies Center. English 2804/ Environmental Studies 2804 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 2330 (same as Environmental Studies 2233), and Biology 2501 (same as Environmental Studies 2231) are co-requisites of this course. (Same as: ENVS 2804)

Previous terms offered: Fall 2018.

ENGL 2805 (c) Theory and Practice of Tutoring Writing

Meredith McCarroll.

Every Spring. Spring 2023. Enrollment limit: 18.

This course explores theories and practices of the peer tutoring in writing, emphasizing collaborative learning, linguistic diversity, and student voice. We will explore the role that language standardization plays in perpetuating white supremacy and systemic racism, along with strategies to support all student writers. The history, theory, and practice of Writing Studies, paired with Critical Pedagogy, prepares selected Writing Assistants for to work in the Writing Center. This course does not count toward the English major. Only open to students selected as Writing Assistants.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENGL 2841 (c) Introduction to Literary and Cultural Theory

David Collings.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores some of the most important and compelling aspects of literary and cultural theory from the past century. Situates critical movements such as Marxism, psychoanalysis, feminism, structuralism, deconstruction, queer theory, postcolonial theory, critical race theory, and cultural studies in their historical and intellectual contexts. Includes such authors as Marx, Freud, Benjamin, Barthes, Derrida, Foucault, Lacan, Sedgwick, Butler, and Žižek.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENGL 2852 (c) Creative Writing: Poetry II

Non-Standard Rotation. Enrollment limit: 12.

Builds upon the method of studying and crafting poetry encountered in English 1225. Students exposed to advanced methods of writing and interpretation, including the in-depth study of one particular poet's oeuvre and evolution. Students encouraged to develop a more comprehensive view of their own individual poetic practices. Each week students responsible for evaluating the assigned reading and for writing poems. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Fall 2021, Fall 2019.

ENGL 2853 (c) Advanced Fiction Workshop

Brock Clarke.

Every Spring. Spring 2023. Enrollment limit: 12.

Presumes a familiarity with the mechanics of fiction and, ideally, previous experience in a fiction workshop. Uses published stories and stories by students to explore questions of voice and tone, structure, and plot, how to deepen one's characters, and how to make stories resonate at a higher level. Readings will consist of a series of novels, short stories, and essays that seek to decolonize literature and to push us to examine questions of identity, power, and the state. Students write at least two stories during the semester and revise at least one. Workshop discussion and critiques are an integral part. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENGL 2854 (c) Telling Environmental Stories

Non-Standard Rotation. Enrollment limit: 12.

Intended for students with a demonstrated interest in environmental studies as an introduction to several modes of storytelling, which communicate ideas, historical narratives, personal experiences, and scientific and social issues in this increasingly important area of study and concern. Explores various techniques, challenges, and pleasures of storytelling, and examines some of the demands and responsibilities involved in the conveyance of different types of information with clarity and accuracy in nonfiction narrative. Engages student writing through the workshop method, and includes study of several texts, including "The Control of Nature," "Cadillac Desert," "Living Downstream," and "Field Notes from a Catastrophe." Note: Fulfills the creative writing concentration requirement for English majors. (Same as: ENVS 2423)

Previous terms offered: Fall 2018.

ENGL 2860 (c) Character, Plot, Scene, Theme, Dream: The Fundamentals of Screenwriting

Anthony Walton.

Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

Introduction to the basic practices of writing for the screen, including concepts, techniques, and predictable problems. Students study and analyze films and scripts from the perspective of the screenwriter and complete a writing project of their own. Note: Fulfills the creative writing concentration requirement for English majors. (Same as: CINE 2860)

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

ENGL 2861 (c) Advanced Narrative Nonfiction: Writing About the History, Culture, and Politics of Food

Non-Standard Rotation. Enrollment limit: 12.

Students read a wide range of published works about the history, culture, and politics of food— including writings by Henry David Thoreau, M.F.K. Fisher, Edna Lewis, and Michael Pollan—and write and revise substantial narratives that combine personal and researched material. Focuses on the craft of writing, particularly on structure and voice. All students are expected to fully participate in weekly workshop discussions. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Fall 2020, Fall 2019.

ENGL 2862 (c) Longform Nonfiction Writing

Non-Standard Rotation. Enrollment limit: 12.

A creative nonfiction course on the application of fictional techniques to journalistic material in magazine-length pieces. Examines why, in an age of text messages and tweets, longer narrative is experiencing a resurgence. Engages with the history and evolution of literary journalism, while addressing many considerations that face the writer, including choice of subject matter, structure, pacing, dialogue, scene, and style. Students read a wide range of published work, including pieces by Elif Batuman, Katherine Boo, Truman Capote, Ta-Nehisi Coates, Rachel Kaadzi Ghansah, John McPhee, Rachel Monroe, John Jeremiah Sullivan, Guy Talese, and others, and will write in several main subgenres of the field. Full participation in workshop discussions is required. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Spring 2021, Spring 2019.

ENGL 2863 (c) The Fractured and The Lyric: Advanced Forms of Creative Nonfiction

Non-Standard Rotation. Enrollment limit: 12.

Examines the relationship between form and content in contemporary creative nonfiction, and how formal experimentation is used to evoke risky, unconventional, or suppressed narratives, from the traumatic to the ecstatic. Students read a wide range of essays, memoir, and hybrid work that uses lyricism and fragmentation. Authors may include Gloria Anzaldúa, Eula Biss, Jenny Boully, Anne Carson, Jamaica Kincaid, Kiese Laymon, Maggie Nelson, Andrés Neuman, Lia Purpura, Claudia Rankine, and others. Students write and substantially revise their own narratively daring work, with an emphasis on structure and voice. All students are expected to fully participate in weekly workshop discussions. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Spring 2020.

ENGL 2864 (c) The Personal (Essay) is Political

Zahir Janmohamed.

Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

Takes Carol Hanisch's canonical 1970 essay "The Personal is Political" as inspiration to consider how memoir has been, and still might be, used to illuminate broader societal inequities and galvanize social change. Asks how writers shape personal political narratives to transcend testimony and become art, and how political and social justice opinion writing can effectively incorporate personal narrative. Focuses on contemporary writers, such as Ta-Nehisi Coates, Kaitlyn Greenidge, bell hooks, Kiese Laymon, Meredith Talusan, Megan Stielstra, Michelle Tea, Wesley Yang, and others. Students will read and discuss published works in a variety of styles and on a diversity of topics to gain an understanding of form and technique. They will use these techniques to write both op-eds and longer personal political essays. All are expected to fully participate in weekly workshop discussions. Note: Fulfills the creative writing concentration requirement for English majors.

Previous terms offered: Fall 2021.

ENGL 2865 (c, IP) Structures of the Short Story

Non-Standard Rotation. Enrollment limit: 18.

Explores fundamentals of narrative construction through reading short masterworks of Russian literature alongside a variety of creative writing assignments. What makes a story compelling—or, for that matter, what makes it a story at all? This course focuses on the complex machinery producing what John Gardner called the "vivid and continuous dream" of fiction, moving from what a story means to how it means. Our guides in this process will be the Russian writers who helped innovate and fine-tune the modern short story, from Pushkin to Turgenev to Chekhov, and whose legacies continue to hold sway over the form. In response to readings, students write short creative or analytical assignments on the narrative techniques under study. This course is meant for writers and literature students alike; no previous creative writing experience required. All course materials are in English. Note: Fulfills the creative writing concentration requirement for English majors. (Same as: RUS 2232)

Previous terms offered: Fall 2021.

ENGL 2866 (c, VPA) Creative Writing Workshop: Playwriting

Non-Standard Rotation. Enrollment limit: 12.

Playwrights say nothing compares to hearing their words onstage in live performance. But how does a story become a play? How is a play different than a novel, a short story, or a screenplay? This creative writing class focuses on writing for live performance and includes exercises in writing dialogue, character, conflict, scenes, and solo performance texts, then moves to the writing (and rewriting) of a short play. Students also read plays critically, considering how writers use image, action, speech, and silence; how they structure plays and performance pieces; and how they approach character and plot. Weekly writing exercises are critiqued in a group workshop format. (Same as: THTR 2401)

Previous terms offered: Spring 2022, Spring 2019.

ENGL 2867 (c) Decolonizing the Craft of Writing

Zahir Janmohamed.

Non-Standard Rotation. Spring 2023. Enrollment limit: 12.

Toni Morrison once said, "I have spent my entire writing life trying to make sure that the white gaze was not the dominant one in any of my books." This course takes that quote as inspiration and examines how writers of color, queer writers, female-identifying writers, and differently abled writers, have created works of fiction and nonfiction that do not pander to the dominant gaze. Students will read contemporary books on craft and identity by authors like Felicia Rose Chavez, Melissa Febos, David Mura, and Matthew Salesses and be asked to produce, and then workshop, fiction and nonfiction pieces that respond to the ideas found within these books. Additional readings may include Garth Greenwell, Brandon Taylor, Maxine Hong Kingston, Salman Rushdie, and other authors whose work expands ideas and expectations of what a story can and should be, especially when told by writers who historically have been on the margins. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors.

ENGL 2902 (c, VPA) Performing America: Identities on Stage

Every Other Year. Enrollment limit: 35.

What does it mean to act (or dance) like an American? In 1840, French writer Alexis de Tocqueville argued that the characteristics of this young nation, the United States of America, and its people could be studied in its theaters. He based this on a few key observations. Theater is a social event, where people gather in groups to watch other groups of people interact. Theater is also an immediate art, performed live in front of a specific audience. Takes its start from Tocqueville's observations by looking at American performances in drama, dance, and theatrical events as reflections of changing American identities. Looks at indigenous and colonial drama, but a majority of the course focuses on drama, musical theater, and dance of the nineteenth and twentieth centuries. In particular, looks at the ways in which specific performances defined what it meant to be American, as well how individual artists reshaped theater and dance to represent their own diverse identities. As part of the reading, attends to the variety of identities—racial, ethnic, gendered, classed, and religious—that emerge from and continue to define the diversity of America on stage. (Same as: THTR 2510)

Previous terms offered: Spring 2019.

ENGL 2903 (c) A History of Anti-Semitism

Every Other Year. Enrollment limit: 35.

Introduces students to a history of anti-Semitism (and its antecedent, anti-Judaism) as discursive operations in the world. Its title reflects the approach to this topic—rather than trace a linear narrative of the history of anti-Semitism, students will investigate particular moments, cases, loci, and flashpoints of anti-Semitism via film, drama, short stories, treatises, dialogues, and scripture. Focusing on a range of forms and contexts, the course analyzes the continuities and discontinuities within the polemical discourses representing Jews and Judaism. The course will consider, for example, Biblical supersessionism; Blood Libel; The Merchant of Venice, Protocols of the Elders of Zion; Christian Zionist anti-Semitism; the Jewish Museum of London's recent exhibit *Jews, Money, Myth*; contemporary politics and BDS (boycott, divestment, and sanctions); and the rise of white nationalism. (Same as: REL 2214)

Previous terms offered: Spring 2022, Spring 2020.

ENGL 2904 (c, DPI) Queer Latinx Literature and Culture

Non-Standard Rotation. Enrollment limit: 16.

This seminar examines representations of queer Latinx identities and experiences through intersectional and interdisciplinary lenses, focusing on texts crafted by US-based Latinx authors. Students develop an understanding of the aesthetic and ideological elements that inform the narrativization of queer Latinx experience and the tensions that arise through the intersection of sexuality, gender, race, and ethnicity in a variety of texts and genres. In addition to highlighting the value of reading literature written by authors who belong to the marginalized groups that they write about, this course is meant to disrupt monolithic and homogenizing understandings of what it means to be queer and Latinx. Potential topics include futurism, *la familia*, borderlands, machismo and patriarchy, the coming-out narrative, and memory. This course satisfies the African American, Asian American, Indigenous, Latinx, Multiethnic American, or global literature requirement for English majors. (Same as: GSWS 2704, LACL 2304)

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher or ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Spring 2022.

ENGL 3002 (c) James Joyce Revolution

Non-Standard Rotation. Enrollment limit: 15.

An examination of James Joyce's signal contributions to modern writing and critical theories. Reading includes the major works ("Dubliners," "Portrait of the Artist as a Young Man," "Ulysses"), essays by Joyce, and writings by others who testify to the Joyce mystique, e.g., Oliver St. John Gogarty, T. S. Eliot, Virginia Woolf, Jacques Derrida, Seamus Heaney, Maud Ellmann.

Previous terms offered: Fall 2021, Fall 2019.

ENGL 3007 (c) The Secret Life of Things

Ann Kibbie.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

We tend to focus on the people who populate literary texts, but what do we see when we direct our attention to the things that they create, use, or wear; buy, sell, or steal; produce or consume; treasure or destroy? Explores this world of things (money, jewels, tools, weapons, clothing, portraits, animals), and the literary, legal, and philosophical questions that such things raise in a wide variety of texts. Readings will include major novels, such as Daniel Defoe's *Robinson Crusoe* and *Roxana*; a collection of popular "it narratives" (that is, stories "told" from the point of view not of a person, but of an object, such as a wig, a shoe, and a gold coin); essays in which eighteenth-century writers explore Great Britain's consumer culture; and satires, such as Jonathan Swift's *Gulliver's Travels*. This course fulfills the pre-1800 requirement for the English major.

Prerequisites: ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

ENGL 3011 (c) African American Film

Elizabeth Muther.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Advanced Seminar. Explores a spectrum of films produced since 1950 that engage African American cultural experience. Topics may include black-white buddy movies, the L.A. Rebellion, blaxploitation, the hood genre, cult classics, comedy and cross-dressing, and romance dramas. Of special interest will be the documentary impulse in contemporary African American film; gender, sexuality, and cultural images; the politics of interpretation—writers, filmmakers, critics, and audiences; and the urban context and the economics of alienation. Extensive readings in film and cultural theory and criticism. Note: Fulfills the film theory requirement for Cinema Studies minors. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: AFRS 3011, CINE 3011)

Prerequisites: ENGL 1000 or higher or AFRS 1000 or higher or FILM 1000 or higher or CINE 1000 or higher.

Previous terms offered: Spring 2020.

ENGL 3012 (c) Cosmopolitanism and Creaturely Life

Non-Standard Rotation. Enrollment limit: 15.

Advanced seminar. An exploration of the ways contemporary planetary consciousness has influenced conceptions of the human and the animal, as well as their supposed difference. Examines, in light of modern and current world literature, new models for both the exemplary world citizen and human species identity. Investigates to what extent, and by what creative means, reconsiderations of humans' impact on the planet and place in the world are recorded in narratives of other creatures and the perceptual possibilities of their worlds. Texts may include fiction by Kafka, Rilke, Borges, Woolf, Murakami, and Sinha, as well as the philosophies of Uexkull, Heidegger, Derrida, Latour, and Agamben. (Same as: URBS 3012)

Prerequisites: ENGL 1000 - 1049 or ENGL 1100 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Fall 2020, Fall 2018.

ENGL 3015 (c) James Baldwin

Non-Standard Rotation. Enrollment limit: 15.

Examines the major postwar writings of the controversial African American author and the role his fiction and nonfiction played in challenging that era's static understandings of racial, gender, and sexual politics. Although Baldwin lived abroad for much of his life, many critics associate the author narrowly with the United States black civil rights and sexual liberation struggles. In recent years, however, Baldwin has increasingly been recognized as a transnational figure and for his invaluable contributions to the discourse of globalization. Indeed, Baldwin's "geographical imagination," one informed by critical racial literacy, led him to anticipate many of the central insights of contemporary Queer Studies, Whiteness Studies, as well as Africana philosophical thought. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: AFRS 3015, GSWS 3015)

Prerequisites: ENGL 2000 - 2969 or AFRS 2000 - 2969 or GLS 2000 - 2969 or GSWS 2000 - 2969.

Previous terms offered: Spring 2022.

ENGL 3022 (c) The Arts of Science in the English Renaissance

Aaron Kitch.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Advanced Seminar. Examines the convergence of new modes of scientific knowledge and new genres of fiction in the period between 1500 and 1650 when writers such as Philip Sidney, William Shakespeare, and Margaret Cavendish redefined imaginative literature as a tool of scientific inquiry. Topics include utopian technologies, alchemy and sexuality, natural philosophy, and the science of humanism. Authors (in addition to those mentioned above) include Thomas More, Christopher Marlowe, John Donne, and Ben Jonson. Secondary readings feature Francis Bacon, Bruno Latour, Steven Shapin, Bruce Moran, and Elizabeth Spiller, among others. Note: Fulfills the pre-1800 literature requirement for English majors.

Prerequisites: ENGL 1000 - 1049 or ENGL 1100 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Spring 2021.

ENGL 3028 (c, DPI, IP) Imagined Asias

Non-Standard Rotation. Enrollment limit: 16.

Examines how Asia has been represented by America and Europe and how Asian authors have responded. Draws from a wide archive of literature, theory, film, and mass culture from mid-nineteenth century to the present. Not a survey: focus on case studies that explore historical exemplars of as well as conceptual alternatives to the critical model of orientalism, which regards western depictions of Asia as necessarily reflecting the culture of empire. Issues include US racial discourses of exoticism and the yellow peril; western modernist and postmodern appropriations of "oriental" cultures for self-critiques; and strategies of hybridity, self-orientalism, and occidentalism by Asian and Asian diasporic writers and filmmakers. Possible works by Edward Said, Pierre Loti, Bret Harte, Jack London, Winnifred Eaton, David Henry Hwang, Ezra Pound, Italo Calvino, Roland Barthes, Gayatri Spivak, Rey Chow, J. G. Ballard, Kazuo Ishiguro, Amitav Ghosh, Haruki Murakami, Bei Dao, Shan Sa, Su Tong, Ang Lee, Wong Kar-wai, and Stephen Chow. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ASNS 3801)

Prerequisites: ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher or ASNS 1000 - 2969 or ASNS 3000 or higher.

Previous terms offered: Spring 2022, Spring 2019.

ENGL 3030 (c) Ecopoetics: Poetry and the Environment

Samia Rahimtoola.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Examines the relationship between poetry and the environment beyond nature poetry. Topics include poets' search for a "natural" language, the construction of the environmental subject; the persistence of preindustrial modes of life within poetic practices; poetry as a resource for the invention of new environmentalisms; the mastery of the natural world through technology and art; the oft-debated relationship between poetry and activism; and race, gender, sexuality, and ecopoetics. Begins with concepts arising from foundational ecocritical texts, before turning to modern and contemporary American ecopoetry, including works by Emily Dickinson, Wallace Stevens, Elizabeth Bishop, Charles Olson, Lorine Niedecker, Wanda Coleman, Craig Santos Perez, and C.S. Giscombe.

Prerequisites: ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Spring 2019.

ENGL 3032 (c) Sir Gawain and the Green Knight

Non-Standard Rotation. Enrollment limit: 16.

Advanced seminar. Focuses on "Sir Gawain and the Green Knight," an anonymous medieval poem that is often described as an exquisitely cut jewel: intricate and dazzling. Explores this mysterious and complex text in its literary and historical context, alongside other myths and legends of King Arthur, his knights of the Round Table, and the monsters, fairies, and goddesses that lurk beyond the borders of Camelot. Note: This class fulfills the pre-1800 literature requirement for English majors.

Prerequisites: ENGL 1000 - 1049 or ENGL 1100 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Fall 2020, Fall 2018.

ENGL 3033 (c) Contemporary Narratives of Slavery

Non-Standard Rotation. Enrollment limit: 16.

Examines recent literary and filmic narratives of slavery. Some scholars claim these texts heal readers of psychic pain while also facilitating a deep connection to long departed ancestors. For others, these works only nurture the "ledger of racist slights" that diasporic blacks continue to catalogue to the present day, all the while distracting each of us from cultivating a more hopeful stance with respect to our collective present. This course maps a critical space beyond the binary of either "therapeutic" or "prohibitive" claims to engage questions of racialized experience, feeling, identification, and desire. Authors and texts may include: *Birth of a Nation*, Octavia Butler, John R. Gordon, Yaa Gyasi, Toni Morrison, and Colson Whitehead. (Same as: AFRS 3033)

Prerequisites: ENGL 1000 - 1049 or ENGL 1100 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Spring 2019.

ENGL 3034 (c) Victorian Realism: Dickens and Eliot

Non-Standard Rotation. Enrollment limit: 16.

Examines the genre of Victorian realism through major works by Charles Dickens and George Eliot. Among other aspects, we will consider the ways in which each author works to create the "real" in their novels; study the idea of verisimilitude as a literary and ideological concept; and think about narrative form in relation to issues of gender, class, sexuality, and race. Engagement with literary criticism on these works will also be central to our discussions.

Previous terms offered: Fall 2019.

ENGL 3035 (c) Networks of Literature/Literature of Networks

Morten Hansen.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

What role has the rise of networks of information had on the way we live our lives? Have technological and social networks changed how texts are written and has literature influenced the way we think of technology? In this course, we will read a broad range of contemporary texts that in different ways make use of networks to answer the question of what networks are and what they do. We will look at both traditional works of literature, including novels and poems, as well as texts written for and on the Internet. Our readings will also include secondary texts about the history of new media, philosophical investigations of networks, and new forms of critical engagement that make use of digital technology. Authors will include Colson Whitehead, Jennifer Egan, Thomas Pynchon, China Miéville, Agha Shahid Ali, Cathy Park Hong, and Teju Cole.

Prerequisites: ENGL 2000 - 2969.

Previous terms offered: Spring 2020.

ENGL 3036 (c) The History of the Common Body

Non-Standard Rotation. Enrollment limit: 16.

Examines the history of the common body in Western culture in festivals, ideas of the body politic and of the commons, and fears of exposure to shared embodiment. Traces attempts to contain this common body through codes of manners; the fascination for what is loathed, including the plague, the female body, the mob, and the racial and sexual other; and episodes of collective violence, public hangings, and lynchings. Considers transformations of the common body in biopower, enclosure, capitalism, communism, and mass society. Examines carnivalesque comedy, early pseudofactual fiction, grotesque satire, enclosure elegies, urban gothic, the psychoanalytic case study, blackface performance, and avant-garde provocation. Authors may include Euripides, Jonson, Hobbes, Erasmus, Defoe, Swift, Clare, Marx, Twain, Stevenson, and Freud, alongside readings in Bakhtin, Elias, Lott, Bersani, and Debord. Note: fulfills the pre-1800 literature requirement for English majors.

Prerequisites: ENGL 2000 - 2969.

Previous terms offered: Spring 2020.

ENGL 3037 (c) The Female Gothic in Literature and Film

Non-Standard Rotation. Enrollment limit: 16.

In her memoir, *In the Dream House*, author Carmen Maria Machado defines the female gothic as consisting of "woman plus habitation." In this class, we will examine literary and cinematic texts that represent the endangerments faced by women in architectural and social spaces. We will explore the affects of fear and paranoia and their relationship to domesticity, as well as the ways in which more recent modes of the gothic have shifted their concerns to intersectional identities. Authors and directors may include Ari Aster, Alfred Hitchcock, Shirley Jackson, Henry James, Carmen Maria Machado, Toni Morrison, Jordan Peele, and Silvia Moreno-Garcia. Fulfills the advanced seminar requirement for English majors and Cinema Studies minors and the theory requirement for Cinema Studies minors. (Same as: CINE 3037, GSWS 3037)

Prerequisites: ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Spring 2022.

ENGL 3800 (c) Reconstruction and Realism

Non-Standard Rotation. Enrollment limit: 16.

Advanced Seminar. Explores the rise of American literary realism that occurred following the Civil War and its relationship to the social and political events of the South's Reconstruction. Studies works by the major figures of the movement such as Charles Chesnutt, Paul Laurence Dunbar, William Dean Howells, Henry James, Sarah Orne Jewett, Mark Twain, and Edith Wharton. Students are required to develop original readings of these literary texts that engage the political and social contexts in which they were produced. All students present their research in written and oral form. Fulfills the advanced seminar requirement for African studies and English majors. (Same as: AFRS 3010)

Prerequisites: AFRS 2000 - 2969 or ENGL 2000 - 2969.

Previous terms offered: Spring 2021.

Environmental Studies

Overview & Learning Goals

Overview

From its inception, the Environmental Studies Program (ES) at Bowdoin anchors students in both interdisciplinary environmental studies and a recognized academic discipline. With the pairing of a department or program as a coordinate major, environmental studies students are trained to embrace interdisciplinary breadth and disciplinary depth. This combination underscores the mission of Bowdoin as a liberal arts college. ES graduates have long found that the coordinate major translates into success after Bowdoin in graduate or professional school, plus a wide range of professional opportunities.

Learning Goals

The program's mission is to help students understand and respond wisely to environmental challenges facing the planet through rigorous training in the natural sciences, social sciences, and the humanities and arts.

Content

Students should demonstrate fluency in basic principles of the social sciences, humanities and arts, and natural sciences as they relate to environmental inquiry.

1. Engage principles and methods of the **humanities and the arts** to consider ethical, cultural, historical, literary, and artistic dimensions of environmental questions (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2403 Environment and Culture in North American History)
2. Engage principles and methods of the **natural sciences** to understand the physical, chemical, and biological processes that characterize natural and human systems (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2201 Perspectives in Environmental Science, Science Course (see Requirements))
3. Engage principles and methods of the **social sciences** to analyze and evaluate political, economic, psychological, anthropological, and sociological dimensions of environmental questions (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2330 Environmental Policy and Politics)
4. Synthesize **these disciplinary perspectives** to understand the complexities of environmental questions (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS courses numbered 3000–3999 (ENVS advanced seminars))

Skills

Students should acquire and refine the following skills as part of their coordinate major in environmental studies:

1. To locate and critically assess varied **sources of information, data, and evidence** (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2201 Perspectives in Environmental Science, ENVS 2330 Environmental Policy and Politics, ENVS 2403 Environment and Culture in North American History)

2. To identify appropriate **methods** of inquiry to address research questions (ENVS 2201 Perspectives in Environmental Science, ENVS 2330 Environmental Policy and Politics, ENVS 2403 Environment and Culture in North American History)
3. To gain **exposure and practice** in quantitative, qualitative, statistical, and spatial analyses (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2201 Perspectives in Environmental Science, ENVS 2403 Environment and Culture in North American History) and to work toward developing competency and fluency in these areas
4. To understand the importance of **place and locality** in environmental inquiry and evaluate its significance and applicability to other contexts (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2201 Perspectives in Environmental Science, ENVS 2330 Environmental Policy and Politics, ENVS 2403 Environment and Culture in North American History)
5. To understand the importance of **temporal and spatial scales** in environmental inquiry (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2201 Perspectives in Environmental Science, ENVS 2330 Environmental Policy and Politics, ENVS 2403 Environment and Culture in North American History)
6. To discern underlying **values and criteria** used to evaluate alternatives for addressing environmental problems (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2330 Environmental Policy and Politics, ENVS 2403 Environment and Culture in North American History)
7. To work **collaboratively and communicate** across disciplines, while acknowledging and seeking out diverse perspectives (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches and ENVS courses numbered 3000–3999 (ENVS advanced seminars))
8. To develop the ability to identify and engage various **communities and stakeholders**, while acknowledging questions of equity and power (ENVS courses numbered 3000–3999 (ENVS advanced seminars))
9. To **research, write, and present** within multiple disciplines (ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches, ENVS 2201 Perspectives in Environmental Science, ENVS 2330 Environmental Policy and Politics, ENVS 2403 Environment and Culture in North American History)

Options for Majoring or Minor in the Program

Students may elect to coordinate a major in environmental studies with any other department/program major. Students pursuing coordinate majors may not normally elect a second major. Non-majors may elect to minor in environmental studies.

Program Website (<https://www.bowdoin.edu/environmental-studies/>)

Faculty

Connie Y. Chiang, *Program Director*
 Eileen Sylvan Johnson, *Program Manager*
 Rosemary Armstrong, *Program Coordinator*

Professors: Philip Camill (Earth and Oceanographic Science), Connie Y. Chiang (History), Dharni Vasudevan (Chemistry)

Associate Professor: Matthew W. Klinge (History)
Assistant Professors: Mary Rogalski (Biology)‡, Shana M. Starobin (Government)*
Senior Lecturers: Eileen Sylvan Johnson, Jill E. Pearlman
Adjunct Lecturer: Anne C.J. Hayden (spring semester)
Visiting Faculty: Brandon Tate (Chemistry)

Contributing Faculty: Mark O. Battle‡, Rachel J. Beane, David B. Carlon, David Collings, Vladimir Douhovnikoff, Jens Klenner, Laura A. Henry, Guillermo E. Herrera, Amy S. Johnson, Patricia L. Jones, Susan A. Kaplan, Michèle G. LaVigne‡, Barry A. Logan, Erik Nelson, Emily M. Peterman, Samia Rahimtoola, Collin S. Roesler, Allen L. Springer**, Anthony E. Walton

Faculty/Staff Website (<https://www.bowdoin.edu/environmental-studies/faculty-and-staff/>)

Requirements

Environmental Studies Coordinate Major

Students coordinate their study of the environment with any department/program at Bowdoin that offers a major. To satisfy the requirements for the coordinate major in environmental studies, students must complete the nine credits detailed below as well as the major requirements within their coordinated department/program.

Code	Title	Credits
Required Courses		
ENVS 1101	Introduction to Environmental Studies: Interdisciplinary Approaches (preferably taken as a first-year student)	1
ENVS 2201	Perspectives in Environmental Science	1
ENVS 2330	Environmental Policy and Politics	1
ENVS 2403	Environment and Culture in North American History	1
Select one advanced seminar chosen from environmental studies courses numbered 3900–3999.		1
Select three environmental studies (ES) courses (or ES-approved courses) linked by a cohesive theme. ^a		3
Select one science course with a weekly lab numbered 1000 or above		1

^a Selecting these courses allows students to develop a particular interest from the broad spectrum of environmental studies courses offered at Bowdoin. An example of such a theme might be environmental health, environmental justice, or climate change and energy. Students meet with their ES advisor to discuss possible themes, and submit a major planning form to the ES Program.

Environmental Studies Minor

The minor consists of five courses.

Code	Title	Credits
Required Courses		
ENVS 1101	Introduction to Environmental Studies: Interdisciplinary Approaches	1
Select two environmental studies intermediate courses (2000–2969) or higher, one of which must be outside a student's departmental major.		2
Discipline-Based Option Requirements		

Select two core courses in the disciplinary area as specified below: 2

Natural Science Majors	
ENVS 2403	Environment and Culture in North American History
ENVS 2330	Environmental Policy and Politics
Social Science Majors	
ENVS 2201	Perspectives in Environmental Science
ENVS 2403	Environment and Culture in North American History
Humanities Majors	
ENVS 2201	Perspectives in Environmental Science
ENVS 2330	Environmental Policy and Politics

Additional Information

Additional Information and Program Policies

- A grade of C- or better must be earned in a course to fulfill the major or minor requirements, and no courses taken Credit/D/Fail may be applied to the major or minor.
- Students with a score of five on the Environmental Science AP exam can earn one general credit if the student completes ENVS 2201 Perspectives in Environmental Science with a minimum grade of B-. If the student declares a coordinate major in ES, has a score of five on the AP exam, and takes ENVS 2201 Perspectives in Environmental Science with a minimum grade of B-, the student is exempt from taking a science course with a weekly lab and does not need to replace it with another course. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.
- Majors may count up to three courses cross-listed with ES and the students' departmental or program majors to fulfill the environmental studies major requirements. Minors may count up to two courses cross-listed with ES and the students' departmental or program minors to fulfill the environmental studies minor requirements.
- With Environmental Studies Program approval, one off-campus study course may be used to fulfill the major or minor requirements.
- Students may not declare a coordinate major in environmental studies with any of the following: a second departmental major, a student-designed major, or an interdisciplinary major. (See the Interdisciplinary Majors (p. 292).)
- Students may engage in independent study at the intermediate (2970–2979) or advanced (4000–4051) level. Only one semester of independent study or honors work may count toward the major or the minor.

Information for Incoming Students (p. 209)

First-year students interested in environmental studies are encouraged to take the gateway course ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches in the fall. ENVS 1101 Introduction to Environmental Studies: Interdisciplinary Approaches is an interdisciplinary introduction to the environment as framed by perspectives from the natural sciences, social sciences, and arts and humanities. This course does not meet the INS (Inquiry in the Natural Sciences) distribution requirement, nor is it a science course, but it does meet the DPI (Difference, Power, and Inequality) distribution requirement. Students in ENVS 1101 Introduction to Environmental

Studies: Interdisciplinary Approaches meet in a small group discussion section with an instructor once a week for 55 minutes. Discussion sections are listed as separate labs in the Classfinder (<https://classfinder.bowdoin.edu/classfinder/>), but they are not labs. This course is offered every fall.

In the spring, students should consider taking a science course with a weekly lab, the environmental science core course ENV5 2201 Perspectives in Environmental Science, or the environmental social science core course ENV5 2330 Environmental Policy and Politics

If a student declares a coordinate major in ES, has a score of 5 on the Environmental Science AP exam and takes ENV5 2201 Perspectives in Environmental Science with a minimum grade of B-, the student is exempt from taking a science course with a weekly lab and does not need to replace it with another course. To receive credit for advanced placement work, students must have their scores officially reported to the Registrar's office by the end of their sophomore year at Bowdoin.

Courses

ENV5 1016 (c, FYS) Art and the Environment: 1960 to Present

Non-Standard Rotation. Enrollment limit: 16.

Since the 1960s, artists in Western Europe and the United States have used the environment as a site of visual exploration, discussion, critique, and action. From Robert Smithson and his ever-disintegrating "Spiral Jetty," to Agnes Denes's "Wheatfield" growing alongside Wall Street, to Mierle Ukeles's installation and performance art in conjunction with the New York Department of Sanitation, to Eduardo Kac's "GFP Bunny," artists have explored the ways in which art objects are in dialogue with the environment, recycling, and biology. Works engage with concepts such as entropy, the agricultural industry, photosynthesis, and green tourism encouraging us to see in new ways the natural world around us. Visits to the Bowdoin College Museum of Art's collections complement the material studied. Writing-intensive course emphasizes firm understanding of library and database research and the value of writing, revision, and critique. (Same as: ARTH 1016)

Previous terms offered: Fall 2018.

ENV5 1027 (b) The Politics of Climate Change

Laura Henry.

Every Other Fall. Fall 2022. Enrollment limit: 16.

Provides an overview of the major actors engaged in climate politics, ranging from governments to NGOs and corporations. Examines the politics of climate change at multiple levels—from the individual to global governance—and reviews climate policy in different countries. Pays particular attention to cases where active policy making or public mobilization around climate is occurring, asking why we see initiative and innovation in climate policy in these venues and less action in other spaces. Considers themes such as how climate policy is developed differently in democracies and authoritarian regimes, how climate policy may affect economic development, the role of non-state actors such as citizens, social movements, and industry in climate politics, and the ethical implications of different climate policy options. (Same as: GOV 1027)

Previous terms offered: Fall 2020, Fall 2019.

ENV5 1056 (a, INS) Ecology and Society

Vladimir Douhovnikoff.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

Presents an overview of ecology covering basic ecological principles and the relationship between human activity and the ecosystems that support us. Examines how ecological processes, both biotic (living) and abiotic (non-living), influence the life history of individuals, populations, communities, and ecosystems. Encourages student investigation of environmental interactions and how human-influenced disturbance is shaping the environment. Required field trips illustrate the use of ecological concepts as tools for interpreting local natural history. (Same as: BIOL 1056)

Previous terms offered: Spring 2022, Fall 2021, Fall 2020.

ENV5 1060 (a, INS, MCSR) Prove It!: The Power of Data to Address Questions You Care About

Non-Standard Rotation. Enrollment limit: 24.

Climate change, biodiversity loss, pollution, and other environmental issues present significant threats to ecological integrity, human health, and social justice. An overwhelming amount of information exists on these topics, from a variety of perspectives—some reliable, some not. Strategies are required for processing this information and drawing conclusions. Students develop skills in accessing reliable information, data analysis, and interpretation, as well as science communication. (Same as: BIOL 1060)

Previous terms offered: Spring 2022, Fall 2018.

ENV5 1083 (a, INS, MCSR) Energy, Physics, and Technology

Every Other Spring. Enrollment limit: 50.

How much can we do to reduce the disruptions of the Earth's physical, ecological, and social systems caused by global climate change? How much climate change itself can we avoid? A lot depends on the physical processes that govern the extraction, transmission, storage, and use of available energy. Introduces the physics of solar, wind, nuclear, and hydroelectric power and discusses the physical constraints on their efficiency, productivity, and safety. Reviews current technology and quantitatively analyzes the effectiveness of different strategies to reduce greenhouse gas emissions. Not open to students with credit for Physics 1140. (Same as: PHYS 1083)

Previous terms offered: Spring 2022, Spring 2020, Spring 2019.

ENV5 1090 (a, INS) Understanding Climate Change

Every Spring. Enrollment limit: 20.

Why is the global climate changing and how will biological systems respond? Includes sections on climate systems and climate change, reconstructing ancient climates and past biological responses, predicting future climates and biological responses, climate policy, the energy crisis, and potential solutions. Incorporates a few field trips and laboratories designed to illustrate approaches to climate change science at the cellular, physiological, and ecological levels. (Same as: BIOL 1090)

Previous terms offered: Spring 2021, Spring 2019.

ENVS 1101 (DPI) Introduction to Environmental Studies: Interdisciplinary Approaches

Matthew Klinge; Eileen Sylvan Johnson.

Every Fall. Fall 2022. Enrollment limit: 90.

An interdisciplinary introduction to the environment framed by perspectives from the natural sciences, social sciences, and arts and humanities. Surveys past and present status of scientific knowledge about major global and regional problems, explores both successes and inadequacies of environmental ideas to address specific crises, and assesses potential responses of governments, corporations, and individuals. Topics include food and agriculture, pollution, fisheries, and climate change and energy. Other subjects include biodiversity, population, urbanization, consumption, environmental justice, human and ecological health, and sustainability.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ENVS 1102 (a, INS) Oceanography

Collin Roesler; Cathryn Field.

Every Spring. Spring 2023. Enrollment limit: 36.

The fundamentals of geological, physical, chemical, and biological oceanography. Topics include tectonic evolution of the ocean basins; deep-sea sedimentation as a record of ocean history; global ocean circulation, waves, and tides; chemical cycles; ocean ecosystems and productivity; and the ocean's role in climate change. Weekly labs and fieldwork demonstrate these principles in the setting of Casco Bay and the Gulf of Maine. Students complete a field-based research project on coastal oceanography. (Same as: EOS 1505)

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENVS 1104 (a, INS, MCSR) Environmental Geology and Hydrology

Non-Standard Rotation. Enrollment limit: 36.

An introduction to aspects of geology and hydrology that affect the environment and land use. Topics include lakes, watersheds and surface-water quality, groundwater contamination, coastal erosion, and/or landslides. Weekly labs and fieldwork examine local environmental problems affecting Maine's rivers, lakes, and coast. Students complete a community-based research project. (Same as: EOS 1305)

Previous terms offered: Spring 2019.

ENVS 1117 (c, DPI) Introduction to Environmental Literature

Samia Rahimtoola.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Introduces students to literature that features the relationship of humans with their 'natural' environment, while asking how such relationships are sustained and delimited by structures of class, race and ethnicity, citizenship, and gender/sexuality. Students will gain an understanding of environmental literature's powerful role in shaping conversations about national belonging, American ethnic and racial identity, and how to best live an environmental life, while directing the majority of their attention to how writers from the margins—African American, Latinx, Indigenous, and global—challenge these orthodoxies. Key topics include American agrarianism, the pastoral and wild, and the literatures of environmental justice. Authors may include Henry David Thoreau, Aldo Leopold, Willa Cather, Helena María Viramontes, Leslie Marmon Silko, and Octavia Butler. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors (Same as: ENGL 1117)

Previous terms offered: Fall 2019.

ENVS 1155 (c, IP) Into the Wild

Non-Standard Rotation. Enrollment limit: 50.

An examination of the mix of conflicting ideas that shape the many conceptions of "wilderness." Among other questions, explores the ideas of wilderness as a space without or preceding culture and civilization, as a mental state, and as an aesthetic experience. Considers the place of wilderness in the 'urban jungle' of cities. Puts Anglo-American and European theories and images of the wilderness into dialogue by comparing literary works, film, artworks, and philosophical texts. No knowledge of German is required. (Same as: GER 1155)

Previous terms offered: Fall 2019.

ENVS 2004 (a, MCSR) GIS and Remote Sensing: Understanding Place

Eileen Sylvan Johnson.

Every Year. Fall 2022. Enrollment limit: 20.

Geographical information systems (GIS) organize and store spatial information for geographical presentation and analysis. They allow rapid development of high-quality maps and enable powerful and sophisticated investigation of spatial patterns and interrelationships. Introduces concepts of cartography, database management, remote sensing, and spatial analysis. Examines GIS and remote sensing applications for natural resource management, environmental health, and monitoring and preparing for the impacts of climate change from the Arctic to local-level systems. Emphasizes both natural and social science applications through a variety of applied exercises and problems culminating in a semester project that addresses a specific environmental application. Students have the option of completing a community-based project. (Same as: DCS 2335, URBS 2004)

Previous terms offered: Fall 2021, Spring 2021, Spring 2020, Spring 2019.

ENVS 2201 (a, INS, MCSR) Perspectives in Environmental Science

Phil Camill; Shana Stewart Deeds; Brandon Tate.

Every Spring. Spring 2023. Enrollment limit: 35.

Understanding environmental challenges requires scientific knowledge about the different spheres of the Earth – land, water, air, and life – and how they interact. Presents integrated perspectives across the fields of biology, chemistry, and earth and oceanographic science to examine the scientific basis for environmental change from the molecular to the global level. Foundational principles are developed to address major course themes, including climate change, energy, soil/air/water pollution, chemical exposure and risk, land use change, and biodiversity loss. Laboratory sessions consist of local field trips, laboratory experiments, group research, case study exercises, and discussions of current and classic scientific literature. (Same as: BIOL 1158, CHEM 1105)

Prerequisites: BIOL 1101 or BIOL 1109 or CHEM 1091 - 2260 or PHYS 1130 or PHYS 1140 or EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221) or EOS 2115 or EOS 2335 or EOS 2345 (same as ENVS 2270) or EOS 2365 or EOS 2525 (same as ENVS 2251) or EOS 2535 or EOS 2585 (same as ENVS 2282) or ENVS 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENVS 2211 (a, INS, MCSR) Coral Reefs in the Anthropocene

Non-Standard Rotation. Enrollment limit: 35.

Coral reefs are the largest biogenic structures on earth that support exceptional levels of biodiversity in all the branches of the tree of life. They also face multiple threats due to human activities, including increased ocean acidity that is reducing reef construction, major coral bleaching events that are increasing in intensity and frequency, overfishing of increasingly limited wild fisheries stocks, and changes in land use in tropical nations and islands that can have strong local impacts on reef health. This course will explore the geological processes that build coral reefs, and the ecological and evolutionary processes that maintain exceptionally high levels of biodiversity. It will apply theory and data to the challenges now confronting coral reef ecosystems, and their future prospects. The class will include lectures, discussions, weekly lab meetings, and field trips.. (Same as: BIOL 2311)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level or CHEM 1092 or CHEM 1102 or CHEM 1109 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109 or ENVS 2201 (same as BIOL 1158 and CHEM 1105) or MATH 1001 - 2969 or Placement in MATH 1600 (M) or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 1808 {2108} (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) or PHYS 1130 or PHYS 1140 or Placement in PHYS 1140.

Previous terms offered: Fall 2020.

ENVS 2217 (a, INS, MCSR) Current Topics and Research in Marine Science

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon.

Every Fall. Fall 2022. Enrollment limit: 12.

Current Topics and Research in Marine Science is an experiential research course in which students design and carry out an individual semester long research project. In an advanced seminar setting, students choose topics and learn to (1) search for information in the scientific literature; (2) evaluate the utility of papers to their research topic; (3) identify gaps in existing understanding; (4) formulate hypothesis-driven research questions; and (5) utilize the R programming environment for analysis and presentation of scientific data. Ultimately, students design and carry out a research project that includes integration of their understanding of the scientific literature. Students present their results in a final oral presentation and written paper. Taught in residence at the Schiller Coastal Studies Center. Biology 3117/Environmental Studies 2217 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 2503 (same as Environmental Studies 2235), and History 2129 (same as Environmental Studies 2449) are co-requisites of this course. (Same as: BIOL 3117)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2021, Fall 2019.

ENVS 2221 (a) Biogeochemistry: An Analysis of Global Change

Cathryn Field; Phil Camill.

Every Fall. Fall 2022. Enrollment limit: 35.

Understanding global change requires knowing how the biosphere, geosphere, oceans, ice, and atmosphere interact. An introduction to earth system science, emphasizing the critical interplay between the physical and living worlds. Key processes include energy flow and material cycles, soil development, primary production and decomposition, microbial ecology and nutrient transformations, and the evolution of life on geochemical cycles in deep time. Terrestrial, wetland, lake, river, estuary, and marine systems are analyzed comparatively. Applied issues are emphasized as case studies, including energy efficiency of food production, acid rain impacts on forests and aquatic systems, forest clearcutting, wetland delineation, eutrophication of coastal estuaries, ocean fertilization, and global carbon sinks. Lectures and three hours of laboratory or fieldwork per week. (Same as: EOS 2005)

Prerequisites: EOS 1100 - 1999 or BIOL 1102 or BIOL 1109 or CHEM 1092 or CHEM 1102 or CHEM 1109 or ENVS 1102 or ENVS 1104 or ENVS 1515.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ENVS 2222 (a, INS, MCSR) Satellite Remote Sensing of the Ocean

Collin Roesler.

Every Other Fall. Fall 2022. Enrollment limit: 35.

In the 1980s, NASA's satellite program turned some of its space-viewing sensors towards the earth to better understand its processes. Since that time, NASA's Earth Observatory mission has yielded a fleet of satellites bearing an array of sensors that provide a global view of the earth each day. Global-scale ocean properties, including bathymetry, temperature, salinity, wave height, currents, primary productivity, sea ice distribution, and sea level, are revealed through satellite-detection of ultraviolet, visible, infrared and microwave energy emanating from the ocean. These satellite data records currently exceed thirty years in length and therefore can be used to interpret climate-scale ocean responses from space. A semester-long research project, targeted on a student-selected oceanic region, focuses on building both quantitative skills through data analysis and writing skills through iterative writing assignments that focus on communicating data interpretation and synthesis. (Same as: EOS 2550)

Prerequisites: Two of: either EOS 1105 - 2969 or EOS 3000 or higher and either MATH 1300 - 2969 or MATH 3000 or higher or Placement in MATH 1600 (M) or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Fall 2018.

ENVS 2223 (a, INS, MCSR) Plant Ecophysiology

Barry Logan; Jaret Reblin.

Every Spring. Spring 2023. Enrollment limit: 35.

Examines the functional attributes of plants and the manner in which they vary across the plant kingdom by the processes of evolution and acclimation. Topics of focus include photosynthesis and protection against high-light stress, the acquisition and distribution of water and mineral nutrients, and environmental and hormonal control of development. Special topics discussed may include plant parasitism, carnivory, the origins and present state of agriculture, plant responses to global climate change, plant life in extreme environments, and the impacts of local land-use history on plant communities. Contemporary research instrumentation is used in weekly laboratories, some conducted in the field, to enable first-hand exploration of phenomena discussed in lecture. (Same as: BIOL 2210)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2020, Fall 2019, Fall 2018.

ENVS 2227 (a, INS) Ecology

Patricia Jones; Shana Stewart Deeds.

Every Fall. Fall 2022. Enrollment limit: 35.

Ecology, the study of how organisms interact with each other and their environment, incorporates topics from how organisms cope with environmental stressors to global carbon cycling. Addresses current questions in ecology, from global change to food security to invasive species. Lectures, labs, primary and popular literature emphasize how scientists use the tenets of ecology to address current environmental issues. Labs, discussions and activities focus on practical applications of ecological theory, scientific writing and data analysis on topics such as plant-insect interactions, amphibian decline, river restoration and natural history. (Same as: BIOL 2327)

Prerequisites: BIOL 1102 or BIOL 1109 or ENVS 2201 (same as BIOL 1158 and CHEM 1105) or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ENVS 2229 (a, INS, MCSR) Biology of Marine Organisms

Bethany Whalon; Amy Johnson.

Every Fall. Fall 2022. Enrollment limit: 35.

The study of the biology and ecology of marine mammals, seabirds, fish, intertidal and subtidal invertebrates, algae, and plankton. Also considers the biogeographic consequences of global and local ocean currents on the evolution and ecology of marine organisms. Laboratories, field trips, and research projects emphasize natural history, functional morphology, and ecology. Lectures and four hours of laboratory or field trip per week. One weekend field trip included. Students have the opportunity to take an optional field trip to the Bowdoin Scientific Station on Kent Island in the Bay of Fundy. (Same as: BIOL 2319)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

ENVS 2231 (a, INS) Biological Oceanography

Every Fall. Enrollment limit: 15.

Features classroom, laboratory, and fieldwork emphasizing fundamental biological processes operating in pelagic environments. It includes a hybrid of topics traditionally taught in physical and biological oceanography courses: major ocean current systems, physical structure of the water column, patterns and process of primary production, structure and function of pelagic food webs. Field trips to Casco Bay and Harpswell Sound will introduce students to the methods and data structures of biological oceanography. Taught in residence at the Bowdoin Marine Laboratory, Biology 2501/Environmental Studies 2231 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 2330 (same as Environmental Studies 2233), and English 2804 (same as Environmental Studies 2804) are co-requisites of this course. (Same as: BIOL 2501)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2018.

ENVS 2235 (a, INS, MCSR) Methods in Ocean Change Ecology

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon.
Every Fall. Fall 2022. Enrollment limit: 12.

Explores how marine organisms, populations, communities, and ecosystems will respond to global ocean change. Concepts in ecology, behavior, physiology, and evolution will be highlighted to demonstrate how marine systems are affected by ocean change factors like warming, ocean acidification, hypoxia, habitat loss, and invasive species. Emphasizes in-depth discussion of key literature to exemplify the theory, study design, and analysis tools marine scientists employ to research current and projected ocean change. Also integrates laboratory, fieldwork, and computer activities to illustrate approaches to monitoring and predicting shifts in biological communities. Taught in residence at the Schiller Coastal Studies Center. Biology 2503/Environmental Studies 2235 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 3117 (same as Environmental Studies 2217), and History 2129 (same as Environmental Studies 2449) are co-requisites of this course. (Same as: BIOL 2503)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2021, Fall 2019.

ENVS 2250 (a, INS) Earth, Ocean, and Society

Every Spring. Enrollment limit: 35.

Explores the historical, current, and future demands of society on the natural resources of the earth and the ocean. Discusses the formation and extraction of salt, gold, diamonds, rare earth elements, coal, oil, natural gas, and renewable energies (e.g., tidal, geothermal, solar, wind). Examines how policies for these resources are written and revised to reflect changing societal values. Students complete a research project that explores the intersection of natural resources and society. (Same as: EOS 2020)

Prerequisites: EOS 1100 - 1999 or EOS 2005 (same as ENVS 2221) or ENVS 1102 or ENVS 1104 or ENVS 1515.

Previous terms offered: Spring 2021, Spring 2019.

ENVS 2251 (a) Marine Biogeochemistry

Every Spring. Enrollment limit: 15.

Oceanic cycles of carbon, oxygen, and nutrients play a key role in linking global climate change, marine primary productivity, and ocean acidification. Fundamental concepts of marine biogeochemistry used to assess potential consequences of future climate scenarios on chemical cycling in the ocean. Past climate transitions evaluated as potential analogs for future change using select case studies of published paleoceanographic proxy records derived from corals, ice cores, and deep-sea sediments. Weekly laboratory sections and student research projects focus on creating and interpreting new geochemical paleoclimate records from marine archives and predicting future impacts of climate change and ocean acidification on marine calcifiers. (Same as: EOS 2525)

Prerequisites: Two of: EOS 1100 - 1999 or either ENVS 1102 or ENVS 1104 or ENVS 1515 and EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENVS 2253 (a, INS, MCSR) Atmospheric and Ocean Dynamics

Every Other Fall. Enrollment limit: 35.

A mathematically rigorous analysis of the motions of the atmosphere and oceans on a variety of spatial and temporal scales. Covers fluid dynamics in inertial and rotating reference frames, as well as global and local energy balance, applied to the coupled ocean-atmosphere system. (Same as: PHYS 2810, EOS 2810)

Prerequisites: PHYS 1140.

Previous terms offered: Fall 2020.

ENVS 2255 (a, INS) Environmental Chemistry

Every Other Spring. Enrollment limit: 20.

Focuses on two key processes that influence human and wildlife exposure to potentially harmful substances, chemical speciation and transformation. Equilibrium principles as applied to acid-base, complexation, precipitation, and dissolution reactions are used to explore organic and inorganic compound speciation in natural and polluted waters; quantitative approaches are emphasized. Weekly laboratory sections are concerned with the detection and quantification of organic and inorganic compounds in air, water, and soils/sediments. (Same as: CHEM 2050, EOS 2325)

Prerequisites: CHEM 1092 or CHEM 1102 or CHEM 1109 or CHEM 2000 - 2969 or Placement in CHEM 2000 level or Placement in CHEM 2000/1109.

Previous terms offered: Spring 2022, Spring 2020.

ENVS 2266 (a, INS) Quaternary Environments: Reconstructing Landscapes Changed by Climate Shifts in Recent Geologic Past

Non-Standard Rotation. Enrollment limit: 35.

The past 2.6 million years of Earth's history, known as the Quaternary, is uniquely characterized by intense and frequent swings in global climate. The record of both 'Ice Ages' and interglacial warming in Earth's recent geologic past can be studied through many lenses of Earth science. In this course we will explore how sedimentology, geomorphology, and dating methods can be applied to reconstruct past environments associated with Quaternary climate shifts. Specific topics include Quaternary climate records and forcing mechanisms, basic glacial dynamics, isostasy and sea level changes, sediments, landforms, and dating methods. Students will complete a semester long project investigating the Quaternary record of a specific region of the world and will participate in several field trips exploring the Quaternary record of New England. (Same as: EOS 2330)

Prerequisites: EOS 1100 or higher.

Previous terms offered: Fall 2020, Spring 2020.

ENVS 2270 (a) Geomorphology: Form and Process at the Earth's Surface

Evan Dethier.

Every Other Fall. Fall 2022. Enrollment limit: 35.

Earth's surface is marked by the interactions of the atmosphere, water and ice, biota, tectonics, and underlying rock and soil. Even familiar landscapes beget questions on how they formed, how they might change, and how they relate to patterns at both larger and smaller scales. Examines Earth's landscapes and the processes that shape them, with particular emphasis on rivers, hillslopes, and tectonic and climatic forcing. (Same as: EOS 2345)

Prerequisites: EOS 1105 or EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2020, Fall 2019, Fall 2018.

ENVS 2281 (a, INS) Forest Ecology and Conservation

Vladimir Douhovnikoff.

Every Other Fall. Fall 2022. Enrollment limit: 15.

An examination of how forest ecology and the principles of silviculture inform forest ecosystem restoration and conservation. Explores ecological dynamics of forest ecosystems, the science of managing forests for tree growth and other goals, natural history and historic use of forest resources, and the state of forests today, as well as challenges and opportunities in forest restoration and conservation. Consists of lecture, discussions, field trips, and guest seminars by professionals working in the field. (Same as: BIOL 2581)

Previous terms offered: Fall 2018.

ENVS 2282 (a, INS, MCSR) Ocean and Climate

Collin Roesler.

Every Other Year. Fall 2022. Enrollment limit: 18.

The ocean covers more than 70 percent of Earth's surface. It has a vast capacity to modulate variations in global heat and carbon dioxide, thereby regulating climate and ultimately life on Earth. Beginning with an investigation of paleo-climate records preserved in deep-sea sediment cores and in Antarctic and Greenland glacial ice cores, the patterns of natural climate variations are explored with the goal of understanding historic climate change observations. Predictions of polar glacial and sea ice, sea level, ocean temperatures, and ocean acidity investigated through readings and discussions of scientific literature. Weekly laboratory sessions devoted to field trips, laboratory experiments, and computer-based data analysis and modeling to provide hands-on experiences for understanding the time and space scales of processes governing oceans, climate, and ecosystems. Laboratory exercises form the basis for student research projects. Mathematics 1700 is recommended. (Same as: EOS 2585)

Prerequisites: Two of: either EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221) and MATH 1600 or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Fall 2020, Fall 2018.

ENVS 2284 (a) Ecology of Rivers

Every Other Fall. Enrollment limit: 12.

Explores the ecology of river systems. Rivers are linear features through watersheds and across the landscape where ecosystem influences are reflected, focused, and transported from hilltops to coastal estuaries, and sometimes back again. Considers the role of rivers as corridors connecting a wide range of ecosystems, as indicators of broader landscape ecology, and as ecosystems in their own right with particular focus on the interaction of geomorphology, hydrology, and biology in the development and function of these dynamic and essential ecosystems. (Same as: BIOL 2284)

Prerequisites: BIOL 2315 (same as ENVS 2224) or BIOL 2316 or BIOL 2319 (same as ENVS 2229) or BIOL 2325 (same as ENVS 2225) or BIOL 2330 (same as ENVS 2233).

Previous terms offered: Fall 2021.

ENVS 2287 (a) Poles Apart: Exploration of Earth's High Latitudes

Every Other Year. Enrollment limit: 35.

The Arctic and Antarctic polar regions are largely dominated by ice, yet they are vastly different in terms of geography. The Arctic is an ocean largely surrounded by continents, while the Antarctic is a continent surrounded by ocean. Antarctica is dominated by ice caps, glaciers and ice shelves, surrounded by a seasonal band of sea ice. The Arctic Ocean is mostly covered year-round by sea ice with ice caps and glaciers found mainly in Greenland. These differences lead to profoundly contrasting impacts on global climate and ocean circulation. Tectonic evolution, ice dynamics, ocean circulation, and biology of these regions are compared and contrasted through lectures and readings and discussions of journal articles. Readings from twentieth century journals of polar exploration are used to provide students with first hand accounts of scientific discoveries and a "sense of place", that deep emotional connection people have toward a place. Fulfills the within-department elective in EOS. (Same as: EOS 2530)

Prerequisites: EOS 1105 or EOS 1305 (same as ENVS 1104) or EOS 1505 (same as ENVS 1102) or EOS 2005 (same as ENVS 2221).

Previous terms offered: Fall 2021, Fall 2019.

ENVS 2301 (b, MCSR) Building Resilient Communities

Eileen Sylvan Johnson.

Every Year. Spring 2023. Enrollment limit: 20.

Explores approaches by communities and regions to build resilience in the face of changing environmental and social conditions. Examines the ways communities establish policies and collaborate with state, federal, private and nonprofit sectors towards strengthening local economies, safeguarding environmental values, protecting public health, addressing issues of economic and social justice, and implementing mitigation and adaptation strategies. Provides students with firsthand understanding of how digital and computational technologies including Geographic Information Systems (GIS) are playing an increasingly important role in understanding and informing effective approaches for expanding resilience at a community level to inform policy decision. Students gain proficiency with GIS as part of the course. (Same as: DCS 2340, URBS 2301)

Previous terms offered: Fall 2020.

ENVS 2302 (b, MCSR) Environmental Economics and Policy

Non-Standard Rotation. Enrollment limit: 35.

An exploration of environmental degradation and public policy responses in industrial economies. Market failures, property rights, and materialistic values are investigated as causes of pollution and deteriorating ecosystem functions. Guidelines for equitable and cost-effective environmental policy are explored, with an emphasis on the roles and limitations of cost-benefit analysis and techniques for estimating non-monetary values. Three core themes are the transition from “command and control” to incentive-based policies; the evolution from piecemeal regulation to comprehensive “green plans” (as in the Netherlands); and the connections among air pollution, energy systems, and global warming. (Same as: ECON 2218)

Prerequisites: ECON 1050 or ECON 1101 or Placement in ECON 1102 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2021.

ENVS 2303 (b, MCSR) Natural Resource Economics and Policy

Guillermo Herrera.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

A study of the economic issues surrounding the existence and use of renewable natural resources (e.g., forestry/land use, fisheries, water, ecosystems, and the effectiveness of antibiotics) and exhaustible resources (such as minerals, fossil fuels, and old growth forest). A basic framework is first developed for determining economically efficient use of resources over time, then extended to consider objectives other than efficiency, as well as the distinguishing biological, ecological, physical, political, and social attributes of each resource. Uncertainty, common property, and various regulatory instruments are discussed, as well as alternatives to government intervention and/or privatization. (Same as: ECON 2228)

Prerequisites: ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level.

Previous terms offered: Spring 2022, Spring 2020.

ENVS 2304 (b) Environmental Law and Policy

Every Other Fall. Enrollment limit: 25.

Critical examination of some of the most important American environmental laws and their application to environmental problems that affect the United States and the world. Students learn what the law currently requires and how it is administered by federal and state agencies, and are encouraged to examine the effectiveness of current law and consider alternative approaches. (Same as: GOV 2915)

Previous terms offered: Fall 2021, Fall 2019.

ENVS 2308 (b, IP) International Environmental Policy

Non-Standard Rotation. Enrollment limit: 35.

Examines the political, legal, and institutional dimension of international efforts to protect the environment. Problems discussed include transboundary and marine pollution, maintaining biodiversity, and global climate change. (Same as: GOV 2615)

Previous terms offered: Spring 2021, Spring 2020.

ENVS 2312 (b, IP) Contemporary Arctic Environmental and Cultural Issues

Non-Standard Rotation. Enrollment limit: 35.

Throughout the Arctic, northern peoples face major environmental changes and cultural and economic challenges. Landscapes, icescapes, and seascapes on which communities rely are being transformed, and arctic plants and animals are being affected. Many indigenous groups see these dramatic changes as endangering their health and cultural way of life. Others see a warming Arctic as an opportunity for industrial development. Addressing contemporary issues that concern northern peoples in general and Inuit in particular involves understanding connections between leadership, global environmental change, human rights, indigenous cultures, and foreign policies, and being able to work on both a global and local level. (Same as: ANTH 2572)

Prerequisites: Two of: either ANTH 1150 or ANTH 1101 or ANTH 1102 and ENVS 1101.

Previous terms offered: Fall 2021, Fall 2019.

ENVS 2313 (b, IP) Food, Environment, and Development

Non-Standard Rotation. Enrollment limit: 35.

Explores the nexus of food, environment, and development in global environmental politics. Examines the interconnected challenges of governing across trans-boundary socio-ecological systems amidst competing demands on scarce natural resources—to sustain a global food system, foster economic development, and promote equity and justice. Prepares students to engage with interdisciplinary scholarship from political science, international development, public policy, and food studies. Draws on comparative cases from local to global scales, with an emphasis on Maine, the U.S., and Latin America. (Same as: GOV 2492, LACL 2513)

Prerequisites: ENVS 1101 or ENVS 2330 (same as GOV 2910).

Previous terms offered: Spring 2021, Spring 2020, Spring 2019.

ENVS 2314 (b) Talking to Farmers and Fishermen: Social Science Field Methods for Environmental Policy Research

Shana Starobin.

Every Fall. Spring 2023. Enrollment limit: 12.

Natural resource users—like farmers and fishermen—possess intimate knowledge of the complex socioecological systems where they live and work. How can researchers appropriately and ethically engage individual and community stakeholders as participants in environmental research? Through assignments, activities, and class excursions (lab), students will gain competence in collaborative field research skills, including the ethical conduct of research with human subjects, participant observation, conducting interviews and focus groups, writing up field notes, developing metadata, and establishing protocols for data management. Students will also practice preliminary data analysis—transcription and text analysis of field collected data, descriptive statistics, and identification of future research questions. (Same as: GOV 2902)

Prerequisites: ENVS 2330 (same as GOV 2910) or ENVS 2313 (same as GOV 2482 and LAS 2513).

Previous terms offered: Spring 2021, Fall 2019, Spring 2019.

ENVS 2321 Troubled Waters: Fishing in the Gulf of Maine

Anne Hayden.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Around the world and in the Gulf of Maine, overfishing, threats to habitat, and climate change are putting marine ecosystems and coastal communities under great stress. Interdisciplinary seminar draws on oceanography, ecology, history, economics, anthropology, and political science to explore the causes and scope of pressures on the marine environment; the potential for restoring ecosystems, fisheries, and coastal economies; political conflicts over fisheries and related issues; federal, state, and community-based approaches to managing marine ecosystems; and strategies for coping with scientific and management uncertainties.

Prerequisites: ENVS 1101.

Previous terms offered: Spring 2021, Spring 2019.

ENVS 2330 (b, IP) Environmental Policy and Politics

Shana Starobin.

Every Fall. Spring 2023. Enrollment limit: 35.

Explores the political, economic, legal, ethical, and institutional dimensions of the environmental policy-making process. Examines the formation and implementation of regulatory institutions and policies across a range of issues in the U.S. and internationally—including terrestrial, coastal and marine natural resources management, biodiversity, water and air pollution, sustainable development, and environmental justice. Prepares students to analyze historical cases as well as contrive and evaluate competing policy alternatives to emerging problems. (Same as: GOV 2910)

Prerequisites: ENVS 1101.

Previous terms offered: Spring 2022, Fall 2020, Fall 2019, Fall 2018.

ENVS 2331 (b, MCSR) The Nature of Data: Introduction to Environmental Analysis

Every Spring. Enrollment limit: 20.

Examines emerging digital techniques in environmental management and analysis within government, academic, and media sectors. Provides an overview of social science methods including analysis of qualitative data, text analysis, spatial analysis, survey design and analysis, and social network analysis. Topics include collaborative resource management, leveraging the power of social networks, spatial analysis, social-ecological system management, the role of volunteered information and citizen science, and expanding capacities for adaptation and resilience. Labs as part of class time provide students exposure to standard software programs used in social science research, including NVivo, ArcGIS, and Gephi and introduce the basics of R as a programming language for text analysis, and spatial analysis. (Same as: DCS 2331)

Previous terms offered: Fall 2020, Spring 2020.

ENVS 2332 (b) Introduction to Human Population

Non-Standard Rotation. Enrollment limit: 35.

Focuses on the processes of population change—fertility/reproduction, mortality/death, and migration—with attention to the causes of and consequences of those changes. Also examines the politics around population change, discourse, and policies, and the ways those have been connected to global inequality, gender inequalities, and race and ethnicity. (Same as: SOC 2222, GSWS 2224)

Prerequisites: SOC 1101 or GSWS 1000 - 2969 or GSWS 3000 or higher.

Previous terms offered: Fall 2020.

ENVS 2333 (a, INS, MCSR) Benthic Ecology

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon.

Every Fall. Fall 2022. Enrollment limit: 15.

The principles of ecology, emphasizing the hard- and soft-bottom communities of Casco Bay and Harpswell Sound. Field trips and field exercises demonstrate the quantitative principles of marine ecological research, including good practices in sampling designs and field experiments. A class field project designs and implements a long-term study, based at the Bowdoin Marine Laboratory, to monitor and detect changes in community structure driven by climate change in the twenty-first century. Course includes an extended field trip to the tropics that will allow students to get hands-on experience monitoring ecosystem health and change in a coral reef system. Assumes a basic knowledge of biological statistics. Taught in residence at the Schiller Coastal Studies Center. Benthic Ecology is a course-module in the Bowdoin Marine Science Semester and is taught with three other co-requisite courses. (Same as: BIOL 2333)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and MATH 1000 or higher.

Previous terms offered: Fall 2019.

ENVS 2340 (b, IP) Global Political Ecology

Tulio Zille.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

In light of the ecological crisis exacerbated by climate change, scholars in the humanities and social sciences have become increasingly preoccupied with the relationship between humans and nature, in a field of study loosely termed “political ecology.” Central to this field are critiques of the separation between humans and nature in modernity and how we should understand this relationship. This course expands the current debates in this field beyond the intellectual circles of Europe and North America—which have focused on science and technology studies and new materialisms—to consider contributions that have remained marginal (for example, indigenous political thought and decolonial theory). The course will include authors from various disciplines ranging from indigenous intellectuals and activists to academics, with a focus on the Global South, including the work of Chilean filmmaker Patricio Guzmán, Maori scholar Linda Tuhiwai Smith, Indian activist Vandana Shiva, and Martinican writer Édouard Glissant. (Same as: GOV 2470, LACL 2540)

Previous terms offered: Spring 2021.

ENVS 2351 (b, MCSR) Institutional Approaches to Climate Change
Every Other Fall. Enrollment limit: 35.

How do various public and private institutions, including governments, firms, and nonprofits, incorporate climate change into their decision-making? Explores how and why institutions set greenhouse gas mitigation goals, how they propose to achieve their goals, and the larger economic and social implications of institutional climate action plans. Further, questions how institutions at all levels are adapting or planning to adapt to climate change. Critiques the efficacy and efficiency of climate action plans. Topics explored include renewable energy credit and offset markets; energy markets; carbon markets and taxes; financing of climate action plans; incentivizing energy efficiency and other climate-friendly practices; technology adoption; the economics of technological change; employee, student, and citizen activism; shareholder activism; and corporate social responsibility. Introduction to basic economic modeling by working with graphs, tables, and schematics. Problem sets and written assignments used to assess learning. For a final project, students write a climate action plan for an institution of their choice. (Same as: ECON 2219)

Prerequisites: Two of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ENVS 1101.

Previous terms offered: Fall 2018.

ENVS 2356 (b, IP) Ecological Crisis and Reparation: Arts of Living on a Damaged Planet

Shreyas Sreenath.

Every Other Year. Spring 2023. Enrollment limit: 35.

Human beings confront a paradox as we become aware of anthropogenic climate change. On the one hand, we are geological agents powerful enough to irreparably transform life on earth. On the other, we face collective despair and powerlessness in our attempts to avert certain ecological collapse. This course draws on contemporary anthropology and other approaches in the social sciences and humanities to explore how cultivating diverse 'arts of living' addresses this double-bind. Dominant environmental paradigms that emphasize 'natural conservation' are examined in relation to the re-emergence of patriarchy, racism, xenophobia, and class conflict in various socio-cultural contexts. Through course readings, activities, and assignments students re-imagine ecology from the starting point of repair rather than conservation in order to develop a more conducive ethics of life on an already damaged planet. (Same as: ANTH 2256)

Prerequisites: ANTH 1101 or ANTH 1103 or SOC 1101.

Previous terms offered: Spring 2022, Fall 2020.

ENVS 2377 (b, DPI, IP) Arctic Politics

Laura Henry.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

The Arctic looms in our political imagination as the region most directly affected by a changing global climate that threatens the displacement of northern communities and cultures. It is also a site of fierce competition for state control and economic development. This course investigates the Arctic as a political space that encapsulates elements of comparative politics and international relations. It examines cross-national variation in policies toward Arctic regions in states such as the United States, Canada, Russia, Iceland, and Norway. It also explores dynamic international engagement around the Arctic by state officials, corporations, indigenous communities, and activists. The course will address governance issues such as indigenous rights, economic development and natural resource exploitation, environmental issues and climate change, the potential militarization of the region, international law, and the role of the Arctic Council. (Same as: GOV 2577)

Previous terms offered: Spring 2021, Spring 2019.

ENVS 2403 (c, DPI) Environment and Culture in North American History
Connie Chiang.

Every Spring. Fall 2022. Enrollment limit: 35.

Explores relationships between ideas of nature, human transformations of the environment, and the effect of the physical environment upon humans through time in North America. Topics include the "Columbian exchange" and colonialism; links between ecological change and race, class, and gender relations; the role of science and technology; literary and artistic perspectives of "nature"; agriculture, industrialization, and urbanization; and the rise of modern environmentalism. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2182)

Prerequisites: ENVS 1101.

Previous terms offered: Fall 2021, Spring 2021, Spring 2020, Spring 2019.

ENVS 2416 (c) California Dreamin': A History of the Golden State

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Sunshine, beaches, shopping malls, and movie stars are the popular stereotypes of California, but social conflicts and environmental degradation have long tarnished the state's golden image. Unravels the myth of the California dream by examining the state's social and environmental history from the end of Mexican rule and the discovery of gold in 1848 to the early twenty-first century. Major topics include immigration and racial violence; radical and conservative politics; extractive and high-tech industries; environmental disasters; urban, suburban, and rural divides; and California in American popular culture. This course is part of the following field(s) of study: United States. (Same as: HIST 2640)

Previous terms offered: Spring 2022, Spring 2020.

ENVS 2420 (c) The History of Energy

Non-Standard Rotation. Enrollment limit: 35.

Explores how and why Americans (and others) have made the energy choices that they have. The production and distribution of energy is one of the key challenges for modern societies. It involves the development of specific technologies and industries- from fossil fuels to solar power to nuclear plants. But the history of energy transcends the technical. It intersects with law, politics, and economics; social norms and cultural values play a role as well. The connections between the technical and non-technical are central to understanding both the history of energy itself, as well as its place in the history of the modern United States. This course is part of the following field(s) of study: United States. (Same as: HIST 2202)

Previous terms offered: Spring 2020.

ENVS 2422 (c, IP) Climate Fiction

Jens Klenner.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Climate Fiction investigates the possibilities and limits of storytelling in the era of global climate change, explores humanity's impact on Earth by conceiving human and nonhuman communities after sea-level rise, desertification, or biodiversity loss; and by imagining the evolution of new species or social forms in response to environmental disaster and loss of resources. Situates novels, short stories, poetry, and film within the environmental humanities, combines scientific-cultural discourses about the environment with social concerns, and assesses how humanistic methodologies can complement scientific debates. Examines rhetoric, narrative conventions, and genres, asks how climate fiction narrates impending disaster on a global scale, and analyzes imaginations of alternative futures, ideas of environmentalism, and conceptions of social equality. Puts German, Austrian, and Swiss cultural productions in dialogue with Anglo-American ideas. All readings in English. (Same as: GER 2255)

ENVS 2423 (c) Telling Environmental Stories

Non-Standard Rotation. Enrollment limit: 12.

Intended for students with a demonstrated interest in environmental studies as an introduction to several modes of storytelling, which communicate ideas, historical narratives, personal experiences, and scientific and social issues in this increasingly important area of study and concern. Explores various techniques, challenges, and pleasures of storytelling, and examines some of the demands and responsibilities involved in the conveyance of different types of information with clarity and accuracy in nonfiction narrative. Engages student writing through the workshop method, and includes study of several texts, including "The Control of Nature," "Cadillac Desert," "Living Downstream," and "Field Notes from a Catastrophe." Note: Fulfills the creative writing concentration requirement for English majors. (Same as: ENGL 2854)

Previous terms offered: Fall 2018.

ENVS 2427 (c, IP) City and Landscape in Modern Europe: London, Paris, Vienna, Berlin

Non-Standard Rotation. Enrollment limit: 35.

Examines the changing nature of the urban built environment in four major European cities from the mid-nineteenth century to the present. Course considers a wide range of factors that have contributed to shaping the cities' spaces and forms, among them: politics, money, war, environmental degradation, spatial inequities, industrialization, immigration, public health, heritage, tourism, and gentrification. Explores the changing role these capital cities have played on the world stage while also exploring everyday life at street level, housing from slum life to mansion, urban infrastructure, and the impact of grand schemes of urban planning and design. This course satisfies the non-US requirement for the urban studies minor. (Same as: HIST 2005, URBS 2427)

Previous terms offered: Spring 2022.

ENVS 2431 (c, VPA) Modern Architecture: 1750 to 2000

Non-Standard Rotation. Enrollment limit: 35.

Examines major buildings, architects, architectural theories, and debates during the modern period, with a strong emphasis on Europe through 1900, and both the United States and Europe in the twentieth century. Central issues of concern include architecture as an important carrier of historical, social, and political meaning; changing ideas of history and progress in built form; and the varied architectural responses to industrialization. Attempts to develop students' visual acuity and ability to interpret architectural form while exploring these and other issues. (Same as: ARTH 2430, URBS 2431)

Previous terms offered: Fall 2021, Fall 2018.

ENVS 2432 (c) History of the American West

Non-Standard Rotation. Enrollment limit: 35.

Survey of what came to be called the Western United States from the nineteenth century to the present. Topics include Euro-American relations with Native Americans; the expansion and growth of the federal government into the West; the exploitation of natural resources; the creation of borders and national identities; race, class, and gender relations; the influence of immigration and emigration; violence and criminality; cities and suburbs; and the enduring persistence of Western myths in American culture. Students write several papers and engage in weekly discussion based upon primary and secondary documents, art, literature, and film. This course is part of the following field(s) of study: United States. (Same as: HIST 2160)

Previous terms offered: Spring 2021.

ENVS 2433 (c) Art, Science, and the Environment

Non-Standard Rotation. Enrollment limit: 18.

Guided independent studio practice. Explore crosspollination between art, science, and the environment through hands-on projects while also gaining exposure to a diverse range of contemporary artworks and interdisciplinary projects. Early assignments guide students through considerations for form, process, and meaning, followed by an emphasis on self-directed projects. (Same as: VART 3501)

Prerequisites: VART 1100 - 2969.

Previous terms offered: Spring 2020.

ENVS 2438 (c) Natural Supernaturalism

David Collings.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the Romantic attempt to blend aspects of the transcendental – such as the sublime, immortality, and divinity – with ordinary life, the forms of nature, and the resources of human consciousness. Discusses theories of the sublime, poetry of the English landscape, mountaintop experiences, tales of transfiguration, and evocations of intimacy with nature. Explores the difficulties of representing the transcendental in secular poetry and the consequences of natural supernaturalism for our own understanding of nature. Authors include Burke, Wordsworth, Coleridge, Kant, and Shelley. (Same as: ENGL 2352)

Previous terms offered: Fall 2019.

ENVS 2444 (c) City, Anti-City, and Utopia: Building Urban America

Non-Standard Rotation. Enrollment limit: 35.

Explores the evolution of the American city from the beginning of industrialization to the present age of mass communications. Focuses on the underlying explanations for the American city's physical form by examining cultural values, technological advancement, aesthetic theories, and social structure. Major figures, places, and schemes in the areas of urban design and architecture, social criticism, and reform are considered. Semester-long research paper required. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2006, URBS 2444)

Previous terms offered: Spring 2021, Spring 2019.

ENVS 2445 (c, VPA) The Nature and Urbanism of Frank Lloyd Wright

Jill Pearlman.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course offers an in-depth investigation of the architecture and urbanism of North America's most celebrated architect, with emphasis on the major themes of his work—particularly the complex relationship between Wright's buildings, urban schemes, and nature. We will examine key projects for a diverse range of environments and regions while also placing Wright and his works into larger historical and architectural contexts. Throughout the course we will engage in a critical analysis of the rich historical literature that Wright has evoked in recent years. (Same as: URBS 2445)

Previous terms offered: Fall 2020.

ENVS 2447 (c) Maine: A Community and Environmental History

Every Other Year. Enrollment limit: 16.

Seminar. Examines the evolution of various Maine social and ecological communities – inland, hill country, and coastal. Begins with the contact of European and Native American cultures, examines the transfer of English and European agricultural traditions in the seventeenth and eighteenth centuries, and explores the development of diverse geographic, economic, ethnic, and cultural communities during the nineteenth and into the early twentieth centuries. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2607)

Previous terms offered: Spring 2021, Spring 2019.

ENVS 2449 (c) History of Harpswell and the Coast of Maine

Non-Standard Rotation. Enrollment limit: 12.

Examines the long history of Harpswell as part of the coast of Maine, and the research methodologies used to uncover and analyze that history from environmental, community, socioeconomic, political, racial and ethnic, and cultural perspectives. Topics include bonds and tensions in a peninsula and islands community; coastal agriculture and stone walls; inshore and deep-sea fisheries; shipbuilding and shipping; the Civil War; ethnic, religious, and cultural diversity; poverty and living on the margin; and the rise of tourism. Culminates with an individual research project prospectus for a projected essay on an aspect of that history. Taught in residence at the Schiller Coastal Studies Center. History 2129/Environmental Studies 2449 is a course-module in the Bowdoin Marine Science semester. Biology 2232 (same as Environmental Studies 2232), Biology 2503 (same as Environmental Studies 2235), and Biology 3117 (same as Environmental Studies 2217) are co-requisites of this course. Note: This course is a part of the following field(s) of study: United States. (Same as: HIST 2129)

Previous terms offered: Fall 2021, Fall 2019.

ENVS 2459 (c) The Ethics of Climate Change

Non-Standard Rotation. Enrollment limit: 35.

Examines moral questions raised by climate change including: What would constitute a just allocation of burdens? What do we collectively owe to future generations? If collective action fails, what are our obligations as individuals? When, if at all, is civil disobedience justified? Readings drawn primarily from contemporary philosophy. (Same as: PHIL 2359)

Previous terms offered: Spring 2020, Spring 2019.

ENVS 2460 (c, IP) Nature and the Environment in Russian Culture

Non-Standard Rotation. Enrollment limit: 35.

Introduces students to major works of Russian/Soviet/post-Soviet literature (by authors such as Pushkin, Turgenev, Chekhov, Solzhenitsyn, Alexievich, and others), supplemented by films and visual art, within the thematic context of a focus on nature and the environment in the Russian geographic and cultural space. Topics include the role of nature in the Russian Romantic sublime; artistic constructions of the exotic in Russia's borderlands (Georgia, Mongolia); representations of the peasant village; feminization of the land and related metaphors of violent conquest; testaments to the instrumentalization of nature (St. Petersburg, Belomor Canal, Gulag); and the cultural legacy of environmental decay and disaster (pollution, Chernobyl). (Same as: RUS 2447)

Previous terms offered: Fall 2018.

ENVS 2470 (c, VPA) The Bauhaus and its Legacy: Designing the Modern World

Non-Standard Rotation. Enrollment limit: 20.

The centennial of the Bauhaus—the school of modern design opened in 1919 in Weimar, Germany, and closed by the Nazis in 1933—is being celebrated around the world. More than just a school, the Bauhaus gave modernity a distinct physical form by connecting art to nature and industry in new ways. The Bauhaus also advanced the radical notion that modern design had a key social role to play: to improve the lives of all people. The course investigates the social mission, arts, vibrant way of life, and prominent figures at the Bauhaus, many leaders in fields of modern architecture, urbanism, and the arts of design. The course also explores the Bauhaus legacy that flourished throughout the twentieth century, focusing on US and Europe. The Bauhaus changed the world and even today we feel its impact, in the smallest of objects, our built environments, and the cities in which we live. Students will work closely with the Bauhaus exhibition that opens March 1, 2019, at the Bowdoin College Museum of Art and will carry out their own research projects. (Same as: ARTH 2470, URBS 2470)

Previous terms offered: Spring 2019.

ENVS 2475 (c, IP, VPA) Ecocinema: China's Ecological and Environmental Crisis

Every Other Spring. Enrollment limit: 35.

Examines how China's economic development has caused massive destruction to the natural world and how environmental degradation affects the lives of ordinary people. An ecological and environmental catastrophe unfolds through the camera lens in feature films and documentaries. Central topics include the interactions between urbanization and migration, humans and animals, eco-aesthetics and manufactured landscapes, local communities and globalization. Considers how cinema, as mass media and visual medium, provides ecocritical perspectives that influence ways of seeing the built environment. The connections between cinema and environmental studies enable students to explore across disciplinary as well as national boundaries. Note: Fulfills the non-US cinema requirement and the film theory requirement for cinema studies minors. (Same as: ASNS 2075, CINE 2075)

Previous terms offered: Fall 2021, Fall 2019.

ENVS 2491 (c, IP) East Asian Environmental History, 1600-2000

Sakura Christmas.

Every Other Spring. Fall 2022. Enrollment limit: 16.

Seminar. The Anthropocene defines an epoch in which humans have become the dominant force in shaping their environment. Examines the role of East Asia in the emergence of this new era, from the seventeenth century to the present. In debating the narrative of ecological change in China, Japan, and Korea, readings and discussions focus on how successive regimes transformed their environments, and conversely, how those environments also structured modern human society. Questions what specific political, social, and economic changes triggered the Anthropocene in East Asia; how cultural, religious, and intellectual constructs have conditioned its arrival and acceleration. Weekly topics include: commodity frontiers, environmental sustainability, public health, industrial pollution, and nuclear technology. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2891, ASNS 2890)

Previous terms offered: Fall 2020.

ENVS 2504 (c) Animals in American History

Every Other Year. Enrollment limit: 16.

Seminar. Although modern humans tend to think of themselves as above nature, they are in fact part of it: partners in a myriad of relationships that have tied them to other members of the animal kingdom throughout their history. Examines a number of these relationships, focusing on North America from the sixteenth through the twentieth century. Topics considered include the role of animals in the development of the American economy, how domestic and wild animals have shaped the American environment, how Americans have conceived of the boundary between humanity and animality, and how pets have come to be viewed as part of the modern family. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2504)

Previous terms offered: Spring 2022, Fall 2018.

ENVS 2548 (c) Wild Things: Gender, Sexuality, and Wilderness

Non-Standard Rotation. Enrollment limit: 35.

Examines how ideas of wildness and wilderness have been used to generate different gender and sexual identities and politics through literature and other cultural forms in the United States. Considers wilderness and wildness in relation to rugged individualism; transgressive sexualities; representations of health, disease, and disability; the extension of and resistance to state control of the body; and the intersections of gender, sexuality, race, and class. Students will learn how the idea of wilderness has been associated with and adopted by different bodies and identities over time, from the early European colonists' first encounter with Indigenous peoples and the American continent to the twenty-first century, which scientists have characterized as the era of the sixth mass extinction. Readings include canonical works of wilderness writing and lesser-known texts, including queer pastorals, feminist travelogues, and HIV/AIDS memoirs. (Same as: ENGL 2548, GSWS 2548)

Previous terms offered: Spring 2020.

ENVS 2804 (c) Maine Writers and the Environment

Katie DuBois; Olaf Ellers; Elizabeth Muther; Jaret Reblin; David Carlon.
Non-Standard Rotation. Fall 2022. Enrollment limit: 12.

Explores the wild and diverse literary territories of the state of Maine – past and present – with a focus on coastal narratives and environmental writing. Considers Maine's multi-ethnic folkways, its austere modernisms, remorseless gothic landscapes, natural splendors and antagonisms, coastal rhapsodies and adversities, and contemporary environmental imperatives. Includes poetry, short stories, novels, memoirs, personal narratives, children's literature, nature writing, and environmental advocacy by such writers as Thoreau, Jewett, Robinson, Millay, Beston, Carson, McCloskey, King, Russo, Strout, and Bryan. Taught in residence at the Bowdoin College Schiller Coastal Studies Center. English 2804/Environmental Studies 2804 is a course-module in the Bowdoin Marine Science Semester. Biology 2232 (same as Environmental Studies 2232), Biology 2330 (same as Environmental Studies 2233), and Biology 2501 (same as Environmental Studies 2231) are co-requisites of this course. (Same as: ENGL 2804)

Previous terms offered: Fall 2018.

ENVS 3280 (a, INS) Plant Responses to the Environment

Non-Standard Rotation. Enrollment limit: 16.

Plants can be found growing under remarkably stressful conditions. Even your own backyard poses challenges to plant growth and reproduction. Survival is possible only because of a diverse suite of elegant physiological and morphological adaptations. The physiological ecology of plants from extreme habitats (e.g., tundra, desert, hypersaline) is discussed, along with the responses of plants to environmental factors such as light and temperature. Readings from the primary literature facilitate class discussion. Excursions into the field and laboratory exercises complement class material. (Same as: BIOL 3280)

Prerequisites: BIOL 2210 (same as ENVS 2223) or BIOL 2325 (same as ENVS 2225).

Previous terms offered: Spring 2020.

ENVS 3308 (a, INS) Research in Ecology, Evolution, and Marine Biology

Patricia Jones.

Every Spring. Spring 2023. Enrollment limit: 16.

Focuses on research methods in field biology, reading the primary literature, and training in scientific writing and presentation, careers in ecology, and next steps to pursuing those careers. Prepares students for productive future research experiences in areas of ecology, marine biology, animal behavior, and evolution. Students will focus on a research topic of their interest, for which they will read the primary literature, design experiments, produce a draft of a scientific paper, deepen their understanding of statistics and present their proposed research. Includes field excursions to marine and terrestrial environments. (Same as: BIOL 3308)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and either BIOL 2315 (same as ENVS 2224) or BIOL 2316 or BIOL 2319 (same as ENVS 2229) or BIOL 2325 (same as ENVS 2225) or BIOL 2330 (same as ENVS 2233) or BIOL 2210 (same as ENVS 2223) or BIOL 2327 (same as ENVS 2227).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENVS 3391 (c, IP) Mapping Germany: Nature and Knowledge

Non-Standard Rotation. Enrollment limit: 16.

Considers how German terrain and culture were mapped or charted through representations of nature and the wilderness in a diverse range of texts. Examinations of discourses about nature and landscape reveal how Germany constitutes itself as a nation with a particular relationship to the environment. A comparison of Austrian, German, and Swiss novels, short stories, films, and artworks emphasize the varied but powerful place of nature in the German imagination. Possible works, among others, by Kant, Goethe, Humboldt, Fanck, Ransmayr, Kehlmann, Jelinek, Richter. All materials and coursework in German. (Same as: GER 3391)

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2020.

ENVS 3902 (a) Earth Climate History

Phil Camill.

Every Spring. Spring 2023. Enrollment limit: 16.

The modern world is experiencing rapid climate warming and some parts extreme drought, which will have dramatic impacts on ecosystems and human societies. How do contemporary warming and aridity compare to past changes in climate over the last billion years? Are modern changes human-caused or part of the natural variability in the climate system? What effects did past changes have on global ecosystems and human societies? Students use environmental records from rocks, soils, ocean cores, ice cores, lake cores, fossil plants, and tree rings to assemble proxies of past changes in climate, atmospheric CO₂, and disturbance to examine several issues: long-term carbon cycling and climate, major extinction events, the rise of C₄ photosynthesis and the evolution of grazing mammals, orbital forcing and glacial cycles, glacial refugia and post-glacial species migrations, climate change and the rise and collapse of human civilizations, climate/overkill hypothesis of Pleistocene megafauna, climate variability, drought cycles, climate change impacts on disturbances (fire and hurricanes), and determining natural variability versus human-caused climate change. (Same as: EOS 3020)

Prerequisites: EOS 2005 (same as ENVS 2221).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENVS 3904 (a) Catalysis in Sustainable Chemical Processes

Brandon Tate.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Catalysis is a versatile tool in the development of sustainable chemical processes and renewable alternatives to fossil fuels and petrochemicals. The introduction of catalysis to an industrial chemical process provides opportunities for improved energy efficiency, reduced waste, conservation of scarce natural resources, lower costs, and greater selectivity, potentially facilitating chemical transformations that are otherwise inaccessible. This course covers essential concepts in transition state theory and chemical kinetics and the application of catalysis to outstanding problems in global chemical sustainability. Approaches to the design, characterization, and optimization of inorganic, organic, and biological catalysts are discussed in the context of applications including chemical energy storage, carbon capture and utilization, biomass conversion, sustainable plastics and polymers, and environmental remediation. (Same as: CHEM 3055)

Prerequisites: CHEM 2250.

ENVS 3905 (a, INS) Environmental Fate of Organic Chemicals

Non-Standard Rotation. Enrollment limit: 16.

More than 100,000 synthetic chemicals are currently in daily use. In order to determine the risk posed to humans and ecosystems, the extent and routes of chemical exposure must be understood and anticipated. Addresses the fate of organic chemicals following their intentional or unintentional release into the environment. Why do these chemicals either persist or break down, and how are they distributed between surface water, ground water, soil, sediments, biota, and air? Analysis of chemical structure used to gain insight into molecular interactions that determine the various chemical transfer and transformation processes, while emphasizing the quantitative description of these processes. (Same as: CHEM 3050)

Prerequisites: CHEM 2250.

Previous terms offered: Fall 2020.

ENVS 3908 (b, IP) Private Actors, Public Goods: Corporate Social Responsibility (CSR) in Comparative Perspective

Every Year. Enrollment limit: 16.

From fair trade chocolate to Kimberly Process certified diamonds, voluntary sustainability initiatives increasingly "govern" complex trans-border trade – to minimize environmental damages and human rights abuses exacerbated by globalization, especially when states prove incapable or unwilling to do so. Intensive in reading, research, and discussion, adopts a commodity-centered lens to examine transnational trade in comparative perspective. Students explore how global value chains – like "fast fashion" from Bangladesh and cell phones from China – defy conventional notions of political, geographic, and ecological boundaries and prompt a shift from "government" to "governance." (Same as: GOV 3430)

Prerequisites: Two of: ENVS 1101 and either ENVS 2302 or ENVS 2304 (same as GOV 2915) or ENVS 2330 (same as GOV 2910) or ENVS 2403 (same as HIST 2182) or GOV 2300 - 2599.

Previous terms offered: Fall 2020, Spring 2020, Fall 2018.

ENVS 3918 (b) Environmental and Natural Resource Economics

Guillermo Herrera.

Non-Standard Rotation. Fall 2022. Enrollment limit: 18.

Seminar. Analysis of externalities and market failure; models of optimum control of pollution and efficient management of renewable and nonrenewable natural resources such as fisheries, forests, and minerals; governmental vs. other forms of control of common-pool resources; and benefit-cost analysis of policies, including market-based and non-market valuation. Permission of instructor required during add/drop for students who have credit for Economics 2218. (Same as: ECON 3518)

Prerequisites: Two of: ECON 2555 and ECON 2557.

Previous terms offered: Fall 2021, Fall 2019.

ENVS 3920 (b) Animal Planet: Humans and Other Animals

Non-Standard Rotation. Enrollment limit: 16.

Cultures around the world maintain different stances about non-human animals. People eat meat or avoid doing so. Religions advocate veneration, fear, or loathing of certain animals. Domesticated animals provide us company, labor, and food. Wild animals are protected, studied, photographed, captured, and hunted. Animals inhabit novels, are featured in art, and adorn merchandise. Students read ethnographies, articles, animal rights literature, and children's books; study museum collections; and examine animal themes in films and on the Web. Employing anthropological perspectives, students consider what distinguishes humans from other animals, how cultures are defined by people's attitudes about animals, and what might be our moral and ethical responsibilities to other creatures. (Same as: ANTH 3210)

Prerequisites: ANTH 2000 - 2969.

Previous terms offered: Spring 2021.

ENVS 3921 (b) The Economics of Land Use, Ecosystem Services, and Biodiversity

Non-Standard Rotation. Enrollment limit: 18.

Seminar. Analysis of the economic forces that shape land-use patterns, the relationship between land-use patterns and ecosystem service provision and biodiversity persistence, and the economic value of ecosystem service provision. Investigates methods for increasing ecosystem service values on the landscape and the economic cost of these methods. Analysis of land-use externalities and the failure of land-use patterns to generate maximum societal net benefits; neoclassical economic theory on land-use; methods for estimating market value of land; methods of non-market valuation; efficient land-use patterns from a societal perspective; methods for finding efficient land-use patterns; and governmental and non-governmental organization land conservation programs. Permission of instructor required during add/drop for all students; required at all times for students who have credit for Economics 2218 (same as Environmental Studies 2302) or 2228 (same as Environmental Studies 2228). (Same as: ECON 3521)

Prerequisites: Three of: either ECON 1050 or ECON 1101 or Placement in earned ECON 1101 or Placement in ECON 2000 Level and ECON 1102 or Placement in earned ECON 1102 or Placement in ECON 2000 Level and MATH 1600 or higher or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2021, Spring 2019.

ENVS 3930 (a, INS) Ecotoxicology: Pollution Impacts on Ecosystems and Human Health

Every Other Spring. Enrollment limit: 15.

Chemical exposure can strongly impact both ecological communities and human health, often in complex and unexpected ways, yet limited data and scientific uncertainty make pollution regulation challenging. Examines pollution impacts on biological systems, from the organism to the ecosystem scale, with a focus on emerging research areas, including evolutionary ecotoxicology and the potential synergy of multiple environmental stressors. Investigates how society might use available toxicological data to protect ecological integrity and human health. Guest visitors explore political, historical, and social justice aspects, providing an interdisciplinary lens. Reading-, writing-, and discussion-focused seminar (Same as: BIOL 3309)

Prerequisites: BIOL 2000 - 2969 or CHEM 2000 - 2969 or EOS 2000 - 2969 or ENVS 2201 (same as BIOL 1158 and CHEM 1105).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENVS 3938 (c) Consumed: The Nature of Consumerism

Non-Standard Rotation. Enrollment limit: 16.

Explores connections between consumerism and the environment in North America and internationally. Analyzes the evolution of consumerism from the sixteenth century to the present, the material effects of consumers upon nearby and distant locales, and the social and cultural conflicts entailed in consumption across from the local to the global. Topics include relationships between producers and consumers, transformations to industries like mining or fishing, the rise of the leisure and outdoor recreation, industrialization and its discontents, the natural food and health movements, shopping and mass consumption, and the paradoxes of modern environmentalism and consumerism. Writing-intensive, including several short papers and a longer project based on original archival and/or field research.

Prerequisites: Two of: ENVS 1101 and ENVS 2403 (same as HIST 2182).

Previous terms offered: Spring 2022, Spring 2020.

ENVS 3957 (a) The Physics of Climate

Non-Standard Rotation. Enrollment limit: 35.

A rigorous treatment of the earth's climate, based on physical principles. Topics include climate feedbacks, sensitivity to perturbations, and the connections between climate and radiative transfer, atmospheric composition, and large-scale circulation of the oceans and atmospheres. Anthropogenic climate change also studied. (Same as: PHYS 3810, EOS 3050)

Prerequisites: PHYS 2150 or PHYS 2810 (same as ENVS 2253 and EOS 2810) or PHYS 3000.

Previous terms offered: Spring 2021.

ENVS 3963 (b, IP) Advanced Seminar in International Relations: Law, Politics, and the Search for Justice

Non-Standard Rotation. Enrollment limit: 15.

Examines the complex relationship between law and policy in international relations by focusing on two important and rapidly developing areas of international concern: environmental protection and humanitarian rights. Fulfills the environmental studies senior seminar requirement. (Same as: GOV 3610)

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ENVS 3980 (c) The Nature of Health in the United States and the World

Non-Standard Rotation. Enrollment limit: 16.

Explores relationships between humans, environment, and health in the United States and North America in their global context from the sixteenth century to the present day. Overall focus is on how the history of health and the environment in the US connects to global and transnational history. Topics may include the evolution of public health interventions, biomedical research, and clinical practice; folk remedies and popular understandings of health; infectious and chronic diseases; links between landscape, health, and inequality; gender and reproductive health; occupational health and safety; the effects of agriculture, industrialization, and urbanization on human and ecological health; state and federal policies in the United States; and the colonial and transnational dimensions of public health and medicine. Students write a major research paper based on primary sources. Environmental Studies 1101, 2403, and at least one history course numbered 2000-2969 recommended. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 3180)

Previous terms offered: Fall 2020, Fall 2018.

ENVS 3982 (c) The Beach: Nature and Culture at the Edge

Non-Standard Rotation. Enrollment limit: 16.

Examines the development of the North American coastline, a place of dynamic environmental transformations and human interactions. Students consider physical changes on the coast, the coast as a zone for economic development and social conflict, and shifting perceptions of the shoreline. Topics may include: fisheries and whaling, conservation and political management, environmental disasters, resource extraction, industrialization and urbanization, tourism, beach and surfer culture, climate change and sea-level rise; and representations of the beach in art, literature, photography, film, and music. Students write a major research paper based on primary and secondary sources.

Prerequisites: ENVS 1101.

Previous terms offered: Fall 2021.

ENVS 3998 (c) The City since 1960

Jill Pearlman.

Every Other Fall. Spring 2023. Enrollment limit: 16.

Seminar. Focuses on important issues in the history of the American city during the past half century with some comparative excursions to cities beyond. Issues include urban renewal and responses to it, historic preservation, gentrification, high-rise syndrome, the loss and creation of public places, and the making of a humane and successful city today. Considers both the city's appearance and form and the social and cultural issues that help shape that form. Examines these issues in depth through primary and secondary source readings. Throughout the semester students pursue a research project of their own, culminating in a presentation to the class and a substantial (twenty-five page) paper. (Same as: URBS 3998)

Prerequisites: ENVS 2004 (same as DCS 2335 and URBS 2004) or ENVS 2301 (same as DCS 2340 and URBS 2301) or ENVS 2403 (same as HIST 2182) or ENVS 2431 (same as ARTH 2430 and URBS 2431) or ENVS 2444 (same as HIST 2006 and URBS 2444) or ENVS 2445 (same as URBS 2445) or ENVS 2470 (same as ARTH 2470 and URBS 2470) or AFRS 2220 (same as URBS 2620) or AFRS 2626 (same as URBS 2626) or AFRS 3230 (same as HIST 3230 and URBS 3230) or GOV 2309 or HIST 1321 (same as URBS 1321) or HIST 2660 (same as GSWS 2266 and URBS 2660) or HIST 2802 (same as ASNS 2585 and URBS 2802) or SOC 2202 (same as URBS 2202) or URBS 1000 - 2969 or URBS 3000 or higher.

Previous terms offered: Spring 2021.

Gender, Sexuality, and Women's Studies

Overview & Learning Goals

Overview

The interdisciplinary Gender, Sexuality, and Women's Studies Program (GSWS) combines a variety of scholarly traditions to develop a culture of critical thinking about the intersections of gender, sexuality, race, and class. Drawing primarily on the humanities and the social sciences, courses in GSWS explore the social construction of identity and experience as well as how difference, marginalization, and resistance exist within and across cultures and historical periods. In its curriculum and its faculty research, GSWS explores the multiple directions that feminist and queer scholarship and activism take locally, nationally, and transnationally.

Learning Goals

- Understand and apply precepts: Students explore the foundations of this field of study (1000-level), develop fluency in the ways in which gender and sexuality shape how individuals experience the world (2000-level), and apply their learning and critical thinking to questions of their choosing (3000- and 4000-level).
- Develop strengths in college-level intellectual engagement: Students read texts closely, deliberate on their meanings on their own and with others, and write and speak clearly and persuasively about them (all levels).
- Engage theoretically: Students develop fluency in the theoretical constructs of feminist theory and/or queer theory, and then rigorously evaluate and apply those ways of thinking (2000-level).

- See the classroom as a space of growth: Students explore the processes as well as the products of their learning, viewing differences among us and among the scholars whose work is considered as opportunities for intellectual and personal engagement and growth.
- Exercise a gendered imagination: Students develop the competence and confidence to use their learning to further their intellectual lives, exercise leadership, and foster change beyond the Bowdoin classroom.

GSWS majors at Bowdoin become engaged, informed, and resourceful readers and writers, capable of critical thinking and cultural analysis.

Curriculum of the Bowdoin Major in Gender, Sexuality, and Women's Studies

The GSWS Program takes a theoretically broad and methodologically varied approach to the study of gender and sexuality and their intersections with race, class, ethnicity, nationality, and religion across historical eras and transnational contexts. Courses at every level of the GSWS curriculum focus on reading, writing, speaking, collaborative learning, and the development of critical thinking skills. From first-year writing seminars and introductory courses (1000-level) to theory courses, intermediate seminars, and electives (2000-level), to advanced seminars, independent studies, and honors projects (3000- 4000-level courses), GSWS students gain competence and confidence in their ability to understand, interrogate, and contribute to this interdisciplinary field of study. In addition to core and elective courses taught by the permanent GSWS faculty, faculty from across the campus contribute classes from a wide range of departments and programs.

Options for Majoring or Minor in the Program

Students may elect to major in gender, sexuality, and women's studies or to coordinate a major in gender, sexuality, and women's studies with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in gender, sexuality, and women's studies.

Requirements

Gender, Sexuality, and Women's Studies Major

The major consists of nine courses, including three required core courses.

Code	Title	Credits
GSWS 1101	Introduction to Gender, Sexuality, and Women's Studies	1
Theory Requirement:		1
GSWS 2201	Feminist Theory	
GSWS 2001	Queer Theory	
GSWS 2206	Latin American Feminisms	
Select a GSWS-designated, advanced-level capstone seminar.		1
Select six additional courses in gender, sexuality, and women's studies ^a		6

- ^a These courses may be chosen from the set of GSWS courses at any level, any course cross-listed with GSWS, or approved courses from transfer credit. Courses that do not fit these categories will need to be submitted to the program committee for consideration.

Gender, Sexuality, and Women's Studies Minor

The minor consists of five courses, including two required courses.

Code	Title	Credits
GSWS 1101	Introduction to Gender, Sexuality, and Women's Studies	1
Feminist Theory Requirement:		1
GSWS 2201	Feminist Theory	
GSWS 2001	Queer Theory	
GSWS 2206	Latin American Feminisms	
Select three additional courses in gender, sexuality, and women's studies ^a		3

- ^a These courses may be chosen from the set of GSWS courses at any level, any course cross-listed with GSWS, or an approved course from transfer credit. Courses that do not fit these categories will need to be submitted to the program committee for consideration.

Additional Information

Additional Information and Program Policies

- One first-year writing seminar may count toward the major or minor.
- With prior approval, GSWS allows up to two transfer courses to count toward the major; one toward the minor. All core courses must be taken at the College.
- Courses count toward the major if grades of C- or better are earned. One course taken with the Credit/D/Fail grading option may count toward the major as long as a CR (credit) grade is earned for the course. No Credit/D/Fail courses may be counted for the minor.

- Note that GSWS theory courses require prerequisites: GSWS 1000–2969 or GSWS 3000 or higher.
- Only three of the six elective courses for the major may be from any single department outside of GSWS. Only two of the three elective courses for the minor may be from any single department outside of GSWS. The departmental affiliation of a course is considered the department of which the instructor is a member.
- No more than two independent study courses may count toward the major requirements, unless the student is pursuing an honors project, in which case the limit is three independent studies. Normally, students may count up to two independent study courses toward the minor requirements.
- Majors may double-count three courses with another department or program. Minors may double-count one course with another department or program.
- Honors: during the spring of their junior year, students who wish to undertake an honors project must secure the agreement of a faculty member to supervise their independent study project. The honors project supervisor must be an affiliated faculty member with GSWS. If the student's chosen supervisor is not an affiliated faculty member, the student may appeal for permission from the GSWS Program Committee. Two semesters of advanced independent work (GSWS 4050 and GSWS 4051) are required for an honors project in GSWS.
- Departments and programs that offer GSWS classes include: African studies, anthropology, art, Asian studies, cinema studies, classics, economics, education, English, environmental studies, German, government and legal studies, history, Latin American, Caribbean, and Latinx studies, music, philosophy, psychology, religion, romance languages and literatures, Russian, sociology, theater and dance, urban studies.

Information for Incoming Students (p. 226)

First-year students interested in GSWS have many courses available to them. There are a number of first-year writing seminars as well as GSWS 1101 Introduction to Gender, Sexuality, and Women's Studies which introduces key concepts, questions, and methods that have developed within the interdisciplinary fields of gender, sexuality, and women's studies; explores how gender norms differ across cultures and change over time; examines how gender and sexuality are inseparable from other forms of identification – race, class, ability, and nationality. It also considers the role that gender, sexuality, and other identity knowledges play in resisting sexism, racism, homophobia, and transphobia. Offered every semester, with few exceptions. First-year writing seminars offered or cross-listed with GSWS this fall: GSWS 1040 Unhappy Queers and LACL 1045 Social Justice Warriors of the Americas.

Courses

GSWS 1005 (c) Victorian Monstrosity

Non-Standard Rotation. Enrollment limit: 16.

Examines various monsters and creatures that emerge from the pages of Victorian narratives. What do these strange beings tell us about literary form, cultural fantasies, and anxieties; or about conceptions of selfhood and the body? How do they embody (or disembody) identities that subvert sexual, racial, and gendered norms? Authors may include Lewis Carroll, Richard Marsh, Robert Louis Stevenson, Bram Stoker, and H.G. Wells. (Same as: ENGL 1005)

Previous terms offered: Fall 2021.

GSWS 1006 (b) Queer and Trans Global Ethnography

Non-Standard Rotation. Enrollment limit: 16.

Draws from case studies around the world to understand the contemporary conditions under which queer and trans people live, identify themselves, make community (or not), and (sometimes) mobilize for change. We consider the distinct cultural dimensions of queer and trans life in different locations as well as global forces that make LGBTQ identity appear at times so uniform across different settings. Most readings are ethnographic reporting on queer or trans communities, and consider how gender and sexuality are conditioned by a variety of institutions (e.g. medicine, religion, activism). There are additional readings on theories of globalization and sexuality as well as occasional film viewings. Students will have weekly short writing prompts, culminating in a term paper that researches a particular queer or trans community outside of the U.S.

Previous terms offered: Fall 2020.

GSWS 1007 (b) Women of Color in Politics

Non-Standard Rotation. Enrollment limit: 16.

Explores the significant roles that women of color have played in American politics and around the world. Begins with the US context, starting in the antebellum era and moving forward by reading biographies/autobiographies that provide voice to the experiences faced by women of color in both traditional and non-traditional political spaces. These include women of color as close confidants to male political figures (first ladies, wives, and mistresses) and as politicians, judges, activists, and revolutionaries. Then shifts to a more global context considering the perspectives of women of color in countries where they have championed gender equality and feminism, and where they have become powerful political actors. (Same as: GOV 1005, AFRS 1005)

Previous terms offered: Fall 2019, Fall 2018.

GSWS 1009 (c, FYS) The Ravages of Love

Non-Standard Rotation. Enrollment limit: 16.

Examines examples of overwhelming love in eighteenth and nineteenth century novels from England, France, and Germany. Through close reading and intensive writing, considers the intersection of love with the difficulties created by class and gender difference; the power of desire to challenge social convention and the terms of ordinary reality; the confrontations between love, egotism, and seduction; and the implications of love's attempt to dare all, even at the risk of death. Discusses the political overtones of these narratives of love and their place within the construction of gender, sexuality and subjectivity in Western culture. Authors may include Prevost, Goethe, Laclos, Hays, Austen, Bronte, and Flaubert. (Same as: ENGL 1009)

Previous terms offered: Fall 2019.

GSWS 1018 (c) Jane Eyre, Everywhere

Non-Standard Rotation. Enrollment limit: 16.

Charlotte Brontë's 1847 novel, "Jane Eyre," had a profound impact not only on subsequent nineteenth-century fiction, but also on twentieth- and twenty-first century literary representations of female experience. Begins with a close reading of Brontë's novel and then moves on to exploring modern literary rewritings of this narrative. Considers both how Brontë's themes are carried out through these various texts and why her narrative has been such a rich source of reinterpretation. In addition to Brontë, authors may include Du Maurier, James, Messud, Park, and Rhys. (Same as: ENGL 1018)

Previous terms offered: Fall 2020, Fall 2018.

GSWS 1021 (c, FYS) Bad Girls of the 1950s

Non-Standard Rotation. Enrollment limit: 16.

Explores the representation and life experiences of women who did not fit the cultural norm of suburban motherhood in 1950s America. Focuses on issues of class, race, sexuality, and gender in a decade shaped by fears about nuclear war and communism, and by social and political conformity. Topics include teenage pregnancy, women's grassroots political leadership, single womanhood, civil rights, emergent feminism, and, finally, the enduring cultural resonance of the apron-clad 1950s mom. Engages a variety of primary and secondary sources. Note: This course is part of the following field(s) of study: United States. (Same as: AFRS 1021, HIST 1001)

Previous terms offered: Fall 2019.

GSWS 1025 (c) Jane Austen

Non-Standard Rotation. Enrollment limit: 16.

A study of Jane Austen's major works, *Sense and Sensibility*, *Pride and Prejudice*, *Emma*, *Mansfield Park*, and *Persuasion*. (Same as: ENGL 1012)

Previous terms offered: Fall 2021, Fall 2019.

GSWS 1027 (c, FYS) From Flowers of Evil to Pretty Woman: Prostitutes in Modern Western Culture

Non-Standard Rotation. Enrollment limit: 16.

Explores the myriad ways that prostitutes have been represented in modern Western culture from the middle of the nineteenth century to the present. By analyzing literary texts, visual artworks, and films from Europe and the United States, examines prostitution as a complex urban phenomenon and a vehicle through which artists and writers grapple with issues of labor, morality, sexuality, and gender roles. Introduces students to a variety of literary, artistic, musical, and filmic genres, as well as to different disciplinary approaches to the study of prostitution. Authors, artists, and film directors may include Baudelaire, Toulouse-Lautrec, Kirchner, Wedekind, Pabst, Marshall, Scorsese, Spielmann, and Sting. (Same as: GER 1027)

Previous terms offered: Fall 2018.

GSWS 1032 (c) Queering Video Games

Non-Standard Rotation. Enrollment limit: 16.

How is queerness central to the creation, reception, and engagement with video games designed with different audiences in mind? How can video games push us to think more queerly about ourselves, other people, the world we live in, and the media we consume? This seminar explores the ideological tensions, issues, and concerns present in video games with LGBTQ+ themes and characters, and even more so, the value of approaching video games from a queer perspective even when they are void of overt LGBTQ+ content. Drawing from discourse in queer studies, gender studies, media studies, and game design, students will consider the value of using queer perspectives to rethink the practices of crafting, playing with, researching, and writing about video games. By crafting assignments such as close reading, theoretical application, and critical review essays, students will develop their academic writing skills while also learning how to engage in broader conversations about queerness, video game studies, and popular culture.

Previous terms offered: Fall 2021.

GSWS 1040 (c) Unhappy Queers

Angel Matos.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Unhappiness has been pivotal in shaping queer cultural productions and in mobilizing the visibility of queer life in literature and media. In representing the difficulties of coming out, the social ramifications of HIV and AIDS, or the institutional, personal, and systemic violence imposed on queer bodies and communities—queer texts became an archive that rendered queer practices legible through feelings of sadness and despair. This seminar examines contemporary queer literature and media to critically examine the role that sadness plays in this archive, and to think deeply about the role of emotion in representing queer lives and experiences. What is the role of happiness, hope, and joy in an archive so focused on negative emotions and outcomes? How is the concept of happiness reliant on normative attitudes and ideologies, and how do queer texts disrupt this equation by highlighting alternative ways of succeeding, thriving, and existing in the world? How do sad queer texts push us to acknowledge the insufficiency of progress-driven narratives that are circulated today? Through writing, reading, and examining a variety of queer fiction and media, students will develop their own answers to these questions (Same as: ENGL 1008)

GSWS 1045 (c) Social Justice Warriors of the Americas

Irina Popescu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

What is social justice? What are human rights? Where did they begin and why? How do literature, art, history, and other methods of cultural production in North and South America engage with social justice and human rights discourses? How do different genres of cultural production document social justice, power, and inequity in the Americas? This course explores the concepts of social justice and human rights within the Americas. In this course we will read historical accounts, novels, poems, short stories, and critical race and gender scholarly articles, as well as view visual performances, photographs, and films. Students will learn how struggles of culture, gender, and race work to shape human rights discourse in the Americas, from colonialism to present-day immigration issues. The major goals for this seminar are to improve students' skills in close reading, critical thinking, communication, and analytical writing and to explore the relationships between the four skills. (Same as: LACL 1045)

GSWS 1101 (b, DPI) Introduction to Gender, Sexuality, and Women's Studies

Keona Ervin.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

Introduces key concepts, questions, and methods that have developed within the interdisciplinary fields of gender, sexuality, and women's studies. Explores how gender norms differ across cultures and change over time. Examines how gender and sexuality are inseparable from other forms of identification—race, class, ability, and nationality. And considers the role that gender, sexuality, and other identity knowledges play in resisting sexism, racism, homophobia, and transphobia.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

GSWS 1102 (c, VPA) Cultural Choreographies: An Introduction to Dance

Lindsay Rapport.

Every Other Year. Fall 2022. Enrollment limit: 26.

Dancing is a fundamental human activity, a mode of communication, and a basic force in social life. Investigates dance and movement in the studio and classroom as aesthetic and cultural phenomena. Explores how dance and movement activities reveal information about cultural norms and values and affect perspectives in our own and other societies. Using ethnographic methods, focuses on how dancing maintains and creates conceptions of one's own body, gender relationships, and personal and community identities. Experiments with dance and movement forms from different cultures and epochs – for example, the hula, New England contradance, classical Indian dance, Balkan kolos, ballet, contact improvisation, and African American dance forms from swing to hip-hop – through readings, performances, workshops in the studio, and field work. (Same as: DANC 1102)

Previous terms offered: Fall 2018.

GSWS 1104 (c) Introduction to Black Women's Literature

Non-Standard Rotation. Enrollment limit: 50.

Examines the twin themes of love and sex as they relate to poems, stories, novels, and plays written by African American women from the nineteenth century to the contemporary era. Explores such issues as Reconstruction, the Great Migration, motherhood, sexism, group loyalty, racial authenticity, intra- and interracial desire, homosexuality, the intertextual unfolding of a literary tradition of black female writing, and how these writings relate to canonical African American male-authored texts and European American literary traditions. Students are expected to read texts closely, critically, and appreciatively. Possible authors: Harriet Jacobs, Frances Harper, Nella Larsen, Jessie Faucet, Ann Petry, Ntozake Shange, Suzan-Lori Parks, Alice Walker, Toni Morrison, Gayle Jones, Jamaica Kincaid, Terry McMillan, Sapphire, Lizzette Carter. (Same as: ENGL 1108, AFRS 1108)

Previous terms offered: Spring 2019.

GSWS 1111 (c) Introduction to LGBTQ Fiction

Non-Standard Rotation. Enrollment limit: 35.

Using an intersectional reading approach, students closely analyze both classic and more contemporary lesbian, gay, trans, and queer fictional texts of the last one hundred years. Students consider the historically and culturally changing ways that sexuality has been understood within popular, medical, as well as religious discourses. And because gender conflict and the tendency to analogize the struggles of sexual and racial minorities are key features of this literary tradition, students are expected to engage this subject matter sensitively and critically. Possible texts include *The Well of Loneliness*, *Giovanni's Room*, *Rubyfruit Jungle*, *A Single Man*, *Oranges Are Not the Only Fruit*, and *The Limits of Pleasure*. (Same as: ENGL 1111)

Previous terms offered: Spring 2022.

GSWS 1205 (c) Black Women's Lives as the History of Africana Studies: Twentieth and Twenty-first Century

Non-Standard Rotation. Enrollment limit: 50.

In conjunction with the fiftieth anniversary of Africana studies at Bowdoin, this course will address debates and issues of Africana studies through the lives of black women. Students will focus on the twentieth and twenty-first centuries reading works by and about Zora Neale Hurston, Pauli Murray, Nina Simone, Josephine Baker, Angela Davis, and Condoleezza Rice. We will take up differences and continuities between these thinkers to understand the politics of respectability, work, representation, sexuality, and family across multiple historical contexts. Though this course continues the themes of AFRS 1109, students need not take Part I to take Part II. (Same as: AFRS 1111, ENGL 1302)

Previous terms offered: Spring 2020.

GSWS 1301 (c) Black Women's Lives as the History of Africana Studies: Eighteenth and Nineteenth Century

Non-Standard Rotation. Enrollment limit: 50.

In conjunction with the fiftieth anniversary of Africana studies at Bowdoin, this yearlong, two-part course will address debates and issues of Africana studies through the lives of black women. In Part I, students will focus on early Africana studies texts, reading works by and about Phillis Wheatley, Sojourner Truth, Frances Harper, Ida B. Wells, and Anna Julia Cooper. We will take up differences and continuities between these thinkers to understand the politics of respectability, work, representation, sexuality, and family across multiple historical contexts. (Same as: AFRS 1109, ENGL 1301)

Previous terms offered: Fall 2019.

GSWS 1321 (c) Philosophical Issues of Gender and Race

Non-Standard Rotation. Enrollment limit: 50.

Explores contemporary issues of gender and race. Possible topics include the social construction of race and gender, implicit bias, racial profiling, pornography, the gender wage gap, affirmative action, race and incarceration, transgender issues, and reparations for past harms. Readings drawn from philosophy, legal studies, and the social sciences. (Same as: PHIL 1321)

Previous terms offered: Spring 2022, Fall 2018.

GSWS 1592 (c, VPA) Issues in Hip-Hop I

Non-Standard Rotation. Enrollment limit: 50.

Traces the history of hip-hop culture (with a focus on rap music) from its beginnings in the Caribbean to its transformation into a global phenomenon by the early 1990s. Explores constructions of race, gender, class, and sexuality in hip-hop's production, promotion, and consumption, as well as the ways in which changing media technology and corporate consolidation influenced the music. Artists/bands investigated include Grandmaster Flash, Run-D.M.C., Public Enemy, De La Soul, Queen Latifah, N.W.A., MC Lyte, Snoop Doggy Dogg, and Dr. Dre. (Same as: MUS 1292, AFRS 1592)

Previous terms offered: Fall 2018.

GSWS 2001 (DPI) Queer Theory

Jay Sosa.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course introduces students to major theoretical debates that have shaped the interdisciplinary field of queer studies. Through readings and media that interrogate LGBTQ+ lived experiences, artistic expression, and activism, this class interrogates the many possible connections between our desires, senses of self, and relationship to the world. In doing so, we deconstruct common sense definitions of identity, performance, fantasy, normalcy, kinship and affect. We use core concepts of queer theory to understand and resist social inequality produced by cis-heteronormativity and its intersections with racism, patriarchy, ableism and nationalism. Finally, queer theory helps us 'think otherwise,' envisioning alternative sets of social relations and community practices for more just worlds.

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GSWS 2021 (c) Embodying the Renaissance

Every Other Year. Enrollment limit: 16.

The English Renaissance (c. 1500-1650) defined the human body in new ways as a source of knowledge, pleasure, and representation, even as the body remained subject to surveillance, punishment, and torture. This course explores a range of different bodies in prose, drama, and poetry through the critical lenses of race and gender as well as in relation to scientific, religious, and medical knowledge and practices. Topics include anatomical dissection, the humoral body, the cult of virginity, marking the body (i.e., tattoos), and contrasting theories of sexual reproduction. We also attend to newly racialized bodies produced by the nascent slave trade and new efforts of colonial expansion. This writing-intensive intermediate seminar culminates in a self-designed research project on a topic designed by students and informed by additional research. Primary authors include William Shakespeare, Christopher Marlowe, Aemilia Lanyer, Katharine Philips, John Donne, and Margaret Cavendish. Note: Fulfills the pre-1800 requirement for English majors. (IRBW) (Same as: ENGL 2024)

Previous terms offered: Fall 2021.

GSWS 2028 (c) Mean Women Writers

Marilyn Reizbaum.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Intermediate Seminar. Parul Sehgal has described Muriel Spark's genius as a writer "cruelty mixed with camp, the lightness of touch, the flick of the wrist that lands the lash." Spark herself said that she "loves her characters like a cat loves a bird." This course will study a variety of modern women writers, whose writing has been variously called "mean," "cruel," "indifferent," "cold." We will examine a number of genres (including the graphic novel) in a style that is "scrupulously mean," to borrow from James Joyce's characterization of his early writing, which has been famously praised for producing the very same effects that are seen as harsh or harmful in women writers of the same era, until today. We will consider both gendered theories of writing along with primary texts; authors may include such writers as Maggie Nelson Virginia Woolf, Hannah Arendt, bell hooks, Muriel Spark, Patricia Highsmith, Elfriede Jelinek, Dorothy Parker, Octavia E. Butler, Cathy Park Hong, and Emil Ferris. (Same as: ENGL 2028)

GSWS 2076 (c, IP) Fashion and Gender in China

Shu-chin Tsui.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines how the dress women wear and the fashion consumers pursuit reflect social-cultural identities and generate gender politics. Readings and discussions span historical periods, geographical locations, social-cultural groups, and identity categories. From bound feet to the Mao suit, and from qipao to wedding gowns, fashion styles and consumer trends inform a critical understanding of the nation, gender, body, class, and transnational flows. Topics include the intersections between foot-binding and femininity, qipao and the modern woman, the Mao suit and the invisible body, beauty and sexuality, oriental chic and re-oriental spectacle. With visual materials as primary source, and fashion theory the secondary, offers an opportunity to gain knowledge of visual literacy and to enhance analytical skills. (Same as: ASNS 2076)

Previous terms offered: Fall 2020.

GSWS 2109 (c) Medieval Women Writers

Every Other Year. Enrollment limit: 35.

This course introduces students to the writings of medieval women, cis and trans—queens and princesses, heretics and saints, scientists and philosophers—who lived in the four centuries between the years 1000 and 1400 CE. We will read their autobiographies, manifestos, secret letters, visions of paradise, love poems, and fairy tales. Although this course focuses on women who wrote in the English language, it also explores the wider world in which these women lived and traveled, from Paris to Timbuktu and Shiraz to Iceland. We will put the medieval texts we read into conversation with the work of contemporary women writers like Michaela Coel, Sally Rooney, and Jia Tolentino. Note: This class fulfills the pre-1800 requirement for the English major. (Same as: ENGL 2109)

Previous terms offered: Spring 2021.

GSWS 2110 (c, DPI) "Bad" Women Make Great History: Modern Europe as Lived and Shaped by Women, 1789–1968

Non-Standard Rotation. Enrollment limit: 35.

An examination of modern European history centered on women's voices, experiences, perspectives, subjectivity, and agency. Drawing largely on primary sources (including memoirs, letters, art, literature, photography, and film), lectures and discussions will explore how women from across Europe navigated and challenged the gendered norms of their societies to shape unique and diverse identities; examine and acknowledge women's accomplishments in different spheres of society and culture; and consider the major debates, obstacles, and achievements related to women's political, economic, and cultural liberation. Lectures will also emphasize ways in which a gendered lens enhances our understanding of European history, including the experience of industrialization, secularization, imperialism, socialism, fascism, and the two world wars. Note: This course is part of the following field(s) of study: Europe. (Same as: HIST 2110)

Previous terms offered: Spring 2022, Spring 2020.

GSWS 2201 (b, DPI) Feminist Theory

Non-Standard Rotation. Enrollment limit: 35.

The history of women's studies and its transformation into gender studies and feminist theory has always included a tension between creating "woman," and political and theoretical challenges to that unity. Examines that tension in two dimensions: the development of critical perspectives on gender and power relations both within existing fields of knowledge, and within the continuous evolution of feminist discourse itself.

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher.

Previous terms offered: Fall 2020, Fall 2019, Fall 2018.

GSWS 2202 (c) Renaissance Sexualities

Non-Standard Rotation. Enrollment limit: 35.

How do Renaissance authors represent sexual desires and dilemmas? What strategies do authors use to represent, for instance, drives that have not been codified and labeled according to modern epistemologies? Topics include the inarticulacy of homoeroticism and other forms of attachment as they shape Shakespearean comedy, minor epic, and tragicomic romance, with special attention to the poetics of same-sex desire and the erotics of theatrical performance by boy actors on the London stage. Authors include Shakespeare, Thomas Middleton, John Ford, Thomas Crashaw, and Margaret Cavendish, with secondary readings by Eve Sedgwick, Jonathan Goldberg, and Laurie Shannon, among others. Note: Fulfills the pre-1800 requirement for English majors. (Same as: ENGL 2202)

Previous terms offered: Spring 2020.

GSWS 2206 (c, DPI, IP) Latin American Feminisms

Irina Popescu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

What are feminisms? Is there more than one feminism? What is the relationship between feminisms and constructions of race, gender and ethnicity in Latin America? How has feminist discourse shaped human rights discourses in the region? This course explores the complex network of feminisms in 20th-21st century Latin America. It covers feminist movements, theories, and scholars/artists from a variety of Latin American countries and regions, including Guatemala, Argentina, Mexico, and Brazil. Students will learn how intersections between constructions of race and ethnicity, as well as gender, impact feminisms in the region. Students will also explore how early and more recent contributions of indigenous and women of color, continue impacting ideas, discussions, and recent debates concerning feminisms and women's social mobilizations in Latin America. Note: This course fulfills the GSWS requirement for either Queer Theory or Feminist Theory. (Same as: LACL 2374)

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher.

Previous terms offered: Fall 2021.

GSWS 2207 (c, DPI, VPA) Black Women, Politics, Music, and the Divine

Judith Casselberry; Brian Purnell.

Every Fall. Fall 2022. Enrollment limit: 16.

Seminar. Examines the convergence of politics and spirituality in the musical work of contemporary black women singer-songwriters in the United States. Analyzes material that interrogates and articulates the intersections of gender, race, class, and sexuality generated across a range of religious and spiritual terrains with African diasporic/black Atlantic spiritual moorings, including Christianity, Islam, and Yoruba. Focuses on material that reveals a womanist (black feminist) perspective by considering the ways resistant identities shape and are shaped by artistic production. Employs an interdisciplinary approach by incorporating ethnomusicology, anthropology, literature, history, and performance and social theory. Explores the work of Shirley Caesar, the Clark Sisters, Meshell Ndegeocello, Abby Lincoln, Sweet Honey in the Rock, and Dianne Reeves, among others. (Same as: AFRS 2201, MUS 2291, REL 2201)

Previous terms offered: Fall 2021, Fall 2018.

GSWS 2209 (c) Gender and Islam

Non-Standard Rotation. Enrollment limit: 35.

Explores categories for interpreting female symbolism in Islamic thought and practice, and women's religious, legal, and political status in Islam. Attention is given to statements about women in the Qur'an, as well as other traditional and current Islamic texts. Emphasis on analysis of gender in public versus private spheres, individual vs. society, Islamization vs. modernization/Westernization, and the placement/displacement of women in the traditionally male-dominated Islamic power structures. Students may find it helpful to have taken Religion 2208 (Islam), but it is not a prerequisite. (Same as: REL 2209)

Previous terms offered: Spring 2020.

GSWS 2212 (b) Sociology of Sexuality

Non-Standard Rotation. Enrollment limit: 35.

Examines the theoretical and methodological approaches used in the sociological study of sex and sexuality. Explores how people construct meanings around sex, how people use and question notions of sexuality, and why sexuality is socially and politically regulated. Links sexuality to broader sociological questions pertaining to culture and morality, social interaction, social and economic stratification, social movements, urbanization and community, science, health, and public policy. Topics also include the historical and legal construction of heterosexuality, sexual fluidity, gay identity, masculinities and femininities, the queer dilemma, and the "post-gay" phenomenon. (Same as: SOC 2212)

Prerequisites: SOC 1101.

Previous terms offered: Spring 2022, Spring 2020.

GSWS 2217 (c, IP) Fallen Women and Superfluous Men: Tolstoy, Dostoevsky, and the Great Russian Novel

Non-Standard Rotation. Enrollment limit: 35.

Introduces students to two giants of Russian literature, Tolstoy and Dostoevsky, and explores their significance to Russian cultural history and European thought. The course surveys the aesthetic contributions, literary styles, and artistic innovation of both authors through the close reading of their early and mature works. Themes of religion, philosophy, modernity, and art are examined through the complex lens of gender dynamics in nineteenth-century Russian literature. Special emphasis is placed on each novelist's approach to questions of gender roles, masculinity, femininity, sexuality, prostitution, motherhood, free will, and social and familial duty. Sexual violence, suffering, spirituality, and redemption are further topics of interest. Studied texts include Dostoevsky's *Crime and Punishment* and *Notes from Underground*, as well as Tolstoy's *Anna Karenina*, *The Cossacks*, and "The Kreutzer Sonata," among others. Class is conducted in English. . (Same as: RUS 2117)

Previous terms offered: Spring 2021.

GSWS 2219 (b, DPI) Deconstructing Masculinities

Non-Standard Rotation. Enrollment limit: 35.

An introduction to the sociological study of men and masculinities. Investigates debates about the historical, structural, cultural, and personal meanings constructed around masculinity. Explores how masculinity varies historically and across the life span; how it intersects with race, class, gender, sexuality, age, and ability; and how these constructions map onto male and female bodies. Examines how masculinities construct and reproduce power and inequality among men and between men and women. Topics also include, but are not limited to, the production and maintenance of masculinity, the male body, masculine cultures of sports, technology, violence and incarceration, female and queer masculinities. (Same as: SOC 2219)

Prerequisites: SOC 1101 or GSWS 1101 or GWS 1101.

Previous terms offered: Fall 2021, Spring 2021.

GSWS 2224 (b) Introduction to Human Population

Non-Standard Rotation. Enrollment limit: 35.

Focuses on the processes of population change—fertility/reproduction, mortality/death, and migration—with attention to the causes of and consequences of those changes. Also examines the politics around population change, discourse, and policies, and the ways those have been connected to global inequality, gender inequalities, and race and ethnicity. (Same as: SOC 2222, ENVS 2332)

Prerequisites: SOC 1101 or GSWS 1000 - 2969 or GSWS 3000 or higher.

Previous terms offered: Fall 2020.

GSWS 2230 (c, DPI) Queer Youth Cultures: Texts and Contexts

Every Other Year. Enrollment limit: 35.

How can queer frameworks push us to develop more complex understandings of young people and their roles in culture and society? How do children's picture books, young adult novels, youth television, and video games reinforce or disrupt normative understandings of youth, sexuality, queerness, and growth? Explores the connections between queer and critical youth studies and applies them toward the examination of youth literature and media with LGBTQ+ characters and themes. Examines how queer youths are imagined and constructed in different texts and media, and how are these texts can reconfigure—and potentially challenge—simplistic understandings of children, teens, and their cultures. Through critical, intersectional engagement with fictional works crafted for younger audiences and scholarship in queer youth studies, students will challenge ideas used to conceptualize Western understandings of childhood and adolescence, such as innocence, knowledge, growth, and experience.

Previous terms offered: Fall 2021.

GSWS 2231 (c) Gender and Sexuality in Early Christianity

Jeannie Sellick.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Investigates the ways in which gender and sexuality can serve as interpretive lenses for the study of early Christian history, ideas, and practices. Can the history of early Christianity—from the apostle Paul to Augustine of Hippo—be rewritten as a history of gender and sexuality? In answer to that question, addresses a range of topics, including prophecy, sainthood, militarism, mysticism, asceticism, and martyrdom. In addition, by oscillating between close readings and contemporary scholarship about gender, feminism, masculinity, sexuality, and the body, looks beyond the world of antiquity. Aims to show how theories of and about sexuality and gender can fundamentally reorient understandings of Christian history. (Same as: REL 2235)

Previous terms offered: Spring 2020.

GSWS 2236 (c, IP) Gods, Goblins, and Godzilla: The Fantastic and Demonic in Japanese Literature and Film

Non-Standard Rotation. Enrollment limit: 35.

From possessing spirits and serpentine creatures to hungry ghosts and spectral visions, Japanese literary history is alive with supernatural beings. Our study will range from the earliest times to modernity, examining these motifs in both historical and theoretical contexts. The readings will pose the following broad questions: How do representations of the supernatural function differently in myths of the ancient past and narratives of the modern nation? Are monstrous figures cast as miscreants, or do these transgressive figures challenge societal orthodoxy? How do Buddhist ideas influence the construction of demonic female sexuality in medieval Japan, and how is this motif redrawn in modern Japan? How are sociopolitical anxieties articulated in horror films like Godzilla? This course will draw on various genres of representation, from legends and novels to art and cinema. Students will gain an understanding of the cultural history of the monstrous in Japan and develop a broad appreciation of the hold that these creatures from the "other" side maintain over our cultural and social imagination. (Same as: ASNS 2270)

Previous terms offered: Spring 2022, Spring 2020.

GSWS 2237 (b, IP) Family, Gender, and Sexuality in Latin America

Non-Standard Rotation. Enrollment limit: 35.

Focuses on family, gender, and sexuality as windows onto political, economic, social, and cultural issues in Latin America. Topics include indigenous and natural gender ideologies, marriage, race, and class; machismo and masculinity; state and domestic violence; religion and reproductive control; compulsory heterosexuality; AIDS; and cross-cultural conceptions of homosexuality. Takes a comparative perspective and draws on a wide array of sources including ethnography, film, fiction, and historical narrative. (Same as: ANTH 2737, LACL 2737)

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2019.

GSWS 2242 (c) Radicals, Feminists, Poets, Monsters, circa 1800

Non-Standard Rotation. Enrollment limit: 35.

Examines the rise of and reactions to radical literature in the wake of the French Revolution. Focuses on such topics as extravagant lyricism, anarchism, non-violent revolution, and the critique of marriage, family, male privilege, and patriarchal religious belief, as well as the defense of tradition and the depiction of revolution as monstrosity. Discusses radical rewritings of classical myth, the uses of fiction for political critique, and the intersections between sharp historical change and the emergence of the Gothic. Authors may include Burke, Blake, Wollstonecraft, Godwin, Percy Shelley, and Mary Shelley. (Same as: ENGL 2350)

Previous terms offered: Fall 2020, Fall 2018.

GSWS 2246 (b, DPI, IP) Anthropology of Care: Intimacy, Inequity, and Power

Krista Van Vleet.

Every Other Year. Spring 2023. Enrollment limit: 35.

Care shapes the relationships of children, adults, and elders within families, but care also extends far beyond the boundaries of households, incorporating domestic workers, medical professionals, missionaries, volunteers, NGOs, and governments. This course explores care as a form of intimate labor and an array of social practices that are embedded in local cultural contexts and shaped by global political economic relationships. Gender, race and ethnicity, class, nationality, (dis)ability, and age shape the configurations of caring by and caring for others. Incorporates attention to feminist, decolonial, and poststructuralist theories of power as operating on bodies, selves, and intimate relationships. Course texts include ethnographies, scholarly articles, and other materials. Draws on a wide array of contemporary contexts around the world for ethnographic case studies and challenges students to critically reflect on hierarchies of care in their own lives. (Same as: ANTH 2246)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or SOC 1101.

Previous terms offered: Spring 2020, Spring 2019.

GSWS 2247 (c) Modernism/Modernity

Marilyn Reizbaum.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the cruxes of the “modern,” and the term’s shift into a conceptual category rather than a temporal designation. Although not confined to a particular national or generic rubric, takes British and transatlantic works as a focus and includes fiction, poetry and visual art. Organized by movements or critical formations of the modern, i.e., modernisms, psychoanalysis, postmodernism, cultural critique, transnationalism. Readings of critical literature in conjunction with primary texts. Authors/directors/artists may include T. S. Eliot, James Joyce, Langston Hughes, Virginia Woolf, Katherine Mansfield, Zadie Smith, J. M. Coetzee, Roberto Bolaño, Man Ray, Stanley Kubrick. (Same as: ENGL 2451)

Previous terms offered: Fall 2020, Fall 2018.

GSWS 2248 (c) Family and Community in American History, 1600–1900

Non-Standard Rotation. Enrollment limit: 35.

Examines the social, economic, and cultural history of American families —across socio-economic classes, and among multiple racial, ethnic, and cultural groups—from 1600 to 1900, and the continuities, changes, and variations in the relationships between families and their kinship networks, communities, and the larger society. Topics include gender relationships; racial, ethnic, cultural, and class variations in family and community ideals, structures, and functions; the purpose and expectations of marriage; philosophies of child-rearing; organization of work and leisure time; and the effects of slavery and racial discrimination, industrialization, urbanization, immigration, and social and geographic mobility on patterns of family life and community organization. This course is part of the following field(s) of study: United States. (Same as: HIST 2128)

Previous terms offered: Fall 2020.

GSWS 2251 (c) Women in American History, 1600-1900

Every Other Year. Enrollment limit: 35.

A social history of American women from the colonial period through the nineteenth century. Examines women’s changing roles in both public and private spheres; the circumstances of women’s lives as these were shaped by class, ethnic, and racial differences; the recurring conflict between the ideals of womanhood and the realities of women’s experience; and focuses on family responsibilities, paid and unpaid work, religion, education, reform, women’s rights, and feminism. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2126)

Previous terms offered: Spring 2021, Spring 2019.

GSWS 2257 (c, DPI) White Negroes

Guy Mark Foster.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate seminar. Close readings of literary and filmic texts that interrogate widespread beliefs in the fixity of racial categories and the broad assumptions these beliefs often engender. Investigates whiteness and blackness as unstable and fractured ideological constructs that become most visible in narratives of racial passing. These are constructs that, while socially and historically produced, are no less real in their tangible effects, whether internal or external. May include works by Nella Larsen, Norman Mailer, John Howard Griffin, Mat Johnson, Toi Derricotte, and Mohsin Hamid. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2004, AFRS 2654)

GSWS 2258 (c, VPA) Women, Gender, And Sexuality in Western European and American Art, 1500 to Present

Non-Standard Rotation. Enrollment limit: 35.

This course will provide an introduction to the history of women as creators, subjects, and audiences of art in Western Europe and the United States from the Renaissance to the present. How do we (can we?) tell the stories of the forgotten people and identities of the past? What archives and artifacts are available, and how do we account for the gaps? How do we think historically about the variable categories of gender and sexuality? As we grapple with these questions, we will explore a wide range of methods and approaches to visual art that focus on questions of gender and sexuality in an intersectional context, and identify key concepts such as "bodies," "ideologies," and "identities." No previous work in art history required. (Same as: ARTH 2560, GER 2251)

Previous terms offered: Fall 2020, Fall 2018.

GSWS 2260 (c) African American Fiction: (Re) Writing Black Masculinities

Non-Standard Rotation. Enrollment limit: 35.

In 1845, Frederick Douglass told his white readers: "You have seen how a man was made a slave; you shall see how a slave was made a man." This simple statement effectively describes the enduring paradox of African American male identity: although black and white males share a genital sameness, until the nation elected its first African American president the former has inhabited a culturally subjugated gender identity in a society premised on both white supremacy and patriarchy. But Douglass's statement also suggests that black maleness is a discursive construction, i.e. that it changes over time. If this is so, how does it change? What are the modes of its production and how have black men over time operated as agents in reshaping their own masculinities? Reading a range of literary and cultural texts, both past and present, students examine the myriad ramifications of, and creative responses to, this ongoing challenge. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2650, AFRS 2650)

Previous terms offered: Fall 2021.

GSWS 2261 (c) Gender, Film, and Consumer Culture

Non-Standard Rotation. Enrollment limit: 35.

How do we spend money, and why? Examines the relationship between gender and consumer culture over the course of the twentieth century. Explores women's and men's relationships to consumer culture in a variety of contexts: the heterosexual household, the bachelor pad, the gay-friendly urban cafeteria, the advertising agency, and the department store. Also explores the ways in which Hollywood films, from the 1930s to the present, have both furthered and complicated gendered notions about the consumption of goods. (Same as: CINE 2261)

Previous terms offered: Spring 2020.

GSWS 2266 (c) The City as American History

Matthew Klinge.

Every Other Year. Spring 2023. Enrollment limit: 16.

Seminar. America is an urban nation today, yet Americans have had deeply ambivalent feelings toward the city over time. Explores the historical origins of that ambivalence by tracing several overarching themes in American urban history from the seventeenth century to the present. Topics include race and class relations, labor, design and planning, gender and sexual identity, immigration, politics and policy, scientific and technological systems, violence and crime, religion and sectarian disputes, and environmental protection. Discussions revolve around these broad themes, as well as regional distinctions between American cities. Students are required to write several short papers and one longer paper based upon primary and secondary sources. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2660, URBS 2660)

Previous terms offered: Spring 2019.

GSWS 2268 (b, IP) Saved By the Girl? Politics of Girlhood in International Development

Every Other Fall. Enrollment limit: 35.

In recent decades, girls' education and empowerment has emerged as a key site for investment and advocacy. Girls are often represented as having the potential to solve wide-ranging societal issues, from poverty to terrorism. Interrogates the current focus on girls in international development by examining its cultural politics. What kinds of knowledges about people in the global south are produced in/through girl-focused campaigns? What is highlighted and what is erased? What are the consequences of such representations? Examinations lead to an exploration of the different theories of 'girl,' 'culture,' 'empowerment,' 'rights,' and 'citizenship' that are operative in this discourse. Situates girl-focused campaigns within the broader politics of humanitarianism and asks critical questions about conceptualizations of 'freedom' and the constitution of the 'human'. To provide a more nuanced understanding of the lives of girls in the global south, brings to bear ethnographic studies from Pakistan, Egypt, India, and Nepal. (Same as: ASNS 2610)

Previous terms offered: Fall 2018.

GSWS 2270 (c) Spirit Come Down: Religion, Race, and Gender in America

Every Spring. Enrollment limit: 35.

Examines the ways religion, race, and gender shape people's lives from the nineteenth century into contemporary times in America, with particular focus on black communities. Explores issues of self-representation, memory, material culture, embodiment, and civic and political engagement through autobiographical, historical, literary, anthropological, cinematic, and musical texts. (Same as: AFRS 2271, REL 2271)

Previous terms offered: Spring 2021.

GSWS 2273 (c) The Woman's Film

Every Other Year. Enrollment limit: 35.

Concentrating in large part on the classical Hollywood period, we will explore films that center on women's experiences and that are (or seem to be) intended for a female audience. We will examine the genres of melodrama, film noir, gothic, and comedy in relation to the performance of female identity; representations of gender, class, race, and sexuality; and theories of spectatorial identification. The last part of the class will consider ways in which contemporary women's films draw on and reconfigure the themes brought up by earlier narratives. Directors might include Arzner, Cukor, Haynes, Hitchcock, Mankiewicz, Varda, and Vidor. (Same as: CINE 2270)

Previous terms offered: Spring 2021, Spring 2019.

GSWS 2280 (c, DPI) Black Sexualities

Keona Ervin.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Uses historical and contemporary case studies to explore the intersections of sexuality, gender, class, and race in the lives and labors of people African descent. Addresses how the construction of Black identity has been informed by understandings and expressions of transness, masculinity, femininity, and queerness. Examines how Black people mobilize and practice sex and gender to create community, mutual aid, leisure, joy, sexual agency, self-expression, and political struggle. Analyzes the topic through the interdisciplinary study of film, music, art, literature, historical and sociological scholarship, queer-of-color critique, critical race theory, and Black feminist thought.

GSWS 2283 (c) Interracial Narratives

Non-Standard Rotation. Enrollment limit: 35.

Violence and interracial sex have long been conjoined in U.S. literary, televisual, and filmic work. The enduring nature of this conjoining suggests there is some symbolic logic at work in these narratives, such that black/white intimacy functions as a figural stand-in for negative (and sometimes positive) commentary on black/white social conflict. When this happens, what becomes of "sex" as a historically changing phenomenon when it is yoked to the historically unchanging phenomenon of the "interracial"? Although counter-narratives have recently emerged to compete with such symbolic portrayals, i.e. romance novels, popular films and television shows, not all of these works have displaced this earlier figural logic; in some cases, this logic has merely been updated. Explores the broader cultural implications of both types of narratives. Possible authors/texts: Richard Wright, Chester Himes, Ann Petry, Lillian Smith, Jack Kerouac, Frantz Fanon, Kara Walker, Amiri Baraka, Alice Walker, Octavia Butler, John R. Gordon, Kim McLarin, *Monster's Ball*, *Far From Heaven*, and *Sex and the City*. (Same as: ENGL 2653, AFRS 2653)

Previous terms offered: Fall 2019.

GSWS 2292 (c, IP) Goddesses, Gurus, and Rulers: Gender and Power in Indian Religions

Non-Standard Rotation. Enrollment limit: 35.

Provides a historical perspective on how gender and power have intertwined in the diverse religious traditions of India. Explores ideas about femininities, masculinities, and genderqueer identities in religious texts and premodern religious communities, analyzing the influence of monastic ideals, economic patronage, and gendered notions of divine authority. Readings examine mythology, rituals, and ideas about gender and social power in Hindu, Buddhist, Jain, and Muslim traditions; including gender roles in family and culture; transgender identity and religion; and, in the latter part of the course, the impacts of colonialism, nationalist politics, and migration on gender and religion. (Same as: REL 2280, ASNS 2740)

Previous terms offered: Fall 2020, Spring 2019.

GSWS 2294 (c) Issues in Hip-Hop II

Non-Standard Rotation. Enrollment limit: 35.

Traces the history of hip-hop culture (with a focus on rap music) from the 1990s to the present day. Explores how ideas of race, gender, class, and sexuality are constructed and maintained in hip-hop's production, promotion, and consumption, and how these constructions have changed and/or coalesced over time. Investigates hip-hop as a global phenomenon and the strategies and practices of hip-hop artists outside of the United States. Artists investigated range from Iggy Azalea to Jay-Z, Miz Korona to Ibn Thabit. (Same as: MUS 2294, AFRS 2294)

Prerequisites: MUS 1292 (same as AFRS 1592 and GWS 1592).

Previous terms offered: Spring 2019.

GSWS 2315 (c, IP) Love, Sex, and Desire in Russian Literature and Culture

Non-Standard Rotation. Enrollment limit: 35.

Russian culture is rich with depictions of the fundamental human experiences of love, sex, and desire. And while these depictions have often been subject to various forms of censorship, they have just as often served as expressions of dissent against rigid social, political, and artistic norms. This course explores the ideological and aesthetic significance of such themes as romance, lust, yearning, sexual violence, adultery, prostitution, religious passion, poetic inspiration, unrequited love, celibacy, gender identity, sexuality, masturbation, pornography, body image, sexual frustration, castration, and witchcraft in Russian literature and the arts from medieval times to the present day. Not only do the works studied inscribe "difference" on the bodies of their subjects, but Russia also functions as a social "other" against which students examine their own cultural assumptions. Authors may include Avvakum, Bulgakov, Chekhov, Dostoevsky, Gogol, Nabokov, Pushkin, Tolstoy, Tsvetaeva, Turgenev, and Zamyatin. Taught in English. (Same as: RUS 2315)

Previous terms offered: Fall 2019.

GSWS 2320 (c, DPI, VPA) Gender and Sexuality in Teen Cinema

Angel Matos.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

How does the figure of the teen mobilize different ideologies of gender, sexuality, and queerness in various genres of film? How do contemporary sociocultural circumstances affect the creation, reception, and interpretation of teen films produced throughout the decades? In this course, students will examine how different films frame, approach, and at times misrepresent adolescent experience. Students will explore how understandings of adolescence, gender, and sexuality have shifted over the decades, how teen sexuality is visually aestheticized, and how representations of gender and teen sexuality are inflected by other domains of identity such as race and class. In addition to learning how to "close read" these films, taking notions such as editing, sound, form, and style into consideration, students will explore and apply queer and feminist frameworks to unlock innovative and politically viable ways of critiquing these so-called vapid and uncritical cultural productions. Attendance at weekly evening screenings is mandatory. (Same as: CINE 2141)

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Fall 2020.

GSWS 2345 (b, IP) Gender, Race, and Citizenship in Brazil

Jay Sosa.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course examines how hierarchies of race, class, gender, and sexuality structure everyday life in Latin America's largest nation, Brazil. Twentieth century elites described Brazil as a racial democracy and a sexual paradise, but this vision is increasingly contested in the twenty-first century by Black, feminist, and LGBT social movements. Reading ethnographic accounts and watching film portrayals of daily life in Brazil across a number of case studies, we will examine how Brazilians encounter social inequality in a variety of intimate settings. Potential topics include: domestic labor, sex work, queer activism, plastic surgery and reproductive rights. Students will complete short response papers during the semester and complete a final research project on a self-selected topic that includes primary or secondary sources on Brazil. (Same as: ANTH 2345, LACL 2345)

Previous terms offered: Spring 2021, Fall 2020.

GSWS 2410 (c, VPA) Post-Soviet Russian Cinema

Non-Standard Rotation. Enrollment limit: 35.

Newly freed from censorship, Russian filmmakers in the quarter-century between 1990 and 2015 created compelling portraits of a society in transition. Their films reassess traumatic periods in Soviet history; grapple with formerly taboo social problems such as alcoholism, anti-Semitism, and sexual violence; explore the breakdown of the Soviet system; and critique the darker aspects of today's Russia, often through the lens of gender or sexuality—specifically addressing subjects such as machismo, absent fathers, rape, cross-dressing, and birthing. Central are the rapid evolution of post-Soviet Russian society, the emergence of new types of social differences and disparities and the reinvention of old ones, and the changing nature of social roles within the post-Soviet social fabric. Taught in English. (Same as: RUS 2410, CINE 2602)

Previous terms offered: Spring 2019.

GSWS 2426 (c) The Horror Film in Context

Non-Standard Rotation. Enrollment limit: 35.

Examines the genre of the horror film in a range of cultural, theoretical, and literary contexts. Considers the ways in which horror films represent violence, fear, and paranoia; their creation of identity categories; their intersection with contemporary politics; and their participation in such major literary and cinematic genres as the gothic, comedy, and family drama. Texts may include works by Craven, Cronenberg, De Palma, Freud, Hitchcock, Kristeva, Kubrick, Poe, Romero, and Shelley. Note: Fulfills the film theory requirement for Cinema Studies minors. (Same as: ENGL 2426, CINE 2426)

Previous terms offered: Fall 2021, Fall 2019.

GSWS 2430 (c, IP) Gendering Latin American History

Every Other Spring. Enrollment limit: 35.

An introduction to Latin American history between 1400 and the present, using the lens of gender to reinterpret the region's history. Some key events include the arrival of Europeans, mestizaje, honor and race, independence, civil wars, liberalism, populism, dictatorship, and issues of memory and redemocratization. This course works on two registers. The first is that of "women's history." Here, we will survey the experiences and impact of women in Latin America from the pre-conquest period to the present, through the lenses of cultural, social, and political history. In other words, we will tell the stories of Latin American women and investigate how changes small and large affected their everyday lives. The second register is "gender history." In other words, we will not just discuss women's experiences, but also the ways that gender ideologies have influenced Latin American history. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2430, LACL 2420)

Previous terms offered: Spring 2020.

GSWS 2450 (c, IP) Sex, Scandal, and Celebrity in Early Modern Europe

Meghan Roberts.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Uses major scandals and cults of celebrity to illuminate the cultural history of early modern Europe. Questions include: What behaviors were acceptable in private but inexcusable in public? Why are people fascinated by scandals and celebrities, and how have those categories evolved over time? How have the politics of personal reputation changed with the rise of new media and new political cultures? Topics include gossip, urban spaces, gender, sex, crime, and religion. Uses a variety of materials, such as cartoons, newspaper articles, trial transcripts, memoirs, and novels, to explore the many meanings of scandal in early modern Europe, especially France and England. Note: This course is part of the following field(s) of study: Europe. It also fulfills the pre-modern requirement for history majors and minors. (Same as: HIST 2540)

Previous terms offered: Spring 2021, Fall 2020.

GSWS 2453 (c) "Words are all we have": The Irish Story

Marilyn Reizbaum.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course considers the storied nature of ideas about Ireland through the consideration of a variety of Irish artists. Part of the aim of the course is to register the changes in the ways Irish letters have been reimagined by writers and critics in the last 50 years. In this iteration, we will be focusing on Samuel Beckett's oeuvre, which includes prose, drama (famously and notoriously, *Waiting for Godot*), essays, radio, and film (e.g., *Film with Buster Keaton* in 1964). He has been designated a modernist, a postmodernist and not Irish at all, having lived in France for most of his writing life: "exile was a condition of Being." Beckett's reach has been enormous: his work has been the subject of numerous critical thinkers in the last century, including Theodor Adorno and Jacques Lacan, whom we will read. We will look at his Irish contemporaries, including James Joyce, Sean O'Casey, Edna O'Brien, and outside impact on e.g. J.M. Coetzee, Maggie Nelson, and painters such as Jasper Johns. (Same as: ENGL 2453)

Previous terms offered: Spring 2021.

GSWS 2454 (c) The Modern Novel or What the Novel Thinks

Marilyn Reizbaum.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

An abiding description of the dramatically carnivalesque Circe chapter of James Joyce's *Ulysses* is as the "unconscious" of the novel. This is provocative in a number of ways, not least of which through its suggestion that the novel, rather than a character or narrator per se, has a mind, which can both think and suppress thought. Such an idea represents a turn on the classic modernist technique of "stream of consciousness" or postmodern concept of "metafiction." Another staple comment about Joyce's novel suggests that the novel reads its readers, as well as, or better than, the other way around. This course will examine these ideas of novelistic knowingness through several modern and contemporary novels, drawing on a variety of narrative theories, cognitive and affect theories, and psychoanalysis. Possible authors include Ian McEwan, Virginia Woolf, Vladimir Nabokov, W. G. Sebald, J.M. Coetzee, Theresa Hak Kyung Cha, Ali Smith, Zadie Smith, Muriel Spark, Roberto Bolaño, Franco Moretti, Roland Barthes. (Same as: ENGL 2454)

GSWS 2505 (c, VPA) Geographies of the Sexiness: Dance and Politics of (Dis)Respectability Across the Americas

Every Spring. Enrollment limit: 16.

Dance—an art form whose medium is the body—and ethnography—the study of people and their cultures—are great tools for addressing some of the ways different dancing bodies have been historically policed for "dancing sex(y)." Other tools, such as critical dance and black theories, in addition to queer and feminist approaches, will also be utilized to comprehend the uneven ways these bodies are further racialized, sexualized, and gendered within the Americas. In particular, students will learn about various dances (such as the Brazilian samba to the Cuban rumba, Jamaican Dancehall, and the Trinidadian wine) through readings, lectures, and actual in-studio dancing. Ultimately, the intention here is to understand dancing as both a meaning-making activity and a way of understanding the world. In turn, it is an important lens for critically thinking, talking, researching, and writing about politics of identity (especially regarding nationality, gender, race, and sexuality). (Same as: DANC 2505, AFRS 2292, LACL 2392)

Previous terms offered: Spring 2021, Spring 2019.

GSWS 2548 (c) Wild Things: Gender, Sexuality, and Wilderness

Non-Standard Rotation. Enrollment limit: 35.

Examines how ideas of wildness and wilderness have been used to generate different gender and sexual identities and politics through literature and other cultural forms in the United States. Considers wilderness and wildness in relation to rugged individualism; transgressive sexualities; representations of health, disease, and disability; the extension of and resistance to state control of the body; and the intersections of gender, sexuality, race, and class. Students will learn how the idea of wilderness has been associated with and adopted by different bodies and identities over time, from the early European colonists' first encounter with Indigenous peoples and the American continent to the twenty-first century, which scientists have characterized as the era of the sixth mass extinction. Readings include canonical works of wilderness writing and lesser-known texts, including queer pastorals, feminist travelogues, and HIV/AIDS memoirs. (Same as: ENGL 2548, ENVS 2548)

Previous terms offered: Spring 2020.

GSWS 2554 (c) Classic Twentieth-Century LGBT Cultural Texts

Non-Standard Rotation. Enrollment limit: 35.

Analyzes some of the most enduring, and in some cases infamous, lesbian and transgendered cultural texts of the twentieth century. Whether authored by avowed LGBT authors or by non-LGBT cultural producers, such works reflect some of the specific challenges that U.S. and European writers and others have continued to face in depicting portrayals of same-sex identities and desires that seek to reject totalizing narratives of pathology and criminalization. Possible texts include: *The Well of Loneliness*, *Death in Venice*, *Giovanni's Room*, *The Boys in the Band*, *The Front Runner*, *Stone Butch Blues*, *Hitchcock's Rope*, *The Children's Hour*, *Will and Grace*, and *Six Feet Under*. (Same as: ENGL 2554)

Previous terms offered: Spring 2020.

GSWS 2601 (c) History of Women's Voices in America and at Bowdoin

Every Other Year. Enrollment limit: 16.

Seminar. Examines women's voices in America from 1650 to the early twenty-first century, as these were written and saved in private letters, journals, and autobiographies; poetry, short stories, and novels; essays, addresses, prescriptive literature, and journalism. In celebration of 50 years of Women at Bowdoin, the course will culminate with an examination of women's voices at Bowdoin, using the "Forty Years: The History of Women at Bowdoin" website as both a source and a guide to further readings. Articles and monographs from the secondary literature provide a historical framework for examining women's writings. Research projects focus on the form and content of women's writing and the ways that these accounts illuminate women's understandings, reactions, and responses to their historical situation. Note: This course is part of the following field(s) of study: United States. (Same as: HIST 2609)

Previous terms offered: Spring 2022, Spring 2020.

GSWS 2602 (c) Science and Art of the Sex Photograph

Non-Standard Rotation. Enrollment limit: 16.

Intermediate seminar. Explores the way in which late nineteenth- and early twentieth-century scientific uses of the photograph (e.g., by scientism, eugenics) to configure sexuality and gender were adjusted by modern visual arts and literary photographs. We will consider a variety of early scientific studies, contemporary theories of sexuality and biopolitics (Foucault), and of photography (Benjamin, Barthes, Sontag); photographs by Man Ray, Claude Cahun, Gordon Parks (with Ralph Ellison), Catherine Opie; film by Michelangelo Antonioni ("Blow-up"); prose works by Virginia Woolf, W.G. Sebald, Claudia Rankine. (Same as: ENGL 2011)

Previous terms offered: Fall 2020.

GSWS 2610 (b) Sex and State Power

Jay Sosa.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Seminar. Examines sexual politics of the law, policing, public health, and state surveillance as they intersect with race, gender, class and disability. Explores feminist and queer responses to the relationship between sex and power from a variety of disciplines and traditions. Focuses on two major trends in the regulation of sex in the twentieth and twenty-first centuries: (1) how policy making has shifted from defining sexual morality to managing populations, and (2) the reinvigorated politics of the family as governments scale back their social welfare programs. Additional topics may include reproductive rights, sex work, marriage, hate crimes, surveillance, militarism, and prisons. Students learn main trends in the politics of sexuality and conduct guided research on the topic of their choice. (Same as: ANTH 2610)

Previous terms offered: Fall 2018.

GSWS 2651 (c, DPI) Queer Race

Guy Mark Foster.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

How does the concept of queerness signify in cultural texts that are ostensibly about the struggle for racial equality? And vice versa, how does the concept of racialization signify in cultural texts that are ostensibly about the struggle for LGBT recognition and justice? While some of this work tends to reduce queer to traditional sexual minorities like lesbian and trans folk while downplaying racial considerations, others tend to limit the category race to people of color like blacks while downplaying questions about sexuality. Such critical and creative gestures often place queer and race in opposition rather than as intersecting phenomena. Students examine the theoretical and cultural assumptions of such gestures, and their implications, through close readings of selected works in both the LGBT and African American literary traditions. Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2651, AFRS 2651)

GSWS 2660 (c) Romantic Sexualities

David Collings.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Intermediate seminar. Investigates constructions of sexuality in English romantic writing, especially tales of seduction by supernatural or demonic figures; the sexualized world of the Gothic; the Byronic hero; lyrical depictions of incest; the yearning for an eroticized muse or goddess; and same-sex desire in travel writing, diaries, and realist fiction. Discusses the place of such writing in the history of normative and non-normative sexual identities, repression, the unconscious, and the sublime. Authors may include Burke, Lewis, Mary Shelley, Byron, Wollstonecraft, Lister, Austen, Coleridge, and Keats, with further readings in queer theory and the history of sexuality. (Same as: ENGL 2014)

Previous terms offered: Spring 2021, Spring 2019.

GSWS 2670 (b) Chemical Bodies: Gender, Sexuality and Pharmaceutical Science

Jay Sosa.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

The era of industrial chemistry, beginning in the late 19th century, has altered sexuality and gender expression in profound ways. Pharmaceuticals now promise consumers better sex lives, manageable reproductive health, and a fuller range of gender expression. But they also entrench some of the most intimate aspects of modern life deeper into market logics and biomedicine. In this class, we draw on social studies of science, technology, and medicine as well as from feminist and queer studies. We read and discuss ethnographic and qualitative case studies on contraceptive access, gender affirming therapies, and recreational drug use. Students are invited to consider the material from empirical perspectives (what can chemicals permit bodies to do?) and political perspectives (what separates 'medicines' and 'patients' from 'drugs' and 'criminals'?). Coursework includes mid-length reflection papers and an archival research project using the College's digital collections.

GSWS 2701 (b, DPI) Muslim Women: Contemporary Challenges and Activism

Non-Standard Rotation. Enrollment limit: 16.

Explores contemporary debates on gender and sexuality in Islam. Begins with an examination of gender and sexuality in the Quran to understand how these ideas have been taken up in the past and present to produce and maintain gender hierarchies. At the same time, it also centers contemporary challenges posed to these hierarchies. To do so, we pay particular attention to Muslim women's activism by centering ethnographic studies from Muslim-majority as well as diasporic contexts. A major thrust of the course is studying the lifeworlds of Shia Muslim women (a minority interpretive community within Islam). Seminar-style course.

Prerequisites: GSWS 1000 or higher.

Previous terms offered: Fall 2020, Spring 2020.

GSWS 2704 (c, DPI) Queer Latinx Literature and Culture

Non-Standard Rotation. Enrollment limit: 16.

This seminar examines representations of queer Latinx identities and experiences through intersectional and interdisciplinary lenses, focusing on texts crafted by US-based Latinx authors. Students develop an understanding of the aesthetic and ideological elements that inform the narrativization of queer Latinx experience and the tensions that arise through the intersection of sexuality, gender, race, and ethnicity in a variety of texts and genres. In addition to highlighting the value of reading literature written by authors who belong to the marginalized groups that they write about, this course is meant to disrupt monolithic and homogenizing understandings of what it means to be queer and Latinx. Potential topics include futurism, la familia, borderlands, machismo and patriarchy, the coming-out narrative, and memory. This course satisfies the African American, Asian American, Indigenous, Latinx, Multiethnic American, or global literature requirement for English majors. (Same as: ENGL 2904, LACL 2304)

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher or ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Spring 2022.

GSWS 2705 (c, DPI, IP) Activism and Human Rights in Latin America

Non-Standard Rotation. Enrollment limit: 16.

What is the relationship between activism and human rights in Latin America? How have the battling constructions of race, gender, and ethnicity sparked social justice movements in the region? This course offers a general introduction to the development of contemporary discourses and activism on human rights in Latin America. It covers activist and justice movements in a variety of Latin American countries and regions including Brazil, Guatemala, the Southern Cone, and Mexico. Students will analyze how cultural production, in the form of film, literature, testimony, and art, by Afro-Latinx and indigenous subjects, women, and members of the LGBTQI+ community led to the "making" of human rights in the region. As an IRBW course, students in this course will also develop and practice their critical writing and research skills throughout the semester with plenty of research development writing workshops, one-on-one writing mentoring, and feedback. (IRBW) (Same as: LACL 2375)

Previous terms offered: Fall 2021.

GSWS 2710 (b, IP) The World's Most Dangerous Place?: Gender, Islam, and Politics in Contemporary Pakistan

Non-Standard Rotation. Enrollment limit: 16.

This course engages in an academic study of the gender, religion, and politics in Pakistan to deepen students' understanding of the world's sixth-most populous country. We begin with accounts of the British colonization of South Asia and the nationalist movements that led to the creation of Pakistan. We then consider the myriad issues the nation has faced since 1947, focusing in particular on the debates surrounding sovereignty, gender and Islam. In addition to historical and ethnographic accounts, the course will center a number of primary texts (with English translations) including political autobiographies, novels, and terrorist propaganda materials. (Same as: ASNS 2611)

Previous terms offered: Spring 2021.

GSWS 2715 (b, DPI, IP) Sex Wars in the Americas

Non-Standard Rotation. Enrollment limit: 16.

What motivates political battles over sexuality and gender? Often described as disputes over culture, morality, family, or lifestyle, these struggles more often have to do with concerns over national belonging, distributions of care labor, and enforcement of race, class, and gender norms. In this course, we first learn about feminist and queer frameworks for studying gender and sexuality politics: culture wars, backlashes, and moral panics. We draw on case studies that outline the histories of anti-reproductive and anti-LGBT movements in Brazil and in the United States. And we will consider the social dynamics of recent "anti-gender" movements in Latin America. Over the semester, students will research a particular case study of a culture war, backlash, or moral panic, where they use journalist and NGO reporting, and write a term paper that applies the frameworks learned in class. (IRBW) (Same as: LACL 2347)

Prerequisites: GSWS 1101 or ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2021.

GSWS 2720 (c, DPI, VPA) Between the Alamo and the Wall: Latinx Activism in the United States

Non-Standard Rotation. Enrollment limit: 35.

This course explores the range of issues inspiring Latinx activism and its diverse expressions across the United States from the turn of the 20th century to the present. It introduces students to the intellectual traditions and analytical approaches that inform both Latinx and Afro-Latinx activism in the US. During the course of the semester students will 'travel' to U.S. cities (and regions) such as San Antonio and the Texas Borderlands, Los Angeles, Miami, New York, Chicago, and the Central Valley in California. As we 'travel' to these locations, we will explore diverse expressions of Latinx activism, including labor activism, cultural activism, political activism surrounding citizenship rights, and the struggles for gender and sexuality rights. Students will also learn about the many similarities and differences among Latinx communities in the United States, including Afo-Latinx communities, specifically Afro-Cuban in Miami, and Afro-Puerto Ricans and Afro-Dominicans in New York. We will explore how these communities have used and continue to use activist practices ranging from labor strikes to literary texts, to gain visibility and negotiate their rights within the country. This course will also draw connections between Latinx and Afro-Latinx and other activist movements in the US, from civil rights to labor rights and the formation of worker's unions. Drawing from various disciplines including history, law, literature, sociology, and cultural studies, students will explore how Latinx activism has shaped understandings of race and inclusion, gender, sexuality, and citizenship in the United States. (Same as: LACL 2421, AFRS 2721)

Previous terms offered: Spring 2022.

GSWS 2745 (c, IP) The Tigress' Snare: Gender, Yoga, and Monasticism in South and Southeast Asia

Non-Standard Rotation. Enrollment limit: 35.

There is no dearth of stories regarding the dangers of women and sexuality for Hindu, Buddhist, Jain, and Nath yogis and ascetics. Texts after texts written on ancient, classical, and early modern Asian monasticism point to the evil of women and the dangers they pose to those attempting to live monastic lives. Women, however, have historically been and continue to be involved in these religious traditions. This class will examine the highly gendered worldview found within South and Southeast Asian yogic and monastic texts. Primarily reading Hindu, Nath yogi, Jain, and Buddhist canonical teachings, the class will discuss the manner in which women have historically been viewed within these religious traditions. It will then shift to look at the manner in which women have been and continue to take part in these communities in their everyday life. Through the use of both academic readings and multimedia texts, the class will examine how women navigate their roles within these male-dominated communities, their reasons for joining these communities, and the differences that exist for women within the different monastic and yogic communities. (Same as: ASNS 2745, REL 2745)

Previous terms offered: Spring 2020, Spring 2019.

GSWS 2750 (c, VPA) Disruptive Play: Approaching Video Games as a Queer Archive

Angel Matos.

Every Other Year. Spring 2023. Enrollment limit: 35.

Video games share a complicated history with oppressive forces such as hypermasculinity, violence, misogyny, and homophobia—one that often overshadows the queer, playful, and radical legacy associated with video game design, play, and culture. Video games present us with opportunities to think beyond the injustices prevalent in our current moment and to recognize how interactive digital play can disrupt normative thinking and practices. Drawing from video game studies and queer frameworks, we will rethink the history of video games through a gendered lens and examine games overtly focused on queer lives and practices. We will also think more broadly about how all video games function as an interactive archive that disrupts normative conceptions of gender, sexuality, kinship, identity, space, time, and the body. Some familiarity with video game play is recommended for this course and assignments will involve podcast recording, video recording, and basic video game programming.

GSWS 3015 (c) James Baldwin

Non-Standard Rotation. Enrollment limit: 15.

Examines the major postwar writings of the controversial African American author and the role his fiction and nonfiction played in challenging that era's static understandings of racial, gender, and sexual politics. Although Baldwin lived abroad for much of his life, many critics associate the author narrowly with the United States black civil rights and sexual liberation struggles. In recent years, however, Baldwin has increasingly been recognized as a transnational figure and for his invaluable contributions to the discourse of globalization. Indeed, Baldwin's "geographical imagination," one informed by critical racial literacy, led him to anticipate many of the central insights of contemporary Queer Studies, Whiteness Studies, as well as Africana philosophical thought. Note: Beginning with the Class of 2025, this class will fulfill the African American, Asian American, Indigenous, Latinx, multiethnic American, or global literature requirement for English majors. (Same as: ENGL 3015, AFRS 3015)

Prerequisites: ENGL 2000 - 2969 or AFRS 2000 - 2969 or GLS 2000 - 2969 or GSWS 2000 - 2969.

Previous terms offered: Spring 2022.

GSWS 3020 (c, DPI, IP) African Women as Peacemakers

Donato Fhunsu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Advanced seminar on African women's studies and peace studies. Given their various stakes, women in African societies have always been peacemakers. In exploring these stakes, this seminar focuses on the lives and writings of six African women intellectuals (Yvonne Vera, Bessie Head, Mariama Bâ, Wangari Maathai, Ellen Johnson Sirleaf, and Leymah Gbowee), three of whom have won the Nobel Peace Prize. Students will investigate how these women and the stories they tell reconceptualize feminism and peaceful interactions among themselves and others (women, men, and the environment) in order to bring about individual transformation. By perceptively reading challenging texts, engaging in probing class discussions, keeping a weekly written "Peace Journal," and working collaboratively on a final group research with oral presentation, students will gain experiential insight into ideals and realities of the African women to reimagine feminism, peace, and relationships amid violence. (Same as: AFRS 3210)

Previous terms offered: Fall 2021.

GSWS 3037 (c) The Female Gothic in Literature and Film

Non-Standard Rotation. Enrollment limit: 16.

In her memoir, *In the Dream House*, author Carmen Maria Machado defines the female gothic as consisting of "woman plus habitation." In this class, we will examine literary and cinematic texts that represent the endangerments faced by women in architectural and social spaces. We will explore the affects of fear and paranoia and their relationship to domesticity, as well as the ways in which more recent modes of the gothic have shifted their concerns to intersectional identities. Authors and directors may include Ari Aster, Alfred Hitchcock, Shirley Jackson, Henry James, Carmen Maria Machado, Toni Morrison, Jordan Peele, and Silvia Moreno-Garcia. Fulfills the advanced seminar requirement for English majors and Cinema Studies minors and the theory requirement for Cinema Studies minors. (Same as: ENGL 3037, CINE 3037)

Prerequisites: ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher or CINE 1000 - 2969 or CINE 3000 or higher.

Previous terms offered: Spring 2022.

GSWS 3103 (c) Gender, Sexuality, and Popular Music

Tracy McMullen.

Every Other Year. Spring 2023. Enrollment limit: 15.

Employs gender as a theoretical tool to investigate the production, consumption, and representation of popular music in the United States and around the world. Examines how gender and racial codes have been used historically, for example to describe music as "authentic" (rap, rock) or "commercial" (pop, new wave), and at how these codes may have traveled, changed, or re-appeared in new guises over the decades. Considers how gender and sexuality are inscribed at every level of popular music as well as how music-makers and consumers have manipulated these representations to transgress normative codes and open up new spaces in popular culture for a range of sexual and gender expressions. Juniors and seniors only; sophomores admitted with consent of the instructor during the add/drop period. (Same as: MUS 3103)

GSWS 3211 (c) Bringing the Female Maroon to Memory: Female Marronage and Douboutism in French Caribbean Literature

Non-Standard Rotation. Enrollment limit: 16.

History has retained the names of great male Caribbean heroes and freedom fighters during slavery such as the Haitians, Mackandal or Toussaint Louverture, the Jamaican, Cudjoe or the Cuban Caba. Enslaved Africans who rebelled against oppression and fled from the plantation system are called maroons and their act, marronage. Except for Queen Nanny of the Jamaican Blue Mountains, only male names have been consecrated as maroons. Yet, enslaved women did fight against slavery and practice marronage. Caribbean writers have made a point of bringing to memory forgotten acts of marronage by women during slavery or shortly thereafter. Proposes to examine the fictional treatment French-speaking Caribbean authors grant to African or Afro-descent women who historically rebelled against slavery and colonization. Literary works studied against the backdrop of douboutism, a conceptual framework derived from the common perception about women in the French Caribbean which means strong woman. Authors studied may include Suzanne Dracius (Martinique), Fabienne Kanor (Martinique), André Schwart-Bart (Guadeloupe), Maryse Condé (Guadeloupe), Evelyn Trouillot (Haiti). Conducted in French. (Same as: FRS 3211, AFRS 3211, LACL 3211)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2021.

GSWS 3226 (c) A Body "Of One's Own": Caribbean and Latinx Women Writers

Non-Standard Rotation. Enrollment limit: 16.

What kind of stories do bodies tell or conceal? How does living in a gendered and racialized body effects the stories told by women? How do bodies and their stories converge with History or complicate historical "truths"? These are some of the questions addressed in this study of contemporary writing by women from the Hispanic Caribbean and the United States Latinx/Chicana communities. Feminists of color frame the analysis of literature, popular culture and film to guide an examination of the relation of bodies and sexuality to social power, and the role of this relation in the shaping of both personal and national identities. Theorists include Alexander, Barribeau, Curiel, Mendez and Segato. Novelists include Álvarez, Buitrago, García, Indiana Hernández, and Santos-Febres. Taught in Spanish with readings in Spanish and English. (Same as: HISP 3226, AFRS 3226, LACL 3226)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2020.

GSWS 3231 (c, DPI, IP) Sor Juana and María de Zayas: Early Modern Feminisms

Margaret Boyle.

Every Other Year. Fall 2022. Enrollment limit: 16.

Did feminism exist in the early modern period? Examines key women authors from the early Hispanic World, considering the representation of gender, sexuality, race, and identity in distinct political and social contexts. Focuses on Mexican author Sor Juana Inés de la Cruz (1651-1695) and Spanish author María de Zayas (1590-1661), alongside other prominent women writers from the period. Students read short stories, essays, poems, and personal letters. Conducted in Spanish. (Same as: HISP 3231, LACL 3231)

Prerequisites: HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410).

Previous terms offered: Spring 2019.

GSWS 3301 (b) Doing Gender Studies: Intimacy and Consumer Objects
Every Spring. Enrollment limit: 12.

Capstone Seminar. This course examines how consumer objects shape our senses of self, gender norms, bodily practices and erotic desires. We consider how gender and sexuality are shaped by material culture in an age of mass production. We consider pharmaceuticals, beauty products, sex toys, homemaking, and dating apps. Students take turns leading class discussions around readings, and organize an end-of-year conference on intimacy and consumer objects.

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GSWS 3302 (b) The Economics of the Family
Non-Standard Rotation. Enrollment limit: 18.

Seminar. Microeconomic analysis of the family, gender roles, and related institutions. Topics include marriage, fertility, married women's labor supply, divorce, and the family as an economic organization. (Same as: ECON 3531)

Prerequisites: Two of: ECON 2555 and either ECON 2557 or ECON 3516.

Previous terms offered: Spring 2022, Fall 2019.

GSWS 3310 (c) Gay and Lesbian Cinema
Non-Standard Rotation. Enrollment limit: 16.

Considers both mainstream and independent films made by or about gay men and lesbians. Four intensive special topics each semester, which may include classic Hollywood stereotypes and euphemisms; the power of the box office; coming of age and coming out; the social problem film; key figures; writing history through film; queer theory and queer aesthetics; revelation and revaluations of film over time; autobiography and documentary; the AIDS imperative. Writing intensive; attendance at evening film screenings is required. Note: Fulfills the film theory requirement for cinema studies minors. (Same as: CINE 3310)

Prerequisites: CINE 1000 or higher.

Previous terms offered: Fall 2019.

GSWS 3340 (c) Identity Crossroads: Gender and Space

Angel Matos.

Every Other Year. Spring 2023. Enrollment limit: 16.

Capstone seminar. How have spaces such as bathrooms and public restrooms been central for the advancement of feminist, queer, and trans visibility and mobility? In what ways can video games push us to think more imaginatively and critically about how bodies dwell through space? How do films and television shows use space to stage different intersections of identity and oppression? Drawing from diverse and interdisciplinary fields, this seminar examines the different ways in which spaces and identities are mutually configured. Through engagement in a series of case studies, we will explore the value of gendered, spatial inquiry and its potential to complicate normative understandings of being, dwelling, mobility, and place. Throughout the semester, students will develop independent research focused on gender and space, which will be shared in a narrativized end-of-year presentation.

GSWS 3350 (c, DPI, VPA) Desire and Difference: Exploring Gender, Sexuality, and Race in Medieval Art
Non-Standard Rotation. Enrollment limit: 12.

Gender, sexuality, race, and other aspects of identity have come to play a huge role in our public and private lives, and these same issues can be key to understanding how people lived and understood their lives in the past. Through in-class discussion and individual research projects, students in this seminar examine intersections of these concerns with the visual arts produced in medieval Europe and the Mediterranean region (c. 500 –c. 1500), gaining a deeper and richer understanding of how people in the past imagined and depicted themselves and their lives, and negotiated their senses of identity. Specific topics covered will include representations of women and minoritized groups, the roles played by women as makers and patrons of art, and the relevance of modern categories of sexuality, gender, and race in the context of medieval studies. (Same as: ARTH 3350)

Previous terms offered: Fall 2021, Spring 2019.

German

Overview & Learning Goals

Overview

The German department offers courses in the language, literature, and culture of the German-speaking countries of Europe. The program is designed for students who wish to become literate in the language and culture, comprehend the relationship between the language and culture, and gain a better understanding of their own culture in a global context. The major is a valuable asset in a wide variety of postgraduate endeavors including business, science, and international careers; and in law and graduate school.

Learning Goals

The major enables students to become literate in German and competent in the cultures of Germany, Austria, and Switzerland through critical engagement with texts, cultural objects, and practices.

In the process, students acquire fundamental knowledge of major literary, social, and political developments and become able to communicate the historical significance and transnational impact of the German-speaking world.

Upon completion of the German major, students will be able to converse in German on a wide range of topics—including academic topics—to comprehend and analyze German texts, and to write critically. They can effectively articulate and carry out research.

All courses place equal importance on the acquisition of linguistic and cultural knowledge, with increasing complexity and sophistication.

GER 1101 Elementary German I/GER 1102 Elementary German II: Communication: Recognize and reproduce patterns of vocabulary and grammatical structure; paraphrase in order to demonstrate understanding; produce simple declarative statements, describe people and places, transition to narrative comprehension (identify key passages and vocabulary structures when reading a text) and narrative production.

Cultural Competency: Discover and explore historical and cultural facts.

GER 2203 Intermediate German I: Germany within Europe/GER 2204 Intermediate German II: German History through Visual Culture/GER 2205 Advanced German Texts and Contexts:

Communication and cultural competency become increasingly integrated: students recognize, differentiate, and produce texts of different genres, identify and apply linguistic nuance, and differentiate language use. They demonstrate knowledge via oral presentations and short papers and analyses; they engage in critical discussion with peers. Students deepen their cultural knowledge by exploring key themes such as Europeanization, visual culture, and youth culture in their historical context. These courses prepare students to study in the language at German-speaking universities.

GER 3308 Introduction to German Literature and Culture/GER 3310 German Culture Studies: Made in Germany: Students become increasingly cognizant of German studies as a discipline that is defined by the exploration of texts and cultural objects in context. They define, compare, and interpret literary genres of different time periods and recognize, research, and analyze how context creates cultural products and vice versa. They refine their oral and written German skills through analysis, interpretation, and presentation.

German 331x: Students identify historical coherence and importance of time periods as a mode of cultural inquiry and analysis. They categorize and arrange knowledge. They apply concepts and methodology, while refining their German language and analytical skills by identifying key passages in literary texts, conducting close readings of texts and objects, and creating historical connections between them. Students demonstrate these skills in oral presentations and writing of different formats and lengths. These courses complement rather than precede courses in the 339x category.

German 339x: Students identify thematic coherence and conceptual formation as a mode of cultural inquiry, analysis, and production. They categorize and arrange knowledge across time, national contexts, and artistic modes or genres. They engage with abstract concepts and may integrate different methods through work with theoretical models and their application. As they do in the 331x-courses, students refine their German language and analytical skills by identifying key passages in literary texts, conducting close readings of texts and objects, and creating cross-disciplinary modes of presentation in speech and writing.

Other: Students in GER 2262 (<https://bowdoin-public.courseleaf.com/search/?P=GER%202262>) Not Lost in Translation: German Across

the Disciplines/GER 3362 (<https://bowdoin-public.courseleaf.com/search/?P=GER%203362>) Not Lost in Translation: German Across the Disciplines acquire cultural competence through specialized linguistic and interpretive skills and appropriate techniques of translation. They evaluate language use and apply theories of translation, while building specialized German language skills in vocabulary, style, and syntax. They create cross-curricular connections allowing them to integrate knowledge from other disciplines with their study of German. The dual-level course fosters collaboration and cooperation between students of differing linguistic abilities; at the 3362-level, students carry out a research project involving presentation, simulation, and translation. Study abroad enables students to apply and expand upon the linguistic and cultural knowledge acquired at Bowdoin in their interaction with native speakers. Their daily immersion in the native culture, in turn, fosters comparative perspectives and allows them to relate different course contents from German-speaking universities back to their German courses at Bowdoin.

Independent Studies/Honors Program

These student-driven and faculty-guided research courses allow students to plan, design, and execute independent research, with the possibility of completing an honors thesis. The thesis demonstrates critical acumen, and intellectual and methodological rigor.

The department complements its major program with interdisciplinary courses in English—in so doing strengthening Bowdoin's liberal arts mission and opening its course offerings to majors, minors, and students from all disciplines.

Options for Majoring or Minor in the Department

Students may elect to major in German or to coordinate a major in German with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in German.

Faculty

Jill S. Smith, *Department Chair*
Kate Flaherty, *Department Coordinator*

Professor: Birgit Tautz
Associate Professor: Jill S. Smith
Assistant Professor: Jens Klenner
Teaching Fellow: Olivia Ufer

Faculty/Staff Website (<https://www.bowdoin.edu/german/faculty-and-staff/>)

Requirements German Major

The major consists of eight courses.

Code	Title	Credits
Required Courses		
GER 2204	Intermediate German II: German History through Visual Culture (or the equivalent)	1
Select seven additional courses. Of those:		7

One course taught in English may be taken from German 1000–1049 or German 1151–1159 or German 2251–2551; or a course taught by German faculty in other programs may be substituted for this requirement upon prior approval.

The other courses (or all of the seven courses) must be taken from German 2205–4052.

All majors are required to do coursework with the department in their senior year; the configuration of this senior work must be determined in direct consultation with the department. This consultation takes place prior to registering for the fall semester of the senior year, which for some students means before they depart for study away. Normally, senior work includes two courses at the 33xx level. Prospective majors, including those who begin with first- or second-year German at Bowdoin, may arrange an accelerated program, usually including study away. Majors are encouraged to consider a number of study-away programs with different calendars and formats.

German Minor

Code	Title	Credits
Required Courses		
GER 1102	Elementary German II	1
Select any four courses.		4
two courses in the language (German 2203–2289 and German 3300–3999)		
up to two may be taught in English (German 1000–1049, German 1151–1159, or German 2251–2551)		

With advance departmental approval of the transfer credit, any number of courses from another college or university may count toward the major or minor.

Additional Information

Additional Information and Department Policies

- Courses that count toward the major or minor must be taken for regular letter grades (not Credit/D/Fail) and earn a course grade of C- or better.
- First-year writing seminars taught by German department faculty count toward the major and minor.
- Students may engage in independent study at the intermediate (2970–2979) or advanced (4000–4051) level. Independent studies, including honors projects, may count toward the major.
- If taught by a German faculty member and pre-approved, majors and minors may double-count one course with another department or program.
- Advanced Placement/International Baccalaureate (AP/IB): Students who received a minimum score of four on the German Advanced Placement exam receive a general credit toward their degree, normally no credit to the major or minor, after completion of a 3000-level German course with a minimum grade of B-. Students who took the German IB exam should consult the department regarding credit. Regardless of earned scores, all students are expected to take the placement exam. In order to receive credit for AP/IB work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Information for Incoming Students (p. 244)

No matter whether you are new to German or want to continue your study of German language, literature, history, and culture, Bowdoin's German department is excited to welcome you! We offer a seamless curriculum that engages students in the rich cultural traditions of the German-speaking countries from day one. All our courses – even the very beginning German classes – emphasize interdisciplinary connections that relate texts, films, cultural objects in their rich contexts and links to the arts, natural sciences, history, sociology, and politics. Our curriculum integrates study abroad, allowing students to enroll in different programs, universities, and summer study in Germany and Austria. Pathways into our program are flexible and individualized – we meet you where you are and lead you to success! Our students and alumni have found unparalleled success and satisfaction through their study of German. Please learn about them and the details of our academic and co-curricular program, which was designated a National Center of Excellence by the American Association of Teachers of German, on our website (<https://www.bowdoin.edu/german/>).

- First-year students considering either beginning or continuing the study of German are strongly encouraged to take a course during their first semester.
- Students with no prior exposure to German are encouraged to begin their study in the first semester because doing so will allow them to take full advantage of options open to them, including study in a German-speaking country. GER 1101 Elementary German I is open to those with no previous study in the German language. No placement necessary.
- Being a first-year student does not mean that GER 1101 Elementary German I is the only course for you. Your placement exam suggests any course from our full slate of GER 1102 Elementary German II (only offered spring semesters) to GER 2203 Intermediate German I: Germany within Europe or GER 2205 Advanced German Texts and Contexts (offered fall semesters) or a 33xx-level seminar. (The latter may very well occur, if you have AP or have studied extensively in a German-speaking environment.) Please take this advice and placement at face value – we rely on many years of experience and have an excellent track record in appropriately placing students where they will best succeed. Do not hesitate to ask your advisor to consult with Professor Jill Smith (<https://www.bowdoin.edu/profiles/faculty/jsmith5/>).
- GER 1150-level and 2250-level courses are taught in English and are open to all students with no previous language study required. Please see our website (<https://www.bowdoin.edu/german/>) or the first-year orientation schedule for placement consultations as you prepare your course registration for fall 2022, and do attend! If you miss the consultation and open house during orientation, however, don't worry – simply contact Professor Jill Smith (<https://www.bowdoin.edu/profiles/faculty/jsmith5/>).

Courses

GER 1027 (c, FYS) From Flowers of Evil to Pretty Woman: Prostitutes in Modern Western Culture

Non-Standard Rotation. Enrollment limit: 16.

Explores the myriad ways that prostitutes have been represented in modern Western culture from the middle of the nineteenth century to the present. By analyzing literary texts, visual artworks, and films from Europe and the United States, examines prostitution as a complex urban phenomenon and a vehicle through which artists and writers grapple with issues of labor, morality, sexuality, and gender roles. Introduces students to a variety of literary, artistic, musical, and filmic genres, as well as to different disciplinary approaches to the study of prostitution. Authors, artists, and film directors may include Baudelaire, Toulouse-Lautrec, Kirchner, Wedekind, Pabst, Marshall, Scorsese, Spielmann, and Sting. (Same as: GSWS 1027)

Previous terms offered: Fall 2018.

GER 1028 (c) (IR)RESISTABLE: The Art of Defiance in a Changing Nation

Non-Standard Rotation. Enrollment limit: 16.

How can art and culture be weaponized? How much power do art and culture hold and how does the status-quo push back? This writing intensive course explores notions of resistance in art and culture in Germany and Europe from World War II to the present. By analyzing literary texts, films, music, pop-up exhibitions, and popular culture in 20th and 21st century Germany and Europe, we will examine through regular writing assignments the relationship between art and culture; resistance; and the status quo. Topics include resistance to Nazi Germany and behind the Iron Curtain, subversive cinema, punk and hip-hop, humor and satire, and cultural output by minoritized communities. Students will learn to grapple with and negotiate the driving forces behind personal acts of defiance through evidence-based and exploratory writing exercises of various lengths.

Previous terms offered: Fall 2021.

GER 1101 (c) Elementary German I

Jill Smith.

Every Fall. Fall 2022. Enrollment limit: 18.

German 1101 is the first course in German language and culture and is open to all students without prerequisite. Facilitates an understanding of culture through language. Introduces German history and cultural topics. Three hours per week. Acquisition of four skills: speaking and understanding, reading, and writing. One hour of conversation and practice with teaching assistant. Integrated Language Media Center work.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GER 1102 (c) Elementary German II

Jens Klenner.

Every Spring. Spring 2023. Enrollment limit: 18.

Continuation of German 1101. Equivalent of German 1101 is required.

Prerequisites: GER 1101 or Placement in GER 1102.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GER 1152 (c, IP, VPA) Berlin: Sin City, Divided City, City of the Future

Non-Standard Rotation. Enrollment limit: 50.

An examination of literary, artistic, and cinematic representations of the city of Berlin during three distinct time periods: the "Roaring 20s," the Cold War, and the post-Wall period. Explores the dramatic cultural, political, and physical transformations that Berlin underwent during the twentieth century and thereby illustrates the central role that Berlin played, and continues to play, in European history and culture, as well as in the American cultural imagination. For each time period studied, compares Anglo-American representations of Berlin with those produced by German artists and writers, and investigates how, why, and to what extent Berlin has retained its status as one of the most quintessentially modern cities in the world. No knowledge of German is required. Note: Fulfills the non-US cinema requirement for cinema studies minors. (Same as: CINE 1152)

Previous terms offered: Fall 2020, Spring 2019.

GER 1155 (c, IP) Into the Wild

Non-Standard Rotation. Enrollment limit: 50.

An examination of the mix of conflicting ideas that shape the many conceptions of "wilderness." Among other questions, explores the ideas of wilderness as a space without or preceding culture and civilization, as a mental state, and as an aesthetic experience. Considers the place of wilderness in the 'urban jungle' of cities. Puts Anglo-American and European theories and images of the wilderness into dialogue by comparing literary works, film, artworks, and philosophical texts. No knowledge of German is required. (Same as: ENVS 1155)

Previous terms offered: Fall 2019.

GER 2052 (c, IP) Karl Marx: Texts, Ideas, Impact

Non-Standard Rotation. Enrollment limit: 16.

Explores key texts by Karl Marx in depth, not only for the force of their ideas, but in pursuit of insight into Marx's critical method. How does Marx make the intangible idea of political economy tangible through rhetorical style? Examines Marx's own writing style and encourages students to reflect on rhetorical methods as they read and write about his works themselves. Demonstrates Marx's impact through carefully chosen examples of theoretical texts that apply Marx's theories to literary and cultural analysis. Emphasizes writing as a multistep process. Texts include The Communist Manifesto, The Eighteenth Brumaire of Louis Bonaparte, and selections from Das Kapital. Taught in English.

Previous terms offered: Spring 2019.

GER 2053 (c, IP) The Pact with the Devil

Non-Standard Rotation. Enrollment limit: 16.

Examines narratives of the pact with the devil, beginning with Goethe's *Faust I* and *II* – and the title character's selling of his soul to Mephistopheles – all in a quest for unlimited knowledge and pleasure. Recognizing the roots in European culture, we explore challenges through and efforts at decolonization, considerations and intersections of transcultural aspects. As the pact becomes metaphor for humans' enduring fascination with the devil and excess (e.g., *hybris*), we turn to its manifestation in cinematic, visual and performing arts, as well as global literary and popular culture (e.g., Marlow, Bulgakow, Kentridge, Manga/Graphic novels). We research the so-called "Faustian bargain" narratives as gateways into exploring the interdisciplinary framework of university learning (e.g., history of sciences; mythologies; environmental studies, gender and above all, ethics). The course enables and necessitates research-driven writing and emphasizes writing as a process. (IRBW)

Previous terms offered: Spring 2022.

GER 2203 (c) Intermediate German I: Germany within Europe

Jens Klenner.

Every Fall. Fall 2022. Enrollment limit: 18.

Continued emphasis on the understanding of German culture through language. Focus on social and cultural topics through history, literature, politics, popular culture, and the arts. Three hours per week of reading, speaking, and writing. One hour of discussion and practice with teaching assistant. Language laboratory also available. Equivalent of German 1102 is required.

Prerequisites: GER 1102 or Placement in GER 2203.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GER 2204 (c) Intermediate German II: German History through Visual Culture

Birgit Tautz.

Every Spring. Spring 2023. Enrollment limit: 18.

Continuation of German 2203. Equivalent of German 2203 is required.

Prerequisites: GER 2203 or Placement in GER 2204.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GER 2205 (c, IP) Advanced German Texts and Contexts

Birgit Tautz.

Every Fall. Fall 2022. Enrollment limit: 18.

Designed to explore aspects of German culture in depth, to deepen the understanding of culture through language, and to increase facility in speaking, writing, reading, and comprehension. Topics include post-war and/or post-unification themes in historical and cross-cultural contexts. Particular emphasis on post-1990 German youth culture and language. Includes fiction writing, film, music, and various news media. Weekly individual sessions with the teaching fellow from the Johannes-Gutenberg-Universität-Mainz. Equivalent of German 2204 is required.

Prerequisites: GER 2204 or Placement in GER 2205.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GER 2251 (c, DPI, IP) Making Sex a Science: Sexology and its Cultural Representation from Krafft-Ebing to Kinsey

Non-Standard Rotation. Enrollment limit: 35.

Traces the development of sexual science, or sexology, from its roots in late nineteenth-century Austria and Germany to its manifestations in twentieth-century Great Britain and the United States. Examines ideas of key figures within sexual science and the myriad ways they sought to define, categorize, and explain non-normative sexual behaviors and desires. Explores how claims of scientific authority and empirical knowledge were used to shape social attitudes toward sexual difference. Analyzes cultural works that either influenced or were influenced by these thinkers. Includes works by the sexologists Krafft-Ebing, Hirschfeld, Ellis, and Kinsey, as well as cultural texts by Boyle, Praunheim, and Sacher-Masoch. (Same as: GSWS 2258)

Previous terms offered: Spring 2022.

GER 2252 (c, IP, VPA) Terrorists and Spies, Borders and Bridges: Highlights of German Cinema since 1980

Non-Standard Rotation. Enrollment limit: 35.

Examines the particular ways in which, in the aftermath of New German Cinema (NGC), the cinematic medium constructs protagonists of mass appeal (terrorists, spies, slackers, etc.) while moving beyond the limits and possibilities of a national cinematic tradition and toward a European (and global) cinematic language. Pays special attention to historical advancement, over the past four decades, of material conditions of film production, distribution, and reception as well as to the development of cinematic genres, techniques, and effects that cinema has on other art forms. Filmmakers/films may include von Trotta (*"Marianne and Juliane"*), Petersen (*"Das Boot," "The Neverending Story"*), von Donnersmarck (*"Lives of Others"*), Wolf (*"Solo Sunny"*), Schlöndorff (*"The Legend of Rita"*), Misselwitz (*"Winter adé"*), Edel (*"Baader-Meinhof Complex"*), Hirschbiegel (*"Downfall"*), Ade (*"Forest for the Trees," "Toni Erdmann"*), Link (*"Nowhere in Africa"*), Petzold (*"Yella," "Barbara"*), Tykwer (*"Run Lola Run," "Three"*), Schmid (*"Distant Lights"*), Dresen (*"Stopped on Track"*), Dörrie (*"Men," "Nobody Loves Me"*), Ruzowitsky (*"Counterfeiters"*), Maccarone (*"Veiled"*), Akin (*"Edge of Heaven," "The Cut"*), Gerster (*"A Coffee in Berlin"*), Schipper (*"Victoria"*). Fulfills international requirement for cinema studies. Taught in English. (Same as: CINE 2900)

Previous terms offered: Spring 2021.

GER 2253 (c, IP, VPA) The Ethics of the Image

Birgit Tautz.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the representation of a range of ethical questions in film as well as the ethics of film, including the formal and stylistic, historical, and political decisions made in constructing cinematic images. Arranged in the form of case studies, compares and contrasts examples of international film with a focus on theoretical questions and approaches. May consider the ways in which films represent traumatic events in history (e.g., the Holocaust), environmental disasters, and sexual and gender identity, to name a few. Addresses questions of cinematic genre as well as spectatorship (e.g., identification and repulsion, taste, appropriateness, humor, shock, activism as response). Note: Fulfills the film theory and the non-US cinema requirements for cinema studies minors. (Same as: CINE 2901)

Prerequisites: GER 1000 or higher or CINE 1000 or higher or ENGL 1000 or higher or HIST 1000 or higher or VART 1000 or higher.

Previous terms offered: Spring 2020.

GER 2255 (c, IP) Climate Fiction

Jens Klenner.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Climate Fiction investigates the possibilities and limits of storytelling in the era of global climate change, explores humanity's impact on Earth by conceiving human and nonhuman communities after sea-level rise, desertification, or biodiversity loss; and by imagining the evolution of new species or social forms in response to environmental disaster and loss of resources. Situates novels, short stories, poetry, and film within the environmental humanities, combines scientific-cultural discourses about the environment with social concerns, and assesses how humanistic methodologies can complement scientific debates. Examines rhetoric, narrative conventions, and genres, asks how climate fiction narrates impending disaster on a global scale, and analyzes imaginations of alternative futures, ideas of environmentalism, and conceptions of social equality. Puts German, Austrian, and Swiss cultural productions in dialogue with Anglo-American ideas. All readings in English. (Same as: ENVS 2422)

GER 3308 (c, IP) Introduction to German Literature and Culture

Every Other Spring. Enrollment limit: 15.

Designed to be an introduction to the critical reading of texts by genre (e.g., prose fiction and nonfiction, lyric poetry, drama, opera, film) in the context of German intellectual, political, and social history. Focuses on various themes and periods. Develops students' sensitivity to generic structures and introduces terminology for describing and analyzing texts in historical and cross-cultural contexts. Weekly individual sessions with the teaching fellow from the Johannes-Gutenberg-Universität-Mainz. All materials and coursework in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2022, Spring 2020.

GER 3310 (c, IP) German Culture Studies: Made in Germany

Jill Smith.

Every Other Spring. Spring 2023. Enrollment limit: 15.

An examination of the most influential "products" made in Germany. From technological developments to musical innovations, many things made in Germany have had an enduring, global impact. Explores the context in which these products were made or ideas were developed, the process of their worldwide dissemination, as well as the ways in which they shape the national and cultural imagination. Designed to be an introduction to methods of cultural analysis through an examination of diverse materials. Expands students' knowledge of German culture, history, and language while also developing skills, including close reading, visual analysis, and contextualization. All materials and coursework in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2021, Spring 2019.

GER 3313 (c, IP) 18th century German Literature and Culture: Love, Theft, Travel

Non-Standard Rotation. Enrollment limit: 15.

Focus on the mid-to late eighteenth century as an age of contradictory impulses (e.g., the youthful revolt of Storm and Stress against the Age of Reason). Examines manifestations of such impulses in the works of major (e.g., Goethe, Schiller, Humboldt) and less well-known (e.g., Karsch, Forster) and anonymous authors and translators. Beginning with discussions of transparency, the course investigates constellations that began to define the century: "Love" as a then new, very modern idea that organized families and human relationships, "theft" as a shortcut to discuss issues of property (e.g., proprietary ideas, property of goods) and "travel," expressing then dominant activities of exploration as well as exploitation. These terms serve as key concepts throughout the course, as we combine traditional reading and discussion with methods of Digital Humanities. The result will be an investigation of texts in their broader cultural context with appropriate theory and illustrated through film and drama on video, statistical data, developments in eighteenth-century dance, music, and legal discourse." All materials and coursework in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Fall 2020.

GER 3315 (c, IP) Getting Romantic, Getting Real: 19th-Century German Literature and Culture

Non-Standard Rotation. Enrollment limit: 16.

Explores German literature and culture (art, music, philosophy) in light of the radical transformations of the 19th century: the Napoleonic wars, the failed revolutions of 1848, the rapid industrialization, militarization, and unification of Germany. Examines the interplay between romantic and realist cultural works from a variety of genres (art songs, operas, plays, poetry, prose), and by doing so illuminates tensions between the individual and the collective, between the irrational and the rational, between urban and rural spaces. Readings by Lou Andreas-Salomé, Gerhard Hauptmann, Heinrich Heine, ETA Hoffmann, and Theodor Storm, among others; music by Ludwig van Beethoven, Franz Schubert, and Richard Wagner. Analysis of works from the Bowdoin College Museum of Art's collection.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Fall 2021, Fall 2018.

GER 3317 (c, IP) German Literature and Culture since 1945

Non-Standard Rotation. Enrollment limit: 15.

An exploration of how successive generations have expressed their relationship to the catastrophe of the Nazi past. Examines representative texts of East and West German writers/filmmakers in Cold War and post-unification contexts. A discussion of German identity from several critical perspectives, including Vergangenheitsbewältigung, the political and cultural influence of the United States and the Soviet Union, gender in the two Germanys, and the politics of migration and citizenship. Authors may include Grass, Böll, Borchert, Brüssig, Özdamar, Schlink, and Wolf. Films by Fassbinder, von Trotta, Schlöndorff, Akin, and Levy.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2022, Fall 2018.

GER 3380 (c, IP) Honor, Courage, and Class: Dueling in German Literature and Culture

Non-Standard Rotation. Enrollment limit: 15.

This course takes the institution of dueling as a lens into German literary history. How did the duel evolve from a religious ceremony in the Middle Ages to a romantic encounter between gentlemen? How did the aristocratic link between honor and violence spread to other social classes? What can duels tell us about violence, honor, and gender dynamics in a particular place and time? How do literary duels reflect and shape the course of literary history; and what makes the duel such an attractive theme to such a wide range of authors?

Prerequisites: GER 2204 - 2269 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2020.

GER 3388 (c, IP) Freud and Fiction

Jens Klenner.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Freud and Fiction investigates the relationship of literature, art, and Freud's psychoanalytic theory. It traces the literary and artistic sources for Freud's psychoanalytic theory, determines the role of literature in forming some of Freud's most central concepts, and examines Freud's use of literary texts to illustrate or confirm his theories. Scrutinizes the narrative, rhetorical, and linguistic challenges involved in telling the story of a life, explores the world of imagination at the center of human subjectivity, and assesses the influence of Freud's theory of subjectivity on the analysis of characters, authors, and readers. Situates Freud's writings at the limits of both science and literature. Taught in German.

GER 3389 (c, IP) The Empowered Other and Writing Back in Contemporary German Literature

Non-Standard Rotation. Enrollment limit: 16.

This course explores the relation of margin and center through the analysis of fictional works by minoritized authors writing and living in twenty-first-century Germany. Specifically, we will investigate the relationship between these authors and their positionality vis-à-vis monolithic understandings of "German literature" and "Germanness". We will examine how, through their fiction, authors engage with quintessentially German literary forms, the German language, notions of Bildung and Heimat, generational memory, space, and their own hybrid identities to claim and defend their place in Germany and within the German literary establishment. Readings by Fatma Aydemir, Sharon Dodua Otoo, Abbas Khider, Saša Stanišić, Yoko Tawada, and more. All course materials in German.

Prerequisites: GER 2204 or Placement in GER 2204 or GER 2205 or GER 3000 or higher.

Previous terms offered: Spring 2022.

GER 3390 (c, IP) Literature and Culture of the Great War and the Weimar
Jill Smith.

Non-Standard Rotation. Fall 2022. Enrollment limit: 15.

A study of the First World War and the Weimar Republic in German history and culture with a focus on artistic representations of this tumultuous era. Traces key movements in literature as well as visual art and film, with attention to the way artists responded to social, political, and cultural shifts in early twentieth-century Germany. Readings thematize issues of art and politics, nationalism and militarism, gender and sexuality, and practices of memorialization. Authors may include Remarque, Jünger, Benn, Lasker-Schüler, Trakl, Toller, Brecht, Döblin, Luxemburg, and Keun. Explores contemporary popular media representations of the era such as the TV series Babylon Berlin. All materials and coursework in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2019.

GER 3391 (c, IP) Mapping Germany: Nature and Knowledge

Non-Standard Rotation. Enrollment limit: 16.

Considers how German terrain and culture were mapped or charted through representations of nature and the wilderness in a diverse range of texts. Examinations of discourses about nature and landscape reveal how Germany constitutes itself as a nation with a particular relationship to the environment. A comparison of Austrian, German, and Swiss novels, short stories, films, and artworks emphasize the varied but powerful place of nature in the German imagination. Possible works, among others, by Kant, Goethe, Humboldt, Fanck, Ransmayr, Kehlmann, Jelinek, Richter. All materials and coursework in German. (Same as: ENVS 3391)

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2020.

GER 3393 (c, IP) Literary History of Destruction

Non-Standard Rotation. Enrollment limit: 15.

Examines literary and artistic responses to the technological innovations and historical upheavals that characterized the twentieth century: science seemed to enable mass destruction and murder on an unprecedented scale, and two world wars, the Holocaust, and the threat of nuclear annihilation gave rise to a deep ambivalence about the power of technology in modern society and its reach into daily life. German-speaking Europe was a driving force behind these developments, and German and Austrian authors and artists articulated how technology changes the world, for better and for worse. Authors include, but are not limited to, Franz Kafka, Robert Musil, Stefan Zweig, Friedrich Dürrenmatt, Paul Celan, and Franz Fühmann. Considers film and visual art. Discussion and coursework in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Fall 2019.

GER 3394 (c, IP) Contemporary Austrian Literature, Drama, and Film
Discontinued Course. Enrollment limit: 16.

Examines essential works of post-1945 Austrian literature, drama, and film. Explores how Austrian artists attempt to come to terms with the collapse of the Habsburg Empire and the legacy of collaboration with the Nazi regime. Also considers how works of art both support and call into question Austria's cultural and national identity in terms of gender and ethnicity. Texts by Bachmann, Bernhard, Handke, Jelinek, and Mayröcker, films by Glawogger, Haneke, Kusturica, and Spielmann. All materials and coursework in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Fall 2020.

GER 3395 (c, IP) Myths, Modernity, Media

Birgit Tautz.

Non-Standard Rotation. Fall 2022. Enrollment limit: 15.

Explores the important role that myths have played in German cultural history. While founding myths of Germanic culture (e.g., Nibelungen) are considered, focuses especially on myth in relation to fairy tales, legends (including urban legends of the twentieth century), and borderline genres and motifs (e.g., vampires, witches, automatons), as well as on questions of mythmaking. Examines why modern culture of the twentieth and twenty-first centuries, which seemingly neglects or overcomes myths, heavily engages in mythicization of ideas (e.g., gender roles, the unnatural) and popularizes myths through modern media (film, television, the Internet), locations (e.g., cities), and transnational exchange (Disney; the myth of the Orient). Aside from short analytical or interpretive papers aimed at developing critical language skills, students may pursue a creative project (performance of a mythical character, design of a scholarly Web page, writing of a modern fairy tale). Note: Fulfills the film theory and non-US cinema requirements for cinema studies minors.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

GER 3397 (c, IP) Global Germany?

Non-Standard Rotation. Enrollment limit: 15.

The fall of the Berlin Wall and the concomitant end of the Cold War ushered in what many cultural critics call the era of globalization. An exploration of how contemporary German culture (1990-present) grapples with both the possibilities and uncertainties presented by globalization. Examines a myriad of cultural texts – films, audio plays, dramas, short fiction, novels, photographs, websites – as well as mass events (i.e., the Love Parade, the 2006 World Cup) within their political, social, and economic contexts to show how Germany's troubled past continues to affect the role it plays on the global stage and how its changing demographics – increased urbanization and ethnic diversity – have altered its cultural and literary landscape. Critically considers issues such as migration, terrorism and genocide, sex tourism, the formation of the European Union, and the supposed decline of the nation-state. Frequent short writings, participation in debates, and a final research project based upon a relevant topic of individual interest are required. All materials and course work in German. (Same as: CINE 3395)

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Spring 2021.

GER 3398 (c, IP) Colors: Signs of Ethnic Difference 1800/1900/2000

Non-Standard Rotation. Enrollment limit: 15.

In German culture, color/hue has played an important role in marking ethnic difference. Investigates the presence of color–metaphorical and actual, as provocative rhetoric and residual thought—in Germany today (e.g., around 2000), before exploring to what extent this presence is a lingering effect of the cultures around 1900 and 1800. In German culture color marks not only “racial difference” (e.g., “black” vs. “white”), but also geographical difference (“tropical colors”) or diversity (“Bunte Republik Deutschland”). Considers changing discourse on color and ethnic difference in literary texts and films, all of which serve to illuminate the broader cultural context at three historical junctures: 1800, 1900, and 2000. Considers texts and films in conjunction with non-fiction, including examples from the visual arts (paintings, photographs, “Hagenbecks Völkerschauen”), medical and ‘scientific’ encyclopedic entries, policy statements and advertisements (“Reklamemarken,” commercials), and popular music (hip-hop, lyrics), recognizing, in the process, how German culture (“national identity”) defines itself through and against color. Taught in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Fall 2019.

GER 3399 (c, IP) Narrating Crisis and Catastrophe

Non-Standard Rotation. Enrollment limit: 18.

Studies the ubiquity of images and ideas of crises and catastrophes in modern culture. Natural disasters, accidents, financial collapse, wars, and terror permeate the media; crises legitimize political and legal interventions; catastrophic scenarios are central to disaster films. To be imagined and processed, catastrophes must be narrated. Consequently, different models and functions of such narratives from Austria, Germany, and Switzerland since 1800 are investigated; media and formats examined; social and political dimensions explored; and concepts like trauma, survival, prophecy, testimony, or sovereignty scrutinized. All materials and coursework in German.

Prerequisites: GER 2204 - 2969 or GER 3000 or higher or Placement in GER 3000 level.

Previous terms offered: Fall 2021.

Government and Legal Studies

Overview & Learning Goals

Overview

The major in government provides a broad introduction to the art, and science, of politics—that is, of the mechanisms by which human beings pursue the common good. The subfields of contemporary political science are encompassed by courses in American politics, political theory, comparative politics (with regional coverage of much of the globe), and international relations; these may include offerings in political institutions and behavior, US and international law, public policy (including environmental politics), political economy, and the qualitative and quantitative methods used in the discipline. Students take courses in each of the subfields, choosing to concentrate in one — study that may culminate in an optional, substantial honors project. Government students go on to pursue a variety of careers after they graduate, including teaching, law, politics and administration, journalism, and business.

Courses within the department are divided into three levels:

Level A Courses (GOV 1000–1999)

- First-Year Writing Seminars (GOV 1000–1049)
 - All first-year writing seminars offered by the department are designed to provide an introduction to a particular aspect of government and legal studies. Students are encouraged to analyze and discuss important political concepts and issues, while developing research and writing skills. Registration is limited to sixteen first-year students in each seminar.
- Introductory Lectures (GOV 1050-1999)
 - GOV 1100 Introduction to American Government, GOV 1400 Introduction to Comparative Government, and GOV 1600 Introduction to International Relations are large lecture courses, limited to fifty students in each, and designed to provide a substantive introduction to American politics, comparative politics, or international relations, respectively. These courses are intended for first-year students and sophomores. Others may take them only with the permission of the instructor.

Level B Courses (GOV 2000–2969)

Courses are designed to introduce students to or extend their knowledge of a particular aspect of government and legal studies. Courses range from the more introductory to the more advanced. Registration is normally limited to thirty-five students in each course. Students should consult the individual course descriptions regarding any prerequisites.

Level C Courses (GOV 3000–3999)

Courses provide seniors and juniors, with appropriate background, the opportunity to do advanced work within a specific subfield. Registration is limited to fifteen students in each seminar. These courses are not open to first-year students. Students should consult the individual course descriptions regarding any prerequisites.

Subfields

Courses within the department are further divided into four subfields and outlined as follows:

American Politics

- GOV 1000–1009, 1037–1039, 1100, 2000–2199, 2700–2799, 3000–3199, and 3700–3799
- Topics of study include the major governing institutions and actors—Congress, the presidency, the courts, public bureaucracies, state and local governments, political parties, the media, and interest groups—and the primary modes of political participation, including lobbying, social movements, elections, public opinion, and voting.
- Institutional studies focus on how rules and enduring governing structures shape political processes and outcomes. Behavioral analyses examine how individuals—from activists to the general public—think about and engage in political activity. No single methodological approach to the study of American politics is adopted. Some courses focus on the historical development of American institutions and policy; a number of courses document the jurisprudence surrounding key questions and controversies; other courses focus on statistical relationships between variables and the predictive and explanatory power of these models.

Political Theory

- GOV 1007–1019, 1040–1045, 2100–2399, 2800–2899, 3100–3399, and 3800–3899
 - Political theory courses at Bowdoin explore the fundamental issues of political life—human nature, justice, authority, virtue, freedom, equality, natural rights, democracy, and history—through a careful examination of what the greatest minds have thought about these issues.
 - The courses range from broad surveys (Classical Political Philosophy, Modern Political Philosophy, Contemporary Political Philosophy, and American Political Thought) to thematic courses (Liberalism and Its Critics, Religion and Politics, and Eros and Politics) to advanced seminars on individual thinkers (Jefferson, Nietzsche, Rousseau, and Tocqueville). The courses are designed to provide students not only with a deeper understanding of the history of political thought from Plato to Rawls, but also with the ability to read complex philosophical texts and write rigorous analyses of them.
-

Comparative Politics

- GOV 1017–1029, 1400, 2300–2599, and 3300–3599
- Comparative politics is a field of study and a methodology within political science. The subfield of comparative politics focuses on power and decision-making within national boundaries: the rules and institutions that govern states and the social groups they comprise. Some scholars focus on politics in a single country, others specialize regionally, while others investigate variation in patterns of authority cross-nationally.
- As a method, comparative political science strives to make propositions that can be tested empirically, through qualitative or quantitative analysis, and that hold validity across all systems or within well-defined limits. Topics central to the field include the origins of democracy and dictatorship, reasons for economic growth and stagnation, sources of social conflict, and avenues for participation and representation.

International Relations

- GOV 1025–1045, 1600, 2500–2899, and 3500–3899
- International relations is the study of relationships in the international political world, including matters of war and peace, global economic development or crisis, and transnational issues such as terrorism or environmental degradation.
- Traditional areas of study include international law, international institutions, security studies, states and non-state actors, nuclear weapons, cyber warfare, international political economy, international cooperation, foreign policy, eras of warfare, and conflict resolution.
- To the benefit of both subfields, topics in international relations often interconnect with areas in comparative politics, with comparative politics bringing nuance to issues like war and development; while international relations can paint a “big picture” of politics across state borders and between diverse populations.

Learning Goals

Substantive Knowledge of Government and Politics

Students should gain an understanding of essential concepts and theories in all of the four major subfields of the discipline (American politics, political theory, comparative politics, and international relations) and be able to employ these concepts and theories independently in analyzing empirical events.

In that sense, the department seeks to graduate students who can describe in analytical terms the actions undertaken by political actors in the domestic and international arenas. The department expects students to concentrate in one of these subfields, however, and to therefore be more proficient in questions derived from that study.

A capstone seminar in their concentrated subfield will be the principal course used to assess the degree to which this disciplinary learning objective has been met. (Students can also meet this requirement with an advanced independent study or by completing an honors project.)

Critical Analysis and Argumentation

Students should be able to critically analyze readings in government and politics. They should additionally be able to formulate clear oral and written arguments that address issues in dispute in the discipline of political science and defend their arguments with adequate evidence.

Effective Writing

The department seeks to graduate students who can write clearly and effectively. Specifically, the department wants students to be able to articulate a clear thesis, to support it with logic and evidence, and to present it in clear, grammatically correct prose. It is also important that students understand and make use of appropriate citation.

Analytical Thinking

The department seeks to expose students to a variety of perspectives on politics and approaches to political science designed to foster their ability to assess and evaluate competing viewpoints.

Critical Reading

The department seeks to help students learn how to read and evaluate a text. Specifically, the department wants students to be able to identify the main thesis question or hypothesis and to evaluate the author's use of evidence and logic in support of the thesis or hypothesis.

Library and Research Skills

The department seeks to have students learn how to locate and to utilize effectively the rich array of paper and electronic resources available to them.

Options for Majoring or Minor in the Department

Students may elect to major in government and legal studies or to coordinate a major in government and legal studies with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in government and legal studies.

Department Website (<https://www.bowdoin.edu/government/>)

Faculty

Andrew C. Rudalevige, *Department Chair*

Lynne P. Atkinson, *Department Coordinator*

Professors: Paul N. Franco, Michael M. Franz, Laura A. Henry, Janet M. Martin‡, Andrew C. Rudalevige, Allen L. Springer**, Jean M. Yarbrough
Associate Professors: Ericka A. Albaugh‡, Barbara Elias‡, Christopher Heurlin (Asian Studies), Henry C. W. Laurence (Asian Studies), Jeffrey S. Selinger

Assistant Professors: Maron W. Sorenson*, Ángel Saavedra, Shana M. Starobin (Environmental Studies)*

Adjunct Lecturer: George S. Isaacson

Visiting Faculty: William d'Ambruoso, Túlio Zille

Faculty/Staff Website (<https://www.bowdoin.edu/government/faculty-and-staff/>)

Requirements

Government and Legal Studies Major

The major consists of nine courses.

- no more than two courses taken at Level A; no more than one of these a first-year writing seminar
- a field of concentration, selected from the list of subfields, in which at least four courses including one Level C course and no more than one Level A course are taken

- at least one course taken in each of the three subfields outside the field of concentration

American Politics: GOV 1000–1009, 1037–1039, 1100, 2000–2199, 2700–2799, 3000–3199, and 3700–3799

Political Theory: GOV 1007–1019, 1040–1045, 2100–2399, 2800–2899, 3100–3399, and 3800–3899

Comparative Politics: GOV 1017–1029, 1400, 2300–2599, and 3300–3599

International Relations: GOV 1025–1045, 1600, 2500–2899, and 3500–3899

Government and Legal Studies Minor

The minor consists of five courses from at least three of the departmental subfields.

- no more than two courses taken at Level A; no more than one of these a first-year writing seminar

Additional Information Additional Information and Department Policies

- To fulfill major or minor requirements, a grade of C- or better must be earned in a course. Courses used to fulfill major or minor requirements must be taken for regular letter grades (not Credit/D/Fail).
- A total of two credits from outside Bowdoin can normally be applied to the government major or minor. Only one credit can be applied (as a Level B course) to the four-course major concentration requirement. The Level C concentration requirement must be completed at Bowdoin.
- The following courses, while not fulfilling the requirement for any of the four fields of concentration, may be counted toward the total number of courses required for the major or minor: Government 1046–1049, 2900–2969, 2990–2999, 3900–3999, 4020–4029.
- Majors and minors may double-count one course cross-listed with government and legal studies to another department or program.
- Majors and minors may not double-count any courses taken outside Bowdoin to another department or program.
- Only one semester of independent study work, at any level (intermediate or advanced), may count toward the major or minor. An advanced independent study or honors project may be used to fulfill the Level C major concentration requirement.
- No major or minor credit is given for AP scores. Students who received a minimum score of four on the US Government AP exam or the Comparative Government AP exam are eligible to receive up to one general credit toward the degree after completing a Level B course in government and legal studies in the same subfield as the AP exam and earning a minimum grade of B-. If a student has scores for more than one exam, only one total credit will be awarded. In order to receive credit for AP work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Honors Projects and Independent Study

Students seeking to graduate with honors in government and legal studies must petition the department. Interested students should

contact the honors director for specific details. Students must prepare an honors paper, which is normally the product of two semesters of advanced independent study work, and have that paper approved by the department.

Only one semester of independent study work, at any level (intermediate or advanced), may count toward the major or minor. Therefore, graduation with honors normally requires a student to complete at least ten courses in the department. An advanced independent study or honors project may be used to fulfill the Level C major concentration requirement.

Information for Incoming Students (p. 252)

First-year students interested in government and legal studies are encouraged to take one of the department's first-year writing seminars, all of which are offered during the fall term. These range across the subfields of political science, including American politics, political theory, international relations, and comparative politics. Another option appropriate for students seeking a solid background in a specific area of concentration within the discipline is to take one of the department's introductory lecture/discussion courses. In the 2022-2023 academic year: GOV 1100 Introduction to American Government and GOV 1600 Introduction to International Relations will be offered in the fall term; GOV 1400 Introduction to Comparative Government is expected to be offered in the spring term.

More advanced students may wish to consider enrolling in a 2000-level course, and many are open to first-year students. Students should be aware that enrollment pressures, particularly during the fall term, mean that only a limited number of first-year students will be able to get into many higher-level courses. Thus it is important to have alternative courses in mind when registering.

Courses

GOV 1001 (b) Representation, Participation, and Power in American Politics

Non-Standard Rotation. Enrollment limit: 16.

An introductory seminar in American national politics. Readings, papers, and discussion explore the changing nature of power and participation in the American polity, with a focus on the interaction between individuals (non-voters, voters, party leaders, members of Congress, the president) and political institutions (parties, Congress, the executive branch, the judiciary). Not open to students who have credit for or are concurrently taking Government 1100.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 1002 (b) Political Leadership

Andrew Rudalevige.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Leadership is surely one of the key elements of politics, but what does it mean? What kinds of leaders do we have, and what kinds do we want? This course looks at the treatment of leadership in political theory and in literature, as well as real world case studies, including the buildup to World War II and the twentieth century U.S. civil rights movement, to explore the qualities and behaviors associated with successful leadership. How can we reconcile authority and democracy, ethics and effectiveness? How can we expand the roles of those historically excluded from leadership? Ultimately, students will learn a wide variety of perspectives on political leadership and the opportunities and dangers it presents—both for those who want to lead, and for those who are called upon to follow.

Previous terms offered: Fall 2019, Fall 2018.

GOV 1004 (b) The Supreme Court and Social Change

Non-Standard Rotation. Enrollment limit: 16.

The Supreme Court has played a role in adjudicating many of the nation's most important social issues, addressing matters such as segregation in schools, gender discrimination, and same-sex marriage. Since Thurgood Marshall orchestrated the NAACP's legal strategy to bring civil rights issues before the court rather than Congress, many other interest groups have followed suit. Investigates the trend of seeking legal change via courts, focusing on the Supreme Court's role in social change by asking two connected questions: first, should the Supreme Court be deciding issues with such far-reaching impacts; second, since the court does wade into these matters, how effective are the justices in moving public opinion and influencing social change? Examines areas of policy in which the court has been particularly active including civil rights, access to abortion, and same-sex marriage, among others.

Previous terms offered: Fall 2021, Fall 2020.

GOV 1005 (b) Women of Color in Politics

Non-Standard Rotation. Enrollment limit: 16.

Explores the significant roles that women of color have played in American politics and around the world. Begins with the US context, starting in the antebellum era and moving forward by reading biographies/autobiographies that provide voice to the experiences faced by women of color in both traditional and non-traditional political spaces. These include women of color as close confidants to male political figures (first ladies, wives, and mistresses) and as politicians, judges, activists, and revolutionaries. Then shifts to a more global context considering the perspectives of women of color in countries where they have championed gender equality and feminism, and where they have become powerful political actors. (Same as: AFRS 1005, GSWS 1007)

Previous terms offered: Fall 2019, Fall 2018.

GOV 1006 (b) Presidential Elections: From the Constitution to the Campaign Trail

Non-Standard Rotation. Enrollment limit: 16.

This course explores key questions about American presidential elections and how they have been resolved – usually, temporarily – from 1787 to the present day. The framers of the U.S. Constitution wanted to create a presidency that would be accountable to the public but not beholden to its “passions”; the choices they made, and didn't make, have been open for debate ever since. This course covers electoral institutions and the candidate strategies and voter behavior they shape: both systematic factors and campaign idiosyncrasies. Topics for discussion include the development of the nominating process; the electoral college (should it stay or should it go?) and state-level electoral administration; campaign finance laws; voter registration and turnout; the components of voting decisions; the role of political parties and the media in the electoral process over time; and the transition to a new presidency.

Previous terms offered: Fall 2021, Fall 2020.

GOV 1011 (b) Fundamental Questions: Exercises in Political Theory

Jean Yarbrough.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Explores the fundamental questions in political life: What is justice? What is happiness? Are human beings equal or unequal by nature? Do they even have a nature, or are they “socially constructed”? Are there ethical standards for political action that exist prior to law and, if so, where do they come from? Nature? God? History? Readings may include Plato, Aristotle, the Bible, Machiavelli, Locke, Rousseau, Shakespeare, the American Founders, Tocqueville, and Nietzsche.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 1012 (b) Human Being and Citizen

Paul Franco.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

An introduction to the fundamental issues of political philosophy: human nature, the relationship between individual and political community, the nature of justice, the place of virtue, the idea of freedom, and the role of history. Readings span both ancient and modern philosophical literature. Authors may include Plato, Aristotle, Hobbes, Locke, Rousseau, the American Founders, Tocqueville, Mill, and Nietzsche.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 1024 (c) Disunited Kingdom? The Politics of Identity and Inequality in Modern Britain

Henry Laurence.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Explores the changing ways in which political conflicts over economic class, race, religion, gender, and national identity are playing out in modern Britain. Asks how rising wealth inequality and the precarity of the gig economy are influencing class identities. Looks at social mobility and the role of the education system in shaping access to power and influence. Considers how the legacies of the class system, slavery, empire and war are being fought over today, e.g., in debates over slave-trader statues, historical memory, or football players taking the knee. Asks how “Britishness” relates to enduring Irish, Scottish, and Welsh identities and how populist English nationalism emerged as a political movement. Draws on diverse intellectual sources, including political science, history, and sociology. Uses pop culture—music, fiction, films and TV—to illustrate course themes.

GOV 1027 (b) The Politics of Climate Change

Laura Henry.

Every Other Fall. Fall 2022. Enrollment limit: 16.

Provides an overview of the major actors engaged in climate politics, ranging from governments to NGOs and corporations. Examines the politics of climate change at multiple levels—from the individual to global governance—and reviews climate policy in different countries. Pays particular attention to cases where active policy making or public mobilization around climate is occurring, asking why we see initiative and innovation in climate policy in these venues and less action in other spaces. Considers themes such as how climate policy is developed differently in democracies and authoritarian regimes, how climate policy may affect economic development, the role of non-state actors such as citizens, social movements, and industry in climate politics, and the ethical implications of different climate policy options. (Same as: ENVS 1027)

Previous terms offered: Fall 2020, Fall 2019.

GOV 1028 (b) The Daughters of Mars: Women at War

Every Fall. Enrollment limit: 16.

Introduces the student to the nature of warfare throughout various cultures and epochs by focusing on the “Daughters of Mars,” women warriors and warrior queens. Includes case studies from the Trojan war, the early Eurasian steppes, classical Greece and Rome, the High Middle Ages, nineteenth-century Africa, Samurai Japan, the American Civil War, World War II, Vietnam, Iraq, and Afghanistan. Also focuses on the arguments for and against having women in combat, culminating with the contemporary realities and debates concerning American women in combat today. Student research projects investigate these and other related subjects.

Previous terms offered: Fall 2019, Fall 2018.

GOV 1029 (b, FYS) Buried Treasure, Hidden Curse? Politics of Natural Resource Extraction in Africa

Non-Standard Rotation. Enrollment limit: 16.

Oil, diamonds, gold. . . riches in the midst of poverty. How can Africa boast so many natural resources and yet remain the poorest continent on earth? What is the “resource curse?” Begins by putting Africa in the context of global resource extraction, oil in particular. Establishes Africa’s long pre-colonial experience with trade in iron, gold, salt, and slaves. The colonial period deepened the reliance of many territories on specific resources, a pattern that continues to the present. Uses Burkina Faso as a specific example of gold extraction, contrasting industrial and artisanal mining. Modern streams of prospectors throughout West Africa echo the California gold rush, but with important distinctions. An introduction to political science, the interplay between national and foreign governments, international and domestic firms, and local and migrant prospectors as they vie for access to valuable resources are highlighted. (Same as: AFRS 1029)

Previous terms offered: Fall 2018.

GOV 1030 (b) The Pursuit of Peace

Allen Springer.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Examines different strategies for preventing and controlling armed conflict in international society, and emphasizes the role of diplomacy, international law, and international organizations in the peace-making process.

Previous terms offered: Fall 2021, Fall 2019, Fall 2018.

GOV 1031 (b) Weapons of the Weak

Non-Standard Rotation. Enrollment limit: 16.

Despite enjoying a preponderance of resources, the rich and mighty don’t always win in life, or in war. Why? How do peasants and insurgents impose their will on more powerful organizations? How do wealthy armies at times lose wars to impoverished rebels? Whereas money and material can be measured, divided and counted in a spreadsheet, less quantifiable factors of conflict such as ideas, identity, legitimacy, will power and fortitude are too often discounted as secondary factors. But these may, in truth, be at the heart of war, and weapons for the weak to bring down the mighty.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 1100 (b, DPI) Introduction to American Government

Michael Franz.

Every Year. Fall 2022. Enrollment limit: 50.

Provides a comprehensive overview of the American political process. Specifically, traces the foundations of American government (the Constitution, federalism, civil rights, and civil liberties), its political institutions (Congress, presidency, courts, and bureaucracy), and its electoral processes (elections, voting, and political parties). Also examines other influences, such as public opinion and the mass media, which fall outside the traditional institutional boundaries, but have an increasingly large effect on political outcomes. Not open to students who have credit for or are concurrently taking Government 1001.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Spring 2019.

GOV 1400 (b) Introduction to Comparative Government

Henry Laurence.

Every Year. Spring 2023. Enrollment limit: 50.

Provides a broad introduction to key concepts in comparative politics. Most generally, asks why states are governed differently, both historically and in contemporary politics. Surveys subfields within comparative politics (the state, regime types, nations and nationalism, party systems, development, and civil society) to familiarize students with major debates and questions.

Previous terms offered: Spring 2022, Fall 2020, Spring 2020, Spring 2019.

GOV 1600 (b) Introduction to International Relations

William d'Ambruoso; Tulio Zille.

Every Year. Fall 2022; Spring 2023. Enrollment limit: 50.

Provides a broad introduction to the study of international relations (IR). Designed to strike a balance between empirical and historical knowledge and the obligatory theoretical understanding and schools of thought in IR. Designed as an introductory course to familiarize students with no prior background in the subject, and recommended for first- and second-year students intending to take upper-level international relations courses.

Previous terms offered: Spring 2022, Spring 2021, Fall 2019, Spring 2019.

GOV 2001 (b) Watergate and American Politics

Andrew Rudalevige.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

The "third-rate burglary" at the Watergate complex in 1972 ultimately revealed broad abuses of presidential power, led to the resignation of the president, and lent a suffix to a wide range of future scandals. Examines both Watergate itself and what it wrought in American politics. Topics include the relationship between the executive and legislative branches in areas ranging from budgetary policy to the war power; the role of the press; governmental ethics, investigations, and impeachment; and Watergate's place in popular and political culture.

Previous terms offered: Spring 2021, Spring 2019.

GOV 2002 (b) Judicial Politics

Non-Standard Rotation. Enrollment limit: 35.

Introduces students to the study of judicial politics and judicial decision-making. Approaches large topics including how the nomination and confirmation process impact the federal courts; if elected politicians and unelected actors alter the court's decision-making; factors the court considers when choosing which cases to hear; and actions the Supreme Court takes to ensure the public and lower courts comply with its rulings. Students explore different stages of the legal system (i.e. agenda-setting, decision-making, etc.) and assess their relative importance. Imparts the ability to define and apply social scientific theories to judicial decision-making and to the legal process as a whole.

Previous terms offered: Spring 2022, Spring 2021.

GOV 2005 (b) The American Presidency

Every Year. Enrollment limit: 35.

An examination of the presidency in the American political system, including the "road to the White House" (party nomination process and role of the electoral college), advisory systems, the institutional presidency, relations with Congress and the courts, and decision-making in the White House. In addition, the instructors draw from their own research interests. For Professor Martin these include presidential-congressional relations, the unilateral action of the President, the role of women as advisors within the White House and in the executive branch, and the influence of outside groups on the White House's consideration of issues. For Professor Rudalevige these include presidents' inter-branch relations, with a recent emphasis on presidential efforts to manage the wider executive branch through administrative and unilateral tactics.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2019, Spring 2019, Fall 2018.

GOV 2006 (b, DPI) Presidents and Civil Rights

Andrew Rudalevige.

Every Other Year. Fall 2022. Enrollment limit: 35.

American history displays the gap between the ideals of liberty and equality and real-life institutions and practices—as well as the struggle by numerous groups to attain civil rights in both law and fact. Presidents have sometimes been key players in working "to fulfill these rights" (as Lyndon Johnson put it), sometimes in undermining them. Focusing primarily on racial equality, this class fuses questions of political history and presidential power to explore (1) when and why presidents have been leaders or laggards in protecting civil rights, and (2) what capacity they have to seek and cement change through their rhetorical, legislative, and administrative roles and their relationship with "bottom-up" social movements. The class tracks these questions by considering key periods and longstanding debates, with emphasis on material from the 1850s to the present. Topics include abolition and "states' rights," immigration, the post-Civil War Reconstruction period, voting rights, segregation and lynching, the World War II internment of Japanese-Americans, the mid-twentieth-century civil rights movement, and the legacy of (and backlash to) the first Black president.

GOV 2010 (b) United States Congress

Non-Standard Rotation. Enrollment limit: 20.

An examination of the United States Congress, with a focus on members, leaders, constituent relations, the congressional role in the policy-making process, congressional procedures and their impact on policy outcomes, the budget process, and executive-congressional relations.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 2015 (b) Public Administration

Andrew Rudalevige.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

How does government solve problems? We deal with public organizations every day—nearly 15 percent of the United States workforce operates within one—addressing concerns ranging from playground safety to the prevention of international terrorism. This course explores how and why this vital part of government works the way it does in the American political context, examining what public organizations do and how well they do it. It assesses various aspects of public management, including personnel, budgeting, and performance evaluation, through a series of real-world cases. These vary but have included the Cuban Missile Crisis, the response to the COVID-19 pandemic, educational desegregation, and the regulation of tobacco products. Underlying all of this is the perpetual difficulty in reconciling organizational efficiency with democratic accountability.

Previous terms offered: Spring 2020.

GOV 2020 (b) Constitutional Law I

George Isaacson.

Every Fall. Fall 2022. Enrollment limit: 35.

Examines the development of American constitutionalism, the power of judicial review, federalism, and separation of powers.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 2021 (b) Constitutional Law II: Civil Rights and Liberties

Maron Sorenson.

Every Spring. Spring 2023. Enrollment limit: 35.

Examines legal questions arising from the First and Fourteenth Amendments including religious liberty, religious establishment, free speech, right to privacy, and discrimination cases. Students learn to use Westlaw and NexisUni in order to conduct legal research for a case study. This advanced course in Constitutional Law is taught almost exclusively through Supreme Court opinions, so prior experience reading and briefing case law is strongly recommended.

Prerequisites: GOV 2020.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GOV 2024 (b) Education and Law

Non-Standard Rotation. Enrollment limit: 19.

A study of the impact of the American legal system on the functioning of schools in the United States through an examination of Supreme Court decisions and federal legislation. Analyzes the public policy considerations that underlie court decisions in the field of education and considers how those judicial interests may differ from the concerns of school boards, administrators, and teachers. Issues to be discussed include constitutional and statutory developments affecting schools in such areas as free speech, sex discrimination, religious objections to compulsory education, race relations, teachers' rights, school financing, and the education of those with disabilities. (Same as: EDUC 2250)

Previous terms offered: Fall 2021, Fall 2020, Spring 2019.

GOV 2030 (b) Political Science and Policy History in the United States

Non-Standard Rotation. Enrollment limit: 35.

How have the institutions of government crafted by the American founders shaped the basic contours of the policy process? How has the policy process changed as the structure of the American political system itself has changed over time? Addresses these questions, introducing students to concepts and tools that political scientists use as they try to untangle complex patterns of policy development. Assigned readings trace the historical lineage of policies affecting health care, retirement, immigration, and other critical areas of public concern. Through analysis of these substantive policy matters, examines how and to what extent policy choices made in the past have shaped the horizon of options available to policymakers today.

Previous terms offered: Fall 2021, Fall 2019.

GOV 2035 (b) Maine Politics

Every Fall. Enrollment limit: 35.

An analysis of politics in the state of Maine since World War II. Subjects covered include the dynamics of Republican and Democratic rivalries and the efficacy of the Independent voter, the rise of the Green and Reform parties, the growing importance of ballot measure initiatives, and the interaction of ethnicity and politics in the Pine Tree State. An analysis of key precincts and Maine voting paradigms is included, as well as a look at the efficacy of such phenomena as the north/south geographic split, the environmental movement, and the impact of such interest groups as SAM, the Tea Party, and the Roman Catholic Church. Students are expected to follow contemporary political events on a regular basis.

Previous terms offered: Fall 2019, Fall 2018.

GOV 2038 (b, DPI) Race and Political Development in the United States

Every Other Year. Enrollment limit: 35.

Did the Founding bequeath to the American people a representative system of government? How have racial exclusions distorted the development of the American political regime? How have historical exclusions shaped ideas and political commitments commonly associated with the American political tradition? This course will apply a historical lens to examine the co-development of racial categories in the U.S. and of American government itself. We will look at how representative distortions built into electoral institutions (the Three-Fifths clause, for example) have altered the trajectory of policy development in arenas that are commonly taken to be unrelated to "race relations." We will also look at the contributions that ethnic and racial communities (including Black, Asian, Latinx, and ethnic white communities) have made to debates about the promise of democratic governance in the United States.

Previous terms offered: Spring 2022, Spring 2021.

GOV 2039 (b) Urban Politics

Non-Standard Rotation. Enrollment limit: 35.

Examines politics in American cities. Whereas public attention tends to focus on national and international levels of politics, highlights the importance of local and urban institutions and behavior. Considers competition between cities and suburbs, the internal environment of suburban politics, state-city and federal-city relations, racial conflict and urban governance, and the impact of private power on local decision-making. Focuses on the various individuals and institutions that shape the foundation of urban government including politicians, municipal bureaucracies, parties, political machines, interest groups, and the public. (Same as: URBS 2039)

Previous terms offered: Spring 2020.

GOV 2050 (b, DPI) Public Opinion and Voting Behavior

Michael Franz.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Examines the political behavior of ordinary citizens. Begins with a broad focus on the importance of citizen participation in a democracy, and the debate over how much or how little participation is best. Examines the reasons for citizen (non)participation, and focuses on the effects of campaigns and social capital on different forms of participation.

Previous terms offered: Spring 2022, Spring 2020, Fall 2018.

GOV 2052 (b, DPI) Race, Ethnicity, and Politics

Angel Saavedra Cisneros.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the impact of race and ethnicity on American politics. Key topics include the impact of race on government, and the development and influence of group identities. Also covers rights, representation, and voting, as well as impacts on education and criminal justice. (Same as: AFRS 2052)

Previous terms offered: Spring 2020, Fall 2019.

GOV 2055 (b) Political Parties in the United States

Jeffrey Selinger.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Throughout American political history, parties have been among the most adept institutions at organizing political conflict and, more generally, American political life. In this vein, the role of political parties in the evolution of American politics is discussed. Special attention is given to the present political context, which many characterize as an era of ideologically polarized parties. Explores and challenges this conventional wisdom.

Previous terms offered: Fall 2020, Fall 2018.

GOV 2060 (b) Campaigns and Elections

Angel Saavedra Cisneros.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Addresses current theories and controversies concerning political campaigns and elections in the United States. Takes advantage of the fact that the class meets during the heart of the next presidential and congressional campaigns. Uses concepts from the political science literature on elections to explore general trends in electoral choice at the legislative and presidential level. Students will be expected to follow journalistic accounts of the fall campaigns closely. A second set of readings introduces political science literature on campaigns and elections. These readings touch upon a wide range of themes, including voting behavior (e.g., economic voting and issue voting), campaign finance, media strategy, the role of incumbency, presidential primaries, the Electoral College, and trends in partisan realignment.

Previous terms offered: Fall 2020.

GOV 2065 Political Psychology

Angel Saavedra Cisneros.

Every Other Year. Spring 2023. Enrollment limit: 35.

Human beings are political animals by nature—we seek to gain influence in an effort to become successful in life. The motivations behind those drives are central to the study of human behavior. The study of political psychology involves using scientific understandings of human behavior and cognition to explain and explore political phenomena. It requires us to think about the many factors that impact political behaviors from the biological and neurological all the way up to the societal and institutional. In this course we will consider questions regarding how well-equipped humans are to engage in rational and political behaviors, why cooperation and selfishness emerge, why some people are persuaded while others dig their heels in, and how humans have learned to live with each other and negotiate differences. It is suggested that students enrolling for credit in PSYC should have successfully completed PSYC 1101 before enrolling in this course.

GOV 2070 (b) Mass Media and American Politics

Non-Standard Rotation. Enrollment limit: 35.

Examines the role of the media as the “fourth branch” of government. Focuses first on the history of the media throughout American political development, and then examines the role of the media in contemporary politics. Is the media biased? How? What are the effects of media coverage on citizens? What is the interplay of politicians, citizens, and journalists? Spends considerable time on the place of new media outlets such as blogs.

Previous terms offered: Fall 2021.

GOV 2080 (b, MCSR) Quantitative Analysis in Political Science

Michael Franz.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Examines the use of quantitative methods to study political phenomena. Discusses the nature of empirical thinking and how principles used for years by natural scientists, such as causation and control, have been adopted by social scientists. Introduces what these methods are (such as Chi-square tests, difference of means, and linear regression) and how they might be useful in political research and applies these methods, with particular emphasis on the use of survey data. Using quantitative methods, employs statistical computing software (such as Stata, SPSS, and/or R) as a research tool, with a focus on effective presentation of data and results. The assignments include a mix of essay writing and problem sets. The course is designed for students with little or no experience in statistical inference.

Previous terms offered: Fall 2021, Spring 2021, Spring 2020.

GOV 2200 (b) Classical Political Philosophy

Jean Yarbrough.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

A survey of classical political philosophy focusing on selected dialogues of Plato, the political writings of Aristotle, and St. Augustine's City of God. Examines ancient Greek and early Christian reflections on human nature, justice, the best regime, the relationship of the individual to the political community, the relationship of philosophy to politics, and the tension between reason and revelation.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 2205 (b) The Idea of Rome: Republicanism from Cicero to Shakespeare

Jean Yarbrough.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the political philosophy of the Roman Republic along with its reception in the Italian and English Renaissance, using readings from Cicero, Plutarch, Machiavelli, and Shakespeare. We will examine Roman ideas about the res publica [the concern of the people], the origin of civic rights, the development of ideas of popular sovereignty, and the constitutional balance of power. We will also look at Roman theories of virtue, honor, and fatherland. Finally, we will consider how these ideas were adopted and adapted by later commentators ranging from Machiavelli to Shakespeare.

Previous terms offered: Spring 2020.

GOV 2210 (b) Modern Political Philosophy

Paul Franco.

Every Spring. Spring 2023. Enrollment limit: 35.

A survey of modern political philosophy from Machiavelli to Mill. Examines the overthrow of the classical horizon, the movement of human will and freedom to the center of political thought, the idea of the social contract, the origin and meaning of rights, the relationship between freedom and equality, the role of democracy, and the replacement of nature by history as the source of human meaning. Authors may include Machiavelli, Hobbes, Locke, Hume, Rousseau, Kant, Hegel, and Mill.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GOV 2220 (b) Liberalism and Its Critics

Paul Franco.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

An examination of liberal democratic doctrine and of religious, cultural, and radical criticisms of it in the eighteenth and nineteenth centuries. Authors may include Locke, Kant, Burke, Tocqueville, Mill, Marx, and Nietzsche.

Previous terms offered: Fall 2019.

GOV 2230 (b) American Political Thought

Jean Yarbrough.

Every Spring. Spring 2023. Enrollment limit: 35.

Examines the political thought of American statesmen and writers from the founding to the twentieth century, with special emphasis on three pivotal moments: the Founding, the Crisis of the House Divided, and the growth of the modern welfare state. Readings include the Federalist Papers, the Anti-federalists, Jefferson and Hamilton, Calhoun, Lincoln, William Graham Sumner, the Progressives, Franklin Delano Roosevelt, and contemporary thinkers on both the right and the left.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GOV 2245 (c) Shakespeare and Politics

Non-Standard Rotation. Enrollment limit: 40.

Considers Shakespeare as a political thinker whose plays both interrogate important works of political philosophy and respond to pressing political matters of his day (and beyond). This team-taught course encourages open-ended debate and argumentation in order to foster informed and critical conversation between Shakespeare and Cicero, Plutarch, Machiavelli, and Montaigne, among others. Beginning with ancient and early modern philosophical reflection on human nature, the state, justice, the virtues of rulers, and ideas of citizenship, the course proceeds to take up Shakespeare's dramatization of these topics in the context of the changing English monarchy, religious controversy, the enduring influence of the Roman Republic, the emergence of capitalism, and the politics of race and gender. Note: This course fulfills the pre-1800 requirement for English majors. (Same as: ENGL 2203)

Previous terms offered: Spring 2022.

GOV 2260 (b) Contemporary Political Philosophy

Non-Standard Rotation. Enrollment limit: 35.

A survey of political philosophy in Europe and the United States since 1945. Examines a broad array of topics, including the revival of political philosophy, relativism, rationalism, contemporary liberal theory, communitarianism, conservatism, multiculturalism, feminism, and postmodernism. Authors may include Strauss, Arendt, Oakeshott, Berlin, Hayek, Rawls, Sandel, Taylor, Walzer, Okin, Habermas, and Foucault.

Prerequisites: GOV 1007 - 1019 or GOV 1040 - 1045 or GOV 2100 - 2399 or GOV 2800 - 2899 or GOV 2975 - 2979 or GOV 3100 - 3399 or GOV 3800 - 3899 or GOV 4005 - 4009.

Previous terms offered: Fall 2020.

GOV 2270 (b) Religion and Politics

Non-Standard Rotation. Enrollment limit: 35.

Examines the relationship between religion and politics – the so-called theological-political question – primarily in modern Europe and America. Focuses first on the tension between and eventual separation of church and state in the early modern period; then considers the implications and complications of this historic separation, looking at recent Supreme Court cases, as well as contemporary discussion of the relationship between religion and politics. Comparisons with the treatment of this issue in the Islamic world are made. Authors include Machiavelli, Luther, Calvin, Spinoza, Locke, Jefferson, Madison, Tocqueville, as well as a variety of contemporary and Islamic writers.

Previous terms offered: Fall 2021, Fall 2018.

GOV 2275 (b) The Crescent and the Cross: Islamic and Christian Political Philosophy in the Medieval World

Non-Standard Rotation. Enrollment limit: 35.

An exercise in comparative political theory, this course considers the medieval political philosophy of the Christian and Islamic worlds. It explores how Muslim and Christian thinkers responded differently to the tension between philosophy and religious authority. It examines how these two traditions of thought adopted and adapted classical philosophy in a new monotheistic context. Authors may include Augustine, Al-Farabi, Aquinas, Averroes, Dante, and Ibn Khaldun.

Previous terms offered: Spring 2019.

GOV 2280 (b) Eros and Politics

Non-Standard Rotation. Enrollment limit: 35.

What and who do we love? Do we seek another self or someone to complement our natures? Is there something other than human beings that we love? The Good, God, or some other principle? How do the answers to these questions affect our views of politics and justice? Readings include Plato's "Symposium"; the Bible; Shakespeare; Rousseau's "Emile"; Tocqueville; and contemporary thinkers.

Prerequisites: GOV 1007 - 1019 or GOV 1040 - 1045 or GOV 2100 - 2399 or GOV 2800 - 2899 or GOV 2975 - 2979 or GOV 3100 - 3399 or GOV 4005 - 4009.

Previous terms offered: Spring 2021.

GOV 2400 (b, IP) West European Politics

Non-Standard Rotation. Enrollment limit: 35.

Analyzes the dynamics of West European political systems, including the varieties of parliamentary and electoral systems and the formation of governments and lawmaking. Addresses contemporary political challenges in Britain, France, Germany, Italy, and other states, considering topics such as institutional reform, welfare state policies, economic growth and unemployment, immigration, relations with the United States, and other foreign policy concerns. The European Union is not examined, as it is a separate course, Government 2500: The Politics of the European Union.

Previous terms offered: Fall 2019.

GOV 2402 (b, IP) European Political Development

Non-Standard Rotation. Enrollment limit: 35.

Examines major themes in the history of European political development – West and East – such as the emergence of nation-states, the development of political institutions (democratic and nondemocratic), divergent experiences with industrialization and economic governance (liberal, socialist, and communist), and the role of ideology in European politics. Then investigates contemporary political challenges in Europe: the rise of extremist parties, migration and diversity, the climate crisis, to shifting relations with other major global powers. Explores how theories and concepts can be applied to the domestic politics of European states. (European integration is covered in Gov 2500: The Politics of the European Union.)

Previous terms offered: Spring 2022.

GOV 2405 (b, IP) British Politics and Society

Non-Standard Rotation. Enrollment limit: 35.

Comprehensive overview of modern British politics in historical, social and cultural context. Considers the historical formation of the United Kingdom and the development of the modern democratic state, but focuses on political developments after 1945. Analyzes party politics, the Welfare State, Thatcherism, and the contemporary political scene. Explores policy issues including healthcare, education, economic policy, and the role of the media.

Previous terms offered: Fall 2021, Spring 2020, Spring 2019.

GOV 2410 (b, IP) Post-Communist Russian Politics and Society

Laura Henry.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Explores the most dramatic political event of the twentieth century: the collapse of Soviet communism and Russia's subsequent political development. Begins by examining the Soviet system and the political and social upheaval of the late Soviet period. Proceeds to investigate the challenges of contemporary Russian politics, including the semi-authoritarian regime, the challenges of sustainable economic growth and modernization, the demographic crisis, the loss of superpower status, and the search for a role in international politics. Comparisons made with other countries in the post-Communist region.

Previous terms offered: Fall 2020, Fall 2018.

GOV 2440 (b, IP) Contemporary Chinese Politics

Christopher Heurlin.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the history and politics of China in the context of a prolonged revolution. Begins by examining the end of imperial rule, the development of Modern China, socialist transformations and the establishment of the PRC. After a survey of the political system as established in the 1950s and patterns of politics emerging from it, the analytic focus turns to political change in the reform era (since 1979) and the forces driving it. The adaptation by the Communist Party to these changes and the prospects of democratization are also examined. Topics include political participation and civil society, urban and rural China, gender in China, and the effects of post-Mao economic reform. (Same as: ASNS 2060)

Previous terms offered: Fall 2020, Fall 2018.

GOV 2444 (b, IP) Political and Economic Development in East Asia

Non-Standard Rotation. Enrollment limit: 35.

Provides an introduction to diversity and development in East Asia. The course first focuses on the rise and decline of a China- and a Japan-centric order before WWII and discusses their historical impacts on today's domestic politics and international relations. The course then traces the postwar political economic developments. It examines the economic miracles in Asian countries and discusses their democratization. It also presents the process of Chinese economic reform and its impacts on the regional order. The course finishes with an examination of the Asian financial crisis and its impacts on regional politics. (Same as: ASNS 2920)

Previous terms offered: Fall 2020, Fall 2019.

GOV 2445 (b, IP) Asian Communism: The Politics of China, Vietnam, North Korea, and Mongolia

Non-Standard Rotation. Enrollment limit: 35.

Examines the Asian communism in China, Vietnam, North Korea, and Mongolia. Asian communism presents a series of fascinating questions. Why did communist revolutions occur in some Asian states but not others? Why were relations between some Asian communist states peaceful while others were hostile? Why did some adopt significant economic reforms while others maintained command economies? Why did communist regimes persist in most Asian states, while Communism fell in Mongolia and all of Europe? The approach of the course is explicitly comparative and structured around thematic comparisons between the four states. (Same as: ASNS 2860)

Previous terms offered: Spring 2022.

GOV 2446 (b, IP) Global Media and Politics

Non-Standard Rotation. Enrollment limit: 35.

Examines the interconnections between media, politics and society in cross-national perspective. Explores national differences in issues such as free speech policy; privacy rights; censorship and self-censorship; news production and consumption; and the role of public broadcasters such as the BBC and NHK. Also considers the role of pop culture in shaping national identities and creating diplomatic "soft power." Cases drawn primarily but not exclusively from the UK, Japan and the USA. (Same as: ASNS 2321)

Previous terms offered: Fall 2018.

GOV 2450 (b, IP) Japanese Politics and Society

Henry Laurence.

Every Fall. Fall 2022. Enrollment limit: 35.

Comprehensive overview of modern Japanese politics in historical, social, and cultural context. Analyzes the electoral dominance of the Liberal Democratic Party, the nature of democratic politics, and the rise and fall of the economy. Other topics include the status of women and ethnic minorities, education, war guilt, nationalism, and the role of the media. (Same as: ASNS 2320)

Previous terms offered: Fall 2021, Fall 2019, Fall 2018.

GOV 2455 (b, IP) Japan and the World

Non-Standard Rotation. Enrollment limit: 35.

Explores the development of Japanese international relations since the Second World War and how Japan is currently adjusting its policies to meet the challenges of the twenty-first century. Despite having the world's third-largest economy and advanced technological resources, Japan has been widely viewed as underperforming in world affairs. The central question is whether Japan remains an "underperformer." Begins with a brief examination of Japanese foreign relations after the Meiji Restoration of 1868, then examines postwar Japanese foreign policy. Relations with the United States and China will receive special attention. Topics include Japanese participation in international institutions, the historical legacy of its past actions, the impact of US military bases in Japan, and contemporary debates over immigration. (Same as: ASNS 2395)

Previous terms offered: Spring 2021, Spring 2020.

GOV 2465 (b, DPI, IP) The Politics of Dissent in Latin America

Tulio Zille.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course explores the contemporary politics of dissent in Latin America. To do so it goes beyond conventional institutional and electoral settings, since dissent is not simply a moment of protest or resistance, nor the collective plea for rights. Instead it can be the moment when a given way of living or social order is unexpectedly modified and challenged with the introduction of a new agenda for action. Topics covered may include: Latin American intellectuals and decolonial theory, the challenges to development discourse by indigenous peoples, the role of music and the arts in resistance against political violence, the importance of social media in contemporary movements for political change, and the contestation of established notions of identity and citizenship (e.g., by queer minorities.) We will draw from cases in Argentina, Bolivia, Brazil, Ecuador, and Mexico, as well as including Latinx peoples and cultures in the United States. (Same as: LACL 2538)

Previous terms offered: Fall 2021, Fall 2020.

GOV 2470 (b, IP) Global Political Ecology

Tulio Zille.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

In light of the ecological crisis exacerbated by climate change, scholars in the humanities and social sciences have become increasingly preoccupied with the relationship between humans and nature, in a field of study loosely termed "political ecology." Central to this field are critiques of the separation between humans and nature in modernity and how we should understand this relationship. This course expands the current debates in this field beyond the intellectual circles of Europe and North America—which have focused on science and technology studies and new materialisms—to consider contributions that have remained marginal (for example, indigenous political thought and decolonial theory). The course will include authors from various disciplines ranging from indigenous intellectuals and activists to academics, with a focus on the Global South, including the work of Chilean filmmaker Patricio Guzmán, Maori scholar Linda Tuhiwai Smith, Indian activist Vandana Shiva, and Martinican writer Édouard Glissant. (Same as: ENVS 2340, LACL 2540)

Previous terms offered: Spring 2021.

GOV 2480 (b, IP) Comparative Constitutional Law

George Isaacson.

Every Other Fall. Spring 2023. Enrollment limit: 19.

A comparative examination of constitutional principles and constitutional processes in democratic and non-democratic countries. Explores the roles that constitutions play in shaping civil society and defining the relationship between governments and the people they govern. Compares American constitutional law with that of other nations to scrutinize alternative models of governance, and to gain new perspectives regarding the legal foundations for the protection of individual rights. Special attention given to the constitutions of Canada, India, Germany, South Africa, Israel, and the People's Republic of China, along with that of the United States. Structural issues include consideration of executive-legislative separation of powers, constitutional courts, federalism, and church-state relations. Discusses arguments in favor of and against a written Bill of Rights, as well as such specific issues as emergency powers, political dissent, hate speech, religious belief, reproductive choice, racial and gender discrimination, public welfare, privacy, and police investigative authority.

Previous terms offered: Spring 2021, Fall 2018.

GOV 2486 (b, IP) The Politics of Dictatorship: Authoritarian Resilience and Democratization

Christopher Heurlin.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Despite the end of the Cold War, dictatorship has persisted, even thrived. At least 40 percent of states in the world remain authoritarian. Introduces students to the social and political logic of dictatorship. Explores questions such as: Where do dictatorships come from? Why might people support dictatorships? What effect does dictatorship have on political, economic, and social outcomes? How do dictatorships differ from one another? Why are some dictatorships resilient and stand the test of time while some quickly collapse? When dictatorships collapse, why are some dictatorships replaced by other dictatorships, while others democratize? Concentrates on the post-World War II era and explores the dynamics of dictatorship in regions throughout the world, including the Middle East, Latin America, Asia, Europe, and Africa.

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

GOV 2488 (b, IP) Comparative Political Economy

Non-Standard Rotation. Enrollment limit: 35.

Introduces core concepts, theories, and debates within comparative political economy. Considers the origins and emergence of market economies, their spread, and contemporary political challenges. Explores key figures in political economic thought including Smith, Marx, Polanyi, and Hayek, among others. Examines major research and thought traditions in political economy including liberalism, Keynesianism, neoliberalism, and critical political economy. Investigates substantive topics including regulation, economic crises, property rights, development, the welfare state, and resource governance. Cases from the United Kingdom, United States, Scandinavia, Central Asia, Latin America, and sub-Saharan Africa. Presumes no prior knowledge of economics.

Previous terms offered: Fall 2018.

GOV 2492 (b, IP) Food, Environment, and Development

Non-Standard Rotation. Enrollment limit: 35.

Explores the nexus of food, environment, and development in global environmental politics. Examines the interconnected challenges of governing across trans-boundary socio-ecological systems amidst competing demands on scarce natural resources—to sustain a global food system, foster economic development, and promote equity and justice. Prepares students to engage with interdisciplinary scholarship from political science, international development, public policy, and food studies. Draws on comparative cases from local to global scales, with an emphasis on Maine, the U.S., and Latin America. (Same as: ENVS 2313, LACL 2513)

Prerequisites: ENVS 1101 or ENVS 2330 (same as GOV 2910).

Previous terms offered: Spring 2021, Spring 2020, Spring 2019.

GOV 2500 (b, IP) The Politics of the European Union

Non-Standard Rotation. Enrollment limit: 35.

Explores the historical foundations, scope, and consequences of European political and economic integration since 1951. Examines how the European Union's supranational political institutions, law, and policies have developed and how they affect the domestic politics of member states. Considers challenges faced by the European Union: enlargement to include Eastern European members, the loss of national sovereignty and the “democratic deficit,” the creation of a European identity, and the development of a coordinated foreign policy.

Previous terms offered: Fall 2021, Spring 2019.

GOV 2530 (b, IP) Politics and Societies in Africa

Non-Standard Rotation. Enrollment limit: 35.

Surveys societies and politics in sub-Saharan Africa, seeking to understand the sources of current conditions and the prospects for political stability and economic growth. Looks briefly at pre-colonial society and colonial influence on state-construction in Africa, and concentrates on three broad phases in Africa's contemporary political development: (1) independence and consolidation of authoritarian rule; (2) economic decline and challenges to authoritarianism; (3) democratization and civil conflict. Presumes no prior knowledge of the region. (Same as: AFRS 2530)

Previous terms offered: Fall 2021, Fall 2019.

GOV 2540 (b, IP) U.S. - China Relations

Non-Standard Rotation. Enrollment limit: 35.

Examines the development of United States relations with China. Begins with a brief historical examination of the Opium War, then examines United States policy towards the Nationalists and the Communists during the Chinese Civil War. In the aftermath of the civil war and subsequent revolution, the role of China in the Cold War will be discussed. Then focuses on more contemporary issues in United States-China relations, drawing links between the domestic politics of both countries and how they influence the formulation of foreign policy. Contemporary issues addressed include human rights, trade, the Taiwanese independence movement, nationalism, and China's growing economic influence in the world. (Same as: ASNS 2061)

Previous terms offered: Fall 2021, Spring 2021, Spring 2020.

GOV 2550 (b, IP) The Two Koreas and Geopolitics of Northeast Asia

Non-Standard Rotation. Enrollment limit: 35.

Examines the tumultuous developments on the Korean peninsula over the past century and their significance from historical, security, economic, and geopolitical perspectives. The challenges and choices facing the Korean people, their governments, neighboring countries, and the United States are assessed to understand how conditions have evolved to the high-stakes tensions that exist today, and what forces are shaping the future of both Koreas and Northeast Asia. The first half of the course considers the history of both Koreas and the conditions that underlie the modern political environment. The second half focuses on political developments of the last twenty-five years. (Same as: ASNS 2872)

Previous terms offered: Spring 2019.

GOV 2570 (b, IP) The Politics of Development: Poverty, Prosperity, and Political Change

Non-Standard Rotation. Enrollment limit: 35.

Examines the meaning of development from economic and political perspectives. Considers various theories and practices of development that have been applied to newly independent states in Asia, Latin America, and Africa. Investigates why trajectories of economic growth and political stability have been so uneven in different regions of the world. Incorporates views from both external and internal actors on issues such as foreign aid, multilateral institutions, good governance, and democratic participation.

Previous terms offered: Spring 2022, Fall 2019.

GOV 2572 (b, DPI, IP) The Politics of Ethnicity: Construction and Mobilization of Ethnic Identity Claims

Non-Standard Rotation. Enrollment limit: 35.

Ethnicity is a crucial dividing line in most societies. Examines what ethnicity is, when it is mobilized peacefully and when it ignites violence, and what political tools exist to moderate these conflicts. Explores first the various definitions of ethnicity and theories of ethnic identity formation; then studies the different explanations for why ethnic divisions inspire conflict within societies and evaluates possible means of mitigating violence. Draws on case studies from around the world, particularly those in Africa and Asia.

Previous terms offered: Spring 2021, Spring 2019.

GOV 2573 (b, IP) States of Languages and Languages of States

Non-Standard Rotation. Enrollment limit: 35.

Examines the role of language in politics. Governments historically have tried to spread a single language within their populations through education and military conscription. What are the roots of this motivation? Does language standardization deepen the possibility for citizen participation and democracy? How have minority language groups responded? As the right to language has become a global norm, what effects will this have on the cohesiveness of existing states? Will globalization bring with it linguistic fragmentation or the worldwide spread of a few languages such as English, Arabic, and Chinese? Looks at the language question in the United States as well as in cases drawn from Europe, Asia, and Africa. Students choose a country in which to evaluate the historical and present state of languages and language(s) of state. Topics touched by language include democracy, state-building, colonization, violence, education, human rights, and globalization.

Previous terms offered: Spring 2022, Spring 2020, Fall 2018.

GOV 2574 (b, IP) Rioters, Rebels, and Revolutionaries: Contentious Politics

Christopher Heurlin.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Examines the rough and tumble world of contentious politics, which includes forms of social mobilization as diverse as riots, revolutions, and rebellions. While much of "routine politics" takes place through elections, examines activities that cross over into the extraordinary and asks questions such as: What is the relationship between elections and riots? Why do some revolutionary movements succeed while others fail? Given great personal risks, why do some people protest in dictatorships? How do states respond to protests and why? Examines the commonalities and differences between these diverse events through case studies throughout the developing world, including Asia, Latin America, and the Middle East.

Previous terms offered: Spring 2021.

GOV 2577 (b, DPI, IP) Arctic Politics

Laura Henry.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

The Arctic looms in our political imagination as the region most directly affected by a changing global climate that threatens the displacement of northern communities and cultures. It is also a site of fierce competition for state control and economic development. This course investigates the Arctic as a political space that encapsulates elements of comparative politics and international relations. It examines cross-national variation in policies toward Arctic regions in states such as the United States, Canada, Russia, Iceland, and Norway. It also explores dynamic international engagement around the Arctic by state officials, corporations, indigenous communities, and activists. The course will address governance issues such as indigenous rights, economic development and natural resource exploitation, environmental issues and climate change, the potential militarization of the region, international law, and the role of the Arctic Council. (Same as: ENVS 2377)

Previous terms offered: Spring 2021, Spring 2019.

GOV 2580 (b, IP) Advanced Comparative Politics: Government, War, and Society

Every Spring. Enrollment limit: 35.

An examination of the forces and processes by which governments and societies approach and wage or avoid wars. The theories and practices of warfare of various political systems are analyzed and particular attention is paid to the interface where politics, society, and the military come together under governmental auspices in various comparative contexts. Specific examples from Africa, Asia, Europe, and North America are examined.

Previous terms offered: Spring 2020, Spring 2019.

GOV 2596 (b, IP) Buried Treasure, Hidden Curse? The Politics of Natural Resource Extraction in Africa

Non-Standard Rotation. Enrollment limit: 16.

: Oil, diamonds, gold. . . riches in the midst of poverty. How can Africa boast so many natural resources and yet remain the poorest continent on earth? What is the "resource curse?" Begins by putting Africa in the context of global resource extraction, oil in particular. Establishes Africa's long pre-colonial experience with trade in iron, gold, salt, and slaves. The colonial period deepened the reliance of many territories on specific resources, a pattern that continues to the present. Uses Burkina Faso as a specific example of gold extraction, contrasting industrial and artisanal mining. Modern streams of prospectors throughout West Africa echo the California gold rush, but with important distinctions.. A research-based writing seminar in political science, the course will highlight the interplay between national and foreign governments, international and domestic firms, and local and migrant prospectors as they vie for access to valuable resources. Students will gain skills in library research, writing and revision, peer review and oral presentations. (IRBW) (Same as: AFRS 2596)

Previous terms offered: Fall 2021.

GOV 2600 (b, IP) International Law

Allen Springer.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

The modern state system, the role of law in its operation, the principles and practices that have developed, and the problems involved in their application.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

GOV 2605 (b, DPI, IP) Race and International Relations

Non-Standard Rotation. Enrollment limit: 35.

Examines race and racism as powerful organizing forces in world politics. Specifically, examines global political and economic institutions like colonialism, sovereignty, empire, development, and foreign policy while also scrutinizing how race has been historically ignored by scholars in international relations as a subfield of political science. Adopts an interdisciplinary approach and focuses on in-class discussions to examine the ways racist norms and similar forms of ascriptive hierarchy shape international politics.

Previous terms offered: Spring 2022.

GOV 2615 (b, IP) International Environmental Policy

Non-Standard Rotation. Enrollment limit: 35.

Examines the political, legal, and institutional dimension of international efforts to protect the environment. Problems discussed include transboundary and marine pollution, maintaining biodiversity, and global climate change. (Same as: ENVS 2308)

Previous terms offered: Spring 2021, Spring 2020.

GOV 2670 (b) United States Foreign Policy

William d'Ambruoso.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the development and conduct of United States foreign policy. Analyzes the impact of intragovernmental rivalries, the media, public opinion, and interest groups on the policy-making process, and provides case studies of contemporary foreign policy issues.

Previous terms offered: Fall 2020, Spring 2020.

GOV 2680 (b, IP) International Security

William d'Ambruoso.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

National security is a principal interest for states, but what exactly does that mean in international political life, and for the security of ordinary people like us? What strategic options are available to decision makers tasked with protecting national security? How much do national security policies reflect coherent planning, and how much are policies the product of competing international, economic, and technological constraints, or domestic political interests? Analyzing the strategy and politics of diplomacy, alliances, threats, aid, and war, aims to provide an overview of security studies within the field of international relations.

Previous terms offered: Fall 2020, Spring 2019.

GOV 2690 (b, DPI, IP) Islam and Politics

Non-Standard Rotation. Enrollment limit: 35.

Analyzing the intersection of politics and multiple expressions of Islam in both state governments and transnational movements, studies Islam as a social, ethical, and political force in the modern era. Offers a basic introduction to Muslim history and the Islamic religion, explores various Islamic social and political movements, analyzes contending understandings of the interaction between politics and Islam, as well as investigating the tensions between the Islamic and western political traditions, including democracy and Islam. Relying on texts from influential revolutionaries such as Qutb and Khomeini as well as perspectives on political Islam from academic scholars, explores the heart of politics, society, and religion in the modern Muslim world. (Same as: MENA 2690)

Previous terms offered: Fall 2021, Fall 2018.

GOV 2694 (b, IP) International Relations in East Asia

Non-Standard Rotation. Enrollment limit: 35.

Analyzes relations between the various states in East Asia and between those states and countries outside the region, including the United States. The course addresses empirical and theoretical questions, including: What are the threats to peace and prosperity in the region, and how are the different countries responding? What explains the foreign policy strategies of different countries, including China and Japan, and how have they changed over time? How can broader theories of international relations inform, and be informed by, the nature of foreign policy choices in this region? Is East Asia headed toward greater cooperation or conflict? (Same as: ASNS 2921)

Previous terms offered: Fall 2020, Fall 2019.

GOV 2902 (b) Talking to Farmers and Fishermen: Social Science Field Methods for Environmental Policy Research

Shana Starobin.

Every Fall. Spring 2023. Enrollment limit: 12.

Natural resource users—like farmers and fishermen—possess intimate knowledge of the complex socioecological systems where they live and work. How can researchers appropriately and ethically engage individual and community stakeholders as participants in environmental research? Through assignments, activities, and class excursions (lab), students will gain competence in collaborative field research skills, including the ethical conduct of research with human subjects, participant observation, conducting interviews and focus groups, writing up field notes, developing metadata, and establishing protocols for data management. Students will also practice preliminary data analysis—transcription and text analysis of field collected data, descriptive statistics, and identification of future research questions. (Same as: ENVS 2314)

Prerequisites: ENVS 2330 (same as GOV 2910) or ENVS 2313 (same as GOV 2482 and LAS 2513).

Previous terms offered: Spring 2021, Fall 2019, Spring 2019.

GOV 2905 (b, MCSR) Advanced Quantitative Analysis in Political Science

Every Other Spring. Enrollment limit: 35.

This course introduces and discusses multivariate regression models used in political science. This includes an extended discussion of linear regression followed by a focus on regression models for dichotomous dependent variables (e.g., did a candidate win or lose), ordered variables (e.g., levels of support for candidates), and event counts. The course considers and reviews ordinary least squares regression and then introduces maximum likelihood estimation. Students will apply these regression models by analyzing existing datasets using a statistical software package such as Stata or R. The final project will involve some original data collection and analysis of those data. Along with teaching these statistical techniques, the course will involve extended discussions of the opportunities and challenges of the empirical study of political phenomena. Some prior math experience is needed, as the course will review matrix algebra and differential calculus.

Prerequisites: GOV 2080 or SOC 2020 or PSYC 2520 or MATH 1300 or MATH 1400 or MATH 2606 or ECON 2557.

Previous terms offered: Spring 2022.

GOV 2910 (b, IP) Environmental Policy and Politics

Shana Starobin.

Every Fall. Spring 2023. Enrollment limit: 35.

Explores the political, economic, legal, ethical, and institutional dimensions of the environmental policy-making process. Examines the formation and implementation of regulatory institutions and policies across a range of issues in the U.S. and internationally—including terrestrial, coastal and marine natural resources management, biodiversity, water and air pollution, sustainable development, and environmental justice. Prepares students to analyze historical cases as well as contrive and evaluate competing policy alternatives to emerging problems. (Same as: ENVS 2330)

Prerequisites: ENVS 1101.

Previous terms offered: Spring 2022, Fall 2020, Fall 2019, Fall 2018.

GOV 2915 (b) Environmental Law and Policy

Every Other Fall. Enrollment limit: 35.

Critical examination of some of the most important American environmental laws and their application to environmental problems that affect the United States and the world. Students learn what the law currently requires and how it is administered by federal and state agencies, and are encouraged to examine the effectiveness of current law and consider alternative approaches. (Same as: ENVS 2304)

Previous terms offered: Fall 2021, Fall 2019.

GOV 3010 (b) Advanced Seminar in American Politics: Presidential-Congressional Relations

Non-Standard Rotation. Enrollment limit: 15.

Examines presidential-congressional relations through a number of perspectives, including use of historical, quantitative, and institutional analyses. Readings consider the relationship between the executive branch and Congress in both the domestic arena (including regulatory and budgetary policy) and in the area of foreign and defense policy.

Previous terms offered: Spring 2022, Spring 2021, Spring 2019.

GOV 3020 (b) Money and Politics

Non-Standard Rotation. Enrollment limit: 15.

Considers the historical and contemporary relationship between money and government. In what ways have moneyed interests always had distinctive influences on American politics? Does this threaten the vibrancy of our representative democracy? Are recent controversies over campaign finance reform and lobbying reform signs that American government is in trouble? Reading, writing, and discussion intensive, considers the large academic literature on this subject, as well as the reflections of journalists and political practitioners, with the overall goal of understanding the money/politics relationship in ways that facilitate the evaluation of American democracy.

Previous terms offered: Spring 2021, Fall 2019.

GOV 3022 (b) United States Supreme Court Simulation

Maron Sorenson.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

The decisions issued by the United States Supreme Court have enormous implications for the litigants in the case, lower courts, government, and society as a whole. Thus, it is important to analyze and understand the process by which the court makes its decisions and policies. Investigates the processes by which cases get to the Supreme Court, are accepted or denied, and are decided. The means for investigating this process entails a semester-long simulation. Students assume the roles of the justices, the solicitor general, litigants, and other actors in the judicial system. In order to inform the simulation, students also complete focused studies of court procedures, judicial process, and judicial decision-making.

Prerequisites: GOV 2002 or GOV 2020 or GOV 2021 or GOV 2600 or GOV 2940 (same as EDUC 2250).

Previous terms offered: Fall 2018.

GOV 3025 (b) The Politics of Policy Implementation

Non-Standard Rotation. Enrollment limit: 16.

What happens after a bill becomes a law? During implementation, the separated system of American governance comes into sharp relief across the branches of government and across three (or more) levels of government as well. Examines how the wide range of institutional players involved – from legislators to regulators to chief executives to judges to front-line service providers – act and interact. Case studies (e.g., entitlement reform, education policy, intelligence reorganization, health care) used to evaluate competing theoretical frameworks.

Prerequisites: GOV 1100 or GOV 2000 - 2099.

Previous terms offered: Spring 2022, Spring 2019.

GOV 3030 (b) American Political Development

Jeffrey Selinger.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Examines how the United States developed from a modest, agrarian republic into a modern, mass democracy. How have the forces often associated with the process of modernization (e.g., the expansion of commerce and new media, the growth of industry, the rise of a welfare and regulatory state) changed the shape of America's representative institutions and the nature of American political culture? Readings focus on the development of the electoral system, the emergence of a modern bureaucratic establishment, and the rise of the presidency as the focal point of party politics. Discussion examines how these and other developments have shaped America's liberal democratic values and transformed its political institutions.

Previous terms offered: Spring 2022, Spring 2020.

GOV 3035 (b) Presidential Power and the Law

Non-Standard Rotation. Enrollment limit: 15.

Grapples with current and historical questions of presidential power. Article II of the US Constitution is brief, and vague; the executive power is nowhere defined. How do presidents gain traction against the legislative and judicial (and even the executive) branches? Case studies include a variety of claims made by presidents about their unilateral administrative tools and in the contemporary "war on terror" (with regard to detention, interrogation, surveillance, due process, etc.), as well as the reaction they have provoked from other branches of government, such as Congress and the Supreme Court.

Prerequisites: GOV 1100 or GOV 2000 - 2099.

Previous terms offered: Spring 2021, Spring 2020.

GOV 3080 (b) Methodologies of Political Behavior

Michael Franz.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

The course reviews the history of research on political behavior in American politics. We begin with the seminal studies on political behavior, such as *The American Voter* from 1960, which established the importance of survey research to understand why citizens do or not participate in politics. We then consider the evolution of research on political behavior, with a focus on changing methodological approaches. This includes the expanding use of surveys into the 1990s (and challenges of securing representative samples), which was followed by a pivot towards experiments (and a focus on establishing causation over correlation). We will also consider evolving theoretical approaches, from a focus on the role of partisanship to rational choice theories of behavior to a focus on the emotional and psychological motivations. No prior statistical training is needed for the course. We will review/discuss common statistical approaches in the class. Assignments will be papers/presentations.

Prerequisites: GOV 2000 - 2199.

GOV 3200 (b) Advanced Seminar in Political Theory: Tocqueville

Non-Standard Rotation. Enrollment limit: 15.

More than 150 years after its publication, "Democracy in America" remains the most powerful sympathetic critique of modern liberal democracy ever written. Careful reading of the text and selected secondary sources leads to examination of Tocqueville's analysis of the defects to which the democratic passion for equality gives rise and consideration of possible solutions that, in contrast to the Marxist and Nietzschean critiques, aim at preserving the liberal democratic way of life.

Previous terms offered: Spring 2022, Spring 2020.

GOV 3210 (b) Advanced Seminar in Political Theory: Jean-Jacques Rousseau

Non-Standard Rotation. Enrollment limit: 15.

An examination of the multifaceted and revolutionary thought of Jean-Jacques Rousseau, including his critique of the Enlightenment, his rejection of classical liberalism, his defense of democracy, his relationship to the French Revolution, his contribution to Romanticism, and his views on freedom, equality, education, religion, art, economics, the family, love, and the self.

Prerequisites: GOV 1007 - 1019 or GOV 1040 - 1045 or GOV 2100 - 2399 or GOV 2800 - 2899 or GOV 2975 - 2979 or GOV 3100 - 3399 or GOV 3800 - 3899 or GOV 4005 - 4009.

Previous terms offered: Spring 2019.

GOV 3220 (b) Nietzsche

Non-Standard Rotation. Enrollment limit: 15.

An examination of the broad range of Nietzsche's thought with a special view to its moral and political implications. Readings include Nietzsche's major works, including *Thus Spoke Zarathustra*. May also consider various twentieth-century interpretations and appropriations of Nietzsche's philosophy.

Prerequisites: GOV 1007 - 1019 or GOV 1040 - 1045 or GOV 2100 - 2399 or GOV 2800 - 2899 or GOV 2975 - 2979 or GOV 3100 - 3399 or GOV 3800 - 3899 or GOV 4005 - 4009.

Previous terms offered: Spring 2021.

GOV 3230 (b) Martin Heidegger and the Politics of Being

Paul Franco.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

Examines the philosophy of Martin Heidegger, arguably the most important philosopher of the twentieth century, with special attention to its ethical and political implications. Considers Heidegger's influence on major philosophical movements such as phenomenology, existentialism, hermeneutics, and deconstructionism, as well as on philosophers such as Arendt, Strauss, Gadamer, Sartre, Derrida, and Foucault. Also considers Heidegger's historicism, his conception of philosophy, his critique of science and technology, and, most troublingly, his involvement with the Nazis.

GOV 3400 (b, IP) Advanced Seminar in Japanese Politics

Henry Laurence.

Every Other Spring. Spring 2023. Enrollment limit: 15.

Analyzes the political, social, and cultural underpinnings of modern politics and asks how democracy works in Japan compared with other countries. Explores how Japan has achieved stunning material prosperity while maintaining among the best healthcare and education systems in the world, high levels of income equality, and low levels of crime. Students are also instructed in conducting independent research on topics of their own choosing. (Same as: ASNS 3300)

Prerequisites: ASNS 2320 (same as GOV 2450).

Previous terms offered: Spring 2019.

GOV 3410 (b, IP) Capitalism and State Power in China

Christopher Heurlin.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

Seminar. Explores the paradoxes of contemporary China, a communist regime that boasts economic growth rates that are the envy of the world. While communism failed in Eastern Europe decades ago, the Chinese Communist Party has been surprisingly successful and leads one of the oldest dictatorships in the world. Explores how capitalism and state power actually work in China. Topics include ethnic conflict, patronage and corruption, elite politics, popular protest, elections, and civil society. Students develop and write a research paper on contemporary Chinese politics. Previous coursework in Chinese politics is not necessary. (Same as: ASNS 3060)

Prerequisites: GOV 1000 - 2969 or GOV 3000 or higher or ASNS 1000 - 2969 or ASNS 3000 or higher.

Previous terms offered: Spring 2022, Spring 2021, Spring 2019.

GOV 3420 (b, IP) Governments Morals and Markets: Topics in Comparative Public Policy

Non-Standard Rotation. Enrollment limit: 15.

Studies the relationship between governments and markets in policy areas such as health care, social welfare, education, media and the environment. Explores the moral and political dimensions of policy questions such as: What should or should not be for sale (e.g. drugs, healthcare, votes, pornography etc.) What justifies regulation of commercial activities? Under what circumstances, if any, should benefits such as flood insurance or tax relief for mortgages be provided with public funds? Should the government protect people from the consequences of their own choices? Cross-national case studies from the United Kingdom, USA, Japan and Europe.

Prerequisites: Two of: either GOV 1020 - 1029 or GOV 1400 or GOV 2400 - 2599 or GOV 3400 - 3599 and either GOV 1020 - 1029 or GOV 1400 or GOV 2400 - 2599 or GOV 3400 - 3599.

Previous terms offered: Spring 2022, Spring 2020.

GOV 3430 (b, IP) Private Actors, Public Goods: Corporate Social Responsibility (CSR) in Comparative Perspective

Every Year. Enrollment limit: 16.

From fair trade chocolate to Kimberly Process certified diamonds, voluntary sustainability initiatives increasingly "govern" complex trans-border trade – to minimize environmental damages and human rights abuses exacerbated by globalization, especially when states prove incapable or unwilling to do so. Intensive in reading, research, and discussion, adopts a commodity-centered lens to examine transnational trade in comparative perspective. Students explore how global value chains – like "fast fashion" from Bangladesh and cell phones from China – defy conventional notions of political, geographic, and ecological boundaries and prompt a shift from "government" to "governance." (Same as: ENVS 3908)

Prerequisites: Two of: ENVS 1101 and either ENVS 2302 or ENVS 2304 (same as GOV 2915) or ENVS 2330 (same as GOV 2910) or ENVS 2403 (same as HIST 2182) or GOV 2300 - 2599.

Previous terms offered: Fall 2020, Spring 2020, Fall 2018.

GOV 3500 (b, IP) Social Protest and Political Change

Laura Henry.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

Analyzes the role of social protest in generating political change on issues such as civil rights, environmentalism, women's rights, indigenous rights, and globalization. Begins by considering different theoretical approaches to understanding the emergence and effectiveness of social movements and non-governmental organizations. Then engages in comparative analysis of social protest in Europe, the United States, Latin America, and elsewhere, paying particular attention to the advantages and risks of the increasingly transnational nature of social activism.

Previous terms offered: Spring 2022, Spring 2020, Fall 2018.

GOV 3510 (b, IP) Post-Communist Pathways

Non-Standard Rotation. Enrollment limit: 15.

Explores growing political, economic, and cultural diversity within the post-communist region after the enforced homogeneity of the Communist era. Considers the essential features of Communism and asks why these systems collapsed, before examining more recent developments. What are the factors promoting growing variation in the region? Why have some post-communist states joined the European Union, while others appear mired in authoritarianism? Do the institutional and cultural legacies of Communism influence contemporary politics? More than twenty years after the collapse of Communist regimes in East Central Europe and the Soviet Union, is "post-communism" still a useful concept for social scientists? Examines contemporary scholarship on the sources of change and continuity in the region and offers students the opportunity to undertake individual research projects

Previous terms offered: Spring 2021.

GOV 3520 (b, IP) State-Building in Comparative Perspective

Non-Standard Rotation. Enrollment limit: 15.

States form the foundation of modern politics. Comparative government explores their variation; international relations examine their interaction. States can be instruments of oppression or engines of progress, and recent scholarship has focused on their strength, weakness, and failure. This capstone course explores the processes that produced the early modern state in Europe, then looks at more recent attempts to replicate state development in Latin America, Asia, the Middle East, and Africa. The role of war in state formation and the subject of citizenship receive particular attention. (Same as: AFRS 3520)

Previous terms offered: Spring 2021, Spring 2020.

GOV 3530 (b, DPI, IP) Borders, Migration, Difference

Tulio Zille.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

This seminar invites students to interrogate the historical understanding of borders in international relations as the definitive markers of state sovereignty. We will use critical and decolonial approaches to interrogate the complicity between how contemporary borders are drawn/reinforced and the violence to which perceived difference is subjected in modern societies. Topics may include: modern and alternative cartographies, the making of borders and states, otherness, the transnational movement of people, and diplomacy. Authors may include Gloria Anzaldúa, Lisa Lowe, Thongchai Winichakul, Jason de León, Sam Okoth Opondo, and Anna Tsing.

GOV 3570 (b, IP) Advanced Seminar in African Politics

Non-Standard Rotation. Enrollment limit: 16.

The continent of Africa boasts some of the most rapidly growing economies in the world, but the proportion of people living in poverty remains higher than in any other region. Nearly all African states experimented with democratic reform in the last two decades, but many leaders have become adept at using political institutions to entrench their power. Most large-scale civil wars have ended, but violence remains. Explores the economic, political, and security challenges of this continent of contrasts. Topics include poverty and economic growth, the “resource curse,” democratic institutions, civil society, ethnic relations, state failure, foreign assistance, and intervention. (Same as: AFRS 3570)

Prerequisites: GOV 2530 (same as AFRS 2530) or HIST 2364 (same as AFRS 2354) or HIST 2822 (same as AFRS 2822).

Previous terms offered: Spring 2019.

GOV 3600 (b, IP) Advanced Seminar in International Relations: Conflict Simulation and Conflict Resolution

Every Spring. Enrollment limit: 15.

An upper-level interdisciplinary seminar on the nature of both international and national conflict. A variety of contexts and influence vectors are examined and students are encouraged to look at the ways conflicts can be solved short of actual warfare, as well as by it.

Previous terms offered: Spring 2020, Spring 2019.

GOV 3610 (b, IP) Advanced Seminar in International Relations: Law, Politics, and the Search for Justice

Non-Standard Rotation. Enrollment limit: 15.

Examines the complex relationship between law and policy in international relations by focusing on two important and rapidly developing areas of international concern: environmental protection and humanitarian rights. Fulfills the environmental studies senior seminar requirement. (Same as: ENVS 3963)

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

GOV 3620 (b, IP) Advanced Seminar in International Relations: Counterinsurgencies

Non-Standard Rotation. Enrollment limit: 15.

Counterinsurgency warfare – the political and military struggle to obstruct insurrection – is complex, variable, and arduous. As one US Special Forces officer in Iraq noted, counterinsurgency is not just thinking man's warfare, it is the graduate level of war. How do we make sense of the intricate, violent contest between insurgent and counterinsurgent? Why have the United States' wars in Vietnam, Iraq, and Afghanistan been exceedingly drawn out, irregular, and destructive? Connecting classic and critical military texts such as Clausewitz and US Army/Marine Corps operational manuals, with case studies from Vietnam, Iraq, and Afghanistan (contrasting the US and Soviet interventions), entwines political/military theory with battlefield history to deepen understandings of thinking man's warfare.

Previous terms offered: Spring 2022, Spring 2020, Spring 2019.

GOV 3630 (b, IP) America's Place in the World, 1945 to the Present

William d'Ambruoso.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Following World War II, the United States was left with unrivaled material power in the international system. Focuses on how the US attempted to translate its unprecedented power into a particular global order. Begins by engaging with the academic debate over the character of US leadership through this period. During the Cold War, questions whether the US was an equal to the Soviet Union in a bipolar order, a hegemonic power, or a seeker of informal empire. Also considers what it has meant to be a unipolar power in the post-Cold War period. Then focuses on the ways in which the US has sought to create a particular political and economic order within the international system since 1945. Explores the specific tools of order creation to include establishing multilateral institutions and formal alliances, providing economic incentives, and exercising military power. Concludes by examining the contentious topic of American decline. Explores various theories about America's future role in the world and considers in particular how the US is addressing China's rise.

History

Overview & Learning Goals

Learning Goals

Statement of Philosophy

History is the study of the past. Historians explore the causes and consequences of continuity and change in society, politics, culture, and economics. Historians study and write history to understand the past on its own terms, not simply as a reflection of our own experience, even as they challenge existing scholarship in light of their own concerns.

History is a foundational part of the liberal arts: a pursuit of knowledge that borrows techniques and ideas from all corners of the academy to address topics from diverse places and eras. Courses in history analyze connections between arguments and evidence. Students ask tough, thoughtful questions about events, people, and values outside of their cultures and experiences. History addresses the relationships between cause and effect, and the consequences of human actions. Students in history courses develop critical skills through the analysis of documents and other primary sources, the appreciation of disciplinary debates, the development of historical research questions, and the communication of findings in clear and persuasive language.

Courses require students to think independently and creatively, stand apart from their assumptions and preconceptions, and to view the world critically and analytically. Our goal is to develop thoughtful individuals who are prepared to pursue graduate education or employment in any field or profession.

First-Year Writing Seminars (1000-1049)

First-year writing seminars introduce students to the study of history. They do not assume that students have a background in the period or the area of the particular seminar topic. They introduce students to historical methods through the examination of particular historical questions. Students develop the analytical skills needed to read sources critically and write about them clearly. First-year writing seminars require extensive reading, class discussion, and the writing of multiple short critical essays.

1000-Level Lecture Courses

Like first-year writing seminars, 1000-level courses introduce students to the study and methodology of history. Students begin to develop the skill to read, interpret, and write about historical sources.

2000-Level Lecture Courses

2000-level lecture courses constitute the core of the history curriculum. These intermediate courses focus on topics and themes that span the globe and cut across time. They introduce students to important historiographical debates. Students may enter the history major at this level, as these courses do not require prior work in history. The courses begin or continue to develop a student's facility with historical methods, as they continue to hone their critical and analytical skills in reading and writing. The thirty-five-student limit allows for more opportunity for writing and discussion than in 1000-level lecture courses.

2000-Level Seminars

2000-level seminars offer the opportunity for more intensive work in critical reading and discussion, analytical writing, library or archival research, and thematic study than is possible in the intermediate 2000-level lecture courses. They assume some background in the discipline and may require previous work in history or the permission of the instructor.

3000-Level Capstone Seminars

A 3000-level capstone seminar engages students in the close investigation of historical problems. Seminars begin with an intensive reading and discussion of representative primary and secondary sources, including of methodology and interpretation. Each student develops and pursues their own research topic related to the central problem of the course, which culminates in an analytical essay of substantial length. As a capstone course, it builds and refines all skills learned in prior courses in the major.

Options for Majoring or Minor in the Department

Students may elect to major in history or to coordinate a major in history with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in history.

Department Website (<https://www.bowdoin.edu/history/>)

Faculty

David K. Hecht, *Department Chair*
Rebecca Banks, *Department Coordinator*

Professors: Connie Y. Chiang (Environmental Studies), Dallas G. Denery II, David M. Gordon, Patrick J. Rael

Associate Professors: David K. Hecht, K. Page Herrlinger‡, Matthew W. Klinge (Environmental Studies), Brian Purnell (Africana Studies), Meghan K. Roberts, Strother Roberts, Rachel Sturman (Asian Studies)**

Assistant Professors: Sakura Christmas (Asian Studies), Javier Cikota‡, Salar Mohandesi

Visiting Faculty: Andrew Ehrinpreis, Jue Guo, Alexandra Peters

Faculty/Staff Website (<https://www.bowdoin.edu/history/faculty-and-staff/>)

Requirements

History Major

History offers courses in the following fields of study: Africa, East Asia, Europe, Latin America, South Asia, the United States, Atlantic Worlds, and

Colonial Worlds. Multi-field courses fall into more than one of these fields of study.

Before electing to major in history, a student should have completed or have in progress at least two college-level courses in history. In consultation with a faculty advisor in the department, a student should plan a program that begins at either the introductory or the intermediate level and progresses to the advanced level.

The major consists of ten courses, with the following stipulations and required courses:

- no more than two courses below the intermediate level (numbered below 2000) may count toward the major, and these must be taken prior to the junior year;
- no more than six courses in a single field of study may count toward the major;
- a multi-field course may count toward any one of its designated fields;
- three non-Euro/US courses;
- one pre-modern course;
- three courses numbered 2500 or higher (must be taken at Bowdoin).
 - Intermediate seminars (2500-2969), intermediate independent and collaborative studies (2970-2999), advanced research seminars (3000s), and advanced independent and collaborative studies or honors projects (4000s) are included.
- One of the three upper-level seminars must be a 3000-level capstone seminar. In consultation with a faculty advisor, a major may fulfill this requirement with an honors project.

History Minor

The minor consists of five courses, with the following stipulations and required courses:

- a maximum of one course below the intermediate level (numbered below 2000), which must be taken prior to the junior year;
- one course at the level of intermediate seminar or above (numbered 2500 or higher) taken at Bowdoin;
- one course must be non-Euro/US.

Additional Information

Additional Information and Department Policies

- **Grades:** Students must obtain a minimum course grade of C- to receive credit toward the major or minor. Courses that count toward the major or minor must be taken for regular letter grades (not Credit/D/Fail).
- **Study Away:** In their sophomore year, students anticipating study away from Bowdoin should discuss with the departmental advisor a plan for the history major that includes work at Bowdoin and elsewhere. Students participating in approved off-campus study may count one history course per semester toward the history major or minor. In exceptional cases, students may petition to receive credit for more than one course per semester toward the history major. In all cases, a maximum of three history courses taken away from Bowdoin may count toward the history major, pending review. And a maximum of one course taken at another institution may count toward the history minor.

- **Honors:** To be eligible to register for honors, a student must have the equivalent of a B+ average in courses taken in the department and the approval of a thesis advisor. All history majors seeking departmental honors must research and write an honors thesis.
- **Languages:** History majors are encouraged to develop competence in one or more foreign languages and to use this competence in their historical reading and research. Knowledge of a foreign language is particularly important for students planning graduate work.
- **Advanced Placement/International Baccalaureate (AP/IB):** Students who received a four or higher on the World History AP exam, US History AP exam, or European History AP exam—or a five or higher on the History IB exam—must complete a history course at the 2000 level or above with a minimum grade of B in order to receive a college credit for the exam. AP/IB credits do not count toward the history major or any college requirements; credits from AP/IB exams only count toward total credits needed for graduation. If a student has scores for more than one AP/IB History exam, only one total credit is awarded. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.
- Majors may double-count an unlimited number of courses cross-listed with history to another department or program.
- Minors may double-count an unlimited number of courses cross-listed with history to another department or program.

Curriculum

- First-year writing seminars (1000–1049) introduce students to college-level writing through the study of history as a discipline. Registration is limited to sixteen students in each seminar. First-year writing seminars numbered 1028–1049 fulfill the non-Euro/US requirement for history majors.
- Introductory courses (1100–1999) introduce students to the methods and skills of history as a humanities and social science discipline. Introductory 1000–level courses numbered 1370–1999 fulfill the non-Euro/US requirement for history majors.
- Core courses (2000–2499) survey historical themes and problems and offer opportunities to deepen skills in historical thinking and writing. (Open to all students, including first-year students.) Core courses numbered 2270–2499 fulfill the non-Euro/US requirement for history majors.
- Intermediate seminars (2500–2999) offer the opportunity for more intensive work in critical reading and discussion, analytical writing, library or archival research, and methodology. (Not open to first-year students without instructor's permission; some background in the discipline assumed.) Seminars numbered 2740–2899 fulfill the non-Euro/US requirement for history majors.
- Advanced seminars (3000–3999) expect students to build on prior coursework by developing a substantial piece of historical research. (Not open to first-year students without instructor's permission.) Seminars numbered 3270–3999 fulfill the non-Euro/US requirements for history majors.

Information for Incoming Students (p. 269)

First-year students can begin their study of history at Bowdoin at a variety of levels. This includes:

- First-year writing seminars (1000-1049) that focus on college-level writing through the study of history as a discipline;

- Introductory courses (1100-1999) that introduce students to the methods and skills of history as a humanities and social science discipline;
- Core courses (2000-2499) that survey historical themes and problems and offer opportunities to deepen skills in historical thinking and writing.

Please contact any member of the History Department (<https://www.bowdoin.edu/history/faculty-and-staff/>) if you have questions about appropriate course level or the best entry point for you. Because the History Department is committed to providing students with a variety of historical perspectives, we encourage students to explore offerings in non-western history (Africa, Middle East, East Asia, Latin America, and South Asia) early on.

Courses

HIST 1001 (c, FYS) *Bad Girls of the 1950s*

Non-Standard Rotation. Enrollment limit: 16.

Explores the representation and life experiences of women who did not fit the cultural norm of suburban motherhood in 1950s America. Focuses on issues of class, race, sexuality, and gender in a decade shaped by fears about nuclear war and communism, and by social and political conformity. Topics include teenage pregnancy, women's grassroots political leadership, single womanhood, civil rights, emergent feminism, and, finally, the enduring cultural resonance of the apron-clad 1950s mom. Engages a variety of primary and secondary sources. Note: This course is part of the following field(s) of study: United States. (Same as: GSWS 1021, AFRS 1021)

Previous terms offered: Fall 2019.

HIST 1006 (c) *Monsters, Marvels, and Messiahs*

Non-Standard Rotation. Enrollment limit: 16.

Examines how Europeans have sought to understand themselves and the world around them through travel and travel literature. Particular attention paid to the fascinating ways in which Europeans have used travel narratives to define and distinguish themselves from others. Note: This course fulfills the pre-modern requirement for history majors. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement.

Previous terms offered: Fall 2020.

HIST 1008 (c) *The Science of Solving Crime*

Meghan Roberts.

Every Other Year. Fall 2022. Enrollment limit: 16.

Explores the history of forensic science and medicine in western Europe from the Renaissance through the present. Begins by examining medical and scientific practices such as handwriting analysis, autopsies, poison detection, and phrenology and asks how science and medicine came to exercise a prominent role in criminal investigations. Concludes by analyzing the representation of forensic medicine in literature and popular culture through the study of detective novels and TV shows. Topics include: Can scientific methods detect lying and truth-telling? How reliable is DNA evidence? How did racism and sexism shape the theory and practice of legal medicine? And, above all, what role do scientists have in the courtroom, and what are the historical roots of their authority? Note: This course is part of the following field(s) of study: Europe.

HIST 1011 (c, FYS) Health Histories

Non-Standard Rotation. Enrollment limit: 16.

Examines the histories—cultural, political, and scientific—through which what constitutes healthy individuals and healthy societies have come to be understood. These definitions are by no means obvious, and they emerge only after protracted struggle. Considers a wide variety of such debates, all set in the post-World War II United States. Possible case studies include scientific investigation into the health risks of nuclear fallout; the evolution of abortion rights before and after *Roe v. Wade*; the development of federal nutrition standards; artistic representation of the AIDS crisis through Tony Kushner's "Angels in America"; and the politics of whether or not gun violence can be considered a health issue. Course writing gives students the opportunity to engage with primary sources, perform independent research, and explore the concept of public health as it exists beyond doctor's offices and hospitals. This course is part of the following field(s) of study: United States.

Previous terms offered: Fall 2018.

HIST 1013 (c) The Red World: Socialism as Imagined and Lived in Russia, 1917-1932

Non-Standard Rotation. Enrollment limit: 16.

Just over a century ago, Russian revolutionaries promised to turn the capitalist world upside down and replace it with a modern socialist order based on the equality and dignity of all working people. Explores socialism in practice between 1917 and 1932, with an emphasis on both the utopian imagination and "lived" experience. Discussions and assignments will draw heavily on visual sources (art, posters, film, photography) to examine the radical transformation of Soviet culture and society. Topics include labor practices, education, family and gender roles, religious culture, science and technology, healthcare, housing and urban planning, and fashion and the arts. No previous knowledge of Russian history is necessary. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Fall 2020.

HIST 1014 (c) Utopia: Intentional Communities in America, 1630-1997

Non-Standard Rotation. Enrollment limit: 16.

An examination of the evolution of utopian visions and communal experiments that begins in 1630 with John Winthrop's "City upon a Hill" sermon, explores the proliferation of both religious and secular communal ventures between 1663 and 1920, and concludes by examining twentieth-century counterculture communes, intentional communities, and dystopian separatist communities. Readings include primary source accounts by leaders and members (statements of vision, letters, diaries, essays, etc.), community histories and apostate exposés, utopian fiction, and scholarly historical analyses. Discussions focus on teaching students how to subject primary and secondary source materials to critical analysis and pursue historical research, and the essays provide multiple opportunities for students to strengthen their writing skills. This course is part of the following field of study: United States.

Previous terms offered: Fall 2020, Fall 2018.

HIST 1022 (c) Science on Trial

Non-Standard Rotation. Enrollment limit: 16.

Examines moments of scientific controversy in modern United States history. From teaching evolution to legalizing abortion to accepting climate change, science has been at the center of some of our most persistent political debates. But science is neither as objective nor as detached from society as we commonly assume; it is inextricably bound to cultural, social, and even moral norms. This course uses moments of legal and political tension to explore the complexities of how scientific knowledge is produced, disseminated, and accepted (or rejected). Case studies include the Scopes Trial, the eugenics-era decision in *Buck v. Bell*, lawsuits against the tobacco industry, and *Roe v. Wade*—as well as the making of environmental policy on questions of pesticide use and radiation exposure. Course writing gives students the opportunity to engage with a range of historical sources in science, law, policy, and media. Note: This course is part of the following field(s) of study: US.

Previous terms offered: Fall 2021, Fall 2019.

HIST 1024 (c, FYS) Serious Games: Critical Play for History

Non-Standard Rotation. Enrollment limit: 16.

Did you know that Monopoly began life as a game that criticized modern capitalism? Have you ever wondered what sense it makes that in Sid Meier's *Civilization*, Abraham Lincoln can found the American tribe in 4,000 BCE? This course explores how commercial video and board games can help us understand the past. In return, understanding something about how the discipline of history works will help us think about games as representations of the past. Games to be studied and played may include: *Catan*, *Diplomacy*, *Monopoly*, *Sid Meier's Civilization V*, *Spirit Island*, and *Twilight Struggle*. Students should expect to complete four structured writing assignments and several shorter writing assignments. The course includes a weekly evening game lab. Note: This course is part of the following field(s) of study: US. (Same as: DCS 1024)

Previous terms offered: Fall 2019.

HIST 1025 (c) Digital Games and History

Patrick Rael.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

This first-year writing seminar explores how digital games represent the past. We begin by focusing on the emergence of digital culture in recent decades, seeking to understand the role electronic simulations play in our lives. We move on to exploring the representation of history in commercial video games, from Sid Meier's *Civilization* series, to *Assassin's Creed IV: Black Flag*. Why are video games such a popular way of depicting past events? What constraints does the digital game format impose on these representations? How are these constraints conditioned by the nature of these games as commercial products sold in a global marketplace? Finally, how should we approach some games' representation of difficult histories—those that may involve war, colonialism, and racism? Along the way, we will learn how to access campus information sources, use intellectual property responsibly, and write essays for the college level. This course includes a weekly required evening lab for dedicated gaming time and film screenings. (Same as: DCS 1025)

HIST 1026 (c, FYS) Revolutions in the Twentieth Century

Every Other Fall. Enrollment limit: 16.

The twentieth century was the great age of revolt. Dramatic social, political, and economic changes sparked revolutions across the globe. Examines revolution as a historical process, political event, and theoretical concept, exploring such questions as: why revolutions started; who participated; what participants wanted; and if these revolutions succeeded. To address these questions, investigates some of the major revolutions of the last century. Cases may include the Bolshevik Revolution, the Spanish Civil War, the Algerian War of Independence, the Great Proletarian Cultural Revolution in China, and the Islamic Revolution in Iran. Concludes by reflecting on the utility of "revolution" as a category of historical analysis. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Fall 2019, Fall 2018.

HIST 1039 (c) Commodity Life: Objects and Histories of India

Every Fall. Enrollment limit: 16.

What kinds of meanings and histories are held within objects? Uses the lens of four objects in the Indian subcontinent—rice, textiles, yoga, and photography—to trace histories of knowledge and skill, of commodification and global circulation, of power relations, and of personal attachments that these objects have generated. Central is thinking through the creative but also power-laden processes of making, using, and interpreting objects. This approach to the creative potential of analysis infuses class writing, revision, and discussion. Note: This course is part of the following field(s) of study: South Asia. It fulfills the non Euro/US requirement for history majors and minors. (Same as: ASNS 1036)

Previous terms offered: Fall 2021.

HIST 1040 (c) "Civilizations" versus "Barbarians": Who decides?

David Gordon.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

This seminar explores ideas of civility and barbarity. Who decides who is civilized or barbaric? And what is at stake in identifying oneself or others as civilized or barbaric? Are these relative terms, that one person's civilized society is another's barbaric; or are there objective ways to think about civilizations and barbarians? How have these concepts evolved through history, from the Spanish conquest of the Aztecs in the sixteenth century to the post-9/11 age of American imperialism in the early twenty-first century? We read primary historical documents of various encounters between European, African, American, and Asian societies, as well as scholarship about them.

Previous terms offered: Fall 2020.

HIST 1046 (c, FYS) 'Deviant' Lives in Latin America

Non-Standard Rotation. Enrollment limit: 16.

Explores the lives of particular Latin American people who found themselves being "boxed in," and the ways in which they have sought to remain outside, or even in-between, categories. We will consider issues of personal identity, social belonging, and state power through the lives and stories—some well-known, and some surprisingly obscure—of Latin Americans, from the 1500s to the present. Course writing gives students the opportunity to engage with primary sources, perform independent research, and explore how personal identities have been created, maintained, and challenged over the centuries. This course aims to improve students' skills in close reading, critical thinking, and analytical writing, while the relationships between these skills are closely considered. In addition to discussing the texts in class, students will write responses to them in a variety of forms, from close analysis, to creative projects, to a final research paper. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non Euro/US requirement for History majors and minors. (Same as: LACL 1046)

Previous terms offered: Fall 2019.

HIST 1047 (c) Radically Small: Telling History through Individual Stories

Every Other Year. Enrollment limit: 16.

This First-Year Writing Seminar explores how personal stories of everyday people can help understand the past. These "microhistories" make a single individual the center of the story, placing them in their historical context. Microhistories are particularly well-suited to show how non-elite individuals understood their own place in society, how they contested existing power structures, and how their own identities were constructed in relation with those structures. During the semester students will read some of the classic microhistory accounts, learning how the lives of peasants, formerly enslaved women, meatpackers, peddlers, and other plebeians help reconstruct a social and cultural world that is often impossible to find in traditional histories. The course is focused on Latin America but does not require any prior knowledge of the region. Some of the works discussed in this course are: *The Cheese and the Worms*, *Doña Maria's Story*, & assorted essays from *The Human Tradition in Latin America*. This course helps students to develop the skills necessary to succeed at college writing: weekly assignments will target particular skills (summarizing, analyzing, close readings, compare-contrast, etc); and—given that writing is rewriting—the papers familiarize students with the iterative process of revising and resubmitting, which is at the heart of academic writing. Students write two versions of an analytical paper and several versions of a research paper, receiving feedback from their peers as well as the instructor. Students develop a semester-long research project based on the documents left behind by a person from Latin America (plebeian or elite), including journals, trial transcripts, confessions, images, and other published sources available in translation. (Same as: LACL 1047)

Previous terms offered: Fall 2021.

HIST 1111 (c, IP) History of Ancient Greece: From Homer to Alexander the Great

Non-Standard Rotation. Enrollment limit: 50.

Surveys the history of Greek-speaking peoples from the Bronze Age (ca. 3000-1100 B.C.E) to the death of Alexander the Great in 323 B.C.E. Traces the political, economic, social, religious, and cultural developments of the Greeks in the broader context of the Mediterranean world. Topics include the institution of the polis (city-state); hoplite warfare; Greek colonization; the origins of Greek science; philosophy and rhetoric; and fifth-century Athenian democracy and imperialism. Necessarily focuses on Athens and Sparta, but attention is also given to the variety of social and political structures found in different Greek communities. Special attention is given to examining and attempting to understand the distinctively Greek outlook in regard to gender, the relationship between human and divine, freedom, and the divisions between Greeks and barbarians (non-Greeks). A variety of sources – literary, epigraphical, archaeological – are presented, and students learn how to use them as historical documents. Note: This course is part of the following field(s) of study: Europe. It fulfills the pre-modern requirement for history majors and minors. (Same as: CLAS 1111)

Previous terms offered: Fall 2019.

HIST 1112 (c, IP) History of Ancient Rome: From Romulus to Justinian

Non-Standard Rotation. Enrollment limit: 50.

Surveys the history of Rome from its beginnings to the fourth century A.D. Considers the political, economic, religious, social, and cultural developments of the Romans in the context of Rome's growth from a small settlement in central Italy to the dominant power in the Mediterranean world. Special attention is given to such topics as urbanism, imperialism, the influence of Greek culture and law, and multiculturalism. Introduces different types of sources – literary, epigraphical, archaeological, etc. – for use as historical documents. Note: This course is part of the following field(s) of study: Europe. It fulfills the pre-modern requirement for history majors and minors. (Same as: CLAS 1112)

Previous terms offered: Fall 2020.

HIST 1240 (c, IP) War and Society

Every Other Year. Enrollment limit: 50.

Explores the nature of warfare from the fifteenth century to the present. The central premise is that war is a reflection of the societies and cultures that wage it. This notion is tested by examining the development of war-making in Europe and the Americas from the period before the emergence of modern states, through the great period of state formation and nation building, to the present era, when the power of states to wage war in the traditional manner seems seriously undermined. Throughout, emphasis is placed on contact between European and non-European peoples. Students are required to view films every week outside of class. Note: This course is part of the following field(s) of study: Europe; United States.

Previous terms offered: Fall 2019.

HIST 1241 (c) The Civil War Era

Every Other Fall. Enrollment limit: 50.

Examines the coming of the Civil War and the war itself in all its aspects. Considers the impact of changes in American society, the sectional crisis and breakdown of the party system, the practice of Civil War warfare, and social ramifications of the conflict. Includes readings of novels and viewing of films. Students are expected to enter with a basic knowledge of American history, and a commitment to participating in large class discussions. Note: This course is part of the following field(s) of study: United States. (Same as: AFRS 1241)

Previous terms offered: Fall 2018.

HIST 1242 (c) Between Revolution and Rebellion: The United States, 1783-1861

Every Other Spring. Enrollment limit: 50.

Surveys the history of the United States from its founding in 1783 to the secession that sparked civil war in 1861. Topics covered will include the nature of the federal compact, the expansion of slavery, the divergence of South and North, the formation of the two-party political system, the reform impulse, and questions of national expansion. While we will explore a range of issues, our focus will be on understanding the origins of the Civil War. Note: This course is part of the following field(s) of study: US.

Previous terms offered: Spring 2022, Spring 2020.

HIST 1300 (c) From Evolution to Climate Change: A History of Modern Science

David Hecht.

Every Other Year. Fall 2022. Enrollment limit: 50.

How do we know what we know? Science and scientists have remade both our understanding of the natural world and our experience of living in it. But "science" is not one thing; it varies considerably across temporal, geographic and disciplinary contexts. This course combines an overview of major developments in scientific practice with case studies that focus intensively on the production of knowledge during selected moments in the history of science. Examples include the work of Charles Darwin on evolution, Rachel Carson on pesticides, and contemporary climate change research.

HIST 1320 (c, DPI) Racial and Ethnic Conflict in U.S. Cities

Every Other Year. Enrollment limit: 50.

American cities have been historic cauldrons of racial and ethnic conflict. Concentrates on urban violence in American cities since 1898. Students study moments of conflict during the early republic and the nineteenth century. Topics examined include the post-Reconstruction pogroms that overturned interracial democracy; the Red Summer and its historical memory; the ways race and ethnicity shaped urban residential space; the effects of immigration on urban political economy and society, and the conflicts over space, labor, and social relations that arose; and the waves of urban violence that spread across the country in the mid-1960s. Note: This course is part of the following field(s) of study: United States. (Same as: AFRS 1320, URBS 1320)

Previous terms offered: Fall 2021.

HIST 1321 (c) Gotham: The History of a Modern City

Brian Purnell.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Introduces students to college-level historical thinking, writing, and analysis. Covers the history of New York City from the geological formation of what became Manhattan Island through the present; however, most of the history covered spans the 1600s through the end of the twentieth century. In part, narrates a history of the United States from the colonial era to the present through the story of New Amsterdam and New York City. Another focus is the history of modern, capitalist cities and the cultures, people, economies, and governments they produce. Students work mostly with primary sources and learn how New York City became one of the preeminent modern cities in the world. Note: This course is part of the following field(s) of study: United States (Same as: URBS 1321)

Previous terms offered: Fall 2020.

HIST 1340 (c, DPI, IP) America and the Origins of Globalization

Strother Roberts.

Every Other Year. Spring 2023. Enrollment limit: 50.

From the fifteenth century through the early nineteenth, global economic forces integrated the lands, ecosystems, and communities of North America into an increasingly tightly-knit network of commerce, migration, and ideas. Topics covered while exploring these early global networks include: the spread of peoples, crops, and diseases; the role of colonial conquest in creating modern capital and commodity markets; the importance of addictive substances (like sugar and tobacco) in the development of the transatlantic slave trade; and how a drought in Bangladesh sparked the American Revolution. Note: This course is part of the following field(s) of study: United States, Atlantic Worlds. It fulfills the pre-modern requirement for history majors and minors.

Previous terms offered: Spring 2021, Spring 2019.

HIST 1440 (c, IP) Merchants, Mughals, Mendicants: India and the Early Modern World

Non-Standard Rotation. Enrollment limit: 50.

Introductory exploration of the history of the Indian subcontinent and its connections to the broader world in an era shaped by the vibrant movement of people, goods, and ideas across the Indian Ocean, Europe, and Central Asia. Note: This course is part of the following field(s) of study: South Asia. It also fulfills the non Euro/US and pre-modern requirements for history majors and minors. (Same as: ASNS 1560)

Previous terms offered: Fall 2019.

HIST 1461 (c, DPI, IP) African Civilizations to 1850: Myth, Art, and History

David Gordon.

Every Other Year. Fall 2022. Enrollment limit: 50.

African peoples are often imagined as victims of history. This course challenges such stereotypes by introducing students to the great civilizations of medieval and early modern Africa. Includes the Nile Valley, Ethiopia, Mali, Oyo, Dahomey, Asante, Kongo, Lunda, Swahili, and Zulu. Various themes include political power and governance; culture and society; trade and economy; women and gender; and youth and generational conflict. Content is explored by reading fiction, poetry, myth, artwork (including art in the Bowdoin College Museum of Art), and historical scholarship. This course is part of the following field(s) of study: Africa. It also meets the non-Euro/US requirement and pre-modern requirements. (Same as: AFRS 1461)

HIST 1512 (c, DPI, IP) Modern Latin American History

Andrew Ehrnpreis.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Introduces students to major themes in the history of modern Latin America and the Caribbean, from the early nineteenth century to the present. Topics include the caudillo politics of the early republican era; the rise of liberalism and the formation of extractive, export-driven economies; the emergence of populism and popular revolutionary movements; the dictatorships and civil wars of Cold War era; and the "Pink Tide" of the early 2000s. Prominent themes include racist discourses, imperialism, decolonization and neo-colonialism, class formation and struggle, and patriarchal structures and feminist movements. This course is part of the following field(s) of study: Latin America. It also meets the non-Euro/US requirement. (Same as: LACL 1200)

HIST 2005 (c, IP) City and Landscape in Modern Europe: London, Paris, Vienna, Berlin

Non-Standard Rotation. Enrollment limit: 35.

Examines the changing nature of the urban built environment in four major European cities from the mid-nineteenth century to the present. Course considers a wide range of factors that have contributed to shaping the cities' spaces and forms, among them: politics, money, war, environmental degradation, spatial inequities, industrialization, immigration, public health, heritage, tourism, and gentrification. Explores the changing role these capital cities have played on the world stage while also exploring everyday life at street level, housing from slum life to mansion, urban infrastructure, and the impact of grand schemes of urban planning and design. This course satisfies the non-US requirement for the urban studies minor. (Same as: ENVS 2427, URBS 2427)

Previous terms offered: Spring 2022.

HIST 2006 (c) City, Anti-City, and Utopia: Building Urban America
Non-Standard Rotation. Enrollment limit: 35.

Explores the evolution of the American city from the beginning of industrialization to the present age of mass communications. Focuses on the underlying explanations for the American city's physical form by examining cultural values, technological advancement, aesthetic theories, and social structure. Major figures, places, and schemes in the areas of urban design and architecture, social criticism, and reform are considered. Semester-long research paper required. Note: This course is part of the following field(s) of study: United States. (Same as: ENVS 2444, URBS 2444)

Previous terms offered: Spring 2021, Spring 2019.

HIST 2008 (c, IP) The Republic of Rome and the Evolution of Executive Power

Non-Standard Rotation. Enrollment limit: 35.

Examines in depth the approaches to leadership within the governmental system that enabled a small, Italian city-state to take eventual control of the Mediterranean world and how this state was affected by its unprecedented military, economic, and territorial growth. Investigates and re-imagines the political maneuverings of the most famous pre-Imperial Romans, such as Scipio Africanus, the Gracchi, and Cicero, and how political institutions such as the Roman Senate and assemblies reacted to and dealt with military, economic, and revolutionary crises. Looks at the relationship of the Roman state to class warfare, the nature of electoral politics, and the power of precedent and tradition. While examining whether the ultimate fall precipitated by Caesar's ambition and vision was inevitable, also reveals what lessons, if any, modern politicians can learn about statesmanship from the transformation of the hyper-competitive atmosphere of the Republic into the monarchical principate of Augustus. All sources, such as Livy's history of Rome, Plutarch's "Lives," letters and speeches of Cicero, and Caesar's "Civil War," are in English, and no prior knowledge of Roman antiquity is required. Note: This course fulfills the pre-modern requirement for history majors and minors. (Same as: CLAS 2214)

Previous terms offered: Spring 2022, Spring 2019.

HIST 2014 (c, IP) Reframing Medieval Power: Rulers of the Mediterranean World

Alexandra Montero Peters.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course compares diverse models of rulership in the Middle Ages. To expand discussion beyond white male kings of Christian Europe, this course also explores often overlooked rulers and centers of power. Powerful queens, African dynasties, and Muslim rulers are some narratives included alongside those of European monarchies. Students consider original sources that reveal how rulers defined and defended their right to power, potentially including works on/by Byzantine princess Anna Komnene, Genghis Khan, the Ethiopian Solomonic Dynasty, and Charlemagne. Through this comparative approach to power, students will challenge and broaden definitions of political influence and legitimacy in the medieval world. They will also reflect on how some modern scholarship on medieval power manifests colonialism, racism, and gender discrimination, and to think critically about not just who historians believe contributed to medieval culture, but also whom they excluded from political influence. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement.

HIST 2017 (c, IP) Postwar Europe: 1945 to the Present
Every Other Fall. Enrollment limit: 35.

When the Second World War finally came to a close in 1945, an estimated 36.5 million Europeans lay dead, many of Europe's cities were burned out, economies were left in disarray, and refugee camps brimmed with displaced persons. How did Europe rebuild after this unprecedented cataclysm? Explores the history of Europe—from Great Britain to the Soviet Union, Greece to Scandinavia—from the end of the war to the present. Investigates such themes as the origins of the Cold War, the construction of socialism in the East, the reconstruction of capitalism in the West, decolonization, the postwar economic "miracle," the social struggles of the 1960s and 1970s, the rise of neoliberalism, the collapse of the Soviet Bloc, the emergence of the European Union, and the contemporary political conjuncture. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Fall 2018.

HIST 2018 (c, DPI, IP) Native North American History, ca.1450–1814
Every Other Year. Enrollment limit: 35.

The Indigenous peoples of North America have long and diverse histories stretching back over 15,000 years. Since the uniting of the world's two hemispheres at the turn of the sixteenth century, Native communities have faced numerous challenges and fallen victim to often unimaginable hardship. Native cultures have shown considerable adaptability in the face of these challenges. Through centuries of imperial oppression, Native Americans proved determined in fighting for their rights and insisting on their proper place in an evolving environmental, political, and social landscape. These shared struggles led to a dawning sense of a pan-Indian racial and cultural identity in the early nineteenth century. Note: This course fulfills the pre-modern requirement for history majors and minors.

Previous terms offered: Fall 2021.

HIST 2019 (c, IP) The Transatlantic Sixties and Seventies

Salar Mohandesi.

Every Other Spring. Spring 2023. Enrollment limit: 35.

From Berkeley to Berlin, social movements in the 1960s and 1970s pushed democracy in new directions, overturned social roles, and redefined the meaning of politics. Investigates that wave of transatlantic social, political, and cultural contestation, exploring such themes as youth protest, anti-racism, anti-imperialism, feminism, and the counterculture. Taking a transnational approach, considers not only how these decades unfolded in different countries, but also unearths the many flows—of ideas, objects, and people that wove diverse movements together. Focuses on developments in North America and Europe and situates them in a fully global context. Note: This course is part of the following field(s) of study: Europe, United States, and Atlantic Worlds.

Previous terms offered: Spring 2021, Spring 2020, Spring 2019.

HIST 2020 (c, IP) The Global Cold War

Salar Mohandesi.

Every Other Fall. Fall 2022. Enrollment limit: 35.

The Cold War was not simply a rivalry between two superpowers, but a fully global competition between different models of social, political, and economic development. After reviewing the consolidation of fascism, welfare capitalism, and Stalinism in the 1930s, we study how the precarious alliance between American capitalism and Soviet communism devolved after WWII. Since this competition unfolded on a planetary level, with each side struggling to convince the world that its model was superior, this course takes a global approach, surveying such events as the division of Europe, decolonization in Asia and Africa, the wars in Korea and Afghanistan, the Cuban and Iranian revolutions, the civil war in Angola, the rise of Reagan and Gorbachev, and the collapse of the Soviet Bloc. In so doing, this course explores such themes as imperialism, revolution, modernization, nation-building, internationalism, non-alignment, human rights, and neoliberalism. Note: This course is part of the following field(s) of study: Europe

Previous terms offered: Fall 2020, Fall 2019.

HIST 2040 (c) Science, Magic, and Religion

Every Other Year. Enrollment limit: 35.

Traces the origins of the scientific revolution through the interplay between late-antique and medieval religion, magic, and natural philosophy. Particular attention is paid to the conflict between paganism and Christianity, the meaning and function of religious miracles, the rise and persecution of witchcraft, and Renaissance hermeticism. Note: This course fulfills the pre-modern requirement for history majors. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement for history majors and minors.. (Same as: REL 2204)

Previous terms offered: Spring 2021, Fall 2019.

HIST 2042 (c) The Good Life: From Plato to the Present

Every Other Year. Enrollment limit: 35.

What does it mean to lead a good life, a happy life? Examines changing responses to this question from the ancient Greeks to the twenty-first century. Primary sources include (among others) Plato, Aristotle, Christine de Pizan, Martin Luther, and Albert Camus. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement for history majors and minors.

Previous terms offered: Fall 2021, Spring 2020.

HIST 2048 (c, IP) Medieval Europe: 1075 to 1415

Alexandra Montero Peters.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the religious, political, economic, and cultural history of Europe from the collapse of the Western Roman Empire to Columbus's voyages. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement.

Previous terms offered: Fall 2020.

HIST 2060 (c, IP) The French Revolution

Every Other Year. Enrollment limit: 35.

In 1789, the French people shocked the world by overthrowing their absolute monarchy, launching a decade of wildly new political experiments that shaped the modern world. Why did France have a revolution? What were the global implications of events in France, especially for the enslaved populations of French colonies? Why did the French Revolution become radical and—all too often—violent? Class sessions will incorporate lecture, discussion, and role-playing. Note: This course is part of the following field(s) of study: Europe. It fulfills the premodern requirement.

Previous terms offered: Spring 2022, Spring 2019.

HIST 2061 (c, DPI, IP) Culture Wars in the Age of Enlightenment

Meghan Roberts.

Every Other Spring. Spring 2023. Enrollment limit: 35.

Examines a series of intellectual, political, and cultural feuds in seventeenth- and eighteenth-century Europe, the so-called Age of Enlightenment. Thinkers aspired to implement sweeping changes in politics and society, but disagreed fiercely over what and how to change. Students will consider the production of categories of difference (religion, sex, gender, race, and social class) but also look at how historical individuals attempted to navigate—whether to defend, to contest, or to subvert—those categories, and how their agency to do so was shaped by the larger historical context in which they lived. Note: This course is part of the following field(s) of study: Europe. It also fulfills the pre-modern requirement for history majors and minors.

Previous terms offered: Spring 2021.

HIST 2062 (c, IP) Europe's Age of Expansion, 1607-1789

Non-Standard Rotation. Enrollment limit: 35.

The practice of European politics changed dramatically during the seventeenth and eighteenth centuries. National governments became more centralized and more powerful. At the same time, Europeans attempted to found empires that stretched around the globe. Focuses on Britain, France, and Spain; specific topics include cross-cultural encounters, fiscal crisis and reform, policing, commerce, war, and rebellion. Note: This course is part of the following field(s) of study: Europe, Atlantic Worlds, and Colonial Worlds. It also fulfills the premodern requirement for history majors.

Previous terms offered: Fall 2020.

HIST 2063 (c, IP) Challenging the Catholic Church, 1529-1633

Non-Standard Rotation. Enrollment limit: 35.

Immerses students in the religious, political, and scientific culture of early modern Europe through the study of two key moments: the trial of Galileo Galilei for heresy and the efforts of King Henry VIII to divorce his wife and assume control of the Church of England. These episodes famously pitted these individuals against the Catholic Church, allowing consideration of how religion shaped the history of ideas and politics in this volatile period. Employs well-developed classroom simulations in which students take on roles of historical personae, allowing them to think through the broad forces shaping history as well as the potential for individual actors to affect change. Note: This course is part of the following field(s) of study: Europe. It also fulfills the pre-modern requirement for history majors and minors.

Previous terms offered: Fall 2018.

HIST 2064 (c, IP) History of Western Medicine, from the Black Death to Cholera

Meghan Roberts.

Every Other Fall. Fall 2022. Enrollment limit: 35.

Examines the history of medicine in the late medieval and early modern period and uses diseases as case studies. This focus allows us to cut across regions and explore the social and cultural forces that shape health and sickness, life and death, cures and treatments. Diseases studied include plague, syphilis, smallpox, cholera, and cancer. This course is part of the following field(s) of study: Europe. It fulfills the premodern requirement for history majors and minors.

Previous terms offered: Fall 2021.

HIST 2106 (c) "The War to End All Wars": European Society and the First World War

Every Other Year. Enrollment limit: 35.

Examines European society in the era of the cataclysmic "Great War" (1914-1918) and the war's lasting impact on the foundations of the 20th century. Lectures and discussions will address the war's deeper social, political, cultural, technological, economic, and diplomatic origins before 1914; the crisis of July 1914 and "total war" as experienced by soldiers and civilians between 1914-18; postwar changes in culture, class and gender relations, and the political landscape, including the fall of empires and the rise of fascism and communism. The final part of the course will deal with the war in modern memory. Course will emphasize the analysis of primary sources, written and visual, including memoirs/diaries/letters, novels, art, photography, and film. Not open to students who have credit for History 2105. Note: This course is part of the following field of study: Europe.

Previous terms offered: Fall 2020.

HIST 2108 (c, IP) The History of Russia, 1725-1924

Every Other Fall. Enrollment limit: 35.

Explores Russian identity, society, culture, and politics during three dramatically different phases of the modern period between Peter the Great and Lenin: the era of empire, autocracy, and serfdom under the tsars in the eighteenth and nineteenth centuries; Russia's encounter with western ideas and forms of modernity in the late nineteenth century; and the revolutionary transformations of 1905 and 1917, ending in socialist rule under the Bolsheviks. Most readings are drawn from primary texts (novels, letters, memoirs, petitions, and ethnographic accounts); we will also regularly engage with forms of contemporary visual culture (especially painting, photography, and film) Note: This course fulfills the non-Euro requirement for history majors and minors.

Previous terms offered: Spring 2021.

HIST 2109 (c, IP) Russia's Twentieth Century: Revolution and Beyond Every Other Fall. Enrollment limit: 35.

Examines major transformations in Russian society, culture, and politics from the Revolutions of 1917 through the fall of the Soviet Empire in 1991. Topics include the building of socialist society under Lenin and Stalin, the political Terror of the 1930s and the expansion of the Gulag system, the experience of World War II, Soviet influence in Central Asia and Eastern Europe, attempts at de-Stalinization under Khrushchev, everyday life under "developed socialism," the period of "glasnost" and "perestroika" under Gorbachev, and the problems of de-Sovietization in the early 1990s. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Fall 2021, Fall 2019.

HIST 2110 (c, DPI) "Bad" Women Make Great History: Modern Europe as Lived and Shaped by Women, 1789-1968

Non-Standard Rotation. Enrollment limit: 35.

An examination of modern European history centered on women's voices, experiences, perspectives, subjectivity, and agency. Drawing largely on primary sources (including memoirs, letters, art, literature, photography, and film), lectures and discussions will explore how women from across Europe navigated and challenged the gendered norms of their societies to shape unique and diverse identities; examine and acknowledge women's accomplishments in different spheres of society and culture; and consider the major debates, obstacles, and achievements related to women's political, economic, and cultural liberation. Lectures will also emphasize ways in which a gendered lens enhances our understanding of European history, including the experience of industrialization, secularization, imperialism, socialism, fascism, and the two world wars. Note: This course is part of the following field(s) of study: Europe. (Same as: GSWS 2110)

Previous terms offered: Spring 2022, Spring 2020.

HIST 2121 (c) Colonial America and the Atlantic World, 1607-1763

Every Other Spring. Enrollment limit: 35.

A social history of the emigration to and founding and growth of the colonies in British North America. Explores the difficulties of creating a new society, economy, polity, and culture in an unfamiliar and already inhabited environment; the effects of diverse regional and national origins, and often conflicting goals and expectations on the early settlement and development of the colonies; the gradual adaptations and changes in European, Native American, and African cultures, and their separate, combined, and often contested contributions to a new provincial, increasingly stratified (socially, economically, and politically), and regionally disparate culture; and the later problems of maturity and stability as the thirteen colonies began to outgrow the British imperial system and become a new American society. Note: This course is part of the following field(s) of study: United States, Colonial Worlds. It fulfills the pre-modern requirement for history majors and minors.

Previous terms offered: Spring 2022, Spring 2020.

HIST 2123 (c) American Society in the New Nation, 1763–1840

Non-Standard Rotation. Enrollment limit: 35.

A social history of the United States from the Revolution to the Age of Jackson. Topics include the various social, economic, political, cultural, and ideological roots of the movement for American independence; the struggle to determine the scope of the Constitution and the political shape of the new republic; the emergence of and contest over a new social and cultural order and the nature of American “identity”; and the diverging social, economic, and political histories of regions (North, South, and trans-Appalachian West) and peoples in the early to mid-nineteenth century. Topics include urbanization, industrialization, and the development of new forms of social organization in the North; religion and the Second Great Awakening; the westward expansion of the nation into areas already occupied; the southern plantation economy and slave communities; and the growth of the reform impulse in Jacksonian America. Note: This course is part of the following field(s) of study: United States.

Previous terms offered: Fall 2018.

HIST 2126 (c) Women in American History, 1600-1900

Every Other Year. Enrollment limit: 35.

A social history of American women from the colonial period through the nineteenth century. Examines women's changing roles in both public and private spheres; the circumstances of women's lives as these were shaped by class, ethnic, and racial differences; the recurring conflict between the ideals of womanhood and the realities of women's experience; and focuses on family responsibilities, paid and unpaid work, religion, education, reform, women's rights, and feminism. Note: This course is part of the following field(s) of study: United States. (Same as: GSWS 2251)

Previous terms offered: Spring 2021, Spring 2019.

HIST 2128 (c) Family and Community in American History, 1600–1900

Non-Standard Rotation. Enrollment limit: 35.

Examines the social, economic, and cultural history of American families—across socio-economic classes, and among multiple racial, ethnic, and cultural groups—from 1600 to 1900, and the continuities, changes, and variations in the relationships between families and their kinship networks, communities, and the larger society. Topics include gender relationships; racial, ethnic, cultural, and class variations in family and community ideals, structures, and functions; the purpose and expectations of marriage; philosophies of child-rearing; organization of work and leisure time; and the effects of slavery and racial discrimination, industrialization, urbanization, immigration, and social and geographic mobility on patterns of family life and community organization. This course is part of the following field(s) of study: United States. (Same as: GSWS 2248)

Previous terms offered: Fall 2020.

HIST 2129 (c) History of Harpswell and the Coast of Maine

Non-Standard Rotation. Enrollment limit: 12.

Examines the long history of Harpswell as part of the coast of Maine, and the research methodologies used to uncover and analyze that history from environmental, community, socioeconomic, political, racial and ethnic, and cultural perspectives. Topics include bonds and tensions in a peninsula and islands community; coastal agriculture and stone walls; inshore and deep-sea fisheries; shipbuilding and shipping; the Civil War; ethnic, religious, and cultural diversity; poverty and living on the margin; and the rise of tourism. Culminates with an individual research project prospectus for a projected essay on an aspect of that history. Taught in residence at the Schiller Coastal Studies Center. History 2129/Environmental Studies 2449 is a course-module in the Bowdoin Marine Science semester. Biology 2232 (same as Environmental Studies 2232), Biology 2503 (same as Environmental Studies 2235), and Biology 3117 (same as Environmental Studies 2217) are co-requisites of this course. Note: This course is a part of the following field(s) of study: United States. (Same as: ENVS 2449)

Previous terms offered: Fall 2021, Fall 2019.

HIST 2140 (c, DPI) The History of African Americans, 1619-1865

Patrick Rael.

Every Other Year. Spring 2023. Enrollment limit: 35.

Examines the history of African Americans from the origins of slavery in America through the death of slavery during the Civil War. How could anyone (let alone the Founding Fathers) have traded human beings as chattel? How did African-descended people in America come to be both part of and yet perpetually marginalized in America? What does this say about the nature of American democracy and the mythologies of American history? How much agency did African Americans have in crafting their own experience, and what does this say about the nature of both their oppression and their resistance? In what ways have African Americans contributed to the formation of American society? We will be concerned not simply with the important task of reinserting the African American past into our national historical narrative. We will also be interested in understanding the depths to which American society has been predicated on the intersections of race, economy, and society. Note: This course is part of the following field(s) of study: United States.

Previous terms offered: Spring 2021.

HIST 2141 (c) The History of African Americans from 1865 to the Present

Every Other Spring. Enrollment limit: 35.

Explores the history of African Americans from the end of the Civil War to the present. Issues include the promises and failures of Reconstruction, the Jim Crow era, black leadership and protest institutions, African American cultural styles, industrialization and urbanization, the world wars, the Civil Rights Movement, and conservative retrenchment. Note: This course is part of the following field(s) of study: United States. (Same as: AFRS 2141)

Previous terms offered: Fall 2021, Spring 2019.

HIST 2145 (c, DPI) The United States Civil War

Patrick Rael.

Every Other Fall. Fall 2022. Enrollment limit: 35.

This course explores the United States Civil War. Beginning with an overview of causes and ending with prospects for Reconstruction, it focuses on the key issues raised by the war: the relationship between military and political factors, the social changes wrought by war, and the crucial issues of slavery and emancipation. Note: This course is part of the following field(s) of study: United States (Same as: AFRS 2145)

Previous terms offered: Fall 2020.

HIST 2160 (c) History of the American West

Non-Standard Rotation. Enrollment limit: 35.

Survey of what came to be called the Western United States from the nineteenth century to the present. Topics include Euro-American relations with Native Americans; the expansion and growth of the federal government into the West; the exploitation of natural resources; the creation of borders and national identities; race, class, and gender relations; the influence of immigration and emigration; violence and criminality; cities and suburbs; and the enduring persistence of Western myths in American culture. Students write several papers and engage in weekly discussion based upon primary and secondary documents, art, literature, and film. This course is part of the following field(s) of study: United States. (Same as: ENVS 2432)

Previous terms offered: Spring 2021.

HIST 2161 (c) Asian American History, 1850 to the Present

Non-Standard Rotation. Enrollment limit: 35.

Surveys the history of Asian Americans from the mid-nineteenth century to the present. Explores the changing experiences of Asian immigrants and Asian Americans within the larger context of American history. Major topics include immigration and migration, race relations, anti-Asian movements, labor issues, gender relations, family and community formation, resistance and civil rights, and representations of Asian Americans in American popular culture. Readings and course materials include scholarly essays and books, primary documents, novels, memoirs, and films. This course is part of the following field(s) of study: United States. (Same as: ASNS 2880)

Previous terms offered: Spring 2022, Spring 2020.

HIST 2182 (c, DPI) Environment and Culture in North American History

Connie Chiang.

Every Spring. Fall 2022. Enrollment limit: 35.

Explores relationships between ideas of nature, human transformations of the environment, and the effect of the physical environment upon humans through time in North America. Topics include the "Columbian exchange" and colonialism; links between ecological change and race, class, and gender relations; the role of science and technology; literary and artistic perspectives of "nature"; agriculture, industrialization, and urbanization; and the rise of modern environmentalism. Note: This course is part of the following field(s) of study: United States. (Same as: ENVS 2403)

Prerequisites: ENVS 1101.

Previous terms offered: Fall 2021, Spring 2021, Spring 2020, Spring 2019.

HIST 2200 (c, IP) The Nuclear Age

Every Other Fall. Enrollment limit: 35.

Explores the impact of nuclear energy on American society, politics, and culture. Few aspects of post-World War II United States history were unaffected by the atomic bomb, which decisively shaped the Cold War, helped define the military-industrial complex, and contributed to profound changes in the place of science in American life. Examines the surprisingly varied effects of the atomic bomb throughout American society: on the Cold War, consumer culture, domestic politics, education, family life, and the arts. Uses a wide range of sources—such as newspaper articles, memoirs, film, and policy debates—to examine the profound effects of nuclear energy in United States history. This course is part of the following field(s) of study: United States.

Previous terms offered: Fall 2021, Fall 2018.

HIST 2202 (c) The History of Energy

Non-Standard Rotation. Enrollment limit: 35.

Explores how and why Americans (and others) have made the energy choices that they have. The production and distribution of energy is one of the key challenges for modern societies. It involves the development of specific technologies and industries— from fossil fuels to solar power to nuclear plants. But the history of energy transcends the technical. It intersects with law, politics, and economics; social norms and cultural values play a role as well. The connections between the technical and non-technical are central to understanding both the history of energy itself, as well as its place in the history of the modern United States. This course is part of the following field(s) of study: United States. (Same as: ENVS 2420)

Previous terms offered: Spring 2020.

HIST 2220 (c) Civil Rights and Black Power Movements in the Making of Modern America

Brian Purnell.

Every Other Year. Spring 2023. Enrollment limit: 35.

Examines the political activism, cultural expressions, and intellectual history that gave rise to a modern black freedom movement and its impact on the broader American (and international) society. Students study the emergence of community organizing traditions in the southern black belt as well as postwar black activism in US cities; the role the federal government played in advancing civil rights legislation; the internationalism of African American activism; and the relationship between black culture, aesthetics, and movement politics. The study of women and gender are a central component. Using biographies, speeches, and community and organization studies, students analyze the lives and contributions of Martin Luther King Jr., Ella Baker, Septima Clark, Malcolm X, Stokely Carmichael, Angela Davis, Huey Newton, and Fannie Lou Hamer, among others. Closely examines the legacies of the modern black freedom movement including the expansion of the black middle class, controversies over affirmative action, and the rise of black elected officials. Note: This course is part of the following field(s) of study: United States. (Same as: AFRS 2240)

Previous terms offered: Spring 2022, Spring 2021.

HIST 2285 (c, IP) China before 1000

Guo Jue.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Surveys the early history of China from the rise of complex society and state-level polity in the third millennium BCE to the fall of the Tang Empire in the tenth century CE. Focuses on the relationship between state and society and delineates the historical processes of their coevolution. Examines the formative era of political experimentation and social formation, the emergence of the bureaucratic state and agrarian society, and the development of imperial rule and multiethnic cultures. Also introduces major political and social institutions, economic systems, technological innovations, law, cosmology, philosophy, and religion, as well as arts and literature that became foundational to the Chinese state and Chinese society. Students will critically engage with a variety of source materials: archaeological data, historical writing, literary works, and visual culture. Note: This course fulfills the pre-modern and non-Euro/US requirements for history majors and minors. (Same as Asian Studies 2013.) (Same as: ASNS 2013)

Previous terms offered: Fall 2021.

HIST 2292 (c) Modern Middle Eastern History

Non-Standard Rotation. Enrollment limit: 35.

Offers a chronological and thematic overview of the modern history of the Middle East and North Africa. Covers the period from the dismantling of the Ottoman Empire after World War I to the 2011 Arab uprisings. Studies the formation of the modern state system and the historical roots and developments of long-standing conflicts including the Arab and Israeli wars, the emergence of ideological radicalism, and the political riots and revolutions that have shaken the region. Seeks to examine the region's history beyond "War and Peace" by considering essential social and cultural transformations associated with the formation and fragmentation of nation-states in this region, including the role of colonial legacies, resources and economic distribution, social modernization, conflicting cultures, and sectarian strife, among others. Makes use of secondary literature and a variety of primary sources in English translation. Note: This course fulfills the non Euro/US requirement for History majors and minors.

Previous terms offered: Fall 2019, Fall 2018.

HIST 2295 (c, IP) Toward the Arab Spring in North Africa: Colonialism, Nation-Building and Popular Uprisings

Non-Standard Rotation. Enrollment limit: 35.

The 2011 uprisings that began in Tunisia sparked a wave of revolutions in the Arab region. Protesters demanded dignity, social justice, and the fall of authoritarian regimes. The Arab Spring was the latest instance in a long tradition of popular contestation in Algeria, Morocco, Tunisia, and Libya. This course will explore the historical relationship between rulers and ruled populations and their contentious history from colonialism to the present by focusing on conflicts of a political, social, economic, and cultural nature. The course explores how popular protests evolved along the way and the different roles they have applied during these countries' transformations in the past century. Examples will include anti-colonial protests, anti-imperial solidarity movements, trade unions and workers marches, armed regional insurrections, student mobilization on university campuses, cultural dissidence, Berber contestation, anti-austerity riots, Islamist politics, and civil society activism. . Note: This course is part of the following field(s) of study: Africa. It fulfills the non Euro/US requirement for History majors and minors. (Same as: AFRS 2820)

Previous terms offered: Spring 2019.

HIST 2297 (c, IP) Becoming China (1000-1911)

Guo Jue.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Surveys the history from the Middle Period to the end of Imperial China (1000-1911). Focuses on the emergence of a distinct consciousness of Chinese-ness and its changing relations with an ever-expanding known world. Examines issues surrounding ethnicity, cultural identity, territorial borders, foreign relations, diplomacy, and war, as well as local societies, commercial revolution, and technological innovations that made China one of the earliest nations stepping into modernity. Students will critically interrogate a variety of sources: historical writing and literary works, as well as material and visual culture. Students are expected to learn to think historically and globally, analyze primary sources and critique secondary scholarship, and craft compelling historical narratives that grapple with significant historical questions. [Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non-Euro/US requirements for history majors and minors]. (Same as: ASNS 2030)

Previous terms offered: Spring 2022.

HIST 2298 (c, DPI, IP) Colonialism in Latin America: Societies in Latin America/Caribbean: Pre-Columbian Era - Independence

Andrew Ehrnpreis.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course introduces students to major themes in the history of pre-Colombian and colonial Latin America and the Caribbean, from the fifteenth century to the early nineteenth century. Topics include pre-Colombian civilizations, Iberian conquest and colonization of the Americas, colonial evangelization, colonial political economy, slavery, the emergence of hybrid cultures and ethnicities, anti-colonial resistance, and processes that factored into the emergence of independence movements. Prominent themes include the construction and contestation of castes and ethnic identities discourses, slavery, cultural hegemony, land tenure patterns, and the development of colonial political economies within an emerging early modern world system. The course will also consider divergent paths among various regions in Iberian America. It fulfills the non Euro/US requirement for history majors and minors.

HIST 2320 (c, IP) The Emergence of Chinese Civilization

Non-Standard Rotation. Enrollment limit: 35.

Introduction to ancient Chinese history (2000 B.C.E. to 800 C.E.). Explores the origins and foundations of Chinese civilization. Prominent themes include the inception of the imperial system, the intellectual florescence in classical China, the introduction and assimilation of Buddhism, the development of Chinese cosmology, and the interactions between early China and neighboring regions. Class discussion of historical writings complemented with literary works and selected pieces of the visual arts. Note: This course fulfills the pre-modern requirement for history majors. (Same as: ASNS 2010)

Previous terms offered: Fall 2019.

HIST 2321 (c, IP) Late Imperial China

Non-Standard Rotation. Enrollment limit: 35.

Introduction to late imperial China (800 to 1800) as the historical background to the modern age. Begins with the conditions shortly before the Golden Age (Tang Dynasty) collapses, and ends with the heyday of the last imperial dynasty (Qing Dynasty). Major topics include the burgeoning of modernity in economic and political patterns, the relation between state and society, the voice and presence of new social elites, ethnic identities, and the cultural, economic, and political encounters between China and the West. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non Euro/US requirements for history majors and minors. (Same as: ASNS 2011)

Previous terms offered: Spring 2020, Fall 2018.

HIST 2322 (c, IP) China's Path to Modernity: 1800 to Present

Non-Standard Rotation. Enrollment limit: 35.

Introduction to modern and contemporary Chinese history. Covers the period from the nineteenth century, when imperial China encountered the greatest national crisis in its contact with the industrial West, to the present People's Republic of China. Provides historical depth to an understanding of the multiple meanings of Chinese modernity. Major topics include: democratic and socialist revolutions; assimilation of Western knowledge and thought; war; imperialism; the origin, development, and unraveling of the Communist rule. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non Euro/US requirement for history majors and minors. (Same as: ASNS 2012)

Previous terms offered: Spring 2019.

HIST 2342 (c, IP) The Making of Modern India and Pakistan

Non-Standard Rotation. Enrollment limit: 35.

Traces the history of India and Pakistan from the rise of British imperial power in the mid-eighteenth century to the present. Topics include the formation of a colonial economy and society; religious and social reform; the emergence of anti-colonial nationalism; the road to independence and partition; and issues of secularism, democracy, and inequality that have shaped post-colonial Indian and Pakistani society. Note: This course is part of the following field(s) of study: South Asia and Colonial Worlds. It fulfills the non Euro/US requirement of history majors and minors. (Same as: ASNS 2581)

Previous terms offered: Spring 2022.

HIST 2343 (c, IP) Media and Politics in Modern India

Non-Standard Rotation. Enrollment limit: 35.

Examines the new forms of politics and of popular culture that have shaped modernity in India. Topics include the emergence of mass politics, urbanization, modern visual culture, new media technologies, and contemporary media and democracy. Course includes a film component. Note: This course is part of the following field(s) of study: South Asia and Colonial Worlds. It fulfills the non Euro/US requirement for history majors and minors. (Same as: ASNS 2582)

Previous terms offered: Spring 2021, Spring 2019.

HIST 2345 (c, IP) The British Empire

Every Other Spring. Enrollment limit: 35.

Examines the history of the British Empire from its origins in the sixteenth century through its collapse in the mid-twentieth century, with a focus on the period after the American Revolutionary War. Explores the forces that drove colonial conquest, the shaping of colonial economies and societies, as well as the ideologies of race, gender, and sexuality that sustained colonial rule. Devotes considerable attention to the creative responses of colonized peoples to imperial rule, the rise of anti-colonial thought, the mobilization of popular anti-colonial movements, and histories of decolonization. Considers critical debates about the Empire's legacies, which continue to the present. Note: This course is part of the following field(s) of study: Europe, Colonial Worlds.

Previous terms offered: Fall 2020.

HIST 2346 (c, IP) Cities of the Global South

Rachel Sturman.

Every Other Year. Fall 2022. Enrollment limit: 35.

Examines the history, cultures, and politics of major cities shaped by histories of colonialism, the Cold War, and contemporary neoliberalism. We will consider the changing roles that these cities have played in colonial, national, and global economies, as well as the ideologies, aesthetic theories, and pragmatic contexts that have shaped their built environments. Key themes include: colonial and postcolonial urban planning and its limits; spatial inequalities; impacts of war and mass violence; urban economies; and the everyday sensory life of the city. Examples of possible cities include: Mumbai, New Delhi, Saigon, Manila, Cairo, Nairobi, and Lagos. This course is part of the following field(s) of study: South Asia and Colonial Worlds. It fulfills the non-Euro/US requirement for history majors and minors. This course satisfies the Introductory Survey and the non-US requirement requirement for the Urban Studies minor. (Same as: ASNS 2587, URBS 2587)

Previous terms offered: Fall 2021.

HIST 2364 (c, IP) Conquest, Colonialism, and Independence: African History, 1885 - 1965

David Gordon.

Every Spring. Spring 2023. Enrollment limit: 35.

Surveys history of Africa after conquest by European powers until independence in the 1960s, with a focus on west and central Africa. Includes the global precursors to colonialism, African resistance to European encroachment, and the violence of conquest. The nature of the colonial endeavor, in terms of the type of colonial regime (concessionaire, settler, or trade) is explored alongside the policies of British, French, Belgian, and Portuguese colonists and early resistance to colonialism. Covers the rise of anti-colonial nationalism and decolonization and why European powers quit Africa after only sixty years of formal colonialism. Addresses the diverse hopes and visions of the first independent generation of African leaders, including Kwame Nkrumah, Leopold Sénghor, Nnandi Azikiwe, Julius Nyerere, and Patrice Lumumba. Concludes with colonial legacies in the form of the postcolonial "gatekeeper" state. Within this time frame, considers the politics of gender, race, and class. Note: This course is part of the following field(s) of study: Africa and Colonial Worlds. It fulfills the non Euro/US requirement for history majors and minors. (Same as: AFRS 2354)

Previous terms offered: Spring 2021, Spring 2020, Fall 2018.

HIST 2365 (c, IP) The Rise of Swahili Civilization

Non-Standard Rotation. Enrollment limit: 35.

Considers the millennium-old interactions between peoples of Africa, the Middle East, and South Asia that created Swahili civilizations stretching from Mogadishu to Madagascar. Themes include the rise of dhow-based maritime trade; the spread of Islam; the slave trade and slavery; Omani, Portuguese, British, Italian, and German colonialisms; late colonial conflicts including the Mau Mau rebellion in Kenya and the revolution in Zanzibari. Ends with the rise of the post-colonial states of Tanzania, Kenya, Mozambique, Madagascar, and Somalia, and rebel insurgencies such as Somali pirates and Islamic fundamentalism. Note: This course is part of the following field(s) of study: Africa. This course meets the non-European/ US and pre-modern requirements for the History Major. (Same as: AFRS 2365)

Previous terms offered: Fall 2019.

HIST 2366 (c, IP) Apartheid's Voices: South African History, 1948 to 1994

Non-Standard Rotation. Enrollment limit: 35.

The study of apartheid in South Africa, the system of racial and ethnic segregation that began in 1948 and ended with the election of Nelson Mandela in 1994. Explores the many different facets of apartheid: how and why it emerged; its social and economic aspects; how people lived under, resisted, and collaborated with apartheid, and its similarities and differences to other forms of racial and identity-based governance, including European colonialism in Africa, US segregation, and Zionism in Israel / Palestine. The readings, lectures, and class discussions focus on the voices of diverse South Africans, activists, youth, workers, artists, soldiers, and students, exploring their different gendered, ethnic, and racial perspectives. NOTE: This course is part of the following field(s) of study: Africa; and Atlantic Worlds. It fulfills the non Euro/US requirement for history majors and minors. (Same as: AFRS 2366)

Previous terms offered: Fall 2020.

HIST 2401 (c, IP) Becoming Latin America: The Making of a Colonial World (1491-1700)

Every Other Fall. Enrollment limit: 35.

This course introduces students to the history of Latin America from the pre-Conquest period until the consolidation of a colonial system administered by, and for, a European elite at the beginning of the eighteenth century. During the semester we will follow 3 interrelated stories: the establishment of colonial rule (including institutions of social control like the church, patriarchy, and racial castes), the development of extractive economies dependent on unfree labor, and the evolution of a hybrid culture bringing together Indigenous, European, and African traditions. Students will use primary documents, archeological artifacts, contemporary films, and scholarly essays to learn about the period as well as to begin to familiarize themselves with how historians reconstruct and interpret the past. This course is part of the following field(s) of study: Latin America. It also meets the pre-modern and on euro/US requirement for history majors and minors. (Same as: LACL 2401)

Previous terms offered: Fall 2020, Fall 2018.

HIST 2402 (c, IP) Decolonizing Latin America: A (long) Century of War, 1770-1910

Every Spring. Enrollment limit: 35.

This course surveys the "long nineteenth century" in Latin America. This is a period characterized by conflict, racist policies, and indigenous dispossession, but it is also a period of radical political imaginings, of economic development, and profound social change. Topics covered include the efforts by Spain and Portugal to reform their colonies in the Americas; the independence movements of the 1810s-1820s & the ensuing "post-colonial Blues"; the end of slavery & campaigns against independent indigenous peoples; the development of export-led economic models; the implementation of social policies to "whiten" the population; the US invasion of Mexico, the destruction of Paraguay by its neighbors, and a war between Peru and Chile over guano; the triumph of liberalism and the Mexican Revolution of 1910. This is the second in a series of three surveys of Latin American history, but no prior knowledge or prerequisites necessary. This course is part of the following field of study: Latin America. It fulfills the non-Euro/US requirement for history majors and minors. (Same as: LACL 2402)

Previous terms offered: Fall 2021, Spring 2019.

HIST 2403 (c, IP) Revolutions in Latin America: The People Take the Stage

Non-Standard Rotation. Enrollment limit: 35.

Examines revolutionary change in Latin America from a historical perspective, concentrating on four successful social revolutions—Haiti, Mexico, Cuba, and Bolivia— as well as several revolutionary movements that did not result in social change— including Argentina, Guatemala, Chile, Nicaragua, and Venezuela. Popular images and orthodox interpretations are challenged and new propositions about these processes are tested. External and internal dimensions of each of these social movements are analyzed and each revolution is discussed in the full context of the country's historical development. This course fulfills the non-Euro/US requirement This course is part of the following field(s) of study: Latin America. (Same as: LACL 2403)

Previous terms offered: Spring 2022, Fall 2019.

HIST 2416 (c, DPI, IP) Altered States: Drugs, Empires, and Nations in Latin America

Andrew Ehrinpreis.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the history of Latin American and Caribbean societies through the lens of drug economies and cultures. It begins with consideration of methodological concerns, including issues of the place of drugs in commodity studies and the social constructivist approach to drug meanings and effects. The course then examines three periods of Latin American drug history: the pre-Columbian era; the era of Iberian colonialism; and the twentieth century and beyond, which saw the rise of illicit drug markets and the U.S.-led "War on Drugs." The course will trace, over time, major social, cultural, and political economic changes wrought by and upon Indigenous psychoactive substances, such as coca/cocaine, yerba mate, tobacco, cacao/chocolate, and psilocybin mushrooms. This course is part of the following field(s) of study: Latin America. It also meets the non-Euro/US requirement. (Same as: LACL 2116)

HIST 2420 (c, IP) Culture and Conquest in Japan: An Introductory History to 1800

Sakura Christmas.

Every Year. Fall 2022. Enrollment limit: 35.

How did Japan become Japan? This course introduces the origins of Japan from the archeological record until industrial modernity. Lectures survey the unification of Japan under a court-centered state, the rise and demise of the samurai as its ruling order, and the archipelago's shifting relationship to the larger world. We will not only focus on the culture of conquest by the warrior class, but also conquest via culture as inhabitants of the archipelago transferred and transformed material commodities, knowledge systems, and sacred beliefs from beyond its horizons. Readings emphasize voices that comment on gender, status, religion, science, and nature. Note: This course is part of the following field(s) of study: East Asia. It also meets the pre-modern and non euro/us requirements for history majors and minors. (Same as: ASNS 2252)

Previous terms offered: Fall 2020.

HIST 2421 (c, IP) Empire and Nation in Japan

Sakura Christmas.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

In 1853, Commodore Matthew Perry sailed to Japan with four naval warships and issued an ultimatum: open up to trade or face foreign invasion. Charts Japan's swift emergence from its feudal origins to become the world's first non-Western, modern imperial power out of its feudal origins. Lectures introduce the origins, course, and consequences of building a modern state from the perspective of various actors that shaped its past: rebellious samurai, anarchist activists, the modern girl, imperial fascists, and office salarymen. Readings complicate dichotomies of East and West, modern and feudal, nation and empire through the lens of ethnicity, class, and gender. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: ASNS 2311)

Previous terms offered: Spring 2022, Spring 2020.

HIST 2430 (c, IP) Gendering Latin American History

Every Other Spring. Enrollment limit: 35.

An introduction to Latin American history between 1400 and the present, using the lens of gender to reinterpret the region's history. Some key events include the arrival of Europeans, mestizaje, honor and race, independence, civil wars, liberalism, populism, dictatorship, and issues of memory and redemocratization. This course works on two registers. The first is that of "women's history." Here, we will survey the experiences and impact of women in Latin America from the pre-conquest period to the present, through the lenses of cultural, social, and political history. In other words, we will tell the stories of Latin American women and investigate how changes small and large affected their everyday lives. The second register is "gender history." In other words, we will not just discuss women's experiences, but also the ways that gender ideologies have influenced Latin American history. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non euro/us requirement for history majors and minors. (Same as: GSWS 2430, LACL 2420)

Previous terms offered: Spring 2020.

HIST 2440 (c, IP) On the Road: Travel Writing and the Cosmopolitan World of Medieval Islam

Non-Standard Rotation. Enrollment limit: 25.

Islamic medieval writings of travelers, explorers, and exiles present a cosmopolitan world of encounters of peoples and cultures. This 2000-level course uses these accounts as an entryway to the history of medieval Islam. We will consider how and why Islam emerged in seventh-century Arabia and follow its path through the Mongol expansion in the fourteenth century. We will examine the impact of the Islamic empire on the medieval Middle East, as it spread across most of the known world from Spain to India, and the cultural practices that it developed to manage cultural difference. The readings, lectures, and class discussions will focus on primary sources: the accounts of Muslims, Jews, and Christians who traveled the length and breadth of the Islamic empire. Emphasis on the interconnectedness of the medieval world and on narratives of inclusion and exclusion. Taught in English. For advanced Arabic students, Arabic 3354 with an Arabic reading and writing component will be offered concurrently with this course. Note: This course fulfills the premodern and non euro/us requirement for history majors and minors. (Same as: ARBC 2354, REL 2354)

Previous terms offered: Spring 2020.

HIST 2441 (c, IP) Modern Middle Eastern and North African History

Nasser Abourahme.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines modern Middle Eastern and North African history from the fall of the Ottoman Empire and the rise of the nation-state to the present conjuncture of revolution and war. Proceeds chronologically with attention to the main events and turning points in the region. Considers how the over-arching questions about the region have been posed. Key themes are empire and nationalism; colonialism, anticolonialism and revolution; war, humanitarianism, and migration; and oil and the history of capital. This course will satisfy the non-Euro requirement for the history major/minor. (Same as: MENA 2350)

HIST 2503 (c) Radically Conservative?: Unraveling the Politics of the American Revolution

Strother Roberts.

Every Other Year. Fall 2022. Enrollment limit: 16.

Seminar. Different scholars have presented the American Revolution as either a radically egalitarian movement for universal human rights or as a fundamentally conservative rebellion led by elite men striving to protect their wealth and power from both the British Parliament and those occupying the lower rungs of American society. Unraveling the often-competing motives of Americans during the Revolution requires an understanding of the words and actions of Revolutionaries in light of their contemporary cultures and societies. Frequently this necessitates putting aside modern claims about what the Revolution means to better understand the interests and ideologies that underlay this foundational era of US history. Note: This course is part of the following field(s) of study: United States.

Previous terms offered: Fall 2020.

HIST 2504 (c) Animals in American History

Every Other Year. Enrollment limit: 16.

Seminar. Although modern humans tend to think of themselves as above nature, they are in fact part of it: partners in a myriad of relationships that have tied them to other members of the animal kingdom throughout their history. Examines a number of these relationships, focusing on North America from the sixteenth through the twentieth century. Topics considered include the role of animals in the development of the American economy, how domestic and wild animals have shaped the American environment, how Americans have conceived of the boundary between humanity and animality, and how pets have come to be viewed as part of the modern family. Note: This course is part of the following field(s) of study: United States. (Same as: ENVS 2504)

Previous terms offered: Spring 2022, Fall 2018.

HIST 2507 (c, DPI, IP) Spain of the Three Religions: Islam, Christianity, and Judaism in Medieval Iberia

Fall 2022.

Seminar. For over seven hundred years, the Iberian Peninsula saw Muslims, Jews, and Christians living in close proximity, and thus historians dub it "Spain of the three religions." This course examines how relations between Muslims, Christians, and Jews evolved across time. We will explore questions about religion and identity and what work both do in shaping communities, cultures, and prevailing historical narratives. Specific themes include forced conversion, trade, intellectual exchange, and religious polemics. Our readings begin with the Islamic conquest of Iberia in the early eighth century and end with the fall of Muslim Granada in 1492, the purity of blood statutes, and the dawn of the Spanish Inquisition. The primary sources encompass many different mediums and genres, including famous *The Song of the Cid*, Inquisition proceedings, treatises on conversion, law, and illuminated manuscripts. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement. (Same as: REL 2579)

HIST 2508 (c, DPI, IP) Race Before Modernity: Crafting Sameness and Difference in the Middle Ages

Alexandra Montero Peters.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

This seminar investigates how racial concepts—ideas about the transmission of characteristics through blood and lineage—emerged in the Middle Ages. Students discuss sources that manifest premodern race-making, such as travel literature, works on monsters and marvels, geographies, art, and theological writing. The readings also uncover the entwined histories of race and religion, particularly via the "Curse of Ham." While the broader Mediterranean is considered, extended attention is given to Judaism, Christianity, and Islam in Iberia and North Africa after episodes of large-scale (and often forced) conversion. The word "race" was itself first applied to humans in response to one such episode: the mass conversions of Jews and Muslims to Christianity in late medieval Spain. As students consider themes like the racialization of religion and the relationship between premodern racial concepts and modernity, they will also read and critique recent scholarship on race in the Middle Ages. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement.

HIST 2522 (c) History: What, How, Why

Non-Standard Rotation. Enrollment limit: 16.

Seminar. History studies the past, but what does it teach us about the past? What is the nature of historical knowledge? How does the historian go about their work? Why do we care about the past? Investigates the craft of history through an examination of both classic historical works and theoretical and philosophical reflections of the discipline of history itself. This course is part of the following field(s) of study: Europe.

Previous terms offered: Spring 2022, Spring 2021.

HIST 2527 (c) Medieval and Reformation Intellectual History

Every Other Fall. Enrollment limit: 16.

Seminar. Examines important works in their intellectual and cultural context from the Middle Ages to Reformation, a period beginning with Augustine (354-430) and ending with the Council of Trent (1563). Potential topics include the relation between religion and philosophy, God and nature, and conceptions of the self. Potential readings include works by Augustine, Hildegard of Bingen, Thomas Aquinas, William Ockham, Christine de Pizan, Martin Luther, and John Calvin. Note: This course fulfills the pre-modern requirement for history majors and minors.

Previous terms offered: Fall 2019.

HIST 2528 (c) Renaissance and Early Modern Intellectual History

Every Other Spring. Enrollment limit: 16.

Seminar. Examines important works in their historical and cultural context from the Renaissance and Early Modern Period, roughly from the age of Petrarch (1304-1374) to the end of the age of Kant (1724-1804). Potential areas of inquiry may include humanism, the rise of skepticism, the mechanical philosophies, and origins of atheism. Potential readings include works by Machiavelli, Montaigne, Margaret Cavendish, Madeleine de Scudéry, Voltaire, and Kant. Note: This course is part of the following field(s) of study: Europe. It fulfills the premodern requirement for history majors and minors.

Previous terms offered: Spring 2020.

HIST 2540 (c, IP) Sex, Scandal, and Celebrity in Early Modern Europe
Meghan Roberts.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Uses major scandals and cults of celebrity to illuminate the cultural history of early modern Europe. Questions include: What behaviors were acceptable in private but inexcusable in public? Why are people fascinated by scandals and celebrities, and how have those categories evolved over time? How have the politics of personal reputation changed with the rise of new media and new political cultures? Topics include gossip, urban spaces, gender, sex, crime, and religion. Uses a variety of materials, such as cartoons, newspaper articles, trial transcripts, memoirs, and novels, to explore the many meanings of scandal in early modern Europe, especially France and England. Note: This course is part of the following field(s) of study: Europe. It also fulfills the pre-modern requirement for history majors and minors. (Same as: GSWS 2450)

Previous terms offered: Spring 2021, Fall 2020.

HIST 2543 (c) History of the Body
Every Other Year. Enrollment limit: 16.

Examines changing conceptions and experiences of the human body in early modern Europe. Pays special attention to religion, sex, gender, reproduction, and the body as an object of scientific study. Students will use print and visual sources to think about the body as socially and historically constructed. Note: This course is part of the following field(s) of study: Europe. It also meets the pre-modern requirement.

Previous terms offered: Spring 2022, Spring 2019.

HIST 2580 (c, IP) The German Experience, 1918-1945
Every Other Year. Enrollment limit: 16.

Seminar. An in-depth inquiry into the troubled course of German history during the Weimar and Nazi periods. Among the topics explored are the impact of the Great War on culture and society in the 1920s; the rise of National Socialism; the role of race, class, and gender in the transformation of everyday life under Hitler; forms of persecution, collaboration, and resistance during the third Reich; Nazi war aims and the experience of war on the front and at "home," including the Holocaust. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Fall 2021, Fall 2019.

HIST 2586 (c) A History of the Holocaust: Context, Experience, and Memory

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Explores the ideas and events that led to the Holocaust, the diverse experiences of the victims, European and Soviet responses to the Nazi persecution of the Jewish people, and issues related to the Holocaust and historical memory. In addition to secondary scholarship, discussions and papers will draw on a range of primary materials, including literature, memoirs, photography, art and film. Students will have the opportunity to do a short research project. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Spring 2022, Spring 2020.

HIST 2607 (c) Maine: A Community and Environmental History
Every Other Year. Enrollment limit: 16.

Seminar. Examines the evolution of various Maine social and ecological communities – inland, hill country, and coastal. Begins with the contact of European and Native American cultures, examines the transfer of English and European agricultural traditions in the seventeenth and eighteenth centuries, and explores the development of diverse geographic, economic, ethnic, and cultural communities during the nineteenth and into the early twentieth centuries. Note: This course is part of the following field(s) of study: United States. (Same as: ENVS 2447)

Previous terms offered: Spring 2021, Spring 2019.

HIST 2609 (c) History of Women's Voices in America and at Bowdoin
Every Other Year. Enrollment limit: 16.

Seminar. Examines women's voices in America from 1650 to the early twenty-first century, as these were written and saved in private letters, journals, and autobiographies; poetry, short stories, and novels; essays, addresses, prescriptive literature, and journalism. In celebration of 50 years of Women at Bowdoin, the course will culminate with an examination of women's voices at Bowdoin, using the "Forty Years: The History of Women at Bowdoin" website as both a source and a guide to further readings. Articles and monographs from the secondary literature provide a historical framework for examining women's writings. Research projects focus on the form and content of women's writing and the ways that these accounts illuminate women's understandings, reactions, and responses to their historical situation. Note: This course is part of the following field(s) of study: United States. (Same as: GSWS 2601)

Previous terms offered: Spring 2022, Spring 2020.

HIST 2621 (b) Reconstruction
Patrick Rael.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Close examination of the decade following the Civil War. Explores the events and scholarship of the Union attempt to create a biracial democracy in the South following the war, and the sources of its failure. Topics include wartime Reconstruction, the Ku Klux Klan, Republican politics, and Democratic Redemption. Special attention paid to the deeply conflicted ways historians have approached this period over the years. Note: This course is part of the following field(s) of study: United States. (Same as: AFRS 2621)

Prerequisites: HIST 1000 - 2969 or HIST 3000 or higher.

Previous terms offered: Spring 2021, Spring 2019.

HIST 2624 (c) Historical Simulations

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Can board games teach history? Is it possible to analyze them as historical interpretations? What would such analyses reveal about both history and the way it is represented in popular culture? Which game mechanics or approaches to design seem to be better able to promote historical arguments? What factors may impede the representation of the past in games? Explores the past while addressing these questions. Examines six topics in history and plays one game related to them. Topics may include: the age of exploration and discovery, the American Revolution, the French Revolution, frontier exploration, slavery, and the American Civil War. Assignments consist of three structured game analyses, a final project, and participation in weekly evening game labs. Prospective students should be familiar with modern board games. Note: This course is part of the following field(s) of study: United States.

Prerequisites: Two of: HIST 1000 or higher and HIST 1000 or higher.

Previous terms offered: Fall 2018.

HIST 2625 (b, MCSR) Mapping American History using Geographic Information Systems (GIS)

Non-Standard Rotation. Enrollment limit: 16.

In this intermediate seminar we will use Geographic Information Systems to explore historical problems in 19th-century US history. We will introduce and practice basic statistical techniques, and use the class GIS database to investigate problems, construct our own historical datasets, and make our own maps. Class projects will challenge students to develop critical thinking skills in historical and computational methods, and practice effective data presentation. We will work with a wide array of history data, including information on race, ethnicity, gender, religion, agriculture, slavery, and voting behavior in the period in question. Throughout, we will probe the possibilities and limitations of GIS as a digital technology and methodological approach to historical analysis. This course is part of the following field(s) of study: United States. (Same as: DCS 2550)

Prerequisites: HIST 1000 - 2969 or HIST 3000 or higher.

Previous terms offered: Fall 2021, Fall 2020.

HIST 2640 (c) California Dreamin': A History of the Golden State

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Sunshine, beaches, shopping malls, and movie stars are the popular stereotypes of California, but social conflicts and environmental degradation have long tarnished the state's golden image. Unravels the myth of the California dream by examining the state's social and environmental history from the end of Mexican rule and the discovery of gold in 1848 to the early twenty-first century. Major topics include immigration and racial violence; radical and conservative politics; extractive and high-tech industries; environmental disasters; urban, suburban, and rural divides; and California in American popular culture. This course is part of the following field(s) of study: United States. (Same as: ENV 2416)

Previous terms offered: Spring 2022, Spring 2020.

HIST 2641 (c, DPI) Japanese American Incarceration: Removal, Redress, Remembrance

Connie Chiang.

Every Other Year. Fall 2022. Enrollment limit: 16.

Seminar. Examines the mass imprisonment of Japanese Americans during World War II. Focuses on how historians have interpreted this episode and how Japanese Americans have remembered and reclaimed it. Topics include government justifications for incarceration, the operation of the camps, the diverse experiences of Japanese Americans, the postwar redress movement, and historical memory and commemorations. Also analyzes the political application of this history in discussions of contemporary immigration policy and social justice more broadly. Readings include secondary and primary sources, such as court cases, government documents, films, photography, art, oral histories, memoirs, and fiction. Note: This course is part of the following field(s) of study: United States. (Same as: ASNS 2881)

Previous terms offered: Fall 2020.

HIST 2660 (c) The City as American History

Matthew Klinge.

Every Other Year. Spring 2023. Enrollment limit: 16.

Seminar. America is an urban nation today, yet Americans have had deeply ambivalent feelings toward the city over time. Explores the historical origins of that ambivalence by tracing several overarching themes in American urban history from the seventeenth century to the present. Topics include race and class relations, labor, design and planning, gender and sexual identity, immigration, politics and policy, scientific and technological systems, violence and crime, religion and sectarian disputes, and environmental protection. Discussions revolve around these broad themes, as well as regional distinctions between American cities. Students are required to write several short papers and one longer paper based upon primary and secondary sources. Note: This course is part of the following field(s) of study: United States. (Same as: GSWS 2266, URBS 2660)

Previous terms offered: Spring 2019.

HIST 2690 (c, IP) Fascism

Salar Mohandesi.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Although the term "fascism" appears everywhere today, it seems to have lost its specific meaning. In this course, we examine the history of fascism in Europe from the late 19th century to the present, exploring such questions as: Why did fascist movements first emerge? Is fascism a coherent ideology? How did fascists take power? How does fascism vary from country to country? Is fascist internationalism possible? And how have anti-fascists organized against fascism? While we focus on the years between two World Wars, the period of fascism's height, we will pay special attention to how fascism not only survived, but successfully reinvented itself after 1945. The course ends by investigating the new wave of right-wing movements across Europe and the United States to determine whether they really constitute fascism. Note: this course is part of the following field(s) of study: Europe.

Previous terms offered: Spring 2021, Spring 2019.

HIST 2691 (c, IP) Marxism

Every Other Year. Enrollment limit: 16.

Seminar. Proclaimed dead and buried, the body of theory that once guided socialist movements across the globe for over a century is haunting us again. While proponents and opponents alike agree that Marxism is back, there's little agreement about what it was, and what it might mean today. This course offers an intellectual history of Marxist theory from the foundational texts to the present. First, we survey major thinkers in the Marxist tradition, including Marx, Luxemburg, Lenin, Gramsci, Cabral, Mao, Althusser, Hall, Dalla Costa, and Fields. Second, we will assemble a toolbox of key concepts, such as class, social reproduction, racism, capital, the state, imperialism, ideology, the subject, and the party. Third, we will explore larger thematic questions about the meaning of Marxism: What was Marxism? How did it change over time? How was it adapted to different contexts? Is Marxism still relevant? Note: This course is part of the following field(s) of study: United States.

Previous terms offered: Fall 2020.

HIST 2700 (c) Martin, Malcolm, and America

Every Other Year. Enrollment limit: 16.

Seminar. Examines the lives and thoughts of Martin L. King Jr. and Malcolm X. Traces the development in their thinking and examines the similarities and differences between them. Evaluates their contribution to the African American freedom struggle, American society, and the world. Emphasizes very close reading of primary and secondary material, use of audio and videocassettes, lecture presentations, and class discussions. In addition to being an academic study of these two men's political and religious commitment, also concerns how they inform our own political and social lives. Note: This course is part of the following field(s) of study: United States. (IRBW) (Same as: AFRS 2700)

Previous terms offered: Spring 2019.

HIST 2745 (c, IP) Death in Ancient China

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Explores the topic of death and the relationship between the living and the dead in the sociohistorical, ideological, and religious contexts of ancient China. What do the dead become and where do they go? What does it mean to become an ancestor or a ghost? How are the dead remembered and forgotten? The course considers mortuary space and architecture, burial practices, entombed objects, and funerary writings; it also examines diverse conceptions, regional differences, and historical contingencies behind the making of the dead from prehistoric time to the Middle Period, when Confucianism, Daoism, and Buddhism coexisted in China. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non-Euro/US requirements for history majors and minors. (Same as Asian Studies 2014.) (Same as: ASNS 2014)

Previous terms offered: Fall 2021.

HIST 2746 (c, IP) Everyone Eats: A Deep History of Foodways in China

Guo Jue.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Explores the deep history of foodways in China. Takes students on a historical journey to visit the earliest rice paddy of Neolithic villages in southern China, witness the elaborate food preparation and lavish feasting of the Han elites, meet the exotic ingredients and foreign peoples on the Silk Roads, and experience family and community meals of ordinary Chinese today. Through the lens of food, meals, and cuisine, this seminar engages students to make connections between a variety of topics—agriculture, environment, and food production; cooking utensils, recipes, and domestic labor; feast, famine, and politics; and food, region, and identity—to understand the history of China. This course fulfills the pre-modern and non-Euro/US requirements for history majors and minors. (Same as: ASNS 2105)

HIST 2780 (c, IP) The Foundations of Chinese Thought

Guo Jue.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. Addresses Chinese thought from the time of Confucius, ca. sixth century B.C.E., up to the beginning of the Common Era. The first half of the time period nurtured many renowned thinkers who devoted themselves to the task of defining and disseminating ideas. The latter half witnessed the canonization of a number of significant traditions, including Confucianism. Major problems that preoccupied the thinkers include order and chaos, human nature, the relationship between man and nature, among others. Students instructed to treat philosophical ideas as historically conditioned constructs and to interrogate them in contexts. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non Euro/US requirements for history majors and minors. (Same as: ASNS 2002)

Previous terms offered: Fall 2019, Fall 2018.

HIST 2782 (c, IP) Enemies of the State

Every Other Year. Enrollment limit: 16.

Seminar. Explores a series of historical individuals who have been incarcerated, exiled, or silenced by the Chinese state from the nineteenth through the twenty-first century. Covers three different regimes: the Qing Dynasty (1644–1912), the Republic of China (1912–1949), and People's Republic of China (1949–present). Main topics include state and state power, ethnic and religious conflicts, gender equality, and cyber activism. The selection of historical figures reflects the wide range and rich diversity of the Chinese population, including women, religious figures, and ethnic/sexual minorities. Note: This course fulfills the non euro/us requirement for history majors and minors. (Same as: ASNS 2110)

Previous terms offered: Spring 2020.

HIST 2802 (c, IP) Global Cities, Global Slums of India

Non-Standard Rotation. Enrollment limit: 16.

Seminar. How have cities in the so-called "developing world" come to take their contemporary forms? How is life in these cities and slums lived? Explores these and other questions through a focus on modern India. Drawing on film, fiction, memoirs, urban planning, and other materials, examines the processes through which cities and slums have taken shape, ongoing efforts to transform them, as well as some of the diverse ways of representing and inhabiting modern urban life. Note: This course is part of the following field(s) of study: Colonial Worlds and South Asia. It fulfills the non Euro/US requirement for history majors and minors. (Same as: ASNS 2585, URBS 2802)

Previous terms offered: Fall 2020, Spring 2019.

HIST 2803 (c, IP) A History of Human Rights

Non-Standard Rotation. Enrollment limit: 16.

Traces the emergence of ideas of universal humanity and human rights as these took shape in the context of European imperial expansion from the sixteenth through the twentieth centuries. Uses case studies of Europeans and their interlocutors in Latin America, Asia, and Africa to explore the seeming contradiction and actual historical connections between empire and appeals to humanity. Examines the operation of transnational institutions like the United Nations since the mid-twentieth century, as well as recent critiques of rights frameworks and of the distinction between humans and the rest of the natural world. Students will engage in original research on a topic of their choice. This course satisfies the non-Euro/US requirement in the history major and is part of the following field(s) of study: Colonial Worlds.

Previous terms offered: Spring 2022, Fall 2019.

HIST 2804 (c, IP) Science and Technologies of Life in South Asia

Rachel Sturman.

Every Other Spring. Fall 2022. Enrollment limit: 16.

Seminar. Examines the history of science and technology by exploring how these knowledges have defined and shaped human and nonhuman life in South Asia in the modern era. Considers debates about scientific evidence, the making of scientific authority and expertise, and the cultures of technology, as well as the circulation of popular knowledges and their entanglements with privileged sciences. Focuses on how people have thought—and produced knowledge—about nature, the human body, and bodily differences (such as race, caste, gender, sexuality, ability). Topics may include: science and technology in the service of empire, nation, or capital (such as race science, tropical medicine, plantation agriculture, nuclear power, natural resource extraction); modern yoga and Ayurveda; the pharmaceutical industry and bioprospecting; theories of the origins of castes, tribes, or linguistic communities; and new reproductive and assistive technologies. Note: This course is part of the following field(s) of study: South Asia, Colonial Worlds. It fulfills the non euro/us requirement for history majors and minors. (Same as: ASNS 2586)

Previous terms offered: Spring 2021.

HIST 2821 (c, IP) After Mandela: History, Memory, and Identity in Contemporary South Africa

Non-Standard Rotation. Enrollment limit: 16.

How do South Africans remember their past? Begins with the difficulties in developing a conciliatory version of the past during Nelson Mandela's presidency immediately after apartheid. Then explores the changing historiography and popular memory of diverse historical episodes, including European settlement, the Khoisan "Hottentot Venus" Sara Baartman, Shaka Zulu, the Great Trek, the Anglo-Boer War, the onset of apartheid, and resistance to it. Aims to understand the present-day social, economic, and cultural forces that shape the memories of South Africans and the academic historiography of South Africa. Note: This course is part of the following field(s) of study: Africa. It fulfills the non Euro/US requirement for history majors and minors. (Same as: AFRS 2821)

Previous terms offered: Spring 2019.

HIST 2822 (c, IP) Youth and Revolution in Africa: Changemakers and Child Soldiers

Non-Standard Rotation. Enrollment limit: 16.

Seminar. The African continent has an unmatched percentage of young people in relation to total population. Over the last sixty years, these youth have driven a continent-wide revolution against an intersection of traditional, gerontocratic, and neo-colonial structures. By studying student activism in apartheid and post-apartheid South Africa, youth movements against colonialism and neocolonialism in central Africa, the "blood diamond" wars of Liberia and Sierra Leone, the child soldiers of the Democratic Republic of Congo, and youth protests against policy brutality in West Africa, this course nuances oft-ascribed youth roles as changemakers and as child soldiers. It considers the gendered and political identities that have emerged through this continental societal revolution. Note: This course is part of the following field(s) of study: Africa. It fulfills the non Euro/US requirement for history majors and minors. (Same as: AFRS 2822)

Previous terms offered: Spring 2021, Fall 2018.

HIST 2823 (c, IP) Sacred Icons and Museum Pieces: The Powers of Central African Art

Non-Standard Rotation. Enrollment limit: 16.

Seminar. The art of Central Africa inspired European avant-garde artists from Pablo Picasso to Paul Klee. This course explores art as a historical source. What does the production, use, commerce, and display of art reveal about politics, ideology, religion, and aesthetics? Prior to European colonialism, what was the relationship between art and politics in Central Africa? How did art represent power? What does it reveal about gender relations, social divisions, and cultural ideals? The course then turns to the Euro-American scramble for Central African art at the onset of European colonialism. How did the collection of art, its celebration by European artists, and display in European and American museums transform patterns of production, cultural functions and aesthetic styles of Central African art? The course ends with current debates over the repatriation of African art. Note: This course is part of the following field(s) of study: Africa. This course meets the non-European/ US History requirements. (Same as: AFRS 2823, ARTH 2390)

Previous terms offered: Fall 2019.

HIST 2824 (c, DPI, IP) The Afro-Portuguese Atlantic World, 1400–1900
David Gordon.
Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Knowledge of the history of the slave trade to the Americas has grown immensely. This course pivots from viewing the Atlantic World through the lens of the trade in slaves to how a diverse Atlantic World developed through Afro-Portuguese encounters from the age of Henry the Navigator to the formal abolition of slavery in Brazil and the extension of colonization in Portuguese-ruled Africa. How and why did early modern Africans and Portuguese participate in the Atlantic trade? What other forms of commerce, such as ivory and rubber, proliferated? What cultural systems, cosmologies, religions, and identities emerged through these Atlantic World exchanges, including the formation of Afro-Portuguese identities? What are the legacies of the early modern Afro-Portuguese Atlantic world? In exploring these and other questions, this course introduces students to the histories of Portugal, Angola, Mozambique, and Brazil. It fulfills the non-Euro/US and premodern requirements for history majors and minors.

HIST 2862 (c, IP) The Haitian Revolution
Every Other Fall. Enrollment limit: 16.

Seminar. Examines one of the most significant and yet neglected revolutions in history. Between the years 1791-1804, Haitian revolutionaries abolished slavery and ultimately established a free and independent nation. Explores the Revolution's causes and trajectory and connects Haiti to the broader Atlantic world. Likewise, studies the revolution's aftermath and its impact on world history. This course is part of the following field(s) of study: Latin America, Atlantic Worlds, and Colonial Worlds. It fulfills the premodern and the non-Euro/US requirements for history majors and minors. (Same as: AFRS 2862, LACL 2162)

Prerequisites: HIST 1000 - 2969 or LAS 1000 - 2969.

Previous terms offered: Fall 2021.

HIST 2870 (c, IP) The Rise and Fall of New World Slavery
Non-Standard Rotation. Enrollment limit: 16.

Seminar. The form of slavery pioneered by Europeans who brought Africans to the New World occupies a unique place in the institution's long story. Examines the rise and demise of New World slavery: its founding, central practices, and long-term consequences. Just as New World slavery deserves to be considered a unique historical practice, so too do the impulses and transformations that led to its ending. Explores slavery as it rose and fell throughout the Atlantic basin, focusing particularly on Brazil, the Caribbean, and mainland North America. Investigates a range of issues: the emergence of market economies, definitions of race attendant to European commercial expansion, the cultures of Africans in the diaspora, slave control and resistance, free black people and the social structure of New World slave societies, and emancipation and its aftermath. Note: This course is part of the following field(s) of study: US, Europe, Atlantic Worlds and Colonial Worlds. (Same as: AFRS 2870)

Previous terms offered: Spring 2020.

HIST 2884 (c, IP) Competing Israeli and Palestinian Nationalisms
Non-Standard Rotation. Enrollment limit: 16.

Seminar. The Arab-Israeli conflict has been a constant source of tension and war during the Middle East's history. At the heart of the conflict lie the two competing nationalist claims of the Israelis and the Palestinians. The course explores how Israelis and Palestinians have constructed an image of their selves and the other throughout the different periods of their modern history, and their impact on political conflict and peace negotiations. The course will read these narratives from the late nineteenth century to the present. It will address significant episodes such as the British mandate in Palestine, the creation of Israel and the Palestinian nakba, Israel's place in the region during pan-Arabism, the question of terrorism and resistance, the rise of religious nationalism, the intifada, and the attempted peace processes since Oslo. The course invites student to think "outside the box" about the role of memory and how conflicts affect individuals rather than states and political leaders. Note: This course fulfills the non Euro/US requirement for History majors and minors.

Previous terms offered: Spring 2019.

HIST 2885 (c, IP) Arab Thought: Ideas, Intellectuals, and Ideologies
Non-Standard Rotation. Enrollment limit: 16.

Seminar Introduces students to the ideas and intellectual projects of significant Arab thinkers, from the 19th century to the Arab Spring in 2011. This course will identify and discuss how they have addressed the Arabs' concern for modernity and identity in the context of social, political and cultural transformation in the region. The course will cover several stages of Arab intellectual history starting with the liberal age, socialist and nationalist ideologies, pan-Arabism, third-world revolutionary ideologies, Islamic revival, and calls for democratization and human rights. It will also continuously ask about the conditions of thinkers, writers and dissidents in the Arab region, especially the impact of authoritarian regimes and the dangers posed by the rise of militant Islamism. This seminar will rely on a direct interaction with the primary texts. No prior knowledge Arab history is required, and all sources will be provided in translation. Note: This course fulfills the non Euro/US requirement for history majors and minors.

Previous terms offered: Fall 2019.

HIST 2890 (c, IP) The Japanese Empire and World War II
Non-Standard Rotation. Enrollment limit: 16.

Seminar. Charts the sudden rise and demise of the Japanese empire in the making of modern East Asia. Once stretching from the Mongolian steppe to the South Seas mandate, the Japanese empire continues to evoke controversy to this day. Discussions call attention to competing imperial visions, which challenged the coherence of the project as a whole. Primary sources introduce the lived experience of various individuals—emperors and coolies alike—who both conquered and capitulated to the imperial regime. Topics covered include settler colonialism, independence movements, transnational labor, fascist ideology, environmental warfare, the conundrum of collaboration, and war trials. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: ASNS 2310)

Previous terms offered: Spring 2021.

HIST 2891 (c, IP) East Asian Environmental History, 1600-2000

Sakura Christmas.

Every Other Spring. Fall 2022. Enrollment limit: 16.

Seminar. The Anthropocene defines an epoch in which humans have become the dominant force in shaping their environment. Examines the role of East Asia in the emergence of this new era, from the seventeenth century to the present. In debating the narrative of ecological change in China, Japan, and Korea, readings and discussions focus on how successive regimes transformed their environments, and conversely, how those environments also structured modern human society. Questions what specific political, social, and economic changes triggered the Anthropocene in East Asia; how cultural, religious, and intellectual constructs have conditioned its arrival and acceleration. Weekly topics include: commodity frontiers, environmental sustainability, public health, industrial pollution, and nuclear technology. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: ASNS 2890, ENVS 2491)

Previous terms offered: Fall 2020.

HIST 2892 (c, IP) Maps, Territory, and Power in Asia

Sakura Christmas.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. From the Mercator projection to GPS, maps structure our lived experience as much as they reflect "objective" representations of our surroundings. This seminar examines the geopolitical formations of and within Asia through the history of cartography from the seventeenth century to the present. In exploring both inland and maritime frontiers, we analyze how this technology has sought to exert scientific hegemony over alternate conceptions of space in Asian contexts in order to legitimize state power. In so doing, we trace the deep history of contemporary border disputes on land and at sea. Sessions include working with original specimens in special collections. Note: This course is part of the following field(s) of study: Colonial Worlds, East Asia and South Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: ASNS 2892)

Previous terms offered: Spring 2021.

HIST 2893 (c, IP) Unearthing China: National History and Chinese Archaeology since the 20th Century

Non-Standard Rotation. Enrollment limit: 16.

Explores the role of Chinese archaeology—a discipline of Western origin but developed exclusively in the Chinese soil—in the modern nation-building and national history writing in China since the twentieth century. This seminar considers critical development in practice and theory and discoveries of national and world significance, as well as topics of debate and controversies related to the origin of Chinese civilization, national narratives, and cultural identity and political unity from the birth of Chinese archaeology at the moment of grave national crises in the early twentieth century to its flourishing present, when Chinese archaeology enjoys tremendous state investments and attracts unprecedented public attention as China's economic and political power strengthens. Through the lens of Chinese archaeology, this seminar asks the students to critically and meaningfully engage China as a modern nation state from the perspectives of how its past have been unearthed and told. [Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non-Euro/US requirements for history majors and minors]. (Same as: ASNS 2055)

Previous terms offered: Spring 2022.

HIST 2894 (c, DPI, IP) Truth, Justice, and Latin America: History and Law in Post-Cold War Truth Commissions

Andrew Ehrnpreis.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Seminar. The course examines comparatively the numerous "truth commissions" instituted in Latin America to investigate, explain, and assign legal and moral responsibility for the mass atrocities of the Cold War era. Students also consider the methodological interplay between historiography, law, and anthropology in the work of these commissions, as well as epistemological tensions between those disciplines that have arisen in the context of investigations of human rights violations. Focusing on issues of decolonization, the course investigates the ways in which deeply rooted racism was refracted through the Cold War ethos of anti-communism to produce state-sponsored violence and genocide. Students also consider the responses and resistance to repression of various marginalized groups in diverse national contexts. Note: This course is part of the following field(s) of study: Latin America. It also meets the non-Euro/US requirement.

HIST 2900 (c, IP) Borderlands in the Americas: Power and Identity Between Empire and Nation

Every Other Fall. Enrollment limit: 16.

The study of borderlands examines areas of contested sovereignty where no single social group has political, cultural, or economic control. Explores interactions between native peoples, white settlers, and the representatives of the states in the Americas between the seventeenth and the nineteenth centuries. An examination of power and identity in borderlands considers a variety of regions in the hemisphere, from the Pacific Northwest to the Yucatan, from Texas to the Amazon. Pays special attention to how structures of race, class, and gender were established, maintained, and negotiated at times of uncertain change and in the absence of hegemonic state practice. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non euro/US requirements for history majors and minors. (Same as: LACL 2100)

Previous terms offered: Fall 2020, Fall 2018.

HIST 2910 (c, IP) Race and Belonging in Latin America

Every Other Year. Enrollment limit: 16.

Seminar. This course is a study of race and ethnicity in Latin America, focusing on how Latin Americans themselves have understood and articulated these categories, as well as how scholars have interpreted their articulations. We will cover topics from African slavery to indigenous activism and mass immigration. Our focus will be on peoples of indigenous and African descent—the majority of Latin Americans—which will allow us to address questions of national identity, racial mixture, and cultural exchanges. We will trace themes familiar to students of the broader Atlantic world (themes such as race and nation, freedom and slavery, citizenship, and inequality) across the less-familiar setting of modern Brazil, Cuba, Guatemala, Mexico, Bolivia, Peru, and even Argentina. This course will tackle fundamental questions about the intersection of race, identity, and power in Latin America. Besides reading some of the classic analyses, we will look at some of the cutting-edge scholarship to assess how ideas of race and national belonging have changed through the centuries and across national contexts. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non-Euro/US requirement for history majors and minors. (Same as: LACL 2110)

Previous terms offered: Spring 2022, Spring 2019.

HIST 3042 (c) Bad History

Non-Standard Rotation. Enrollment limit: 16.

Capstone seminar. What can bad histories teach us about the nature, practice, and purpose of history? This seminar attempts to answer these questions through close readings of various forms of bad history, including conspiracy theories, pseudo-histories, and the tradition of apocalypticism. Possible topics include ancient astronaut theory, young earth creationism, and conspiracy and antisemitism. For their final project, students will pursue research topics of their own choice related to the themes of the course, culminating in a significant piece of original historical writing (approximately 25 pages in length). This course is part of the following field(s) of study: Europe.

Previous terms offered: Fall 2021.

HIST 3060 (c) Remembering the French Revolution

Non-Standard Rotation. Enrollment limit: 16.

Advanced research seminar. Explores the relationship between memory and social, cultural, and political history through a focus on the French Revolution. Considers how memories of the past and dreams for the future shaped the course of the French Revolution and the turbulent history of France in the nineteenth century. Students conduct independent research in this area, teach their research to the class, and write a substantial paper based on analysis of primary and secondary sources. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Fall 2018.

HIST 3100 (c) Experiments in Totalitarianism: Nazi Germany and Stalinist Russia

Non-Standard Rotation. Enrollment limit: 16.

Compares and contrasts the nature of society and culture under two of the twentieth century's most "totalitarian" regimes—fascism under the Nazis in Germany, and socialism under the Bolsheviks in the Soviet Union. Prior course work in either modern Germany or Russia is strongly recommended, and students may focus their research project on either country, or a comparison of both. Note: This course is part of the following field(s) of study: Europe.

Previous terms offered: Spring 2021.

HIST 3122 (c) Community in America, Maine, and at Bowdoin

Every Other Fall. Enrollment limit: 16.

A research seminar that explores ideals and social, economic, political, and cultural realities of community in American history, and examines continuity, change, and socio-economic, racial, and ethnic diversity in community experience. Begins with studies of communities in seventeenth-century Massachusetts and early national upstate New York; then focuses on Maine and on Bowdoin College and its midcoast neighborhood, with readings in both the secondary literature and a wealth of primary sources. Note: This course is part of the following field(s) of study: United States.

Previous terms offered: Fall 2021, Fall 2019.

HIST 3142 (c, DPI) Jim Crow Justice

Non-Standard Rotation. Enrollment limit: 16.

What are the historical origins of our modern system of mass incarceration? This research seminar explores the relationship between race and justice from the end of the Civil War through the early twentieth century. We will begin by framing our concerns in light of recent scholarship on the phenomenon (such as Michelle Alexander's *The New Jim Crow*), and then dig into the archives ourselves to craft 25-30 page research papers on aspects of the problem. Our sources will include Congressional documents, the Department of Justice Peonage Files, records of the NAACP, and other major collections. Students will benefit from prior coursework in African American history or Africana Studies. Note: This course is part of the following field(s) of study: US. (Same as: AFRS 3142)

Prerequisites: HIST 1000 - 2969 or AFRS 1000 - 2969 or HIST 3000 or higher or AFRS 3000 or higher.

Previous terms offered: Spring 2022.

HIST 3160 (c) The United States Home Front in World War II

Non-Standard Rotation. Enrollment limit: 16.

Examines social and cultural changes on the United States home front during World War II. While some Americans remember World War II as the good war, an examination of this period reveals a more complicated history. By analyzing a variety of historical sources – scholarly writings, government documents and propaganda, films, memoirs, fiction, and advertising – investigates how the war shaped and reshaped sexuality, family dynamics, and gender roles; race and ethnic relations; labor conflicts; social reform, civil rights, and citizenship; and popular culture. Also considers the war's impact on the immediate postwar years and how Americans have remembered the war. Students write a major paper based on primary source research. This course is part of the following field(s) of study: United States.

Previous terms offered: Spring 2021.

HIST 3180 (c) The Nature of Health in the United States and the World

Non-Standard Rotation. Enrollment limit: 16.

Explores relationships between humans, environment, and health in the United States and North America in their global context from the sixteenth century to the present day. Overall focus is on how the history of health and the environment in the US connects to global and transnational history. Topics may include the evolution of public health interventions, biomedical research, and clinical practice; folk remedies and popular understandings of health; infectious and chronic diseases; links between landscape, health, and inequality; gender and reproductive health; occupational health and safety; the effects of agriculture, industrialization, and urbanization on human and ecological health; state and federal policies in the United States; and the colonial and transnational dimensions of public health and medicine. Students write a major research paper based on primary sources. Environmental Studies 1101, 2403, and at least one history course numbered 2000-2969 recommended. Note: This course is part of the following field(s) of study: United States. (Same as: ENVS 3980)

Previous terms offered: Fall 2020, Fall 2018.

HIST 3200 (c) Imagining Disaster

David Hecht.

Discontinued Course. Spring 2023. Enrollment limit: 16.

Examines how modern societies have confronted disaster. Such crises have been surprisingly common in recent history, and they take multiple forms: natural, technological, medical, industrial, and environmental. How a society responds to disaster tells us much about its values, politics, and culture; such crises can also act as catalysts for social and historical change. This course examines a range of disasters, including Hurricane Katrina, the 1918 flu pandemic, nuclear accidents in Chernobyl and Fukushima, and devastating earthquakes in both San Francisco and Haiti. Students who have taken this course at the 2000-level (HIST 2203) are not eligible to take this course.

Previous terms offered: Spring 2019.

HIST 3240 (c, IP) A History of the Present

Salar Mohandesi.

Every Other Year. Fall 2022. Enrollment limit: 16.

In 1989, the fall of the Berlin Wall put an end to the bloody ideological battles of the twentieth century, promising a new era of liberty, peace, and prosperity. Thirty years later, we live in a world of economic uncertainty, political instability, climate catastrophe, and violent social conflict. How did we get here? This course tells the history of the present by exploring three questions. First, how do you write the history of your own time? We reflect on the challenges of handling new sources and living the history one seeks to understand. Second, who can write this history? We discuss the problems of authorship and the possibility of collective research. Third, what is our time? We will collectively map our present by tracing the history of Europe and North America from 1989 to 2020, synthesizing transnational trends into a coherent narrative. We conclude by considering whether historicizing the present might help predict the future. Note: This course is part of the following field(s) of study: Europe, US and Atlantic Worlds.

Previous terms offered: Spring 2020.

HIST 3321 (c, IP) Neo-Confucianism

Every Other Year. Enrollment limit: 16.

Examines the so-called Neo-Confucian philosophy in historical contexts. The principle themes include ethics, cosmology, and epistemology. When most people think of Chinese philosophy, they think of philosophers from the classical period, e.g., Confucius. But these thinkers marked only the beginning of a rich and prolific philosophical tradition that continued for over two millennia. This class presents the central texts and themes of Neo-Confucianism and guides students to investigate them in the history of East Asia from 900 through early 1900s. The primary geographical focus is China, but we will also read works of important thinkers in Japan and Korea. Note: This course is part of the following field(s) of study: East Asia. It fulfills the pre-modern and non Euro/US requirements for history majors and minors. (Same as: ASNS 3010)

Prerequisites: ASNS 1000 - 2969 or ASNS 3000 or higher or HIST 1000 - 2969 or HIST 3000 or higher.

Previous terms offered: Spring 2019.

HIST 3404 (c) Crime and Punishment in Latin America

Every Other Spring. Enrollment limit: 16.

This advanced seminar explores the emergence and expansion of institutions of social control in Latin America, from colonial times, through independence, and into the tumultuous twentieth century. Students will learn about the role of the Church in disciplining and disarticulating indigenous societies and practices; the expansion of the military as an institution of social control, but also of social mobility; the emergence of hygienist-eugenic discourses and practices designed to reify and naturalize social difference; and the proliferation of penitentiaries and hospitals as tools to define and criminalize deviancy. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non euro/us requirement for history majors and minors. (Same as: LACL 3140)

Previous terms offered: Spring 2020.

HIST 3420 (c) Law and Justice in East Asia
Non-Standard Rotation. Enrollment limit: 16.

Examines how law and justice in East Asia became markers of modernity and sovereignty from the eighteenth to twentieth centuries. The kinds of punishment used in a society often act as a measure in judging whether that society is civilized or barbaric, advanced or backward. Major themes include: stereotypes of “oriental barbarism,” torture and capital punishment, village law and gender, extraterritoriality and imperialism, sentiment and mass media, war tribunals, and thought reform. Students analyze legal documents in translation alongside recent scholarship in the field and write a major paper based on primary source research. No prior knowledge of an Asian language necessary. Note: This course is part of the following field(s) of study: East Asia. It fulfills the non euro/us requirement for history majors and minors. (Same as: ASNS 3820)

Prerequisites: ASNS 2000 - 2969 or HIST 2000 - 2969.

Previous terms offered: Spring 2022, Spring 2020.

Interdisciplinary Majors and Special Areas of Study

In addition to traditional academic disciplines, the College also sustains programs of interdisciplinary study to reveal complicated realities not disclosed by any single discipline. In recognition of this, Bowdoin's faculty have created several interdisciplinary majors that bring together interconnected fields. These span multiple divisions—encompassing the humanities, social sciences, natural science, and mathematics—and give students opportunities to explore complex intersections of disciplinary methods and content. (Note that an interdisciplinary major cannot normally be combined with another departmental major, a coordinate major, or a student-designed major. If a student has a compelling academic reason to pursue an interdisciplinary major with another departmental major, they may seek an exception from the associate dean of academic affairs.)

Special areas of study are faculty-curated pathways through the curriculum that do not bear a major or minor credential. These include Arctic studies, coastal studies, the engineering dual-degree options, and legal studies. Each program is described in detail in this section.

Majors

Art History and Archaeology Interdisciplinary Major (p. 292)

The art history and archaeology interdisciplinary major consists of thirteen courses.

Code	Title	Credits
Required Courses		
Select one art history course (numbered 1100–1999).		1
ARCH 1101	Greek Archaeology	1
ARCH 1102	Roman Archaeology	1
Select one of the following:		1
CLAS 1101	Classical Mythology	1
CLAS 1111	History of Ancient Greece: From Homer to Alexander the Great	
CLAS 1112	History of Ancient Rome: From Romulus to Justinian	

CLAS 2757	Tacitus: On How to be a Good Citizen under a Bad Emperor	1
CLAS 2777 From Tyranny to Democracy: Models of Political Freedom in Ancient Greece		
Intermediate Independent Study in Classics		
PHIL 2111	Ancient Philosophy	1
Intermediate course in Religion (2000–2669)		
Select one of the following:		
ARTH 2130	Art of Three Faiths	1
ARTH 2140	The Gothic World	
ARTH 2150	Illuminated Manuscripts and Early Printed Books	
ARTH 2220	The Medici's Italy: Art, Politics, and Religion, 1300-1600	1
Select one art history course (3000–3999).		
Select two additional art history courses. ^a		2
Select three additional archaeology courses, one of which must be at the advanced level (3000–3999).		3
ARTH 4000 or ARCH 4000		1

- a ARTH 1050 or higher
- Courses that count toward the archaeology requirements of the major must be taken for regular letter grades (not Credit/D/Fail), and students must earn grades of C- or better in these courses.
 - With approval of the Department of Classics, up to two transfer credits may be counted toward archaeology requirements.
 - With approval of the Department of Art, up to two transfer credits from one semester of study at another institution or three transfer credits from two semesters of study at another institution may be counted toward art history requirements.
 - No first-year writing seminars may be applied to art history requirements of the major.
 - Students interested in completing intermediate or advanced independent studies, as well as honors projects, should consult the departments.

Art History and Visual Arts Interdisciplinary Major (p. 292)

The Art History & Visual Arts Interdisciplinary Major offers a pathway through both the Art History and Visual Arts curricula. Student's exploration of the histories and principles of art in a global context is informed and enhanced through the development of perceptual, material, and critical abilities in the art studio.

The art history and visual arts interdisciplinary major consists of thirteen courses.

Code	Title	Credits
Required Courses		
Select one art history course (numbered 1100–1999).		1
VART 1101	Drawing I	1
Select one course in African, Asian, or pre-Columbian art history numbered 1103 or higher.		1
Select one of the following:		1
VART 1201	Printmaking I	1
VART 1401	Photography I	
VART 1601	Sculpture I	

VART 1701	Digital Media I	
Select four additional art history courses numbered 2000 or higher.	4	
Select four additional visual arts courses, no more than one of which may be an independent study.	4	
Select one advanced seminar in art history (3000–3999).	1	

- Courses that count toward the art history and visual arts major must be taken for regular letter grades (not Credit/D/Fail), and students must earn grades of C- or better in these courses.
- With approval of the Department of Art, up to two transfer credits from one semester of study at another institution or three transfer credits from two semesters of study at another institution may be counted toward art history requirements.
- No first-year writing seminars are accepted.
- Students interested in completing intermediate or advanced independent studies, as well as honors projects, should consult the department.

Chemical Physics Interdisciplinary Major (p. 293)

The chemical physics interdisciplinary major consists of twelve courses.

Code	Title	Credits
Required Courses		
Select one course from the following: ^b		1
CHEM 1092	Introductory Chemistry and Quantitative Reasoning II	
CHEM 1102	Introductory Chemistry II	
CHEM 1109	General Chemistry	
PHYS 1130 & PHYS 1140	Introductory Physics I and Introductory Physics II ^c	2
MATH 1600	Differential Calculus ^c	1
MATH 1700	Integral Calculus ^c	1
MATH 1800	Multivariate Calculus ^c	1
PHYS 2130	Electric Fields and Circuits	1
PHYS 2150	Statistical Physics	1
CHEM 2510	Chemical Thermodynamics and Kinetics	1
CHEM 2520	Quantum Chemistry and Spectroscopy	1
or PHYS 3140	Quantum Mechanics	
Select two courses from the following: ^d		2
CHEM 2550	Introduction to Computational Chemistry	
CHEM 3100	Instrumental Analysis	
CHEM 3400	Advanced Inorganic Chemistry	
CHEM 3510	Reactivity and Kinetics	
PHYS 2250	Physics of Solids	
PHYS 3000	Methods of Theoretical Physics	
PHYS 3130	Electromagnetism	
PHYS 3810	The Physics of Climate	
one approved chemistry or physics course 4000 or higher		

- b Note that CHEM 1091 Introductory Chemistry and Quantitative Reasoning I is a prerequisite for CHEM 1092 Introductory Chemistry and Quantitative Reasoning II; CHEM 1101 Introductory Chemistry I is a prerequisite for CHEM 1102 Introductory Chemistry II. Placement above CHEM 1109 General Chemistry serves to meet this requirement and students do not have to replace the credit as part of the major requirements.
- c If a student places out of PHYS 1130 Introductory Physics I, PHYS 1140 Introductory Physics II, MATH 1600 Differential Calculus, MATH 1700 Integral Calculus, or MATH 1800 Multivariate Calculus, no replacement course is required.
- d At least one of these must be at the advanced level (3000–3999).
- Other possible electives or transfer credit may be feasible; interested students should check with the departments in advance.
- Physics and chemistry courses that count toward the chemical physics major must be taken for regular letter grades (not Credit/D/Fail). For chemistry courses, under special circumstances a student may petition the department chair to allow one chemistry course required for the major to be taken with the Credit/D/Fail grading option. For physics courses, no more than two D grades can count towards the major.
- No first-year writing seminars count towards the chemical physics major; only one approved course 4000 or higher may count towards the major.

Advanced Placement/International Baccalaureate (AP/IB):

- Students who receive a minimum score of four on the Physics 1 AP exam are exempt from taking PHYS 1130 Introductory Physics I, and do not need to take an additional course to replace it. No AP credit is awarded for the Physics 2 AP exam.
- Students who receive a minimum score of four on the Physics C: Mechanics AP exam or a minimum score of six on the Physics without Optics IB exam are eligible to receive one credit toward the major, are exempt from taking PHYS 1130 Introductory Physics I, and are placed in PHYS 1140 Introductory Physics II. To earn the credit, a minimum grade of C- (not taken Credit/D/Fail) must be received in PHYS 1140 Introductory Physics II by the end of their junior year or no credit is awarded. Students who receive a minimum score of six on the Physics with Optics IB exam are eligible to receive one credit toward the chemical physics major and have the option of being placed in either PHYS 1140 Introductory Physics II or PHYS 2130 Electric Fields and Circuits. To receive the credit, the student must earn a minimum grade of C- (not taken Credit/D/Fail) in the course in which they choose to be placed, and are strongly encouraged to complete the required course by the end of their junior year or prior.
- No credit is awarded for the Physics 2 or Physics C: Electricity and Magnetism AP exams.
- Students who received a minimum score of four on the Chemistry AP exam or a minimum score of five on the Chemistry IB exam are eligible to receive a credit and can count it toward the chemical physics major after completion of CHEM 2050 Environmental Chemistry, CHEM 2100 Chemical Analysis, CHEM 2250 Organic Chemistry I, CHEM 2400 Inorganic Chemistry, CHEM 2510 Chemical Thermodynamics and Kinetics or CHEM 2520 Quantum Chemistry and Spectroscopy with a minimum grade of C-; however, credit is not given if the student places into or elects to take CHEM 1091 Introductory Chemistry and Quantitative Reasoning I, CHEM 1092 Introductory Chemistry and Quantitative Reasoning II, CHEM 1101

Introductory Chemistry I, CHEM 1102 Introductory Chemistry II, or CHEM 1109 General Chemistry.

- Regardless of AP/IB score, all students must take the placement exam. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Computer Science and Mathematics Interdisciplinary Major (p. 294)

The interdisciplinary major in computer science and mathematics consists of ten courses.

Code	Title	Credits
Required Courses		
MATH 2000	Linear Algebra	1
MATH 2020	Introduction to Mathematical Reasoning	1
CSCI 2101	Data Structures	1
CSCI 2200	Algorithms	1
Select three additional computer science courses, higher than 2000. ^e		3
Select three additional mathematics courses, 1800 or higher.		3

- ^e At least one computer science course in each of the areas Artificial Intelligence and Systems, and at least one computer science course that is an advanced course (3000-3999). *Artificial Intelligence* courses include CSCI 2400 Artificial Intelligence, CSCI 3400 Cognitive Architecture, CSCI 3420 Optimization and Uncertainty, CSCI 3445 Nature-Inspired Computation, CSCI 3465 Financial Machine Learning, and CSCI 3725 Computational Creativity. *Systems* courses include CSCI 2320 Principles of Programming Languages, CSCI 2335 Software Engineering, CSCI 3300 Computer Networks, CSCI 3310 Operating Systems, and CSCI 3325 Distributed Systems.
- Courses that count towards this major must be taken for a regular letter grade, not Credit/D/Fail, with a minimum earned grade of C-.
 - With departmental approval, a total of two courses can be transfer credits from other institutions.
 - With approval of the appropriate department, an advanced level independent study or honors project may be counted towards the requirements of the major.
 - Advanced Placement and International Baccalaureate scores are only used for placement by both the mathematics and computer science departments.
 - Courses from other departments or programs do not count towards the computer science and mathematics major, but students may use mathematics or computer science courses towards a minor with permission of that department or program.
 - Students who have mastered the material in MATH 2000 Linear Algebra prior to enrolling at Bowdoin may substitute another course numbered MATH 1800 Multivariate Calculus or higher if they have received an appropriate placement. The same holds for MATH 2020 Introduction to Mathematical Reasoning if they also obtain approval of the department chair. All students must submit a planned program of courses to the mathematics department when they declare a major.

English and Theater Interdisciplinary Major (p. 294)

The interdisciplinary major in English and theater focuses on the dramatic arts, broadly construed.

The English and theater major consists of ten required courses.

Code	Title	Credits
Required Courses		
Select one English first-year writing seminar or introductory course (1000–1049 or 1100–1999).		1
Select one theater course at the 1000 level		1
Select one course from English on drama before 1800, such as ENGL 2200 or the equivalent in English or another department.		1
Select one course in modern drama, such as ENGL 2452 or 2654, or the equivalent in English or another department.		1
Select one elective in English at the intermediate level (2000–2899).		1
Select one advanced English seminar (3000–3999).		1
Select one introductory course in Theatrical Design such as THTR 1301, THTR 1302 or THTR 1303		1
Select one introductory or intermediate course in Theatrical Practice such as Acting I, Making Theater, Performance and Narrative, Directing, or Playwriting THTR 1101, THTR 1201, THTR 1301, THTR 2303, or THTR 2304		1
Select one intermediate course in Theater History or Theory, such as THTR 3502 or THTR 3503		1
Select one advanced course in Theater History or Theory, such as THTR 2410, THTR 2510, THTR 2503 or THTR 2504		1

- Courses that count toward the English and theater major must be taken for a regular letter grade, not Credit/D/Fail, with a minimum earned grade of C-.
- With approval of the Department of English, up to two transfer credits for classes taken outside of the department, either at Bowdoin or at another institution, may be used to fulfill English requirements, but no transfer credits may be used to fulfill theater requirements.
- With approval of the Department of English, independent studies or honors projects in English may count toward the major, but no independent studies or honors projects in theater count toward the major.

Mathematics and Economics Interdisciplinary Major (p. 294)

The interdisciplinary major in Mathematics and Economics is aimed at students with an intellectual interest in both economics and mathematics, and especially the formal mathematical models used in the study of economics. The required coursework introduces students to rigorous theoretical and empirical approaches to the analysis of economic problems. If completed with the optional courses MATH 2020 Introduction to Mathematical Reasoning and MATH 2603 Introduction to Analysis, this major consists of courses particularly relevant to students who intend to pursue a doctoral degree in economics.

Code	Title	Credits
Required Courses		
ECON 2555	Microeconomics	1
ECON 2556	Macroeconomics	1

ECON 3516	Econometrics	1
MATH 1800	Multivariate Calculus	1
MATH 2000	Linear Algebra	1
MATH 2206	Probability	1
MATH 2606	Statistics	1
Select two of the following:		2
ECON 3350	Mathematical Economics	
MATH 2020	Introduction to Mathematical Reasoning	
MATH 2109	Optimization	
MATH 2208	Ordinary Differential Equations	
MATH 2301	Intermediate Linear Algebra	
MATH 2603	Introduction to Analysis	
MATH 3108	Advanced Topics in Modeling	
MATH 3109	Optimal Control	
MATH 3208	Advanced Topics in Dynamical Systems	
MATH 3209	Partial Differential Equations	
Select one of the following:		1
CSCI 1101	Introduction to Computer Science	
CSCI 1103	Programming with Data	
CSCI 2101	Data Structures	
MATH 2209	Numerical Methods	
MATH 3606	Advanced Topics in Probability and Statistics	
Select one additional advanced course in economics (3000–3999).		1

- Courses that count for this major must be taken for a regular letter grade, not Credit/D/Fail, with a minimum earned grade of C-.
- A total of two courses can be transfer credits from other institutions.
- An advanced level independent study or honors project in economics may be substituted for an advanced elective course in economics with permission of the economics department.
- Advanced Placement and International Baccalaureate scores are only used for placement by both the mathematics and economics departments.
- Students may use one course from this major towards the requirements of another major or minor with the permission of that department or program.
- Students who have mastered the material in MATH 1800 Multivariate Calculus or MATH 2000 Linear Algebra prior to enrolling at Bowdoin may substitute a higher-numbered mathematics course if they have received the appropriate placement.

Mathematics and Education Interdisciplinary Major (p. 295)

The interdisciplinary major in mathematics and education combines the study of mathematics and pedagogy. The prescribed mathematics courses represent the breadth of preparation necessary for both the scholarly study as well as the practice of secondary school mathematics. The required education courses provide students with the theoretical knowledge and practicum-based experiences crucial to understanding the challenges of secondary mathematics education. Students completing this major are prepared to become leaders in the field of mathematics education, either as scholars or educators.

The mathematics and education interdisciplinary major consists of eleven required courses.

Code	Title	Credits
Required Courses		
MATH 1800	Multivariate Calculus ^f	1
MATH 2000	Linear Algebra	1
MATH 2020	Introduction to Mathematical Reasoning	1
Select at least one mathematics course in differential equations and modeling:		1
MATH 1808	Biomathematics	
MATH 2208	Ordinary Differential Equations	
MATH 3108	Advanced Topics in Modeling	
MATH 3208	Advanced Topics in Dynamical Systems	
MATH 3209	Partial Differential Equations	
Select at least one mathematics course in algebra and analysis:		1
MATH 2301	Intermediate Linear Algebra	
MATH 2303	Functions of a Complex Variable	
MATH 3303	Advanced Complex Analysis	
MATH 2603	Introduction to Analysis	
MATH 3603	Advanced Analysis	
MATH 2502	Number Theory and Cryptography	
MATH 2602	Group Theory	
MATH 3602	Advanced Topics in Group Theory	
MATH 2702	Rings and Fields	
MATH 3702	Advanced Topics in Rings and Number Theory	
Select at least one mathematics course in geometry and topology:		1
MATH 2404	Geometry	
MATH 3204	Topology	
MATH 3404	Advanced Topics in Geometry	
Select at least one course in combinatorics, probability, and statistics: ^g		1
MATH 1300	Biostatistics	
MATH 1400	Statistics in the Sciences	
MATH 2206	Probability	
MATH 2601	Combinatorics and Graph Theory	
MATH 2606	Statistics	
MATH 3606	Advanced Topics in Probability and Statistics	
EDUC 1101	Contemporary American Education	1
EDUC 2203	Educating All Students	1
EDUC 3301 & EDUC 3302	Teaching and Learning and Curriculum Development ^h	2

^f If a student places out of MATH 1800 Multivariate Calculus, no replacement course is required. If a student places out of MATH 2000 Linear Algebra, a higher-numbered mathematics course must be substituted.

^g This statistics requirement may alternately be met with a score of four or five on the AP Statistics exam, ECON 2557 Economic Statistics, or PSYC 2520 Data Analysis, provided that the student also completes MATH 2206 Probability.

^h Students must take EDUC 3301 Teaching and Learning and EDUC 3302 Curriculum Development concurrently during the fall semester of their junior or senior year.

- Courses that count for this major must be taken for a regular letter grade, not Credit/D/ Fail, with a minimum earned grade of C-.

- With prior approval of the mathematics department, at most two of the courses in mathematics can be transfer credits from other institutions. Transfer credits are not accepted for the courses in education.
- With the exception of the AP Statistics scores, Advanced Placement and International Baccalaureate scores are only used for placement.
- Students may use a mathematics course applied to the mathematics and education interdisciplinary major towards the requirements of a minor with permission of that department or program. None of the education courses required for this major may be counted towards the requirements of a minor.
- With prior approval of the mathematics department, one advanced level independent study or honors project may be allowed to count towards the major. No independent studies or honors projects count towards the education requirements.
- Students interested in meeting the course requirements for the Bowdoin Teacher Scholars teacher certification program are advised to take an additional course in mathematics and should consult the department with additional questions.

Physics and Education Interdisciplinary Major (p. 296)

The physics and education interdisciplinary major consists of eleven required courses.

Code	Title	Credits
Required Courses		
PHYS 1130 & PHYS 1140	Introductory Physics I and Introductory Physics II ⁱ	2
PHYS 2130	Electric Fields and Circuits	1
PHYS 2140 or PHYS 2150	Quantum Physics and Relativity or Statistical Physics	1
PHYS 3010	Methods of Experimental Physics	1
EOS 1105	Introducing Earth ^j	1
Select one of the following:		1
CHEM 1092	Introductory Chemistry and Quantitative Reasoning II (or higher)	
CHEM 1102	Introductory Chemistry II (or higher)	
CHEM 1109	General Chemistry (or higher)	
EDUC 1101	Contemporary American Education	1
EDUC 2203	Educating All Students	1
EDUC 3301 & EDUC 3302	Teaching and Learning and Curriculum Development ^k	2

ⁱ If a student places out of PHYS 1130 Introductory Physics I, no replacement course is required.

^j An earth and oceanographic science course higher than 1105 will also satisfy this requirement.

^k Students must take EDUC 3301 Teaching and Learning and EDUC 3302 Curriculum Development concurrently during the fall semester of their junior or senior year.

This major meets all the course requirements for the Bowdoin Teacher Scholars teacher certification program, and majors are eligible to apply for admission to that program. Completing the major requirements in a timely fashion requires advanced planning, so students are strongly

encouraged to meet with faculty from both the physics and education departments early in their college careers.

Students pursuing this major may be able to use up to two transfer credits toward the physics, chemistry, or earth and oceanographic science part of the requirements. None of the education requirements can be fulfilled with transfer credit.

Students may count physics courses required for this major towards the requirements of a minor. None of the education courses required for this major may be counted towards the requirements of a major.

No courses taken with the Credit/D/Fail grading mode will be accepted to the major. In addition, physics and education interdisciplinary majors must:

- achieve a grade of C- or higher in education courses required for this major; and
- achieve a grade of C- or higher in the physics courses if they are to serve as a prerequisite.

Normally, students pursuing this major may receive one D in a required physics course and count the course toward the major.

Students may pursue honors projects or independent studies, but they do not replace any of the requirements for this major.

Advanced Placement/International Baccalaureate (AP/IB):

- Students who receive a minimum score of four on the Physics 1 AP exam are exempt from taking PHYS 1130 Introductory Physics I, and do not need to take an additional course to replace it. No AP credit is awarded for the Physics 2 AP exam.
- Students who receive a minimum score of four on the Physics C: Mechanics AP exam or a minimum score of six on the Physics without Optics IB exam are eligible to receive one credit toward the major, are exempt from taking PHYS 1130 Introductory Physics I, and are placed in PHYS 1140 Introductory Physics II. To earn the credit, a minimum grade of C- (not taken Credit/D/Fail) must be received in PHYS 1140 Introductory Physics II by the end of their junior year or no credit is awarded. Students who receive a minimum score of six on the Physics with Optics IB exam are eligible to receive one credit toward the chemical physics major and have the option of being placed in either PHYS 1140 Introductory Physics II or PHYS 2130 Electric Fields and Circuits. To receive the credit, the student must earn a minimum grade of C- (not taken Credit/D/Fail) in the course in which they choose to be placed, and are strongly encouraged to complete the required course by the end of their junior year or prior.
- No credit is awarded for the Physics 2 or Physics C: Electricity and Magnetism AP exams.

Special Areas of Study Arctic Studies (p. 296)

A focus in Arctic studies (<https://www.bowdoin.edu/arctic-museum/arctic-studies/>)—offered through a variety of departments, including the department of anthropology, the department of earth and oceanographic Science, the environmental studies program, the department of government and legal studies, and the Peary-MacMillan Arctic Museum (<https://www.bowdoin.edu/arctic-museum/>) and Arctic Studies Center—provides students with opportunities to explore artistic, cultural, social, political, and environmental issues involving Arctic lands, seas, and communities. Students interested in the Arctic are encouraged to

consult with the director of the Arctic Studies Center in order to plan an appropriate interdisciplinary program involving coursework and fieldwork and study abroad. Work-study and internship opportunities at the Arctic Museum complement the academic program, as does the Bowdoin Students Arctic Initiative, a student-run organization.

Coastal Studies (p. 297)

The College offers expertise in the marine sciences primarily through the biology, earth and oceanographic science, and environmental studies departments and programs and two unique field sites: Schiller Coastal Studies Center (<https://www.bowdoin.edu/coastal-studies-center/>), located on Orr's Island in Harpswell, Maine; and the more remote Kent Island Scientific Station (<https://www.bowdoin.edu/kent-island/>), located in the Bay of Fundy, New Brunswick, Canada. The College offers the Bowdoin Marine Science Semester (BMSS) (<https://www.bowdoin.edu/coastal-studies-center/marine-science-semester/>), an intensive immersion experience in marine fieldwork, lab work, and independent research. Sophomores, juniors, and seniors from Bowdoin and other colleges who are interested in marine science are welcome to submit an application. During the BMSS, students take four courses sequentially in three-to-four-week modules taught at the Bowdoin Marine Laboratory and the Schiller Coastal Studies Center, while residing on Bowdoin's main campus. Other courses in the curriculum, taught in the College's standard format, take advantage of the temperate and subarctic environments of coastal Maine and the Canadian Maritime provinces; please contact the academic department or program coordinator for details. Summer research fellowships in coastal and marine studies are also available annually. Interested students should speak with Professor Amy Johnson (<https://www.bowdoin.edu/profiles/faculty/ajohnson/>), professor of marine biology and interim director of the Schiller Coastal Studies Center, or Steven Allen (<https://www.bowdoin.edu/profiles/staff/sallen/>), assistant director of the Schiller Coastal Studies Center and coastal studies program coordinator.

Engineering Dual-Degree Options (p. 297)

Bowdoin College arranges shared studies programs with the University of Maine College of Engineering (<https://engineering.umaine.edu/>) (open only to Maine residents), the School of Engineering and Applied Science of Columbia University (<https://www.engineering.columbia.edu/>), the California Institute of Technology (<https://www.eas.caltech.edu/>) (Caltech), and the Thayer School of Engineering at Dartmouth College (<https://engineering.dartmouth.edu/>).

- Students who successfully complete the Columbia, U-Maine, or Caltech programs earn a bachelor of science degree from the engineering school and a bachelor of arts degree from Bowdoin, both conferred at the end of their fifth year.
- 3-2 programs are available in which students complete certain courses at Bowdoin during the first three years of their undergraduate career; students may then apply to transfer to Columbia, Caltech, or U-Maine for two years of that institution's engineering program. Admission to these programs is highly competitive.
- Columbia also offers a 4-2 option, which may be of interest to some students.
- Dartmouth College offers a number of options, including the 2-1-1-1 program in which students complete two years at Bowdoin, their third year at Dartmouth, senior year at Bowdoin, and a fifth, optional year of specialized engineering courses at Dartmouth. For the Dartmouth program, engineering courses taken in the third

year are used as transfer credits to complete the Bowdoin degree, conferred after the fourth year. The Dartmouth engineering degree is conferred upon successful completion of a fifth year in engineering at Dartmouth.

- Once a student decides to pursue a dual degree, the student must receive permission from their major department at Bowdoin and then meet with the Office of the Registrar and submit a declaration of intent to pursue this program to the Office of the Registrar when applying to the subsequent institution.
- Finally, students may also apply as regular transfer students into any nationally recognized engineering program, earning only a degree from that engineering institution.

These programs are coordinated by Corey Colwill (<https://www.bowdoin.edu/profiles/staff/ccolwill/>), associate director of the Center for Cocurricular Opportunities (<https://www.bowdoin.edu/academics/cocurricular-opportunities/>), with assistance from representatives from the natural sciences including Professor Christopher Chong (<https://www.bowdoin.edu/profiles/faculty/cchong/>) in the department of mathematics, Professor Sean Barker (<https://www.bowdoin.edu/profiles/faculty/sbarker/>) in the department of computer science, and Professor Dale Syphers (<https://www.bowdoin.edu/profiles/faculty/dsyphers/>) in the department of physics and astronomy. Curricular requirements for engineering dual-degree options vary by program. It is important for students to receive advising about the program early in their career at Bowdoin to plan a course of study that will satisfy major and distribution requirements. Students interested in these programs should contact Corey Colwill (<https://www.bowdoin.edu/profiles/staff/ccolwill/>).

Students planning to pursue one of the 3-2 engineering options and graduating with a physics degree must take:

Code	Title	Credits
PHYS 1140	Introductory Physics II	1
PHYS 2130	Electric Fields and Circuits	1
PHYS 2150	Statistical Physics	1
PHYS 3000	Methods of Theoretical Physics	1
or MATH 2208	Ordinary Differential Equations	
CHEM 1102	Introductory Chemistry II	1
or CHEM 1109	General Chemistry	
MATH 1800	Multivariate Calculus (or higher)	1
CSCI 1101	Introduction to Computer Science	1

Legal Studies (p. 297)

Bowdoin students from every major and department have been successful applicants to highly competitive law schools. Students are provided guidance and assistance on all aspects of the application process by advisors in the Office of Career Exploration and Development (CXD) (<https://www.bowdoin.edu/cxd/>). They have excellent written and online resources about law schools and careers in the legal field and can introduce students to alumni attending law school or practicing law. It is best to begin planning for law school by the beginning of the junior year. In addition, CXD also supports and assists Bowdoin alumni with the law school application process if they choose to apply in the years following graduation.

Latin American, Caribbean, and Latinx Studies

Overview & Learning Goals

Overview

The Latin American, Caribbean, and Latinx Studies (LACLaS) Program explores the history, aesthetic production, and contemporary relationships of the diverse cultural groups of Mexico, the Caribbean, Central and South America, and Latinx population in the United States. Its multidisciplinary approach is designed to integrate the scholarly methods and perspectives of several disciplines in order to foster increased understanding of Latin America's social differences and economic realities, cultural diversity, transnational connections, historical trajectories, and range of popular culture and artistic and literary expression. Competence in a language spoken in the region other than English (such as Spanish, French, or Portuguese) is required, and it is strongly recommended that students participate in an off-campus study program in Latin America.

Learning Goals

Both majors and non-majors will be able to:

- Identify some of the main topics of discussion that have taken or are taking place in Latin America, the Caribbean, and the Latinx communities in the United States from a multidisciplinary perspective.
- Demonstrate knowledge of the commonalities and the specificities of the societies, cultures, and the intellectual history of different communities and sub-regions within Latin America, the Caribbean, and the Latinx communities in the United States.
- Display an understanding of the history of Latin America, the Caribbean, and the Latinx communities in the United States.
- Compare and contrast different methodologies, theories, and frameworks applied by different disciplines to the study of Latin America, the Caribbean, and the Latinx communities in the United States.
- Apply some of these methodologies and multidisciplinary frameworks to understanding social, political, and cultural processes in Latin America, the Caribbean, and the Latinx communities in the United States
- Engage critically with diverse methodologies, theories, and frameworks in order to expand their goals and scopes.
- Criticize and defend their own points of view and those of others with well-rounded arguments, presentations, and essays.
- Develop communication skills in Spanish, French, and/or other languages spoken in Latin America, the Caribbean, and the Latinx communities in the United States.
- Conduct research in Spanish, French, and/or other language spoken in Latin America, the Caribbean, and the Latinx communities in the United States.

In addition, majors will be able to:

- Undertake independent research, particularly on the topics pertinent to their academic and personal interests, and demonstrate capacity to formulate interpretations based on their research.
- Pursue community engagement and service opportunities that foster their own knowledge—and that of Bowdoin's larger community—

- of Latin America, the Caribbean, and the Latinx communities in the United States (i.e., talks, symposiums, Alternative Spring Break trips, Latin American Student Organization activities).
- Pursue either graduate study in Latin American, Caribbean, and Latinx studies or in one of the disciplines represented in the program.
- Pursue professional training in fields in which knowledge of Latin America, the Caribbean, and the Latinx communities in the United States is relevant.

Options for Majoring or Minor in the Program

Students may elect to major in Latin American, Caribbean, and Latinx Studies or to coordinate a major in Latin American, Caribbean, and Latinx Studies with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in Latin American, Caribbean, and Latinx Studies.

Program Website (<https://www.bowdoin.edu/latin-american-studies/>)

Faculty

Margaret Boyle, *Program Director*
Elizabeth Palmer, *Program Coordinator*

Associate Professors: Margaret Boyle (Romance Languages and Literatures), Nadia V. Celis (Romance Languages and Literatures)
Assistant Professor: Irina Popescu
Visiting Fellow: Paula Cuellar Cuellar

Contributing Faculty: Ireri Chavez Barcenaz†, Germán Cárdenas-Alaminos, Karime Castillo, Javier Cikotaz†, Elena M. Cueto Asín, Angel Matos, Gustavo Faverón Patriau, Joseph Jay Sosa, Krista E. Van Vleet*, Hanétha Vété-Congolo, Susan E. Wegner, Carolyn Wolfenzon Niego, Túlio Zillie

Faculty/Staff Website (<https://www.bowdoin.edu/latin-american-studies/faculty-and-staff/>)

Requirements

Latin American, Caribbean, and Latinx Studies (LACLaS) Major

Prospective majors should demonstrate competency in a language spoken in Latin America, equivalent to intermediate advanced Spanish, French, or Portuguese. Students may also demonstrate proficiency in languages spoken in this region but not yet offered at Bowdoin including Quechua, Guarani, and Aymara. This requirement may be satisfied through the completion of HISP 2204 Intermediate Spanish II or FRS 2204 Intermediate French II at Bowdoin, placement beyond these courses, or through an oral interview and the submission of a writing sample to the program's director. The language requirement must be completed by the end of the junior year.

The major consists of nine courses:

Code	Title	Credits
Required Courses		
Select one course in history covering several countries and/or periods in Latin America, the Caribbean, and/or Latinx communities in the US, such as:		1
HIST 1512	Modern Latin American History	

HIST 2401	Becoming Latin America: The Making of a Colonial World (1491-1700)
HIST 2402	Decolonizing Latin America: A (long) Century of War, 1770-1910
HIST 2403	Revolutions in Latin America: The People Take the Stage
HIST 2416	Altered States: Drugs, Empires, and Nations in Latin America
HIST 2430	Gendering Latin American History
HIST 2862	The Haitian Revolution
HIST 3404	Crime and Punishment in Latin America
LACL 2107	History, Politics, and Culture of Soccer in the Americas

Select one course in the **humanities** (other than history) that focuses on cultural production (such as literature, arts, music, dance, art history, and/or media) and covers two or more countries and/or periods in Latin America, the Hispanic or Francophone Caribbean, and/or Latinx communities in the US, such as:

ARTH 1300	Introduction to Art History: Introduction to the Art of Ancient Mexico and Peru
HISP 2409	Introduction to Hispanic Studies: Poetry and Theater
HISP 2410	Introduction to Hispanic Studies: Essay and Narrative
HISP 2505	The Making of a Race: Latinx Fictions
HISP 3220	Medicine, Literature, and Spanish
HISP 3249	The Southern Cone Revisited: Contemporary Challenges
HISP 3252	The Battle of Chile: From Allende to Pinochet
LACL 1045	Social Justice Warriors of the Americas
MUS 1271	Experiencing Latin American Music(s)
MUS 2296	Songs of Race and Power in Colonial Latin America

Select one intermediate course (2500–2799) in the **social sciences** (anthropology, economics, government, psychology, or sociology) that focuses on Latin America or Latinx communities in the US, such as:^a

ANTH 2737	Family, Gender, and Sexuality in Latin America
ANTH 2830	Descendants of the Sun: The Inca and their Ancestors
ENVS 2313	Food, Environment, and Development
GSWS 2345	Gender, Race, and Citizenship in Brazil
Select one advanced seminar in Latin American studies, such as:	
ANTH 3320	Youth and Agency in Insecure Times
LACL 2421	Between the Alamo and the Wall: Latinx Activism in the United States
SOC 2320	Latinx in the United States
SOC 3410	Migrant Imaginaries

Select five elective courses in Latin American, Caribbean, and Latinx studies, four of which should be taken at the 2000, 3000, or 4000 level.

Latin American, Caribbean, and Latinx Studies (LACLaS) Minor

The minor consists of five courses.

Code	Title	Credits
Required Courses		
Select one course in Latin American history covering several countries and periods in the region, such as:		1
HIST 2401	Becoming Latin America: The Making of a Colonial World (1491-1700)	
HIST 2402	Decolonizing Latin America: A (long) Century of War, 1770-1910	
HIST 2403	Revolutions in Latin America: The People Take the Stage	
Select one course in the humanities or the social sciences covering several countries and periods in Latin America, the Hispanic or Francophone Caribbean, or Latinx communities in the US.		1
Select three elective courses in Latin American, Caribbean, and Latinx studies, two of which should be taken at the 2000, 3000, or 4000 level.		3

Additional Information Additional Information and Program Policies

- Majors and minors in LACLaS are expected to take courses on different periods of the history of Latin America, the Caribbean, and the Latin American and Caribbean communities in the United States.
- Majors and minors in LACLaS are highly encouraged to pursue immersion in Latin America or the Caribbean, as well as research opportunities in the region. Students should consult with their advisors and the Office of Off-Campus Study for information about available programs and research travel grants.
- Courses that count toward the major or minor must be taken for regular letter grades (not Credit/D/Fail), and students must earn grades of C- or better in these courses.
- Up to three credits from off-campus study (excluding first- and second-year language courses) may count toward the major. Up to two credits from off-campus study (excluding language courses) may count toward the minor. Approval of the director of LACLaS for those courses is required. Please inquire in advance of enrollment in a program.
- Up to two independent studies (4000-level courses) in Latin American studies may count toward the major or minor.
- Majors may elect to write an honors project in the department with the approval of a faculty supervisor. This involves two semesters of independent study in the senior year and the writing of an honors essay and its defense before a faculty committee.
- Up to three courses outside the program may count toward the major and two may count toward the minor.
- Up to one of the courses outside the program may be a non cross-listed course at Bowdoin, with the approval of the program director.
- Students who receive a minimum score of four on the French Language and Culture AP exam, or a minimum score of six on the French IB exam, are eligible to receive a general credit toward the degree, not the major/minor, if they complete FRS 2305 Advanced French through Film or higher and earn a minimum grade of B-. Students meeting these criteria do not receive credit if they place into or elect to take a course lower than FRS 2305 Advanced French through Film.

- Students who receive a minimum score of four on the Spanish Language AP exam or the Spanish Literature and Culture AP exam, or a minimum score of six on the Spanish IB exam, are eligible to receive a general credit toward the degree, not the major/minor, if they complete HISP 2305 Spanish Language, Cultures, and Politics or higher and earn a minimum grade of B-. Students meeting these criteria do not receive credit if they place into or elect to take a course lower than HISP 2305 Spanish Language, Cultures, and Politics.
- In order to receive credit for Advanced Placement or International Baccalaureate work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Information for Incoming Students (p. 300)

Latin American, Caribbean and Latinx Studies is an interdisciplinary program with regularly cross-listed courses in the departments of anthropology, art, history, music, romance languages and literatures, sociology, and gender, sexuality and women's studies.

Required courses include one cross-listed course in the social sciences, one cross-listed course in history, and one cross-listed course in the humanities – all with focus on Latin America, the Caribbean, and/or Latinx communities in the U.S. The 1000-level courses in the humanities and the 2000-level history courses are often a good place to begin as they offer an excellent overview of the regions and normally have no prerequisites. Students can enter the program through any of its disciplines and at any level, but they may need to take introductory classes such as ANTH 1101 Introduction to Cultural Anthropology, or SOC 1101 Introduction to Sociology as pre-requisites for some of the classes.

Students are expected to address the language requirement early on. This requirement may be satisfied through the completion of HISP 2204 Intermediate Spanish II or FRS 2204 Intermediate French II at Bowdoin, placement beyond these courses, or through an oral interview and the submission of a writing sample to the program's Director, Margaret Boyle (<https://www.bowdoin.edu/profiles/faculty/mboyle2/>). Students may also demonstrate proficiency in languages spoken in this region but not yet offered at Bowdoin including Quechua, Guarani, and Aymara.

Courses

LACL 1018 (c) Eight Centuries of Spanish Songs

Non-Standard Rotation. Enrollment limit: 16.

Songs are effective mediums to tell stories, communicate ideas, and convey emotions. In this course we will explore the long and widespread practice of singing Spanish Songs. We will engage with a variety of sources and methodologies that trace different forms of preservation, transmission, and circulation from thirteenth-century cantigas to Billboard hits enjoyed today in personal portable devices. The song repertory will give you the opportunity to develop critical thinking and analytical writing as you engage with a variety of ideas including memory, love and desire, race and identity, power and propaganda, cultural resistance and protest. We will consider narratives of music, musicians, and musical instruments that illustrate transcultural musical encounters around the globe, covering topics from the Spanish Reconquista to the Latinx and Caribbean diasporas in the US. (Same as: MUS 1018)

Previous terms offered: Fall 2020.

LACL 1045 (c) Social Justice Warriors of the Americas

Irina Popescu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

What is social justice? What are human rights? Where did they begin and why? How do literature, art, history, and other methods of cultural production in North and South America engage with social justice and human rights discourses? How do different genres of cultural production document social justice, power, and inequity in the Americas? This course explores the concepts of social justice and human rights within the Americas. In this course we will read historical accounts, novels, poems, short stories, and critical race and gender scholarly articles, as well as view visual performances, photographs, and films. Students will learn how struggles of culture, gender, and race work to shape human rights discourse in the Americas, from colonialism to present-day immigration issues. The major goals for this seminar are to improve students' skills in close reading, critical thinking, communication, and analytical writing and to explore the relationships between the four skills. (Same as: GSWS 1045)

LACL 1046 (c, FYS) 'Deviant' Lives in Latin America

Non-Standard Rotation. Enrollment limit: 16.

Explores the lives of particular Latin American people who found themselves being "boxed in," and the ways in which they have sought to remain outside, or even in-between, categories. We will consider issues of personal identity, social belonging, and state power through the lives and stories—some well-known, and some surprisingly obscure—of Latin Americans, from the 1500s to the present. Course writing gives students the opportunity to engage with primary sources, perform independent research, and explore how personal identities have been created, maintained, and challenged over the centuries. This course aims to improve students' skills in close reading, critical thinking, and analytical writing, while the relationships between these skills are closely considered. In addition to discussing the texts in class, students will write responses to them in a variety of forms, from close analysis, to creative projects, to a final research paper. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non Euro/US requirement for History majors and minors. (Same as: HIST 1046)

Previous terms offered: Fall 2019.

LACL 1047 (c) Radically Small: Telling History through Individual Stories

Every Other Year. Enrollment limit: 16.

This First-Year Writing Seminar explores how personal stories of everyday people can help understand the past. These “microhistories” make a single individual the center of the story, placing them in their historical context. Microhistories are particularly well-suited to show how non-elite individuals understood their own place in society, how they contested existing power structures, and how their own identities were constructed in relation with those structures. During the semester students will read some of the classic microhistory accounts, learning how the lives of peasants, formerly enslaved women, meatpackers, peddlers, and other plebeians help reconstruct a social and cultural world that is often impossible to find in traditional histories. The course is focused on Latin America but does not require any prior knowledge of the region. Some of the works discussed in this course are: *The Cheese and the Worms*, *Doña Maria's Story*, & assorted essays from *The Human Tradition in Latin America*. This course helps students to develop the skills necessary to succeed at college writing: weekly assignments will target particular skills (summarizing, analyzing, close readings, compare-contrast, etc); and—given that writing is rewriting—the papers familiarize students with the iterative process of revising and resubmitting, which is at the heart of academic writing. Students write two versions of an analytical paper and several versions of a research paper, receiving feedback from their peers as well as the instructor. Students develop a semester-long research project based on the documents left behind by a person from Latin America (plebian or elite), including journals, trail transcripts, confessions, images, and other published sources available in translation. (Same as: HIST 1047)

Previous terms offered: Fall 2021.

LACL 1101 (c, DPI, IP) Introduction to Latin American, Caribbean, and Latinx Studies

Nadia Celis.

Every Spring. Spring 2023. Enrollment limit: 50.

Introduces students to the processes and forces shaping the material realities and the ideas encompassed by the terms Latin America, the Caribbean and Latinidad, their geographical and symbolic boundaries, and the identities of those belonging (or not) to such spaces and concepts. Main units—race and ethnicity, gender and sexuality, land and the environment, and border and migrations—guide students through key events and debates in the intellectual history of these regions. Through primary and secondary sources—from historical monographs to testimonial literature and fiction, film, music, and theory—students are exposed to main themes in regional scholarship and to the contributions that scholars in the fields of Latin American, Caribbean, and Latinx studies have made to other fields (i.e. postcolonial studies, Third World feminisms, and ethnic studies).

LACL 1200 (c, DPI, IP) Modern Latin American History

Andrew Ehrnpreis.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Introduces students to major themes in the history of modern Latin America and the Caribbean, from the early nineteenth century to the present. Topics include the caudillo politics of the early republican era; the rise of liberalism and the formation of extractive, export-driven economies; the emergence of populism and popular revolutionary movements; the dictatorships and civil wars of Cold War era; and the “Pink Tide” of the early 2000s. Prominent themes include racist discourses, imperialism, decolonization and neo-colonialism, class formation and struggle, and patriarchal structures and feminist movements. This course is part of the following field(s) of study: Latin America. It also meets the non-Euro/US requirement. (Same as: HIST 1512)

LACL 1300 (c, IP, VPA) Introduction to Art History: Introduction to the Art of Ancient Mexico and Peru

Susan Wegner.

Non-Standard Rotation. Spring 2023. Enrollment limit: 50.

A chronological survey of the arts created by major cultures of ancient Mexico and Peru. Mesoamerican cultures studied include the Olmec, Teotihuacan, the Maya, and the Aztec up through the arrival of the Europeans. South American cultures such as Chavín, Nasca, and Inca are examined. Painting, sculpture, and architecture are considered in the context of religion and society. Readings in translation include Mayan myth and chronicles of the conquest. (Same as: ARTH 1300)

Previous terms offered: Spring 2022, Spring 2021, Fall 2019, Spring 2019.

LACL 2005 (c) The Making of a Race: Latinx Fictions

Non-Standard Rotation. Enrollment limit: 35.

Explores the creation, representation, and marketing of US Latinx identities in American literature and popular culture from the 1960s. Focuses on the experience of authors of Caribbean origin (Puerto Rican, Cuban, and Dominican), their negotiations with notions of race, class, gender, and sexuality in Latin America and the US, and their role in cultural translation, the struggle for migrants' rights, and the definition of “American” citizenship. Course materials include literature, film, tv shows, and articles in the humanities and social sciences. In addition to the themes addressed by individual authors (ranging from border crossing to coming of age in dystopian worlds), discussions engage changing notions of “Latinidad” in the last half century; their historical context; the role of language and the media in their production and contestation; and how artists adapt to and resist the branding of ethnic and racial identities. Authors include Thomas, Stevans, Obejas, Rivera, and Engels. Taught in English. (Same as: HISP 2505)

Previous terms offered: Spring 2020.

LACL 2100 (c, IP) Borderlands in the Americas: Power and Identity Between Empire and Nation

Every Other Fall. Enrollment limit: 16.

The study of borderlands examines areas of contested sovereignty where no single social group has political, cultural, or economic control. Explores interactions between native peoples, white settlers, and the representatives of the states in the Americas between the seventeenth and the nineteenth centuries. An examination of power and identity in borderlands considers a variety of regions in the hemisphere, from the Pacific Northwest to the Yucatan, from Texas to the Amazon. Pays special attention to how structures of race, class, and gender were established, maintained, and negotiated at times of uncertain change and in the absence of hegemonic state practice. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non euro/US requirements for history majors and minors. (Same as: HIST 2900)

Previous terms offered: Fall 2020, Fall 2018.

LACL 2107 (c, IP) History, Politics, and Culture of Soccer in the Americas

Paula Cuellar Cuellar.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course will study the history, politics, and culture of soccer in the Americas, from the twentieth century to the present. By selecting key moments and actors, from Pelé and Diego Maradona to Pablo Escobar and Rafael Videla, we will examine how the sport has been sometimes instrumentalized by countries, corporations and other stakeholders for political goals, military strategies, and economic profits. Indeed, because soccer cannot be extrapolated from its surrounding context, we will also analyze pivotal events in the history of the Americas, including dictatorships in Chile and Argentina, armed conflicts in El Salvador and Guatemala, and the war on drugs in Colombia, among other situations across the continent, that have shaped the way the game is played since its origins. Overall, this course will enable us not only to understand soccer as a sport, but also as a lens to learn and evaluate pressing cultural and political issues of our time.

LACL 2110 (c, IP) Race and Belonging in Latin America

Every Other Year. Enrollment limit: 16.

Seminar. This course is a study of race and ethnicity in Latin America, focusing on how Latin Americans themselves have understood and articulated these categories, as well as how scholars have interpreted their articulations. We will cover topics from African slavery to indigenous activism and mass immigration. Our focus will be on peoples of indigenous and African descent—the majority of Latin Americans—which will allow us to address questions of national identity, racial mixture, and cultural exchanges. We will trace themes familiar to students of the broader Atlantic world (themes such as race and nation, freedom and slavery, citizenship, and inequality) across the less-familiar setting of modern Brazil, Cuba, Guatemala, Mexico, Bolivia, Peru, and even Argentina. This course will tackle fundamental questions about the intersection of race, identity, and power in Latin America. Besides reading some of the classic analyses, we will look at some of the cutting-edge scholarship to assess how ideas of race and national belonging have changed through the centuries and across national contexts. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non-Euro/US requirement for history majors and minors. (Same as: HIST 2910)

Previous terms offered: Spring 2022, Spring 2019.

LACL 2116 (c, DPI, IP) Altered States: Drugs, Empires, and Nations in Latin America

Andrew Ehrnpreis.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines the history of Latin American and Caribbean societies through the lens of drug economies and cultures. It begins with consideration of methodological concerns, including issues of the place of drugs in commodity studies and the social constructivist approach to drug meanings and effects. The course then examines three periods of Latin American drug history: the pre-Columbian era; the era of Iberian colonialism; and the twentieth century and beyond, which saw the rise of illicit drug markets and the U.S.-led "War on Drugs." The course will trace, over time, major social, cultural, and political economic changes wrought by and upon Indigenous psychoactive substances, such as coca/cocaine, yerba mate, tobacco, cacao/chocolate, and psilocybin mushrooms. This course is part of the following field(s) of study: Latin America. It also meets the non-Euro/US requirement. (Same as: HIST 2416)

LACL 2162 (c, IP) The Haitian Revolution

Every Other Fall. Enrollment limit: 16.

Seminar. Examines one of the most significant and yet neglected revolutions in history. Between the years 1791-1804, Haitian revolutionaries abolished slavery and ultimately established a free and independent nation. Explores the Revolution's causes and trajectory and connects Haiti to the broader Atlantic world. Likewise, studies the revolution's aftermath and its impact on world history. This course is part of the following field(s) of study: Latin America, Atlantic Worlds, and Colonial Worlds. It fulfills the premodern and the non-Euro/US requirements for history majors and minors. (Same as: HIST 2862, AFRS 2862)

Prerequisites: HIST 1000 - 2969 or LAS 1000 - 2969.

Previous terms offered: Fall 2021.

LACL 2205 (c) Spanish Language, Cultures, and Politics

Carolyn Wolfenzon Niego; Gustavo Favaron Patriau; Yhosep Barba; Aina Marti Ger; Nadia Celis; Elena Cueto Asin.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

This course examines the history, politics, and cultures of the Hispanic World, from the 20th century to the present. Key moments include the Mexican Revolution, the Spanish Civil War, the Cuban Revolution, dictatorships in Chile and Argentina, and Latinx movements in the US. Through the study of a wide variety of literary and cultural icons from La Malinche and Octavio Paz, Pedro Almodóvar and Carmen Laforet, to Nancy Morejón, Julio Cortázar and Luis Valdez, students will reflect on individual experiences and collective movements. The course provides students with advanced practice in grammar, reading, speaking, listening, writing and research in Spanish. (Same as: HISP 2305)

Prerequisites: HISP 2204 or Placement in HISP 2305.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

LACL 2209 (c, DPI, IP) Spoken Word and Written Text

Katherine Dauge-Roth; Charlotte Daniels.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

Examines oral and written traditions of areas where French is spoken in Africa, the Caribbean, Europe, and North America from the Middle Ages to 1848. Through interdisciplinary units, students examine key moments in the history of the francophone world, drawing on folktales, epics, poetry, plays, short stories, essays, and novels. Explores questions of identity, race, colonization, and language in historical and ideological context. Taught in French. (Same as: FRS 2409, AFRS 2409)

Prerequisites: FRS 2305 or higher or Placement in FRS 2400 level or Placement in FRS 2305/2400 level.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

LACL 2210 (c, DPI, IP) Literature, Power, and Resistance

Meryem Belkaid.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

Examines questions of power and resistance as addressed in the literary production of the French-speaking world from the nineteenth through the twenty-first centuries. Examines how language and literature serve as tools for both oppression and liberation during periods of turmoil: political and social revolutions, colonization and decolonization, the first and second world wars. Authors may include Hugo, Sand, Sartre, Fanon, Senghor, Yacine, Beauvoir, Condé, Césaire, Djébar, Camus, Modiano, Perec, and Piketty. Students gain familiarity with a range of genres and artistic movements and explore the myriad ways that literature and language reinforce boundaries and register dissent. Taught in French. (Same as: FRS 2410, AFRS 2412)

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

LACL 2217 (c) Shifting Forms: The Art of Creative Translation

Non-Standard Rotation.

This course will explore the ways that the translation of a text from one language to another inevitably alters the original—an alteration that can entail loss, but that also opens up new vistas of meaning, and new opportunities for creativity. Students will translate short texts (fiction and poetry) from English to Spanish, Spanish to English, and even within those languages (for instance, translating verse poems to prose). Students will also explore the process of translating the visual into text, adding subtitles to short films and will work with the library's Department of Special Collections and/or the Bowdoin College Museum of Art. Our work will be supplemented by class visits by accomplished translators, and by the reading of critical essays on the art of translation. This course is taught in English. Students at the 2000-level will engage in work appropriate for an intermediate level of Spanish language proficiency; students enrolling at the 3000-level will conduct work at an advanced level. (Same as: HISP 2517)

Prerequisites: HISP 2203 or HISP 2204 or HISP 2305 (same as LACL 2205).

Previous terms offered: Spring 2022.

LACL 2300 (c, IP) Introduction to Africana Religions through Literature

Non-Standard Rotation. Enrollment limit: 16.

Africana religions are often described as lived traditions because experience is such a central part of their practice, nature, and structure. As an imaginative window into another lived experience, literature provides a unique opportunity to understand and experience the worldviews of Africana religions and peoples from more of an inside perspective than most academic material can provide. In this course literature written by and about people who come from these traditions will be studied in conjunction with academic sources on Africana religions and religion and literature to provide students with a deeper understanding of Africana worldviews and how they affect every facet of practitioners' lives. The works studied come from an array of different times, places, linguistic backgrounds, and traditions including the Yoruba religion, Islam, Christianity, Haitian Vodou, Brazilian Candomblé and more in Africa, Latin America, the Caribbean, and the United States. (Same as: AFRS 2300, REL 2330)

Previous terms offered: Fall 2020.

LACL 2304 (c, DPI) Queer Latinx Literature and Culture

Non-Standard Rotation. Enrollment limit: 16.

This seminar examines representations of queer Latinx identities and experiences through intersectional and interdisciplinary lenses, focusing on texts crafted by US-based Latinx authors. Students develop an understanding of the aesthetic and ideological elements that inform the narrativization of queer Latinx experience and the tensions that arise through the intersection of sexuality, gender, race, and ethnicity in a variety of texts and genres. In addition to highlighting the value of reading literature written by authors who belong to the marginalized groups that they write about, this course is meant to disrupt monolithic and homogenizing understandings of what it means to be queer and Latinx. Potential topics include futurism, la familia, borderlands, machismo and patriarchy, the coming-out narrative, and memory. This course satisfies the African American, Asian American, Indigenous, Latinx, Multiethnic American, or global literature requirement for English majors. (Same as: GSWS 2704, ENGL 2904)

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher or ENGL 1000 - 2969 or ENGL 3000 (same as GSWS 3000) or higher.

Previous terms offered: Spring 2022.

LACL 2306 (c, IP) Spanish Non-Fiction Writing Workshop

Carolyn Wolfenzon Niego.

Non-Standard Rotation. Spring 2023. Enrollment limit: 12.

Designed for heritage speakers (who grew up speaking Spanish in the home), bilinguals, and other Spanish-speaking students. The class will examine nonfictional accounts of current events and issues in the Hispanic world written by leading Spanish and Latin American authors and journalists. Throughout the semester, students will conduct research on a given topic or a particular environment of their choosing, writing their own nonfictional accounts of their research. Students will gain valuable real world experience researching, reporting, and working with speakers of Spanish in Brunswick or the surrounding communities. Through work specifically tailored to individual needs, students will hone their writing skills and build confidence in the language. (Same as: HISP 2306)

Previous terms offered: Spring 2022, Spring 2019.

LACL 2320 (c) Latin American Philosophy

Non-Standard Rotation. Enrollment limit: 50.

Latin American philosophy is a philosophy born of struggle, a body of thought whose metaphysical, epistemological, ethical, and political identity is tied up with the problems of colonization, decolonization, and liberation in a Latin American context. This course will philosophically assess classical and contemporary thought in Latin American Philosophy, and will discuss issues such as immigration, xenophobia/racism, liberation, racial and ethnic identity, assimilation/aculturation, the black/white binary, Latinx feminisms, and the Spanish language. Our primary textbook will be Robert Eli Sanchez's edited anthology and topical introduction, *Latin American and Latinx Philosophy: A Collaborative Introduction* (2020). Though the course is arranged topically, we will begin by establishing the historical context of Latin American thought. We will read excerpts from Bartolome de las Casas and Eduardo Galeano's *Open Veins of Latin America: Five Centuries of the Pillage of a Continent*. Classical philosophers we may read include Simon Bolivar, Leopoldo Zea, Jose Marti and Jose Vasconcelos. Contemporary scholars may include Enrique Dussel, Gloria Anzaldua, Jose Antonio-Orosco, Jorge J. E. Gracia, and Richard Delgado. (Same as: PHIL 1352)

Previous terms offered: Fall 2020.

LACL 2326 (c) Critical Race Theory in the United States

Non-Standard Rotation. Enrollment limit: 35.

To master and think critically about classic and contemporary work in critical race theory, especially the work of Derrick Bell, Richard Delgado, Kimberle Crenshaw, and Tommy Curry, we will critically examine such topics as intersectionality, gender and black male studies, social dominance theory, the racial wealth gap, reparations, hate speech, the black/white binary, and revisionist history, among other topics. We will take a distinctively philosophical outlook on these topics: identify value assumption and analyze and evaluate arguments. Finally, we will ponder the relationship of critical race theory (a domain of critical legal studies) to contemporary philosophy of race (a domain of moral and political philosophy). Students will come away with a better understanding of both the conceptual and political issues involved in discussing contemporary issues of race. (Same as: PHIL 2326, AFRS 2326)

Previous terms offered: Spring 2020.

LACL 2330 (c, VPA) Songs of Race and Power in Colonial Latin America

Non-Standard Rotation. Enrollment limit: 35.

This seminar explores diverse song traditions in Colonial Latin America. Attention will be given to manifestations of musical globalization and will incorporate the study of sources that reveal the circulation and transmission of Iberian and African musicoliterary genres in the vast transatlantic Spanish empire, including Portugal, Italy, the New World, and Asia. We will pay special attention to complex representations of ethnic and religious others (indigenous people of the Americas, African slaves, Muslims, Jews) in relation to literary conventions and early modern ideas about religious devotion and racial, gender, and class difference. We will approach these topics through a close engagement with materials in special collections and archives. This course is part of the following fields of study: Colonial Latin America, transatlantic studies, Spanish Golden Age Poetry, and early music. (Same as: MUS 2296)

Previous terms offered: Spring 2022.

LACL 2345 (b, IP) Gender, Race, and Citizenship in Brazil

Jay Sosa.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course examines how hierarchies of race, class, gender, and sexuality structure everyday life in Latin America's largest nation, Brazil. Twentieth century elites described Brazil as a racial democracy and a sexual paradise, but this vision is increasingly contested in the twenty-first century by Black, feminist, and LGBT social movements. Reading ethnographic accounts and watching film portrayals of daily life in Brazil across a number of case studies, we will examine how Brazilians encounter social inequality in a variety of intimate settings. Potential topics include: domestic labor, sex work, queer activism, plastic surgery and reproductive rights. Students will complete short response papers during the semester and complete a final research project on a self-selected topic that includes primary or secondary sources on Brazil. (Same as: GSWS 2345, ANTH 2345)

Previous terms offered: Spring 2021, Fall 2020.

LACL 2347 (b, DPI, IP) Sex Wars in the Americas

Non-Standard Rotation. Enrollment limit: 16.

What motivates political battles over sexuality and gender? Often described as disputes over culture, morality, family, or lifestyle, these struggles more often have to do with concerns over national belonging, distributions of care labor, and enforcement of race, class, and gender norms. In this course, we first learn about feminist and queer frameworks for studying gender and sexuality politics: culture wars, backlashes, and moral panics. We draw on case studies that outline the histories of anti-reproductive and anti-LGBT movements in Brazil and in the United States. And we will consider the social dynamics of recent "anti-gender" movements in Latin America. Over the semester, students will research a particular case study of a culture war, backlash, or moral panic, where they use journalist and NGO reporting, and write a term paper that applies the frameworks learned in class. (IRBW) (Same as: GSWS 2715)

Prerequisites: GSWS 1101 or ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2021.

LACL 2352 (c, IP, VPA) Revolutions and Its Aftermaths in Central America through Film

Paula Cuellar Cuellar.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course will survey the history of modern Central America, from the Nicaraguan revolution and the Salvadoran and Guatemalan armed conflicts, through film. In addition, this class will examine broader region-wide experiences such as the ownership of the Panama Canal and the assassination of key figures in Central America including Berta Cáceres in Honduras. Mainly through a variety of film genres, including historical drama, adaptations, and documentaries, this course will analyze the role of the United States in Central America, including the long history of military occupation in Nicaragua, the CIA-backed coup in Guatemala in 1954, and the financial aid provided to El Salvador and Guatemala during their civil wars. Finally, this course will explore the legacy of the violence from the twentieth century in the present. As a result, this class will address key topics such as transitional justice, migration, gangs, drug trafficking and organized crime, gender relationships, and neopopulism.

LACL 2374 (c, DPI, IP) Latin American Feminisms

Irina Popescu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

What are feminisms? Is there more than one feminism? What is the relationship between feminisms and constructions of race, gender and ethnicity in Latin America? How has feminist discourse shaped human rights discourses in the region? This course explores the complex network of feminisms in 20th-21st century Latin America. It covers feminist movements, theories, and scholars/artists from a variety of Latin American countries and regions, including Guatemala, Argentina, Mexico, and Brazil. Students will learn how intersections between constructions of race and ethnicity, as well as gender, impact feminisms in the region. Students will also explore how early and more recent contributions of indigenous and women of color, continue impacting ideas, discussions, and recent debates concerning feminisms and women's social mobilizations in Latin America. Note: This course fulfills the GSWS requirement for either Queer Theory or Feminist Theory. (Same as: GSWS 2206)

Prerequisites: GSWS 1000 - 2969 or GSWS 3000 or higher.

Previous terms offered: Fall 2021.

LACL 2375 (c, DPI, IP) Activism and Human Rights in Latin America

Non-Standard Rotation. Enrollment limit: 16.

What is the relationship between activism and human rights in Latin America? How have the battling constructions of race, gender, and ethnicity sparked social justice movements in the region? This course offers a general introduction to the development of contemporary discourses and activism on human rights in Latin America. It covers activist and justice movements in a variety of Latin American countries and regions including Brazil, Guatemala, the Southern Cone, and Mexico. Students will analyze how cultural production, in the form of film, literature, testimony, and art, by Afro-Latinx and indigenous subjects, women, and members of the LGBTQI+ community led to the "making" of human rights in the region. As an IRBW course, students in this course will also develop and practice their critical writing and research skills throughout the semester with plenty of research development writing workshops, one-on-one writing mentoring, and feedback. (IRBW) (Same as: GSWS 2705)

Previous terms offered: Fall 2021.

LACL 2384 (c, IP) Deities in Motion: Afro-Diasporic Religions

Every Other Fall. Enrollment limit: 16.

Religion has been central not only in the lives of members of the Black Atlantic World and also in terms of the formation of this world. This class provides a survey of some of the most prominent Afro-Atlantic diasporic religions such as Haitian Vodou, Brazilian Candomblé, Trinidadian Shango, and Cuban Santería/Regla de Ocha and also explores the particular dynamics of the Religion has been central not only in the lives of members of the Black Atlantic World but also in terms of the formation of this world. This class provides a survey of some of the most prominent Afro-Atlantic diasporic religions, such as Haitian Vodou, Brazilian Candomblé, Trinidadian Shango, and Cuban Santería/Regla de Ocha, and also explores the particular dynamics of the African religious diaspora. Complicating common assumptions about relations between diaspora and homeland as well as what constitutes a religion, it addresses issues of authenticity and authority, ancestry, race, gender, transnationalism, and even problematic (mis)representations in Western society and pop culture. We will also pay close attention to the important and complicated role that the transatlantic slave trade played in the formation of these Atlantic societies and aspects of these religious traditions, such as conceptions of God and divinities, syncretism, divination, and spirit possession. (Same as: AFRS 2384, REL 2484)

Previous terms offered: Spring 2021, Fall 2019.

LACL 2387 (c, DPI, IP) Religion, Healing, and Literature in Africa and the African Diaspora

Donato Fhunsu.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Conducted in English and with all the readings and discussions in English, this course is nonetheless a comparative and multilingual study (English, Spanish, French, Lingala, and Kikongo) of African, African American, Afro-Caribbean, and Afro-Latin American literatures and their intersections with religion. Building on the Gambian historian of religions Lamin Sanneh's work (*Translating the Message: The Missionary Impact on Culture*) showing that Christianity is a "translated" religion, the course explores, through the theory of critical translation and the radical imagination of Africana indigeneity, how African, African American, Afro-Caribbean, and Afro-Latin American writers (Mudimbe, Oyono, Ndongo-Bidyogo, Vera, Adichie, Condé, Laferrière, Montero, Zapata Olivella, and Walker) use the polyglossial space of the novel to "conjure" up individual, social, and ecological healing, and thus push the boundaries of the conventional understanding of "religion" and of "Christianity." (Same as: AFRS 2387, FRS 2387)

Previous terms offered: Spring 2022.

LACL 2392 (c, VPA) Geographies of the Sexiness: Dance and Politics of (Dis)Respectability Across the Americas

Every Spring. Enrollment limit: 16.

Dance—an art form whose medium is the body—and ethnography—the study of people and their cultures—are great tools for addressing some of the ways different dancing bodies have been historically policed for “dancing sex(y).” Other tools, such as critical dance and black theories, in addition to queer and feminist approaches, will also be utilized to comprehend the uneven ways these bodies are further racialized, sexualized, and gendered within the Americas. In particular, students will learn about various dances (such as the Brazilian samba to the Cuban rumba, Jamaican Dancehall, and the Trinidadian wine) through readings, lectures, and actual in-studio dancing. Ultimately, the intention here is to understand dancing as both a meaning-making activity and a way of understanding the world. In turn, it is an important lens for critically thinking, talking, researching, and writing about politics of identity (especially regarding nationality, gender, race, and sexuality). (Same as: DANC 2505, AFRS 2292, GSWS 2505)

Previous terms offered: Spring 2021, Spring 2019.

LACL 2396 (c, VPA) Afro-Modern II Techniques and Histories

Every Other Year. Enrollment limit: 22.

A continuation of modern dance principles introduced in Dance 1211 with the addition of African-derived dance movement. The two dance aesthetics are combined to create a new form. Technique classes include center floor exercises, movement combinations across the floor, and movement phrases. Students also attend dance performances in the community. (Same as: DANC 2241, AFRS 2236)

Previous terms offered: Spring 2021, Fall 2019, Spring 2019.

LACL 2401 (c, IP) Becoming Latin America: The Making of a Colonial World (1491-1700)

Every Other Fall. Enrollment limit: 35.

This course introduces students to the history of Latin America from the pre-Conquest period until the consolidation of a colonial system administered by, and for, a European elite at the beginning of the eighteenth century. During the semester we will follow 3 interrelated stories: the establishment of colonial rule (including institutions of social control like the church, patriarchy, and racial castes), the development of extractive economies dependent on unfree labor, and the evolution of a hybrid culture bringing together Indigenous, European, and African traditions. Students will use primary documents, archeological artifacts, contemporary films, and scholarly essays to learn about the period as well as to begin to familiarize themselves with how historians reconstruct and interpret the past. This course is part of the following field(s) of study: Latin America. It also meets the pre-modern and on euro/US requirement for history majors and minors. (Same as: HIST 2401)

Previous terms offered: Fall 2020, Fall 2018.

LACL 2402 (c, IP) Decolonizing Latin America: A (long) Century of War, 1770-1910

Every Spring. Enrollment limit: 35.

This course surveys the “long nineteenth century” in Latin America. This is a period characterized by conflict, racist policies, and indigenous dispossession, but it is also a period of radical political imaginings, of economic development, and profound social change. Topics covered include the efforts by Spain and Portugal to reform their colonies in the Americas; the independence movements of the 1810s-1820s & the ensuing “post-colonial Blues”; the end of slavery & campaigns against independent indigenous peoples; the development of export-led economic models; the implementation of social policies to “whiten” the population; the US invasion of Mexico, the destruction of Paraguay by its neighbors, and a war between Peru and Chile over guano; the triumph of liberalism and the Mexican Revolution of 1910. This is the second in a series of three surveys of Latin American history, but no prior knowledge or prerequisites necessary. This course is part of the following field of study: Latin America. It fulfills the non-Euro/US requirement for history majors and minors. (Same as: HIST 2402)

Previous terms offered: Fall 2021, Spring 2019.

LACL 2403 (c, IP) Revolutions in Latin America: The People Take the Stage

Non-Standard Rotation. Enrollment limit: 35.

Examines revolutionary change in Latin America from a historical perspective, concentrating on four successful social revolutions—Haiti, Mexico, Cuba, and Bolivia— as well as several revolutionary movements that did not result in social change— including Argentina, Guatemala, Chile, Nicaragua, and Venezuela. Popular images and orthodox interpretations are challenged and new propositions about these processes are tested. External and internal dimensions of each of these social movements are analyzed and each revolution is discussed in the full context of the country’s historical development. This course fulfills the non-Euro/US requirement This course is part of the following field(s) of study: Latin America. (Same as: HIST 2403)

Previous terms offered: Spring 2022, Fall 2019.

LACL 2407 (c, DPI, IP) Francophone Cultures

Meryem Belkaid.

Every Spring. Spring 2023. Enrollment limit: 18.

An introduction to the cultures of various French-speaking regions outside of France. Examines the history, politics, customs, cinema, and the arts of the Francophone world, principally Africa and the Caribbean. Increases cultural understanding prior to study abroad in French-speaking regions. (Same as: FRS 2407, AFRS 2407)

Prerequisites: FRS 2305 or higher or Placement in FRS 2400 level or Placement in FRS 2305/2400 level.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

LACL 2409 (c, IP) Introduction to Hispanic Studies: Poetry and Theater
Margaret Boyle; Elena Cueto Asin; Aina Marti Ger; Gustavo Faveron Patriau.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

A chronological introduction to the cultural production of the Spanish-speaking world from pre-Columbian times to the present, with particular emphasis on the analysis of poetry and theater. Examines major literary works and movements in their historical and cultural context. Conducted in Spanish. (Same as: HISP 2409)

Prerequisites: HISP 2305 (same as LAS 2205) or LAS 2205 or Placement in HISP 2409 or 2410.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

LACL 2410 (c, IP) Introduction to Hispanic Studies: Essay and Narrative
Nadia Celis; Yhosep Barba; Elena Cueto Asin; Gustavo Faveron Patriau.
Every Semester. Fall 2022; Spring 2023. Enrollment limit: 18.

A chronological introduction to the cultural production of the Spanish-speaking world from pre-Columbian times to the present, with particular emphasis on the analysis of essay and narrative. Examines major literary works and movements in their historical and cultural context. (Same as: HISP 2410)

Prerequisites: HISP 2305 (same as LAS 2205) or LAS 2205 or Placement in HISP 2409 or 2410.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

LACL 2420 (c, IP) Gendering Latin American History
Every Other Spring. Enrollment limit: 35.

An introduction to Latin American history between 1400 and the present, using the lens of gender to reinterpret the region's history. Some key events include the arrival of Europeans, mestizaje, honor and race, independence, civil wars, liberalism, populism, dictatorship, and issues of memory and redemocratization. This course works on two registers. The first is that of "women's history." Here, we will survey the experiences and impact of women in Latin America from the pre-conquest period to the present, through the lenses of cultural, social, and political history. In other words, we will tell the stories of Latin American women and investigate how changes small and large affected their everyday lives. The second register is "gender history." In other words, we will not just discuss women's experiences, but also the ways that gender ideologies have influenced Latin American history. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 2430, GSWS 2430)

Previous terms offered: Spring 2020.

LACL 2421 (c, DPI, VPA) Between the Alamo and the Wall: Latinx Activism in the United States

Non-Standard Rotation. Enrollment limit: 35.

This course explores the range of issues inspiring Latinx activism and its diverse expressions across the United States from the turn of the 20th century to the present. It introduces students to the intellectual traditions and analytical approaches that inform both Latinx and Afro-Latinx activism in the US. During the course of the semester students will 'travel' to U.S. cities (and regions) such as San Antonio and the Texas Borderlands, Los Angeles, Miami, New York, Chicago, and the Central Valley in California. As we 'travel' to these locations, we will explore diverse expressions of Latinx activism, including labor activism, cultural activism, political activism surrounding citizenship rights, and the struggles for gender and sexuality rights. Students will also learn about the many similarities and differences among Latinx communities in the United States, including Afro-Latinx communities, specifically Afro-Cuban in Miami, and Afro-Puerto Ricans and Afro-Dominicans in New York. We will explore how these communities have used and continue to use activist practices ranging from labor strikes to literary texts, to gain visibility and negotiate their rights within the country. This course will also draw connections between Latinx and Afro-Latinx and other activist movements in the US, from civil rights to labor rights and the formation of worker's unions. Drawing from various disciplines including history, law, literature, sociology, and cultural studies, students will explore how Latinx activism has shaped understandings of race and inclusion, gender, sexuality, and citizenship in the United States. (Same as: AFRS 2721, GSWS 2720)

Previous terms offered: Spring 2022.

LACL 2513 (b, IP) Food, Environment, and Development

Non-Standard Rotation. Enrollment limit: 35.

Explores the nexus of food, environment, and development in global environmental politics. Examines the interconnected challenges of governing across trans-boundary socio-ecological systems amidst competing demands on scarce natural resources—to sustain a global food system, foster economic development, and promote equity and justice. Prepares students to engage with interdisciplinary scholarship from political science, international development, public policy, and food studies. Draws on comparative cases from local to global scales, with an emphasis on Maine, the U.S., and Latin America. (Same as: ENVS 2313, GOV 2492)

Prerequisites: ENVS 1101 or ENVS 2330 (same as GOV 2910).

Previous terms offered: Spring 2021, Spring 2020, Spring 2019.

LACL 2538 (b, DPI, IP) The Politics of Dissent in Latin America

Tulio Zille.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

This course explores the contemporary politics of dissent in Latin America. To do so it goes beyond conventional institutional and electoral settings, since dissent is not simply a moment of protest or resistance, nor the collective plea for rights. Instead it can be the moment when a given way of living or social order is unexpectedly modified and challenged with the introduction of a new agenda for action. Topics covered may include: Latin American intellectuals and decolonial theory, the challenges to development discourse by indigenous peoples, the role of music and the arts in resistance against political violence, the importance of social media in contemporary movements for political change, and the contestation of established notions of identity and citizenship (e.g., by queer minorities.) We will draw from cases in Argentina, Bolivia, Brazil, Ecuador, and Mexico, as well as including Latinx peoples and cultures in the United States. (Same as: GOV 2465)

Previous terms offered: Fall 2021, Fall 2020.

LACL 2540 (b, IP) Global Political Ecology

Tulio Zille.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

In light of the ecological crisis exacerbated by climate change, scholars in the humanities and social sciences have become increasingly preoccupied with the relationship between humans and nature, in a field of study loosely termed "political ecology." Central to this field are critiques of the separation between humans and nature in modernity and how we should understand this relationship. This course expands the current debates in this field beyond the intellectual circles of Europe and North America—which have focused on science and technology studies and new materialisms—to consider contributions that have remained marginal (for example, indigenous political thought and decolonial theory). The course will include authors from various disciplines ranging from indigenous intellectuals and activists to academics, with a focus on the Global South, including the work of Chilean filmmaker Patricio Guzmán, Maori scholar Linda Tuhiwai Smith, Indian activist Vandana Shiva, and Martinican writer Édouard Glissant. (Same as: GOV 2470, ENVS 2340)

Previous terms offered: Spring 2021.

LACL 2708 (b, DPI) Race and Ethnicity

Non-Standard Rotation. Enrollment limit: 35.

Introduction to the sociological study of race and ethnicity in the contemporary United States. Examines prominent theories pertaining to the social and cultural meanings of race and ethnicity, causes and consequences of structural racism, relationships between race and class, how immigration and assimilation shape and are shaped by social constructions of race and ethnicity, dynamic representations of race and ethnicity in the media, formation and shifts of intra-group and inter-group boundaries, and more. (Same as: SOC 2208, AFRS 2208)

Prerequisites: SOC 1101 or AFRS 1101.

Previous terms offered: Fall 2021, Fall 2018.

LACL 2724 (b) Religion and Social Transformation in South America

Non-Standard Rotation. Enrollment limit: 35.

Religious beliefs and practices intersect with processes of social change at various historical moments, illuminating the power dynamics of (trans)cultural encounters. Using cases from the Andean and Amazonian regions of South America, explores local indigenous cosmologies, rituals, and concepts of the sacred in relation to expansive regional and global religions, including Catholicism and Protestantism. Focuses on twentieth- and twenty-first-century social issues. Includes examples from pre-Columbian, Inca, and Spanish colonial periods to highlight the continuities and transformations in local and global institutions. Forefronts religion, as a facet of identity and inequality, intersecting with gender, race, ethnicity, class, and sexuality. Scholarly and popular texts introduce topics like religious syncretism; sacred landscapes; human-supernatural relations; religious violence and ritual protest; global capitalism and citizenship; everyday moralities, embodiment, and faith-based humanitarianism. (Same as: ANTH 2723)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Spring 2021.

LACL 2725 (b, IP) Global Politics of Work

Non-Standard Rotation. Enrollment limit: 35.

Globally, a large portion of life is devoted to work. The type of work that people perform reflects global inequalities. Introduces the history of wage-labor and theoretical concepts used to understand the shifting dimensions of work and its implication for the global workforce. Particular focus on labor in the United States, Latin America, and Asia; manufacturing and service work; migration and labor trafficking; the body as the site for transforming labor into wage-labor; and forms of labor resistance. (Same as: SOC 2225)

Prerequisites: SOC 1101.

Previous terms offered: Fall 2018.

LACL 2730 (b, IP) Descendants of the Sun: The Inca and their Ancestors

Non-Standard Rotation. Enrollment limit: 35.

Considers the Inca figure in contemporary imaginations, from mummies to archaeological sites like Machu Picchu. This course examines 12,000 years of cultural change in the Andean region of South America. Situates the Inca, perhaps the most well-known of the early civilizations that predated the European invasion, in relation to other cultures, including the Chavin, Paracas, Moche, Nasca, Wari, Tiwanaku, and Chimú. Topics include the peopling of South America; early religious traditions; cultural adaptations to mountainous and desert environments; origins and development of agriculture; domestication of llamas and alpacas; rise and fall of states; imperial expansion; artistic expression; architectural traditions; treatment of the dead and ancestor veneration; and Spanish colonization. Considers both archaeological and ethnohistorical research from the region that includes Ecuador, Peru, Bolivia, Chile, and Argentina. Includes opportunities to work with artifacts from the region. (Same as: ANTH 2830)

Previous terms offered: Spring 2022, Fall 2020, Spring 2019.

LACL 2737 (b, IP) Family, Gender, and Sexuality in Latin America
Non-Standard Rotation. Enrollment limit: 35.

Focuses on family, gender, and sexuality as windows onto political, economic, social, and cultural issues in Latin America. Topics include indigenous and natural gender ideologies, marriage, race, and class; machismo and masculinity; state and domestic violence; religion and reproductive control; compulsory heterosexuality; AIDS; and cross-cultural conceptions of homosexuality. Takes a comparative perspective and draws on a wide array of sources including ethnography, film, fiction, and historical narrative. (Same as: ANTH 2737, GSWS 2237)

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Fall 2019.

LACL 2746 (b, IP) Immigration and the Politics of Exclusion
Non-Standard Rotation. Enrollment limit: 35.

Looks at comparative lessons in global immigration to understand the political, economic, and social causes of migration—the politics of immigrant inclusion/exclusion—and the making of diaspora communities. Specific topics will include: the politics of citizenship and the condition of illegality; the global migrant workforce; and how class, gender, race, and sexuality influence the migrant experience. (Same as: SOC 2370)

Prerequisites: SOC 1101.

Previous terms offered: Spring 2021, Spring 2019.

LACL 2755 (b, DPI) Decolonizing Archaeology in Latin America
Karime Castillo.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Explores the legacies of colonialism in modern Latin America and archaeologists' current efforts to decolonize Eurocentric interpretations and discourses of the colonial past. Focuses on indigenous and community archaeology as a means of reframing our understanding of the past and present. Discussions address the impact of colonialism in Latin America and the Caribbean, including how contemporary relationships in the region are structured by colonial history. Students work with case studies grounded in archaeological, ethnographic, and historical sources to learn how archaeology can help contest and subvert dominant narratives derived from colonialism. Indigenous resistance and resilience will be addressed along with cultural continuities and change. Topics may include identity and the construction of ethnicity, gender, and race; religion; slavery and diaspora; and art, architecture, and technology. (Same as: ANTH 2278)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher or LACL 1000 - 2969 or LACL 3000 or higher.

LACL 2758 (b, IP) Ancient Civilizations of Mesoamerica
Karime Castillo.

Every Other Fall. Spring 2023. Enrollment limit: 35.

Explores the emergence of social complexity and state-level societies through a focus on ancient civilizations of Mesoamerica (Mexico, Guatemala, Belize, Honduras, and El Salvador). Among the diverse peoples and cultures that populated this region prior to the Spanish invasion, the Maya and the Aztec are among the most famous. This course challenges popular misconceptions about these and other societies who occupied this region over the course of 3500 years. Asks how cities rivaling in size those of the old world rose, collapsed, and sometimes disappeared. Considers the political structure and economic systems of these societies, their technologies, and their relationships with the environment. Explores ancient worldviews, belief systems, and political and religious power. Incorporates various types of evidence, including the archaeological material record, art, monumental architecture, and ethnohistorical sources, and the ways archaeologists analyze and interpret that evidence. (Same as: ANTH 2258)

Prerequisites: ANTH 1000 - 2969 or ANTH 3000 or higher.

Previous terms offered: Fall 2021.

LACL 3140 (c) Crime and Punishment in Latin America
Every Other Spring. Enrollment limit: 16.

This advanced seminar explores the emergence and expansion of institutions of social control in Latin America, from colonial times, through independence, and into the tumultuous twentieth century. Students will learn about the role of the Church in disciplining and disarticulating indigenous societies and practices; the expansion of the military as an institution of social control, but also of social mobility; the emergence of hygienist-eugenic discourses and practices designed to reify and naturalize social difference; and the proliferation of penitentiaries and hospitals as tools to define and criminalize deviancy. Note: This course is part of the following field(s) of study: Latin America. It fulfills the non euro/us requirement for history majors and minors. (Same as: HIST 3404)

Previous terms offered: Spring 2020.

LACL 3211 (c) Bringing the Female Maroon to Memory: Female Marronage and Douboutism in French Caribbean Literature

Non-Standard Rotation. Enrollment limit: 16.

History has retained the names of great male Caribbean heroes and freedom fighters during slavery such as the Haitians, Mackandal or Toussaint Louverture, the Jamaican, Cudjoe or the Cuban Caba. Enslaved Africans who rebelled against oppression and fled from the plantation system are called maroons and their act, marronage. Except for Queen Nanny of the Jamaican Blue Mountains, only male names have been consecrated as maroons. Yet, enslaved women did fight against slavery and practice marronage. Caribbean writers have made a point of bringing to memory forgotten acts of marronage by women during slavery or shortly thereafter. Proposes to examine the fictional treatment French-speaking Caribbean authors grant to African or Afro-descent women who historically rebelled against slavery and colonization. Literary works studied against the backdrop of doubtism, a conceptual framework derived from the common perception about women in the French Caribbean which means strong woman. Authors studied may include Suzanne Dracius (Martinique), Fabienne Kanor (Martinique), André Schwart-Bart (Guadeloupe), Maryse Condé (Guadeloupe), Evelyn Trouillot (Haiti). Conducted in French. (Same as: FRS 3211, AFRS 3211, GSWs 3211)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2021.

LACL 3213 (c) Aesthetics in Africa and Europe

Non-Standard Rotation. Enrollment limit: 18.

Aesthetics – the critical reflection on art, taste, and culture; as much as beauty, the set of properties of an object that arouses pleasure—are central to all aspects of society-building and human life and relationships. Examines the notions of aesthetics and beauty, from pre-Colonial to contemporary times in cultures of the African and Western civilizations as expressed in various humanities and social sciences texts, as well as the arts, iconography, and the media. Considers the ways Africans and afro-descendants in the New World responded to the Western notions of aesthetics and beauty. Authors studied may include Anténor Firmin, Jean Price Mars, Senghor, Damas, Césaire, Cheick Anta Diop, Fanon, Glissant, Chamoiseau, Gyekye Kwame, Socrates, Plato, Jean-Baptiste du Bos, Diderot, Le père André, Baumgarten, Kant, Schopenhauer, Hegel, Hugo. (Same as: FRS 3213, AFRS 3213)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2019.

LACL 3215 (c, DPI, IP) The Modern Worldview of the Andes: Art, Literature, Architecture, and the Environment.

Carolyn Wolfenzon Niego.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Through the exploration of art, literature, architecture and the unique worldview of the ancestral Andean societies, this course will take a look at the different ways in which the three main countries in the Andes—Peru, Ecuador, and Bolivia—have dealt with processes of social, political, and cultural modernization since the late nineteenth century until the present day. Readings will include works by Peruvian, Bolivian, and Ecuadorian writers to examine modernist, avant-garde and postmodernist aesthetics. Students will analyze how internal migration to the cities of Lima, Quito and La Paz has reconfigured them, changed their urban dynamics, and impacted the economy and the natural environment. One example students will engage with includes architecture from iconic Bolivian architect Freddy Mamani, who invented the construction of the Cholets in the city of El Alto, Bolivia. Cholets offer a unique way of connecting urban space to Aymaran identity (an identity that is very connected to the land in Bolivia). Students will also address the issue of migration and the reconfigurations of Andean identities in the United States, through the works of Bolivian author Edmundo Paz Soldán and the Ecuadorian-American writer Ernesto Quiñónez and his experience living in Harlem. Taught in Spanish. (Same as: HISP 3211, URBS 3211)

Prerequisites: HISP 2409 (same as LACL 2409) or HISP 2410 (same as LACL 2410) or HISP 3200 or higher.

LACL 3217 (c) Hispanic Cities in Cinema: Utopia, Distopia, and Transnationality

Elena Cueto Asin.

Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

Examines how cinema portrays urban spaces in Latin America, Spain and USA from an aesthetic point of view that facilitates discourses on Hispanic history and identity. It looks at the city (Barcelona, Bogotá, Buenos Aires, Habana, Los Angeles, Madrid, Mexico DF and New York) as a cinematic setting for narratives on crime, immigration, political activity and romance, and how it conveys utopic or distopic views of physical and social urban development. Also considers how cities lend themselves as transnational subjects for directors who cross national boundaries, such as Luis Buñuel, Woody Allen, Pedro Almodóvar and Alejandro González Iñárritu. Conducted in English. Writing assignments in Spanish. (Same as: HISP 3117)

Prerequisites: HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410).

LACL 3218 (c) A Journey around Macondo: Garcia Marquez and His Contemporaries

Nadia Celis.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

Studies the main topics, techniques, and contributions of Colombian Nobel Prize winner Gabriel García Márquez as presented in “One Hundred Years of Solitude.” Explores the actual locations and the social, cultural, and literary trends that inspired the creation of Macondo, the so-called village of the world where the novel takes place, and the universal themes to which this imaginary town relates. Contemporary authors include Fuenmayor, Rojas Herazo, and Cepeda Samudio. (Same as: HISP 3218)

Prerequisites: HISP 2409 (same as LACL 2409) or HISP 2410 (same as LACL 2410).

Previous terms offered: Spring 2021, Fall 2019.

LACL 3219 (c) Letters from the Asylum: Madness and Representation in Latin American Fiction

Gustavo Faveron Patriau.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

Explores the concept of madness and the varying ways in which mental illness has been represented in twentieth-century Latin American fiction. Readings include short stories and novels dealing with the issues of schizophrenia, paranoia, and psychotic behavior by authors such as Jorge Luis Borges, Carlos Fuentes, Cristina Rivera Garza, and Horacio Quiroga. . Also studies the ways in which certain authors draw from the language and symptoms of schizophrenia and paranoia in order to construct the narrative structure of their works and in order to enhance their representation of social, political, and historical conjunctures. Authors include César Aira, Roberto Bolaño, Diamela Eltit, and Ricardo Piglia, . (Same as: HISP 3219)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2018.

LACL 3220 (c, DPI, IP) Medicine, Literature, and Spanish

Non-Standard Rotation. Enrollment limit: 08.

This course explores a range of literary and cultural texts related to the theory, practice and experience of medicine, health and healing in the early modern Hispanic world. Students will analyze how early Spanish literature impacts our understanding of contemporary health practices and examine how health histories provide insight into racial and ethnic health disparities and general inequities in health care systems. Topics include drug trials, herbalists and apothecaries; health and spiritual practices; gardens and gardeners; diet and food; healer and patients; and race, ethnicity, gender and medicine. The course provides an introduction to the topics of narrative medicine and the health humanities. Course is taught in Spanish. (Same as: HISP 3220)

Prerequisites: Two of: HISP 2409 (same as LAS 2409) and HISP 2410 (same as LAS 2410).

Previous terms offered: Spring 2021.

LACL 3223 (c) The War of the (Latin American) Worlds

Non-Standard Rotation. Enrollment limit: 16.

Discusses the historical, social, and political consequences of the clash between tradition and modernity in Latin America during the nineteenth and twentieth centuries as seen through novels, short stories, and film. Particular attention will be given to the ways in which the processes of modernization have caused the coexistence of divergent worlds within Latin American countries. Analyzes different social and political reactions to these conflictive realities, focusing on four cases: the Mexican Revolution, the Cuban Revolution, the dictatorship of Augusto Pinochet in Chile, and Andean insurgencies in Perú. Authors to be read may include Reinaldo Arenas, Roberto Bolaño, Simón Bolívar, Jorge Luis Borges, Cromwell Jara, Mario Vargas Llosa, Gabriel García Márquez, José Martí, Elena Poniatowska, and Juan Rulfo, among others. (Same as: HISP 3223)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2019.

LACL 3225 (c) Self-Figuration and Identity in Contemporary Southern Cone Literature

Non-Standard Rotation. Enrollment limit: 16.

Who speaks in a text? What relationship exists between literature and identity? How can we portray ourselves in specific political contexts? Addresses these and other questions by studying contemporary Southern Cone literary texts that deal with problems of subjectivity and self-representation in poetry and novels. Concentrates on texts that display a literary "persona" in contexts of violence and resistance (the dictatorships of the 1970s) and in more contemporary Latin American ones. Some authors include Borges, Gelman, and Peri-Rossi. Films and contextual historical readings used. Taught in Spanish. (Same as: HISP 3225)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Spring 2021.

LACL 3226 (c) A Body "Of One's Own": Caribbean and Latinx Women Writers

Non-Standard Rotation. Enrollment limit: 16.

What kind of stories do bodies tell or conceal? How does living in a gendered and racialized body effects the stories told by women? How do bodies and their stories converge with History or complicate historical "truths"? These are some of the questions addressed in this study of contemporary writing by women from the Hispanic Caribbean and the United States Latinx/Chicana communities. Feminists of color frame the analysis of literature, popular culture and film to guide an examination of the relation of bodies and sexuality to social power, and the role of this relation in the shaping of both personal and national identities. Theorists include Alexander, Barribeau, Curiel, Mendez and Segato. Novelists include Álvarez, Buitrago, García, Indiana Hernández, and Santos-Febres. Taught in Spanish with readings in Spanish and English. (Same as: HISP 3226, AFRS 3226, GSWS 3226)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2020.

LACL 3227 (c, IP) The Hispanic Avant-Garde: Poetry and Politics

Non-Standard Rotation. Enrollment limit: 16.

Questions what is meant by "avant-garde": how it was manifested in the Hispanic world in the first half of the twentieth century; how contemporaneous politics shaped or became shaped by it; how this relates to the world today. Focuses on poets such as Aleixandre, Garcia Lorca, Borges, Neruda, Huidobro, Storni, Lange, Novo, and Vallejo, while also considering a wide array of manifestos, literary journals, films, and other art forms from Spain, Argentina, Uruguay, Chile, Peru, Mexico, and Brazil. Taught in Spanish with some theoretical and historical readings in English. (Same as: HISP 3227)

Prerequisites: Two of: HISP 2409 (same as LAS 2409) and HISP 2410 (same as LAS 2410).

Previous terms offered: Fall 2020.

LACL 3231 (c, DPI, IP) Sor Juana and María de Zayas: Early Modern Feminisms

Margaret Boyle.

Every Other Year. Fall 2022. Enrollment limit: 16.

Did feminism exist in the early modern period? Examines key women authors from the early Hispanic World, considering the representation of gender, sexuality, race, and identity in distinct political and social contexts. Focuses on Mexican author Sor Juana Inés de la Cruz (1651-1695) and Spanish author María de Zayas (1590-1661), alongside other prominent women writers from the period. Students read short stories, essays, poems, and personal letters. Conducted in Spanish. (Same as: HISP 3231, GSW 3231)

Prerequisites: HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410).

Previous terms offered: Spring 2019.

LACL 3237 (c) Hispanic Short Story

Non-Standard Rotation. Enrollment limit: 16.

An investigation of the short story as a literary genre, beginning in the nineteenth century, involving discussion of its aesthetics, as well as its political, social, and cultural ramifications in the Spanish-speaking world. Authors include Pardo Bazán, Borges, Cortázar, Echevarría, Ferré, García Márquez, and others. (Same as: HISP 3237)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2021, Fall 2019.

LACL 3239 (c) Borges and the Borgesian

Every Other Year. Enrollment limit: 16.

An examination of the Argentinian writer Jorge Luis Borges's work, focusing not only on his short stories, poems, essays, film scripts, interviews, and cinematic adaptations, but also on the writers who had a particular influence on his work. Also studies Latin American, European, and United States writers who were later influenced by the Argentinian master. An organizing concept is Borges's idea that a writer creates his own precursors. (Same as: HISP 3239)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Spring 2022, Spring 2020.

LACL 3243 (c) Imaginary Cities/Real Cities in Latin America

Non-Standard Rotation. Enrollment limit: 16.

Examines the representation of urban spaces in Spanish American literature during the last six decades. While mid-twentieth-century fictional towns such as Macondo and Comala tended to emphasize exoticism, marginality, and remoteness, more recent narratives have abandoned the "magical" and tend to take place in metropolitan spaces that coincide with contemporary large cities such as Lima and Buenos Aires. The treatment of social class divisions and transgressions, territoriality, and the impact of the space on the individual experience are studied in novels, short stories, and film from the 1950s to the present. Authors include Rulfo, García Márquez, Onetti, Donoso, Vargas Llosa, Sábato, Reynoso, Ribeyro, Piñera, Gutiérrez, Bellatín, Caicedo, and Junot Díaz, among others. (Same as: HISP 3243)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2018.

LACL 3250 (c, IP) The Southern Cone Revisited: Contemporary Challenges

Non-Standard Rotation. Enrollment limit: 16.

How do artists distinguish their contemporary moment from the past? What challenges does it pose to literature and film? Building on ideas by Agamben, Benjamin, and Didi-Huberman, explores these questions in the context of contemporary Argentinean, Chilean, and Uruguayan poetry, short stories, novels, and films. Topics include post-dictatorship societies, text/image dynamics, new forms of subjectivity, human/post-human interactions, and economic and bio-political violence, as seen in works by Sergio Chejfec, Cristina Peri Rossi, Nadia Prado, Gabriela Cabezón Cámara, Pedro Lemebel, Fernanda Trías, and others. Taught in Spanish. (Same as: HISP 3249)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Fall 2021, Fall 2018.

LACL 3251 (c, IP) Attesting to Violence: Aesthetics of War and Peace in Contemporary Colombia

Non-Standard Rotation. Enrollment limit: 16.

The enduring armed conflict in Colombia has nurtured a culture of violence, with effects in every sector of society. Among its better-known actors are the leftist guerrillas, the right-wing paramilitary forces, and the national army, all influenced by the rise of drug trafficking in the Americas and by United States interventions. This course focuses on how contemporary Colombian writers and artists have responded to war, and how they resist the erasure of memory resulting from pervasive violence. In light of the most recent peace process, the course also examines how artists, activists, and civil society are using aesthetics, arts, and performance to face challenges such as healing the wounds of conflict and inventing peace in a society whose younger generations have no memory of life without violence. Materials include articles in the social sciences, movies, and TV series, along with literary works (Abad, García Márquez, Restrepo, and Vásquez, among others). (Same as: HISP 3251)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Spring 2019.

LACL 3252 (c, IP) The Battle of Chile: From Allende to Pinochet

Non-Standard Rotation. Enrollment limit: 16.

In 1970, the Chilean Salvador Allende became one of the first Marxists in the world to be democratically elected president of a country. His attempted reforms led to years of social unrest. In 1973, a right-wing military coup led to what would be General Augusto Pinochet's seventeen years of brutal dictatorship. This course discusses that period of Chilean (and Latin American) history through locally produced sources, both from the social sciences and the arts, with a focus on literature (Bolaño, Meruane, Lemebel, Neruda, Lihn) and cinema (Ruiz, Larraín), with the goal of understanding the ways in which Latin American nations deal with their historical past with regard to issues of memory, collective memory, postdictatorial political negotiations, human rights, and social reconciliation. (Same as: HISP 3252)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Spring 2019.

LACL 3254 (c, IP) Illegible Subjectivities?: Language, Identity and Politics in Contemporary Latin American Poetry

Every Other Year. Enrollment limit: 16.

Is poetic form political? How is subjectivity displayed in literary works that do not include narrations or "coherent" autobiographical plots? What connection does a museum of natural history have with poetry? How can language resist violence? This course explores these and other questions by studying different ways in which the relationship among subjectivity, language and politics has been rethought in contemporary Latin American poetry. We will address questions regarding self-figuration and the construction of a poetic persona through topics such as: biopolitical crisis; intersections of different genres and mediums (i.e., text/image relationships); post-human subjectivities; family genealogies; and writings about disease and death. Although we will read mainly poetry, the course will also include some fiction and films, as well as several theoretical readings. Some of the authors that we will read include Kamenszain, Gelman, Berenguer, Montalbetti, Watanabe, Lihn, and Prado. Taught in Spanish. (Same as: HISP 3254)

Prerequisites: Two of: either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher and either HISP 2409 (same as LAS 2409) or HISP 2410 (same as LAS 2410) or HISP 3200 or higher.

Previous terms offered: Spring 2020.

LACL 3259 (c) French Caribbean Intellectual Thought

Hanétha Vété-Congolo.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

An introduction to the main contemporary intellectual production emanating from the French Caribbean such as Haitian indigénisme and Martinican Négritude, Antillanité, and Créolité. Examines theoretical and literary texts by Jean Price-Mars, Jacques Roumain, Frantz Fanon, René Maran, Aimé Césaire, René Mesnil, Joseph Zobel, Édouard Glissant, or Patrick Chamoiseau. Addresses questions of collective identity, ethnicity, and cultural autonomy. (Same as: FRS 3219, AFRS 3219)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2020.

LACL 3307 (c, IP) Cultural History of Dictionaries in the Spanish-Speaking World

Non-Standard Rotation. Enrollment limit: 18.

The course is designed as a cultural history of Spanish language and cultures through its dictionaries, across time periods (early modern to more contemporary) examining questions of power and authority, collection practices, and how dictionaries change over time. The class will approach asymmetrical relationships between Spain and Latin America, Spanish and Spanglish in the US, and the political, social, and commercial value of language in these contexts. Bringing in the vocabularies of indigenous, enslaved Africans and immigrant languages, students will engage in an in-depth exploration of lexicographers including Antonio de Nebrija, Sebastián de Covarrubias, Andres Bello, and María Moliner. Key works include: *Tesoro de la Lengua Española o Castellana*, the *Diccionario de Autoridades*, the *Diccionario de la Lengua Española*, the *Moliner*, *Larousse*, and *Clave*. Course is taught in Spanish and will feature opportunities for collaboration with Ilan Stavans (Amherst) and his students on this topic. (Same as: HISP 3007)

Prerequisites: HISP 2409 (same as LACL 2409) or HISP 2410 (same as LACL 2410).

Previous terms offered: Fall 2021.

LACL 3342 (c, VPA) Advanced Afro-Modern: Dancing Towards Social Change

Non-Standard Rotation. Enrollment limit: 16.

This course fuses Afro-Diasporan aesthetics and cultural concepts with critical dance studies and US modern/post-modern/contemporary concert dance traditions. Students will engage with various Afro-based dance practitioners (such as Jawole Willa Jo Zollar), cultural praxes (such as Sankofa), and improvisational structures (such as Jamaican Dancehall and Haitian Yanvalou) to deepen their ability to create, rehearse, and perform original choreography, specifically for the purposes of advocating for social change and cross-cultural understanding. Using virtual, archival, digital, embodied, and scholarly research, students will learn about and generate performance material that is deeply connected to the histories, spaces, and places that we remember, take-up, and occupy. Students will also be expected to execute collaborations with each other and those within their communities as they create and perform movement for their final dance projects. (Same as: DANC 3242, AFRS 3242)

Prerequisites: DANC 1213 (same as AFRS 1213) or DANC 2241 (same as AFRS 2236) or DANC 1000 - 2969 or DANC 3000 or higher.

Previous terms offered: Spring 2022, Fall 2020.

LACL 3405 (c, DPI, VPA) Empathy and Protest in the Americas

Irina Popescu.

Non-Standard Rotation. Spring 2023. Enrollment limit: 16.

What is empathy? How does it relate to activism and protest in North and South America? What is the connection between empathy and the body? How did the concept of empathy begin and why? This seminar investigates how constructions of empathy are developed within literature, visual arts, film, and social media in the Americas from the nineteenth century to the present. Students will explore the interactions and relationships between empathy and the body, as well as the deep connections between empathy and human rights discourse in North and South America. In addition, students will examine how writers, journalists, artists, and activists use various modes of narrative empathy (fiction and nonfiction) and visual empathy (protest, art, photography, and film) to protest systems of political, social, and economic exclusion in the Americas.

LACL 3712 (b) Migrant Imaginaries

Non-Standard Rotation. Enrollment limit: 16.

Examines how immigrants view and transform the world around them in the United States. While normative approaches to the study of immigration construct migrants as objects of inquiry, this course instead will draw primarily on migrant perspectives and experiences in the diaspora that originate from Latin America, Asia, and Africa. (Same as: SOC 3410)

Prerequisites: Two of: SOC 1101 and SOC 2000 - 2969.

Previous terms offered: Fall 2019.

LACL 3720 (b) Youth and Agency in Insecure Times

Non-Standard Rotation. Enrollment limit: 16.

Explores research on youth as a window into broader questions related to agency, identity, and social, political, and economic inequality in the contemporary world. Youth move between families, communities, and nations; claim belonging to divergent communities; create distinct identities; and navigate hierarchies. Incorporates attention to culturally specific notions of childhood, adolescence, and adulthood while highlighting youth and children as social actors. Draws on theoretical approaches to agency, subjectivity, and resistance in late-twentieth and early twenty-first-century anthropology. Considers methodological and ethical implications of research with children and youth. Topics may include adoption, citizenship, migration, labor, reproductive politics, human trafficking, tourism, and activism in Latin America, as well as Asia, Oceania, and/or Africa. Hierarchies of gender, ethnicity, race, sexuality, class, and age are considered throughout. (Same as: ANTH 3320)

Prerequisites: ANTH 1101 or SOC 1101.

Previous terms offered: Spring 2020, Fall 2018.

Mathematics

Overview & Learning Goals

Overview

The mathematics major welcomes students from a broad range of backgrounds and driven by a diverse set of interests. It is designed with one common purpose: the pursuit of mathematics as a fundamental human endeavor with the ability to describe both the concrete and abstract aspects of the world around us. The power and utility of

mathematics comes from its analytical approach to problem-solving. Our courses and requirements develop the ability to reason from hypothesis to conclusion, to analyze and solve quantitative problems, and to clearly and precisely articulate the underlying thought process. Students are encouraged to explore a broad range of courses offered by the mathematics department. It is central to our mission as a research and educational department to offer support and encouragement so that each member of our community can succeed and thrive.

Learning Goals

Understanding Higher Mathematics

1. Understanding the need to **transition** from a procedural/computational understanding of mathematics to a broader **conceptual understanding** encompassing logical reasoning, generalization, abstraction, and formal proof.
2. Understanding the **core of mathematical culture**: the value and validity of careful reasoning, of precise definition, and close argument. Understanding mathematics as a growing body of knowledge, driven by creativity, a search for fundamental structure and interrelationships, and a methodology that is both powerful and intellectually compelling.
3. Understanding the fundamentals of **mathematical reasoning and logical argument**, including the role of hypotheses, conclusions, counterexamples, and other forms of mathematical evidence in the development and formulation of mathematical ideas.
4. Understanding the methods and fundamental role of mathematics in **modeling and solution** of critical real-world challenges in science and social science.
5. Understanding the basic insights and methods of a broad variety of mathematical areas. All students of mathematics must achieve such understanding in **calculus, naïve set and function theory, and linear algebra**; and, ideally, will further achieve such understanding in **probability and statistics, differential equations, analysis, and algebra**.
6. Understanding in greater depth of at least one important subfield of mathematics such as abstract algebra, real analysis, geometry, topology, statistics, optimization, modeling, numerical methods, and dynamical systems.

Skills Required for Effective Use of Mathematical Knowledge

1. **Problem-solving**—to develop confidence in one's ability to tackle difficult problems in both theoretical and applied mathematics; to translate between intuitive understandings and formal definitions and proofs; to formulate precise and relevant conjectures based on examples and counterexamples; to prove or disprove conjectures; to learn from failure; and to realize solutions are often multi-staged and require creativity, time, and patience.
2. **Modeling**—to interactively construct, modify, and analyze mathematical models of systems encountered in the natural

and social sciences; to assess a model's accuracy and usefulness; and to draw contextual conclusions from them.

3. **Technology**—to recognize and appreciate the important role of technology in mathematical work, and to achieve proficiency with the technological tools of most value in one's chosen area of concentration.
4. **Data and Observation**—to be cognizant of the uses of data and empirical observation in forming mathematical and statistical models, providing context for their use, and establishing their limits.
5. **Presentation**—to produce clear, precise, motivated, and well-organized expositions, in both written and oral form, using precise reasoning and genuine analysis.
6. **Mathematical Literature**—to know how to effectively search the mathematical literature and how to appropriately combine and organize information from a variety of sources.

Options for Majoring or Minor in the Department

Students may elect to major in mathematics, the computer science and mathematics interdisciplinary major, the mathematics and economics interdisciplinary major, the mathematics and education interdisciplinary major, or to coordinate a major in mathematics with digital and computational studies, education, or environmental studies. Students pursuing coordinate or interdisciplinary majors may not normally elect a second major. Non-majors may elect to minor in mathematics.

Department Website (<https://www.bowdoin.edu/math/>)

Faculty

Jennifer Taback, *Department Chair*

Suzanne M. Theberge, *Senior Department Coordinator*

Professors: Adam B. Levy†, Jennifer Taback, Mary Lou Zeeman

Associate Professors: Christopher Chong, John D. O'Brien, Thomas Pietraho

Assistant Professors: Eric Ramos, Chandrika Sadanand, Naomi Tanabe

Senior Lecturer: Eric C. Gaze

Lecturer: Michael King‡

Visiting Faculty: Ehssan Khanmohammadi, Adam Yassine

Faculty/Staff Website (<https://www.bowdoin.edu/math/faculty-and-staff/>)

Requirements

Mathematics Major

A major consists of at least nine courses numbered 1800 or higher.

Code	Title	Credits
Required Courses		
Two core major courses		2
MATH 2000	Linear Algebra	
MATH 2020	Introduction to Mathematical Reasoning	
at least one advanced course (3000–3969)		1
Select at least six additional courses numbered 1800 or higher.		6

Students who have mastered the material in MATH 2000 Linear Algebra prior to enrolling at Bowdoin may substitute another course numbered MATH 1800 Multivariate Calculus or higher if they have received an appropriate placement. The same holds for MATH 2020 Introduction to Mathematical Reasoning if they also obtain approval of the department chair. All students must submit a planned program of courses to the department when they declare a major.

The requirement of an advanced course (3000–3969) is meant to ensure that all majors have sufficient experience in at least one specific area of mathematics as listed below:

Code	Title	Credits
Algebra and Computation		
MATH 2502	Number Theory and Cryptography	
MATH 2602	Group Theory	
MATH 2702	Rings and Fields	
MATH 3602	Advanced Topics in Group Theory	
MATH 3702	Advanced Topics in Rings and Number Theory	
Analysis		
MATH 2303	Functions of a Complex Variable	
MATH 2603	Introduction to Analysis	
MATH 3303	Advanced Complex Analysis	
MATH 3603	Advanced Analysis	
Geometry and Topology		
MATH 2404	Geometry	
MATH 3204	Topology	
MATH 3404	Advanced Topics in Geometry	
Data and Machine Learning		
MATH 2301	Intermediate Linear Algebra	
MATH 2805	Mathematical principles of machine learning	
Combinatorics, Probability, and Statistics		
MATH 2206	Probability	
MATH 2601	Combinatorics and Graph Theory	
MATH 2606	Statistics	
MATH 3606	Advanced Topics in Probability and Statistics	
Differential Equations and Modeling		
MATH 1808	Biomathematics	
MATH 2208	Ordinary Differential Equations	
MATH 3108	Advanced Topics in Modeling	
MATH 3208	Advanced Topics in Dynamical Systems	
MATH 3209	Partial Differential Equations	
Operations Research		
MATH 2109	Optimization	
MATH 2209	Numerical Methods	
MATH 3109	Optimal Control	

Mathematics Minor

A minor in mathematics consists of a minimum of five courses numbered 1800 or higher.

Interdisciplinary Majors

The department participates in the interdisciplinary major programs of computer science and mathematics and mathematics and economics and mathematics and education. See the Interdisciplinary Majors

(<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/>).

Additional Information Additional Information and Department Policies

- Each of the courses required for the major or minor must be taken for a regular letter grade, not Credit/D/Fail, with a minimum earned grade of C-.
- At most, two of the nine courses required for the major, or one of the five courses required for the minor, can be transfer credits from other institutions.
- Independent studies and honors projects can count toward major and minor requirements with prior departmental approval. The department does not restrict the number of independent study and honors projects which count toward the major.
- Advanced Placement and International Baccalaureate scores, in addition to the mathematics placement questionnaire, are only used for placement.
- Courses from other departments or programs do not count toward the major or minor, but students may use mathematics courses toward another major or minor if that department or program allows.

Recommended Courses

Regardless of mathematical interests, students are encouraged to take a wide variety of courses in theoretical and applied mathematics as well as statistics. We offer the following suggestions for students exploring different career pathways open to mathematics majors. We encourage all majors and minors to develop a strong relationship with their departmental advisor as they formulate a curriculum for their goals.

Secondary Education

- Obtaining a broad base of knowledge in mathematics is important for secondary education, and recommended courses are listed as part of the m (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/#requirements>)athematics and education interdisciplinary major (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/#requirements>). There are two formal ways to combine interests in mathematics and education at Bowdoin, namely the mathematics and education interdisciplinary major, and the coordinate major with education. However, neither is formally required to pursue a career in secondary education.

Actuarial Mathematics

- Actuaries are leading professionals in finding ways to manage risk. In addition to courses in finance, economics, and computer science, students interested in actuarial science should include the following courses in their major: MATH 1800 Multivariate Calculus, MATH 2000 Linear Algebra, MATH 2206 Probability, MATH 2606 Statistics.

Engineering

- Mathematics provides a firm foundation for students interested in a degree in engineering and for participation in one of the shared studies programs between Bowdoin College and other institutions. For more information about the recommended coursework and its timing, please see the Engineering Dual-Degree Options section under Special Areas of Study (<https://bowdoin->

public.courseleaf.com/departments-programs/interdisciplinary-majors/#specialareasofstudytext).

Finance, Economics, and Operations Research

- Students interested in the fields of finance, economics, and operations research are encouraged to explore the courses required for the m (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/#requirementstext>) mathematics and economics interdisciplinary major (<https://bowdoin-public.courseleaf.com/departments-programs/interdisciplinary-majors/#requirementstext>).

Graduate Study in Mathematics

- Students interested in graduate study in mathematics should thoroughly explore the multiple perspectives present among courses offered by the department. Both breadth and depth in coursework are valuable. Ideally, MATH 2000 Linear Algebra and MATH 2020 Introduction to Mathematical Reasoning should be completed early in the major in order to meet the prerequisites of advanced courses. Students interested in graduate study in mathematics are encouraged to form close relationships with faculty in the department to receive mentoring and advice on their studies.

Statistics

- Students interested in pursuing studies in statistics or biostatistics are encouraged to enroll in courses from the following list: MATH 2000 Linear Algebra, MATH 2020 Introduction to Mathematical Reasoning, MATH 2206 Probability, MATH 2209 Numerical Methods, MATH 2301 Intermediate Linear Algebra, MATH 2603 Introduction to Analysis, MATH 2606 Statistics, MATH 3606 Advanced Topics in Probability and Statistics.

Information Security

- Mathematics is at the core of modern information security research, including cryptography and network analysis. Students interested in this field are encouraged to obtain a solid foundation in both theoretical and applied mathematics, supplemented with courses in the computer science department. Courses to support an interest in this field include the following: MATH 2000 Linear Algebra, MATH 2020 Introduction to Mathematical Reasoning, MATH 2206 Probability, MATH 2301 Intermediate Linear Algebra, MATH 2502 Number Theory and Cryptography, MATH 2601 Combinatorics and Graph Theory.

Data Science

- Understanding large data sets and drawing inferences and conclusions from their structure rely on an increasing variety of mathematical skills. The following courses in both theoretical and applied mathematics as well as statistics form a solid mathematical foundation in this area. MATH 2000 Linear Algebra, MATH 2020 Introduction to Mathematical Reasoning, MATH 2206 Probability, MATH 2301 Intermediate Linear Algebra, MATH 2601 Combinatorics and Graph Theory, MATH 2603 Introduction to Analysis, MATH 2606 Statistics, MATH 3606 Advanced Topics in Probability and Statistics. Students are also encouraged to complete coursework in computer science (<https://bowdoin-public.courseleaf.com/departments-programs/computer-science/>).

Theoretical Computer Science

- Students interested in a mathematical foundation complementing their studies in theoretical computer science are encouraged to explore courses from the following list: MATH 2000 Linear Algebra, MATH 2020 Introduction to Mathematical Reasoning,

MATH 2206 Probability, MATH 2209 Numerical Methods, MATH 2301 Intermediate Linear Algebra, MATH 2502 Number Theory and Cryptography, MATH 2601 Combinatorics and Graph Theory, MATH 2602 Group Theory, MATH 3602 Advanced Topics in Group Theory.

Information for Incoming Students (p. 317)

Understanding Mathematics Placements

- Math placements have two parts: mathematics recommendation(s), marked with an (M) and statistics recommendation(s), marked with an (S). Some of these recommendations might not be relevant for this year, but will help students when deciding to take a mathematics or statistics class in the future.
- Visit Bowdoin's Classfinder (<https://classfinder.bowdoin.edu/classfinder/>) for a description of all courses on offer currently.
- The Math Department understands that some high school calculus courses may not have covered the entire curriculum in a virtual or hybrid setting. Math placements reflect this. Our 2022-2023 calculus courses will provide ample opportunities for review and assistance.
- Students considering a major in economics, psychology, or sociology should probably refrain from initially enrolling in MATH 1300 Biostatistics or MATH 1400 Statistics in the Sciences as these majors have their own discipline-specific statistics courses (ECON 2557 Economic Statistics, PSYC 2520 Data Analysis, and SOC 2020 Quantitative Analysis in Sociology).
- Students receiving a placement of either MATH 1700 Integral Calculus, MATH 1750 Integral Calculus, Advanced Section, MATH 1800 Multivariate Calculus or MATH 2000 Linear Algebra and above who additionally have a year of high school or college biology are eligible to enroll in MATH 1808 Biomathematics. This course is appropriate for students interested in how differential calculus is used to address questions from biology.

Mathematics Placement Options

- See Chair of the Mathematics Department: please contact Professor Jennifer Taback (<https://www.bowdoin.edu/profiles/faculty/jtaback/>)
- See Director of Quantitative Reasoning: please contact Professor Eric Gaze (<https://www.bowdoin.edu/profiles/faculty/egaze/>)
- MATH 1050 Quantitative Reasoning is based on high school mathematical preparation and appropriate for students who may benefit from additional preparation before enrolling in further quantitative courses.
- MATH 1600 Differential Calculus is for students who have not yet seen calculus, or have seen up to one semester of calculus in high school.
- MATH 1700 Integral Calculus is for students who have had AB calculus or its equivalent in high school.
- MATH 1800 Multivariate Calculus is for students who have had BC calculus or its equivalent in high school. Student scores on the AP or IB exam do not affect this placement.
- MATH 2000 Linear Algebra/MATH 2020 Introduction to Mathematical Reasoning/MATH 2206 Probability is recommended for students with advanced preparation. These are courses for students who have already completed multivariate calculus. Students with this placement should attend the information session offered by the department outlining these courses.

Statistics Placement Options

- MATH 1050 Quantitative Reasoning is based on high school mathematical preparation and appropriate for students who may

benefit from additional preparation before enrolling in further quantitative courses.

- MATH 1300 Biostatistics is an introduction to the statistical methods used in the life sciences. The course assumes minimal or no background in calculus or statistics.
- MATH 1400 Statistics in the Sciences this is a more comprehensive introduction to statistics as it is used across the natural and social sciences and assumes some background in calculus or statistics.

Courses

MATH 1050 (a, MCSR) Quantitative Reasoning

Eric Gaze.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

Explores the ways and means by which we communicate with numbers; the everyday math we encounter on a regular basis. The fundamental quantitative skill set is covered in depth providing a firm foundation for further coursework in mathematics and the sciences. Topics include ratios, rates, percentages, units, descriptive statistics, linear and exponential modeling, correlation, logic, and probability. A project-based course using Microsoft Excel, emphasizing conceptual understanding and application. Reading of current newspaper articles and exercises involving personal finance are incorporated to place the mathematics in real-world context.

Prerequisites: Placement in MATH 1050 (S/M) or Placement in MATH 1050 or 1051 (S/M).

Previous terms offered: Spring 2022, Fall 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 1300 (a, MCSR) Biostatistics

Adam Yassine; Jack O'Brien.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

An introduction to the statistical methods used in the life sciences. Emphasizes conceptual understanding and includes topics from exploratory data analysis, the planning and design of experiments, probability, and statistical inference. One and two sample t-procedures and their non-parametric analogs, one-way ANOVA, simple linear regression, goodness of fit tests, and the chi-square test for independence are discussed. An average of four to five hours of class meetings and computer laboratory sessions per week. Not open to students who have credit for Economics 2557, Psychology 2520, or Mathematics 1200 or have credit or are concurrently enrolled in Mathematics 1400.

Prerequisites: MATH 1050 or MATH 1051 or Placement in MATH 1400 (S) or Placement in MATH 1300 or 1400 (S) or Placement in MATH 1300 (S) or Placement in MATH 1300 or 2206(S).

Previous terms offered: Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 1400 (a, MCSR) Statistics in the Sciences

Jack O'Brien.

Every Spring. Spring 2023. Enrollment limit: 30.

Formatted in consideration of the use of statistics as a means for principled argumentation in the natural and social sciences, and examines historical, computational, mathematical, and practical examples. Readings from the scientific literature are paired with techniques to interpret data in a variety of contexts. Explorations of the interconnections between statistics, mathematics, scientific practice, and computation underlie all aspects. Topics include: probability, Bayesian reasoning, random variables, standard statistical tests, such as t-tests, regression, and ANOVA, p-values, hypothesis testing, computation, data visualization, and scientific writing. Not open to students who have credit for Economics 2557, Psychology 2520, Mathematics 1200, or have credit or are concurrently enrolled in Mathematics 1300.

Prerequisites: MATH 1600 or MATH 1700 or MATH 1750 or MATH 1800 or Placement in MATH 1400 (S) or Placement in MATH 1300 or 1400 (S) or Placement in MATH 1400 or 2206 (S).

Previous terms offered: Spring 2022, Spring 2020, Spring 2019.

MATH 1600 (a, MCSR) Differential Calculus

Ehssan Khanmohammadi; Christopher Chong.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

Functions, including the trigonometric, exponential, and logarithmic functions; the derivative and the rules for differentiation; the anti-derivative; applications of the derivative and the anti-derivative. Four to five hours of class meetings and computer laboratory sessions per week, on average. Open to students who have taken at least three years of mathematics in secondary school.

Prerequisites: MATH 1050 or Placement in MATH 1600 (M) or PHYS 1093 (same as CHEM 1093) or MATH 1051.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 1610 (a) Emerging Scholars Differential Calculus Workshop

Eric Gaze.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 08. .5 Credit Credit/D/F Only.

Supplemental problem-solving workshop for differential calculus students. Concurrent enrollment in Math 1600 required. Enrollment by permission of instructor. One-half credit. Grading is Credit/D/Fail.

Prerequisites: MATH 1050 or Placement in MATH 1600 (M) or PHYS 1093 (same as CHEM 1093).

MATH 1700 (a, MCSR) Integral Calculus

Ehssan Khanmohammadi.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

The definite integral; the Fundamental theorems; improper integrals; applications of the definite integral; differential equations; and approximations including Taylor polynomials and Fourier series. An average of four to five hours of class meetings and computer laboratory sessions per week.

Prerequisites: MATH 1600 or Placement in MATH 1700 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 1710 (a) Emerging Scholars Integral Calculus Workshop

Eric Gaze.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 08. .5

Credit Credit/D/F Only.

Supplemental problem-solving workshop for integral calculus students. Concurrent enrollment in Math 1700 required. Enrollment by permission of instructor. One-half credit. Grading is Credit/D/Fail.

Prerequisites: MATH 1600 or Placement in MATH 1700 (M).

MATH 1750 (a, MCSR) Integral Calculus, Advanced Section

Adam Yassine.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

A review of the exponential and logarithmic functions, techniques of integration, and numerical integration. Improper integrals. Approximations using Taylor polynomials and infinite series. Emphasis on differential equation models and their solutions. An average of four to five hours of class meetings and computer laboratory sessions per week. Open to students whose backgrounds include the equivalent of Mathematics 1600 and the first half of Mathematics 1700. Designed for first-year students who have completed an AB Advanced Placement calculus course in their secondary schools.

Prerequisites: Placement in MATH 1750 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 1800 (a, MCSR) Multivariate Calculus

Thomas Pietraho; Mary Lou Zeeman; Adam Yassine.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

Multivariate calculus in two and three dimensions. Vectors and curves in two and three dimensions; partial and directional derivatives; the gradient; the chain rule in higher dimensions; double and triple integration; polar, cylindrical, and spherical coordinates; line integration; conservative vector fields; and Green's theorem. An average of four to five hours of class meetings and computer laboratory sessions per week.

Prerequisites: MATH 1700 or MATH 1750 or Placement in MATH 1800 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 1808 (a, MCSR) Biomathematics

Mary Lou Zeeman.

Every Fall. Spring 2023. Enrollment limit: 30.

A study of mathematical modeling in biology, with a focus on translating back and forth between biological questions and their mathematical representation. Biological questions are drawn from a broad range of topics, including disease, ecology, genetics, population dynamics, and neurobiology. Mathematical methods include discrete and continuous (ODE) models and simulation, box models, linearization, stability analysis, attractors, oscillations, limiting behavior, feedback, and multiple time-scales. Within the biology major, this course may count as the mathematics credit or as biology credit, but not both. Students are expected to have taken a year of high school or college biology prior to this course. (Same as: BIOL 1174)

Prerequisites: MATH 1600 or higher or Placement in MATH 1700 (M) or Placement in MATH 1750 (M) or Placement in MATH 1800 (M) or Placement in 2000, 2020, 2206 (M) or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

MATH 2000 (a, MCSR) Linear Algebra

Naomi Tanabe; Eric Ramos.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

A study of linear algebra in the context of Euclidean spaces and their subspaces, with selected examples drawn from more general vector spaces. Topics will include: vectors, linear independence and span, linear transformations, matrices and their inverses, bases, dimension and rank, determinants, eigenvalues and eigenvectors, diagonalization and change of basis, and orthogonality. Applications drawn from linear systems of equations, discrete dynamical systems, Markov chains, computer graphics, and least-squares approximation.

Prerequisites: MATH 1800 or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 2020 (a, MCSR) Introduction to Mathematical Reasoning

Jennifer Taback; Chandrika Sadanand.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 20.

An introduction to logical deductive reasoning and mathematical proof through diverse topics in higher mathematics. Specific topics include set and function theory, modular arithmetic, proof by induction, and the cardinality of infinite sets. May also consider additional topics such as graph theory, number theory, and finite state automata.

Prerequisites: MATH 1800 or Placement in 2000, 2020, 2206 (M) or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 2109 (a, MCSR) Optimization

Every Other Spring. Enrollment limit: 30.

A study of optimization problems arising in a variety of situations in the social and natural sciences. Analytic and numerical methods are used to study problems in mathematical programming, including linear models, but with an emphasis on modern nonlinear models. Issues of duality and sensitivity to data perturbations are covered, and there are extensive applications to real-world problems.

Prerequisites: MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2021, Fall 2020, Fall 2019, Spring 2019.

MATH 2206 (a, MCSR) Probability

Eric Ramos; Jack O'Brien.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35.

A study of the mathematical models used to formalize nondeterministic or "chance" phenomena. General topics include combinatorial models, probability spaces, conditional probability, discrete and continuous random variables, independence and expected values. Specific probability densities, such as the binomial, Poisson, exponential, and normal, are discussed in depth.

Prerequisites: MATH 1800 or Placement in MATH 1300 or 2206(S) or Placement in MATH 1400 or 2206 (S) or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 2208 (a, MCSR) Ordinary Differential Equations

Christopher Chong.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 30.

A study of some of the ordinary differential equations that model a variety of systems in the physical, natural and social sciences. Classical methods for solving differential equations with an emphasis on modern, qualitative techniques for studying the behavior of solutions to differential equations. Applications to the analysis of a broad set of topics, including population dynamics, oscillators and economic markets. Computer software is used as an important tool, but no prior programming background is assumed.

Prerequisites: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MATH 2209 (a, MCSR) Numerical Methods

Every Other Spring. Enrollment limit: 30.

An introduction to the theory and application of numerical analysis. Topics include approximation theory, numerical integration and differentiation, iterative methods for solving equations, and numerical analysis of differential equations.

Prerequisites: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M).

Previous terms offered: Spring 2022, Spring 2020, Fall 2018.

MATH 2301 (a, MCSR) Intermediate Linear Algebra

Eric Ramos.

Every Other Spring. Fall 2022. Enrollment limit: 35.

A continuation of Linear Algebra focused on the interplay of algebra and geometry as well as mathematical theory and its applications. Topics include matrix decompositions, eigenvalues and spectral theory, vector and Hilbert spaces, norms and low-rank approximations. Applications to biology, computer science, economics, and statistics, including artificial learning and pattern recognition, principal component analysis, and stochastic systems. Course and laboratory work balanced between theory and application.

Prerequisites: Two of: MATH 2000 or Placement in MATH 2020 or 2206 (M) and MATH 2020.

Previous terms offered: Spring 2020.

MATH 2303 (a, MCSR) Functions of a Complex Variable

Every Other Fall. Enrollment limit: 35.

The differential and integral calculus of functions of a complex variable. Cauchy's theorem and Cauchy's integral formula, power series, singularities, Taylor's theorem, Laurent's theorem, the residue calculus, harmonic functions, and conformal mapping.

Prerequisites: MATH 1800 or Placement in 2000, 2020, 2206 (M) or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2022, Fall 2019, Fall 2018.

MATH 2404 (a, MCSR) Geometry

Chandrika Sadanand.

Every Other Spring. Spring 2023. Enrollment limit: 30.

A survey of modern approaches to Euclidean geometry in two dimensions. Axiomatic foundations of metric geometry. Transformational geometry: isometries and similarities. Klein's Erlanger Programm. Symmetric figures. Other topics may be chosen from three-dimensional geometry, ornamental groups, area, volume, fractional dimension, and fractals.

Prerequisites: MATH 2020.

Previous terms offered: Spring 2022, Fall 2020, Fall 2019.

MATH 2502 (a, MCSR) Number Theory and Cryptography

Every Other Spring. Enrollment limit: 30.

A survey of number theory from Euclid's proof that there are infinitely many primes through Wiles's proof of Fermat's Last Theorem in 1994. Prime numbers, unique prime factorization, and results on counting primes. The structure of modular number systems. Continued fractions and "best" approximations to irrational numbers. Investigation of the Gaussian integers and other generalizations. Squares, sums of squares, and the law of quadratic reciprocity. Applications to modern methods of cryptography, including public key cryptography and RSA encryption.

Prerequisites: MATH 2020.

Previous terms offered: Spring 2021, Spring 2019.

MATH 2601 (a, MCSR) Combinatorics and Graph Theory

Eric Ramos.

Every Other Year. Spring 2023. Enrollment limit: 35.

An introduction to combinatorics and graph theory. Topics to be covered may include enumeration, matching theory, generating functions, partially ordered sets, Latin squares, designs, and graph algorithms.

Prerequisites: Two of: MATH 2020 and MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Fall 2021, Spring 2020.

MATH 2602 (a, MCSR) Group Theory

Jennifer Taback.

Every Other Fall. Fall 2022. Enrollment limit: 35.

An introduction to the theory of finite and infinite groups, with examples ranging from symmetry groups to groups of polynomials and matrices. Properties of mappings that preserve algebraic structures are studied. Topics include cyclic groups, homomorphisms and isomorphisms, normal subgroups, factor groups, the structure of finite abelian groups, and Sylow theorems.

Prerequisites: Two of: MATH 2000 or Placement in MATH 2020 or 2206 (M) and MATH 2020.

Previous terms offered: Fall 2021, Fall 2019, Fall 2018.

MATH 2603 (a, MCSR) Introduction to Analysis

Thomas Pietraho.

Every Fall. Fall 2022. Enrollment limit: 35.

Building on the theoretical underpinnings of calculus, develops the rudiments of mathematical analysis. Concepts such as limits and convergence from calculus are made rigorous and extended to other contexts, such as spaces of functions. Specific topics include metric spaces, point-set topology, sequences and series, continuity, differentiability, the theory of Riemann integration, and functional approximation and convergence.

Prerequisites: Two of: MATH 2020 and MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Fall 2021, Spring 2021, Fall 2019, Fall 2018.

MATH 2606 (a, MCSR) Statistics

Jack O'Brien.

Every Spring. Spring 2023. Enrollment limit: 35.

An introduction to the fundamentals of mathematical statistics. General topics include likelihood methods, point and interval estimation, and tests of significance. Applications include inference about binomial, Poisson, and exponential models, frequency data, and analysis of normal measurements.

Prerequisites: MATH 2206.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

MATH 2702 (a, MCSR) Rings and Fields

Every Other Fall. Enrollment limit: 35.

An introduction to algebraic structures based on the study of rings and fields. Structure of groups, rings, and fields, with an emphasis on examples. Fundamental topics include: homomorphisms, ideals, quotient rings, integral domains, polynomial rings, field extensions. Further topics may include unique factorization domains, rings of fractions, finite fields, vector spaces over arbitrary fields, and modules. Mathematics 2502 is helpful but not required.

Prerequisites: Two of: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and MATH 2020.

Previous terms offered: Fall 2020.

MATH 2805 (a, MCSR) Mathematical principles of machine learning

Thomas Pietraho.

Every Other Spring. Spring 2023. Enrollment limit: 30.

An introduction to the mathematical theory and practice of machine learning. Supervised and unsupervised learning problems, including regression, classification, clustering, and component analysis, focusing on techniques most relevant to the study and applications of neural networks. Additional topics may include dimension reduction, data visualization, denoising, norms and loss functions, optimization, universal approximation theorems, and algorithmic fairness. Class will include computer lab and projects, but no formal programming experience is necessary.

Prerequisites: MATH 2603.

Previous terms offered: Spring 2022.

MATH 3108 (a) Advanced Topics in Modeling

Every Other Spring. Enrollment limit: 16.

A study of mathematical modeling, with emphasis on how to identify scientific questions appropriate for modeling, how to develop a model appropriate for a given scientific question, and how to interpret model predictions. Applications drawn from the natural, physical, environmental, and sustainability sciences. Model analysis uses a combination of computer simulation and theoretical methods and focuses on predictive capacity of a model.

Prerequisites: Three of: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and MATH 2020 and MATH 2208.

Previous terms offered: Spring 2022, Fall 2019.

MATH 3109 (a) Optimal Control

Every Other Fall. Enrollment limit: 16.

A study of infinite-dimensional optimization, including calculus of variations and optimal control. Classical, analytic techniques are covered, as well as numerical methods for solving optimal control problems. Applications in many topic areas, including economics, biology, and robotics.

Prerequisites: Three of: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and MATH 2020 and MATH 2208.

Previous terms offered: Fall 2021, Spring 2019.

MATH 3204 (a) Topology

Chandrika Sadanand.

Every Other Fall. Fall 2022. Enrollment limit: 16.

A mathematical study of shape. Examination of surfaces, knots, and manifolds with or without boundary. Topics drawn from point-set topology, algebraic topology, knot theory, and computational topology, with possible applications to differential equations, graph theory, topological data analysis, and the sciences.

Prerequisites: Three of: MATH 2000 or Placement in MATH 2020 or 2206 (M) and MATH 2020 and either MATH 2602 or MATH 2603 or MATH 2702.

Previous terms offered: Spring 2021.

MATH 3208 (a) Advanced Topics in Dynamical Systems

Mary Lou Zeeman.

Every Other Spring. Fall 2022. Enrollment limit: 16.

A study of nonlinear dynamical systems arising in applications, with emphasis on modern geometric, topological, and analytical techniques to determine global system behavior, from which predictions can be made. Topics chosen from local stability theory and invariant manifolds, limit cycles and oscillation, global phase portraits, bifurcation and resilience, multiple time scales, and chaos. Theoretical methods supported by simulations. Applications drawn from across the sciences.

Prerequisites: Four of: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and MATH 2020 and MATH 2208 and MATH 2603.

Previous terms offered: Spring 2020.

MATH 3209 (a) Partial Differential Equations

Christopher Chong.

Every Other Fall. Spring 2023. Enrollment limit: 16.

A study of some of the partial differential equations that model a variety of systems in the natural and social sciences. Classical methods for solving partial differential equations are covered, as well as modern, numerical techniques for approximating solutions. Applications to the analysis of a broad set of topics, including air quality, traffic flow, and imaging. Computer software is used as an important tool.

Prerequisites: Three of: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and MATH 2020 and MATH 2208.

Previous terms offered: Spring 2021, Fall 2020, Fall 2018.

MATH 3303 (a, MCSR) Advanced Complex Analysis

Naomi Tanabe.

Every Other Spring. Fall 2022. Enrollment limit: 16.

A second course in complex analysis. Topics may include conformal mappings, harmonic functions, and analytic functions. Applications drawn from boundary value problems, elliptic functions, two-dimensional potential theory, Fourier analysis, and topics in analytic number theory.

Prerequisites: Three of: MATH 2020 and MATH 2303 and MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2020, Spring 2019.

MATH 3404 (a) Advanced Topics in Geometry

Every Other Fall. Enrollment limit: 16.

An introduction to advanced topics in geometry, including Euclidean and non Euclidean geometries in two dimensions, unified by the transformational viewpoint of Klein's Erlangen Program. Additional topics will vary by instructor and may include isometry groups of Euclidean and hyperbolic spaces, alternate models of hyperbolic geometry, differential geometry and projective geometry. Math 2404, or any higher numbered course, is helpful but not required.

Prerequisites: Two of: MATH 2000 or Placement in MATH 2020 or 2206 (M) or Placement in 2000, 2020, 2206 (M) and MATH 2020.

Previous terms offered: Fall 2021, Fall 2020, Fall 2018.

MATH 3602 (a) Advanced Topics in Group Theory

Jennifer Taback.

Every Other Spring. Spring 2023. Enrollment limit: 16.

The study of group actions on geometric objects; understanding finite and discrete groups via generators and presentations. Applications to geometry, topology, and linear algebra, focusing on certain families of groups. Topics may include Cayley graphs, the word problem, growth of groups, and group representations.

Prerequisites: Three of: MATH 2602 and MATH 2020 and MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2022, Spring 2019.

MATH 3603 (a) Advanced Analysis

Every Other Spring. Enrollment limit: 16.

Measure theory and integration with applications to probability and mathematical finance. Topics include Lebesgue measure and integral, measurable functions and random variables, convergence theorems, analysis of random processes including random walks and Brownian motion, and the Ito integral.

Prerequisites: Three of: MATH 2020 and MATH 2603 and MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2022, Spring 2020.

MATH 3606 (a) Advanced Topics in Probability and Statistics

Every Other Fall. Enrollment limit: 16.

One or more specialized topics in probability and statistics. Possible topics include regression analysis, nonparametric statistics, logistic regression, and other linear and nonlinear approaches to modeling data. Emphasis is on the mathematical derivation of the statistical procedures and on the application of the statistical theory to real-life problems.

Prerequisites: Three of: MATH 2020 and MATH 2606 and MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Fall 2021, Fall 2019.

MATH 3702 (a) Advanced Topics in Rings and Number Theory
Every Other Spring. Enrollment limit: 16.

Advanced topics in modern algebra based on rings and fields. Possible topics include: Galois theory with applications to geometric constructions and (in)solvability of polynomial equations; algebraic number theory and number fields such as the p-adic number system; commutative algebra; algebraic geometry and solutions to systems of polynomial equations.

Prerequisites: Three of: MATH 2020 and MATH 2702 and MATH 2000 or Placement in MATH 2020 or 2206 (M).

Previous terms offered: Spring 2021.

Middle Eastern and North African Studies

Overview & Learning Goals

Middle Eastern and North African Studies (p. 323)

For centuries, and still today, the Middle East and North Africa have been the site of major civilizations that have attracted attention from afar.

Bowdoin College's program in Middle Eastern and North African studies oversees students' interdisciplinary study of this region. Students minoring in Middle Eastern and North African studies take courses in a Middle Eastern language and in relevant courses in at least two other disciplines.

Middle Eastern and North African studies minors will improve their ability to analyze historic and current events in the region, and will understand how accurate, informed conclusions require both nuance and a recognition of complexity.

Options for Minor in the Program

Students may elect to minor in Middle Eastern and North African studies. Bowdoin does not offer a major in Middle Eastern and North African studies.

Program Website (<https://www.bowdoin.edu/mena/>)

Arabic (p. 323)

Bowdoin offers courses in Arabic language, literature, and culture as part of the Middle Eastern and North African Studies program.

Students will learn how important Arabic is for a deeper understanding of the history, politics, society, and culture of most Middle Eastern and North African countries. Arabic minors will enhance their awareness of global diversity by learning more about how important foreign languages are to imagining and understanding others' perspectives.

In addition to focusing on developing students' fluency in Arabic, the minor provides students with a broad understanding of the cultures and literatures of the Middle East and North Africa through a curriculum designed to prepare students for international work or graduate study.

Bowdoin is able to accommodate students at all levels, from absolute beginners with no previous exposure to the language to students with near-native fluency in Arabic prepared to undertake in-depth study of the

literature produced by this vibrant, exceptionally rich culture over the past fifteen hundred years.

Options for Minor in the Program

Students may elect to minor in Arabic. Bowdoin does not offer a major in Arabic.

Minor Website (<https://www.bowdoin.edu/arabic/>)

Faculty

Robert G. Morrison, *Program Director*
Marybeth Bergquist, *Program Coordinator*

Professor: Robert G. Morrison (Religion)
Assistant Professor: Nasser Abourahme
Lecturer: Batool Khattab (Arabic)
Fellow: Paige Milligan (Arabic)

Contributing Faculty: Oyman Basaran, Meryem Belkaïd, Barbara Elias†, David Gordon, Ayodeji Ogunnaike*, Rachel Sturman**

Middle Eastern and North African Studies Faculty/Staff Website (<https://www.bowdoin.edu/mena/faculty-and-staff/>)

Arabic Faculty/Staff Website (<https://www.bowdoin.edu/arabic/faculty-and-staff/>)

Requirements

Middle Eastern and North African Studies Minor

Students interested in Middle Eastern and North African studies should contact Robert G. Morrison (<https://www.bowdoin.edu/profiles/faculty/rgmorrison/>), professor of religion.

Requirements for the Minor in Middle Eastern and North African Studies

By studying the languages and cultures of a region outside of Europe and North America, Middle East and North African (MENA) studies minors enhance their awareness of global diversity and learn about the importance of language to understanding other perspectives. MENA minors also improve their ability to analyze historic and current events in the region, and understand how accurate, informed conclusions require both nuance and a recognition of complexity.

The minor consists of five courses.

Required courses:

Code	Title	Credits
Select two courses in a single Middle Eastern language ^a		2
ARBC 1101	Elementary Arabic I	
ARBC 1102	Elementary Arabic II	
ARBC 2203	Intermediate Arabic I	
ARBC 2204	Intermediate Arabic II	
ARBC 2305	Advanced Arabic	
ARBC 2306	Advanced Arabic II	

Code	Title	Credits
Select three courses in the cultures of the Middle East and North Africa ^b		3

FRS 3216	North African Cinema: From Independence to the Arab Spring
GSWS 2701	Muslim Women: Contemporary Challenges and Activism
GOV 2690	Islam and Politics
HIST 2365	The Rise of Swahili Civilization
MENA 2350	Modern Middle Eastern and North African History
MENA 2620	Race and Settler Colonialisms, Today
REL 1150	Introduction to the Religions of the Middle East
REL 2208	Islam
REL 2209	Gender and Islam
REL 2210	An Introduction to Sufism and Islamic Mysticism
REL 2232	Approaches to the Qur'an
REL 2237	Judaism Under Islam
REL 3333	Islam and Science
SOC 2260	Capitalism, Modernity, and Religion in Turkey
SOC 2380	Gender in the Middle East

- a Bowdoin offers Arabic, but Hebrew, Turkish, and Persian studied off-campus could count, with prior approval. Please see the program director for information about other middle eastern languages.
- b These are examples of courses that fulfill this requirement. Students should consult the program director for more information about additional course options and note that any course offered in or cross-listed with MENA will satisfy this requirement. Two of the three courses must be from two different Bowdoin departments/programs and no more than one course may be taken at the 1100 level.

Arabic Minor

Requirements for the Minor in Arabic

Students interested in Arabic should contact Batool Khattab (<https://www.bowdoin.edu/profiles/faculty/bkhattab/>), lecturer in Arabic, or Marybeth Bergquist (<https://www.bowdoin.edu/profiles/staff/mbergqui/>), academic department coordinator.

Arabic minors attain a basic level of proficiency in one of the world's most difficult languages and also learn how important Arabic is for a deeper understanding of the history, politics, society, and culture of most Middle Eastern and North African countries. Arabic minors enhance their awareness of global diversity by learning more about how important foreign languages are to imagining and understanding other perspectives.

The minor consists of five courses.

Required courses:

- Four courses in Arabic instruction (two years, beginning at the level into which the student is placed)
- A fifth course focusing on any aspect of the cultures of the Middle East or North Africa (such as a course in philosophy, religion, literature, history, or politics) at the 2000 or 3000 level.

Code	Title	Credits
Select four courses in Arabic instruction ^a		4
ARBC 1101	Elementary Arabic I

ARBC 2305	Advanced Arabic
ARBC 2306	Advanced Arabic II

Select one course in the cultures of the Middle East and North Africa ^b 1

- a Two years of instruction, beginning at the level into which the student is placed
- b Must be taken at the 2000 or 3000 level. This course may focus on any aspect of the cultures of the Middle East or North Africa, such as a course in history, literature, philosophy, politics, or religion. Students should consult the program director for guidance on course selection.

Additional Information

Middle Eastern and North African Studies

- No more than one independent study may be counted toward the minor.
- Courses that count toward the minor must be taken for regular letter grades, not Credit/D/Fail, and students must earn grades of C- or better in these courses.
- First-year writing seminars do not count toward the minor.
- Up to two courses taken at another college or university can count toward the minor with prior approval by the Middle Eastern and North African Studies Committee.
- No courses applied to the minor may be double-counted toward the student's major.

Information for Incoming Students (p. 324)

There are two pathways into the MENA minor. The first is through the study of the Arabic language. Students interested in Arabic typically enroll in ARBC 1101 Elementary Arabic I in the first year. Students with prior knowledge of Arabic should contact Professor Batool Khattab (<https://www.bowdoin.edu/profiles/faculty/bkhattab/>) for more information and a determination of placement into the language courses. The second pathway into the MENA minor is through courses in other departments. In fall 2022, MENA courses include: MENA 2350 Modern Middle Eastern and North African History, MENA 2620 Race and Settler Colonialisms, Today, and REL 2232 Approaches to the Qur'an.

Students are welcome to contact Professor Robert Morrison (<https://www.bowdoin.edu/profiles/faculty/rgmorriss/>) with any questions about the MENA program.

Arabic

- No more than one independent study may be counted toward the minor.
- Courses that count toward the minor must be taken for regular letter grades, not Credit/D/Fail, and students must earn grades of C- or better in these courses.
- Up to two courses taken at another college or university can count toward the minor with prior approval by the Middle Eastern and North African Studies Committee.
- First-year writing seminars do not count toward the minor.

- No courses applied to the minor may be double-counted toward the student's major.

Information for Incoming Students (p. 325)

Bowdoin students have the opportunity to study the Arabic language at the elementary, intermediate, and advanced level with an exposure to the Levantine and Egyptian spoken dialects. The starting point varies based on each students' previous experience, but most start with ARBC 1101 Elementary Arabic I and ARBC 1102 Elementary Arabic II in their first year and continue with ARBC 2203 Intermediate Arabic I and ARBC 2204 Intermediate Arabic II in their second year.

These rigorous elementary and intermediate level courses are conducted primarily in Arabic and ensure that students have acquired a solid foundation in both grammar and vocabulary before moving on to the advanced level with ARBC 2305 Advanced Arabic and ARBC 2306 Advanced Arabic II. Advanced Arabic, taught exclusively in the language, is typically taken in the third or fourth year of study, and provides additional exposure to authentic reading and audio-visual materials. All language courses will also aim to develop students' cultural literacy of the Arab region as they progress through the curriculum.

Interested students should contact Professor Batool Khattab (<https://www.bowdoin.edu/profiles/faculty/bkhattab/>) for more information and a determination of placement into the language courses.

Courses Arabic

ARBC 1101 (c) Elementary Arabic I

Paige Milligan.

Every Fall. Fall 2022. Enrollment limit: 18.

An introductory course that presumes no previous knowledge of Arabic. Students begin to acquire an integrated command of speaking, reading, writing, and listening skills in Modern Standard Arabic. Some exposure to Egyptian Colloquial Arabic as well. Class sessions conducted primarily in Arabic.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ARBC 1102 (c) Elementary Arabic II

Paige Milligan.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Elementary Arabic I, focuses on further developing students' skills in speaking, listening, comprehending, writing, and reading Modern Standard Arabic.

Prerequisites: ARBC 1101.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ARBC 1103 Introduction to Egyptian Colloquial Arabic

Batool Khattab.

Non-Standard Rotation. Spring 2023. Enrollment limit: 18.

This course introduces the students to the contemporary Egyptian colloquial Arabic. The Egyptian dialect is the most widely spoken across the Arab world. Thus, it is a useful dialect not just in Egypt but in most Arabic speaking countries. Throughout the course, there will be a particular emphasis on building up knowledge of spoken grammar and vocabulary as used by native speakers. Students develop interactive communicative skills through active participation in task-based conversations, listening comprehension and vocabulary building activities. Resources may include authentic audio-visual materials, movie screenings, snippets of popular culture and excerpts of oral literary works. By simulating real-life situations through role-play among a number of crafted pedagogical strategies, students will develop proficiency in practicing the conversational Egyptian Arabic. This course is intended for beginners though students at higher levels are welcome to join.

ARBC 2038 (c, DPI, IP) The Modern Arabic Novel

Non-Standard Rotation. Enrollment limit: 35.

Examines the development and proliferation of the Arabic novel during the post-World War II period. Edward Said's statement that narratives "become the method colonized people use to assert their own identity and the existence of their own history" is the point of departure. Illustrates how the discourses and ideologies of colonialism influence the modern Arabic novel. Focuses on themes of struggle, resistance, nationalism, migration, and gender equality. Novels studied may include Naji#b Maḥfu#z's Midaq Alley, Ghassa#n Kanafa#ni's Men in the Sun, Aṭ-Ṭayyib Ṣa#liḥ's Season of Migration to the North, #Abd al-Raḥma#n Muni#f's Endings, Ḥana#n Shaykh's The Story of Zahra, Ahlem Mosteghanemi's Memory in the Flesh, and Aḥmad Sa#da#wi's Frankenstein in Baghdad. Taught in English. (Same as: MENA 2356)

Previous terms offered: Spring 2022.

ARBC 2203 (c) Intermediate Arabic I

Paige Milligan.

Every Fall. Fall 2022. Enrollment limit: 18.

A continuation of first-year Arabic, aiming to enhance proficiency in listening, speaking, reading, and writing through the study of more elaborate grammar structures and exposure to more sophisticated, authentic texts.

Prerequisites: ARBC 1102.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ARBC 2204 (c) Intermediate Arabic II

Batool Khattab.

Every Spring. Spring 2023. Enrollment limit: 18.

A continuation of Intermediate Arabic I, provides a more in-depth understanding of Modern Standard Arabic. Aims to enhance proficiency in speaking, listening, reading, and writing through the study of more elaborate grammatical structures and sophisticated, authentic texts. Textbook material supplemented by readings from the Qur'an, the hadith, and early Arabic poetry.

Prerequisites: ARBC 2203.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ARBC 2205 (c, IP) Islands: Poetics of the Insular in World Literature

Non-Standard Rotation. Enrollment limit: 35.

From idealized innocence to invoked fear of the unknown, and through double meanings of isolation and connection, this course focuses on islands in world literatures. Through writings that span the medieval, early modern and modern periods, the course uncovers complex meanings associated with islands and insular forms. Focusing on the interplay between geography and imagination in literature, it raises questions about knowledge and uncertainty, spirituality and encounter, identity and difference, and empire and the nation, as well as conflicts between land and water, selfhood and otherness. The course engages such works as Aldous Huxley's *Island*, the *Sinbad Seven Voyages*, al-Hariri's "Maqama of Oman," Ibn Tufayl's *Hayy Ibn Yaqzan*, Abdulrazak Gurnah's *Gravel Heart*, and Rokeya Sakhawat Hossain's *Sultana's Dream*, among others. All texts will be taught in English. Students of Arabic read and talk about original Arabic texts in an add-on section.

Previous terms offered: Spring 2021.

ARBC 2305 (c, IP) Advanced Arabic

Batool Khattab.

Every Fall. Fall 2022. Enrollment limit: 18.

Continues the "Al-Kitaab" series to take students to an intermediate or high-intermediate level of proficiency. Reading, writing, speaking, and listening activities cover a variety of topics and rely on authentic, unedited materials

Prerequisites: ARBC 2204.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

ARBC 2306 (c) Advanced Arabic II

Batool Khattab.

Every Spring. Spring 2023. Enrollment limit: 18.

Continues the "Al-Kitaab" series to take students to high-intermediate level of proficiency. Reading, writing, speaking, and listening activities cover a variety of topics and rely on authentic, unedited materials. It is a continuation of Advanced Arabic I.

Prerequisites: ARBC 2204.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

ARBC 2350 (c, IP) Myth in Arabic Literature: From the Qur'an to Modern Poetry and Prose

Non-Standard Rotation. Enrollment limit: 35.

Examines various myths in Arabic literature in translation. Discusses how myths of different origins (Ancient Near East, Greco-Roman Mediterranean, Ancient Arabia, Iran, India, Judeo-Christian traditions) have been reinterpreted and used in Arabic-speaking cultures from the sixth until the twenty-first century, to deal with questions such as the struggle of people against gods, their defiance against fate, their quest for salvation, their pursuit of a just society, and their search for identity. Explores various genres of Arabic literature from the Qur'an, the hadith (i.e., prophetic sayings), ancient and modern poetry, medieval prose and travel literature, "1001 Nights", Egyptian shadow theater, and modern short stories and novels. In this way, presents Arabic literature as global, rooted in different ancient traditions and dealing with the perennial questions of humanity. (Same as: CLAS 2350, REL 2350)

Previous terms offered: Spring 2019.

ARBC 2354 (c, IP) On the Road: Travel Writing and the Cosmopolitan World of Medieval Islam

Non-Standard Rotation. Enrollment limit: 25.

Islamic medieval writings of travelers, explorers, and exiles present a cosmopolitan world of encounters of peoples and cultures. This 2000-level course uses these accounts as an entryway to the history of medieval Islam. We will consider how and why Islam emerged in seventh-century Arabia and follow its path through the Mongol expansion in the fourteenth century. We will examine the impact of the Islamic empire on the medieval Middle East, as it spread across most of the known world from Spain to India, and the cultural practices that it developed to manage cultural difference. The readings, lectures, and class discussions will focus on primary sources: the accounts of Muslims, Jews, and Christians who traveled the length and breadth of the Islamic empire. Emphasis on the interconnectedness of the medieval world and on narratives of inclusion and exclusion. Taught in English. For advanced Arabic students, Arabic 3354 with an Arabic reading and writing component will be offered concurrently with this course. Note: This course fulfills the premodern and non euro/us requirement for history majors and minors. (Same as: HIST 2440, REL 2354)

Previous terms offered: Spring 2020.

ARBC 3354 (c, IP) On the Road: Travel Writing and the Cosmopolitan World of Medieval Islam

Non-Standard Rotation. Enrollment limit: 15.

Students enrolled in this course will attend all regular class meetings of ARBC 2354, but will additionally meet once a week as a separate group to read and discuss primary sources in the original Arabic. Some short written assignments will be submitted in Arabic. Please refer to ARBC 2354 for a complete course description. (Same as: REL 2355)

Prerequisites: Five of: ARBC 1101 and ARBC 1102 and ARBC 2203 and ARBC 2204 and ARBC 2305.

Previous terms offered: Spring 2020.

Middle Eastern and North African Studies

MENA 2126 (c, IP, VPA) Arts of the Islamic Book

Non-Standard Rotation. Enrollment limit: 15.

Books are a way of containing and circulating knowledge, but are also objects to be studied in their own right. The richly illuminated manuscripts produced throughout the Islamic world offer an opportunity to study calligraphy, painting, and ornament in their artistic and cultural contexts. Focusing on the collections of the Bowdoin College Museum of Art, this course presents and in-depth examination of the diverse visual traditions and techniques developed over from the ninth to the nineteenth centuries in the Middle East, North Africa, Central Asia, and the Indian subcontinent. Students in this hybrid lecture/seminar will acquire a broad base of knowledge, while exploring material and thematic topics more deeply through readings, discussions, and hands-on workshops. No foreign language knowledge is necessary, but at least one previous class in Art History, Asian Studies, or Middle East/North African Studies is required. (Same as: ARTH 2126, ASNS 2755)

Prerequisites: ARTH 1000 - 2969 or ARTH 3000 or higher or ASNS 1000 - 2969 or ASNS 3000 or higher or MENA 1000 - 2969 or MENA 3000 or higher.

Previous terms offered: Spring 2022.

MENA 2210 (c, IP) An Introduction to Sufism and Islamic Mysticism

Non-Standard Rotation. Enrollment limit: 35.

Explores, historically, the development and growth of Sufism and other esoteric movements of Islam. Questions that will arise include: Why is Sufism important for Sufis? Why is Sufism popular in modernity? How do we study religious ideas that thrive, sometimes, on defying description? Finally, how have Sufis been politically engaged now and in the past? (Same as: REL 2210)

Previous terms offered: Spring 2022.

MENA 2350 (c, IP) Modern Middle Eastern and North African History

Nasser Abourahme.

Non-Standard Rotation. Fall 2022. Enrollment limit: 35.

Examines modern Middle Eastern and North African history from the fall of the Ottoman Empire and the rise of the nation-state to the present conjuncture of revolution and war. Proceeds chronologically with attention to the main events and turning points in the region. Considers how the over-arching questions about the region have been posed. Key themes are empire and nationalism; colonialism, anticolonialism and revolution; war, humanitarianism, and migration; and oil and the history of capital. This course will satisfy the non-Euro requirement for the history major/minor. (Same as: HIST 2441)

MENA 2351 (c, DPI, IP) Palestinian Literature of Loss and Resistance

Paige Milligan.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

Palestinians are often imagined as terrorists or victims in U.S. media – or simply not covered. This course challenges such perceptions by centering the stories of Palestinians beginning with the British Mandate (1920s-40s) and continuing to the present day. Course materials explore geographical, political, gender, and class divisions within Palestinian society, and how these interact with the larger anti-colonial struggle. Topics include the creation of national symbols and myths, resistance and collaboration, trauma and testimony, and artistic “commitment.” Genres include poetry, novels, short stories, and autobiography.

MENA 2352 (c, IP) Approaches to the Qur'an

Robert Morrison.

Every Other Spring. Fall 2022. Enrollment limit: 35.

Explores a variety of approaches to and interpretations of the Qur'an, the foundational text of Islam. Special attention will be paid to the Qur'an's doctrines, its role in Islamic law, its relationship to the Bible, and its historical context. While the Qur'an will be read entirely in English translation, explores the role of the Arabic Qur'an in the lives of Muslims worldwide. (Same as: REL 2232)

Previous terms offered: Fall 2020.

MENA 2353 (c, IP) Revolutions in the Middle East and North Africa

Nasser Abourahme.

Every Other Spring. Spring 2023. Enrollment limit: 35.

The concept of revolution, though a defining concept of our time, seems at once urgent and dated. The challenges of the term are blatant in the study of the Middle East and North Africa, which has been so often perceived as a passive place of inactive subjects and enduring “despotisms.” This course asks how might we open the concept of revolution onto histories it has been shielded from? Considers concept histories, and what it means to think about revolution from the colonial and postcolonial world. Works through the long history of revolution in the region, including the Egyptian Revolution of 1919, the Algerian War of Independence, the Palestinian Revolution, the Iranian Revolution, and the Arab Spring. It fulfills the non Euro/US requirement for history majors and minors.

MENA 2356 (c, DPI, IP) The Modern Arabic Novel

Non-Standard Rotation. Enrollment limit: 35.

Examines the development and proliferation of the Arabic novel during the post-World War II period. Edward Said's statement that narratives “become the method colonized people use to assert their own identity and the existence of their own history” is the point of departure. Illustrates how the discourses and ideologies of colonialism influence the modern Arabic novel. Focuses on themes of struggle, resistance, nationalism, migration, and gender equality. Novels studied may include Naji#b Ma#fu#z's Midaq Alley, Ghassa#n Kanafa#ni's Men in the Sun, A#-Tayyib Sa#lih's Season of Migration to the North, #Abd al-Rahma#n Muni#'s Endings, Hana#n Shaykh's The Story of Zahra, Ahlem Mosteghanemi's Memory in the Flesh, and A#mad Sa#da#wi#'s Frankenstein in Baghdad. Taught in English. (Same as: ARBC 2038)

Previous terms offered: Spring 2022.

MENA 2600 (b, IP) Capitalism, Modernity, and Religion in Turkey

Every Other Year. Enrollment limit: 35.

Investigates classical and contemporary sociological accounts of secularism, modernity, and capitalism by examining the social and political history of Turkey. Analyzes the emergence of modern Turkey, a successor state of the Ottoman Empire, which spanned three continents and was dismantled at the end of World War I. Maps out Turkey's social, political, and economic landscape from the late nineteenth century until the present. Covers themes such as state violence, religion, hegemony, gender and sexuality, nationalism, and neoliberalism. (Same as: SOC 2260)

Prerequisites: SOC 1101.

Previous terms offered: Spring 2022, Fall 2019, Fall 2018.

MENA 2610 (c, DPI, IP) Camp/Prison/Border

Nasser Abourahme.

Every Other Spring. Spring 2023. Enrollment limit: 35.

Today, camps and prisons are thought of as distinct and separate forms. How might we think of mass incarceration and mass migration together? What might a region like the Middle East and North Africa (MENA) add to such an inquiry? Situates the region within wider global regimes of movement control by tracking the entangled history of camps and prisons. Centers the struggles and modes of expression of the detained and encamped. Topics include the emergence of camp and penal forms, humanitarianism and refugeehood, migrant workers and dispossession, environmental history and urbanization, partition and race. Engages prison writing and memoir, aesthetic practices, and film making.

MENA 2620 (c, DPI, IP) Race and Settler Colonialisms, Today

Nasser Abourahme.

Every Other Year. Fall 2022. Enrollment limit: 35.

What is settler colonialism today? How is that what we call settler colonialism understood both as something that has passed or been overcome and at the same time something enduring, even expanding again? What is about settler colonial histories that makes them not only fraught, but also seemingly unfinished and unsettled? What might this have to do with the persistence of forms of racialization in our political lives? How, in other words, should a global history of the idea of race account for settler colonialism? We will answer these questions with readings that address the connected questions of race, property, and land. Focuses on the Middle East and North Africa, particularly Palestine and Algeria. Locates both these sites within a comparative global history.

MENA 2690 (b, DPI, IP) Islam and Politics

Non-Standard Rotation. Enrollment limit: 35.

Analyzing the intersection of politics and multiple expressions of Islam in both state governments and transnational movements, studies Islam as a social, ethical, and political force in the modern era. Offers a basic introduction to Muslim history and the Islamic religion, explores various Islamic social and political movements, analyzes contending understandings of the interaction between politics and Islam, as well as investigating the tensions between the Islamic and western political traditions, including democracy and Islam. Relying on texts from influential revolutionaries such as Qutb and Khomeini as well as perspectives on political Islam from academic scholars, explores the heart of politics, society, and religion in the modern Muslim world. (Same as: GOV 2690)

Previous terms offered: Fall 2021, Fall 2018.

MENA 3216 (c) North African Cinema: From Independence to the Arab Spring

Non-Standard Rotation. Enrollment limit: 16.

Seminar. Provides insight into contemporary film production from the Maghreb (Algeria, Tunisia, and Morocco). Explores questions of gender and sexuality, national identity, political conflict, and post- and neo-colonial relationships in the context of globalization and in conditions of political repression and rigid moral conservatism. Examines how filmmakers such as Lakhdar Hamina, Férid Boughedir, Moufida Tlatli, Nedir Moknèche, Malek Bensmaïl, Lyès Salem, Hicham Ayoub, and Leyla Bouzid work in a challenging socio-economic context of film production in consideration of setbacks and obstacles specific to the developing world. Taught in French. (Same as: FRS 3216, CINE 3352)

Prerequisites: Two of: either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher and either FRS 2409 (same as AFRS 2409 and LAS 2209) or FRS 2410 (same as AFRS 2412 and LAS 2210) or FRS 3000 or higher.

Previous terms offered: Fall 2020.

MENA 3223 (c) Representations of the Algerian War of Independence

Every Other Year. Enrollment limit: 16.

Analyzes the depiction of the Algerian War of Independence in Algerian and French novels and films, drawing on trauma, postcolonial and decolonial theories. The Algerian War of Independence lasted nearly eight years (1954–62), cost between one million and one and a half million lives, saw atrocities like the use of torture by the French army and remained an obscure part of the national history of both Algeria and France. Algerian and French writers and filmmakers depict this war differently. Adopting a chronological and comparative approach to the representations of the conflict in Algeria and France, this seminar follows the various phases behind the construction of the collective memory of the Algerian War of Independence in each country. From state censorship, trauma, melancholic renderings of the past and nationalist appropriations of history, Algerian and French writers and filmmakers confront distinct problematics. (Same as: FRS 3223)

Prerequisites: Two of: FRS 2409 (same as AFRS 2409 and LACL 2209) and FRS 2410 (same as AFRS 2412 and LACL 2210).

Previous terms offered: Spring 2022.

Music

Overview & Learning Goals

Overview and Learning Goals

The Department of Music offers courses in the following three areas: music in social and historical context (x1xx-x3xx); music theory and composition (x4xx-x5xx); and music performance (x6xx-x8xx). Majors can choose either to pursue a broader curriculum with some balance among these areas, or to concentrate in one of them as indicated in the concentrations listed below. Through coursework, independent studies, musicianship labs, ensemble participation, and private musical instruction, students acquire skills and knowledge. The learning goals for each of the department's concentrations are listed below.

General Concentration

The general concentration allows a music major to fully engage with multiple aspects of the department. Majors with a general concentration

are also required to complete a senior project, which may be performance based, composition based, or critical prose.

General music minors study theory and composition, and social and historical context, as well as participate in either a department ensemble or individual performance studies.

Learning Goals

- Understand the role of music and sound as a social practice. (MUS 1101 Sound, Self, and Society: Music and Everyday Life, MUS 2101 Asking Questions about Music-Making: Musicological Methods)
- Read and write basic western music notation; understand diatonic functional harmony. (MUS 1051 Fundamentals of Music, MUS 1401 Introduction to Music Theory)
- Perform in an ensemble. (MUS 27xx)
- Acquire intermediate-level proficiency in individual instrumental or vocal performance. (MUS 28xx)
- Effectively communicate and present on a specific musical topic; organize and research a larger scale project. (MUS 4040 Senior Project in Music)

Social and Historical Context Concentration

Students interested in musicology or music history critically engage in global perspectives of historical and contemporary music history through seminars and writing. Students may incorporate studies in other departments into this concentration with department approval. Majors are also required to complete a senior project in the form of critical prose.

Learning Goals

- Become familiar with a range of musicological methodologies. (MUS 2101 Asking Questions about Music-Making: Musicological Methods)
- Understand, read scholarly work on, and articulate persuasive arguments about social, political, and economic aspects of music. (MUS 22xx–23xx, 32xx–33xx)
- Effectively organize, research, and present on a specific musicological topic. (MUS 4040 Senior Project in Music)

Theory and Composition Concentration

Students are encouraged to study theory and composition through both a western and non-western lens with coursework offered in areas such as: tonal analysis, non-western harmony, jazz theory, orchestration, audio recording, and improvisation. Majors are also required to complete a senior composition project.

Learning Goals

- Understand concepts in large-scale musical form. (MUS 2401 Tonal Analysis)
- Understand instrumental and vocal arrangement, chromatic harmony, basic keyboard harmony, sight-singing, and dictation. (MUS 2403 Songwriting and Song Analysis)
- Acquire technical facility in instrumental and/or electro-acoustic composition. (MUS 2501 Introduction to Composition, MUS 2551 Introduction to Electronic Music, MUS 3551 Computer Music Composition and Sound Synthesis)
- Compose and present on a large-scale original work. (MUS 4040 Senior Project in Music)

Performance Concentration

Performance students focus their studies on an intensive exploration of the different aspects of music performance. They are required to engage in Bowdoin music ensembles and individual performance studies, as well as theory-based and historical discourse seminars. Majors are also required to complete a senior project in this field.

Performance music minors study theory and composition and social and historical context, participate in a department ensemble, and take individual performance studies.

Learning Goals

- Understand concepts in large-scale musical form. (MUS 2401 Tonal Analysis)
- Understand instrumental and vocal arrangement, chromatic harmony, basic keyboard harmony, sight-singing, and dictation. (MUS 2403 Songwriting and Song Analysis)
- Acquire interpretive and improvisational skills. (MUS 26xx)
- Acquire advanced-level proficiency in instrumental or vocal performance. (MUS 38xx)
- Prepare, perform, and present on an advanced-level recital. (MUS 4040 Senior Project in Music)

Options for Majoring or Minor in the Department

Students may elect to major in music or to coordinate a major in music with digital and computational studies, education, or environmental studies. Students pursuing coordinate majors may not normally elect a second major. Non-majors may elect to minor in music or music performance.

Department Website (<https://www.bowdoin.edu/music/>)

Faculty

Frank Mauceri, *Department Chair*

Clare C. MacKenzie, *Department Coordinator*

Professor: Vineet Shende

Associate Professor: Tracy McMullen

Assistant Professors: Ireri Chavez Barcenaz†, Marcelline Saibou†

Senior Lecturer: Frank Mauceri

Artist in Residence: George Lopez

Adjunct Lecturers: Emily Isaacson, Eric LaPerna, John Morneau, Christopher Watkinson

Visiting Faculty: Jeffrey Christmas, Kathryn Heuther

Faculty/Staff Website (<https://www.bowdoin.edu/music/faculty-and-staff/>)

Requirements Music Major

The music major consists of eleven credits that include courses from three areas: social and historical context (x1xx–x3xx), theory and composition (x4xx–x5xx), and performance (x6xx–x8xx). Majors can choose either to pursue a broader curriculum with some balance among these areas or to concentrate in one of them, as indicated in the concentrations listed below. All majors are required to take an independent study in their final semester that includes a seminar component. Honors work normally adds one extra course credit, and its second semester counts for the senior independent study.

General Concentration

The music major with a general concentration consists of eleven credits, distributed in the following way:

Code	Title	Credits
Required Courses		
<i>Social and Historical Context</i>		
MUS 1101	Sound, Self, and Society: Music and Everyday Life	1
or MUS 2101	Asking Questions about Music-Making: Musicological Methods	
Select two elective courses (x1xx–x3xx). ^a		2
<i>Theory and Composition</i>		
MUS 1401	Introduction to Music Theory	1
Select two elective courses (x4xx–x5xx). ^a		2
<i>Performance</i>		
Select at least two credits:		2
two consecutive semesters in a single ensemble (27xx). ^b		
two semesters of individual performance studies at an intermediate-level proficiency. ^{b,c}		
Select two additional electives from any area between x1xx–x6xx. ^a		2
MUS 4040	Senior Project in Music	1

^a At least four elective courses must be at the 2000 level or above; at least one of these must be at the 3000 level.

^b Ensembles and lessons count for one-half credit per semester.

^c Intermediate-level proficiency assessed in consultation with student's music major advisor.

Music in Social and Historical Context Concentration

The music major with a concentration in social and historical context consists of eleven credits, distributed in the following way:

Code	Title	Credits
Required Courses		
<i>Social and Historical Context</i>		
MUS 1101	Sound, Self, and Society: Music and Everyday Life	1
MUS 2101	Asking Questions about Music-Making: Musicological Methods	1
Select five elective courses (x1xx–x3xx). ^a		5
<i>Theory and Composition</i>		
MUS 1051	Fundamentals of Music	1
or MUS 1401	Introduction to Music Theory	
Select one elective course (x4xx–x5xx).		1
<i>Performance</i>		
Select one of the following:		1
two consecutive semesters in a single ensemble (27xx). ^b		
two semesters of individual performance studies at an intermediate-level proficiency. ^{b,c}		
MUS 4040	Senior Project in Music	1

^a Three of these electives must be at the 2000 level or above, and at least one must be at the 3000 level. With departmental approval, two of these electives may be in a related field outside the music department.

^b Ensembles and lessons count for one-half credit per semester.

^c Intermediate-level proficiency assessed in consultation with student's music major advisor.

Theory and Composition Concentration

The music major with a concentration in theory and composition consists of eleven credits, distributed in the following way:

Code	Title	Credits
Required Courses		
<i>Social and Historical Context</i>		
MUS 1101	Sound, Self, and Society: Music and Everyday Life	1
or MUS 2101	Asking Questions about Music-Making: Musicological Methods	
Select one elective at the 2000 level or above (x1xx–x3xx).		1
<i>Theory and Composition</i>		
MUS 1401	Introduction to Music Theory	1
MUS 2403	Songwriting and Song Analysis	1
MUS 2501	Introduction to Composition	1
MUS 1451	Introduction to Audio Recording Techniques	1
or MUS 2551	Introduction to Electronic Music	
MUS 2401 Tonal Analysis		
Select one advanced elective course (34xx–35xx).		1
<i>Performance</i>		
Select two consecutive semesters in a single ensemble (27xx). ^a		1
Select two semesters of individual performance studies at an intermediate-level proficiency. ^{a,b}		1
MUS 4040	Senior Project in Music	1

^a Ensembles and lessons count for one-half credit per semester.

^b Intermediate-level proficiency assessed in consultation with student's music major advisor.

Performance Concentration

The music major with a concentration in performance consists of eleven credits, distributed in the following way:

Code	Title	Credits
Required Courses		
<i>Social and Historical Context</i>		
Select one elective course relevant to student's area of performance.		1
<i>Theory and Composition</i>		
MUS 1401	Introduction to Music Theory	1
MUS 2401 Tonal Analysis		
<i>Performance</i>		
MUS 2602	Improvisation	1
Select one of the following:		1
MUS 2601 Performance of Classical Music		
MUS 2603	Art of Singing	
MUS 2604 The Performance of Music		
Select two consecutive semesters in a non-notation-centered ensemble (2701–2712).		1
Select two consecutive semesters in a notation-centered ensemble (2721–2752).		1
Select two semesters of individual performance studies at an intermediate-level proficiency. ^a		1

MUS 3805 Advanced Performance Studies	1
Select one additional intermediate or higher elective from any area between 21xx–26xx or 31xx–36xx.	1
MUS 4040 Senior Project in Music	1

- ^a Intermediate-level proficiency assessed in consultation with student's music major advisor.

Music Minor

The music minors consist of five credits that include both classroom-based and performance-based courses. Minors can choose either to pursue a broader curriculum or to minor in performance, as indicated below.

General Music Minor

Code	Title	Credits
Select one course x1xx-x3xx	^a	1
MUS 1051	Fundamentals of Music	1
Select two other classroom electives (x1xx-x6xx).	^a	2
Select either two consecutive semesters in a single ensemble (27xx) or two semesters of individual performance studies with intermediate-level proficiency	^{b,c}	1

- ^a At least two of these four elective courses must be at the 2000 level or above.
- ^b Ensembles and lessons count for one-half credit per semester.
- ^c Intermediate-level proficiency assessed in consultation with student's music minor advisor.

Music Performance Minor

Code	Title	Credits
MUS 1401	Introduction to Music Theory	1
or MUS 2403	Songwriting and Song Analysis	
Select one other classroom elective (x1xx-x6xx).		1
Select two consecutive semesters in a single ensemble (27xx).		1
Select two semesters of individual performance studies at an intermediate-level proficiency	^a	1
MUS 3805 Advanced Performance Studies		1

- ^a Intermediate-level proficiency assessed in consultation with student's music minor advisor.

Additional Information

Additional Information and Department Policies

- With departmental approval, students may count up to two courses taken at another college or university toward the major, and one such course toward the minor.
- First-year writing seminars do not count toward the major or minors.
- Only one academic course in which the grade of CR (Credit) is received may count toward the major or minors, and only grades of C- or higher count toward the major or minors.

Advanced Placement/International Baccalaureate (AP/IB)

Students who received a minimum score of four on the Music Theory AP exam or an IB Music Theory score of six or higher should take the music theory placement exam. Placement in MUS 2403 Songwriting and Song Analysis results in one credit that is the equivalent of MUS 1401 Introduction to Music Theory. If a student earns a grade of C- or higher in MUS 2403 Songwriting and Song Analysis, this credit can count toward the major. Placement into MUS 1401 Introduction to Music Theory or MUS 1051 Fundamentals of Music results in no credit. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.

Music Ensembles and Individual Performance Studies

The following provisions govern both ensembles and individual performance studies:

- All music ensembles (27xx) and individual performance studies (28xx) count for one-half credit per semester and are graded on a Credit/D/Fail Only basis. The symbol for a grade of credit in a Credit/D/Fail Only course is CR# (see the Registrar's website (<https://www.bowdoin.edu/registrar/students/grades-exams/guide-to-grades.html>) for details).
- Ensembles (27xx) and individual performance studies (28xx) may be repeated for credit, but a maximum of 6.0 credits of ensemble and individual performance studies courses together may be applied towards the 32.0 credits required for graduation. Advanced Individual Performance Studies (38xx) count for a full credit, are graded with standard letter grades, and are not included in the limitation of 6.0 combined performance credits that can be applied to graduation requirements.
- The course number for the first semester of participation ends with an odd number; all subsequent semesters end with the even number immediately following.
- Visit the Class Finder (<https://classfinder.bowdoin.edu/classfinder/>) for additional information on the music ensembles and individual performance studies on offer currently.

Music Ensembles

- Ensembles meet regularly for a minimum of three hours weekly, and in the case of chamber ensembles and jazz combos, this is inclusive of time without the ensemble coach.
- Members of ensembles must attend rehearsals regularly and participate in all dress rehearsals and performances.
- Two semesters of participation in an ensemble for credit where a grade of CR# is earned fulfills the Visual and Performing Arts (VPA) distribution (<https://bowdoin-public.courseleaf.com/curriculum/#text>) requirement.
- Students may participate in some large ensembles, chamber ensembles, and jazz ensembles on a non-credit basis upon instructor or departmental approval only.
- For auditioned ensembles, returning students need not normally audition again.

Auditioned Ensembles

- MUS 2711 Jazz Combos - Initial Semester and MUS 2712 Jazz Combos
- MUS 2721 Chamber Ensembles - Initial Semester and MUS 2722 Chamber Ensembles
- MUS 2731 Orchestra - Initial Semester and MUS 2732 Orchestra
- MUS 2741 Chamber Choir - Initial Semester and MUS 2742 Chamber Choir
- MUS 2745 Chorus - Initial Semester and MUS 2746 Chorus

Non-Auditioned Ensembles

- MUS 2701 West African Music Ensemble - Initial Semester and MUS 2702 West African Music Ensemble
- MUS 2705 Middle Eastern Ensemble - Initial Semester and MUS 2706 Middle Eastern Ensemble
- MUS 2751 Concert Band - Initial Semester and MUS 2752 Concert Band

Individual Performance Studies

- Any student is eligible to take individual performance studies regardless of musical background or access to an instrument. To borrow an instrument, please inquire with the academic department coordinator when registering.
- Students and instructors meet weekly for hour-long lessons; exact meeting times are determined based on the students' and instructors' schedules. Some instruction, e.g., guitar and piano, may take place in a small-group format.
- The deadline to officially register is one week after the start of classes, and the deadline to drop is two weeks from the start of classes. Students should note that the deadline to register for individual performance studies is earlier than all other Bowdoin courses.
- Students taking lessons for credit pay a fee of \$700 for twelve one-hour lessons per semester. Junior and senior music majors and minors may take two half-credits free of charge. Scholarships are available for students on financial aid to cover the cost of lessons for credit; students interested in applying should contact the academic department coordinator by the second day of classes.
- Students who begin studying their instrument at Bowdoin as beginners must perform in their fourth semester of study and each semester thereafter. All other students must perform in their second semester of study and each semester thereafter.
- In order for performance studies to count towards the major or minor, the student must be studying at an intermediate level. The department defines intermediate-level proficiency as having a basic technical facility of one's instrument or voice. Intermediate proficiency assessed in consultation with the student's major or minor advisor.
- Individual Performance Studies do not count towards the VPA requirement.

Individual Performance Studies Instructors for 2022–2023

Bass (Pop/Jazz): Duane Edwards
 Bassoon: David Joseph
 Cello: Christina Chute
 Clarinet: Titus Abbott
 Drums: R.J. Miller
 Fiddle: Christina Chute
 Flute: Krysia Tripp
 French Horn: John Boden

Guitar (Classical and Pop/Jazz): John Johnstone
 Guitar (Pop/Jazz): Gary Wittner
 Harp: Suki Flanagan
 Oboe: Kathleen O'Connor-McNerney
 Organ: Ray Cornils
 Piano (Classical): Naydene Bowder, Joyce Moulton
 Piano (Classical; by special permission from professor, only): George Lopez
 Piano (Pop/Jazz): Matthew Fogg
 Saxophone: Titus Abbott
 Trombone: Anita Jerosch
 Trumpet: Tim Kenlan
 Viola: Kirsten Monke
 Violin: Dean Stein, Yasmin Vitalius
 Voice (Classical): Christina Astrachan
 Voice (Pop/Jazz): Stephanie Fogg

Information for Incoming Students (p. 332)

The Department offers text-based sociological/historical inquiry courses open to first-year students in which placement is not required. For fall 2022 those courses are MUS 1051 Fundamentals of Music and MUS 1101 Sound, Self, and Society: Music and Everyday Life. Students with any background in theory/composition are strongly encouraged to take the music placement exam to access the department's notation-based music theory/composition courses.

Students considering further study in music or a possible major/minor are encouraged to take a music course in the first year, specifically MUS 1401 Introduction to Music Theory or MUS 2403 Songwriting and Song Analysis, depending on placement results. Most academic music courses count towards the Visual and Performing Arts (VPA) distribution (<https://bowdoin-public.courseleaf.com/curriculum/#text>) requirement.

Seating is limited, but any student is eligible to take individual performance studies/lessons regardless of musical background or access to an instrument. See above for more details about music ensembles and individual performance studies and note that most participants in music ensembles and individual performance studies are *not* music majors/minors, so all students with an interest should consider participating. Students with questions should contact the department (<https://www.bowdoin.edu/music/>).

Courses

MUS 1018 (c) Eight Centuries of Spanish Songs

Non-Standard Rotation. Enrollment limit: 16.

Songs are effective mediums to tell stories, communicate ideas, and convey emotions. In this course we will explore the long and widespread practice of singing Spanish Songs. We will engage with a variety of sources and methodologies that trace different forms of preservation, transmission, and circulation from thirteenth-century cantigas to Billboard hits enjoyed today in personal portable devices. The song repertory will give you the opportunity to develop critical thinking and analytical writing as you engage with a variety of ideas including memory, love and desire, race and identity, power and propaganda, cultural resistance and protest. We will consider narratives of music, musicians, and musical instruments that illustrate transcultural musical encounters around the globe, covering topics from the Spanish Reconquista to the Latinx and Caribbean diasporas in the US. (Same as: LACL 1018)

Previous terms offered: Fall 2020.

MUS 1051 (c, VPA) Fundamentals of Music

Vineet Shende; Jeffrey Christmas.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 50.

For the entry-level student. Explores the fundamental elements of music – form, harmony, melody, pitch, rhythm, texture, timbre – and teaches basic skills in reading and writing Western music notation for the purposes of reading, analyzing, and creating musical works.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 1101 (c) Sound, Self, and Society: Music and Everyday Life

Clare MacKenzie; Kathryn Huether.

Every Year. Fall 2022. Enrollment limit: 50.

Explores the role of music and sound as social practice, political catalyst, market commodity, site of nostalgia, environment regulator, identity tool, and technology of the self. Enables students to communicate about sound and music. Addresses music in relation to: mood manipulation; signification; taste and identity; race, class, gender, and sexuality codes; urban tribes and subcultures; economics and politics; power; authenticity; and technology. Emphasis will be on contemporary North American socio-musical contexts; however, cross-cultural and historical perspectives will also be introduced. Case studies may include gym, study, road trip, and party playlists; music in political campaigns; Muzak; advertising jingles; film music, and a variety of musical genres such as goth, funk, and hip hop.

Previous terms offered: Spring 2022, Spring 2020, Spring 2019.

MUS 1211 (c, IP, VPA) Introduction to Music in Africa

Every Other Year. Enrollment limit: 50.

Introduces students to the rich and diverse musical traditions of sub-Saharan Africa. Covers traditional and modern musical practices from various regions, and explores their roles in social, cultural, and political contexts from historical and contemporary perspectives. Students learn to identify basic regional musical properties and characteristic musical styles. Case studies may include West African dance-drumming, Ghanaian highlife, musical oral historians, "African Ballets," South African a cappella, the protest music of Nigerian Fela Kuti and Zimbabwean Thomas Mapfumo, as well as contemporary hip-hop and religious pop music. Based on lectures, readings, performances by visiting artists, discussions, and audio and video sources. No prior musical knowledge necessary. (Same as: AFRS 1211)

Previous terms offered: Fall 2021, Fall 2018.

MUS 1261 (c, VPA) Introduction to Film Music

Every Other Year. Enrollment limit: 50.

From silent films (which were always accompanied with music and were therefore never really "Silent") to today's computer enhanced blockbusters, music has always been an integral part of cinema, allowing for suspension of disbelief, establishing mood and emotion, and cogenerating narrative. Through lectures and film viewings, discussion sections, small group projects, and readings (hyperlinked to movie clips), students in this course will gain the ability to critically analyze the musical language of cinema and understand how its related aesthetics, technology, and economics have changed over the last 100 years. Films studied will include works scored by Desplat, Herrmann, Junkie XL, Korngold, Ligeti, Public Enemy, Raskin, Simon, Tamar-Kali, Vangelis, and Williams. (Same as: CINE 1161)

Previous terms offered: Fall 2021, Fall 2020, Spring 2019.

MUS 1262 (c, VPA) Film Music and the Holocaust

Kathryn Huether.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Examines film music practices through a study of documentary films, foreign language depictions, and "Hollywood blockbusters" that are related to and influenced by the Holocaust. This filmography encompasses a myriad of extensive pre-existing film music practices and poses ethical questions in relation to aesthetic applications and the intricate compilation of sound and image. Analysis of case studies considers the psychological, political, and philosophical structures that emerge in these films by providing students with the foundations of film music as an art form. Material ranges from composers Max Steiner to John Williams and Hanns Zimmer and critically engages in examples from various feature films, documentaries, foreign language films and television. Study connects the musical styles applied within Holocaust filmography to those of non-Holocaust and the "film music canon."

MUS 1271 (c, IP, VPA) Experiencing Latin American Music(s)

Every Other Fall. Enrollment limit: 50.

This course is an opportunity to experience Latin American history, heritage, and culture through its music. We will explore general issues of race, identity, religion, and politics from a broad chronological span—from the sixteenth to the twenty-first century—and will relate these to diverse Latin American music traditions. We will cover a wide variety of regions, contexts, and music genres—such as son, hip-hop, sacred polyphony, symphonic band, salsa, rock, vallenato, protest song, or chamber music—and will reflect on musical meaning and the ways in which music interacts with societies, environments, and cultural values.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

MUS 1281 (c, VPA) History of Jazz I

Every Other Fall. Enrollment limit: 50.

A socio-cultural, historical, and analytical introduction to jazz music from the turn of the twentieth century to around 1950. Includes some concert attendance. (Same as: AFRS 1581)

Previous terms offered: Fall 2021, Fall 2019.

MUS 1292 (c, VPA) Issues in Hip-Hop I

Non-Standard Rotation. Enrollment limit: 50.

Traces the history of hip-hop culture (with a focus on rap music) from its beginnings in the Caribbean to its transformation into a global phenomenon by the early 1990s. Explores constructions of race, gender, class, and sexuality in hip-hop's production, promotion, and consumption, as well as the ways in which changing media technology and corporate consolidation influenced the music. Artists/bands investigated include Grandmaster Flash, Run-D.M.C., Public Enemy, De La Soul, Queen Latifah, N.W.A., MC Lyte, Snoop Doggy Dogg, and Dr. Dre. (Same as: AFRS 1592, GSWS 1592)

Previous terms offered: Fall 2018.

MUS 1304 (c, VPA) Music, Drama, and Design

Non-Standard Rotation. Enrollment limit: 50.

Students will explore different phases of the creative process that involve drama and music for the stage. We will study and compare recent productions of operas, musicals, and other theatrical and dance performances. Now that theaters, opera venues, and concert halls are closed, this course will serve as a reminder of the vibrant collaborative work between artists and the connections they establish with their audiences. We will discuss the different areas of design, such as scenography, costume, lighting, sound, and projection, and we will analyze in a cohesive way how they relate to the music score. We will engage with a variety of genres covering a wide time span, and we will analyze in-depth specific works, such as Mozart's *Don Giovanni*, Sondheim's *Sweeney Todd*, Gershwin's *Porgy and Bess*, Monteverdi's *Il ritorno d'Ulisse in patria*, Stravinsky's *The Rite of Spring*, and Robert Lepage's staging for Peter Gabriel's *The Secret World Tour*. (Same as: DANC 1304, THTR 1304)

Previous terms offered: Spring 2021.

MUS 1401 (c, VPA) Introduction to Music Theory

Frank Mauceri.

Every Year. Fall 2022. Enrollment limit: 30.

Designed for students with some beginning experience in music theory and an ability to read music. Covers scales, keys, modes, intervals, and basic tonal harmony.

Prerequisites: MUS 1051 or Placement in MUS 1401.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

MUS 1451 (c, VPA) Introduction to Audio Recording Techniques

Every Spring. Enrollment limit: 18.

Explores the history of audio recording technology as it pertains to music, aesthetic function of recording technique, modern applications of multitrack recording, and digital editing of sound created and captured in the acoustic arena. Topics include the physics of sound, microphone design and function, audio mixing console topology, dynamic and modulation audio processors, studio design and construction, principles of analog to digital (ADA) conversion, and artistic choice as an engineer. Students create their own mix of music recorded during class time.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

MUS 1651 (c, VPA) Creating Music in the Digital Age

Non-Standard Rotation. Enrollment limit: 50.

This course explores how musicians create and work in the digital age. Students will create video and audio recordings of performances (using Garageband and iMovie, which are available to all Bowdoin students) to be shared on multiple platforms. Topics include the basics of home audio and video recording, livestreaming, digital collaboration, songwriting/arranging and performing for social media, arranging pop/contemporary music, and a study of what other artists, producers, and creatives are doing on digital platforms. While there is no course prerequisite, familiarity with at least one musical instrument (voice and digital instrumentation/beat-making included) is necessary.

Previous terms offered: Spring 2021.

MUS 2101 (c, VPA) Asking Questions about Music-Making: Musicological Methods

Kathryn Huether.

Every Spring. Spring 2023. Enrollment limit: 35.

Provides students with the ways to ask questions about music by examining it from a number of perspectives – follow the music, follow the musicians, follow the audiences, follow the ways it is discussed, follow the ways it makes money or the technologies used to create and disseminate it; examine its history, the lives of its practitioners, the trajectories of the institutions that sustain it, the multiple musical influences that inform it, and the way it influences new hybrid musical forms. Case studies to be examined by students may include Bach or Beyonce, a rock concert or a ceremony of religious chant – or the recital of an on-campus a capella group. Using methods from cultural studies, the social sciences, ethnomusicology, and historical musicology, students carry out their own music research projects.

Prerequisites: MUS 1000 or higher.

Previous terms offered: Spring 2021, Spring 2019.

MUS 2205 (c) Music and Disability Studies

Every Other Year. Enrollment limit: 20.

Explores intersections between music studies and disability studies, and how social and medical constructions of disability may be interrogated through the study of musicians, musical audiences, and, more broadly, music as culture. Positioning disability as a facet of human diversity, rather than a deficit, the course examines how conditions of, and ideas about, ability and disability affect experiences with music and how musical sounds, practices, and discourses in turn shape ideas and values about dis/ability. Includes a variety of socio-musical contexts and musical genres (among them, popular and classical) and cross-cultural and historical perspectives, as well as considerations of gender and race. No prior musical knowledge is necessary.

Previous terms offered: Spring 2022, Spring 2021.

MUS 2261 (c, VPA) Holy Songs in a Strange Land

Judith Casselberry; Brian Purnell.

Every Other Spring. Spring 2023. Enrollment limit: 35.

Seminar. Examines black sacred music from its earliest forms, fashioned by enslaved Africans, through current iterations produced by black global actors of a different sort. Explores questions such as: What does bondage sound like? What does emancipation sound like? Can we hear corresponding sounds generated by artists today? In what ways have creators of sacred music embraced, rejected, and re-envisioned the "strange land" over time? Looks at musical and lyrical content and the context in which various music genres developed, such as Negro spirituals, gospel, and sacred blues. Contemporary artists such as Janelle Monáe, Beyoncé, Bob Marley, and Michael Jackson included as well. (Same as: AFRS 2261)

Previous terms offered: Spring 2022, Spring 2019.

MUS 2281 (c) History of Jazz II

Every Other Spring. Enrollment limit: 35.

Provides a socio-cultural, historical, and analytical introduction to jazz music from around 1950 to the present. Students learn to understand the history of jazz in terms of changes in musical techniques and social values and to recognize music as a site of celebration and struggle over relationships and ideals. Students increase their ability to hear differences among performances and styles. They gain greater knowledge of US history as it affects and is affected by musical activities and learn to appreciate the stakes and motives behind the controversies and debates that have often surrounded various styles of African American music.

Prerequisites: MUS 1281 (same as AFRS 1581) or MUS 1101 or MUS 2711 or AFRS 1101 - 2969 or AFRS 3000 or higher.

Previous terms offered: Spring 2022, Spring 2020.

MUS 2291 (c, DPI, VPA) Black Women, Politics, Music, and the Divine

Judith Casselberry; Brian Purnell.

Every Fall. Fall 2022. Enrollment limit: 16.

Seminar. Examines the convergence of politics and spirituality in the musical work of contemporary black women singer-songwriters in the United States. Analyzes material that interrogates and articulates the intersections of gender, race, class, and sexuality generated across a range of religious and spiritual terrains with African diasporic/black Atlantic spiritual moorings, including Christianity, Islam, and Yoruba. Focuses on material that reveals a womanist (black feminist) perspective by considering the ways resistant identities shape and are shaped by artistic production. Employs an interdisciplinary approach by incorporating ethnomusicology, anthropology, literature, history, and performance and social theory. Explores the work of Shirley Caesar, the Clark Sisters, Meshell Ndegeocello, Abby Lincoln, Sweet Honey in the Rock, and Dianne Reeves, among others. (Same as: AFRS 2201, GSWS 2207, REL 2201)

Previous terms offered: Fall 2021, Fall 2018.

MUS 2292 (c, VPA) Protest Music

Non-Standard Rotation. Enrollment limit: 35.

Focuses on the ways black people have experienced twentieth-century events. Examines social, economic, and political catalysts for processes of protest music production across genres including gospel, blues, folk, soul, funk, rock, reggae, and rap. Analysis of musical and extra-musical elements includes style, form, production, lyrics, intent, reception, commodification, mass-media, and the Internet. Explores ways in which people experience, identify, and propose solutions to poverty, segregation, oppressive working conditions, incarceration, sexual exploitation, violence, and war. (Same as: AFRS 2228, ANTH 2227)

Previous terms offered: Fall 2021, Fall 2018.

MUS 2293 (c, VPA) Rebel Yell: Punk Music Inside and Outside the Mainstream

Tracy McMullen.

Every Other Year. Fall 2022. Enrollment limit: 35.

Explores the significance of punk music from the 1970s to today. Addresses punk music in relation to transnational identity; the individual in late modernity; music vs. noise; sound and meaning; selling out; youth culture; subculture; genre trouble; music and fashion; rebellion and insurrection; the abject; constructions of the body and disease; and race, class, gender, and sexuality codes. Enables students to communicate about sound and music. Bands/artists discussed may include The Bags, The Germs, Nervous Gender, The Sex Pistols, The Bad Brains, Nirvana, The Runaways, Patti Smith, Television, X-Ray Spex, and The Clash.

Previous terms offered: Spring 2019.

MUS 2294 (c) Issues in Hip-Hop II

Non-Standard Rotation. Enrollment limit: 35.

Traces the history of hip-hop culture (with a focus on rap music) from the 1990s to the present day. Explores how ideas of race, gender, class, and sexuality are constructed and maintained in hip-hop's production, promotion, and consumption, and how these constructions have changed and/or coalesced over time. Investigates hip-hop as a global phenomenon and the strategies and practices of hip-hop artists outside of the United States. Artists investigated range from Iggy Azalea to Jay-Z, Miz Korona to Ibn Thabit. (Same as: AFRS 2294, GSWS 2294)

Prerequisites: MUS 1292 (same as AFRS 1592 and GWS 1592).

Previous terms offered: Spring 2019.

MUS 2296 (c, VPA) Songs of Race and Power in Colonial Latin America

Non-Standard Rotation. Enrollment limit: 35.

This seminar explores diverse song traditions in Colonial Latin America. Attention will be given to manifestations of musical globalization and will incorporate the study of sources that reveal the circulation and transmission of Iberian and African musicoliterary genres in the vast transatlantic Spanish empire, including Portugal, Italy, the New World, and Asia. We will pay special attention to complex representations of ethnic and religious others (indigenous people of the Americas, African slaves, Muslims, Jews) in relation to literary conventions and early modern ideas about religious devotion and racial, gender, and class difference. We will approach these topics through a close engagement with materials in special collections and archives. This course is part of the following fields of study: Colonial Latin America, transatlantic studies, Spanish Golden Age Poetry, and early music. (Same as: LACL 2330)

Previous terms offered: Spring 2022.

MUS 2305 (c, VPA) Beethoven and the Invention of Western Music
Non-Standard Rotation. Enrollment limit: 35.

Introduces the music, the life, and the influence of Beethoven on the history of western music. The main objective is to broaden students' familiarity with Beethoven's work and to recognize and analyze the principal styles, forms, and genres used during this period. Expands students' experience with research tools, methods, and sources that are useful for the study of music history. Provides a critical perspective on the social construction of genius and the ideologies that lead to the institutional origins of "classical" music.

Prerequisites: MUS 1051.

Previous terms offered: Spring 2022, Spring 2020.

MUS 2306 (c, IP) Voicing the Divine: Religious Modes of Listening and Sonic Embodiment

Kathryn Huether.

Non-Standard Rotation. Spring 2023. Enrollment limit: 35.

This course explores the complex relationship between language, sound, and hearing in a myriad of religious traditions. Positioning sound and music as our primary lens of inquiry, we examine primary sources and ethnographic studies in our attempt to grapple with the variegated ways religious or mystical experiences are experienced and interpreted. A central component to this course is a focus on practices of listening and will place in conversation relevant discourse from the fields of voice studies, ethnomusicology, religious studies, and sound studies. Students will engage in methods of vocal analyses and religious studies methodologies on performativity and embodiment. Weekly topics and their affiliated readings will include, but are not confined to Islam and El-Ghayb; Spiritualism; African-American Sermon Traditions; Hindu Mysticism; American Evangelicalism; Jewish aniconism.

MUS 2403 (c, VPA) Songwriting and Song Analysis

Vineet Shende.

Every Fall. Fall 2022. Enrollment limit: 35.

An intensive project-oriented course in which students learn skills such as melodic and rhythmic writing, arranging, studio production, text-setting, and basic chromatic harmony, and how those elements combine to affect listeners on an emotional level. Repertoire studied largely chosen by students, but also includes songs by the Beatles, various Motown artists, Joni Mitchell, Prince, and Radiohead. Small-group and individual lab sessions scheduled separately.

Prerequisites: MUS 1401 or Placement in MUS 2403 or Placement in MUS 2402 or 2403.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

MUS 2501 (c, VPA) Introduction to Composition

Vineet Shende.

Every Other Spring. Spring 2023. Enrollment limit: 35.

An introduction to the art of combining the elements of melody, harmony, rhythm, form, and orchestration to create cohesive and engaging music. Students learn techniques for generating and developing musical ideas through exercises and four main compositional assignments: a work for solo instrument, a theme and variations for solo instrument and piano, a song for voice and piano, and a multi-movement work for three to five instruments. Students also learn ways to discuss and critique their own and one another's work. Ends with a concert of student compositions.

Prerequisites: MUS 1401 or MUS 2401 or MUS 2402 or MUS 2403.

Previous terms offered: Spring 2021, Spring 2020.

MUS 2502 (c, VPA) Film Scoring

Vineet Shende.

Every Other Year. Fall 2022. Enrollment limit: 35.

The celebrated German film director Fatih Akin has stated, "Film is a two dimensional thing—it goes up and down and left to right but if you put music into that two dimensional medium, it acquires a third, fourth, and fifth dimension." This course will explore the myriad ways that music creates deeper meaning in film. This will be accomplished through both analysis of preexisting films scores and composing original music for five common filmic categories: establishing sequences, montage sequences, dialogue underscoring, and action and love scenes. Students will need to be able to read music notation. (Same as: CINE 2502)

Prerequisites: MUS 1401 or MUS 2403 or CINE 1000 - 2969 or CINE 3000 or higher.

MUS 2551 (c, VPA) Introduction to Electronic Music

Frank Mauceri.

Every Other Fall. Spring 2023. Enrollment limit: 15.

Examination of the history and techniques of electronic and computer music. Topics include compositional aesthetics, recording technology, digital and analog synthesis, sampling, MIDI (Musical Instrument Digital Interface), and computer-assisted composition. Ends with a concert of student compositions.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Fall 2018.

MUS 2561 (c, MCSR, VPA) Interactive Media: Designing Applications for the Arts

Non-Standard Rotation. Enrollment limit: 18.

A hands-on introduction to the creation of interactive art and digital media. Students construct programs to analyze data from physical sensors to characterize motion, proximity, and sound. Through experimental and project based studio work, students design and implement interactive applications for theater, dance, sculpture, installations, and video. Collaborative work focuses on problem solving at the intersections of creative arts and technology. Readings in media theory support the critical examination of contemporary interactive art. Note: This course does not serve as a prerequisite to 3000-level visual arts courses.

Previous terms offered: Spring 2019.

MUS 2602 (c) Improvisation

Every Other Year. Enrollment limit: 15.

Do we understand improvised and composed music differently, and if so how? Investigates musical syntax in improvised settings and its consequences for the organization of time in music. Also considers the social functions and meanings of improvisation. Analysis draws from recordings, interviews, and writings in ethnomusicology, semiotics, and music theory. At the same time, students participate in regular improvisation workshops exploring vernacular music, avant-garde open forms, and interactive electronics.

Prerequisites: MUS 2402 or MUS 2403.

Previous terms offered: Fall 2021.

MUS 2603 (c, VPA) Art of Singing

Jeffrey Christmas.

Every Other Year. Spring 2023. Enrollment limit: 35.

A study of singing traditions, emphasizing American popular music, musical theater, and classical music. Topics comprise vocal color and production, the influence of language on singing, performing practices, improvisation, and aesthetic response. Projects include performances and analyses of recorded music.

Prerequisites: MUS 1051 or MUS 1401 or MUS 2603 or MUS 2711 or MUS 2721 or MUS 2741 or MUS 2771 or MUS 2777 or MUS 2779 or MUS 2783 or MUS 2805 - 2809 or MUS 2811 - 2852 or Placement in MUS 1401 or Placement in MUS 2403.

Previous terms offered: Fall 2020, Fall 2018.

MUS 2605 (c, VPA) Musical Theater Performance

Every Other Fall. Enrollment limit: 16.

Musical theater is a popular performance form that challenges students to work in multiple disciplines, combining dance, acting, music, and design. This course will give students with experience in acting, singing, and dancing an opportunity to hone their skills together through the performance of songs and scenes from a variety of musical theater styles. Students will do projects in ballad singing, choral numbers, group dances, and acting the song. Actors, singers, choreographers, and musicians will be encouraged to work together in class and in evening rehearsals toward a public performance and a cabaret performance at the end of the semester. Performances will be grounded in historical readings and research that contextualizes the origins of the pieces being performed. (Same as: THTR 2205, DANC 2205)

Prerequisites: THTR 1100 - 1799 or DANC 1100 - 1799.

Previous terms offered: Spring 2022, Fall 2019.

MUS 2701 (c, VPA) West African Music Ensemble - Initial Semester

Every Semester. Enrollment limit: 25. .5 Credit Credit/D/F Only.

Performs the musical traditions of a variety of West African cultures. Students learn and perform multiple instruments, including drums, rattles, and bells, as well as various forms of West African singing and dance. Culminates in a concert every semester.

Previous terms offered: Spring 2022, Fall 2021, Spring 2020, Fall 2019, Fall 2018.

MUS 2702 (c, VPA) West African Music Ensemble

Every Semester. Enrollment limit: 25. .5 Credit Credit/D/F Only.

Performs the musical traditions of a variety of West African cultures. Students learn and perform multiple instruments, including drums, rattles, and bells, as well as various forms of West African singing and dance. Culminates in a concert every semester.

Prerequisites: MUS 2701.

Previous terms offered: Spring 2022, Fall 2021, Spring 2020, Fall 2019, Fall 2018.

MUS 2705 (c, VPA) Middle Eastern Ensemble - Initial Semester

Eric LaPerna.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5 Credit Credit/D/F Only.

The Middle Eastern Ensemble's (MME) music ranges from the contemplative to the danceable. MEE is open to students who read music and who play string or wind instruments, piano, accordion, or who are willing to learn Middle Eastern percussion (the percussion section is limited, and is first come first serve). Bowdoin owns an oud, a qanun, some frame drums, riqq, and tablas (dumbeks). Ensemble instruction is provided for all percussion instruments. Students wishing to play the oud or qanun must have prior experience.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2706 (c, VPA) Middle Eastern Ensemble

Eric LaPerna.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5 Credit Credit/D/F Only.

Meets once a week on Monday evenings, and performs pieces from the Arabic, Turkish, Armenian, and Greek traditions. Coached by oud player Amos Libby and percussionist Eric La Perna, the group performs one concert per semester. No experience is required to join; students have the option of singing, learning new percussion instruments, or playing an instrument with which they are already familiar.

Prerequisites: MUS 2769 or MUS 2705.

Previous terms offered: Spring 2022, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2711 (c, VPA) Jazz Combos - Initial Semester

Tracy McMullen; Clare MacKenzie; Frank Mauceri.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5 Credit Credit/D/F Only.

Groups of four to six students, formed by audition, and performing both modern and classic standards, plus some original compositions by students and faculty. They perform one concert a semester on campus, and appear occasionally in other venues. Rehearsals are arranged to suit the players' and coaches' schedules.

Previous terms offered: Spring 2022, Fall 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2712 (c, VPA) Jazz Combos

Tracy McMullen; Clare MacKenzie; Frank Mauceri.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

Groups of four to six students, formed by audition, and performing both modern and classic standards, plus some original compositions by students and faculty. They perform one concert a semester on campus, and appear occasionally in other venues. Rehearsals are arranged to suit the players' and coaches' schedules.

Prerequisites: MUS 2711 or MUS 2783.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2721 (c, VPA) Chamber Ensembles - Initial Semester

George Lopez; Kirsten Monke; Kathleen O'Connor-McNerney; Dean Stein; Anita-Ann Jerosch; Frank Mauceri; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

Groups of three to six students, formed by audition. With the guidance of a faculty coach, these groups delve into and perform select pieces from the chamber music repertory of the past four hundred years. Some of these groups will be standard chamber ensembles (e.g., string quartets, piano trios, brass quintets); others will be formed according to student and repertoire demand. Rehearsals are arranged to suit the players' and coach's schedules.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2722 (c, VPA) Chamber Ensembles

George Lopez; Kirsten Monke; Kathleen O'Connor-McNerney; Dean Stein; Anita-Ann Jerosch; Frank Mauceri; Clare MacKenzie; Vineet Shende.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

Rehearsals are arranged to suit the players' and coach's schedules.

Prerequisites: MUS 2779 or MUS 2721.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2731 (c, VPA) Orchestra - Initial Semester

George Lopez; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

An auditioned ensemble of about fifty student musicians playing woodwind, brass, percussion, and string instruments. Repertoire for the group varies widely from semester to semester and explores the vast body of orchestral literature from the past 250 years to today. Rehearsals are Sunday afternoons and Wednesday evenings.

Previous terms offered: Spring 2022, Fall 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2732 (c, VPA) Orchestra

George Lopez; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

An auditioned ensemble of about fifty student musicians playing woodwind, brass, percussion, and string instruments. Rehearsals are Sunday afternoons and Wednesday evenings.

Prerequisites: MUS 2777 or MUS 2731.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2741 (c, VPA) Chamber Choir - Initial Semester

Jeffrey Christmas; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 50. .5

Credit Credit/D/F Only.

An auditioned group of about thirty student singers. The choir performs at least three times a semester, and sometimes at festivals and society meetings in the US. Recent tours abroad, which occur about every three years during spring break, have taken the ensemble to Portugal, Germany, Ireland, England, Chile, Hungary, and Slovakia. Repertoires have included Gaelic folksongs sung in Ireland, a Jimi Hendrix festival, over a dozen works by Eric Whitacre, the music of Bartok sung in his native Hungary, songs of Violetta Parra sung in her native Chile, premieres of new American music for the Society of Composers, Messiah with the Portland Symphony, and the moresche of Lassus at an ACDA convention in Boston.

Previous terms offered: Spring 2022, Fall 2021, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2742 (c, VPA) Chamber Choir

Jeffrey Christmas; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 50. .5

Credit Credit/D/F Only.

Every Semester. Fall 2022. Enrollment limit: 35. .5 Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2864 (c) Individual Performance Studies: Pop/Jazz Saxophone, Continuing Semester

Titus Abbott; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Prerequisites: MUS 1863 or MUS 1864 or MUS 2863.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2871 (c) Individual Performance Studies: Pop/Jazz Guitar, Initial Semester

Gary Wittner; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2872 (c) Individual Performance Studies: Pop/Jazz Guitar, Continuing Semester

Gary Wittner; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Prerequisites: MUS 1871 or MUS 1872 or MUS 2871.

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2873 (c) Individual Performance Studies: Pop/Jazz Piano, Initial Semester

Matthew Fogg; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2874 (c) Individual Performance Studies: Pop/Jazz Piano, Continuing Semester

Matthew Fogg; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Previous terms offered: Spring 2022, Fall 2021, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2875 (c) Individual Performance Studies: Pop/Jazz Bass, Initial Semester

Duane Edwards; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Previous terms offered: Spring 2022, Fall 2021, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2876 (c) Individual Performance Studies: Pop/Jazz Bass, Continuing Semester

Duane Edwards; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Prerequisites: MUS 1875 or MUS 1876 or MUS 2875 and MUS 1875 or MUS 1876 or MUS 2875.

Previous terms offered: Spring 2022, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2877 (c) Individual Performance Studies: Pop/Jazz Drums, Initial Semester

Ronald Miller; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Previous terms offered: Spring 2022, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 2878 (c) Individual Performance Studies: Pop/Jazz Drums, Continuing Semester

Ronald Miller; Clare MacKenzie.

Every Semester. Fall 2022; Spring 2023. Enrollment limit: 35. .5

Credit Credit/D/F Only.

The following provisions govern applied music lessons for credit: (1) One-half credit is granted for each semester of study. Grading is Credit/D/Fail Only. (2) The absolute deadline to add lessons is one week from the start of classes. (3) Students must attend twelve one-hour lessons per semester to receive credit. (4) Students taking lessons for credit pay a fee. Students who receive financial aid will have one fee waived (per semester). All music majors and minors may take two half-credits free of charge in their junior or senior year. (5) Up to six credits of ensemble and individual performance courses together may be taken for graduation credit. (Note: Advanced Individual Performance Studies (38XX) count for academic credit and are thus not included in this limitation.)

Prerequisites: MUS 1877 or MUS 1878 or MUS 2877.

Previous terms offered: Spring 2022, Spring 2021, Fall 2020, Spring 2020, Fall 2019, Spring 2019, Fall 2018.

MUS 3103 (c) Gender, Sexuality, and Popular Music

Tracy McMullen.

Every Other Year. Spring 2023. Enrollment limit: 15.

Employs gender as a theoretical tool to investigate the production, consumption, and representation of popular music in the United States and around the world. Examines how gender and racial codes have been used historically, for example to describe music as “authentic” (rap, rock) or “commercial” (pop, new wave), and at how these codes may have traveled, changed, or re-appeared in new guises over the decades. Considers how gender and sexuality are inscribed at every level of popular music as well as how music-makers and consumers have manipulated these representations to transgress normative codes and open up new spaces in popular culture for a range of sexual and gender expressions. Juniors and seniors only; sophomores admitted with consent of the instructor during the add/drop period. (Same as: GSWS 3103)

MUS 3151 (c, DPI) Advanced Concepts in Music and Culture: African American Music

Tracy McMullen.

Every Other Year. Spring 2023. Enrollment limit: 15.

Examines music as a cultural “actor” within the context of American history. Central concerns may include representations of racialized identity via music; interpretation and reception of musical genres; “freedom” and constraint in musical performance; and issues of appropriation, musical borrowing, essentialism, and tradition. Authors may include Ralph Ellison, Amiri Baraka, Eileen Southern, and Sylvia Wynter. Artists and genres may include Kendrick Lamar, Nina Simone, John Coltrane, gospel, jazz, and hip hop. No music theory knowledge necessary. (Same as: AFRS 3151)

Prerequisites: AFRS 1101 or ANTH 1101.

Previous terms offered: Fall 2018.

MUS 3205 (c, IP) African Popular Music and Cultural Hybridity: Sounds, Discourses, and Critical Issues

Non-Standard Rotation. Enrollment limit: 12.

Examines the politics and poetics of cultural hybridity in the context of select popular music genres in and from Africa, and critically engages with related scholarly, nationalist, and popular discourses. Musical genres covered range from early twentieth-century West African palm wine music to contemporary manifestations of hip hop across the African continent and include musical products of post-independence cultural policies and the transnational marketing niche of “Afropop.” The rise and popularity of these genres is historicized and analyzed in the context of major social, ideological, political, and economic forces that have shaped Africa over the past 100 years, including colonialism, modern urbanization, independence movements, and globalization. Course materials include writings from the fields of ethnomusicology, cultural studies, and postcolonial theory, musical audio and video recordings, and journalistic and promotional sources, as well as film documentaries. (Same as: AFRS 3205)

Prerequisites: MUS 2000 - 2969 or AFRS 2000 - 2969 or MUS 3000 or higher or AFRS 3000 or higher.

Previous terms offered: Fall 2020.

MUS 3403 (c, VPA) Jazz Theory: Advanced Topics in Chromatic Harmony and Rhythm

Every Other Year. Enrollment limit: 16.

The practice of jazz improvisation and composition offers a tradition rich with innovations in harmony and rhythm. Many of these innovations have become integral to a wide variety of musical styles, including pop, soul, rock, and film music. Provides an opportunity to expand musical understanding and vocabulary for improvisation and composition in a variety of tonal contexts. Bridges analysis and practice, examining a variety of theoretical devices and applying them to performance, composition, and arranging. Exercises include keyboard harmony, solo transcription, improvisation practice, and composition projects. Topics include chromatic harmony, modal techniques, upper chord extensions, altered dominants, chord substitutions, song forms, and borrowed rhythmic divisions.

Prerequisites: MUS 2403.

Previous terms offered: Spring 2020.

MUS 3501 (c) Orchestration

Every Other Year. Enrollment limit: 09.

An in-depth examination of factors to consider when writing for the orchestra. Students will become familiar with the developmental histories and unique traits of all standard orchestral instruments, learn how to sonically paint with a wide variety of instrumental timbres and textures, and study instrumental techniques and tropes found in compositions ranging from the Classical era to Modern-day film scores. Projects for this course (all of which will be played by live musicians) will include writing for a string quartet, woodwind quintet, brass quintet, and full orchestra. In addition to regular class meetings, students will attend reading sessions for their projects and attend two orchestral concerts.

Prerequisites: MUS 2403 or MUS 2501.

Previous terms offered: Spring 2022, Fall 2018.

MUS 3502 (c, IP) Beyond Western Harmony: Composing with a Global Perspective

Non-Standard Rotation. Enrollment limit: 10.

Although functional harmony is the central organizing principle of Western music, it is completely absent in other complex musical systems around the world. Considers other means of music organization and how to incorporate those concepts in students' compositions. Topics include traditional polymeter in Ewe drumming, scale construction and metric design in Indian raag and taal, Confucian philosophy in Chinese sizhu music, and colotomic organization in Javanese gamelan. (Same as: ASNS 3760)

Prerequisites: MUS 2401 or MUS 2403 or MUS 2501.

Previous terms offered: Spring 2021.

MUS 3551 (c, VPA) Computer Music Composition and Sound Synthesis

Every Other Spring. Enrollment limit: 10.

Covers advanced topics in computer music. Focuses on algorithmic composition and sound synthesis. Discusses the significance of these techniques with reference to information theory, cybernetics, and cultural critiques of media technology. Students design projects in computer-assisted composition, video sound tracks, and live (real time) media applications.

Prerequisites: MUS 2551.

Previous terms offered: Spring 2022, Spring 2020.

MUS 4040 (c) Senior Project in Music

Frank Mauceri; Vineet Shende; Tracy McMullen; Clare MacKenzie.
Every Spring. Spring 2023. Enrollment limit: 15.

All senior majors must take this course, which involves either a single semester of independent work or the second semester of an honors thesis. In addition to weekly individual meetings with a faculty advisor, students meet as a group with the entire faculty several times during the semester. Must be taken in the spring of the senior year. Open only to senior music majors.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019, Fall 2018.

Neuroscience

Overview & Learning Goals

Learning Goals

Students will:

- Understand and be able to use the scientific method to arrive at conclusions based upon appropriate evidence:
 - Hypothesis development
 - Experimental design
 - Analytical reasoning and quantitative data analysis
- Know and understand fundamental concepts (e.g., in biology, psychology, chemistry) that are the underpinnings for the study of the brain and behavior.
- Become familiar with fields related to neuroscience, in particular those that neuroscience seeks to explain and those that provide tools or principles that help explain neural functioning.

- Demonstrate a broad intellectual foundation in neuroscience, including molecular, cellular, cognitive, and behavioral perspectives; and understand how these perspectives are interrelated.
- Become proficient in multiple techniques used in neuroscience research; be able to evaluate the strengths and weaknesses of each.
- Apply the scientific method to questions relevant to neuroscience; design and conduct experiments to increase understanding of fundamental questions in neuroscience.
- Learn to critically assess neuroscience literature.
- Learn to communicate scientific concepts both orally and in writing.
- Be exposed to the ethical implications of neuroscience research and the use of neuroscience in society.

Options for Majoring in the Program

Students may elect to major in neuroscience or to coordinate a major in neuroscience with digital and computational studies, education, or environmental studies. Students pursuing coordinate majors may not normally elect a second major. Bowdoin does not offer a minor in neuroscience.

Program Website (<https://www.bowdoin.edu/neuroscience/>)

Faculty

Manuel Diaz-Rios, *Program Director*

Sarah Daly, *Program Coordinator*

Professors: Manuel Diaz-Rios (Biology), Patsy S. Dickinson

(Biology)‡, Hadley Wilson Horch (Biology)

Associate Professor: Erika M. Nyhus (Psychology)‡

Assistant Professors: Jennifer Honeycutt (Psychology)

Visiting Faculty: Daniel Powell (Biology), Thomas W. Small (Psychology)

Lab Instructors: Anja Forche, Tina Rioux

Contributing Faculty: Amy S. Johnson, Mary Lou Zeeman

Faculty/Staff Website (<https://www.bowdoin.edu/neuroscience/faculty-and-staff/>)

Requirements Neuroscience Major

The major consists of thirteen courses, including ten core courses and three electives from the lists to follow.

Note: The information provided below is a listing of required and elective courses for the major in neuroscience. These courses are offered by other departments and programs within the College. Please refer to the Classfinder (<https://classfinder.bowdoin.edu/classfinder/>) and the course offerings of the departments of biology (p. 514), chemistry (p. 523), computer science (p. 541), mathematics (p. 705), physics (p. 737), and psychology (p. 741) for further information, including course descriptions, instructors, and semesters when these courses are offered.

Core Courses

Code	Title	Credits
Introductory Level and General Courses		
BIOL 1102	Biological Principles II	1
or BIOL 1109	Scientific Reasoning in Biology	
Select one of the following:		1

CHEM 1092	Introductory Chemistry and Quantitative Reasoning II	
CHEM 1102	Introductory Chemistry II	
CHEM 1109	General Chemistry	
CHEM 2250	Organic Chemistry I	1
PSYC 1101	Introduction to Psychology	1
Select one of the following:		1
PSYC 2520	Data Analysis	
MATH 1300	Biostatistics	
MATH 1400	Statistics in the Sciences	

Introductory Neuroscience Course

BIOL 2135	Neurobiology	1
or PSYC 2050	Biological Psychology	

Mid-level Neuroscience Courses

Select three of the following:		3
BIOL 2553	Neurophysiology	
BIOL 2566	Molecular Neurobiology	
BIOL 2510	Neuropharmacology	
PSYC 2750	Behavioral Neuroscience Laboratory: Affective Neuroscience	
PSYC 2775	Laboratory in Cognitive Neuroscience	

Advanced Neuroscience Courses

Select one of the following:		1
BIOL 3311	Motor Systems Neurobiology	
BIOL 3325	Topics in Neuroscience	
BIOL 3329	Neuronal Regeneration	
PSYC 3050	Hormones and Behavior	
PSYC 3055	Cognitive Neuroscience of Memory	

Electives

Code	Title	Credits
Electives		
Select three electives from the courses listed above (but not already taken), or below:		3
BIOL 1101	Biological Principles I	
BIOL 2112	Genetics and Molecular Biology	
BIOL 2124	Biochemistry and Cell Biology	
BIOL 2175	Developmental Biology	
BIOL 2214	Comparative Animal and Human Physiology	
BIOL 2423	Biochemistry of Cellular Processes	
CHEM 2320	Biochemistry	
CSCI 1101	Introduction to Computer Science	
PHYS 1140	Introductory Physics II	
PSYC 2010	Infant and Child Development	
PSYC 2025	Abnormal Psychology	
PSYC 2030	Social Psychology	
PSYC 2040	Cognitive Psychology	
PSYC 2060	Cognitive Neuroscience	
PSYC 2099	Brain, Behavior, and Evolution	
PSYC 2510	Research Design in Psychology	

Only one semester of independent study (2970–2999 or 4000–4049) or honors projects (4050 or higher) at any level can count toward the major.

Additional Information

Additional Information and Program Policies

- Normally up to two courses transferred from other institutions can be used toward the completion of the major.
- The three mid-level neuroscience courses and the required advanced neuroscience course must be taken at Bowdoin.
- Only one semester of independent study or honors at any level can count toward the major. Independent study in neuroscience may be used to fulfill one of the three elective credits.
- Students planning to graduate with honors in neuroscience must complete two semesters of advanced independent study during their senior year, in addition to other requirements.
- Majors who earn a general credit for their AP Chemistry scores based on the department of chemistry's requirements may use that general credit to fulfill the introductory chemistry requirement of the neuroscience major and do not need to take an additional course to replace it.
- Majors who place out of PSYC 1101 Introduction to Psychology must take a higher level course in psychology to replace the PSYC 1101 Introduction to Psychology requirement of the neuroscience major. In order to receive credit for advanced placement work, students must have their scores officially reported to the Office of the Registrar by the end of their sophomore year at Bowdoin.
- If majors place out of BIOL 1109 Scientific Reasoning in Biology, thirteen courses related to neuroscience must still be completed.
- Courses that count toward the major must be taken for regular letter grades (not Credit/D/Fail).
- Students must earn a C- or better for a course to count toward the major.
- Only courses that are required for the neuroscience major and a second major or minor may double-count.
- Neuroscience majors cannot also major in chemistry with a neurochemical concentration; they can, however, major in chemistry with a different concentration. Biology majors and minors, biochemistry majors, and psychology majors and minors are also prohibited from declaring a major in neuroscience.

Information for Incoming Students (p. 350)

Students interested in majoring in neuroscience should begin by taking PSYC 1101 Introduction to Psychology and/or BIOL 1102 Biological Principles II/BIOL 1109 Scientific Reasoning in Biology, both of which are required for the major. (Please see the student's biology placement to determine which course is most appropriate.) These courses serve as prerequisites for the two introductory-level neuroscience classes, BIOL 2135 Neurobiology (fall semester) and PSYC 2050 Biological Psychology (spring semester), either of which will prepare students for entry into the mid-level lab courses that form the core of the neuroscience major.

We encourage students interested in majoring in neuroscience to speak with faculty in the neuroscience program early in their Bowdoin career, particularly if they are interested in studying abroad. Students interested in beginning to explore neuroscience in their first year should consider NEUR 1099 Brains in Motion: Exploring the Interface between Mind and Body; however, they should be aware that this course will not count towards the neuroscience major.

Students are also encouraged to consult with the chemistry department (<https://www.bowdoin.edu/chemistry/>) about their placement into chemistry courses, as an introductory chemistry course and CHEM 2250 Organic Chemistry I are also required for the major.

Courses

NEUR 1099 (a, INS) Brains in Motion: Exploring the Interface between Mind and Body

Manuel Diaz-Rios.

Every Fall. Fall 2022. Enrollment limit: 24.

This course is an introductory exploration of the nervous system as it relates to bodily functions. It explores neurons as the basic building blocks of brain and behavior. Through lectures and classroom experiments, students would learn how electrochemical nerve signals control body movement, cardiovascular function, reflexes, and brain activity. Further, students explore how the nervous system can interact with machine interfaces, including prosthetics. (Same as: BIOL 1099)

Previous terms offered: Fall 2021, Spring 2021, Fall 2020.

NEUR 2050 (a) Biological Psychology

Jennifer Honeycutt.

Every Other Year. Spring 2023. Enrollment limit: 35.

An introductory survey of biological influences on behavior. The primary emphasis is on the neurobiological regulation of behavior in humans and other vertebrate animals, focusing on genetic, developmental, hormonal, and neuronal mechanisms. Additionally, the evolution of these regulatory systems is considered. This course explores the structural and functional properties of the central nervous system to understand how behavior occurs—and how it is disrupted—at the molecular, cellular, and systems level. Topics discussed may include cellular processes/communication, sensation/perception, cognition, sleep, eating, sex, and aggression. Emphasis will be placed on how biological mechanisms contribute to psychological [dys]function. (Same as: PSYC 2050)

Prerequisites: PSYC 1101 or BIOL 1102 or BIOL 1109 or Placement in above PSYC 1101 or Placement in BIOL 2000 level.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

NEUR 2055 (a) Psychoneuroimmunology

Non-Standard Rotation. Enrollment limit: 35.

This course is the study of the influence of psychological state on the communication and coordinated function among cells of the nervous system, the endocrine system, and the immune system. We will review the current molecular and cellular evidence that these systems interact through sharing the same cells, chemical messengers, and receptors. Other topics include the role of conscious thought, emotional states, meditation, depression, stress, and positivity on immune function. Through exams and written assignments, students will also evaluate the influence of the complex coordinated activity of this psycho-neuro-immuno cell system on psychogenic disease and aging via the impact on cellular detoxification, tumor surveillance, epigenetic mechanisms, and human gut microbiota. (Same as: PSYC 2055)

Prerequisites: PSYC 1101 or Placement in above PSYC 1101.

Previous terms offered: Fall 2021.

NEUR 2060 (a) Cognitive Neuroscience

Thomas Small.

Every Other Year. Fall 2022. Enrollment limit: 35.

An introduction to the neuroscientific study of cognition. Topics surveyed in the course include the neural bases of perception, attention, memory, language, executive function, and decision making. In covering these topics, the course will draw on evidence from brain imaging (fMRI, EEG, MEG), transcranial magnetic stimulation, electrophysiology, and neuropsychology. Also considers how knowledge about the brain constrains our understanding of the mind. (Same as: PSYC 2060)

Prerequisites: PSYC 1101 or BIOL 1102 or BIOL 1109 or Placement in above PSYC 1101 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2020, Fall 2018.

NEUR 2099 (a) Brain, Behavior, and Evolution

Non-Standard Rotation. Enrollment limit: 35.

A comparative and evolutionary approach to animal behavioral neuroscience. The primary focus is on the evolution of the brain and behavior in vertebrate systems, including humans, but invertebrates are also discussed. Topics include the evolution and diversity of sensory systems, reproductive behaviors, parental care, learning and memory, social behaviors, intelligence, and cognition. (Same as: PSYC 2099)

Prerequisites: PSYC 1101 or BIOL 1102 or BIOL 1109 or Placement in above PSYC 1101 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020.

NEUR 2135 (a, INS, MCSR) Neurobiology

Stephen Hauptman; Hadley Horsch.

Every Fall. Fall 2022. Enrollment limit: 35.

Examines fundamental concepts in neurobiology from the molecular to the systems level. Topics include neuronal communication, gene regulation, morphology, neuronal development, axon guidance, mechanisms of neuronal plasticity, sensory systems, and the molecular basis of behavior and disease. Weekly lab sessions introduce a wide range of methods used to examine neurons and neuronal systems. (Same as: BIOL 2135)

Prerequisites: BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

NEUR 2510 (a, INS) Neuropharmacology

Manuel Diaz-Rios; Tina Rioux.

Every Spring. Spring 2023. Enrollment limit: 24.

This course will discuss drug-induced changes in the functioning of the nervous system. The specific focus will be to provide a description of the cellular and molecular actions of drugs (natural or artificial) on the communication between neurons (known as synaptic transmission) and on the production of behaviors such as walking, breathing, heart function, and learning/memory, among others. This course will also refer to specific diseases of the nervous system and their treatment, in addition to giving an overview of the techniques used for the study of neuropharmacology. The lab portion of this course would involve the dissection and handling of mouse tissue. If you are not comfortable with the idea of dissecting mice you should not take this course. (Same as: BIOL 2510)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and either BIOL 2135 (same as NEUR 2135) or BIOL 2214 (same as NEUR 2214) or PSYC 2050 (same as NEUR 2050).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

NEUR 2553 (a, INS) Neurophysiology

Tina Rioux; Daniel Powell.

Every Fall. Fall 2022. Enrollment limit: 20.

A comparative study of the function of the nervous system in invertebrate and vertebrate animals. Topics include the mechanism that underlie both action potentials and patterns of spontaneous activity in individual nerve cells, interactions between neurons, and the organization of neurons into larger functional units. Lectures and four hours of laboratory work per week. (Same as: BIOL 2553)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 and either BIOL 2135 or BIOL 2214 or PSYC 2050.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

NEUR 2566 (a, INS) Molecular Neurobiology

Hadley Horsch; Anja Forche.

Every Spring. Spring 2023. Enrollment limit: 24.

Examination of the molecular control of neuronal structure and function. After understanding classic cloning techniques and experiments, students will learn more modern variations of techniques related to nucleic acid sequencing, protein visualization, and genetic manipulation. Additional topics such as intracellular signaling, neurotrophins and cell death, growth cone guidance, and the molecular basis of learning and memory are covered. The final portion of the course revolves around pathological disorders, such as Alzheimer's disease and spinal cord injuries, culminating in an independent investigation of the molecular basis of a neurological disorder of each student's choosing. Students will gain experience reading and interpreting primary research articles, working collaboratively in small groups, and communicating scientifically. Weekly laboratory sessions are devoted to exploring the molecular basis of compensatory plasticity in the cricket auditory system. (Same as: BIOL 2566)

Prerequisites: Two of: either BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level and either BIOL 2112 or BIOL 2124 (same as BIOC 2124) or BIOL 2135 (same as NEUR 2135) or BIOL 2553 (same as NEUR 2553) or PSYC 2050 (same as NEUR 2050).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

NEUR 2750 (a, INS) Behavioral Neuroscience Laboratory: Affective Neuroscience

Jennifer Honeycutt; Anja Forche.

Every Year. Fall 2022. Enrollment limit: 20.

A laboratory course that exposes students to modern techniques in neuroscience that can be applied to the study of affective behavior, broadly. Underlying concepts associated with various behavioral, molecular, neuroanatomical, pharmacological, and translational methods will be discussed in a lecture format. Students will apply these concepts and techniques in discussions and laboratory preparations demonstrating how affective processes are organized within the central nervous system of vertebrates. This course will explore using experimental examples how the brain influences behavior, thereby illuminating our understanding of human neuropsychological functioning. (Same as: PSYC 2750)

Prerequisites: Three of: either PSYC 2050 (same as NEUR 2050) or BIOL 2135 (same as NEUR 2135) or PSYC 2060 (same as NEUR 2060) and PSYC 2510 or either BIOL 1102 or BIOL 1109 and PSYC 2520 or either MATH 1300 or MATH 1400.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

NEUR 2775 (a, INS, MCSR) Laboratory in Cognitive Neuroscience

Thomas Small; Anja Forche.

Every Year. Spring 2023. Enrollment limit: 20.

A laboratory course that exposes students to multiple techniques in cognitive neuroscience that can be applied to the study of human cognition. Introduces human neuroimaging methods including electroencephalography (EEG) and functional magnetic resonance imaging (fMRI). Students will then use these methods to study aspects of human cognition including perception, attention, memory, language, problem solving, reasoning, and decision making. (Same as: PSYC 2775)

Prerequisites: Three of: PSYC 2040 or either PSYC 2050 (same as NEUR 2050) or PSYC 2060 (same as NEUR 2060) or BIOL 2135 (same as NEUR 2135) or PSYC 2055 (same as NEUR 2055) and PSYC 2510 or either BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level and PSYC 2520 or either MATH 1300 or MATH 1400.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

NEUR 3050 (a) Hormones and Behavior

Every Fall. Enrollment limit: 16.

An advanced discussion of concepts in behavioral neuroendocrinology. Topics include descriptions of the major classes of hormones, their roles in the regulation of development and adult behavioral expression, and the cellular and molecular mechanisms responsible for their behavioral effects. Hormonal influences on reproductive, aggressive, and parental behaviors, as well as on cognitive processes are considered. (Same as: PSYC 3050)

Prerequisites: Three of: either PSYC 2050 (same as NEUR 2050) or BIOL 2135 (same as NEUR 2135) or PSYC 2060 (same as NEUR 2060) and PSYC 2510 or either BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level and PSYC 2520 or either MATH 1300 or MATH 1400.

Previous terms offered: Spring 2022, Fall 2020, Spring 2020, Spring 2019.

NEUR 3055 (a) Cognitive Neuroscience of Memory

Every Spring. Enrollment limit: 16.

An advanced discussion of recent empirical and theoretical approaches to understanding the cognitive neuroscience of memory. Readings and discussions address empirical studies using neuroimaging methods. Topics include hippocampal and cortical contributions to memory encoding and retrieval and the effect of genetic variability, drugs, emotions, and sleep on memory. (Same as: PSYC 3055)

Prerequisites: Three of: either PSYC 2040 or PSYC 2050 (same as NEUR 2050) or PSYC 2060 (same as NEUR 2060) or BIOL 2135 (same as NEUR 2135) and Placement in BIOL 2000 level or PSYC 2510 or either BIOL 1102 or BIOL 1109 and PSYC 2520 or either MATH 1300 or MATH 1400.

Previous terms offered: Fall 2020, Fall 2018.

NEUR 3057 (a) Seminar in Behavioral Neuroscience

Non-Standard Rotation. Enrollment limit: 14.

An advanced seminar covering brain mechanisms that affect behavior in humans and other animals. Topics may include the neural circuits that regulate normal social interactions, learning and memory processes, and/or higher cognitive functions, as well as the relationship between disrupted neural functions and mental disorders. The major emphasis of the course will be on reading and discussing primary research articles in the field of behavioral neuroscience. (Same as: PSYC 3057)

Prerequisites: Three of: either PSYC 2050 (same as NEUR 2050) or PSYC 2060 (same as NEUR 2060) or BIOL 2135 (same as NEUR 2135) and PSYC 2510 or either BIOL 1102 or BIOL 1109 and PSYC 2520 or either MATH 1300 or MATH 1400.

Previous terms offered: Fall 2019.

NEUR 3058 (a) Topics in Cognitive Neuroscience

Thomas Small.

Non-Standard Rotation. Fall 2022. Enrollment limit: 14.

An advanced discussion of recent empirical and theoretical approaches to understanding cognitive neuroscience. Readings and discussions address empirical studies using neuroimaging methods. (Same as: PSYC 3058)

Prerequisites: Three of: either PSYC 2040 or PSYC 2050 (same as NEUR 2050) or PSYC 2060 (same as NEUR 2060) or BIOL 2135 (same as NEUR 2135) and PSYC 2520 or either MATH 1300 or MATH 1400 and PSYC 2510 or either BIOL 1102 or BIOL 1109 or Placement in BIOL 2000 level.

NEUR 3311 (a) Motor Systems Neurobiology

Manuel Diaz-Rios.

Non-Standard Rotation. Fall 2022. Enrollment limit: 16.

In this course you will learn about the main animal models used in the study of how the nervous system controls motor behavior as animals, including humans, interact with the environment. The course will cover the principal motor systems (including those for walking, flying, swimming, breathing, and others), focusing in particular on bridging the gap between molecular/cellular neuroscience and higher-level perception and behavior. Topics to be covered include neuroanatomy, neurophysiology and functions of the most studied animal behaviors, and the groups of interconnected neurons (termed neural circuits) that control them. Students will read, interpret, analyze, and discuss seminal (classical) and recent scientific papers from influential motor systems neurobiology laboratories. The course will also discuss the relevance of these neuronal motor systems to human diseases. (Same as: BIOL 3311)

Prerequisites: BIOL 2112 or BIOL 2124 (same as BIOC 2124) or BIOL 2135 (same as NEUR 2135) or BIOL 2175 or BIOL 2553 (same as NEUR 2553) or BIOL 2566 (same as NEUR 2566) or PSYC 2750 (same as NEUR 2750) or PSYC 2751.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019.

NEUR 3325 (a, INS) Topics in Neuroscience

Daniel Powell.
Non-Standard Rotation. Spring 2023. Enrollment limit: 15.

An advanced seminar focusing on one or more aspects of neuroscience, such as neuronal regeneration and development, modulation of neuronal activity, or the neural basis of behavior. Students read and discuss original papers from the literature. (Same as: BIOL 3325)

Prerequisites: BIOL 2135 (same as NEUR 2135) or BIOL 2553 (same as NEUR 2553) or BIOL 2566 (same as NEUR 2566) or BIOL 2588 (same as NEUR 2588) or PSYC 2750 (same as NEUR 2750)- 2751 or PSYC 2775 (same as NEUR 2775).

Previous terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019.

NEUR 3329 (a, INS) Neuronal Regeneration

Every Fall. Enrollment limit: 15.

The consequences of neuronal damage in humans, especially in the brain and spinal cord, are frequently devastating and permanent. Invertebrates, on the other hand, are often capable of complete functional regeneration. Examines the varied responses to neuronal injury in a range of species. Topics include neuronal regeneration in planaria, insects, amphibians, and mammals. Students read and discuss original papers from the literature in an attempt to understand the basis of the radically different regenerative responses mounted by a variety of neuronal systems. (Same as: BIOL 3329)

Prerequisites: BIOL 2112 or BIOL 2124 or BIOL 2135 or BIOL 2175 or BIOL 2553 or BIOL 2566 or PSYC 2750 or PSYC 2751.

Previous terms offered: Fall 2021.

Philosophy
Overview & Learning Goals
Learning Goals

The Department of Philosophy seeks to promote the following among its students:

1. The ability to articulate arguments: to say what an argument’s premises are, to justify those premises, and to explain why the conclusion follows from those premises. This requires both clear thinking and clear self-expression, particularly in writing.
2. The ability to analyze what arguments others are using to support their own conclusions.
3. The ability and willingness to engage in open-minded criticism of their own arguments and the arguments of others.
4. Familiarity with the central figures in the history of western philosophy, including their views, the arguments for their views, and notable objections to their views. Historical figures have provided a framework for philosophical discussion that is still used today, and engaging them not only teaches about the history of ideas but enhances our understanding of current philosophical debates.
5. Familiarity with contemporary philosophical debates.
6. The habits of intellectual discipline and creativity that allow independent research.
7. The habits of intellectual rigor and integrity needed for fruitful thought in all fields.

Options for Majoring or Minorin in the Department

Students may elect to major in philosophy or to coordinate the major in philosophy with digital and computational studies, education, or environmental studies. Students pursuing a coordinate major may not normally elect a second major. Non-majors may elect to minor in philosophy.

Department Website (<https://www.bowdoin.edu/philosophy/>)

Faculty

Scott R. Sehon, *Department Chair*
Marybeth Bergquist, *Department Coordinator*

Professors: Scott R. Sehon, Matthew Stuart
Associate Professor: Kristi Olson‡
Assistant Professor: Aliosha Barranco Lopez
Adjunct Lecturer: Jonathan R. Cohen

Faculty/Staff Website (<https://www.bowdoin.edu/philosophy/faculty-and-staff/>)

Requirements
Philosophy Major

The major consists of nine courses.

Code	Title	Credits
Required Courses		
PHIL 2111	Ancient Philosophy	1
PHIL 2112	Modern Philosophy	1
PHIL 2223	Logic	1
Select six additional elective courses in philosophy:		6
one course with a primary focus on epistemology and metaphysics (Philosophy 1040–1049, 1400–1499, 2400–2499, 3400–3499)		
one course with a primary focus on value theory (Philosophy 1030–1039, 1300–1399, 2300–2399, 3300–3399)		
at least two courses from the advanced level (3000–3999)		

Philosophy Minor

The minor consists of five courses.

Code	Title	Credits
Required Courses		
PHIL 2111	Ancient Philosophy	1
PHIL 2112	Modern Philosophy	1
Select one philosophy course from the intermediate level (2000–2969).		1
Select one philosophy course from the advanced level (3000–3999).		1
Select one additional philosophy elective from any level.		1

Additional Information
Additional Information and Department Policies

- Unless an exception is made by the department, a course that counts toward the major or minor must be taken for a letter grade (not Credit/D/Fail), and the student must earn a grade of C- or better.

- Topics in first-year writing seminars change from time to time but are restricted in scope and make no pretense to being an introduction to the whole field of philosophy. They are topics in which contemporary debate is lively, and as yet unsettled, and to which contributions are often being made by more than one field of learning.
- First-year writing seminars count toward the major and minor.
- Introductory courses are open to all students regardless of year and count toward the major. They do not presuppose any background in philosophy and are good first courses.
- Two semesters of independent study or honors project may count toward the major with departmental approval and two semesters of work are required to earn honors in philosophy. One semester may count toward the minor with departmental approval.
- Although courses numbered in the 3000s are advanced seminars primarily intended for majors in philosophy, adequately prepared students from other fields are also welcome. Besides stated prerequisites, at least one 2000-level course in philosophy is a helpful preparation.
- Of the nine courses required of the major, at least five must be taken at Bowdoin; of the five required for a minor, at least three must be taken at Bowdoin. Students who wish to complete the major or minor are encouraged to take PHIL 2111 Ancient Philosophy, PHIL 2112 Modern Philosophy, and PHIL 2223 Logic at Bowdoin. In some circumstances, an appropriate non-Bowdoin course may meet one of these requirements; this is determined by the department after review of the syllabus. No credit is given for either PHIL 2111 Ancient Philosophy or PHIL 2112 Modern Philosophy for a single-semester course that covers both ancient and modern philosophy; credit for PHIL 2223 Logic is typically not given for a course on critical thinking or informal logic.
- Courses cross-listed with philosophy may double-count to another department or program.

Information for Incoming Students (p. 355)

There is no single introductory course in philosophy. Students may start with a first-year writing seminar or a 1000-level course (see below), but many first-year students also choose to begin with 2000-level courses – there are no prerequisites, and no background in philosophy is assumed. The topics at the 2000-level are generally more focused and the material is more challenging. Students may choose their first course according to their interests. Those seeking a background in the history of philosophy are advised to take PHIL 2111 Ancient Philosophy: which is offered every fall, and which covers ancient Greek philosophy (pre-Socratics to Aristotle) and/or PHIL 2112 Modern Philosophy: offered every spring, which covers 17th and 18th century philosophy from Descartes to Kant.

PHIL 2223 Logic: This course differs from other philosophy courses in that it has problem sets and exams rather than papers. The course is a rigorous introduction to formal symbolic logic, and its aim is to help us in distinguishing valid from invalid arguments. The course does not presuppose any prior knowledge of logic, and is open to first-year students.

First-year writing seminars and 1000-level courses offered this fall:

PHIL 1040 Personal Identity, a first-year writing seminar. What is it that makes you a person, and what is it that makes you the same person as the little kid in your parents' photo album? Philosophers have defended a number of different answers to these questions. According to some, it is persistence of the same soul that makes for personal identity. Others argue that it is persistence of the same body that matters, or

the continuity of certain biological processes. Still others contend that it is psychological relations that matter. Canvases all of these answers and considers thought experiments about soul swapping, brain transplants, and Star Trek transporters. Readings from both historical and contemporary sources.

PHIL 1325 Philosophies to Live By: This course is dedicated to the proposition that philosophy can make life better. It can provide wisdom to guide choices and clarify values. It can offer new perspectives and new worldviews. It can provide the insight necessary for self-knowledge and growth. And it can deepen the meaning we find in our everyday lives. In this course we will read works by philosophers both ancient and contemporary concerned with the question of how to live meaningful lives. The goal will be to find ways to apply those philosophies anew so that our own lives are enriched.

PHIL 1336 Ethics for a Digital World: Digital technologies make our lives easier in many ways—e.g., we can communicate with others around the world, we can order devices to play music, we can get instant directions to go basically anywhere! But is there any ethical cost to enjoying the benefits that come from these types of technologies? This course investigates a variety of ethical issues arising from and connected with digital technology. Topics covered might include: privacy and big data; algorithmic bias; surveillance capitalism; social media and mental manipulation; fake news; internet shaming; and the moral status of superintelligence.

Courses

PHIL 1026 (c) Utopias and Dystopias

Non-Standard Rotation. Enrollment limit: 16.

Looks at and evaluates different theories of political and social organization. We will read classics of philosophy, but we will also look at works of fiction. In science fiction authors explore ideas of government and social organization which are relevant to the philosophical theories, and present these with more attention to the details and possible ramifications of such theories than works of theory can easily do. We will, for example, read John Locke on our inherent right to private property, and then read Ursula K. LeGuin's *The Dispossessed*, which presents a society in which property has been abolished. We will consider whether and when government interference in family life is justified, examining fictional and philosophical portrayals of population control. One pervasive theme will be the value or lack of value of liberty in different areas of action, and we will end by giving special attention to considerations personal and political freedom.

Previous terms offered: Fall 2020.

PHIL 1028 (c, FYS) A Philosopher's Dozen

An introduction to philosophy by way of twelve famous thought experiments. Explores central questions in metaphysics, epistemology, and ethics by considering such imaginary scenarios as the runaway trolley, Mary in the black and white room, the ailing violinist, the split-brain transplant, the evil neurosurgeon, twin earth, and the experience machine.

Previous terms offered: Fall 2019.

PHIL 1031 (c) Ethics and the Embryo

Non-Standard Rotation. Enrollment limit: 16.

This course addresses moral questions about the human embryo. For example, when, if at all, is genetic enhancement morally permissible? Is it wrong to have children? Can we harm someone simply by bringing her into existence? If the embryo has the moral status of a person, does it follow that abortion is morally impermissible? We will analyze philosophers' answers to these and related questions. Readings include essays by contemporary philosophers, including Francis Beckwith, David Benatar, Elizabeth Harman, Jeff McMahan, Don Marquis, Derek Parfit, and Judith Jarvis Thomson.

Previous terms offered: Fall 2021.

PHIL 1032 (c, FYS) Crime and Punishment

Every Year. Enrollment limit: 16.

Examines philosophical issues raised by the criminal law, including the moral justification of punishment, the proper subject matter of criminal law (that is, what should be a crime?), ethical issues in law enforcement, and the theoretical underpinnings of different criminal defenses.

Previous terms offered: Fall 2019.

PHIL 1037 (c) Race, Society, and Identity Politics

Non-Standard Rotation. Enrollment limit: 16.

Race is relevant for understanding many aspects of society, including political disagreement, identity, political affiliation, and social inequities. This course philosophically examines the sociopolitical role of race in society, focusing (though not exclusively) on two issues: (1) whether white people play "identity politics" or whether only people of color do and (2) whether the concept of racism is "inflated" (whether "racism" is overused). Answering these questions requires knowledge of the underlying concepts: What is identity politics? What is racism? The value and implications of philosophical analysis for understanding race as a sociopolitical phenomenon are also examined. Readings draw from several disciplines and methodologies, including philosophy, sociology, psychology, whiteness studies, decolonial studies, critical race theory, black male studies, and intersectionality. Examples of scholars we may read: Tommy Curry, Woody Doane, Ashley Jardina, Maria Lugones, and Charles Mills.

Previous terms offered: Spring 2021.

PHIL 1040 (c) Personal Identity

Matthew Stuart.

Every Other Year. Fall 2022. Enrollment limit: 16.

What is it that makes you a person, and what is it that makes you the same person as the little kid in your parents' photo album? Philosophers have defended a number of different answers to these questions. According to some, it is persistence of the same soul that makes for personal identity. Others argue that it is persistence of the same body that matters, or the continuity of certain biological processes. Still others contend that it is psychological relations that matter. Canvases all of these answers and considers thought experiments about soul swapping, brain transplants, and Star Trek transporters. Readings from both historical and contemporary sources.

Previous terms offered: Fall 2020, Fall 2018.

PHIL 1252 (c) Death

Matthew Stuart.

Every Other Year. Spring 2023. Enrollment limit: 50.

Considers distinctively philosophical questions about death. Do we have immortal souls? Is immortality even desirable? Is death a bad thing? Is suicide morally permissible? Does the inevitability of death rob life of its meaning? Readings from historical and contemporary sources.

Previous terms offered: Spring 2020.

PHIL 1311 (c) Socialism, Capitalism, and Democracy

Every Other Fall. Enrollment limit: 50.

Explores and critically evaluates philosophical arguments for and against socialism. Questions include: What does the word "socialism" mean? Does socialism violate individual rights? What is the relationship between socialism and capitalism? Between socialism and democracy? Readings from mostly contemporary sources, including work by philosophers, economists, and politicians.

Previous terms offered: Fall 2021.

PHIL 1321 (c) Philosophical Issues of Gender and Race

Non-Standard Rotation. Enrollment limit: 50.

Explores contemporary issues of gender and race. Possible topics include the social construction of race and gender, implicit bias, racial profiling, pornography, the gender wage gap, affirmative action, race and incarceration, transgender issues, and reparations for past harms. Readings drawn from philosophy, legal studies, and the social sciences. (Same as: GSWS 1321)

Previous terms offered: Spring 2022, Fall 2018.

PHIL 1322 (c) Philosophy and Tragedy

Non-Standard Rotation. Enrollment limit: 50.

Tragedy is arguably the most philosophical of art forms. Examines philosophical questions distinctly raised by tragedy – questions concerning the nature of the cosmos, the place of human within the cosmos, suffering, nihilism, moral responsibility, and the components of a flourishing life. Aims to engage with the works of the great Greek tragedians Aeschylus, Sophocles, and Euripides in consultation with the philosophical theories of Aristotle, Hume, Nietzsche, Bernard Williams, Donald Davidson, and Martha Nussbaum, among others.

Previous terms offered: Fall 2020.

PHIL 1325 (c) Philosophies to Live By

Jonathan Cohen.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

This course is dedicated to the proposition that philosophy can make life better. It can provide wisdom to guide choices and clarify values. It can offer new perspectives and new worldviews. It can provide the insight necessary for self-knowledge and growth. And it can deepen the meaning we find in our everyday lives. In this course we will read works by philosophers both ancient and contemporary concerned with the question of how to live meaningful lives. The goal will be to find ways to apply those philosophies anew so that our own lives are enriched.

PHIL 1336 (c) Ethics for a Digital World

Aliosha Barranco Lopez.

Non-Standard Rotation. Fall 2022. Enrollment limit: 50.

Digital technologies make our lives easier in many ways—e.g., we can communicate with others around the world, we can order devices to play music, we can get instant directions to go basically anywhere! But is there any ethical cost to enjoying the benefits that come from these types of technologies? This course investigates a variety of ethical issues arising from and connected with digital technology. Topics covered might include privacy and big data, algorithmic bias, surveillance capitalism, social media and mental manipulation, fake news, internet shaming, and the moral status of superintelligence. (Same as: DCS 1650)

PHIL 1350 (c) Happiness

Non-Standard Rotation. Enrollment limit: 50.

What is happiness? Should we strive to be happy? Does everyone strive to be happy? What is the relationship between a happy life and a meaningful life? Begins by focusing on these philosophical questions and considers discussions from Plato to the present. In addition, aims to connect philosophical discussions of happiness and well-being to recent empirical work. Particularly interested in questions about how we measure and evaluate the happiness and well-being of ourselves and others.

Previous terms offered: Spring 2022, Spring 2021, Spring 2020.

PHIL 1352 (c) Latin American Philosophy

Non-Standard Rotation. Enrollment limit: 50.

Latin American philosophy is a philosophy born of struggle, a body of thought whose metaphysical, epistemological, ethical, and political identity is tied up with the problems of colonization, decolonization, and liberation in a Latin American context. This course will philosophically assess classical and contemporary thought in Latin American Philosophy, and will discuss issues such as immigration, xenophobia/racism, liberation, racial and ethnic identity, assimilation/aculturation, the black/white binary, Latinx feminisms, and the Spanish language. Our primary textbook will be Robert Eli Sanchez's edited anthology and topical introduction, *Latin American and Latinx Philosophy: A Collaborative Introduction* (2020). Though the course is arranged topically, we will begin by establishing the historical context of Latin American thought. We will read excerpts from Bartolome de las Casas and Eduardo Galeano's *Open Veins of Latin America: Five Centuries of the Pillage of a Continent*. Classical philosophers we may read include Simon Bolivar, Leopoldo Zea, Jose Marti and Jose Vasconcelos. Contemporary scholars may include Enrique Dussel, Gloria Anzaldua, Jose Antonio-Orosco, Jorge J. E. Gracia, and Richard Delgado. (Same as: LACL 2320)

Previous terms offered: Fall 2020.

PHIL 1430 (c) Philosophy and the Internet

Non-Standard Rotation. Enrollment limit: 50.

Explores philosophical questions about knowledge and belief in the age of the internet. Search engine results and social media are sources of knowledge, but also of fake news, conspiracy theories, epistemic bubbles, echo chambers, and polarization. Philosophical theories and tools are introduced to distinguish justified and unjustified beliefs and reliable and unreliable sources online.

Previous terms offered: Fall 2021.

PHIL 1434 (c) Free Will and Moral Responsibility

Every Other Fall. Enrollment limit: 50.

We hold people responsible for their actions: we get credit and praise for nice things we do or good papers that we write; we are blamed if we break a promise or if we plagiarize a paper. In holding one another responsible in these ways, we seem to presuppose that people have free will, for it seems that we should not hold people responsible if they did not act freely. But what if all human behavior can be explained scientifically, as is suggested by current neuroscience research? What if determinism is true, and all our behaviors have been causally determined by events that took place before we were born? Readings from contemporary philosophers (Robert Kane, Alfred Mele, Manuel Vargas, and others) and psychologists (Benjamin Libet).

Previous terms offered: Fall 2018.

PHIL 1442 (c) Philosophy of Religion

Every Other Year. Enrollment limit: 50.

Does God exist? Can the existence of God be proven? Can it be disproven? Is it rational to believe in God? What does it mean to say that God exists (or does not exist)? What distinguishes religious beliefs from non-religious beliefs? What is the relation between religion and science? Approaches these and related questions through a variety of historical and contemporary sources, including philosophers, scientists, and theologians. (Same as: REL 1142)

Previous terms offered: Spring 2022, Fall 2019.

PHIL 2111 (c) Ancient Philosophy

Aliosha Barranco Lopez.

Every Fall. Spring 2023. Enrollment limit: 35.

This course will involve careful study of the works of Plato and Aristotle—two major influences on western thought. We will explore a wide range of philosophical problems, including the nature of the good life, the organization of the just city, and the nature of knowledge. At various junctures, we will compare the answers these ancient thinkers gave to the treatment these problems have received by later historical figures and contemporary philosophers.

Previous terms offered: Fall 2021, Fall 2020, Fall 2019, Fall 2018.

PHIL 2112 (c) Modern Philosophy

Matthew Stuart.
